ACKNOWLEDGEMENTS

This reprint of unrevised occupational data from Volume 1 of the CCDO (1971) was arranged by the Operations Division of the National Occupational Analysis and Classification Systems Branch, Employment and Immigration Canada.

Digitized by the Internet Archive
in 2023 with funding from
University of Toronto

<https://archive.org/details/31761117671446>

IMPORTANT NOTICE

Volume 1 of the Canadian Classification and Dictionary of Occupations (CCDO) was published in 1971; since then, a number of the 23 major groups of occupations appearing in Volume 1 have been revised and republished in soft covered booklets.

This publication is strictly a reprint of all CCDO major groups that have not been revised since 1971.

Any additional descriptions that have been developed for occupations in these unrevised groups will appear in the latest edition of the CCDO GUIDE.

It is essential that this booklet always be used in conjunction with the CCDO GUIDE which is available from the Canadian Government Publishing Centre, Supply and Services, Hull, Quebec, K1A 0S9, or their agents across Canada.

SPECIAL NOTICE

In determining the data for inclusion in CCDO publications, many thousands of jobs were examined and analyzed to determine their content. No facts were collected, however, on such matters as hours of labour, wages or salaries, or other related employment practices.

As the content of specific jobs varies with each individual establishment most of the occupational definitions describe the work performed in broad terms. For these reasons, the data in this publication cannot be considered as standards for setting working conditions, pay scales or related employment conditions, and Employment and Immigration Canada accepts no responsibility for the setting of these or other jurisdictional matters.

It is to be noted that the presence or absence of Physical Activities (PA) factors in a CCDO occupational definition is not to be misconstrued as indicating that the physically handicapped can or cannot perform the duties of that occupations.

THE CCDO STRUCTURE BY MAJOR GROUP

11	Managerial, Administrative and Related Occupations	THIS BOOK
21	Occupations in Natural Sciences, Engineering and Mathematics	
23	Occupations in Social Sciences and Related Fields	
25	Occupations in Religion	
27	Teaching and Related Occupations	
31	Occupations in Medicine and Health	
33	Artistic, Literary, Performing Arts and Related Occupations	THIS BOOK
37	Occupations in Sport and Recreation	
41	Clerical and Related Occupations	
51	Sales Occupations	
61	Service Occupations	
71	Farming, Horticultural and Animal-Husbandry Occupations	
73	Fishing, Trapping and Related Occupations	THIS BOOK
75	Forestry and Logging Occupations	
77	Mining and Quarrying Including Oil and Gas Field Occupations	
81/82	Processing Occupations	
83	Machining and Related Occupations	
85	Product Fabricating, Assembling and Repairing Occupations	
87	Construction Trades Occupations	THIS BOOK
91	Transport Equipment Operating Occupations	
93	Material-Handling and Related Occupations, n.e.c.	
95	Other Crafts and Equipment Operating Occupations	
99	Occupations Not Elsewhere Classified	

UNIT GROUPS

MAJOR GROUP 11 - MANAGERIAL, ADMINISTRATIVE AND RELATED OCCUPATIONS

111 OFFICIALS AND ADMINISTRATORS UNIQUE TO GOVERNMENT

- 1111 Members of Legislative Bodies
- 1113 Government Administrators
- 1115 Postmasters
- 1116 Inspectors and Regulatory Officers, Government
- 1119 Officials and Administrators Unique to Government, n.e.c.

113/114 OTHER MANAGERS AND ADMINISTRATORS

- 1130 General Managers and Other Senior Officials
- 1131 Management Occupations: Natural Sciences, Engineering and Mathematics
- 1132 Management Occupations, Social Sciences and Related Fields
- 1133 Administrators in Teaching and Related Fields
- 1134 Administrators in Medicine and Health
- 1135 Financial Management Occupations
- 1136 Personnel and Industrial Relations Management Occupations
- 1137 Sales and Advertising Management Occupations
- 1141 Purchasing Management Occupations
- 1142 Services Management Occupations
- 1143 Production Management Occupations
- 1145 Management Occupations, Construction Operations
- 1147 Management Occupations, Transport and Communications Operations
- 1149 Other Managers and Administrators, n.e.c.

117 OCCUPATIONS RELATED TO MANAGEMENT AND ADMINISTRATION

- 1171 Accountants, Auditors and Other Financial Officers
- 1173 Organization and Methods Analysts
- 1174 Personnel and Related Officers
- 1175 Purchasing Officers and Buyers, Except Wholesale and Retail Trade
- 1176 Inspectors and Regulatory Officers, Non-Government
- 1179 Occupations Related to Management and Administration, n.e.c.

**MAJOR GROUP 21 - OCCUPATIONS IN NATURAL
SCIENCES, ENGINEERING AND MATHEMATICS**

211 OCCUPATIONS IN PHYSICAL SCIENCES

- 2111 Chemists
- 2112 Geologists and Related Occupations
- 2113 Physicists
- 2114 Meteorologists
- 2117 Physical Sciences Technologists and Technicians
- 2119 Occupations in Physical Sciences, n.e.c.

213 OCCUPATIONS IN LIFE SCIENCES

- 2131 Agriculturists and Related Scientists
- 2133 Biologists and Related Scientists
- 2135 Life Sciences Technologists and Technicians
- 2139 Occupations in Life Sciences, n.e.c.

214/215 ARCHITECTS AND ENGINEERS

- 2141 Architects
- 2142 Chemical Engineers
- 2143 Civil Engineers
- 2144 Electrical Engineers
- 2145 Industrial Engineers
- 2147 Mechanical Engineers
- 2151 Metallurgical Engineers
- 2153 Mining Engineers
- 2154 Petroleum Engineers
- 2155 Aerospace Engineers
- 2157 Nuclear Engineers
- 2159 Architects and Engineers, n.e.c.

216 OTHER OCCUPATIONS IN ARCHITECTURE AND ENGINEERING

- 2160 Supervisors, Other Occupations in Architecture and Engineering
- 2161 Surveyors
- 2163 Draughtsmen
- 2165 Architectural and Engineering Technologists and Technicians
- 2169 Other Occupations in Architecture and Engineering, n.e.c.

**218 OCCUPATIONS IN MATHEMATICS, STATISTICS, SYSTEMS
ANALYSIS AND RELATED FIELDS**

- 2181 Mathematicians, Statisticians and Actuaries
- 2183 Systems Analysts, Computer Programmers and Related Occupations
- 2189 Occupations in Mathematics, Statistics, Systems Analysis and Related Fields,
n.e.c.

MAJOR GROUP 33 - ARTISTIC, LITERARY, PERFORMING ARTS AND RELATED OCCUPATIONS

331 OCCUPATIONS IN FINE AND COMMERCIAL ART, PHOTOGRAPHY AND RELATED FIELDS

- 3311 Painters, Sculptors and Related Artists
- 3313 Product and Interior Designers
- 3314 Advertising and Illustrating Artists
- 3315 Photographers and Cameramen
- 3319 Occupations in Fine and Commercial Art, Photography and Related Fields,
n.e.c.

333 OCCUPATIONS IN PERFORMING AND AUDIOVISUAL ARTS

- 3330 Producers and Directors, Performing and Audiovisual Arts
- 3332 Musicians
- 3333 Choreographers and Dancers
- 3335 Actors
- 3337 Radio and Television Announcers
- 3339 Occupations in Performing and Audiovisual Arts, n.e.c.

335 OCCUPATIONS IN WRITING

- 3351 Writers and Editors, Publication
- 3353 Writers and Editors: Radio, Television, Theatre and Motion Pictures
- 3355 Translators and Interpreters
- 3359 Occupations in Writing, n.e.c.

MAJOR GROUP 37 - OCCUPATIONS IN SPORT AND RECREATION

371 OCCUPATIONS IN SPORT AND RECREATION

- 3710 Coaches, Trainers, Instructors and Managers, Sport and Recreation
- 3711 Referees and Related Officials
- 3713 Athletes
- 3715 Attendants, Sport and Recreation
- 3719 Occupations in Sport and Recreation, n.e.c.

MAJOR GROUP 41 - CLERICAL AND RELATED OCCUPATIONS

411 STENOGRAPHIC AND TYPING OCCUPATIONS

- 4110 Supervisors, Stenographic and Typing Occupations
- 4111 Secretaries and Stenographers
- 4113 Typists and Clerk-Typists

413 BOOKKEEPING, ACCOUNT-RECORDING AND RELATED OCCUPATIONS

- 4130 Supervisors, Bookkeeping, Account-Recording and Related Occupations
- 4131 Bookkeepers and Accounting Clerks
- 4133 Tellers and Cashiers
- 4135 Insurance, Bank and Other Finance Clerks
- 4137 Statistical Clerks
- 4139 Bookkeeping, Account-Recording and Related Occupations, n.e.c.

414 OFFICE MACHINE AND ELECTRONIC DATA-PROCESSING EQUIPMENT OPERATORS

- 4140 Supervisors, Office Machine and Electronic Data-Processing Equipment Operators
- 4141 Office Machine Operators
- 4143 Electronic Data-Processing Equipment Operators

415 MATERIAL RECORDING, SCHEDULING AND DISTRIBUTING OCCUPATIONS

- 4150 Supervisors: Material Recording, Scheduling and Distributing Occupations
- 4151 Production Clerks
- 4153 Shipping and Receiving Clerks
- 4155 Stock Clerks and Related Occupations
- 4157 Weighers
- 4159 Material Recording, Scheduling and Distributing Occupations, n.e.c.

416 LIBRARY, FILE AND CORRESPONDENCE CLERKS AND RELATED OCCUPATIONS

- 4160 Supervisors: Library, File and Correspondence Clerks and Related Occupations
- 4161 Library and File Clerks
- 4169 Library, File and Correspondence Clerks and Related Occupations, n.e.c.

417 RECEPTION, INFORMATION, MAIL AND MESSAGE DISTRIBUTION OCCUPATIONS

- 4170 Supervisors: Reception, Information, Mail and Message Distribution Occupations
- 4171 Receptionists and Information Clerks
- 4172 Mail Carriers
- 4173 Mail and Postal Clerks
- 4175 Telephone Operators
- 4177 Messengers
- 4179 Reception, Information, Mail and Message Distribution Occupations, n.e.c.

419 OTHER CLERICAL AND RELATED OCCUPATIONS

- 4190 Supervisors, Other Clerical and Related Occupations, n.e.c.
- 4191 Collectors
- 4192 Adjusters, Claim
- 4193 Travel Clerks, Ticket, Station and Freight Agents
- 4194 Hotel Clerks
- 4195 Personnel Clerks
- 4197 General Office Clerks
- 4199 Other Clerical and Related Occupations, n.e.c.

MAJOR GROUP 51 - SALES OCCUPATIONS

513/514 SALES OCCUPATIONS, COMMODITIES

- 5130 Supervisors: Sales Occupations, Commodities
- 5131 Technical Salesmen and Related Advisers
- 5133 Commercial Travellers
- 5135 Salesmen and Salespersons, Commodities, n.e.c.
- 5137 Sales Clerks, Commodities
- 5141 Street Vendors and Door-to-Door Salesmen
- 5143 Newsboys
- 5145 Service Station Attendants
- 5149 Sales Occupations, Commodities, n.e.c.

517 SALES OCCUPATIONS, SERVICES

- 5170 Supervisors: Sales Occupations, Services
- 5171 Insurance Salesmen and Agents
- 5172 Real Estate Salesmen
- 5173 Salesmen and Traders, Securities
- 5174 Advertising Salesmen
- 5177 Business Services Salesmen
- 5179 Sales Occupations: Services, n.e.c.

519 OTHER SALES OCCUPATIONS

- 5190 Supervisors, Other Sales Occupations
- 5191 Buyers, Wholesale and Retail Trade
- 5193 Driver-Salesmen
- 5199 Other Sales Occupations, n.e.c.

MAJOR GROUP 81/82 - PROCESSING OCCUPATIONS

811 MINERAL ORE TREATING OCCUPATIONS

- 8110 Foremen, Mineral Ore Treating Occupations
- 8111 Crushing and Grinding Occupations, Mineral Ores
- 8113 Mixing, Separating, Filtering and Related Occupations, Mineral Ores
- 8115 Melting and Roasting Occupations, Mineral Ores
- 8116 Inspecting, Testing, Grading and Sampling Occupations, Mineral Ore Treating
- 8118 Occupations in Labouring and Other Elemental Work, Mineral Ore Treating
- 8119 Mineral Ore Treating Occupations, n.e.c.

813/814 METAL PROCESSING AND RELATED OCCUPATIONS

- 8130 Foremen, Metal Processing and Related Occupations
- 8131 Metal Smelting, Converting and Refining Furnacemen
- 8133 Metal Heat-Treating Occupations
- 8135 Metal Rolling Occupations
- 8137 Moulding, Coremaking and Metal Casting Occupations
- 8141 Metal Extruding and Drawing Occupations
- 8143 Plating, Metal Spraying and Related Occupations
- 8146 Inspecting, Testing, Grading, and Sampling Occupations, Metal Processing
- 8148 Occupations in Labouring and Other Elemental Work, Metal Processing
- 8149 Metal Processing and Related Occupations, n.e.c.

815 CLAY, GLASS AND STONE PROCESSING, FORMING AND RELATED OCCUPATIONS

- 8150 Foremen: Clay, Glass and Stone Processing, Forming and Related Occupations
- 8151 Furnacemen and Kilnmen: Clay, Glass and Stone
- 8153 Separating, Crushing, Grinding and Mixing Occupations: Clay, Glass and Stone
- 8155 Forming Occupations: Clay, Glass and Stone
- 8156 Inspecting, Testing and Grading Occupations: Clay, Glass and Stone Processing and Forming
- 8158 Occupations in Labouring and Other Elemental Work: Clay, Glass and Stone Processing and Forming
- 8159 Clay, Glass and Stone Processing, Forming and Related Occupations, n.e.c.

816/817 CHEMICALS, PETROLEUM, RUBBER, PLASTIC AND RELATED MATERIALS PROCESSING OCCUPATIONS

- 8160 Foremen: Chemicals, Petroleum, Rubber, Plastic and Related Materials Processing Occupations
- 8161 Mixing and Blending Occupations, Chemicals and Related Materials
- 8163 Filtering, Straining and Separating Occupations, Chemicals and Related Materials
- 8165 Distilling, Subliming and Carbonizing Occupations, Chemicals and Related Materials
- 8167 Roasting, Cooking and Drying Occupations, Chemicals and Related Materials
- 8171 Crushing and Grinding Occupations, Chemicals and Related Materials
- 8173 Coating and Calendering Occupations, Chemicals and Related Materials
- 8176 Inspecting, Testing and Sampling Occupations: Chemicals, Petroleum, Rubber, Plastic and Related Materials Processing
- 8178 Occupations in Labouring and Other Elemental Work: Chemicals, Petroleum, Rubber, Plastic and Related Materials Processing
- 8179 Chemicals, Petroleum, Rubber, Plastic and Related Materials Processing Occupations, n.e.c.

821/822 FOOD, BEVERAGE AND RELATED PROCESSING OCCUPATIONS

- 8210 Foremen: Food, Beverage and Related Processing Occupations
- 8211 Flour and Grain Milling Occupations
- 8213 Baking, Confectionery Making and Related Occupations
- 8215 Slaughtering and Meat Cutting, Canning, Curing and Packing Occupations
- 8217 Fish Canning, Curing and Packing Occupations
- 8221 Fruit and Vegetable Canning, Preserving and Packing Occupations
- 8223 Milk Processing and Related Occupations
- 8225 Sugar Processing and Related Occupations
- 8226 Inspecting, Testing, Grading and Sampling Occupations: Food, Beverage and Related Processing
- 8227 Beverage Processing Occupations
- 8228 Occupations in Labouring and Other Elemental Work: Food, Beverage and Related Processing
- 8229 Food, Beverage and Related Processing Occupations, n.e.c.

823 WOOD PROCESSING OCCUPATIONS, EXCEPT PAPER PULP

- 8230 Foremen: Wood Processing Occupations, Except Paper Pulp
- 8231 Sawmill Sawyers and Related Occupations
- 8233 Plywood Making and Related Occupations
- 8235 Wood Treating Occupations
- 8236 Inspecting, Testing and Grading Occupations: Wood Processing, Except Paper Pulp
- 8238 Occupations in Labouring and Other Elemental Work: Wood Processing, Except Paper Pulp
- 8239 Wood Processing Occupations, Except Paper Pulp, n.e.c.

825 PULP AND PAPERMAKING AND RELATED OCCUPATIONS

- 8250 Foremen, Pulp and Papermaking and Related Occupations
- 8251 Cellulose Pulp Preparing Occupations
- 8253 Papermaking and Finishing Occupations
- 8256 Inspecting, Testing, Grading and Sampling Occupations, Pulp and Papermaking
- 8258 Occupations In Labouring and Other Elemental Work, Pulp and Papermaking
- 8259 Pulp and Papermaking and Related Occupations, n.e.c.

826/827 TEXTILE PROCESSING OCCUPATIONS

- 8260 Foremen, Textile Processing Occupations
- 8261 Textile Fibre Preparing Occupations
- 8263 Textile Spinning and Twisting Occupations
- 8265 Textile Winding and Reeling Occupations
- 8267 Textile Weaving Occupations
- 8271 Knitting Occupations
- 8273 Textile Bleaching and Dyeing Occupations
- 8275 Textile Finishing and Calendering Occupations
- 8276 Inspecting, Testing, Grading and Sampling Occupations, Textile Processing
- 8278 Occupations in Labouring and Other Elemental Work, Textile Processing
- 8279 Textile Processing Occupations, n.e.c.

829 OTHER PROCESSING OCCUPATIONS

- 8290 Foremen, Other Processing Occupations
- 8293 Tobacco Processing Occupations
- 8295 Hide and Pelt Processing Occupations
- 8296 Inspecting, Testing, Grading and Sampling Occupations, Processing, n.e.c.
- 8298 Occupations in Labouring and Elemental Work, Other Processing
- 8299 Other Processing Occupations, n.e.c.

MAJOR GROUP 83 - MACHINING AND RELATED OCCUPATIONS

831 METAL MACHINING OCCUPATIONS

- 8310 Foremen, Metal Machining Occupations
- 8311 Tool-and Die-Making Occupations
- 8313 Machinist and Machine-Tool Setting-Up Occupations
- 8315 Machine-Tool Operating Occupations
- 8316 Inspecting and Testing Occupations, Metal Machining
- 8319 Metal Machining Occupations, n.e.c.

833 METAL SHAPING AND FORMING OCCUPATIONS, EXCEPT MACHINING

- 8330 Foremen, Metal Shaping and Forming Occupations, Except Machining
- 8331 Forging Occupations
- 8333 Sheet-Metal Workers
- 8334 Metalworking-Machine Operators, n.e.c.
- 8335 Welding and Flame Cutting Occupations
- 8336 Inspecting and Testing Occupations, Metal Shaping and Forming, Except Machining
- 8337 Boilermakers, Platers and Structural-Metal Workers
- 8339 Metal Shaping and Forming Occupations, Except Machining, n.e.c.

835 WOOD MACHINING OCCUPATIONS

- 8350 Foremen, Wood Machining Occupations
- 8351 Wood Patternmaking Occupations
- 8353 Wood Sawing and Related Occupations, Except Sawmill
- 8355 Planing, Turning, Shaping and Related Wood Machining Occupations
- 8356 Inspecting Occupations, Wood Machining
- 8357 Wood Sanding Occupations
- 8359 Wood Machining Occupations, n.e.c.

837 CLAY, GLASS, STONE AND RELATED MATERIALS MACHINING OCCUPATIONS

- 8370 Foremen: Clay, Glass, Stone and Related Materials Machining Occupations
- 8371 Cutting and Shaping Occupations: Clay, Glass, Stone and Related Materials
- 8373 Abrading and Polishing Occupations: Clay, Glass, Stone and Related Materials
- 8376 Inspecting Occupations: Clay, Glass, Stone and Related Materials Machining
- 8379 Clay, Glass, Stone and Related Materials Machining Occupations, n.e.c.

839 OTHER MACHINING AND RELATED OCCUPATIONS

- 8390 Foremen, Other Machining and Related Occupations, n.e.c.
- 8391 Engravers, Etchers and Related Occupations
- 8393 Filing, Grinding, Buffing, Cleaning and Polishing Occupations, n.e.c.
- 8395 Patternmakers and Mouldmakers, n.e.c.
- 8396 Inspecting and Testing Occupations, Machining, n.e.c.
- 8399 Other Machining and Related Occupations, n.e.c.

**MAJOR GROUP 85 - PRODUCT FABRICATING,
ASSEMBLING AND REPAIRING OCCUPATIONS**

**851/852 FABRICATING AND ASSEMBLING OCCUPATIONS, METAL
PRODUCTS, N.E.C.**

- 8510 Foremen, Fabricating and Assembling Occupations, Metal Products, n.e.c.
- 8511 Engine and Related Equipment Fabricating and Assembling Occupations,
n.e.c.
- 8513 Motor Vehicle Fabricating and Assembling Occupations, n.e.c.
- 8515 Aircraft Fabricating and Assembling Occupations, n.e.c.
- 8523 Industrial, Farm, Construction and Other Mechanized Equipment and
Machinery Fabricating and Assembling Occupations, n.e.c.
- 8525 Business and Commercial Machines Fabricating and Assembling Occupations,
n.e.c.
- 8526 Inspecting and Testing Occupations, Fabricating and Assembling Metal
Products, n.e.c.
- 8527 Precision Instruments and Related Equipment Fabricating and Assembling
Occupations, n.e.c.
- 8528 Occupations in Labouring and Other Elemental Work, Fabricating and
Assembling Metal Products, n.e.c.
- 8529 Other Fabricating and Assembling Occupations, Metal Products, n.e.c.

**853 FABRICATING, ASSEMBLING, INSTALLING AND REPAIRING
OCCUPATIONS: ELECTRICAL, ELECTRONIC AND RELATED
EQUIPMENT**

- 8530 Foremen: Fabricating, Assembling, Installing and Repairing Occupations,
Electrical, Electronic and Related Equipment
- 8531 Electrical Equipment Fabricating and Assembling Occupations
- 8533 Electrical and Related Equipment Installing and Repairing Occupations, n.e.c.
- 8534 Electronic Equipment Fabricating and Assembling Occupations
- 8535 Electronic and Related Equipment Installing and Repairing Occupations, n.e.c.
- 8536 Inspecting and Testing Occupations: Fabricating, Assembling, Installing and
Repairing Electrical, Electronic and Related Equipment
- 8537 Radio and Television Service Repairmen
- 8538 Occupations in Labouring and Other Elemental Work: Fabricating,
Assembling, Installing and Repairing Electrical, Electronic and Related
Equipment
- 8539 Fabricating, Assembling, Installing and Repairing Occupations: Electrical,
Electronic and Related Equipment, n.e.c.

**854 FABRICATING, ASSEMBLING AND REPAIRING OCCUPATIONS,
WOOD PRODUCTS**

- 8540 Foremen: Fabricating, Assembling and Repairing Occupations, Wood
Products
- 8541 Cabinet and Wood Furniture Makers
- 8546 Inspecting and Grading Occupations: Fabricating, Assembling and Repairing,
Wood Products
- 8548 Occupations in Labouring and Other Elemental Work: Fabricating,
Assembling and Repairing, Wood Products
- 8549 Fabricating, Assembling and Repairing Occupations, Wood Products, n.e.c.

**855/856 FABRICATING, ASSEMBLING AND REPAIRING
OCCUPATIONS: TEXTILE, FUR AND LEATHER PRODUCTS**

- 8550 Foremen: Fabricating, Assembling and Repairing Occupations: Textile, Fur and Leather Products
- 8551 Patternmaking, Marking and Cutting Occupations: Textile, Fur and Leather Products
- 8553 Tailors and Dressmakers
- 8555 Furriers
- 8557 Milliners, Hat and Cap Makers
- 8561 Shoemaking and Repairing Occupations
- 8562 Upholsterers
- 8563 Sewing Machine Operators, Textile and Similar Materials
- 8566 Inspecting, Grading and Sampling Occupations: Fabricating, Assembling and Repairing, Textile, Fur and Leather Products
- 8568 Occupations in Labouring and Other Elemental Work: Fabricating, Assembling and Repairing, Textile, Fur and Leather Products
- 8569 Fabricating, Assembling and Repairing Occupations: Textile, Fur and Leather Products, n.e.c.

**857 FABRICATING, ASSEMBLING AND REPAIRING OCCUPATIONS,
RUBBER, PLASTIC AND RELATED PRODUCTS**

- 8570 Foremen: Fabricating, Assembling and Repairing Occupations, Rubber, Plastic and Related Products
- 8571 Bonding and Cementing Occupations, Rubber, Plastic and Related Products
- 8573 Moulding Occupations, Rubber, Plastic and Related Products
- 8575 Cutting and Finishing Occupations, Rubber, Plastic and Related Products
- 8576 Inspecting, Testing, Grading and Sampling Occupations: Fabricating, Assembling and Repairing, Rubber, Plastic and Related Products
- 8578 Occupations in Labouring and Other Elemental Work: Fabricating, Assembling and Repairing, Rubber, Plastic and Related Products
- 8579 Fabricating, Assembling and Repairing Occupations, Rubber, Plastic and Related Products, n.e.c.

858 MECHANICS AND REPAIRMEN, N.E.C.

- 8580 Foremen: Mechanics and Repairmen, n.e.c.
- 8581 Motor-Vehicle Mechanics and Repairmen
- 8582 Aircraft Mechanics and Repairmen
- 8583 Rail Transport Equipment Mechanics and Repairmen
- 8584 Industrial, Farm and Construction Machinery Mechanics and Repairmen
- 8585 Business and Commercial Machine Mechanics and Repairmen
- 8586 Inspecting and Testing Occupations, Equipment Repair, n.e.c.
- 8587 Watch and Clock Repairmen
- 8588 Precision-Instrument Mechanics and Repairmen
- 8589 Other Mechanics and Repairmen, n.e.c.

**859 OTHER PRODUCT FABRICATING, ASSEMBLING AND REPAIRING
OCCUPATIONS**

- 8590 Foremen: Product Fabricating, Assembling and Repairing Occupations, n.e.c.
- 8591 Jewellery and Silverware Fabricating, Assembling and Repairing Occupations
- 8592 Marine Craft Fabricating, Assembling and Repairing
- 8593 Paper Product Fabricating and Assembling Occupations
- 8595 Painting and Decorating Occupations, Except Construction
- 8596 Inspecting, Testing and Grading Occupations: Product Fabricating,
Assembling and Repairing, n.e.c.
- 8598 Occupations in Labouring and Other Elemental Work: Product Fabricating,
Assembling and Repairing, n.e.c.
- 8599 Other Product Fabricating, Assembling and Repairing Occupations, n.e.c.

MASTER TITLES AND DEFINITIONS

(See **CHARACTERISTICS OF THE CCDO** for explanation of master titles and definitions and their applications)

01-060 DESIGN ENGINEER(prof. & tech., n.e.c.)

Applies established engineering principles to the design and development of equipment, structures, processes and systems, by performing any combination of the following duties:

Analyzes proposal, product or equipment specifications, and process requirements to conceive a practical design. Determines feasibility from the standpoint of costs, space, time limitations, company plans, availability of standard equipment and other technical and economic factors. Consults with research engineers and scientists, or customer representatives to resolve design problems related to product styling and production planning. Provides technical information concerning construction and manufacturing techniques, material properties, and advantages and limitations affecting plant, product and long range planning. Compiles and analyzes operational data, and directs complex tests to establish standards for new designs or modifications to existing equipment, products or processes. Prepares related installation, operation and maintenance specifications and instructions. Supervises and co-ordinates the work of technologists and technicians who act in direct support of research activities.

01-070 ENGINEERING TECHNICIAN(prof. & tech., n.e.c.)

Carries out a limited number of technical functions in an engineering specialization; such as, chemical, civil, electrical, industrial, mechanical, metallurgical, mining, petroleum, aeronautical or nuclear engineering, primarily in relation to installation, operation and maintenance, quality control and production planning activities, using a basic knowledge of specific engineering, scientific, mathematical and drafting design principles and techniques, by performing any combination of the following duties:

Interprets work assignment instructions, selects and adapts standard procedures, techniques and equipment and establishes work sequence. Prepares, marks, measures or weighs test materials or samples, using various standard techniques and equipment. Estimates time, quantities of material, and labour required for such activities as testing, installation, maintenance, manufacture or construction. Incorporates design details into drawings following specifications for machinery, tools, or processes. Constructs, installs, maintains, repairs, calibrates and modifies standard equipment or systems according to standards, tests or instructions. Adapts and constructs auxiliary devices for tests, and operates standard equipment to test materials, samples and products. Makes calculations and prepares charts, graphs and supporting data for reports.

May assist other technical worker, or perform duties independently.

01-080 ENGINEERING TECHNOLOGIST(prof. & tech., n.e.c.)

Carries out a variety of technological functions in an engineering specialization; such as, chemical, civil, electrical, industrial, mechanical, metallurgical, mining, petroleum, aeronautical, or nuclear engineering, primarily in support of engineering research, development and design activities, using knowledge of engineering, scientific, mathematical and drafting design principles and practices, by performing any combination of the following duties:

Assists engineers and other technical workers in the research, design, and development of products, systems, processes and equipment by analyzing technical problems, co-ordinating the construction of working models, pilot plants and similar prototypes, and by developing and interpreting design specifications for complex equipment and processes. Represents engineers on work or test sites to ensure compliance with design specifications, study objectives and standards relating to production or quality control, and industrial or construction safety. Examines and evaluates assignments, defines problems, determines procedures to arrive at solutions, and schedules work. Obtains or prepares detailed estimates of time, quantities, labour, and material costs required for work in such areas as product

design, testing of construction, equipment installations, and manufacturing processes. Diagnoses complex equipment or process malfunctions, production or test problems; plans and carries out corrective action or directs other workers in rectifying problems. Conducts work studies and method analyses, and performs statistical calculations necessary for establishing work standards. Interprets and evaluates, at a level below that of the engineer, experimental, test, and other data and prepares reports and recommendations based on evaluations. Oversees and co-ordinates activities of technicians, skilled craftsmen and other workers engaged in various aspects of technical assignments. Assists in the training of less experienced technical workers.

May in some situations work independently of engineers and other technical workers.

01-090 GENERAL MANAGER(prof. & tech., n.e.c.)

Plans, organizes, directs and controls the major functions of an industrial, commercial, governmental, or other establishment through departmental managers and other subordinate executives, and within powers delegated by a directorate, governing body, or official decree, by performing any combination of the following duties:

Establishes organization objectives, formulates and approves policies and programs and sets standards by using knowledge of organization's capacities; analyzing economic, social, technical, legal and other trends; consulting with subordinate managers and executives; and reviewing staff recommendations and reports. Authorizes establishment of major departments and key executive positions, and funds to implement departmental policies and programs. Selects or approves selection of departmental managers and senior staff, delegates authority and approves overall personnel program. Directs, motivates and develops skills of executive and managerial personnel to foster productivity, growth and high morale, exercising leadership ability and using knowledge of management science. Co-ordinates activities of departments or other functional units by utilizing staff conferences, schedule boards, flow charts and other devices, and by developing effective lines of communication. Provides for administration controls, such as reports, audits and inspections. Maintains awareness of developments affecting objectives and policies, and takes initiative in effecting remedial action or needed adjustments, in consultation with executives concerned. Assumes responsibility for products or services of establishment. Represents organization, or delegates representatives in negotiations, at conventions, seminars and other official occasions. Entertains officials, develops liaison with other organizations and frequently sits on charitable, educational or other civic committees, to promote good public relations.

General managers are designated according to the industry in which they work, and frequently, as senior officials, hold appointments, such as, President, Vice-President or Chairman of the Board or other governing body.

01-140 LIFE SCIENCES TECHNICIAN(prof. & tech., n.e.c.)

Carries out a limited number of technical functions in a life sciences specialization; such as, botany, zoology, forestry, horticulture, agriculture or medicine, primarily in relation to biological testing and analysis activities, using a basic knowledge of specific scientific and mathematical principles, and laboratory techniques, by performing any combination of the following duties:

Interprets work assignment instructions, selects and adapts standard procedures, techniques and equipment and establishes work sequence. Takes, prepares, marks, measures or weighs biological specimens, using various standard techniques and equipment. Sets up laboratory, medical and other scientific equipment for experiments, tests, and analyses, and adjusts or aligns equipment as required. Conducts experiments, tests and analyses, and records and organizes

observations and conclusions. Makes calculations and prepares charts, graphs and other supporting data for reports.
May assist other technical workers, or perform duties independently.

01-150 LIFE SCIENCES TECHNOLOGIST(prof. & tech., n.e.c.)

Carries out a variety of technological functions in a life sciences specialization; such as, botany, zoology, forestry, horticulture, agriculture or medicine, primarily in support of biological research, testing and analytical activities, using knowledge of scientific and mathematical principles and laboratory practices, by performing any combination of the following duties:

Assists life scientists and other technical workers in design and development of research methods and equipment. Searches reference publications and makes recommendations concerning technical problems. Performs pre-test experiments and analyses, develops design specifications for, and constructs or oversees the construction of special test equipment. Obtains or prepares estimates of time, and costs of quantities of material and equipment for tests, analyses, experiments or other research activities; plans and schedules work. Sets up scientific equipment for experiments, tests and analyses, and calibrates precision equipment as required. Performs quality control tests to ensure reagents and equipment are functioning as specified. Conducts experiments, tests and analyses, requiring a high degree of skill and judgment, and involving a large number of operations with many possible sources of error. Modifies and adapts procedures and equipment as required. Interprets and evaluates test and other data at a level below that of the life scientist; prepares reports and recommendations based on evaluations, and frequently assists life scientists in preparing material for publications.

May in some instances work independently of life scientists and other technical workers.

01-170 MANAGER(prof. & tech., n.e.c.)

Plans, organizes, directs and controls the activities of a department, division, program, regional office or other unit of an industrial, commercial, governmental or other establishment, through subordinates who are at a supervisory level or above and within policies laid down by senior management, by performing any combination of the following duties:

Establishes procedures to implement policies and directives of senior management, and recommends changes in policies to achieve assigned objectives, based on detailed knowledge of the unit's performance capabilities. Prepares and submits financial estimates for approval. Determines organizational structures in his unit, and defines subordinate managerial and supervisory functions. Selects or approves appointment of subordinate staff, and directs their training to ensure efficient usage of personnel and material. Co-ordinates activities within assigned areas and with other departments or units by conferring with other managers or subordinates and utilizing schedule boards, flow charts and similar devices. Reviews effectiveness of assigned operations, enforces regulations, prepares reports, and advises senior management of trends in own operations which may be significant for other units of the organization. Assumes responsibility for operations of his unit. Assists staff with important and difficult administrative or technical problems. Negotiates with specialists, technical consultants and external organizations on matters such as business services and union contracts. Represents organization on boards or committees as a delegated specialist, or in a public relations capacity.

Managers are usually designated according to assigned responsibility in the department or other unit of the organization.

01-180 MANAGING SUPERVISOR(any ind.)

Plans, organizes, directs and controls the operations of an establishment engaged in retail or wholesale trade, or in providing services to the public, to business or other organizations, on own or owner's behalf or in partnership, and supervises and co-ordinates activities of subordinate workers, by performing any combination of the following duties:

Estimates consumer demands, and determines or recommends types and quantities of merchandise or services to be sold, and price and credit policies to be implemented. Defines operating procedures. Plans budget, prepares or supervises preparation of purchase orders for stock and supplies, and authorizes or obtains authorization for expenditures. Establishes layout of premises. Determines staff functions and numbers and hires or arranges for hiring of staff. Assigns duties, sets salaries, and initiates personnel action such as

promotions and discharges. Supervises and trains workers, or oversees supervision and training. Co-ordinates activities of workers to ensure efficient operations. Counts and deposits money received, or supervises handling of money, takes or verifies inventories, and keeps accounts and other records. Ensures that safety, health and security regulations are followed. Promotes the sale of establishment goods or services, and approves advertising and display work. Receives and acts on customer complaints. Confers with workers or their representatives to resolve grievances and other employee problems.

When operating a small establishment, performs some or all of the duties of the workers. When operating an establishment on own behalf or in partnership, is commonly known as a WORKING PROPRIETOR. See term title definition, 02-450 WORKING PROPRIETOR, for method of classification. Managing supervisors, including working proprietors are designated according to merchandise or services offered for sale, or type of establishment operated.

01-210 PHYSICAL SCIENCES TECHNICIAN(prof. & tech., n.e.c.)

Carries out a limited number of technical functions in a physical sciences specialization; such as, physics, chemistry, geology, geophysics, meteorology or astronomy, normally in relation to operation and maintenance, and quality control activities, using a basic knowledge of specific scientific and mathematical principles, and laboratory techniques, by performing any combination of the following duties:

Interprets work assignment instructions, selects and adapts standard procedures, techniques and equipment, and establishes work sequence. Prepares, marks, measures or weighs test materials or samples, using various standard techniques and equipment. Sets up laboratory and other scientific equipment for experiments, tests, and analyses and adjusts or aligns equipment as required. Conducts experiments, tests and analyses and records and organizes observations and conclusions. Makes calculations and prepares charts, graphs and other supporting data for reports.

May assist other technical workers, or perform duties independently.

01-220 PHYSICAL SCIENCES TECHNOLOGIST(prof. & tech., n.e.c.)

Carries out a variety of technological functions in a physical sciences specialization; such as, physics, chemistry, geology, geophysics, meteorology, or astronomy, primarily in support of research activities, using knowledge of scientific and mathematical principles and laboratory practices, by performing any combination of the following duties:

Assists physical scientists and other technical workers in design and development of research methods and equipment, by searching reference publications, making recommendations concerning technical problems, performing pre-test experiments and analyses, and by developing design specifications for, and constructing or overseeing the construction of, special test equipment. Obtains or prepares estimates of time and costs, of quantities of material and equipment for tests, analyses, experiments or other research activities. Plans and schedules work. Sets up scientific equipment for experiments, tests and analyses, and calibrates precision equipment as required. Conducts experiments, tests and analyses, requiring a high degree of skill and judgment, and involving a large number of operations with many possible sources of error. Modifies and adapts procedures and equipment as required. Interprets and evaluates experimental, test and other data at a level below that of the physical scientist; prepares reports and recommendations based on evaluations, and frequently assists physical scientists in preparing material for publications.

May in some situations work independently of physical scientists and other technical workers.

01-230 SALESMAN(ret. trade; whole. trade)

Sells merchandise to individuals from sales floor and at customer's home or place of business, applying knowledge of characteristics, quality and merit of items sold, by performing any combination of the following duties:

Talks to customer on sales floor or elsewhere to ascertain his wants, and follows up initial contact, by phone or in person, to solicit business. Displays merchandise, shows descriptive material and demonstrates article, emphasizing saleable features. Advises customer on care and use of article. Estimates or quotes prices, credit terms, trade-in allowances and delivery date. Prepares sales slip or sales

contract. Receives payment or obtains credit authorization. Prepares reports of business transactions and keeps expense accounts. Sets up displays of merchandise in window or on sales floor. Prepares inventory of stock, and requisitions merchandise from stockroom or warehouse.

Salesmen are usually designated according to product sold.

01-240 SALESPERSON(ret. trade; whole. trade)

Sells merchandise to individuals from sales floor, applying knowledge of characteristics, quality and merit of items sold, by performing any combination of the following duties:

Ascertains make, type and quality of merchandise desired by customer. Displays merchandise or demonstrates article, emphasizing saleable features, and suggests selection to customer. Advises customer on use and care of article. Estimates or quotes prices, credit terms, trade-in allowances and delivery dates. Prepares sales slip or sales contract. Receives payment or obtains credit authorization. Wraps or packages merchandise for customer. Sets up displays of merchandise in windows or on sales floor. Prepares inventory of stock and requisitions merchandise from stockroom or warehouse.

Salespersons are usually designated according to product sold.

01-250 SUPERVISOR/FOREMAN(any ind.)

Supervises and co-ordinates activities of workers engaged in one or more occupations, by performing any combination of the following duties:

Studies assignments, determines manpower requirements, and estimates materials and supplies needed for completion of work.

Establishes methods to meet work schedules, using knowledge of capacities of workers, machines and equipment. Requisitions materials and supplies as indicated. Hires and assigns duties to workers, recommends or initiates personnel actions, such as promotions, transfers, discharges, and disciplinary measures, and maintains personnel and attendance records. Trains or arranges for the training of workers and explains company policies. Sets up machines and equipment and interprets work orders, specifications or technical drawings. Initiates or suggests plans to motivate workers to achieve goals. Co-ordinates activities of own workers and confers with other supervisors, foremen and/or superiors to avoid conflicts with other units or departments. Ensures that quality of work meets standards, inspects materials received, and enforces safety regulations. Analyzes and resolves work problems. Prepares and submits production, progress or other reports. Recommends measures to improve work methods, equipment performance, quality of product or service, and working conditions. Confers with workers or their representatives to resolve complaints and grievances.

When supervising workers engaged in one occupation, is usually required to be adept in activities under supervision. When supervising workers engaged in several occupations, is required to possess general knowledge of activities involved. Supervisors and/or foremen are designated according to type of work supervised, process involved, craft of workers supervised, product manufactured or industry in which work occurs. A working supervisor and/or foreman, commonly known as a **GROUP LEADER**, or **LEAD HAND**, who primarily performs the same duties as the workers supervised, is identified by the same occupational title as the workers.

TERM TITLES AND DEFINITIONS

(See **CHARACTERISTICS OF THE CCDO** for explanation of term titles and definitions and their applications)

02-010 APPRENTICE(any ind.)

A term used to describe a worker who is bound by contractual agreement to serve an employer for a specified period of time, with a view to learning a craft or trade in which the employer is obligated to instruct him:

In general, the contract sets out the minimum number of hours of training required to complete the apprenticeship and outlines wage increases throughout the program on the basis of a graduated minimum scale. An apprentice follows a program of on-the-job, and related classroom and shop training lasting about one to four years and leading to a prescribed level of competence in an occupation. Apprenticeship programs are usually under the guidance of an advisory committee representing management, labour and government. Entry age and educational levels, health standards and training requirements vary with the apprenticed occupation and frequently are specified by provincial legislation. An apprentice is usually between the ages of sixteen and twenty-five. In some provinces, an older worker with background experience in a trade may be accepted as a 'mature apprentice'. Credit may be given for previous related experience or training. Normally, the successful completion of eight to twelve years schooling is required before commencing apprenticeship. An examination on all phases of training usually terminates the program, and successful completion results in the receipt of a certificate of apprenticeship. Workers who complete an apprenticeship program may be required to obtain licenses or pass certification examinations before being permitted to practise their trade.

Apprentices are classified with the occupations for which they are being trained, but they are not identified by separate occupational titles or definitions as apprentices.

02-040 ASSISTANT(any ind.)

A term used to describe a worker who directly assists one or more workers at the professional and managerial levels, by performing essentially DATA- and PEOPLE- related functions that are clearly subordinate to those of the worker assisted, but which frequently require formal training in the assistant specialization:

Excluded are the following who should be designated and classified as indicated: A worker who performs duties closely related to those of the worker assisted and who on occasion may assume the authority and responsibilities of the worker assisted should be assigned the same title and classification as the worker assisted. A worker who has been designated as an assistant by an establishment because his work fulfils an operational support function, but who does not directly assist other workers, should be assigned a title more indicative of the work performed and classified accordingly. A worker who directly assists a professional such as one engaged in a scientific, engineering, mathematical or drafting design field by performing essentially DATA-AND THINGS- related functions may be designated and classified as a TECHNICIAN or TECHNOLOGIST

A worker who performs routine, primarily manual duties in direct support of a more competent processing, manufacturing, construction or primary industry worker may be designated and classified as a HELPER. See term title definition 02-160 HELPER.

02-070 CHIEF ENGINEER(prof. & tech., n.e.c.)

A term used to describe an engineer who uses the principles and methods of management to supervise and co-ordinate the technical or administrative activities of other engineers, technologists, technicians and tradesmen:

The workers supervised are concerned with such activities as research, design, development, evaluation, manufacture and repair of machinery, components, tools and equipment; and with related methods, procedures and processes in governmental, industrial and business establishments.

Chief engineers are usually classified in the same unit group as the engineers they supervise.

02-090 CONSULTANT(prof. & tech., n.e.c.)

A term applied to a worker who utilizes expertise and knowledge of a specialized field of activity to evaluate and recommend improvements in the practice of that specialization in a commercial, industrial, governmental or other organization, by performing any combination of the following duties:

Analyzes objectives, policies, methods and procedures relating to specializations; such as, product administration, labour relations, public relations and safety standards. Devises tests, prepares flow charts, conducts interviews and examines records and other data to determine degree to which objectives are being achieved. Prepares reports and recommendations for modification and changes in policies, methods and procedures to improve efficiency. Assists with implementation of recommendations by such means as revising procedures, and preparing and conducting retraining sessions.

Consultants are designated according to title of specialization, such as, ENGINEERING CONSULTANT, PERSONNEL MANAGEMENT CONSULTANT, and EDUCATIONAL SPECIALIST. These occupations are classified in the unit group with the worker, in the same field of specialization, who performs functions of a non-consulting nature, or, when such a unit group does not exist, in Unit Group 1179 - OCCUPATIONS RELATED TO MANAGEMENT AND ADMINISTRATION, N.E.C.

02-130 ENGINEER(prof. & tech., n.e.c.)

A term used to describe a worker who plans, designs and develops equipment, machines, products, systems and processes, using scientific and engineering principles, to serve human needs and desires:

Engineers must possess qualifications acquired through formal training and work experience which normally lead to legal certification by appropriate licensing authorities. Engineers are classified according to the discipline in which the individual is most active, such as, aeronautical, agricultural, electrical, electronic, chemical, civil, mechanical, metallurgical, mining, marine and structural engineering. Engineers primarily engaged in managerial, teaching or sales activities are classified in the appropriate Major Group according to work performed.

02-150 GRADER(any ind.)

A term used to describe a worker who classifies and sorts materials and products according to established quality-control standards:

Examines materials and products by sight, touch, taste or smell, or by the use of scales or gauges, and grades them according to such standards as weight, size, colour or general condition. Grades foodstuffs such as grains, fruits, vegetables, meat, eggs and cheese. Grades other products such as tobacco, lumber, diamonds, leather and fur.

Graders are usually designated according to the product graded, and are normally classified in unit groups for INSPECTING, TESTING, GRADING AND SAMPLING OCCUPATIONS.

02-160 HELPER(any ind.)

A term used to describe a worker who supports another worker of a higher level of expertise in an occupation, by performing a combination of more routine, essentially manual duties, such as the following:

Conveys and holds materials and tools for worker aided, and uses hand or power tools or appliances in a helping capacity. Transports materials, tools, and supplies to and from worksite, using wheelbarrows, hand trucks, hoists, powered equipment and similar

devices. Prepares surfaces and mixes materials for the use of the worker aided, and cleans, mounts, places, or assembles parts or objects. Performs routine tasks related to installation, set-up, maintenance or dismantling of machines and equipment. Tends or feeds machines and equipment, offbears materials or parts and performs operating adjustments as directed. Takes samples for analysis, keeps work records, or performs other related tasks.

A worker who can perform his work independently of another worker is not a HELPER, and is designated and classified according to the work performed. HELPERS are classified in the appropriate unit group according to work performed.

02-170 INSPECTOR(any ind.)

A term used to describe a worker who critically examines any of a variety of goods, services or operations for conformity to established quality, health, safety, legal, business, ethical or other standards, by performing any combination of the following duties:

Examines raw materials for quality, and manufactured items for defects and for conformance to specifications, visually and using sample models and instruments; such as, scales, gauges, templates, calipers and micrometers. Verifies that established standards are maintained relative to such matters as food-growing, processing and marketing; product-packaging; storage and transportation methods; buildings and facilities; and business practices, operations and services. Affixes seals or tags to approved items, issues or revokes licences and permits or ascertains that licences and permits have been obtained and are displayed. Confers with officials, interprets regulations and codes, and assists establishments in altering methods and practices to meet established standards. Investigates complaints and violations, prepares reports of findings and action taken or recommended, files charges and testifies in court. Recommends changes in standards, administrative procedures, facilities, methods and practices.

Inspectors are normally identified according to product, item or service inspected. Typical titles are: PAPER INSPECTOR (pulp & paper); WELD INSPECTOR (mach., weld. & forg.). Inspectors in the fields of processing, machining, fabricating and assembling materials, goods or products are classified in unit groups for INSPECTING, TESTING, GRADING, AND SAMPLING OCCUPATIONS. Inspectors and Regulatory Officers concerned with enforcing and advising on governmental health, safety or other regulations are classified in Unit Group 1116, INSPECTORS AND REGULATORY OFFICERS, GOVERNMENT. Inspectors and Regulatory Officers concerned with enforcing and advising on adherence to non-governmental standards and regulations in such areas as quality of service, and observance of company business policies and procedures, are classified in Unit Group 1176, INSPECTORS AND REGULATORY OFFICERS, NON-GOVERNMENT.

02-180 INTERN(medical)

A term used to describe a person who performs medical duties for a specified length of time in hospitals, approved for internship, to gain training and practical experience immediately following graduation from medical school, and to meet licensing requirements for the practice of medicine.

Interns are classified in Unit Group 3111, PHYSICIANS AND SURGEONS.

02-190 LABOURER/ELEMENTAL WORKER(any ind.)

A term used to describe a worker who performs one or more uncomplicated tasks, usually physical in nature, involving such functions as feeding-offbearing and handling materials and objects, which may require the use of simple tools or equipment:

In the performance of his duties may be required to speak to, signal or serve other persons and carry out simple data-related functions such as copying and comparing. Applies common sense understanding to carry out tasks in standardized situations with occasional or no variables in or from these situations. Normally, these tasks require only simple demonstration, instruction or explanation in preparation for average performance on the job, though in some instances training may last a few days.

Many occupations that are classified in unit groups entitled, 'OCCUPATIONS IN LABOURING AND OTHER ELEMENTAL WORK' are not designated by the title LABOURER, but by titles which are more descriptive of the work performed, such as, PACKAGER, HAND (any ind.) and MOULD FILLER (plastic prod.; rubber). Workers designated as LABOURERS or ELEMENTAL WORKERS, who perform a combination of

uncomplicated tasks, such as those of a LABOURER, GENERAL, may be required to carry out tasks involving a few concrete variables in standardized situations.

02-240 MANUFACTURER'S SERVICE REPRESENTATIVE(any ind.)

A term used to describe a worker who utilizes a knowledge of mechanical, hydraulic and electrical principles and the manufacturer's specifications, to provide service in the installation, operation and repair of equipment in customer's establishment, by performing any combination of the following or similar duties:

Consults with staff in manufacturer's engineering department to resolve problems of machine design, and to avoid construction and installation problems in customer's establishment. Studies drawings or blueprints to familiarize himself with equipment operation. Oversees installation of equipment in customer's establishment. Operates machine through trial runs to ensure that quality and rate of production meet specifications. Trains customer's personnel in operating, adjusting, maintaining and repairing equipment. Consults with customer about deviation of equipment operation from original specifications, and explains reasons for changes. Repairs or supervises repair of worn or defective equipment in customer's establishment.

Manufacturer's service representatives are classified in unit groups which reflect the nature of service provided and type of equipment serviced.

02-280 NOTARY PUBLIC(prof. & tech., n.e.c.)

A term used to describe a worker who performs any combination of the following legal-service duties as prescribed by a commission issued by provincial government:

Witnesses, certifies and attests the validity of signatures on documents. Takes and certifies acknowledgement or proof of powers of attorney, mortgages, deeds, and other legal documents. Takes depositions and affidavits for use before court, judge or officer within jurisdiction. Administers oaths and affirmations. Keeps permanent records of official acts.

Workers whose regular duties include those described above are classified in Unit Group 2343 - LAWYERS AND NOTARIES. Workers who perform duties of the term title, 02-280 NOTARY PUBLIC (prof. & tech., n.e.c.), in addition to the duties of another occupation, are classified according to their principal occupation.

02-310 RESEARCH ENGINEER(prof. & tech., n.e.c.)

A term used to describe an engineer who, in co-operation with scientists and other engineers, engages in basic and applied research activities, directed toward the investigation, evaluation and application of engineering and scientific theories and principles to practical problems:

Conducts studies in areas, such as, pre-stressed concrete construction, high-pressure instrumentation, supersonic flight, operation of continuous chemical processes at high and low pressures and temperatures, radar, colour television and electronic computation and control. Consults with other engineers and scientists regarding the development and improvement of new or existing products, services or production processes. Follows the studies from inception, through the drafting phase, to the production of the prototype or model and the preparation of technical reports. Supervises and co-ordinates the work of technologists and technicians who act in direct support of his research activities.

Research engineers are classified in the appropriate engineering unit group according to work performed.

02-320 RESIDENT PHYSICIAN OR SURGEON(medical)

A term used to describe a physician or surgeon who performs medical duties for a specified length of time, following graduation from medical school and internship, in a hospital approved for residency requirements to gain advanced graduate education and practical experience in a particular branch of medicine or surgery, or in family medicine, as a requirement for certification as a specialist.

Resident physicians or surgeons are classified in Unit Group 3111, PHYSICIANS AND SURGEONS.

02-330 SAMPLER(any ind.)

A term used to describe a worker who collects samples of raw or processed materials for laboratory analysis and quality-control purposes, performing duties such as the following:

Collects samples by dipping, scooping, pouring or cutting. Marks samples with identifying information and sends them to laboratory. Weighs, pulverizes, screens and/or blends materials from various collection points to provide representative samples.

Samplers are normally designated according to the material sampled, and are classified in unit groups for INSPECTING, TESTING, GRADING AND SAMPLING OCCUPATIONS.

02-350 SCIENTIST(prof. & tech., n.e.c.)

A term used to describe a worker who conducts investigations or enquiries to acquire a theoretical, abstract or practical knowledge of physical and natural phenomena:

States problems and frames questions which are capable of yielding significant facts, theories, laws and concepts, and tests hypotheses through observation, investigation or experimentation.

Scientists are classified according to the discipline in which the individual is most active; such as, chemistry, physics, geology, meteorology, geography, metallurgy, agriculture, zoology, botany and pharmacology.

02-380 SQUAD MAN(any ind.)

A term used to describe a worker who is trained, in all phases of manufacturing within a specific industry, through a company- oriented training program to identify and develop supervisory and executive talent in individuals:

Substitutes for absentees, as needed, to keep departments fully-manned in emergencies. Conducts assigned studies, in areas of specialized training, for production problem identification, analysis, documentation and preparation of reports. Investigates and studies alternate methods and procedures and, upon approval, institutes and conducts programs to modify existing production procedures. Participates as a member of a team of specialists to inaugurate production with new installations.

Squad men are normally designated by the industry in which they work, and are classified in the appropriate supervisor/foreman or managerial unit group according to work performed.

02-410 TECHNICIAN(prof. & tech., n.e.c.)

A term used to describe a worker who performs a limited number of technical functions in a physical science, life science or engineering specialization, primarily in relation to installation, operation and maintenance, quality control, production planning or biological testing and analysis activities, using a basic knowledge of specific scientific, mathematical or engineering and drafting design principles and practices:

Interprets work-order assignments, selects and adapts standard procedures, techniques and equipment and establishes work sequence. Takes, prepares, marks, measures or weighs test materials, or samples, using a variety of techniques and equipment. Sets up scientific equipment and conducts experiments, tests and analyses, or constructs, installs, maintains, repairs, calibrates or modifies industrial or other equipment. Makes calculations and prepares charts, graphs and other supporting data for reports.

May assist other technical workers or perform duties independently.

Reference should be made to the following unit groups for classification possibilities of technologists and technicians: 2117, PHYSICAL SCIENCES TECHNOLOGISTS AND TECHNICIANS; 2135, LIFE SCIENCES TECHNOLOGISTS AND TECHNICIANS; 3156, MEDICAL LABORATORY TECHNOLOGISTS AND TECHNICIANS; 3155, RADIOLOGICAL TECHNOLOGISTS AND TECHNICIANS; 3157, DENTAL HYGIENISTS, ASSISTANTS AND TECHNICIANS; 2165, ARCHITECTURAL AND ENGINEERING TECHNOLOGISTS AND TECHNICIANS; 2353, TECHNICIANS IN LIBRARY, MUSEUM AND ARCHIVAL SCIENCES. Other technicians are classified in the same unit group as the worker assisted, or according to work performed. Workers who directly assist another or other workers at the professional and managerial levels are designated as ASSISTANTS provided that they perform essentially DATA- and PEOPLE- related functions. Assistants usually require formal training in the occupational specialization and their functions are clearly subordinate to those of the worker assisted. Those workers who perform inspecting and testing functions at levels of complexity higher or lower than those

specified for technologists and technicians may be classified in unit groups for scientific and engineering, or inspecting and testing occupations respectively.

02-420 TECHNOLOGIST(prof. & tech., n.e.c.)

A term used to describe a worker who performs a variety of technological functions in a physical science, life science or engineering specialization, primarily in support of research, developmental and design activities, using knowledge of scientific, mathematical or engineering and drafting design principles and practices:

Assists scientists, engineers and other technical workers in developing research methods and equipment, and designing and developing products, systems, processes and industrial equipment. Obtains or prepares estimates of time and material cost for research tests, analyses and experiments or for work projects or processes. Sets up scientific equipment and conducts experiments, tests and analyses. Diagnoses complex equipment or process malfunctions, and production or test problems, and carries out corrective action. Interprets and evaluates, at a level below that of the engineer or scientist, test and other data, and prepares reports and recommendations based on findings.

May in some situations work independently of engineers and scientists.

Reference should be made to the following unit groups for classification possibilities of technologists and technicians: 2117, PHYSICAL SCIENCES TECHNOLOGISTS AND TECHNICIANS; 2135, LIFE SCIENCES TECHNOLOGISTS AND TECHNICIANS; 3155, RADIOLOGICAL TECHNOLOGISTS AND TECHNICIANS; 2165, ARCHITECTURAL AND ENGINEERING TECHNOLOGISTS AND TECHNICIANS. Other technologists are classified in the same unit group as the worker assisted, on according to work performed.

Workers who directly assist one or more workers at the professional and managerial levels are designated as ASSISTANTS provided that they perform essentially DATA- and PEOPLE- related functions. Assistants usually require formal training in the occupational specialization and their functions are clearly subordinate to those of the worker assisted. Those workers who perform inspecting and testing functions at levels of complexity higher or lower than those specified for technologists and technicians may be classified in unit groups for scientific and engineering, or inspecting and testing occupations respectively.

02-430 TESTER(any ind.)

A term used to describe a worker who conducts routine tests on materials, components, machines or equipment to determine physical or chemical characteristics, or to verify conformity to specifications or functional standards, by performing any combination of the following duties in a laboratory or at a test bench:

Takes, prepares, marks, measures or weighs various samples, prior to conducting tests. Tests materials to determine physical or chemical characteristics, using laboratory test equipment. Tests electric or electronic components and equipment to verify conformity to specifications, using various electric or electronic testing equipment. Operates machines or equipment to test performance, and makes routine adjustments as required. Records test results. Marks approval on acceptable units, and returns defective units for re-working.

Testers are normally identified according to material or unit tested. Typical titles are: PULP TESTER (pulp & paper); SPRING TESTER (mach., weld. & forg.; metal fab., n.e.c.). Testers in the fields of processing, machining, fabricating and assembling materials, goods or products are normally classified in unit groups for INSPECTING, TESTING, GRADING, AND SAMPLING OCCUPATIONS. These workers who perform a number of technical functions including testing at levels of complexity higher than that specified for testers may be classified in unit groups for scientific and engineering, or technologist and technician occupations.

02-450 WORKING PROPRIETOR(any ind.)

A term used to describe a worker who operates an establishment, on own behalf or in partnership:

Performs duties as described under the master titles, 01-090 GENERAL MANAGER (prof. & tech., n.e.c.); 01-170 MANAGER (prof. & tech., n.e.c.) or 01-180 MANAGING SUPERVISOR (any ind.), depending upon size and complexity of organization operated.

TERM TITLES AND DEFINITIONS

02-450

When operating a small establishment, performs some or all of the duties of the workers.

Working proprietors are normally designated according to merchandise or services offered for sale, type of establishment or business operated, or professional, technical, craft or service function exercised. Working proprietors in sales and services who perform duties as described under the master title, 01-180 MANAGING SUPERVISOR (any ind.) are classified in the supervisor unit groups in Major Group 51, Sales Occupations and 61, Service Occupations,

respectively. Working proprietors in sales and services who perform duties as described under the master titles, 01-090 GENERAL MANAGER (prof. & tech., n.e.c.) and 01-170 MANAGER (prof. & tech., n.e.c.) are classified in Major Group 11, MANAGERIAL, ADMINISTRATIVE AND RELATED OCCUPATIONS. Working proprietors found outside of Major Group 51, 61 and 11, are classified in the appropriate supervisory unit group of an appropriate minor group, or in the workers' unit group, if a supervisory unit group does not exist.

MANAGERIAL, ADMINISTRATIVE AND RELATED OCCUPATIONS

This major group includes occupations concerned with managerial and administrative activities such as: planning, organizing, co-ordinating, directing, controlling, staffing; and formulating, implementing or enforcing policy in government, industry and other organizations. Middle-management occupations, managers of chains of establishments, and occupations closely related to management and administration are included in this major group. Excluded from this major group are the following: working proprietors and managing supervisors of wholesale and retail businesses, classified in Major Group 51, **SALES OCCUPATIONS**; working proprietors and managing supervisors of catering and lodging establishments, classified in Major Group 61, **SERVICE OCCUPATIONS**; police chiefs, fire chiefs, and other supervisory workers in the protective services, classified with the workers they supervise in Minor Group 611, **PROTECTIVE SERVICE OCCUPATIONS**; farm managers and farmers classified in Major Group 71, **FARMING, HORTICULTURAL AND ANIMAL HUSBANDRY OCCUPATIONS**; supervisors and foremen, classified in other appropriate major, minor and unit groups. **MANAGERIAL, ADMINISTRATIVE AND RELATED OCCUPATIONS** are classified in the following minor groups:

- 111 **Officials and Administrators Unique to Government**
- 113/114 **Other Managers and Administrators**
- 117 **Occupations Related to Management and Administration**

111-OFFICIALS AND ADMINISTRATORS UNIQUE TO GOVERNMENT

This minor group includes occupations, unique to government, concerned with developing laws, rules, and regulations for society; carrying out senior-and middle-managerial activities in government agencies and departments; enforcing laws, rules, and regulations within governmental jurisdiction; and administering a wide variety of other activities unique to government. Managerial and administrative occupations which are common to both government and other organizations, including autonomous crown corporations, are classified in Minor Group 113/114, **OTHER MANAGERS AND ADMINISTRATORS**. **OFFICIALS AND ADMINISTRATORS UNIQUE TO GOVERNMENT** are classified in the following unit groups:

- 1111 **Members of Legislative Bodies**
- 1113 **Government Administrators**
- 1115 **Postmasters**
- 1116 **Inspectors and Regulatory Officers,
Government**
- 1119 **Officials and Administrators Unique to Government, n.e.c.**

1111-MEMBERS OF LEGISLATIVE BODIES

This unit group includes occupations concerned with developing laws, rules and regulations for society. Activities include: participating in, or exercising the executive power of, legislative bodies of federal, provincial, territorial or local governments, working within the constitutional framework which specifies their authority and areas of jurisdiction.

1111-110 LEGISLATIVE MEMBER(gov. serv.)

Participates in the activities of a federal, provincial, territorial or local government legislative body as an elected or appointed member: Takes part in formulating, amending or opposing government policy, and in making, amending or repealing laws, ordinances and official regulations. Serves on government administrative boards, commissions of inquiry and committees dealing with finance, health, welfare, defence, education, employment or other matters. Investigates matters of concern to general public, or to particular persons or sections in constituency, and introduces proposals for

remedial government action, or otherwise endeavours to serve public interests.

May preside over meetings of legislative body. May nominate or participate in confirming appointments of heads of government departments and other high-level officials. May represent government legislative body at intergovernmental meetings. May be designated according to post held or function performed within particular level of government; for example,

Leader of Opposition
Member of Parliament
Senator
Speaker
Member of Legislative Assembly
Member of National Assembly
Member of Provincial Parliament
Member of Territorial Council

1111-114 LEGISLATIVE EXECUTIVE(gov. serv.)

Participates in the activities of a federal, provincial, territorial or local government as an elected or appointed member of a legislative body and its executive council:

Performs duties of 1111-110 LEGISLATIVE MEMBER (gov. serv.), and in addition, takes part in formulating executive council policy and in making, amending or repealing laws, ordinances and official regulations. Serves as political head of government department. Directs high-level administrators in the implementation of government policy. Represents government at intergovernmental meetings.

May preside over and direct policy deliberations of political heads of government departments. May be designated according to post held or function performed within particular level of government; for example,

Prime Minister
Premier
Minister
Territorial Commissioner

1111-118 MAYOR(gov. serv.) reeve; warden.

Presides over and takes part in the activities of a local government administrative council, as an elected member:

Ensures that laws for the government of municipality are duly executed and obeyed. Oversees conduct of all subordinate officers in municipal government, and, as far as practical, ensures that all cases of negligence, carelessness and violation of duty are prosecuted. Communicates to the council such information, and recommends to it such measures, as may tend to improve finances, health, security, cleanliness, comfort and ornament of municipality.

May preside over and take part in administrative council of a regional or metropolitan unit of local government and be designated accordingly; for example,

Chairman of Metropolitan Council
Chairman of Regional Municipality

1113-GOVERNMENT ADMINISTRATORS

This unit group includes occupations, unique to government, concerned with carrying out senior middle managerial and administrative activities, as described under the master titles, 01-090 GENERAL MANAGER (prof. & tech., n.e.c.) and 01-170 MANAGER (prof. & tech., n.e.c.), with responsibilities for implementing government policy in areas of jurisdiction, such as health, education, finance or labour legislation, and administration of justice. Judges and magistrates are classified in Unit Group 2341, JUDGES AND MAGISTRATES. Occupations unique to government whose duties are not similar to those described in the above-mentioned master title definitions are classified in Unit Group 1119, OFFICIALS AND ADMINISTRATORS UNIQUE TO GOVERNMENT, N.E.C.

1113-110 EXECUTIVE ADMINISTRATOR, GOVERNMENT AGENCIES(gov. serv.) DPT:018 GED: 5 SVP: 9 EC: 1 PA: S 5 6

Plans, organizes, directs and controls through subordinate senior administrators, the activities of a board, agency, crown corporation, authority, association, commission or council:

Performs duties as described under master title, 01-090 GENERAL MANAGER (prof. & tech., n.e.c.), specializing in administering a particular governmental agency dealing with matters such as: atomic energy, assets disposal, canals and waterways, war veterans allowance, and unemployment insurance. Appears before legislative bodies to furnish information on administrative matters or to propose changes in legislation or mandate.

May be designated according to function performed in organization; for example,

Chairman
Commissioner
Executive Director
General Manager
National Director
President
Vice-President

1113-114 EXECUTIVE ADMINISTRATOR, GOVERNMENT DEPARTMENT(gov. serv.) DPT:018 GED: 5 SVP: 9 EC: 1 PA: S 5 6

Plans, organizes, directs and controls through subordinate senior administrators, the activities of a national, provincial, territorial or local government department:

Performs duties as described under master title 01-090, GENERAL MANAGER (prof. & tech., n.e.c.), specializing in administering a particular government department dealing with matters; such as, national defence, labour, education, justice, penal institutions, health, welfare, consumer affairs, public works, employment, immigration and foreign relations. Advises political or administrative head of department on policy questions, and refers major policy matters to him for final decision. Consults with other administrators on matters of mutual concern. Interprets government policy directives within terms of reference. Issues directives and ensures implementation by subordinate administrators.

May be designated according to position held in organization; for example,

Assistant-Deputy Minister
Associate Under-Secretary of State
Chief Electoral Officer
City Manager
Deputy Commissioner
Deputy Minister
Deputy Provincial Secretary
Director General
Dominion Statistician
Under-Secretary of State

1113-118 SENIOR ADMINISTRATOR, GOVERNMENT AGENCIES(gov. serv.) DPT:018 GED: 5 SVP: 8 EC: 1 PA: S 5 6

Plans, organizes, directs and controls, through subordinate administrators, the activities of a branch or service of a board, crown corporation, authority, association, commission or council:

Performs duties as described under master title, 01-090 GENERAL MANAGER (prof. & tech., n.e.c.), specializing in administering a particular government branch or service dealing with matters, such as international marketing of wheat and grains, and housing management. Consults with and advises superiors on policy questions, programmes and administrative problems. Interprets and implements managerial directives within terms of reference.

May be designated according to position held in organization; for example,

Assistant-Branch Manager
Audit Director
Branch Manager

1113-122 SENIOR ADMINISTRATOR, GOVERNMENT DEPARTMENT(gov. serv.) DPT:018 GED: 5 SVP: 8 EC: 1 PA: S 5 6

Plans, organizes, directs and controls through subordinate administrators, the activities of a national, provincial, territorial or local government branch, service or departmental unit:

Performs duties as described under the master title, 01-090 GENERAL MANAGER (prof. & tech., n.e.c.), specializing in administering the administrative, professional or technical aspects of a branch or service within terms of reference. Issues instructions and ensures implementation by subordinate officials. Directs unit dealing with matters; such as, tax assessments, social security and pensions, wildlife and resources conservation, foreign aid, and collection of customs and excise duties. Acts as executive secretary for departmental head or official committees. Consults and advises departmental head on policy questions, programs and administrative problems.

May be designated according to position held in organization; for example,

Ambassador
Branch Director
Commissioner of Police
Co-ordinator, Civil Emergency Measures
Director, Parks Administration
Fire Marshal
Inspector-General of Banks
Regional Director
Superintendent

1113-126 ADMINISTRATOR, GOVERNMENT AGENCIES(gov. serv.) DPT:118 GED: 5 SVP: 7 EC: 1 PA: S 5 6

Plans, organizes, directs and controls, through subordinate administrators and supervisors, the activities of a section, unit or project of a government agency:

Performs duties as described under the master title, 01-170 MANAGER (prof. & tech., n.e.c.), specializing in administering a government branch or service dealing with matters; such as, weapons production, processing government loans application, enforcing public housing, bridge, road and airfield rules and regulations, printing currency, gathering vital statistics and administering urban and regional development.

May be designated according to position held in organization; for example,

Area Manager
Divisional Manager

1113-130 ADMINISTRATOR, GOVERNMENT DEPARTMENT(gov. serv.) DPT:118 GED: 5 SVP: 7 EC: 1 PA: S 5 6

Plans, organizes, directs and controls, through subordinate administrators and supervisors, the activities of a national, provincial, territorial or local government division, section, unit or project:

Performs duties as described under the master title, 01-170 MANAGER (prof. & tech., n.e.c.), specializing in administering a government division or unit dealing with matters; such as, preparation of electoral list, title registration, registration of births, marriages and deaths, pollution control, recreational services, granting and issuing of licences, registration of aliens, prison administration, alcoholic beverage control, placement of unemployed and issuing of passports.

May sit on personnel promotional or selection boards. May be designated according to position held in organization; for example,
Division Chief
Prison Warden
Regional Manager
Section Head

1115-POSTMASTERS

This unit group includes occupations concerned with carrying out managerial and administrative activities in post offices. Postmasters who operate a post office in conjunction with another business are classified in this unit group only if the post office operation is their principal activity. Supervisors

of mail sorters, carriers, and clerks are classified in Unit Group 4170, SUPERVISORS: RECEPTION, INFORMATION, MAIL AND MESSAGE DISTRIBUTION OCCUPATIONS.

1115-110 POSTAL AREA MANAGER(gov. serv.) DPT:118 manager, postal offices. GED: 4 SVP: 8 EC: 1 PA: S 5

Plans, organizes, directs and controls through subordinate postmasters and supervisors activities of post offices and mail services within metropolitan or rural postal areas to ensure attainment of post office department objectives:

Performs duties as described under master title, 01-170 MANAGER (any ind.), applying specialized knowledge of postal operations. Coordinates the implementation of new or revised delivery, transportation, wicket and other postal services and resolves operating problems arising from their application. Keeps abreast of developments in mail processing techniques and plans implementation of new methods and equipment. Investigates complaints and irregularities in postal operations and services and determines corrective measures. Conducts or takes part in meetings with groups, such as mail service contractors, managers of industrial and business organizations, municipal officials, and government delegates to discuss and resolve matters relating to postal operations, services and programmes. Provides guidance and direction to postmasters on departmental personnel policies, regulations, and programmes to ensure consistency in application and implementation. Recommends the establishment, re-arrangement or curtailment of post office activities within designated area.

1115-114 POSTMASTER(gov. serv.) DPT:138 GED: 4 SVP: 7 EC: 1 PA: S 5

Plans, organizes, directs and controls through subordinates at a supervisory level or above, postal and related services, in urban locality or other limited geographical area:

Performs duties as described under master title, 01-170 MANAGER (any ind.). Organizes and controls directly or through subordinates the collection, processing and delivery of mail. Administers post office financial operations for collecting and safe-guarding revenue obtained from sources, such as the sale of money orders, stamps, and rental of boxes, and ensures that revenue is accounted for in accordance with established procedures. Develops and instigates plans for meeting future service requirements, based on the estimated growth of community. Resolves customer complaints and informs public of postal laws and regulations. Prepares and submits detailed and summary reports of post office activities to designated persons. Evaluates performance, maintains discipline, and supervises training and development programmes of staff. Hires temporary staff during peak operating periods.

May control the operation of sub-post offices. May assist in performing routine duties of a senior postmaster and be designated accordingly,

Assistant Postmaster

1116-INSPECTORS AND REGULATORY OFFICERS, GOVERNMENT

This unit group includes occupations concerned with enforcing and advising on health, safety and other regulations, such as those pertaining to people, animals, plant life, products and establishments, in the capacity of local, provincial, federal inspectors or regulatory officers. Non-government inspectors, testers, graders and samplers in the fields of processing materials, machining, fabricating and assembling goods or products, are classified in their appropriate major, minor, and unit group.

1116-110 SUPERVISOR, INSPECTORS AND REGULATORY OFFICERS(gov. serv.) DPT:138

Supervises and co-ordinates activities of workers engaged in enforcing government policy decisions and implementing laws, rules and regulations, such as those pertaining to people, animals, plants, products and establishments, in the capacity of local, provincial, federal inspectors or regulatory officer (Unit Group 1116):

Performs duties as described under master title. 01-250 SUPERVISOR/FOREMAN (any ind.).

May supervise workers engaged in a particular regulatory or inspecting activity, and be designated accordingly; for example,

Area Supervisor, Fisheries

Excise-Tax-Collection Supervisor

Grain-Inspection Supervisor

Meat-Inspection Supervisor

Supervisor, Agricultural-Products Inspection

Supervisor, Customs Inspection

Supervisor, Excise-Tax Officers

Supervisor, Immigration Officers

Supervisor, Postal Inspector

1116-114 CORONER(gov. serv.) DPT:038 GED: 6 SVP: 8 EC: 1 PA: L 5 6

Conducts investigations and hearings into deaths of individuals within areas of jurisdiction prescribed by provincial laws:

Performs or orders autopsies to determine cause of accidental, violent, unnatural or unexplained deaths, and to ascertain responsibility. Presides at inquests to view bodies, procures services of expert witnesses, and examines case. Witnesses under oath. Summons and swears in jurors for inquest proceedings. Disposes of unclaimed bodies and personal effects of deceased, issuing cremation or embalming certificate that details all particulars of death, following provincial laws. Confers with officials of health and law enforcement agencies to gather information relative to cases. Writes disposition and statement of findings, proceedings and recommendations for permanent records. Directs personnel staff or procures services of trained technicians engaged in conducting autopsies, pathological or toxicological analyses or gathering data for testimony.

May charge person with the offence of murder or of manslaughter and issue warrant for arrest and detainment.

1116-118 EXCISE-TAX INSPECTOR(gov. serv.) DPT:228 GED: 5 SVP: 7 EC: 1 PA: S 5 6

Enforces excise tax laws and regulations, performing any combination of the following duties:

Audits accounting records to determine income, exemptions, payable taxes, compliance with reporting regulations and existence of fraud. Analyzes returns, financial statements and related documents to trace ownership and disposal of assets, to note unexplained fluctuations or changes in asset, liability and equity accounts, and to detect evasion of tax. Examines accounting systems and organization internal controls to ensure adequacy of reporting and measurement procedures for goods subject to excise taxation. Calculates tax arrears and applies penalties as required. Interviews taxpayers to evaluate accuracy of reported income and taxes. Advises public on legislation requirements and technical assessing matters. Discusses taxation procedure with establishment officials to ensure that techniques and methods used do not jeopardise collection of duty. Investigates reports of fraudulent practices to gather evidence and initiate prosecution of offenders. Prepares briefs and assists in searching and seizing records, and in preparing charges for court cases. Serves legal documents, such as subpoenas, warrants and notice of assessment. Seizes and conducts sale of property to satisfy tax claims and appears as witness in court. Inspects establishments to evaluate adherence to excise laws and regulations, discover fraudulent practices and ensure that goods are properly identified and secured against unlawful removal or diversion. Reconstructs or prepares financial statement to prove accuracy of reported taxable income when books and records are found to be inadequate or non-existent. Prepares reports outlining nature and extent of investigations, explaining adjustments, recommending action and giving opinions on adequacy of records. Compiles detailed working papers, supporting schedules, exhibits and search affidavits.

May be engaged in a particular taxation activity and be designated accordingly; for example,

Excise-Duty Agent
Excise-Tax Collector
Tax-Appeal Officer

Tax Assessor
Tax-Collection Officer
Tax-Enforcement Officer

1116-122 HUMAN-RIGHTS-COMMISSION OFFICER(gov. serv.) DPT:258

GED: 5 SVP: 7 EC: 1 PA: S 5 6

Enforces government acts relating to human rights, performing any combination of the following duties:

Investigates complaints of discrimination and uses persuasion and conciliatory techniques to ensure compliance with government acts. Participates in the preparation of brochures and reports dealing with racial, community, cultural or other humanity oriented problems. Maintains liaison with education, ethnic, labour and welfare organizations and participates in conferences and seminars pertaining to human rights. Assists in the development and conduct of research projects by originating questionnaires, interviewing citizens, analyzing and tabulating data and writing reports.

1116-126 CUSTOMS INSPECTOR(gov. serv.) DPT:268 GED: 5 SVP: 7 EC: 1 PA: L 5 6 7

Enforces customs laws and regulations by performing any combination of the following duties:

Inspects baggage of persons arriving from foreign countries to detect undeclared merchandise or contraband. Questions persons to determine nature of purchases. Verifies person's documents to certify, validate or record purchases, and issues permits and certificates accordingly. Determines admissibility of goods and assesses duty by referring to custom regulations and tables. Informs manufacturers, shippers and general public on customs laws, procedures and regulations, and assists them to comply with requirements. Confers with officers of other governments to obtain co-operation in enforcement activities. Observes fabrication of articles affected by customs laws and inspects finished goods to ascertain methods and materials used, when engaged in appraising or investigating activities. Weighs and measures imported goods, using devices, such as scales, measuring rods, calipers, and hydrometer. Appraises merchandise, considering physical properties and characteristics affecting market value. Compares samples of merchandise with description, classifies merchandise according to regulations, determines duty rate, and collects duties. Boards carriers arriving from foreign countries, and inspects and searches them to determine nature of load and ensure that all merchandise is identified and documented. Oversees unloading of merchandise from carriers to ensure compliance with customs and commerce laws. Seals holds and other compartments of vessels that contain sea-supplies to prevent illegal sale or smuggling of dutiable merchandise. Writes reports concerning classification and appraisal of merchandise, transactions, violations and discrepancies.

May perform undercover duties, including interviewing and interrogating of persons to obtain evidence of violations. May question persons seeking entry to Canada and study documents; such as, certificate of vaccination, passport, visa and customs declaration to determine their admissibility. May be engaged in a particular customs activity and be designated accordingly; for example,

Customs Appraiser
Customs Collector
Customs Examiner
Customs Investigator

1116-130 IMMIGRATION INSPECTOR(gov. serv.) DPT:268 GED: 4 SVP: 7 EC: 1 PA: L 5 6

Administers one or more activities of an immigration program, within immigration policies, laws and regulations, performing any combination of the following duties:

Determines admissibility of persons seeking entry into Canada by examining documents and conducting interviews to ensure adherence to immigration laws. Interprets laws, weighs socio-economic factors and explains decisions to persons. Assesses would-be immigrants following criteria, such as education, training, occupational skills, knowledge of required languages and employment opportunities. Grants landed-immigrant status, admits persons or orders detention or deportation. Counsels immigrants on social services available and employment opportunities to facilitate their integration in new environment. Disseminates information related to arrival or movement of immigrants and refugees to ensure adequate reception. Controls detention cases to ensure detention period is kept to a minimum. Assists in the removal of deported persons by seeking

authorization from receiving countries and securing necessary travel documents. Negotiates with foreign government representatives, police forces and National Parole Board in matters pertaining to deportation or repatriation of criminals. Processes requests from foreign authorities wishing to deport Canadian citizens and establishes their acceptability according to reciprocal arrangement treaties. Locates and apprehends persons presumed to be infringing on immigration laws. Maintains liaison with government agencies, organizations and associations to investigate and report illegal activities. Ensures adequate arrangements for transportation of immigrants. Prepares, presents and follows-up cases related to immigration appeals. Conducts continuous review of decisions and precedents, studying court comments, observations and judgments to detect errors and omissions in departmental procedures. Recommends adoption or revision of policies related to examination of persons seeking admission to Canada, case reviews or immigration appeals. Administers oaths and interviews persons under oath.

May instruct personnel in performance of duties. May be engaged in a particular immigration activity and be designated accordingly; for example,

Admissions Officer
Case-Review Officer
Immigration-Appeals Officer
Immigration-Enforcement Officer

1116-134 RENTALS MAN(gov. serv.) DPT:258

GED: 4 SVP: 7 EC: 1 PA: S 5 6

Enforces regulations concerning tenancy matters, performing any combination of the following duties:

Receives complaints and mediates disputes between landlords and tenants. Arbitrates disputes when parties request and agree to binding arbitration in case of mediation failure. Disseminates information to advise and educate landlords and tenants concerning rental practices, rights and remedies. Prepares advisory and educational program for presentation to interested groups. Receives and holds disputed security deposits and rents until necessary action is taken. Determines validity of claims against security deposits for damages to property. Requests assistance of municipal or provincial government officials to appraise sanitary conditions, fire and security hazards, and dangerous or faulty conditions on premises. Develops procedures to control moneys received and disbursed and prepares forms of residential leases.

1116-138 SAFETY INSPECTOR(gov. ser.) DPT:258

GED: 4 SVP: 7 EC: B 6 7 PA: L 2 3 5 6 7

Enforces laws and regulations governing safety in the fields of construction, and other industries, performing any combination of the following duties:

Inspects buildings during construction to ascertain that footings, framing, chimneys, stairways, electrical and plumbing installations, water and sewage connections and completed buildings meet safety regulations. Inspects old structures for safety hazards and warns owner to correct unsafe conditions. Inspects boilers, compressors, hoisting equipment, pressure vessels and refrigeration installations in such places as apartment buildings and industrial plants. Observes activities in underground or open-pit mines to detect unsafe conditions, and violations of mine safety regulations. Looks for rotten or incorrectly placed timbers, defective electrical and mechanical equipment and improperly stored explosives. Tests air to detect toxic or explosive gas or dust. Inspects grading, concreting and asphaltting of highways and of proposed structural installations and signs adjacent to highways. Interprets regulations to builders, company officials and property owners, and offers suggestions for alterations. Issues certificate of approval and condemns or prohibits installations not meeting requirements. Enforces industrial safety regulations to eliminate unsafe working conditions and health hazards in industrial plants. Investigates accidents and their causes to avoid repetition.

May be engaged in a particular safety inspection activity and be designated accordingly; for example,

Boiler Inspector
Building-Construction Inspector
Electrical Inspector
Engines Inspector
Highway-Construction Inspector
Industrial-Safety Officer
Mine Inspector
Plumbing Inspector

1116-142 POSTAL-SERVICE INSPECTOR(gov. serv.)

DPT:268

GED: 4 SVP: 7 EC: 1 PA: L 5 6

Surveys postal-service operations to ensure conformance to operational procedures and to detect criminal violations and irregularities, performing any combination of the following duties:

Conducts inspections of postal installations and mail service operations to ensure approved mail-handling procedures are being followed and that security regulations are strictly enforced. Performs financial audit of post office records and accounts to ascertain conformance to regulations and approved practices related to collection and expenditure of funds. Determines need for establishment or extension of postal services; such as, letter carrier delivery, rural routes, parcel or relay bundle routes, and suburban services. Ascertains nature and extent of criminal violations and postal service irregularities, such as illegal use of mails, postal theft and fraud. Prepares reports of inspections and recommends corrective measures; such as, improvements to accommodations, extensions to existing facilities and prosecution of violators. Resolves personnel problems dealing with grievances, discipline and incompetence, through interviews, and advises staff on proper course of action. Advises postmasters in interpretation and implementation of postal laws, regulations and procedures. Maintains liaison with police and fire departments in cases involving theft and fire.

1116-146 PRIMARY-PRODUCTS INSPECTOR, ANIMALS

(gov. serv.)

DPT:276

GED: 4 SVP: 7 EC: B 6 7 PA: L 4 5 6 7

Inspects animal products to ensure conformance with governmental standards and health regulations, performing any combination of the following duties:

Investigates cases of animal diseases communicable to man to prevent and restrain their spreading. Examines live animals and carcasses to detect evidence of disease and rejects those which are sub-standard. Examines poultry to ensure proper grading. Inspects egg samples to determine their condition, interior quality and, shape and weight of shell. Ensures that ingredients used in processing meat, meat products and poultry fall within standards of purity and grading. Tests milk to establish percentage of butter fat in milk of individual cows in herd to assist farmers in reaching higher yields. Performs organoleptic tests of dairy products to ascertain their suitability for marketing. Institutes and enforces quarantine and other regulations governing import, export and other movements of animal products. Advises livestock owners on economical aspects of disease eradication and informs producers and the general public on health implications of diseases transmissible from animals to humans.

May regulate importation of dairy products. May instruct inspectors in work methods and procedures. May be engaged in a particular activity and be designated accordingly; for example,

Dairy-Products Inspector
Meat Inspector
Poultry Inspector

1116-150 PRIMARY-PRODUCTS INSPECTOR, PLANTS

(gov. serv.)

DPT:267

GED: 4 SVP: 7 EC: B 6 7 PA: L 4 5 6 7

Inspects plant products to ensure conformance with governmental standards, performing any combination of the following duties:

Inspects fruit and vegetables at different processing stages to establish quality, size and grade. Examines specimens of produce to detect and identify diseases, insects or other damage and rejects those of substandard quality. Inspects crops to ascertain genetic purity, presence of destructive insects, extent of disease, damage to crop, and variety of weeds or other foreign material. Grades seeds according to factors, such as heat injury, colour, size, sprouting and immixture. Inspects fertilizers, pesticides and animal feeds to ensure compliance with standards related to guarantees, labeling and registration. Grades hay according to colour, leafiness, degree of maturity and extent of curing. Inspects cargo, vehicles, grain elevators, processing and storage areas, packing equipment and materials to ascertain that sanitary conditions meet governmental specifications, or to prevent introduction and spread of destructive diseases and insects. Reports existence of disease conditions to other governmental authorities. Confers with growers, farmers and shippers regarding methods of culture, registration requirements, eradication of diseases and regulations pertaining to grading, packing and loading of products.

May judge crop plants and seeds at local agricultural fairs and field days. May instruct inspectors in work methods and procedures. May be engaged in a particular activity and be designated accordingly; for example,

Agricultural-Products Inspector
Crop-Certification Inspector

1116-154 MOTOR-TRANSPORT REGULATIONS

OFFICER(gov. serv.)

DPT:228

GED: 4 SVP: 6 EC: 1 PA: S 5 6 7

Administers provincial laws and regulations related to motor vehicle transportation, performing any combination of the following duties: Conducts road test examination and observes driving performance of applicants for driver's licences. Grades written and visual examination, and rates driving ability for each road test manoeuvre. Collects fees and issues licence or instruction permit according to test results. Evaluates traffic record of driver by considering laws and other factors; such as number and nature of accidents, number and gravity of traffic violations, and driver's occupation. Determines driver's attitude and probability of repeated offences to recommend suspension, revocation or reinstatement of driver's licence. Receives and evaluates requests for reinstatement of licences and approves or disapproves them. Conducts hearings on request of persons whose licences have been suspended or revoked to obtain information for reversal or maintenance of original decision. Confers with police and court officials to compile information on drivers' habits, facilitate location or punishment of violators and promote traffic safety. Counsels drivers, by advising them on proper driving methods, pointing out their poor driving habits and advises on methods of correction. Examines applications for motor vehicle registration and verifies information against public files. Answers inquiries concerning driver licensing procedures and complaints. Investigates complaints of illegal charges, rebates, and of damage and injury claims, according to province. Observes school vehicles in operation to detect overloading or erratic driving. Monitors taxi-cab operations to discover infringements of public transportation laws. Inspects motor vehicles for mechanical defects to determine safety of operation and advises drivers of necessary corrective action. Visits garages, service stations and used car lots to ensure that operating permits are in order. Keeps records and prepares detailed reports.

May estimate liability of uninsured motorists involved in accidents to facilitate application of penalties and bonding requirements. May allocate points for accidents or convictions and mail warnings to violators facing penalties. May lecture to school and community groups on driving improvement programmes. May be engaged in a particular activity and be designated accordingly; for example,

Claims Investigator
Driver's-Licence Examiner
Motor-Transportation Inspector
Reviewing Officer, Driver's Licence

1116-158 INSPECTOR, HEALTH STANDARDS(gov. serv.)

DPT:258

GED: 4 SVP: 6 EC: B PA: L 5 6 7

Enforces laws and regulations governing health standards and provides advice, performing any combination of the following duties: Locates persons suspected of exposure to communicable diseases to prevent further spread of disease. Interviews exposed persons to secure information concerning other persons who may have been exposed. Advises people to obtain treatment. Inspects restaurants, hotels, cafeterias and other public places to ensure compliance with sanitation laws. Takes samples of water, food and air, and orders chemical, physical or biological tests to determine contamination. Visits plants where food, drugs, cosmetics and similar items are manufactured to investigate sanitary conditions and health and hygiene habits of persons handling consumer products. Destroys sub-grades or prohibits sale of impure, toxic, damaged or misbranded items. Ascertains that required permits have been obtained and are displayed. Inspects nursing homes and hospitals to ensure conformance with standards and laws governing sanitation, facilities, ethical practices, maintenance of records and competence of personnel. Recommends changes in administrative procedures, facilities and standards to improve efficiency and service to patients. Applies regulations governing manufacture, labelling and sale of upholstered and stuffed articles to ensure use of approved materials. Inspects waste disposal sites to ensure that pollution control regulations are followed. Inspects water wells to enforce provisions of

permits. Writes reports and issues violation notices and corrective orders.

May be engaged in a particular activity and be designated accordingly; for example,

Food-and-Drug Inspector
Nursing-Home Inspector
Public-Health Inspector
Upholstered-and-Stuffed Articles Inspector
Water-Wells Inspector

1116-162 FISHERIES INSPECTOR(gov. serv.)

DPT:267

GED: 4 SVP: 6 EC: B 2 PA: L 4 5 6 7

Enforces laws and regulations pertaining to fishing activities, safety of equipment, and quality of products, performing any combination of the following duties:

Conducts processing plant, cold storage and boat inspections. Collects fish samples and performs physical, chemical and bacteriological analyses of products, following standard methods. Determines extent of parasite infestation in fillets, using candling table. Ascertains concentration of chlorine and brine solutions in processing and washdown waters, using portable concentration measuring devices. Detects and measures radioactivity in shipments, using geiger counter. Advises industry officials on fish processing methods, plant sanitation, quality of products and registration requirements. Recommends issuance, suspension or withdrawal of registration. Suggests improvements in utilization of by-products; such as, fish meals, fish oils and fish solubles. Ascertains that corrective measures are being carried out and takes action accordingly. Recommends method of disposal of fish unfit for human consumption. Determines eligibility of applicant for insurance coverage, appraising insurable commercial value of vessels and calculating cost of premium from standard cost table. Collects premium to validate indemnity coverage. Investigates accidents to evaluate damages and advises fishermen regarding preparation of claims and repairs on equipment. Suspends indemnity coverage on vessels not meeting standards. Recommends payment of loans and grants, development of mooring and storage facilities for fishermen. Writes reports, stating condition of processing facilities and legitimacy of applications for vessel licensing.

May supervise work of personnel engaged in performing similar duties. May be engaged in a particular fishing activity and be designated accordingly; for example,

Appraiser, Fishing Vessels
Fish-Quality Specialist

1116-166 FIRE INSPECTOR(gov. serv.)

DPT:268

fire-prevention officer.

GED: 4 SVP: 6 EC: B 6 PA: L 2 5 6 7

Inspects buildings to detect fire hazards and enforce municipal, provincial and federal laws and regulations:

Examines exteriors and interiors of buildings to detect hazardous conditions or violations of laws and regulations. Scrutinizes fire-fighting and fire-prevention equipment, such as, sprinkler systems, fire extinguishers and asbestos curtains to ensure operating efficiency. Inspects theatres during performances to prevent unsafe conditions such as overcrowding, blocked exits and crowded aisles. Examines flame-proofing of stage sets, scenery, curtain drops and draperies to eliminate or counteract fire hazards. Prepares individual report of violations of unsafe conditions. Discusses fire hazards with owner or manager and recommends safe methods of storing inflammables or other hazardous materials and conditions requiring corrective action such as faulty wiring. Keeps records and prepares monthly report of activities.

1116-199 OTHER INSPECTORS AND REGULATORY OFFICERS, GOVERNMENT

This group includes government inspectors and regulatory officers, not elsewhere classified; for example, those who appraise municipal real estate to determine taxable value; investigate absenteeism in schools; conduct in-flight testing of air-navigational aids, traffic controls and communication equipment; screen and classify motion pictures; conduct examination and flight tests to determine individual's ability to qualify for aircraft pilot's licence; enforce government acts related to human rights and discrimination in employment; ensure compliance with laws regulating child labour, wages and hours of work in business establishments; visit establishments with liquor licences to ensure that licensing standards are maintained; conduct pollution control surveys under legislation; take saliva and urine samples from

winning horses in races; investigate complaints of electrical interference with radio and television reception; locate and destroy noxious weeds in rural areas; inspect and test retail scales, meters, containers and other measuring devices to protect public against fraud; inspect land and new constructions to ensure conformance with zoning regulations. Typical examples of occupational titles covered by this residual group definition are:

Assessor(gov. serv.)
Attendance Officer(gov. serv.)
Broadcast-Interference Inspector(gov. serv.)
Facilities-Flight-Check Pilot(gov. serv.)
Film Censor(gov. serv.)
Flight-Operation Inspector(gov. serv.)
Labour Investigator(gov. serv.)
Liquor-Licence Inspector(gov. serv.)
Pollution-Control Inspector(gov. serv.)
Race-Horse Inspector(gov. serv.)
Weed Inspector(gov. serv.)
Weights-and-Measures Inspector(gov. serv.)
Zoning Inspector(gov. serv.)

1119-OFFICIALS AND ADMINISTRATORS UNIQUE TO GOVERNMENT, N.E.C.

This unit group includes occupations, not elsewhere classified, concerned with administering a wide variety of activities, unique to government, in such fields as public health, labour arbitration, civil rights, welfare and compensation. Those occupations unique to government, whose duties are similar to the duties described in the master title definitions 01-090 GENERAL MANAGER (prof. & tech., n.e.c.) and 01-170 MANAGER (prof. & tech., n.e.c.) are classified in Unit Group 1113, GOVERNMENT ADMINISTRATORS.

Federal Officials and Administrators, Unique to Government 1119-110 through 1119-126

1119-110 FOREIGN-SERVICE OFFICER(gov. serv.) DPT:118 GED: 5 SVP: 7 EC: 1 PA: L 5 6

Represents Canada and its citizens, and promotes Canadian national interest in other countries and international organizations, performing any combination of the following or similar duties.

Develops and recommends foreign policy to the Canadian government. Interprets Canadian foreign policy to governments and nationals of foreign countries. Disseminates information to promote trade and international good will. Participates in international discussions related to scientific, technical, environmental and other matters. Negotiates with foreign governments to further and protect Canadian legal, economic, political and other interests, and welfare of resident or visiting Canadian citizens. Issues passports to Canadians, and visas to foreigners wishing to visit or emigrate to Canada. Writes reports based on observation and analysis of conditions and developments in foreign countries, such as political activities, economic and tariff policies, major financial transactions, market conditions, trends in public opinion, and social conditions. Reports on prospective location, and analyzes opportunities for industrial investment and development. Recommends and implements policies to aid developing countries through programs of capital assistance, food and commodity aid, and educational and technical assistance. Promotes better mutual understanding by encouraging and administering cultural exchange programs in fields such as education, arts and sciences.

May be designated according to position held or function performed.

1119-114 CO-ORDINATOR, BILINGUAL-SERVICE(gov. serv.) DPT:168 GED: 5 SVP: 7 EC: 1 PA: S 5 6

Provides special bilingual assistance to senior governmental officials on matters such as speeches, correspondence and publications, utilizing an extensive knowledge of the two official languages and the bi-cultural nature of the country:

Studies journals, directives and other publications relating to departmental economic and social policies, programs and objectives to

acquire background knowledge of bilingual and bicultural oriented problems. Interprets oral and written information in both languages to ensure effective communication and awareness of attitudes and opinions. Translates incoming correspondence, memoranda and reports for unilingual officials and prepares replies for signature. Evaluates and edits or directs editing of outgoing correspondence or prepared speeches, in one or other of the official languages, to ensure that policies are correctly interpreted. Summarizes articles and reports appearing in periodicals in one language and prepares briefs in the other language on items which purport to interpret government policy. Recommends language or cultural approach most likely to be successful in dealing with sensitive situations which arise. Conducts correspondence and interviews in either of the official languages with officials of other departments, agencies and the public.

1119-122 VETERANS' SERVICE OFFICER(gov. serv.)

DPT:118

GED: 4 SVP: 7 EC: 1 PA: S

Advises and aids veterans or their dependants to present benefits or pension claims to pension authorities:

Evaluates and determines validity of claim according to regulations of legislation. Analyses veteran's record of work, education, training, and physical condition, in terms of job requirements and labour market conditions, to determine veteran's possible earning capacity. Prepares claim forms and briefs, and assembles related evidence. Prepares written report to document case in preparation for hearing.. Appears before and discusses case with board members to determine veteran's eligibility for benefits. Prepares information bulletins and engages in correspondence to interpret current legislation.

May adjudicate disputed claims.

1119-126 REFEREE, UNEMPLOYMENT-INSURANCE APPEALS(gov. serv.) DPT:168

GED: 4 SVP: 7 EC: 1 PA: S 5

Acts as member of board which renders decisions concerning right to insurance benefits:

Participates in appeal hearings to discover pertinent facts from employer and claimant relating to disputed claim in accordance with federal statute and procedures. Reviews evidence and sustains or dismisses claim decision rendered by insurance official, based on previous testimony, claim records, applicable provision of law and precedents established. Writes appeal decision explaining ruling and informs interested parties of result. Confers with legal staff and other personnel of Unemployment Insurance Commission to obtain additional information bearing on appeal and to clarify future implications of decision.

May act as chairman of appeal board and be designated accordingly, Chairman, Unemployment-Insurance Appeals Board

Provincial Officials and Administrators, Unique to Government 1119-146 through 1119-166

1119-146 OMBUDSMAN(gov. serv.) DPT:018 commissioner of inquiries; people's protector GED: 5 SVP: 8 EC: 1 PA: S 5 6

Receives, investigates and reports on citizen's grievances regarding alleged mistreatment by government personnel:

Receives written petition and investigates citizen's grievance, such as, assessment of land, civil service complaints, racial, ethnic or linguistic discrimination, expropriation of property and unwarranted detention. Makes recommendation to refer grievances or complaints, to proper authorities for corrective action. Cancels, reviews, alters or sustains governmental decisions according to facts obtained. Rejects petitions with inherent right of appeal. Prepares annual report on activities for legislative assembly. Appoints assistants and other employees as necessary.

May summon and interview under oath, government officers able to provide information concerning a grievance.

1119-150 EXTENSION SUPERVISOR(gov. serv.) DPT:138
district-program supervisor.
 GED: 5 SVP: 7 EC: 1 PA: S 5 6

Supervises and co-ordinates activities of workers engaged in agricultural or home economics services of agricultural extension program within an assigned region:
 Organizes and conducts training programs to instruct extension workers in agricultural or home economics. Determines methods and procedures or services required and assigns tasks to workers according to extension program policies. Collects, analyses and distributes data concerning agricultural or home economics subjects to keep extension workers informed. Examines methods and procedures to evaluate content and effectiveness of services within district. Delivers or directs delivery of lectures to groups, such as commercial and community organizations, to publicize and promote extension service activities. Reviews personnel data and recommends action, such as hiring and discharging of workers and adjusting salaries. Prepares information pamphlets and brochures concerning farm management and farm financing.
 May assist in formulating budget requests to obtain operating funds.

1119-154 PUBLIC TRUSTEE(gov. serv.) DPT:138
 GED: 5 SVP: 7 EC: 1 PA: S 5

Directs personnel engaged in activities, such as disposing of unclaimed property and of unclaimed estates of deceased persons, administering estates of persons confined to mental hospitals, and maintains special trust funds:
 Directs search for owners of unclaimed property, such as abandoned automobiles and cash or property of deceased individuals without known heirs. Ascertains assets of deceased persons, supervises inventories, investigates next-of-kin and prepares genealogical chart for submission to legal authority. Receives and directs processing of recovery claims, according to results of investigation or other evidence of ownership. Authorizes deposit of unclaimed monies in trust fund or arranges for public auctions of unclaimed property. Administers such special trust funds as required. Administers estates of inmates confined to mental institutions by arranging for dependent's allowances, conservation of assets, operation of business affairs and use of patient's assets by members of family.

1119-158 AGRICULTURAL REPRESENTATIVE(gov. serv.) DPT:228
farm consultant; grower's adviser.
 GED: 5 SVP: 6 EC: B PA: L 4 5 6 7

Develops, promotes and provides specialized agricultural service programs in an assigned district:
 Collects, analyzes and evaluates agricultural data. Plans and develops techniques, and advises farmers to assist them in solving problems, such as crop rotation and improvement, and soil erosion. Demonstrates practical procedures used in solving agricultural problems. Meets with commercial organization representatives or government specialists to inform them of available advisory services and to obtain their co-operation. Prepares activity, planning and other reports, and maintains record of services rendered and effect of advice given. Inspects fields and greenhouses to analyze unhealthy growths and recommends corrective measures. Prepares information and training leaflets, pamphlets and other material for use as training aids. Prepares and conducts courses and lectures in specialized fields for extension personnel, and farm and other groups.
 May advise farmers on readiness of crops for harvest or curing techniques. May be designated according to field of specialization; for example
 Agricultural-Engineering Specialist
 Livestock Specialist
 Soil and Crops Specialist

1119-166 WELFARE AND COMPENSATION OFFICER(gov. serv.) DPT:268
 GED: 4 SVP: 6 EC: 1 PA: L 5 6

Administers welfare and compensation laws and regulations, performing any combination of the following duties:
 Interviews applicants for assistance to determine their eligibility for welfare benefits. Investigates health and medical records, and obtains details of saving deposits, cash-on-hand, surrender values of insurance policies and earnings. Maintains liaison with welfare agencies and

guides applicants for assistance to appropriate source. Discusses status of particular cases with relevant officials to determine course of action. Prepares welfare budgets, issues relief vouchers and approves or arranges for transportation of indigent hospitalization cases. Inspects working conditions and welfare arrangements in factories and other work places. Investigates and verifies reports of industrial accidents to determine right to compensation and salary. Examines municipal welfare and assistance files and accounts to determine eligibility of recipients and to verify amounts paid.
 May be designated according to nature of assistance provided; for example,
 Welfare-Field Worker
 Workman's-Compensation Officer

Municipal Officials and Administrators, Unique to Government
1119-186 through 1119-190

1119-186 MEDICAL-HEALTH OFFICER(gov. serv.) DPT:128
public-health physician.
 GED: 6 SVP: 8 EC: 1 PA: L 5 6

Directs and controls the implementation and enforcement of measures for safeguarding and promoting health in a city, county, or other municipal district or region:
 Directs and co-ordinates public action to promote the health of a municipality, and to eradicate or control infectious diseases and diseases of major economic and social importance, such as tuberculosis and venereal diseases. Directs inspections of nursing homes and certain community institutions, of food processing plants, hotels, restaurants, and other public establishments, to ensure conformity with prescribed standards, and recommends remedial action. Oversees or supervises facilities concerned with public health in clinics and schools, such as those of dental and nursing services. Advises on measures to improve environmental health, such as sanitation, sewage, water, air, and infectious insects.
 May impose quarantine on areas or persons to prevent spread of contagious diseases. May order decontamination of infected places, including private homes. May have responsibility for health services of a type of municipality and be designated accordingly,
 Medical Officer of Health, City

1119-190 TOWN CLERK(gov. serv.) DPT:138
 GED: 5 SVP: 7 EC: 1 PA: S 5 6

Performs any combination of following duties to facilitate work of city executive and maintain liaison with other governmental units:
 Drafts agendas and bylaws for town council. Records minutes of council meetings, answers official correspondence, and prepares reports on civic needs. Supervises clerical personnel engaged in administrative duties. Receives, tabulates and certifies accuracy of election returns. Directs printing and distribution of laws, resolutions and other official documents. Issues marriage licences. Keeps complete set of municipal bylaws and vital statistics. Attends and acts as secretary for town or city council.
 May direct activities of personnel employed in municipal libraries, and develop collection of books and periodicals. May keep fiscal records and accounts. May be designated according to type of local government; for example,
 City Clerk
 Municipal Clerk

Other Officials and Administrators Unique to Government
1119-210 through 1119-299

1119-210 CONCILIATOR(gov. serv.) DPT:118
conciliation officer.
 GED: 5 SVP: 8 EC: 1 PA: S 5 6

Negotiates with management and union representatives to resolve labour disputes:
 Confers with management and labour representatives separately or collectively to obtain their respective attitudes on contentious issues. Assesses the different points of view and suggests alternatives or compromises based on knowledge of past experience or precedents. Persuades parties to discuss other articles on agenda when negotiations appear to falter on specific issue. Acts as channel of communication between parties conducting meetings separately.

Evaluates confidential information provided by each party and determines how it can best be used without exposing source or specific details. Resolves contentious points to arrive at mutually agreeable solution. Reports decisions reached or outcome of negotiations to management and union representatives. Prepares settlement memorandum and obtains signature of both parties.

May give instructions in conciliation practices and procedures. May evaluate proposals of both parties in dispute and make arbitrary contractual decisions, and be designated accordingly.

Arbitrator

1119-214 ADMINISTRATOR, DENTAL-HEALTH SERVICE(gov. serv.; medical) DPT:128
GED: 5 SVP: 8 EC: 1 PA: L 4 5 6 7

Plans, organizes and maintains dental-health program of public and private health agencies:

Analyzes dental needs of community to determine changes, trends and discrepancies in dental-care programs. Instructs school and other community groups in dental hygiene and known preventive methods, in clinics or through communication media. Plans and directs the provision of dental services to school children and other groups. Investigates methods for evaluating changes in dental-health status and needs of community.

1119-218 EDUCATIONAL DIRECTOR, PUBLIC-HEALTH NURSING(gov. serv.) DPT:128
GED: 5 SVP: 8 EC: 1 PA: S 5 6

Plans and directs educational program of public-health nursing service:

Develops educational plans for in-service training of nurses and personnel of related community agencies. Co-operates with nursing specialists in organizing educational programs. Prepares educational materials for use in teaching and demonstrating nursing activities. Takes part in selecting nursing candidates and orienting new employees. Co-operates with nursing schools and colleges in providing supervised field instruction to enable students to gain practical experience and to observe nursing techniques. Conducts surveys and analyses to determine adequacy and effectiveness of educational materials and of program.

1119-222 MINISTERIAL ASSISTANT(gov. serv.) DPT:118
GED: 5 SVP: 7 EC: 1 PA: S 5 6 7

Provides assistance to minister or deputy-minister of government department in carrying out administrative duties by performing one or more of the following duties:

Directs administrative operation of minister's office by establishing, modifying and controlling work-plan procedures. Analyzes incoming letters, memoranda, reports and submissions on minister's behalf and gives direction for departmental action on matters not requiring personal involvement of minister. Drafts replies to correspondence for minister's signature. Answers inquiries received from government departments, organizations, representatives and general public by letter or telephone. Evaluates, for form and substance, correspondence prepared by others for minister's signature, to ensure it reflects department's policies and standards. Co-ordinates departmental action in the preparation, production and submission of parliamentary replies. Prepares briefing summaries for minister on complex matters submitted by divisions of department and conducts additional research as required or directed. Advises minister on particular or general implications of policy proposals. Maintains liaison, on behalf of minister, with senior departmental officers and officials of other governmental departments on matters requiring minister's attention or decision. Receives personal representations from federal, provincial and municipal officials, the general public, members of welfare organizations, or other groups and determines specific issues involved. Meets with departmental officials or requests submission of reports to develop possible solutions to problems, and makes recommendations to the minister or senior departmental officers.

1119-230 HISTORIC-SITES ADMINISTRATOR(gov. serv.) DPT:168
GED: 5 SVP: 6 EC: 1 PA: L 5 7

Conducts studies to guide establishment, conservation and reconstruction of national historic parks and sites:

Conducts research, based on written, physical and oral evidence, to

provide information for historical sites and monument agency in selecting sites for development. Provides detailed report to serve as guidelines for restoration by estimating extent of development needed. Provides information and encouragement to historical societies on topics associated with Canadian history. Participates in historical studies by searching and analyzing historical sources, and publishes reports to indicate historical and archeological significance. Collates documentary and archeological evidence to produce reports on physical and structural details of site and its period of historical significance. Directs preparation of brochures, exhibits, maps, photographs and similar material to stimulate public interest in site. Maintains custody of historical documents acquired during research studies.

1119-234 CROWN-ASSETS DISPOSAL OFFICER(gov. serv.) DPT:118
surplus-property officer.
GED: 4 SVP: 7 EC: 1 PA: S 5 7

Disposes of redundant or obsolete government property and equipment by sale, lease, donation or destruction, performing any combination of the following duties:

Visits government installations and inspects items, such as motor vehicle, land, tools, military supplies and office equipment to determine condition, and estimates market value. Studies market conditions and disposal facilities to determine time, place, type of sale, lease or donation, and whether items should be disposed individually or in bulk. Prepares advertising material and selects media for its release. Selects potential donation-recipients, utilizing knowledge of probable needs and comparing inventories with request received. Assigns duties and directs activities of staff engaged in disposals. Determines method of display and sets precision conformance with estimated value and market condition. Advises government agencies or contracted-establishments of salvage possibilities of material. Recommends destruction or abandonment of property not deemed possible or practical to sell, lease, donate or salvage. Negotiates details of transfer with agency involved. Ensures that property sold, leased or donated complies with set criteria for disposal.

1119-238 PARK SUPERINTENDENT(gov. serv.) DPT:138
GED: 4 SVP: 7 EC: B PA: L 4 5 6 7

Co-ordinates activities of workers engaged in developing, maintaining protecting and promoting utilization of federal, provincial or municipal parks:

Tours selected areas to assess development possibilities and determine maintenance needs. Prepares estimates of costs to plan and provide or improve appearance of park area, fish and wildlife protection, recreation facilities and visitor safety. Directs workers engaged in maintenance and development of parks, rescue activities and fire protection in park area. Investigates accidents and vandalism, theft, poaching and other violations and presents evidence before court or designated legal authority. Answers letters of inquiry and addresses visitors and civic organizations to inform public of park regulations, recreational facilities, and historical and scenic features. Prepares reports of area park activities. Inspects park's drinking water resources and takes samples for testing. Ensures that equipment, such as, vehicles, fire pumps, boats and motors are maintained in good condition.

May maintain records of visitor attendance, permits issued and monies received.

1119-242 LABOUR-RELATIONS RETURNING OFFICER(gov. serv.) DPT:138
GED: 4 SVP: 6 EC: 1 PA: S 5 6

Plans, supervises and conducts representation votes in establishment to certify or de-certify a labour union as sole contractual bargaining agent:

Arranges, as directed by labour relations board, the holding of a representation poll of employees in establishment during working hours. Supervises activities of deputy returning officers, and instructs vote scrutineers. Rules on eligibility of persons whose right to vote has been challenged and segregates ballots of employees not included on voter's list. Opens ballot box at close of poll and counts ballots deposited before representatives of both parties. Decides on validity of disputed or improperly marked ballots. Prepares report on voting for labour relation board. Arranges, convenes and chairs meetings of both parties to secure information on voting constituency, and questions parties on issues involved to try to reach agreement.

Ascertains reasons for challenged names, records hearings, and obtains approval of voter's list.
May extend voting hours in unusual cases. May serve summonses and perform preliminary investigation of alleged irregularities.

1119-246 RELOCATION COMMISSIONER(gov. serv.)

DPT:138

GED: 4 SVP: 6 EC: I PA: S 5 6

Supervises and co-ordinates activities of workers engaged in relocating people from expropriated property:
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.). Co-ordinates plans to resettle people from expropriated properties and to effect relocation of homes, businesses or other establishments affected by highway, flood-control or other similar public improvement. Confers with people affected by condemnation or expropriation proceedings to render the relocation as comfortable as possible.
May arrange the moving of houses, fences and other structures, drilling of wells, and construction of new foundations.

1119-250 TRAFFIC-SAFETY ADMINISTRATOR(gov. serv.)

DPT:138

GED: 4 SVP: 6 EC: I PA: S 5 6

Directs and co-ordinates traffic-safety programs for local or provincial authorities:
Plans and directs safety campaigns and co-ordinates activities of auxiliaries, such as school-crossing guards and school-boy patrols. Delivers speeches and participates in public forums and broadcasts to educate motorists and pedestrians in safety habits. Prepares, or directs workers engaged in preparing pamphlets, advertisements, spot broadcasts and other educational materials concerned with safety. Confers with officials of other departments or authorities, such as provincial police, traffic engineers and fellow safety administrators to co-ordinate program activities. Takes part in the deliberations of committees which recommend changes in legislation and highway-use regulations to improve safety conditions.
May direct workers engaged in compilation of traffic safety statistics and may evaluate statistics according to accepted procedures. May formulate plans for improving driver education. May maintain files of accident reports and map reference accident locations to facilitate corrective measures.

1119-254 ADVISOR, PUBLIC ASSISTANCE(gov. serv.)

DPT:228

GED: 4 SVP: 6 EC: I PA: S 5 6

Reviews, evaluates and establishes standards and practices for governmental welfare organizations and agencies:
Interprets federal and provincial standards and program goals to local boards and community groups. Consults with municipal and community welfare councils on matters relating to program. Evaluates agencies' administration, program, personnel and facilities in relation to changing community needs, and recommends changes to meet needs. Informs federal or provincial agency concerning conditions and operational trends in local agencies and communities. Confers with representatives of other national agencies.
May organize or conduct training and staff development programs. May establish new local affiliates or instigate new programs.

1119-258 PARK RANGER(gov. serv.)

DPT:267

GED: 3 SVP: 6 EC: O PA: L 4 5 6

Administers regulations and carries out established policies in national, provincial or municipal parks, performing any combination of the following duties:
Provides visitors with information, such as park regulations, points of interest and availability of first aid, medical, recreational and other facilities. Cautions, evicts or apprehends those who violate park regulations. Directs or participates in first aid and rescue activities. Enforces standards of cleanliness and sanitation. Directs traffic, investigates accidents and patrols park areas to prevent fires, vandalism and theft. Records park-use statistics and incidents in park. May supervise and train subordinates in surveillance of camp sites, and operation of fire-fighting equipment. May supervise seasonal employees in wood cutting, garbage collection and other maintenance activities.

1119-299 OTHER GOVERNMENT OFFICIALS

This group includes government officials, not elsewhere classified; for example, those who prepare paroles for inmates of penal institutions, direct public service qualifying examinations, adjudicate claims of persons seeking social security benefits, process provincial vital statistics, arbitrate damages caused by industrial pollution, determine eligibility of public housing applicants, investigate insurance and loan companies, and direct maintenance of city or district garbage collection. Typical examples of occupational titles covered by this residual group definition are:

Chairman, Parole Board(gov. serv.)
Chief Proctor(gov. serv.)
Claims Adjuster(gov. serv.)
Deputy Registrar(gov. serv.)
Fumes Arbitrator(gov. serv.)
Housing-Project Interviewer(gov. serv.)
Insurance Commissioner(gov. serv.)
Sanitation Supervisor(gov. serv.)

113/114-OTHER MANAGERS AND ADMINISTRATORS

This minor group includes occupations concerned with carrying out senior-and middle-management activities common to governmental, industrial, commercial and other organizations. Functions include: planning, organizing, directing and controlling activities in the fields of natural science and engineering, social science, teaching, medicine, finance, personnel and industrial relations, sales and advertising, purchasing, services, production, transport and other areas of the economy. Senior official and managerial occupations, unique to government, are classified in Minor Group 111, OFFICIALS AND ADMINISTRATORS UNIQUE TO GOVERNMENT. OTHER MANAGERS AND ADMINISTRATORS are classified in the following unit groups:

1130 General Managers and Other Senior Officials

1131 Management Occupations: Natural Sciences,
Engineering, and Mathematics

1132 Management Occupations, Social Sciences
and Related Fields

1133 Administrators in Teaching and Related
Fields

- 1134 Administrators in Medicine and Health
- 1135 Financial Management Occupations
- 1136 Personnel and Industrial Relations
Management Occupations
- 1137 Sales and Advertising Management
Occupations
- 1141 Purchasing Management Occupations
- 1142 Services Management Occupations
- 1143 Production Management Occupations
- 1145 Management Occupations, Construction
Operations
- 1147 Management Occupations, Transport and
Communications Operations
- 1149 Other Managers and Administrators, n.e.c.

1130-GENERAL MANAGERS AND OTHER SENIOR OFFICIALS

This unit group includes occupations in the senior levels of managerial and administrative work, as described under the master title, 01-190 GENERAL MANAGER (prof. & tech., n.e.c.) concerned with planning, organizing, directing and controlling on owner's or own behalf, an industrial, commercial, or other enterprise, establishment or organization. Chief executive officers of chains of establishments are classified in this unit group. Senior officials, such as presidents and vice-presidents, are also included. General Managers and Managers, unique to government, are classified in 1113, GOVERNMENT ADMINISTRATORS. Middle management occupations are classified in the appropriate unit groups of Minor Group 113/114, OTHER MANAGERS AND ADMINISTRATORS.

1130-110 CHIEF EXECUTIVE, EDUCATION(educ.) DPT:018 GED: 6 SVP: 8 EC: 1 PA: S 5 6

Plans, organizes, directs and controls, through subordinate managerial officials, activities of universities; elementary and secondary schools; technological, trade, vocational and fine arts schools; and training and instructional organizations in industry, private business and other agencies, (Unit Group 1133):
Performs duties as described under master title, 01-190 GENERAL MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of management and organization of educational activities.
May specialize in managing a particular field of education and be designated accordingly; for example,
Director of Education, Public School
General Manager, Business Schools
General Manager, Trade Schools
President, University

1130-114 HOSPITAL ADMINISTRATOR(medical) DPT:018 executive director, hospital. GED: 6 SVP: 8 EC: 1 PA: S 5 6

Plans, organizes, directs and controls, through subordinate managers, activities of organizations engaged in health diagnosing and treating, nursing and therapy, medical research, preventive medicine and other areas in medicine and health, (Unit Group 1134):
Performs duties as described under master title, 01-090 GENERAL MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of hospital administrative practices.

1130-118 CHIEF EXECUTIVE, NATURAL SCIENCES AND ENGINEERING(prof. & tech., n.e.c.) DPT:018 GED: 6 SVP: 8 EC: 1 PA: S 5 6

Plans, organizes, directs and controls, through subordinate managerial officials, activities of organizations engaged in fields, such as architecture and engineering, life sciences, physical sciences, mathematics, statistics and systems analysis, (Unit Group 1131):
Performs duties as described under master title, 01-090 GENERAL MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of applied and natural science and mathematics management practices.
May specialize in managing a particular natural science, engineering or related field of activity and be designated accordingly; for example,
Executive Director, Aerospace Study(air & space-craft)
General Manager, Engineering Research
General Manager, Environmental Studies
Vice-President, Research Operations

1130-122 GENERAL MANAGER, CONSTRUCTION (construction) DPT:018 GED: 6 SVP: 8 EC: 1 PA: S 5 6

Plans, organizes, directs and controls, through subordinate managers, activities of organizations engaged in construction, major alteration, maintenance or repair of structures, facilities and systems, (Unit Group 1145):
Performs duties as described under master title, 01-090 GENERAL MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of construction activities, methods and procedures.
May specialize in managing a particular field of construction activities and be designated accordingly; for example,
General Manager, Building Construction
General Manager, Highway Construction

1130-126 GENERAL MANAGER, FINANCE(bank. & finance) DPT:018 GED: 6 SVP: 8 EC: 1 PA: S 5 6

Plans, organizes, directs and controls, through subordinate managers, activities of banks, credit agencies, investment and insurance companies, or similar financial institutions, (Unit Group 1135):
Performs duties as described under master title, 01-090 GENERAL MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of financial management practices.
May specialize in managing a particular financial field and be designated accordingly; for example,
General Manager, Insurance
General Manager, Trust
President, Bank

1130-130 GENERAL MANAGER, PRODUCTION(prof. & tech., n.e.c.) DPT:018
GED: 6 SVP: 8 EC: 1 PA: S 5 6

Plans, organizes, directs and controls, through subordinate managers, activities of production organization, (Unit Group 1143):
Performs duties as described under master title, 01-090 GENERAL MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of production management practices.
May specialize in managing a particular type of production organization and be designated accordingly; for example,
General Manager, Electrical Appliances Manufacturing(electric equip.)
General Manager, Feed-and-Flour Mills(feed & flour mill.)
General Manager, Pulp and Paper Production(pulp & paper)
General Manager, Shoe Manufacturing(shoes)

1130-134 GENERAL MANAGER, SALES AND ADVERTISING(prof. & tech., n.e.c.) DPT:018
GED: 6 SVP: 8 EC: 1 PA: S 5 6

Plans, organizes, directs and controls, through subordinate managers, activities of sales and advertising organizations, (Unit Group 1137):
Performs duties as described under master title, 01-090 GENERAL MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of sales and advertising management practices.
May specialize in managing sales or advertising activities and be designated accordingly; for example,
General Manager, Advertising
General Manager, Sales

1130-138 GENERAL MANAGER, SERVICES(prof. & tech., n.e.c.) DPT:018
GED: 6 SVP: 8 EC: 1 PA: S 5 6

Plans, organizes, directs and controls, through subordinate managers, organizations which provide protective services, lodging and accommodation, food and beverage, apparel and furnishings, catering, cleaning of building and other services, (Unit Group 1142):
Performs duties as described under master title, 01-090 GENERAL MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of service management practices.
May specialize in managing a particular service field and be designated accordingly; for example,
Executive Chief, Protective Services(bus. serv.)
General Manager, Cleaning Services
General Manager, Hotel(cater. & lodg.)
General Manager, Laundry and Dry Cleaning(laund., clean. & press.)

1130-142 GENERAL MANAGER, TRANSPORT AND COMMUNICATIONS(prof. & tech., n.e.c.) DPT:018
GED: 6 SVP: 8 EC: 1 PA: S 5 6

Plans, organizes, directs and controls, through subordinate managers, organizations concerned with the transportation of people or goods or with the transmission of communications, (Unit Group 1147):
Performs duties as described under master title, 01-090 GENERAL MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of transport or communication management practices.
May specialize in managing a particular transport or communication activity and be designated accordingly; for example,
General Manager, Telecommunications(telecom.)
General Manager, Transit System(trans., n.e.c.)
President, Broadcasting Corporation(broadcast., motion pic. & stage)

1130-199 OTHER GENERAL MANAGERS AND SENIOR OFFICIALS

This group includes general managers and senior officials, not elsewhere classified; for example, those who carry out senior management activities in business associations, political parties, trade unions, professional sport organizations and publishing enterprises. Typical examples of occupational titles covered by this residual group definition are:
Executive Director, Social Service Organization(social wel.)
General Manager, Business Association(misc. serv.)
General Manager, Employment Agencies(bus. serv.)

General Manager, Hockey Association(amuse. & rec.)
General Manager, Political Organization(misc. serv.)
General Manager, Publishing House(print. & pub.)
President, Labour Organization(misc. serv.)

1131-MANAGEMENT OCCUPATIONS: NATURAL SCIENCES, ENGINEERING AND MATHEMATICS

This unit group includes occupations concerned with carrying out managerial and administrative activities, as described under the master title, 01-170 MANAGER (prof. & tech., n.e.c.), in such fields as physical sciences, life sciences, architecture, engineering, mathematics, statistics, systems analysis and computer programming. Occupations in this unit group are engaged in managerial and administrative activities related to Major Group 21, OCCUPATIONS IN NATURAL SCIENCES, ENGINEERING AND MATHEMATICS.

1131-110 MANAGER, ARCHITECTURAL SERVICE(prof. & tech., n.e.c.) DPT:118
GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls, through subordinate managers and supervisors, activities of department or branch concerned with architectural services:
Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of planning and designing of buildings and other structures.
May be designated according to type of architectural activity managed; for example,
Manager, Landscape Architecture

1131-114 MANAGER, DATA PROCESSING AND SYSTEMS ANALYSIS (prof. & tech., n.e.c.) DPT:118
GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls, through subordinate managers and supervisors, activities of department or branch concerned with electronic data processing:
Performs duties as described under master title, 01-017 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of theory and techniques of computer systems analysis and data processing operations. Oversees activities of staff engaged in analyzing data-processing needs, and problems of commercial, industrial and other enterprises; advising on the feasibility and cost of using electronic data processing; devising and introducing computer programs; and operating electronic-data-processing equipment.
May be designated according to data processing establishment managed; for example,
Manager, Data Center

1131-118 MANAGER, ENGINEERING(prof. & tech., n.e.c.) DPT:118
GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls, through subordinate engineering supervisors, activities of department or branch concerned with various aspects of engineering:
Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of one or more fields of engineering; such as, chemical, civil, electrical, aeronautical or nuclear engineering. Allocates finances and personnel to various engineering projects, or contracts with consulting firms to complete portions of the work. Reviews progress, and implements administrative measures to ensure optimum profitability for organization, consistent with specified quality standards. Co-ordinates quality-control program in manufacturing operations to prevent, detect, and correct quality problems. Directs development of new engineering products and techniques, and directs investigations into new uses and adaptations of existing products and equipment produced through engineering.
May be designated according to specific engineering activity or discipline managed; for example,
Director, Engineering Quality Control Department
Director, Engineering Research and Development

Head, Aerospace Engineering
Manager, Civil-Engineering Division
Manager, Industrial-Engineering Department
Manager, Traffic Engineering

1131-122 MANAGER, LIFE SCIENCES PROGRAM(prof. & tech., n.e.c.) DPT:118
GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls, through subordinate scientific supervisors, activities of department or branch concerned primarily with research and quality control activities in the life sciences: Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of one or more life sciences, such as agriculture, biology, and pharmacology. Allocates finances and personnel to various research projects into the life sciences, reviews findings and advises senior management, medical, governmental and other officials of possible applications. Provides for inspection and testing programs in preparation of food, drugs, herbicides and related chemical and biological preparations. May be designated according to specific life science discipline or activity managed; for example, chief, Biological-Research Department Manager, Ecological Research Quality Control Director, Pharmaceuticals Manufacturing

1131-126 MANAGER, PHYSICAL SCIENCES PROGRAM(prof. & tech., n.e.c.) DPT:118
GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls, through subordinate scientific supervisors, activities of department or branch concerned primarily with research and quality control activities in the physical sciences: Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of one or more physical sciences; such as, chemistry, physics, geology and meteorology. Assigns experiments and research production work to departmental personnel. Develops and analyzes statistical data and specifications to establish required quality and reliability standards for work carried out through subordinates, and ensures that sound scientific methodology is implemented and standards are maintained. Advises senior management on implications of research, quality control and other activities pertinent to the development of new products, techniques or administrative policies. May be designated according to specific physical science activity managed; for example, Director, Agricultural-Chemistry Branch Director, Oceanographic Research Manager, Chemical-Research Division Manager, Petroleum-Geology Department

1131-130 MANAGER, MATHEMATICAL SERVICES(prof. & tech., n.e.c.) DPT:118
GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls, through supervisory personnel, activities of department concerned with applied mathematics and research, by performing any combination of the following duties: Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.). Applies specialized knowledge of mathematical techniques to solve problems in fields, such as science and engineering. Obtains data, using techniques, such as sampling and surveying, and applies statistical methods to calculate premiums and benefits on insurance policies and annuities. May be designated according to specific mathematical activity managed; for example, Director, Statistical Department(prof. & tech., n.e.c.) Manager, Actuarial Department(prof. & tech., n.e.c.)

1132-MANAGEMENT OCCUPATIONS, SOCIAL SCIENCES AND RELATED FIELDS

This unit group includes occupations concerned with carrying out managerial and administrative activities, as described under the master title, 01-170 MANAGER (prof. & tech., n.e.c.) in fields such as economics, sociology and psychology;

social and welfare work; law and jurisprudence; library, museum and archival sciences; educational and vocational counselling and community services. Occupations in this unit group are engaged in managerial and administrative activities related to Major Group 23, OCCUPATIONS IN SOCIAL SCIENCES AND RELATED FIELDS. Supervisors of community service workers are classified in Unit Group 2333, OCCUPATIONS IN WELFARE AND COMMUNITY SERVICES.

1132-110 DIRECTOR, MUSEUM(educ.) DPT:118
gallery director.
GED: 5 SVP: 9 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls through subordinate supervisors, and within authority delegated by senior management, museum or art gallery to conserve traditions, cultivate aesthetic tastes, and provide intellectual enrichment, through research and recreational and educational activities: Performs duties as described under master title, 01-170, MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of subjects, such as museum science, painting, sculpture, history, geology, sociology, anthropology, education and the art of display. Approves, or recommends for approval, the purchase or collection of specimens, artifacts and works of art. Analyzes various programs and display projects and weighs favourable or unfavourable criticism of them as a basis for further planning or corrective action. Plans suitable programs for research and scholarly activities related to science, technology, humanities and fine arts. May provide guidance to other museums and galleries on research programs, represent museum or gallery at national or international conferences, and present learned papers. May be designated according to type of institution managed; for example, Director, Art Gallery

1132-114 DIRECTOR, LIBRARY(educ.) DPT:118
chief librarian; branch librarian.
GED: 5 SVP: 7 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls, through supervisory personnel, library department of organization or chain of affiliated libraries serving community: Performs duties as described under master title, 01-170, MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of library services. Establishes policy for evaluating and developing library collections. Appraises, selects and modifies procedures, or develops new methods and techniques for library operations; such as, use of automatic data processing and photocopying equipment to improve services. Reviews and evaluates orders for books, periodicals, films and phonograph records. Examines trade publications and samples, and interviews publishers' representatives to select stock for library.

1132-118 DIRECTOR, SOCIAL WORK(social wel.) DPT:118
GED: 5 SVP: 7 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls, through subordinate supervisors, activities within assigned regional area, or specific programs of an agency concerned with providing assistance to individuals or groups with social problems, and promoting social and recreational activities: Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of diagnosis and treatment of social inadequacies; organizing and supervising social, recreational and educational activities; and soliciting financial contributions for social programs. May be designated according to particular type of social service activity, for example, Director, Children's Aid Society Director, Community Centre Director, Community Funds Director, Prisoner-Rehabilitation Society

1132-199 OTHER MANAGERS, SOCIAL SCIENCES AND RELATED FIELDS

This group includes managers, not elsewhere classified, in social sciences and related fields, who manage departments or programs; such as, those concerned with conducting research and applying principles and theories of economics to formulate plans for the solution of economic problems; studying processes through which

man makes a living; investigating and tracing origin, development and social relationships of human beings; collecting, interpreting and applying scientific data relating to human behaviour and community planning; applying principles relating to law and its administration to provide legal services, maintaining archives; and assisting individuals and groups to solve their social, economic and personal problems. Typical examples of occupational titles covered by this residual group definition are:

Chief Archivist(educ.)
 Director, Anthropology Department(prof. & tech., n.e.c.)
 Director, Community Planning(prof. & tech., n.e.c.)
 Director, Counselling Services(prof. & tech., n.e.c.)
 Director, Sociology Department(prof. & tech., n.e.c.)

1133-ADMINISTRATORS IN TEACHING AND RELATED FIELDS

This unit group includes occupations concerned with carrying out managerial and administrative activities, as described under the master title, 01-170 MANAGER (prof. & tech., n.e.c.) in universities; elementary and secondary schools; technological, trades, vocational and fine arts schools; and training and instructional organizations in government, industry, private business and other agencies. Occupations in this unit group are primarily concerned with managerial and administrative activities related to Major Group 27, TEACHING AND RELATED OCCUPATIONS. Directors of athletics in an educational institution are classified in Unit Group 3710, Coaches, Trainers, Instructors and Managers, Sport and Recreation. Occupations concerned with administering major educational programs and policies at the provincial level are classified in Unit Group 1113, GOVERNMENT ADMINISTRATORS. University presidents and directors of education are classified in Unit Group 1130, GENERAL MANAGERS AND OTHER SENIOR OFFICIALS.

Administrators in Post-Secondary Education 1133-110 to 1133- 138

1133-110 ACADEMIC DEAN, UNIVERSITY OR COLLEGE(educ.) DPT:118
master, college; principal, college.
 GED: 6 SVP: 8 EC: 1 PA: S 5 6

Plans, organizes, directs and controls, through departmental or division chairmen, academic activities of university or college; Performs duties as described under the master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of faculty or college programs. Recommends and approves faculty appointments. Determines scheduling of courses and recommends curriculum revisions and additions. Advises students on selection of major academic areas, and co-ordinates academic counselling services of teachers in faculty or college. Directs, through subordinates, staff activities, such as research program. Participates in activities of various faculty and college committees. Acts as advisor to president of university and reports directly to him.

May be appointed or elected for a specific term. May be designated according to name of college, or type of faculty administered; for example,
 Dean, Faculty of Arts
 Dean of Graduate Studies
 Dean of Science

1133-114 DEAN OF STUDENTS(educ.) DPT:118
director of student affairs.
 GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans, organizes, directs and co-ordinates, through various subordinate administrators, non-academic student programs in university or college;

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of student programs. Participates in development of student-personnel policies, and advises staff members, such as president and registrar, on

problems relating to policy, program and administration. Directs admission of students to residence. Directs and assists in planning social, cultural and recreational programs for students. Counsels or advises students on personal and financial problems, educational and vocational objectives, and availability of student services. Sponsors and advises student organizations. Ensures that university rules are adhered to and student discipline is maintained. Prepares and administers budget for student programs. Acts as liaison official between administration and students.

May direct admissions, foreign-student services, health services, and advise student union. May teach one or more courses. May be in charge of men's activities only, or women's activities and be designated accordingly; for example,
 Dean of Men
 Dean of Women

1133-118 REGISTRAR, COLLEGE OR UNIVERSITY(educ.) DPT:118

GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls, through subordinate supervisors and administrators, registration activities and academic records system of a college or university, by performing any combination of the following duties:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.) applying specialized knowledge of registration and records policies and procedures. Consults with other officials to develop program of student registration and records. Analyzes registration statistics for use in formulating policies. Interprets registration policies to faculty and students. Advises students on types of courses offered. Compiles information, such as courses, schedules and admission and graduation requirements, for publication in school calendars and bulletins. Co-ordinates class schedules with room assignments for optimum use of buildings and equipment. Directs preparation of statistical reports on educational activities for government and educational associations. Directs activities of subordinate supervisory staff and others engaged in preparing commencement lists, and in evaluating, transcribing, recording and maintaining student records and credits. Administers examinations and issues official transcripts of grades.

May direct student awards and scholarship programs. May supervise student elections.

Administrators in Elementary and Secondary Education 1133-138 to 1133-142

1133-138 SUPERINTENDENT, EDUCATION(educ.) DPT:118
academic superintendent.
 GED: 5 SVP: 9 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls, through school principals, academic affairs of city, county or other school system, under direction of chief executive officer, by performing any combination of the following duties:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of educational policies and administration. Confers with school officials and teachers, and business, civic and other organizations to determine needs and interests of students and community. Develops and administers programs for the education and training of students, exceptional children, and adults. Directs or supervises recruitment, appointment, training, evaluation and promotion of teaching personnel. Prepares pamphlets, news releases, and other material to publicize and promote educational programs and auxiliary services, such as library service, driver education, and adult education. Analyzes data from reports, group discussions and interviews, to evaluate curricula, teaching methods and community participation in programs. Revises programs as required. Oversees guidance, psychological, transportation and other auxiliary services for students. Prepares budgets and determines allocation of funds for staff, supplies, equipment and facilities. Recommends location and size of schools and school boundaries to board of education.

May administer specific area of responsibility, depending on school system, and be designated accordingly; for example,

Director of Curriculum
 Director of Instruction
 Superintendent of Academic Affairs
 Superintendent of Elementary Schools
 Superintendent of Operations

Superintendent of Professional Development and Supervision
Superintendent of Program
Superintendent of Secondary Schools
Superintendent of Special Education
Superintendent of Student Services

1133-142 PRINCIPAL(educ.) DPT:118
GED: 5 SVP: 8 EC: 1 PA: S 5 6

Plans, organizes, directs and controls through department heads and supervising personnel, activities of teachers, and clerical and auxiliary staff at a public, private or business school:
Performs duties as described under the master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of educational programs. Reviews programs to ensure conformance to school board and provincial standards, and develops programs within limits of authority. Co-ordinates educational activities of teaching staff by chairing meetings, making personnel assignments, preparing timetables and issuing directives. Directs or personally executes administration and clerical activities concerned with student admissions, requisitioning of supplies and equipment, school meal service, student transportation and other auxiliary services. Maintains standards of student discipline, cleanliness and general behaviour in school. Confers with teachers, students and parents on educational and behavioural matters in school. Establishes and maintains relationships with colleges, community organizations, and other schools to co-ordinate educational services. Prepares and administers school budget. Directs and co-ordinates plant maintenance services. May recruit and hire teachers. May teach one or more classes. May be designated according to level or type of school administered; for example,
Headmaster, Private School
Principal, Business School
Principal, Elementary School
Principal, Secondary School
Principal, Teachers' College

Other Administrators in Education 1133-162 to 1133-199

1133-162 DIRECTOR OF EDUCATION, PENAL INSTITUTIONS(educ.) DPT:118
director of correctional treatment and training.
GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls, through supervisors, academic, vocational and trade programs for the training of inmates in penal institutions:
Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of training and education. Visits classrooms and workshops to examine facilities and to observe and advise instructors on methods and techniques. Participates in development of departmental policies and guidelines. Assists in preparation of special courses to aid in rehabilitation process. Institutes and directs, through subordinates, vocational and trade training programs for development of work habits and skills. Evaluates effectiveness of programs through follow-up studies, discussions and instructors' reports, and institutes changes as required. Prepares and administers program budgets. May direct social education and chaplain services in penal institutions. May be employed by either federal or provincial governments and be designated accordingly; for example,
Director of Education, Federal Penal Institutions
Director of Education, Provincial Penal Institutions

1133-166 DIRECTOR, SCHOOL OF NURSING(educ.; medical) DPT:118
director, nursing education.
GED: 5 SVP: 8 EC: 1 PA: S 5 6

Plans, organizes, directs and controls through supervisors and administrators, classroom instruction, clinical experience, counselling, accommodation and recreation for students in school of nursing:
Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of nursing education. Defines or interprets aims and policies of school. Establishes or participates in establishing qualifications for faculty, staff and students, and in recruiting eligible candidates. Plans or

directs planning of curriculum and schedule of instruction. Develops standards of conduct for students and maintains discipline through subordinates. Arranges for students to receive clinical experience in hospitals and other institutions and agencies. Provides a system for maintaining current records of students' educational experience and achievements. Prepares or assists in preparing school budget and administers approved budget. Ensures that students have adequate living accommodation, and social and recreational opportunities. Advises educational groups on entry requirements for school of nursing.

1133-170 DIRECTOR, SCHOOLS FOR THE DEAF OR BLIND(educ.) DPT:118
GED: 5 SVP: 8 EC: 1 PA: S 5 6

Plans, organizes, directs and controls, through subordinate school superintendents, activities of provincial and other institutions to facilitate educational, vocational and social development of the deaf or sightless:
Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of training programs, capabilities and opportunities available to blind and deaf persons. Directs, through school superintendents, activities of personnel engaged in training blind or deaf persons. Consults with representatives of civic groups and community organizations to co-ordinate programs and services for the blind and deaf, and recommends changes in legislation or policy. Represents provincial authorities at conventions, and addresses public gatherings to promote understanding of problems and to familiarize public with activities of institutions for the blind and deaf. Inspects teaching institutions to ensure effectiveness of programs.

1133-199 OTHER ADMINISTRATORS IN TEACHING AND RELATED FIELDS

This group includes administrators in teaching and related fields, not elsewhere classified; for example, those who administer training programs for government officers and staff, such as manpower counsellors, air traffic controllers and meteorological technicians; those who administer programs for the education of the Indian and Eskimo population of Canada; direct education programs for labour unions and professional associations; direct institutes for studies into education; and administer religious education programs in seminaries, theological colleges, divinity schools and similar institutions. Typical examples of occupational titles covered by this residual group definition are:

Chief, Staff Training and Development(educ.; gov. serv.)
Director, Membership Education(educ.)

1134-ADMINISTRATORS IN MEDICINE AND HEALTH

This unit group includes occupations concerned with carrying out managerial and administrative activities, as described under the master title, 01-170 MANAGER (prof. & tech., n.e.c.), in health service areas of hospitals, industries, clinics, government health agencies, and similar establishments; dietetics; volunteer services; and admission and discharge of patients from hospitals. Managers in federal and provincial governments engaged in health policy making are classified in Unit Group 1113, GOVERNMENT ADMINISTRATORS. Health inspectors are classified in Unit Group 1116, INSPECTORS AND REGULATORY OFFICERS, GOVERNMENT. Non-managerial government health officers are classified in Unit Group 1119, OFFICIALS AND ADMINISTRATORS UNIQUE TO GOVERNMENT, N.E.C. Hospital administrators are classified in Unit Group 1130, GENERAL MANAGERS AND OTHER SENIOR OFFICIALS.

1134-110 DIRECTOR OF DIETETICS(prof. & tech., n.e.c.) DPT:118

chief dietitian.

GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls through subordinate dietitians activities of department providing regular and special diets in hospitals and similar institutions:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.). Directs purchasing, recipe development, menu planning, food preparation and service, safety practices, sanitation standards and personnel utilization. Co-ordinates operation of catering and other food service units. Advises senior management on matters pertaining to dietetics.

1134-114 DIRECTOR, OCCUPATIONAL HEALTH(medical) DPT:118

GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls through subordinate supervisors regional nursing services in industrial or commercial establishments employing registered nurses:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.). Consults with management, medical director and legal counsel to plan desired scope and objectives of nursing service in employee-health program. Plans and arranges for staff in-service education, staff participation in professional organizations, and attendance at workshops, seminars and advanced education courses. Provides for health counselling and health education on individual or group basis. Advises personnel in the selection, improvement and maintenance of physical facilities, equipment and supplies. Integrates nursing activities into the safety, industrial hygiene, sanitation and other health and welfare services within the company.

1134-118 DIRECTOR, NURSING SERVICES(medical) DPT:118

assistant administrator, nursing.

GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls, through subordinate supervisors total nursing program in hospitals, nursing homes or extended-care facilities:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.). Recommends new and revised policies, and standards of performance for nursing department. Appoints professional and auxiliary nursing staff. Provides nursing advice to organizations which offer volunteer services for the sick.

1134-122 DIRECTOR, PUBLIC-HEALTH NURSING(medical) DPT:118

GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls, through subordinate supervisory personnel, public-health nursing program to meet needs of a community:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of environmental health conditions, social welfare problems and availability of community services. Develops and promotes health programs to prevent disease and disability of individuals, families and entire community. Provides visiting-home-nursing care for non-hospitalized sick and disabled persons. Co-ordinates services of nursing team to ensure continuity of patient care. Organizes and directs activities of clinics engaged in immunizations, maternal and child-care, and other health services. Advises university and community-college schools of nursing, and other educational institutions, in regard to the preparation of public-health nurses to meet current and foreseeable community health needs. Initiates and participates in research on nursing and other services.

1134-126 DIRECTOR, THERAPEUTIC SERVICES, PSYCHIATRIC HOSPITAL(medical) DPT:118

administrator, therapeutic services.

GED: 5 SVP: 7 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls, through subordinate supervisors, administration of vocational, social, recreational and other remedial programs in psychiatric hospital:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.). Evaluates effectiveness of programs designed to assess vocational aptitudes to apply specific therapeutic techniques aimed at improving patient's mental health and employability. Consults with heads of vocational, occupational therapy, social service, psychological and recreational departments in developing effective treatment programs. Confers with interested agencies concerning vocational, social and recreational activities suitable for patients. Determines hours of work for patients and ensures that remuneration is commensurate with performance. Arranges sufficient free time for required activities of patients.

1134-130 DIRECTOR, VOLUNTEER SERVICES(medical) DPT:118

GED: 5 SVP: 7 EC: 1 PA: L 5 6 7

Plans, organizes, directs and controls, through subordinate supervisors activities of volunteer workers to provide supplemental services to hospital and patients:

Provides for securement of volunteer workers. Organizes classes of instruction, and orientation programs for volunteers to teach proper procedures and techniques and hospital regulations and acquaint them with working arrangements. Discusses with hospital administrative personnel, how and where volunteer workers can work to provide the best service for hospital and patients. Directs assignment of workers, usually to area of their choice; such as, admitting department, library, clinics, pharmacy, occupational therapy, coffee and gift shops. Directs maintenance of adequate stock of food supplies and commodities to operate canteens and gift shops efficiently. Ensures that carts, taken by volunteers to various areas of hospital with commodities for patients, are checked for cleanliness, arrangement, assortment and display.

1134-134 DIRECTOR, ADMITTING DEPARTMENT(medical) DPT:137

director, admissions.

GED: 4 SVP: 7 EC: 1 PA: L 4 5

Plans, organizes, directs and controls, through subordinate supervisors activities of hospital department responsible for admitting and discharging patients:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of availability of hospital-bed space, nature of illness and admittance specifications. Directs training of staff in procedures to be followed in admitting and discharging patients, hospital routine, interpretation of hospital and medical insurance, and related duties; and administers day-to-day operations.

1134-199 OTHER ADMINISTRATORS IN MEDICINE AND HEALTH

This group includes administrators in medicine and health, not elsewhere classified; for example, those who plan, organize, direct and control, through subordinate supervisors, activities of workers engaged in operating first-aid centres, Red Cross clinics and similar establishments. Typical examples of occupational titles covered by this residual group definition are:

Clinic Director(medical)

Director, First-Aid(medical)

1135-FINANCIAL MANAGEMENT OCCUPATIONS

This unit group includes occupations concerned with carrying out managerial and administrative activities, as described under the master title, 01-170 MANAGER (prof. & tech., n.e.c.), in banks, credit agencies, investment companies, or similar financial institutions; and in departments within industrial, commercial, government or other organizations concerned with financial management. Activities include: advising officials on credit and investment policies, and negotiating with financial or other institutions on matters affecting the general policy of the organization.

1135-110 COMPTROLLER(prof. & tech., n.e.c.) DPT:118
controller; treasurer.
GED: 5 SVP: 9 EC: 1 PA: S 5 6

Plans, organizes, directs and controls through subordinate managers or supervisors, financial affairs of industrial, commercial institutional, or governmental organizations:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of accounting, and financial management. Directs, through subordinates, activities, such as preparing advisory reports to management on financial analysis of operations; summarizing establishment's financial position in areas of income, expenses and earnings; preparing budgets and financial forecasts; calculating depreciation on capital items within permissible limits; evaluating requirement for funds and investment of surplus; and developing policies and procedures for account collection. Advises management on implications resulting from changes in taxation. Inspects records and conducts audits to evaluate efficiency of related department.

1135-114 MANAGER, BANK(bank. & finance) DPT:118
GED: 5 SVP: 9 EC: 1 PA: S 5 6

Plans, organizes, directs and controls, through subordinate managers or supervisors, banking activities in head office department, regional territory or branch of chartered bank:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of banking activities:

Ensures established operating policies and procedures are carried out in respect to: accepting of deposits from the public, making of loans for business, agriculture and consumer requirements, selling of securities, dealing in foreign exchange, providing of safekeeping facilities and receiving and paying out of cash. Advises bank clients regarding investment and other monetary affairs and sound business practices. Approves grants or declines loans to bank customers within limits laid down by Head Office. Studies organization, operation and financial background of local industries to be in a position to assess any future requests for lines of credit. Develops and recommends plans for new forms of lending activity or program expansion. Investigates and settles customer complaints regarding service, and participates in various community activities to promote services offered by bank.

May be concerned with a specific area of bank management and be designated accordingly; for example,
Branch Manager, Bank
Investment Department Manager
Regional Manager, Bank

1135-118 MANAGER, TRUST COMPANY(bank. & finance) DPT:118
GED: 5 SVP: 9 EC: 1 PA: S 5 6

Plans, organizes, directs and controls through subordinate managers or supervisors, the trust and related activities of a head office department, regional territory or branch of trust company:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of trust business and related principals of accounting and law. Directs administration of trusts, settlement of estates, and other company activities, such as management of real and personal property, lending of money on mortgages, accepting of funds for deposit, operating of investment funds, transferring of shares, disbursement of dividends and bond interest, and sale and valuation of real estate and businesses. Directs business development personnel in seeking out clients and selling company services.

May be concerned with a specific area of activity and be designated accordingly; for example,
Branch Manager, Trust Company
Investments Manager, Trust Company
Manager, Personal Trust

1135-122 CREDIT MANAGER(prof. & tech., n.e.c.) DPT:118
manager, credit and collection department.
GED: 5 SVP: 8 EC: 1 PA: S 4 5 6

Plans, organizes and controls, through subordinated managers or supervisors, activities of credit department of an industrial, commercial or similar establishment:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge in the fields of accounting and financial management. Directs activities of credit department, such as investigation of financial standing and reputation of credit applicants, establishment of credit limitations, approval or rejection of credit applications, provision of customer information service, account-adjustment, maintenance of credit records, and collection of overdue or delinquent accounts. Co-operates with advertising department to promote use of credit by the public.

1135-126 MANAGER, CREDIT UNION(bank. & finance) DPT:118
GED: 5 SVP: 8 EC: 1 PA: S 5 6

Plans, organizes, directs and controls, through subordinates at a supervising level or above, branch or regional operations of a credit union:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge in accounting, bookkeeping and operation of credit-union. Directs banking and loan activities of credit union through subordinate officials. Confers with board of directors to clarify or implement policy decision. Maintains custody of records, registers and securities. Prepares monthly and year-end financial statements and presents and explains these at membership meetings. Explains credit-union policy, and loan and other documents to credit-union members or prospective members.

1135-199 OTHER FINANCIAL MANAGEMENT OCCUPATIONS

This group includes financial managers, not elsewhere classified; for example, those who plan, organize, direct and control, through subordinates at a supervisory level or above, the departmental, divisional or regional activities of organizations such as mutual fund or syndicated-investment companies and benevolent societies. Typical examples of occupational titles covered by this residual group definition are:

Investment Manager, Mutual Fund(bank. & finance)
Manager, Underwriting Department(insur. & real estate)

1136-PERSONNEL AND INDUSTRIAL RELATIONS MANAGEMENT OCCUPATIONS

This unit group includes occupations concerned with carrying out managerial and administrative activities, as described under the master title, 01-170 MANAGER (prof. & tech., n.e.c.) in the fields of personnel and industrial relations. Activities include: participating in establishing employee-relations policies; directing the selection, training and evaluation of employees; administering employee benefit, safety and recreation programs; developing wage and salary schedules; co-ordinating collective bargaining activities or other negotiations, and advising in the administration of labour agreements. Occupations in this unit group are engaged in managerial and administrative activities primarily related to Unit Group 1174, PERSONNEL AND RELATED OFFICERS. Public relations officers are classified in Unit Group 1179, OCCUPATIONS RELATED TO MANAGEMENT AND ADMINISTRATION. N.E.C. Public relations managers are classified in Unit Group 1137, SALES AND ADVERTISING MANAGEMENT OCCUPATIONS.

1136-110 INDUSTRIAL-RELATIONS MANAGER(prof. & tech., n.e.c.) DPT:118
GED: 5 SVP: 8 EC: 1 PA: S 5 6

Plans, organizes, directs and controls through subordinate managers or supervisors employee-employer relations activities of an industrial, commercial, or other organization:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of labour-management relations. Implements, co-ordinates and participates in establishing policies and procedures concerning job classification, wage and salary administration, working conditions, labour relations and other industrial relations matters. Confers with workers' representatives to settle labour-relations problems. Participates in collective bargaining negotiations or advises company representatives. Maintains effective working relationships with union representatives, and federal and provincial officials. Advises and assists other departmental managers on interpretation and administration of labour agreements and policies.

May co-ordinate personnel-administration activities; such as, recruitment, testing, selection, placement, promotion and training. May represent establishment before industrial arbitration courts or labour tribunals. May manage a particular field of industrial-relations work and be designated accordingly; for example, Employee-Relations Manager
Manager, Wage and Salary-Administration

1136-114 PERSONNEL MANAGER(prof. & tech., n.e.c.)

DPT:118

GED: 5 SVP: 8 EC: 1 PA: S 5 6

Plans, organizes, directs and controls through subordinate managers or supervisors personnel activities of an industrial, commercial or other organization:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of personnel administration. Implements and co-ordinates recruitment, testing, selection, placement, training, promotion, transfer and employee development programs. Advises and assists other departmental managers on interpretation and administration of personnel policies and programs. Administers employee benefits programs; such as, health, recreation, safety, leave, insurance, and other personnel services. Participates in new employee orientation and induction activities and conducts interviews.

May co-ordinate and participate in industrial-relations activities; such as, collective bargaining negotiations, employee relations and wage and salary administration. May manage a particular area of personnel work and be designated accordingly; for example,

Employment Manager
Personnel-Services Manager
Personnel-Training and Development Manager

1137-SALES AND ADVERTISING MANAGEMENT OCCUPATIONS

This unit group includes occupations in managerial and administrative work, as described under the master title, 01-170 MANAGER (prof. & tech., n.e.c.), concerned with sales, advertising and public relations activities in industrial, commercial, advertising or other establishments. Managers in this unit group direct the activities of advertising, sales and public relations departments of large organizations or manage advertising agencies belonging to a chain of such establishments. General managers of chains of department stores are classified in Unit Group 1130, GENERAL MANAGERS. Working proprietors and managing supervisors of stores and service establishments and supervisors of departments in stores are classified in Major Group 51, SALES OCCUPATIONS and Major Group 61, SERVICE OCCUPATIONS.

1137-110 MANAGER, ADVERTISING(prof. & tech., n.e.c.)

DPT:118

director, advertising.

GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls, through subordinate managers or supervisors, activities of department, agency or branch engaged in advertising and promoting products and services of companies or other organizations:

Confers with senior management and heads of departments to determine advertising needs and budgetary requirements. Directs research activities concerning information and statistics relative to the planning and execution of advertising and sales promotion programs,

including market potential, competitors' activities, and general economic conditions and forecasts. Confers with senior management of all advertising media; such as, billboards, radio, television and magazines, and approves contracts for type of advertising decided upon. Reviews and approves program before release. Confers with manufacturing personnel to co-ordinate production of new products or packaging with advertising or promotional programs. Authorizes release of information and determines when programs will start and end. Receives and evaluates reports concerning the overall effect of the advertising programs. Directs advertising and promotional activities through subordinate supervisory personnel.

May manage promotional activities, other than sales, such as those concerning services organizations, people and environmental conditions and be designated accordingly,
Manager Promotions

1137-114 DIRECTOR, PUBLIC RELATIONS(prof. & tech.,

n.e.c.)

DPT:118

GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls, through subordinate managers or supervisors, activities of department of non-governmental organization or agency that evaluates public attitudes, identifies the policies and procedures of an individual or organization with the public interest, and that executes programs designed to earn public understanding and acceptance:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.). Directs and co-ordinates efforts to develop a public-relations policy for entire organization for approval of chief executive. Administers approved policy and program throughout organization, and informs, guides, assists or directs all concerned with carrying out activities. Directs preparation, release and distribution of publicity conforming with established policies. Develops and maintains effective relations with press, broadcast and other mass-communications media. Oversees arrangements for interviews between executives and representatives of the media. Reviews and approves public statements and speeches, broadcast scripts and articles, films and pictures prepared for organization conforming with established policies and suggests necessary changes. Reviews and approves, from public relations standpoint, all company advertising and sales promotion programs. Confers with associates in industrial relations concerning issuance of printed information to employees on the organization and all its activities, and on matters of general interest. Advises on selection of outside public relations counsel as needed and supervises and appraises performance of such counsel. Recommends trade, professional and service organizations in which the organization should participate, and proposes the name of best qualified employees to represent organization in these outside activities.

May serve as corporate contact with organizations soliciting advertising or financial support of charitable or civic undertakings. May supervise editing, publication and distribution of employee newspaper or magazine.

1137-118 MANAGER, SALES(prof. & tech., n.e.c.) DPT:118

director, sales.

GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls, through subordinate managers or supervisors, sales activities for industrial or commercial organizations or for chains of retail and wholesale businesses:

Directs various activities of sales department, through managerial or supervisory staff, reporting to senior management respecting all phases of sales. Co-ordinates sales distribution function by approving establishment of sales territories, quotas, and objectives. Confirms assignment of sales territories to salesmen. Evaluates dealer-sales reports and approves dealer-assistance programs, such as training and sales promotion programs. Reviews market analyses to determine customer needs, potential volume, price schedules, discount rates and competitive operations, and develops sales campaigns to meet company goals. Contacts volume purchasers personally to influence sales.

May, in co-operation with other senior management, recommend and approve budget expenditures and appropriations for research and development work. May negotiate with advertising agencies concerning the preparation of sales advertising, and approve material before publication. May specialize in managing a particular sales function depending on the nature and size of the organization and be designated accordingly; for example,
Manager, Agency Marketing Department

Manager, Bulk Plant(oil & nat. gas)
Manger, Circulation(print. & pub.)
Manager, Distribution
Manager, Export Sales
Manager, Marketing
Superintendent of Agencies

1137-199 OTHER SALES AND ADVERTISING-MANAGEMENT OCCUPATIONS

This group includes other sales and advertising managers, not elsewhere classified; for example those who perform a combined sales advertising or public relations function. A typical example of an occupational title covered by this residual group definition is:
Sales and Advertising Manager(any ind.)

1141-PURCHASING MANAGEMENT OCCUPATIONS

This unit group includes occupations concerned with carrying out managerial and administrative activities, as described under the master title, 01-170 MANAGER (prof. & tech., n.e.c.), in the field of purchasing materials, products or services in government, industry, business and other agencies. Non-managerial purchasing officers, who buy material for internal use in an organization or institutions, are classified in Unit Group 1175, PURCHASING OFFICERS AND BUYERS, EXCEPT WHOLESALE AND RETAIL TRADE. Non-managerial buyers who purchase commodities for resale are classified in Unit Group 5191, BUYERS, WHOLESALE AND RETAIL TRADE.

1141-110 MANAGER, MERCHANDISE PURCHASING(ret. trade; whole. trade) DPT:118
GED: 5 SVP: 7 EC: I PA: S 5 6

Plans, organizes, directs and controls, through subordinate managers and supervisors, purchase of commodities for resale in retail or wholesale establishments:
Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of purchasing operations. Analyzes reports of sales and market research to determine mark-up and mark-down percentages necessary to ensure profit, based on estimated budget, profit goals and average rate of stock turnover. Determines amount of merchandise to be stocked, and directs buyers in purchasing supplies of commodities for resale. Keeps sales and warehousing departments informed of current merchandising activities.
May be designated according to commodity purchased for resale; for example,
Manager, Clothing Purchasing
Manager, Electronic-Components Purchasing
Manager, Food Purchasing
Manager, Hardware Purchasing

1141-114 MANAGER, PURCHASING(prof. & tech., n.e.c.) DPT:118
purchasing manager, materiel and services.
GED: 5 SVP: 7 EC: I PA: S 5 6

Plans, organizes, directs and controls, through subordinate managers and supervisors, purchasing and distribution of raw materials, equipment, services and supplies, for processing or internal use, in industrial, commercial or government establishments:
Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of raw materials and commodity purchasing procedures. Analyzes market and delivery conditions to determine current and future availability of material, and prepares market-analysis reports. Directs purchasing of materiel at lowest cost, consistent with quality standards and delivery requirements. Reviews and approves contracts, purchase orders and invoices. Negotiates with suppliers to resolve problems on prices, deliveries or specifications. Arranges for disposal of surplus material.
May be designated according to commodity purchased; for example,
Manager, Building Supplies Purchasing
Manager, Office Equipment Purchasing

1142-SERVICES MANAGEMENT OCCUPATIONS

This unit group includes occupations concerned with carrying out managerial and administrative activities, as described under the master title, 01-170 MANAGER (prof. & tech., n.e.c.), in organizations which provide private protective services, lodging and other accommodation, food and beverage, apparel and furnishing, building and cleaning and other services. Occupations in this unit group are engaged in managerial and administrative activities related to Major Group 61, SERVICE OCCUPATIONS. Managers of entire chains of service establishments are classified in Unit Group 1130, GENERAL MANAGERS AND OTHER SENIOR OFFICIALS. Working proprietors and salaried supervisors of organizations which provide the above-mentioned services are classified in Major Group 61, SERVICE OCCUPATIONS. Fire marshals and police commissioners are classified in Unit Group 1113, GOVERNMENT ADMINISTRATORS.

1142-110 HOTEL MANAGER(cater. & lodg.) DPT:118
GED: 5 SVP: 7 EC: I PA: S 5 6 7

Plans, organizes, directs and controls, through subordinate managerial and supervisory personnel, one of a chain of large departmentalized hotels:
Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of hotel operation. Directs and co-ordinates services and activities necessary for successful operation of hotel; such as, lodging, food, beverage, personnel, sales and accounting, publicity, and banquet and convention facilities. Institutes and implements policies on matters; such as, personnel practices, credit allowances, room and other rates, departmental jurisdiction, and type of service offered. Develops programs for guests; such as, music and entertainment, tours, and sports and recreation. Negotiates provision of space and facilities in hotel for services; such as, shop concessions, conventions, banquets, and social gatherings. Oversees purchase of equipment and supplies. Analyzes cost, sales and other data to determine hotel's financial situation. Studies trends in hotel management, and institutes measures to improve service and efficiency of hotel. Takes part in community affairs and confers with business and civic leaders to promote business.
May specialize in managing a specific type of hotel, such as commercial, residential, or resort hotel.

1142-114 MANAGER, FOOD AND BEVERAGE(cater. & lodg.) DPT:118
maitre d'hotel.
GED: 5 SVP: 7 EC: I PA: S 5 6 7

Plans, organizes, directs and controls, through supervisory personnel, operations of food and beverage facilities of large hotels or restaurants to ensure efficient and profitable service:
Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of food and beverage services. Negotiates arrangements with clients for use of facilities. Plans and directs dining room, bar, and banquet operation and establishes food policies and type of service to be offered. Directs departments engaged in preparing and serving food and beverages. Analyzes operating costs and other data; such as, procurement, preparation, and sale of food and beverages, to ascertain distribution of costs amongst various departments. Determines payroll and operating costs, and establishes food and beverage prices to ensure profitable operation. Analyzes market conditions for supplies, and investigates acceptance of substitute food products to control food costs. Resolves complaints concerning food and service. Studies trends in food and beverage services, by visiting other establishments, and attending conventions and meetings of trade associations.

1142-118 DISTRICT MANAGER, PRIVATE INVESTIGATION AND SECURITY SERVICE(bus. serv.) DPT:118
GED: 4 SVP: 8 EC: B PA: S 5 6 7

Plans, organizes, directs and controls, through subordinate managers and supervisors, regional operations of country-wide organization, providing commercial and private investigating and protective services:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), utilizing specialized knowledge of principles and techniques related to private investigative and protective work. Negotiates contracts to provide services, on a fee basis; such as, conducting private investigations, tracing missing persons, investigating irregularities relating to fire, and intrusions, maintaining order at public gatherings, and protecting private property against theft and malicious damage. Monitors activities of branch offices, and provides information and assistance required to meet objectives. Prepares reports for record and control purposes. Maintains effective working relationship with clients, law-enforcement and other related agencies.

1142-122 AREA MANAGER, LAUNDRY AND DRY CLEANING (laund., clean. & press.) DPT:118
GED: 4 SVP: 7 EC: 1 PA: S 5 6

Plans, organizes, directs and controls, through subordinate managers and supervisors, area operations of dry cleaning and laundry branches:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of laundry and dry cleaning services. Directs operation of laundry and dry cleaning branches in assigned area in accordance with established policies, and procedures. Reviews financial statements and takes action where indicated to ensure efficient and profitable operations. Plans and directs program to stimulate business, using sales aids and advertising facilities. Investigates possibilities for additional laundry and dry cleaning outlets.

1142-126 BRANCH MANAGER, JANITORIAL SERVICES (misc. serv.) DPT:118
GED: 4 SVP: 7 EC: 1 PA: S 5 6

Plans, organizes, directs and controls through supervisory personnel activities of local branch of firm providing janitorial building-cleaning services:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of janitorial services for industrial, commercial and residential buildings. Directs sales staff and assists in negotiating contracts for janitorial services. Directs operations of unit through subordinate supervisors to provide building cleaning services according to contract provisions. Investigates current developments in cleaning techniques, machines and materials and selects those appropriate to modern janitorial services. Resolves customers' complaints. Conducts studies to improve efficiency and cost of janitorial services. Prepares reports and returns for record and control purposes.

May manage railway rolling stock or other vehicle and aircraft cleaning service and be designated accordingly.

1142-199 OTHER SERVICES MANAGEMENT OCCUPATIONS

This group includes services managers, not elsewhere classified; for example, those who manage operations of large health studios, or travel agency branches. Typical examples of occupational titles covered by this residual group definition are:

Area Manager, Travel Agencies(pers. serv., n.e.c.)
Manager, Health Studio(amuse. & rec.)

1143-PRODUCTION MANAGEMENT OCCUPATIONS

This unit group includes occupations concerned with carrying out managerial and administrative activities, as described under the master title, 01-170 MANAGER (prof. & tech., n.e.c.), such as directing and co-ordinating production departments, divisions or other organizational units, through subordinate managers and supervisors, in an industrial, commercial, governmental or other organization.

1143-110 MANAGER, FOOD AND BEVERAGE PRODUCTION (prof. & tech., n.e.c.) DPT:118
food production manager.
GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls, through subordinate managers or foremen, activities of one or more production or processing departments of organizations producing food, beverages or other products intended for human or animal consumption:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of management and production techniques in organizations where edible products are cleaned, treated or processed and packaged for distribution to consumers. Contracts for crops or produce, or notifies purchasing department or field-men of produce requirements. Directs change-over of equipment and processing methods, according to crop season or product demand. Examines incoming produce and other raw materials or ingredients for quality, or reviews results of physical and chemical analyses. Determines processes to be used, in conjunction with research personnel, or modifies existing formulas as a result of tests. Reviews and correlates results of quality control analyses, and prepares and submits production reports. Studies new equipment and processing techniques and makes recommendations regarding equipment requirements or replacements.

May co-ordinate activities of several subsidiary food processing plants or mills. May manufacture a particular food product or be concerned with a specific production process, and be designated accordingly; for example,

Brewmaster (distill., brew. & ferment)
Cannery Manager (can. & preserv., n.e.c.)
Manager, Fish Plant (fish process.)
Manager, Pickling Plant (can. & preserv., n.e.c.)
Mill Manager (feed & flour mill)
Wine Maker (distill., brew. & ferment.)

1143-114 MANAGER, INDUSTRIAL AND MANUFACTURING PRODUCTION (prof. & tech., n.e.c.) DPT:118
production manager.
GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls, through subordinate managers or foremen, activities of one or more production departments of an organization producing industrial or manufactured products:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of management and industrial production techniques. Assesses production requirements in relation to plant capacity and performance, manpower availability, materials supply and financial limitations. Formulates program, through subordinates, making time and cost estimates and determining materials and tooling schedules. Establishes routine maintenance procedures for plant equipment and assesses machine efficiency to make projections of output capability. Studies equipment developments and improved manufacturing techniques, and makes recommendations regarding replacement of machines and rectification of plant-maintenance problems. Devices inspection programs to control quality, and develops production reporting procedures.

May assist engineering and design departments to develop changes to improve product quality and reliability, or that adapt product to permit manufacturer to utilize existing facilities or techniques. May manufacture a particular product or be concerned with a specific process or aspect of production and be designated accordingly; for example,

Manager, Car Production(rail. rolling stock)
Manager, Foundry(iron & steel)
Manager Production, Automobile Soft-Trim(motor vehicle)
Quality Control Manager
Tool Department Manager(mach., weld. & forg.)
Works Manager(struct., plate & ornam. metal)

1143-118 MANAGER, RAW-MATERIALS PRODUCTION(prof. & tech., n.e.c.) DPT:118
production manager, raw materials.
GED: 5 SVP: 8 EC: B PA: S 5 6 7

Plans, organizes, directs and controls, through subordinate managers or supervisors, activities at one or more mining, quarrying, drilling or logging sites, or other operations of organization for the extraction or

acquisition of raw materials used by manufacturing or processing industries:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.) applying specialized knowledge of production management and techniques. Confers with owners or other management groups to plan objectives or production quotas. Studies operational site, determines availability of manpower and equipment, plans operations, and directs adjustments to work schedules and procedures. Ensures that applicable safety regulations are enforced.

May direct activities concerned with pre-processing of raw materials, such as separating, crushing or concentrating mineral ores for shipment. May direct building activities, such as construction of access roads. May be designated according to activity managed or material extracted, for example,

Manager, Peat Bog(mining & quarrying)

Production Manager, Coal Mining(mining & quarrying)

Production Manager, Logging(forest. & log.)

Production Manager, Oil and Gas Fields(oil & nat. gas)

1145-MANAGEMENT OCCUPATIONS, CONSTRUCTION OPERATIONS

This unit group includes occupations concerned with carrying out managerial and administrative activities, as described under the master title, 01-170 MANAGER (prof. & tech., n.e.c.), in organizations which are engaged in construction, major alteration, maintenance of repair of structures, facilities and systems; such as, dwellings, business places, factories, highways, railways, dams, bridge, airports, and docks. Activities include: preparing specifications and estimates of costs, placing orders for materials, hiring or contracting for the employment of men and machines; overseeing projects to ensure that specifications are met, time schedules maintained, and safety regulations observed; and reporting and consulting on construction activities. Occupations in this group are engaged in managerial and administrative activities primarily related to Major Group 87, CONSTRUCTION TRADES OCCUPATIONS. Owners of small construction-contracting organizations who also perform duties similar to workers supervised; such as paving, pipefitting, electrical construction and roofing are classified in the supervisory unit groups of Major Group 87, CONSTRUCTION TRADES OCCUPATIONS. General managers of large construction-contracting organizations are classified in Unit Group 1130, GENERAL MANAGERS AND OTHER SENIOR OFFICIALS.

1145-110 CONSTRUCTION MANAGER(construction)

DPT:118

GED: 5 SVP: 8 EC: B PA: S 5 6 7

Plans, organizes, directs and controls, through subordinate managers and supervisors, activities of department concerned with preparing estimates for, and constructing buildings, highways, railways, bridges, canals, oil and gas lines, airports and other construction projects:

Performs duties as described under the master title, 01-170 MANAGER (prof. & tech., n.e.c.), using specialized knowledge of the financial, administrative, technical and other managerial aspects applicable to construction projects. Estimates cost of construction from working drawings and specifications and submits tender. Arranges with banks or other parties to provide financial assistance. Completes contract documents on successful tenders, to define contract conditions, such as work to be performed, materials required, financial considerations, and time limitations. Directs purchase of material for construction. Subcontracts for construction activities; such as, excavating, cement work, steel erection, plumbing and wiring. Prepares and implements timetable to schedule operations, using inspection reports, charts, and computer. Co-ordinates and controls construction operations through subordinate supervisors to accomplish construction project according to terms of contract.

May be designated according to particular construction work in which engaged, for example,

Engineering-Construction Manager

Excavations Manager

Highway-Construction Manager

Industrial-Building Construction Manager

1145-114 CONSTRUCTION

SUPERINTENDENT(construction)

DPT:118

site superintendent.

GED: 5 SVP: 8 EC: B PA: L 5 6 7

Plans, organizes, directs and controls, through subcontractors and foremen, construction of buildings, highways, railways, bridges, canals, oil and gas lines, airports and other construction projects, under general direction of contractor or construction manager:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of construction management matters; such as, contracts, building codes and standards, construction materials and operations, and building trade methods. Studies plans and specifications and time schedule, and visits work site to determine nature and extent of construction project. Plans and institutes procedures to monitor construction progress in relation to planned time schedule, through inspections, progress reports, charts or computers. Consults with owners, architect, material suppliers, subcontractors, and work force to discuss or convey information and instructions relevant to project. Directs supervisory personnel and subcontractors engaged in planning and executing work procedures, interpreting specifications, and co-ordinating various phases of construction to prevent delays. Meets with supervisory personnel and labour representatives to resolve complaints and grievances and promote good relations with work force. Directs inspection activities, or personally inspects construction work to ensure that workmanship and materials comply with specifications and federal, provincial or municipal regulations. Monitors safety program for project to provide adequate precautions against injury to personnel or damage to property. Prepares, or receives from subordinates, progress, financial and other reports for record and control purposes.

May be concerned with major maintenance or reconditioning projects. May be designated according to type of project managed; for example,

Building-Construction Superintendent

Engineering-Construction Superintendent

Superintendent, Bridge Construction

Superintendent, Pipe-Line Construction

Superintendent, Railway Construction and Maintenance

1147-MANAGEMENT OCCUPATIONS, TRANSPORT AND COMMUNICATIONS OPERATIONS

This unit group includes occupations in managerial and administrative work, as described under the master title, 01-170 MANAGER (prof. & tech., n.e.c.), concerned with transporting people or goods or transmitting and receiving communications. Transport activities in this unit group include managing the movement of persons or materials by air, highway, railway, water and pipeline and the management of airports, harbours, and railway and busline terminals. Communications activities in this unit group include managing the transmitting and receiving of information through telephone, telegraph and broadcast systems. Occupations in this unit group are engaged in managerial and administrative activities primarily related to Major Group 91, TRANSPORT EQUIPMENT OPERATING OCCUPATIONS; Minor Group 953, STATIONARY ENGINE AND UTILITIES EQUIPMENT OPERATING AND RELATED OCCUPATIONS; and Minor Group 955, ELECTRONIC AND RELATED COMMUNICATIONS EQUIPMENT OPERATING OCCUPATIONS, N.E.C.

Transport Management Occupations

1147-110 through 1147-142

1147-110 MANAGER, AIRLINE(air trans.)

DPT:118

airline superintendent, division.

GED: 5 SVP: 8 EC: I PA: S 5 6

Plans, organizes, directs and controls, through subordinate managers and supervisors, operations of airline company within geographic division, to ensure efficient handling of freight and passenger traffic and utilization of personnel and equipment:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of airline

operations. Reviews and analyzes reports of aircraft movements, operating costs, and passenger and freight loads, and directs or recommends changes to increase revenue and efficiency or reduce costs. Reviews company operations to ensure conformance to governmental regulations. Interprets labour-management agreements to resolve or prevent labour-relations problems.

1147-114 MANAGER, MOTOR TRANSPORT(motor trans.) DPT:118
GED: 5 SVP: 8 EC: 1 PA: S 5 6

Plans, organizes, directs and controls, through subordinate managers and supervisors, operations of motor freight or busline company within geographic division, to ensure efficient handling of freight and passenger traffic and utilization of personnel and equipment: Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of motor freight or busline operations. Reviews and analyzes reports on rates, tariffs, schedules, routes, expenses and revenues, and directs or recommends revisions to increase revenue and efficiency and to lower costs. Reviews union contracts, and employment and governmental regulations, to ensure conformance to regulations and to recommend changes as required. Co-ordinates accident investigations, reviews reports of complaints and traffic delays, and orders corrective action. Co-ordinates repair and maintenance of equipment and facilities, and recommends new capital investments as required. Directs ticket sales, janitorial work and public relations activities in company-operated bus terminals within assigned territory. May specialize in the transportation of either passengers or freight and be designated accordingly, Manager, Bus Company Manager, Freight Company

1147-118 MANAGER, RAILWAY(rail trans.) DPT:118
area manager; general agent; railway superintendent, division.
GED: 5 SVP: 8 EC: 1 PA: S 5 6

Plans, organizes, directs and controls, through subordinate managers and supervisors, operations of railway company within geographic division, to ensure efficient handling of freight and passenger traffic and utilization of personnel and equipment: Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of railway-transport-system operations. Reviews and analyzes reports of train movements, emergency changes in schedules, accidents and weather conditions, and directs or recommends changes or corrective action. Ensures trains within assigned territory operate safely and according to established rules and regulations. Co-ordinates repair and maintenance of equipment and facilities including track, bridges, buildings and rolling stock and recommends new capital investments as required. Directs maintenance of records concerning train movements. Co-ordinates through subordinates parcel post, passenger and freight sales units and other operations of train terminals within jurisdiction. Interprets labour-management agreements to resolve or prevent labour-relations problems. May specialize in the transportation of either freight or passengers and be designated accordingly; for example, Freight Manager, Railway Passenger Manager, Railway

1147-122 MANAGER, URBAN TRANSIT SYSTEM(motor trans.) DPT:118
superintendent of transportation.
GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls, through supervisors, operations of urban transit system: Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of urban transit operations involving any combination of bus, streetcar, subway or other urban train services. Recommends and implements revisions in schedules, change of routes, and driver allocation to improve service and increase revenue. Co-ordinates production of new or revised schedules. Directs dispatching functions and inspection of vehicle operations. Issues procedure manuals, technical guides and bulletins, to instruct personnel and to improve driving, dispatching and loading and unloading of vehicles. Participates in training programs such as driver-training and safety. Directs collection of cash from fare boxes,

and associated bookkeeping activities. Reviews logs, and time cards, and discusses problem areas with drivers. Schedules operators and vehicles for charter or sightseeing runs. Co-operates with personnel and equipment managers regarding hiring of employees, and vehicle maintenance activities. Maintains liaison with police department on traffic problems and with city officials concerning sanding and snow removal operations.

1147-126 MANAGER, WATER TRANSPORT(water trans.) DPT:118
GED: 5 SVP: 8 EC: 1 PA: S 5 6

Plans, organizes, directs and controls, through subordinate managers and supervisors, operations of water-transportation company within geographic division, to ensure efficient handling of freight and passenger traffic and utilization of personnel and equipment: Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of water-transportation-system operations. Co-ordinates repair and maintenance of water-transport equipment and facilities, and recommends new capital investments as required. Reviews reports of customer complaints, and orders corrective action. Interprets labour-management agreements to resolve or prevent labour-relations problems.

1147-130 AIRPORT MANAGER(air trans.) DPT:118
GED: 5 SVP: 7 EC: 1 PA: S 5 6

Plans, organizes, directs and controls, through subordinate managers or supervisors, airport operations, in accordance with governmental regulations and policies laid down by senior management: Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of flight, maintenance, security, fire prevention, rental and other airport operations and regulations. Reviews fire prevention, security, maintenance and other procedures to ascertain adequacy of provisions, and recommends improvements for safety and protection. Recommends landing and rental rates for tenants, prospective tenants, airlines and concessionaires and submits proposals to higher authority for approval. Resolves problems with airport tenants. Co-ordinates custodial and maintenance services, and inspects airport equipment, building and grounds. Orders repair or replacement of defective or outmoded equipment used in upkeep of airport facilities. Reviews and analyzes reports and submits proposals to senior management recommending changes to improve efficiency, decrease costs or increase revenues. Investigates and supervises removal of damaged aircraft on airport.

1147-134 HARBOUR MASTER(water trans.) DPT:118
GED: 5 SVP: 7 EC: B PA: L 5 6

Plans, organizes, directs and controls, through subordinate managers and supervisors, harbour operations, in accordance with governmental regulations and policies laid down by senior management: Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of guiding and berthing of ships and operations of port authority. Assigns berth, dock and shed space for incoming ships. Enforces orders, rules and regulations, concerning use and control of navigable waters, tidelands and submerged lands within harbour. Co-ordinates acquisition and maintenance of watercraft and erection of facilities as authorized by higher authority. Analyzes reports of harbour operations to plan and develop future operations, considering factors, such as economic conditions, tariff changes and commodity movements.

1147-138 MANAGER, PIPELINES(trans., n.e.c.; utilities, n.e.c.) DPT:118
GED: 5 SVP: 7 EC: 1 PA: S 5 6

Plans, organizes, directs and controls, through supervisors, activities concerned with operation and maintenance of oil or natural-gas pipelines and compressor stations within assigned geographic region: Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of the operation and maintenance of oil and gas pipelines, compressor stations and related equipment. Analyzes forecasts of consumer demands and submits proposals for new construction to senior management. Maintains liaison with federal, provincial and municipal agencies

concerning construction projects. Plans and directs safety-training programs.

May manage series of compressor stations, or distribution of gas within city or town, and be designated accordingly; for example, Compressor-Stations Manager (trans., n.e.c.)

Distribution Manager, Gas (utilities, n.e.c.)

1147-142 MANAGER, TRANSPORT DEPARTMENT(any ind.) **DPT:118**
manager, traffic.
GED: 5 SVP: 7 EC: I PA: S 5 6

Plans, organizes, directs and controls, through supervisors, activities of department concerned with transport of products, materials or employees in most efficient and economical manner:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of company transportation requirements. Analyzes transportation facilities and commodity classifications of various companies to determine most efficient and economical shipping rates and routes. Formulates plans and procedures for transporting raw materials to production areas and finished products to customers, warehouses and storage locations. Negotiates with carriers for transport and warehousing of products and materials, and with insurance company representatives, concerning insurance rates. Provides administrative direction in transport and accommodation of employees travelling on company business, in relocation of company staff, their families and household effects, and in setting up and providing supplies to branch offices.

May direct company-owned truck fleet. May confer with customs brokers, or government officials on export documentation requirements. May specialize in managing department arranging employee travel and relocation and be designated accordingly, Manager, Travel and Relocation Department

Communications Management Occupations

1147-162 through 1147-174

1147-162 DISTRICT MANAGER, TELEPHONE COMPANY(telecom.) **DPT:118**
GED: 5 SVP: 8 EC: I PA: S 5 6

Plans, organizes, directs and controls, through supervisors and technical staff, operations of telephone company within assigned district:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of telephone company operations. Confers with senior management in formulating policy concerning development, operation and maintenance of district telephone services. Consults and negotiates with representatives of connecting companies or districts to resolve problems of joint concern. Reviews and analyzes proposals for improvement of, or additions to facilities, and accepts or rejects, or recommends acceptance or rejection, on basis of improved efficiency and cost. Directs and controls, through supervisors, general traffic parameters, such as statistics to predict traffic volume and forecast growth; commercial responsibilities, such as service contracts, billing, marketing and handling complaints; and engineering functions to select, operate and maintain equipment and facilities in an efficient manner.

May be assigned responsibility of a unit or department of the telephone company and be designated accordingly, Traffic Manager, Telephone System

1147-166 MANAGER, RADIO STATION(broadcast., motion pic. & stage) **DPT:118**
GED: 5 SVP: 8 EC: I PA: S 5 6

Plans, organizes, directs and controls, through supervisors and technical staff, activities of one of a series of affiliated radio broadcast stations:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of radio-broadcast-station operations. Confers with senior management to define matters such as station policy and administrative procedures. Consults with governmental-regulatory agencies concerning radio-broadcast regulations, implementation of directives, and operation of radio-broadcast transmitters. Directs, through supervisors, administrative functions, such as cost and payroll accounting; and engineering activities, such as maintenance of studio equipment and

radio broadcast transmitters. Consults with organizations such as service clubs, civic agencies and religious groups concerning radio broadcasts of community-oriented activities.

1147-170 MANAGER, TELEVISION STATION(broadcast., motion pic. & stage) **DPT:118**
GED: 5 SVP: 8 EC: I PA: S 5 6

Plans, organizes, directs and controls, through supervisors and technical staff, activities of one of a series of affiliated television stations:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of television-broadcast-station operations. Confers with senior management to establish company and administrative procedures. Consults with governmental-regulatory agencies and reviews department programs to ensure conformance to regulations. Co-ordinates activities of each department within station, and ensures compatibility with national network.

1147-174 REGIONAL MANAGER, TELECOMMUNICATIONS SYSTEM(telecom.) **DPT:118**
district manager, telecommunications system.
GED: 5 SVP: 8 EC: I PA: S 5 6

Plans, organizes, directs and controls, through subordinate supervisors and technical staff, operations of telecommunications system within assigned region or district:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of telecommunications-systems operations. Confers with senior management in formulating policy concerning development, operation and maintenance of regional or district telecommunications services. Interprets company policies and implements company procedures and practices through subordinate management to ensure efficient telecommunications-system operations in area of responsibility. Analyzes and assesses adequacy and suitability of telecommunications installation, operations and maintenance programs, and develops and implements improvements to the system within scope of responsibility. Reviews and analyzes recommendations for improvement of, or addition to telecommunication facilities, and accepts or rejects, or recommends acceptance or rejection, on basis of efficiency and cost. Directs and controls, receiving and transmitting of messages; installation, maintenance, additions and removal of plant supply and services; and selection of adequate and suitable equipment and facilities. Consults with governmental-regulatory agencies concerning adherence to telecommunications regulations and implementation of directives.

May be assigned responsibility for a specific unit, department or function within the district or region and be designated accordingly; for example,

Commercial Manager, Telecommunications System
Engineering Manager, Telecommunications System
Plant Manager, Telecommunications System
Traffic Manager, Telecommunications System

1149-OTHER MANAGERS AND ADMINISTRATORS, N.E.C.

This unit group includes occupations, not elsewhere classified, concerned with carrying out managerial and administrative activities, as described under the master title, 01-170 MANAGER (prof. & tech., n.e.c.), in organizations; such as, publishing houses, newspaper firms, zoos, professional associations, real estate firms, public utilities, and warehouse complexes. Occupations concerned with managing administrative, or methods and procedures services of an establishment are also classified in this unit group.

1149-110 MANAGER, NEWSPAPER(print. & pub.) DPT:018
managing editor.
GED: 5 SVP: 9 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls, through subordinate managers or supervisors, operations of one of a series of affiliated newspapers: Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.). Confers with owner or representative to establish editorial policy, make-up plans and determine news coverage of special events. Appoints editorial and department heads, and directs their work in accordance with newspaper policy. Relays information to department heads and directs development of publication as a whole, with particular attention to front page. Originates plans for special features or projects, and assigns department heads to implement them. Writes policy editorials or advises subordinates of position to be taken on specific public issues. Represents publication at professional and community functions. May perform duties of one or more subordinate editors, as well as direct activities of advertising, circulation or production personnel.

1149-114 MANAGER, SCIENTIFIC, TECHNICAL AND OTHER PERIODICAL PUBLICATIONS(print. & pub.) DPT:118
GED: 5 SVP: 9 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls, through subordinate managers and supervisors, activities of department of publication or other company engaged in preparation, editing and production of scientific, technical and other periodical publications: Performs duties described under master title, 01-170 MANAGER (prof. & tech., n.e.c.). Analyzes industrial, technological and other relevant developments and problems to determine suitable subject matter for publication as hand books, manuals, pamphlets, magazines or articles. Engages writers or assigns staff, specializes in fields; such as, commerce, chemistry, electronics and business administration to prepare proposed authoritative material. Reviews or directs subordinates engaged in reviewing final drafts of manuscripts preparatory to printing, to ascertain that most effective treatment of subject matter has been made, utilizing knowledge of business, industrial, scientific, technical or other specialized subject matter. May co-ordinate and direct staff engaged in research programs and publish research findings and results. May direct distribution of publications to available markets and promote sale of advertising space in publication. May represent publication at meetings and make speeches on newsworthy topics at public gatherings.

1149-118 DIRECTOR, ZOO(prof. & tech., n.e.c.) DPT:118
director, zoological park.
GED: 5 SVP: 8 EC: B PA: S 5 6 7

Plans, organizes, directs and controls, through subordinate managers or supervisors, operation of zoological park under general direction of municipal or other administration: Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), using specialized knowledge of the care and display of living animals. Directs planning of layout and facilities of zoological park, using knowledge of animals and their habitats. Directs plan for systematic breeding or acquisition of specimen animals for zoo. Selects and purchases or sells and trades surplus animals born in captivity. Co-ordinates activities of employees, such as animal keepers, to provide animals with suitable conditions of cleanliness, proper diet and veterinary care. Provides facilities and conducts research into the habits of animals in zoo. Administers plans to attract extensive public patronage of zoo facilities. Attends meetings of international and national zoological societies to exchange knowledge. Negotiates with professional hunters to capture wild animals from native habitat. May participate in field expeditions to collect specimen animals for zoo.

1149-126 MANAGER, ADMINISTRATION(prof. & tech., n.e.c.) DPT:118
administrative services manager; office manager.
GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls through subordinate managers or supervisors, administrative activities of department, product division, program, regional office or other unit of an industrial, commercial, governmental or other establishment:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of accounting, auditing, supplies procurement, records management and other aspects of business administration. Directs preparation of operating budget for submission to management and maintains control of approved budget, including collection, custody, investment, disbursement and accounting of all funds. Organizes administrative services; such as, typing, bookkeeping, preparation of payrolls, reproduction, filing, data-processing and communications. Maintains efficient flow of work by evaluating office operations and revising procedures accordingly. Confers with other officials to formulate and standardize new or revised policies and procedures. Directs administration of other services for organization; such as, warehousing, parking lots, protective services and maintenance.

1149-130 MANAGER, ASSOCIATION(prof. & tech., n.e.c.) DPT:118
GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls, through subordinate managers or supervisors, activities of professional, business or trade association within assigned region: Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.). Directs through subordinates, research activities, such as the conduct of surveys and compilation of statistics. Prepares or directs preparation of educational materials, such as newsletters, magazine articles and press releases to inform membership or public. Provides information and technical assistance to members, customers of members or public within scope of association. Conducts or participates in news conferences and delivers speeches. Negotiates with leaders of government, business or other interested groups to implement constituted policy and achieve objectives of members. Plans and co-ordinates annual meetings for conduct of business, membership conventions, trade exhibits and local or regional workshops to improve communications and facilitate attainment of objectives. Recommends changes in policy, acceptance or expulsion of members, levying of special assessments and appointments to appropriate committees. Directs maintenance of membership records, processing of applications and collection of dues. May conduct investigations into professional conduct, competence or financial responsibility of members to enforce rules and regulations of association. May be designated according to type of association; for example, Manager, Manufacturers' Association
Manager, Textile Association

1149-134 MANAGER, METHODS AND PROCEDURES(prof. & tech., n.e.c.) DPT:118
GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans, organizes, directs and controls through subordinate managers and supervisors, activities of department concerned with analysis and improvement of organization's methods and procedures: Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying specialized knowledge of standardization, simplification and production measurement techniques to improve administrative efficiency. Directs analyses of current policies, procedures, practices, forms and records; ascertains essentiality of existing activities and recommends changes to simplify or reduce clerical and administrative work and processing time. Directs studies to test makes and models of office machines and equipment, including electronic computers to prepare recommendations for practical application, proper utilization and economical operation of equipment recommended. Meets with management to discuss results of studies and modify or develop new administrative procedures. Directs preparation of manuals covering new or improved office methods, assists with installation of such methods and arranges for training of employees in required techniques. Maintains follow-up program on new methods installations and reviews on a comparative basis effectiveness of new and old systems. Develops and maintains system for standardization of format and consistency of content of manuals, instructions and other publications involving policies, procedures, reports, statements and forms. May prepare training material on, all phases of methods work, for systematic use of employees engaged in this field.

1149-138 MANAGER, PUBLIC UTILITIES(elec. power; utilities, n.e.c.; water works) DPT:118
GED: 5 SVP: 8 EC: 1 PA: L 5 6 7

Plans, organizes, directs, and controls, through subordinate superintendents or foremen, operations of one or more public utilities systems within designated territory:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), applying knowledge of electrical or mechanical engineering and utility systems. Establishes supervisory policy to define authority for independent decisions imperative to continuous service to public and for safety of workers. Investigates, evaluates and determines appropriate application of new developments in industry. Anticipates and forecasts required capacity and economic trends, prepares budget recommendations and makes decisions in keeping with current economic conditions. Co-operates with associates in solving interrelated administrative, organizational and technical problems. Directs, through supervisors, the maintenance of records, and the upkeep of equipment and structures. May be designated according to particular phase of operation or division of activity; for example, Manager, Electric Power(elec. power) Manager, Sewage Disposal(utilities, n.e.c.) Manager, Water Works(water works)

1149-142 MANAGER, REAL ESTATE(insur. & real estate) DPT:118
GED: 5 SVP: 8 EC: B PA: S 5 6 7

Plans, organizes, directs and controls through subordinate managers or supervisors, activities of real estate department concerned with purchase, sale and leasing of facilities or properties for industrial, commercial or institutional organization:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.), utilizing specialized knowledge of real-estate management. Directs staff in preparation of lease agreements and documents concerning appraisal, purchase, rental or sale of real estate. Directs staff in preparation and maintenance of detailed records of company owned or leased properties, options, rights-of-way and special agreements covering land or mineral rights. Negotiates contracts for leasing arenas, auditoriums or stadiums, gymnasiums or other facilities. Oversees preparation of plans for new buildings or renovations of existing buildings, and initiates acquisition of furnishings, office equipment and building supplies. Inspects properties under consideration for acquisition, lease, disposition or improvement, and submits reports with recommendations concerning findings. Authorizes maintenance of company properties; such as, auditoriums, hotels, office buildings and warehouses. Calls for tenders for maintenance or new construction work. Examines and forwards bids to senior management, together with recommendations, for approval. Directs negotiations of contracts with land and building or facility owners, renters and sellers or buyers.

May be designated according to specialized function; for example, Manager, Leasing Manager, Property Rentals

1149-146 MANAGER, WAREHOUSE(storage, n.e.c.) DPT:118
GED: 5 SVP: 7 EC: B PA: L 4 5 6 7

Plans, organizes, directs and controls, through subordinate managers or supervisors, the warehousing activities of commercial, industrial or institutional establishment:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.). Establishes operational procedures for activities, such as the verification of incoming and departing shipments, the handling and disposition of materials, and maintenance of inventory. Inspects physical condition of warehouse and equipment, and arranges for repairs or replacements as required. Confers with department heads to ensure co-ordination of activities within the establishment, such as production, sales, records control and purchasing. Issues, through foremen, work assignments, such as

handling and storage of packaged goods, filling, routing and shipping of customer orders and preparation of reports.

May direct, through supervisors, personnel in sales accounting, inventory control and profit analysis. May demonstrate and sell new kinds of technical and professional equipment, supplies and services. May direct staff to serve customers who call at supply house. May purchase and import materials, supplies and equipment, and direct the reclamation of damaged, unused or used materials. May be designated according to type of warehouse; for example, Manager, Tobacco Warehouse(tobacco)

1149-150 MANAGER, BUILDINGS, VEHICLES AND SUPPLIES(any ind.) DPT:118
GED: 4 SVP: 9 EC: B PA: L 5 6 7

Plans, organizes, directs and controls, through subordinate managers or supervisors, acquisition, construction and maintenance of organization's real properties, vehicles and supplies:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.). Consults with and advises plant, division and district operating heads. Directs research and control work by subordinate staff on methods and results relating to selection, rental, purchase, construction and maintenance of property, according to management policies and procedures. Directs subordinate supervisory staff on the requisition, distribution and use of tools, materials, supplies and all types of company-owned and company-operated vehicles and associated equipment. Reviews estimates of cost of maintenance or repair work and approves orders for purchasing material or parts. Directs overhaul and repair activities to ensure conformity with methods, standards and documentation requirements.

May visit individual locations to review maintenance activities and ensure conformity with standards. May visit or send subordinates to attend manufacturers' courses on maintenance of new equipment, or prepare maintenance instructions for new equipment. May negotiate with insurance adjusters regarding damage claims, and represent company in resolving complaints related to rented properties.

1149-154 DIRECTOR, HORSE RACING(amuse. & rec.) DPT:118
GED: 4 SVP: 6 EC: I PA: S 5 6 7

Plans, organizes, directs and controls, through subordinate managers or supervisors, activities at one of a series of affiliated race tracks:

Performs duties as described under master title, 01-170 MANAGER (prof. & tech., n.e.c.). Appoints racing supervisors and officials; such as placing judge, jockey-club steward, patrol judges, horse identifier and other race track employees. Approves condition books prepared by racing secretary to provide horse racing program for owners. Authorizes allocation of stables and stalls to horses, and formulates rules and regulations pertaining to occupancy of stables. Transmits communications between race track management and owners of horses. Co-ordinates and directs maintenance of race track and construction and maintenance of buildings and directs through subordinates, activities of employees engaged in operating and maintaining track equipment.

1149-199 MISCELLANEOUS MANAGERS AND ADMINISTRATORS

This group includes managers and administrators, not elsewhere classified, for example those who plan, organize, direct and control, through subordinates at a supervisory level or above, the operation of terminal grain elevators, construction, maintenance and operation of irrigation systems, publication of books, and those who perform various managerial activities as management trainees. Typical examples of occupational titles covered by this residual group definition are:

Junior Executive(any ind.)
Manager, Book Publishing(print. & pub.)
Manager, Irrigation District(water works)
Manager Terminal Elevator(feed & flour mill.)

117-OCCUPATIONS RELATED TO MANAGEMENT AND ADMINISTRATION

This minor group includes occupations concerned with activities primarily in support of management, such as: examining, analyzing and interpreting accounting and other financial records and policies; reviewing and analyzing

organizational structures, methods, systems and administrative practices; conducting programs of employee placement, recruitment, selection, training, promotion, welfare, safety, compensation, and recreation; purchasing goods and materials for internal organizational use; and enforcing and advising on standards of performance and adherence to regulations. Includes occupations, such as business agents, public-relations and sales promotion men, contract administrators and specialized management consultants. **OCCUPATIONS RELATED TO MANAGEMENT AND ADMINISTRATION** are classified in the following unit groups:

- 1171 Accountants, Auditors and Other Financial Officers**
- 1173 Organization and Method Analysts**
- 1174 Personnel and Related Officers**
- 1175 Purchasing Officers and Buyers, Except Wholesale and Retail Trade**
- 1176 Inspectors and Regulatory Officers, Non-Government**
- 1179 Occupations Related to Management and Administration, n.e.c.**

1171-ACCOUNTANTS, AUDITORS AND OTHER FINANCIAL OFFICERS

This unit group includes occupations concerned with planning and administering accounting services, advising on accountancy problems and planning and conducting audits of accounts of industrial, governmental, other organizations, and private persons. Includes financial officers concerned with other financial programs, such as mortgage approval, credit analysis, and foreign exchange trading.

Accountants

1171-110 through 1171-138

- 1171-110 SUPERVISOR, ACCOUNTANTS(bank. & finance) DPT:138**
GED: 5 SVP: 9 EC: 1 PA: S 5 6 7

Supervises and co-ordinates activities of accountants and department clerical staff, engaged in planning and administering accounting systems for an organization:
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.), applying specialized knowledge of accounting systems.
May supervise workers engaged in particular accounting activity and be designated accordingly; for example,
Supervisor, Budget Accounting
Supervisor, Cost Accounting

- 1171-114 ACCOUNTANT(prof. & tech., n.e.c.) DPT:158**
GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans and administers accounting systems for organizations and private persons to provide records of assets, liabilities and financial transactions, and advises on accounting problems:
Assists in preparing budgets and advises on financial problems. Maintains accounts or supervises subordinates in such bookkeeping activities as cash disbursements, travel and transport expenses, raw-materials, purchases, wages, taxes, insurance charges, overhead expenses, stock-on-hand, and receipts from sales. Monitors expenditures or credits on contracts in progress or contracted-out programs. Prepares or reviews tax returns and contests claims before tax officials. Conducts financial investigations into such matters as low level of net return on manufactured product, high overhead, suspected fraud, abnormally high inventory, use of working capital and deviation from predicted or budgeted profit. Acts as liquidating trustee in dissolution proceedings and insolvency or bankruptcy cases. Arranges credit for customers and reports repeated delinquent accounts to management.

Prepares and Certifies financial statements for presentation of management, board of directors, stockholders or statutory public bodies.

- 1171-118 ACCOUNTANT, BUDGET(prof. & tech., n.e.c.) DPT:158**

GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans and administers budget-accounting systems for organization, and advises on related accounting problems:
Develops, installs, and maintains budgeting systems which provide control of expenses incurred in such as marketing production, maintenance costs and capital expenditures. Compares estimated and actual costs, revenues, administrative commitments or other obligations, to determine accuracy of current estimates. Analyzes records of current and past operations to determine trends. Advises management, and recommends methods to ensure optimum use of working capital.
May supervise personnel performing routine phase of budget accounting.

- 1171-122 ACCOUNTANT, COST(prof. & tech., n.e.c.) DPT:158**

GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans and administers cost-accounting systems for organizations, and advises on related accounting problems:
Plans, sets up, and directs systems to record accumulated costs of raw material, labour, and factory overhead, and to determine unit cost. Analyzes changes in design, raw materials, manufacturing methods, wages or other factors for effects on production costs. Provides management with reports which furnish basis for decisions concerning selling prices and advisability of adding or deleting items from line of products.

- 1171-126 ACCOUNTANT, MACHINE PROCESSING(prof. & tech., n.e.c.) DPT:158**

GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans and administers machine-processing-accounting systems for organizations and advises on related accounting problems:
Analyzes company accounting objectives and confers with management, and other department heads in planning incorporation of machine processing into accounting system. Develops machine-accounting procedures, applying knowledge of accounting systems and machine processes, or interprets accounting systems for development of machine processes by others. Provides assistance in forms design, coding systems, scheduling and accounting controls. Advises management on negotiations with accounting machine

manufacturers and wire-service companies to develop ideas for improvement of accounting systems and to lower costs. Investigates new machine accounting and computing techniques, such as tying into sophisticated central banks on a time-shared basis and into inter-branch data transmission and retrieval facilities.

1171-130 ACCOUNTANT, PROPERTY(prof. & tech., n.e.c.)
DPT:158
GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans and administers property-accounting systems for organizations and private persons and advises on related accounting problems: Records description, location, value, and other pertinent information of all company-owned or leased equipment, buildings and other property. Conducts periodic inventories to keep records current and to ensure that property is well maintained. Distributes maintenance cost to appropriate accounts. Examines records to determine that acquisition, sale, retirement, and other entries have been made. Prepares statements reflecting monthly appreciated and depreciated values. Summarizes statements on annual basis for income tax purposes. Prepares schedules for amortization of buildings and equipment. Advises on purchase and sale of property and on property accounting system.

1171-134 ACCOUNTANT, TAX(prof. & tech., n.e.c.) DPT:158
GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans and administers tax accounting systems for organizations and private persons, and advises on related accountancy problems: Devises and implements systems to record taxes payable. Prepares and submits briefs to, or represents principals before, various taxing authorities as required by management. Studies new and existing tax legislation to determine probable effects on future operations. Confers with management to evolve policies and procedures to minimize effect of tax increases or extensions and to derive benefit of deductions or relaxations. Advises management regarding tax implications of business programmes, activities and other transactions. Examines accounts and records and computes tax returns according to prescribed rates, laws, and regulations. May specialize in particular aspect of tax accounting; such as, income, estate, real estate, or provincial and federal sales taxes.

1171-138 BRANCH ACCOUNTANT, BANK(bank & finance)
DPT:138
GED: 4 SVP: 7 EC: 1 PA: S 5 6 7

Administers branch bank accounting systems and related operational activities: Plans office work flow and prepares regular reports of bank's accounting activities. Makes periodic reviews of books to ensure accounting procedures conform to established standards, and submits reports to manager. Conducts staff meetings to discuss and prepare recommendations on procedural problems and to implement corrective measures. Ensures high standards are maintained relating to customer service, securities delivery, clearing of funds and bank security. Assists in selection, training and appraisal of bank employees. May grant or approve loans within limits set by bank regulations. May assume responsibility of next senior level of management during absence of incumbent. May be concerned with specific area of responsibility and be designated accordingly; for example, Operations Officer, Administration

Auditors
1171-158 through 1171-162

1171-158 SUPERVISOR, AUDITORS(bank. & finance)
DPT:138
GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Supervises and co-ordinates the activities of auditors and department clerical staff engaged in examining and analyzing accounting records of establishments and preparing reports on their financial status: Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.), using specialized knowledge of auditing methods. May supervise workers engaged in particular auditing activity and be designated accordingly; for example, Supervisor, Internal Auditors Supervisor, Public Auditors

1171-162 AUDITOR(prof. & tech., n.e.c.)
DPT:258
GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Examines and analyzes accounting records of establishment and prepares report on its financial status at a specific date and results of its operating procedures for a specific period: Examines business and financial records and statements, material and equipment inventories, contracts, vouchers, bank statements, cancelled cheques, journals and ledgers, and other documents, to verify accuracy of accounting procedures and compliance with applicable regulations. Analyzes data obtained of deficiencies in control, duplication of effort, extravagance and fraud. Reports to management concerning scope of audit, and financial conditions found. Makes recommendations regarding operational improvements and financial position of company. May certify records and documents. May perform duties on fee basis or be employed by organization and be designated accordingly; for example,

Auditor, Public
Bank Reserves Auditor(bank. & finance)
Internal Auditor

Other Financial Officers
1171-182 through 1171-210

1171-182 SECURITIES COUNSELLOR(bank. & finance)
DPT:018
GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Provides financial counselling services to bank, trust and brokerage company officials and customers regarding purchase and sale of securities:

Analyzes financial background and future trends of stocks and bonds to provide recommendations to bank and trust company officials and customers regarding investments. Negotiates stock and bond transactions in person or through correspondence. Transmits 'buy and sell' orders to trading desk or broker. Computes extensions, commissions and other charges for billing customers and for making payments for securities. Examines stock certificates to verify assignments, guarantees and addresses. Cancels old certificates and issues new ones. Prepares bond price bulletins for use in branches and handles delivery of new issues. Directs activities of workers engaged in performing clerical tasks in connection with securities transactions such as preparing parcels of securities for shipment, posting entries to ledgers and other records, preparing contracts and underwriting accounts. Supervises preparation of periodic reports and returns on security transactions. See also term title 02-090 CONSULTANT (any ind.).

May be known according to type of activity.

1171-184 INVESTMENT ANALYST (bank. & finance)
DPT:288
financial analyst.
GED: 5 SVP: 8 EC: 1 PA: S 7

Conducts statistical analyses of information affecting investment program of public, industrial and financial institutions, such as banks, insurance companies and brokerage and investment houses: Interprets data concerning investments, their price, yield, stability and future trends using daily stock and bond reports, financial periodicals, securities manuals and personal interviews. Constructs charts and graphs regarding investments. Summarizes data, setting forth current and long term trends in investment risks and measurable economic influences pertinent to status of investments. Performs research and makes analyses relative to losses and adverse financial trends and suggests remedial measures. See also definition for term title, 02-090 CONSULTANT (any ind.). May supervise and co-ordinate activities of workers engaged in conducting and processing statistical analyses of information affecting company investment program. May specialize in securities analysis and be designated accordingly, Securities Analyst

1171-186 BURSAR(educ.) DPT:138
GED: 5 SVP: 7 EC: 1 PA: S 7

Receives and disburses funds in college, university or other educational establishment:
Receives tuition fees and other amounts due and directs deposit in appropriate bank accounts obtaining approval of higher authority as required. Disburses amounts owing for goods or services received. Supervises maintenance of books of accounts and prepares financial statements. Reports periodically on financial affairs to board of governors or other governing body.

1171-188 FOREIGN BANKING ARRANGEMENTS DPT:168
OFFICER(bank. & finance)
inter-bank arrangements officer.
GED: 5 SVP: 7 EC: 1 PA: S 5 6

Administers and advises on reciprocal banking arrangements with foreign banks, to facilitate bank's foreign business:
Studies information on economic, monetary and political situation in assigned foreign countries, analyses current financial statements of foreign banks and prepares recommendations to grant or deny credit. Reviews domestic and foreign legislation affecting exchange banking arrangements and develops forms, instructions and procedures for transacting foreign credit business. Handles correspondence and reviews operation of accounts maintained by bank with each correspondent foreign bank, and evaluates extent of business resulting from reciprocal arrangement. Maintains records of foreign business, prepares periodic reports and returns to keep management informed and recommends changes in operations.
May supervise and co-ordinate activities of workers performing clerical tasks associated with foreign banking arrangements. May attend foreign trade conventions and meetings of export-import associations and other groups to promote inter-bank business.

1171-190 TRUST OFFICER(bank. & finance) DPT:168
GED: 5 SVP: 7 EC: 1 PA: S 5 6 7

Administers private, corporate, and probate trusts:
Locates and prepares inventories, and evaluates assets of probated accounts for beneficiaries, banks and courts. Directs realization of assets, liquidation of liabilities, payment of bills, preparation of federal and provincial tax returns, and collection of earnings. Manages business or hires manager until heirs take over. Invests trust funds, administers escrows, and acts as agent in securities trust transactions. Maintains probate files showing payment of bills and taxes.

1171-194 HEAD OFFICE UNDERWRITER(insur. & real estate) DPT:168
GED: 5 SVP: 7 EC: 1 PA: S 7

Reviews applications for insurance, evaluates risks involved and determines premiums, extent of coverage and other conditions to form insurance contract, in accordance with company's underwriting policies:
Reviews previous profit and loss records and fixes company tariff guidelines and regulations for routine insurance business. Determines terms and conditions of contracts, within laid-down policies, using actuarial tables, rate and code books, and other reference materials. Examines such documents as individual's or company application forms, inspection reports, insurance maps, assessment rolls, and medical reports to determine degree of risk, considering factors; such as, applicant's financial standing and reputation, age, occupation, accident experience, and value and condition of real property. Ascertains amount of insurance carried by company, on single or group of closely related risks, and evaluates possibility of large losses due to catastrophe or excessive insurance. Refuses application where risk is excessive for company or reinsures a percentage of risk with one or more other companies to ensure safe and profitable distribution of risks.
May decrease proposal policy value or specify contract endorsement to limit company's obligation when risk is substandard. May be designated according to type of insurance underwritten; for example, Accident-and-Sickness Underwriter
Automobile Underwriter
Bond Underwriter
Fire Underwriter
Liability Underwriter
Marine Underwriter

1171-198 PASSENGER AND FREIGHT RATES DPT:218
ANALYST(prof. & tech., n.e.c.)
GED: 5 SVP: 7 EC: 1 PA: S 5 6 7

Analyzes passenger and freight rate structures and provides advice to management of transportation company:
Reviews current sales forecasts, revenue estimates, revenue budgets, route frequencies and schedules in relation to existing rate structure and rates of other companies. Develops new tables for approval of senior management, based on latest outlook. Files proposed rates with regulatory agencies and testifies at hearings held by regulatory agencies on proposals. Negotiates with other companies regarding changes in rate structure and division of interline revenues. Compiles reports for senior officials. See also definition for term title, 02-090 CONSULTANT (any ind.).

1171-200 STUDENT AWARDS OFFICER(educ.) DPT:218
student loan officer; student scholarship officer
GED: 5 SVP: 7 EC: 1 PA: S 5 6

Administers bursaries, grants, loans and scholarship programs of college or university:
Interviews students applying for loans or grants, and reviews application forms to determine whether students are qualified on basis of need and academic standing. Establishes amount of loans and grants according to regulations, funds available and extent of demand. Obtains promissory note and cosigners, if necessary. Authorities release of funds to student and makes arrangements for repayment. Maintains record of loan fund balance to control amounts loaned. Suggests alternative solutions to financial problems, such as, bursaries, scholarships and part-time employment. Provides information to students on filing applications for scholarship. Reviews scholarship applications and prize award recommendations for completeness. Arranges meetings of faculty committee and prepares agenda. Selects candidates to be considered for scholarships and submits applications and recommendations to committee for decision. Disburses funds awarded by committee. Prepares reports of scholarship activities for university administration, donors and campus bulletin. Explains scholarship program to potential donors and advises on methods of establishing scholarships. Assists committee in establishing academic criteria for scholarships, policies for loans and grants, and planning for budget. Accounts to committee for all funds disbursed.

1171-202 ENGINEERING-DEPRECIATION DPT:188
EVALUATOR(prof. & tech., n.e.c.)
cost engineer, retirements; inventory and cost engineer.
GED: 5 SVP: 7 EC: 1 PA: S 7

Determines retirement values and depreciation rates of company property:
Maintains consolidated records of depreciation, cost, and appraised value of buildings and equipment, using data obtained from appraisal engineering staff. Estimates life expectancy of property, utilizing engineering knowledge and statistics on property durability, such as mortality tables and curves. Computes retirement values from appraisal date and life expectancy estimates. Compiles reports and lists of retired and retirable items and values for various operating purposes, such as for maintenance of continuing property records.

1171-206 FOREIGN EXCHANGE TRADER(bank. & finance) DPT:138
GED: 4 SVP: 7 EC: 1 PA: S 5 6 7

Conducts foreign exchange transactions for bank and bank customers:
Determines prices at which exchange shall be purchased and sold, based on demand, supply and stability of currency. Trades in various currencies with international and other branches by telephone or wire. Issues and checks all outgoing letter-of-credit cables and debits branches concerned. Verifies foreign exchange contracts and customers' liabilities. Examines and approves bills-of-exchange. Processes incoming payment orders received from foreign banks by crediting customers' accounts or transferring currency to other banks or by notifying recipient either by telephone or mail. Verifies outgoing currency shipments. Answers enquiries from customers and guides

branch banks in conduct of foreign exchange business. Records foreign exchange entries on trading sheet. Prepares and presents reports and briefings to management on foreign exchange market conditions, finances and exchange rate trends. Supervises clerical personnel engaged in foreign currency transactions. May be concerned with a particular activity related to foreign exchange and be designated accordingly; for example, Foreign Payment Clerk, Chief Trading Position Adjuster

1171-210 CREDIT OFFICER(bank. & finance) DPT:268
loan analyst.
GED: 4 SVP: 6 EC: 1 PA: S 5 6 7

Examines, evaluates and processes applications for credit or loans and authorizes or recommends their approval:

Analyzes applicant's financial status, references and credit rating to determine feasibility of granting loan request. Corresponds with or interviews applicants or creditors to resolve questions regarding loan application. Approves loans within specified limits or refers loans to manager or loan committee for approval. Analyzes applicant's financial problems and adjusts loan agreement to restore loan to good standing. Prepares reports of delinquent accounts that cannot be collected. Keeps record of arrears of mortgage installment payments and prepares routine letters concerning them. Prepares statement of overdue mortgage and loan accounts arranged according to amounts owing, time overdue, and credit rating of client, and forwards statements to solicitors for legal action to recover bank's equity. Answers inquiries concerning loan balances, taxes and penalties from credit bureaus, finance companies and banks regarding credit experience with customers.

May represent bank in legal proceedings. May solicit new business by sending form letters or brochures to prospective customers and by analyzing potential loan markets to develop prospects for loan. May specialize in reviewing applications for mortgages. May be designated according to type of activity and area or work; for example, Consumer Credit Officer
Mortgage Arrears Collection Officer
Mortgage Officer

1173-ORGANIZATION AND METHODS ANALYSTS

This unit group includes occupations concerned with reviewing, analyzing and improving business and organizational systems to assist management to operate with greater efficiency and effectiveness. Activities include: conducting organizational studies and evaluations, designing systems and procedures for new work processes, conducting work simplification and measurement studies, maintaining a forms and records management program and preparing and maintaining systems and procedures manuals. Industrial engineering occupations are classified in Unit Group 2145, INDUSTRIAL ENGINEERS. Electronic- data-processing systems analysts are classified in Unit Group 2183, SYSTEMS ANALYSTS, COMPUTER PROGRAMMERS AND RELATED OCCUPATIONS.

1173-110 SUPERVISOR, ORGANIZATION AND METHODS ANALYSTS(prof. & tech., n.e.c.) DPT:138
GED: 5 SVP: 8 EC: 1 PA: S 5 6

Supervises and co-ordinates activities of workers engaged in reviewing, analyzing and improving business and organizational systems to assist management to operate with greater effectiveness and economy:

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.)
May supervise workers engaged in particular organization and methods activity and be designated accordingly; for example, Supervisor, Forms Management Analysts
Supervisor, Methods and Procedures Analysts
Supervisor, Record Systems Analysts
Supervisor, Work Study Analysts

1173-114 METHODS AND PROCEDURES ANALYST(prof. & tech., n.e.c.) DPT:268
management analyst; management engineer.
GED: 5 SVP: 7 EC: 1 PA: S 5 6 7

Conducts studies of organizational structures, methods, systems and procedures used in non-industrial departments of government, commercial, industrial or other establishments, assists management to operate with greater efficiency and effectiveness, by performing any combination of the following duties:

Consults with managers, supervisors and other staff and studies data; such as, organization and flow charts, records, reports, manuals and job descriptions. Undertakes or reviews work studies, and observes methods and procedures in action, to determine existing procedures. Records and analyzes data, identifies problems and considers solutions through institution of measures, such as revision of work flow, redefinition of job functions and interrelationships, to eliminate redundancies and delays. Simplifies and standardizes record-keeping systems and assists in implementation of data-processing or other types of equipment. Considers long term benefits and implementation costs of various alternatives and prepares recommendations for improvements.

May assist management in implementing approved recommendations by preparing or revising instructions and procedural manuals and instructing staff in new work methods.

1173-118 FORMS ANALYST-AND-DESIGNER(prof. & tech., n.e.c.) DPT:264
forms management analyst.
GED: 4 SVP: 6 EC: 1 PA: L 4 5 6 7

Analyzes requirements, designs and develops business or other forms for use in government, commercial, or industrial establishments:

Discusses purpose of new forms with management and reviews systems or procedures in which forms are to be used. Analyses form requirements, determines data to be entered on form, best arrangement of data and considers possible combination and standardization of existing forms. Determines design specifications; such as, sequence of data arrangement of spaces, size, kind and colours of paper; and size and style of printing of type to be used. sketches of proposed forms on graph paper or design sheets, using drawing instruments, and submits design for approval. Prepares detailed specifications for manufacture of approved forms.

May prepare written instructions on use of form. May prepare special charts to show the role of the form in various stages of the system. May specialize in a particular forms management activity and be designated accordingly; for example,

Forms Analyst
Forms Designer

1173-122 ORGANIZATIONAL ANALYST(prof. & tech., n.e.c.) DPT:268
GED: 5 SVP: 7 EC: 1 PA: L 5 6 7

Conducts studies of departments and other units of establishment to identify organizational problems, and develops and recommends solutions:

Establishes problem areas and terms of reference through discussions with senior officials. Studies organizational objectives, delegation and exercise of authority, interrelationship of positions, organizational regulations, instructions and reports, formal and informal lines of communication and control, and allocation of planning and development responsibilities. Prepares or examines organizational charts and other data, and interviews staff to validate data while conducting analysis. Identifies sources of and makes recommendations to resolve organizational problems, by redefining boundaries and relationships for authority and accountability. Identifies procedural and other matters that may require detailed methods and systems analysis. Determines responsibility areas for reporting, control and appraisal and suggests channels of co-ordination and communication. May develop instructional and implementation material from studies to assist in staff retraining and orderly implementation of recommendations.

1173-126 RECORD-SYSTEMS ANALYST(prof. & tech., n.e.c.) DPT:268
file-systems analyst; records management specialist.
 GED: 4 SVP: 6 EC: 1 PA: L 5 6

Analyzes requirements and designs or revises filing systems and records:

Reviews and analyzes current record systems to assess efficiency and effectiveness, or consults with management to determine needs for new or revised systems. Studies new, mechanized, or automated equipment, to assess and evaluate their potential in meeting management requirements. Identifies internal and external records retention requirements. Schedules removal and destruction of inactive records. Determines more economical storage methods, and devises procedures to protect vital legal and financial records or facilitate records retrieval. Develops most effective methods of preparing reports and determining lowest cost by reducing numbers to practical minimum. Prepares proposals for new systems, or writes reports incorporating recommendations for changes to existing systems, and disposal of inactive records.

May write procedural instructions for use of records-keeping personnel. May conduct training courses and advise staff during implementation programs.

1173-130 WORK-STUDY ANALYST(prof. & tech., n.e.c.) DPT:268
 GED: 4 SVP: 6 EC: 1 PA: L 5 6 7

Analyzes existing and proposed ways of doing work, develops easier and more effective work methods, and establishes worker performance standards:

Determines, records and analyzes existing and proposed ways of doing work by reviewing production records, job descriptions, procedural and office machinery specifications, manuals and similar data. Interviews staff and charts work-methods and procedures. Prepares recommendations for new or improved work flow, work station layouts and employer work methods. Divides work activities of recommended method into work motion elements and records time required by various qualified workers to complete each work element, using stop watch or other measuring techniques. Applies time requirement data to establish performance standards for qualified workers. Determines staffing requirements by relating calculated average individual performance to workload. Prepares report detailing recommended method, and production quotas. Provides guidance in implementation of control and reporting systems to ensure accuracy of information.

1174-PERSONNEL AND RELATED OFFICERS

This unit group includes occupations concerned with carrying out policies, as directed by management, primarily related to personnel administration and industrial relations. Activities include: representing management or labour in collective bargaining procedures; participating in programs of recruitment, selection, placement, training, welfare, safety, compensation, promotion, and separation of employees; preparing job analyses to provide occupational data; advising university or college students on types of financial aid available; providing a placement service to client-establishments and job seekers; and interviewing and counselling job seekers to determine their suitability for employment, vocational training, rehabilitation programs, and related manpower services. Managerial occupations in the fields of personnel and industrial relations in private industry are classified in Unit Group 1136, PERSONNEL AND INDUSTRIAL RELATIONS MANAGEMENT OCCUPATIONS. Managers and administrators of government manpower services are classified in Unit Group 1113, GOVERNMENT ADMINISTRATORS. Educational and vocational counselors in schools, colleges and universities are classified in Unit Group 2391, EDUCATIONAL AND VOCATIONAL COUNSELLORS. Occupations related to personnel research and administration of counselling programs which require a background in psychology, are classified in Unit Group 2315, PSYCHOLOGISTS.

1174-110 LABOUR-RELATIONS SPECIALIST(prof. & tech., n.e.c.) DPT:118
 GED: 5 SVP: 8 EC: 1 PA: S 5 6

Acts as consultant on labour-management relations, representing either management or labour union:

Studies and interprets collective-bargaining agreements and current labour-market conditions to assist in establishing policies and operating procedures. Represents management or union in contract negotiations, and conciliation and arbitration procedures. Reviews contract administration to ensure that management and labour organizations adhere to contract specifications. Confers with department heads, labour representatives and workers to resolve grievances and determine disciplinary actions. Prepares summary and statistical reports of employee grievances and settlements. Participates in informational programs and preparation of employee handbooks and manuals to effect co-operation and co-ordination in union-management relations. See also definition for term title, 02- 090 CONSULTANT (any ind.).

1174-114 EMPLOYMENT SUPERVISOR(prof. & tech., n.e.c.) DPT:138

GED: 5 SVP: 8 EC: 1 PA: S 5 6

Supervises and co-ordinates activities of workers engaged in recruiting, interviewing, employing and inducting new employees:

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.). Forecasts personnel requirements in conjunction with departmental heads or other supervisory representatives. Develops recruiting techniques, and implements programs to attract qualified personnel. Assesses results of recruitment programs and employment practices. Directs preparation of employee induction and training programs, and reviews employee development. Reviews transfers, promotions and discharges, disputes and grievances.

May conduct exit interview to determine reason for employee's leaving.

1174-118 PERSONNEL OFFICER(prof. & tech., n.e.c.) DPT:108

personnel administrator.

GED: 5 SVP: 7 EC: 1 PA: S 5 6

Provides personnel administrative services for commercial, industrial, governmental or other organization, performing any combination of the following duties:

Confers with management representatives and department supervisors to determine personnel requirements, and carries out analyses as required to obtain detailed information about job specifications. Prepares job descriptions for positions in organization, and advertises vacancies. Interviews and tests applicants, selects most suitable candidates and settles terms of employment, or submits proposals to management. Interviews new employees to advise them on pay and other conditions of employment, such as hours of work, leave and attendance and promotional opportunities. Provides advice, guidance and information to supervisors and employees on interpretation, application and implementation of personnel policies, procedures and regulations, concerning matters, such as employee performance, discipline, welfare and health, and training courses. Counsels employees to assist in solving personal problems or difficulties associated with work. Plans and organizes training of employees by identifying kinds of training required, evaluating and selecting suitable training methods, and conducting courses, or recommending courses available from outside agencies. Resolves staff problems in areas such as employee performance, absenteeism and grievances, by interviewing employees and supervisors and recommending or initiating remedial action. Assists in planning and organizing services, such as canteens, first aid facilities and safety programs, pension schemes and other welfare and recreational facilities for employees. Maintains confidential personnel records.

May supervise clerical staff. May specialize in particular area of personnel work, such as training or staff relations, and be designated accordingly; for example,

Staff-Relations Administrator
 Staff-Training Officer

1174-122 OCCUPATIONAL ANALYST(prof. & tech., n.e.c.)
DPT:068
GED: 5 SVP: 7 EC: 1 PA: S 5 6

Analyzes and synthesizes job data to provide occupational information for personnel, administrative, information and other services of private, public or governmental organizations:

Consults with management to determine type, scope and purpose of analysis required. Searches for background information on nature of organization and its activities, and studies relevant data. Initiates job study by touring establishment, obtains or prepares charts showing broad functions of each department, and lists job titles used within establishment. Observes and studies jobs performed, and interviews workers, supervisors and managerial personnel to ascertain nature of work performed, worker characteristics required and other relevant factors. Writes detailed job definitions to describe work performed and other significant data, such as educational requirements, training time, environmental conditions, physical activities, and skills and abilities required for satisfactory job performance. Makes comparative analyses of job descriptions and specifications to determine employment activities that are common to a number of similar jobs. Writes occupational descriptions by combining and synthesizing groups of similar jobs. Prepares, from documentation services, drafts of occupational descriptions for validation by experts in the field of work or for verification through visits, observation and interview, and writes finished manuscript.

May prepare occupational classification systems, career information booklets, interviewing aids for employment officers and manpower counsellors, job evaluation reports and other aids to industrial, governmental and other organizations in activities; such as, personnel administration, manpower research and planning, training, placement, occupational information and vocational guidance. May specialize in a particular activity and be designated accordingly; for example,

Job Analyst
Job Evaluator
Occupational Analyst, Classification System
Occupational Monograph Specialist
Position Classifier
Salary Analyst

1174-126 FINANCIAL-AIDS OFFICER(educ.) DPT:168
GED: 5 SVP: 7 EC: 1 PA: S 5 6

Co-ordinates program of scholarships, grants, loans and student employment in college or university:

Interviews and advises student candidates of various types and amounts of financial aid available. Explains conditions of loans, grants or scholarships, evaluates applications, and notifies successful candidates. Assists eligible students to apply for provincial, federal or other grants, and makes appropriate recommendations. Co-ordinates selection of candidates and disbursement of funds, with admissions and business departments.

May supervise clerical and accounting support staff. May be assisted in selection of candidates and of types and amounts of aid by faculty committee. May advise students of employment opportunities according to information gained from personal contacts, commercial or industrial recruitment programs, and through federal and private employment agencies.

1174-130 MANPOWER COUNSELLOR(gov. serv.) DPT:108
GED: 5 SVP: 6 EC: 1 PA: S 5 6

Counsels clients in a government manpower office:

Provides for clients and employers, advice, guidance and information on such matters as occupational requirements, labour market conditions, vocational training, rehabilitation facilities, career development, employment practices, and labour legislation. Interviews, selects and refers clients seeking employment. Obtains data on employer's manpower requirements through interviews and on-site visits. Determines need for and gives specialized counselling to clients who require it. Administers and interprets test, and arranges for special placement of clients. Selects and prepares clients for vocational training, rehabilitation programs, and other services. Recommends clients for financial assistance within mobility plan, and completes arrangements for family relocation. Develops and maintains good working relationships with educational and vocational training establishments, community welfare agencies, service clubs and employer and employee organizations, through personal visits and public-speaking engagements. Collects, prepares and disseminates labour market information, completes forms and prepares reports.

1174-134 EMPLOYMENT INTERVIEWER(prof. & tech., n.e.c.)
DPT:268
placement officer.
GED: 5 SVP: 6 EC: 1 PA: S 5 6

Interviews applicants to determine their suitability for employment on basis of education, ability, interests and other employment factors:

Records information, such as scholastic achievement, past employment history, and impressions gained from applicant during interview. Evaluates information to determine suitability for employment. Supplies information to applicant regarding nature of job vacancies, company and union policies, duties, responsibilities, working conditions, hours and pay, and promotional opportunities. Prepares rating on applicant, notifies selected applicants of job offers, and makes recommendations for future hirings. Prepares permanent records of interviews with both successful and unsuccessful applicants. Discusses hiring policies with department heads or other supervisory staff to ensure effectiveness of selection techniques or recruitment programs. Observes jobs to obtain first-hand information of job requirements.

May interview job applicants in an employment agency, and refer them to prospective employers for consideration. May travel to interview applicants for positions and exercise hiring authority. May specialize in a particular aspect of employment interviewing and be designated accordingly; for example,

Personnel Recruiter
Student-Placement Officer

1175-PURCHASING OFFICERS AND BUYERS, EXCEPT WHOLESALE AND RETAIL TRADE

This unit group includes occupations concerned with buying goods, materials, or business services, for internal use or for further processing in governmental, industrial, business and other institutions, where the items purchased are not for resale. Activities include: establishing requirements of the organization; developing and interpreting specifications for goods or materials; studying technical publications, documents and advertising material; interviewing suppliers or inviting tenders; conducting special buying missions and negotiating for prices; establishing delivery schedules and performing other functions directly related to purchasing. Purchasing managers are classified in Unit Group 1141, PURCHASING MANAGEMENT OCCUPATIONS. Buyers who buy for resale are classified in Unit Group 5191, BUYERS, WHOLESALE AND RETAIL TRADE.

1175-110 PURCHASING OFFICER, BUSINESS SERVICES
(bus. serv.) DPT:118
buyer, time and space.
GED: 5 SVP: 7 EC: 1 PA: S 5 6 7

Purchases advertising space on billboards, in publications, or time on radio and television stations, and other business services for client:

Reads published data, such as program schedules and audience viewing ratings for radio and television stations, magazines and newspapers, and examines advertising cost quotations, to determine time and space availability and costs. Interviews or contacts representatives of radio and television stations, publishers and outdoor advertising agencies, to negotiate purchase of time and space, consistent with cost and budget limitations. Verifies all space and time contracts of media suppliers. Consults with media sales representatives as to product sales histories and new media opportunities. Records time spent on particular client services, to determine costs to client. Assists media planning committee in selecting appropriate media forms for client's products.

1175-114 PURCHASING OFFICER, FOOD AND RELATED PRODUCTS(whole. trade) DPT:118**buyer, food and related products.**

GED: 5 SVP: 7 EC: B PA: S 5 6 7

Purchases food and related products, such as livestock, fish, grain, fruit, vegetables and milk for internal use, consumption or processing by governmental, industrial or business establishment:

Reviews requisitions of establishments. Studies trade periodicals and other market information, to determine product quantity and quality to be purchased. Contracts with farmers to raise, or purchase products; such as fruits, vegetables, grain, poultry, livestock, milk or maple syrup. Inspects, grades and calculates live and dressed weight of livestock and fish, to determine value and yield. Negotiates with producers for purchase of products consistent with current market prices, and approved establishment standards and budgetary limitations. Arranges delivery of purchases for specified date and destination. Keeps records of purchases.

May suggest methods of feeding, housing and milking cows, and refrigerated-storage of milk, to improve quality and production of milk, and to comply with sanitation requirements. May study data regarding crop growing and suggest methods to improve quality and crop production. May approve and pay accounts for purchases. May be designated according to product purchased; for example,

Purchasing Officer, Fish

Purchasing Officer, Fruit

Purchasing Officer, Livestock

Purchasing Officer, Milk

Purchasing Officer, Vegetables

1175-118 PURCHASING OFFICER, MATERIAL(whole. trade) DPT:118**buyer, material.**

GED: 5 SVP: 7 EC: I PA: S 5 6 7

Purchases machinery, equipment, raw materials, tools, parts, fabrics, accessories, office and other supplies for internal use, consumption or processing by governmental, industrial, business and other establishment:

Reviews requisitions, studies suppliers' catalogues and current market data on varieties, quantities, and prices available, to determine requirements. Interviews vendors' to ascertain their ability to meet establishment's requirements for design, performance, cost, quality, quantity and delivery date. Reviews tenders or proposals from vendors, and negotiates with acceptable bidders for contracts, keeping within budgetary limitations. Discusses product defects with quality control or inspection personnel, to determine source of problems and ensure defects are rectified by supplier, make necessary changes in specifications or change suppliers. Keeps informed on all new sources of supply for important materials. Keeps records of purchases.

May ensure invoices are correct with purchase orders and approve invoices for payment. May be designated according to type of merchandise purchased; for example,

Buyer, Furs(fur goods)

Buyer, Piece Goods(garment)

Buyer, Tobacco(tobacco)

Purchasing Officer, Office Equipment

Purchasing Officer, Ore(iron & steel)

1176-INSPECTORS AND REGULATORY OFFICERS, NON-GOVERNMENT

This unit group includes occupations concerned with enforcing adherence to regulations and advising on standards in organizations or agencies, other than municipal, provincial and federal government, on matters such as safety, quality of service in public transportation, and observance of company policies and procedures in units of chain organizations. Government, and non-government inspectors, testers, graders, and samplers in the field of processing materials, machining, fabricating and assembling goods or products are classified in their appropriate major, minor and unit groups. Inspectors and Regulatory Officers unique to government are classified in Unit Group 1116, INSPECTORS AND REGULATORY OFFICERS, GOVERNMENT.

1176-110 SAFETY INSPECTOR(any ind.) DPT:264**safety-and-sanitary inspector.**

GED: 4 SVP: 7 EC: I 5 6 7 PA: L 2 4 5 6 7

Inspects machinery, equipment and working conditions to ensure conformance to fire, safety and sanitary standards and regulations:

Examines equipment specifications and inspects and tests equipment, such as hoisting devices, machine shields, ladders, scaffolding, materials handling equipment, storage and hot-water tanks, safety devices and clothing to ensure conformance to safety standards and serviceability. Observes workers to ensure protective devices, such as gas or dust masks, and safety glasses or shoes, are being utilized according to regulations and that combustible or hazardous materials are used and stored according to approved procedures. Conducts tests in work areas to detect toxic fumes, explosive gas-air mixtures, or other work hazards, using testing instruments. Examines new and reconditioned equipment to ensure conformance to safety standards. Ensures fire-prevention materials and other safety supplies, such as first-aid kits, stretchers and blankets are kept to predetermined standards. Investigates accidents and unsafe working conditions, studies causes, and recommends remedial action. Assists in conducting safety meetings and campaigns or contests.

May report unsanitary conditions and careless actions of workers to supervisor. May be designated according to type of equipment inspected; for example,

Crane Inspector

Escalator Inspector

1176-114 INSURANCE INSPECTOR, LOSS-PREVENTION (insur. & real estate) DPT:267

GED: 4 SVP: 7 EC: B PA: L 4 5 6 7

Inspects insured properties to evaluate conditions affecting underwriting standards, and develops and promotes safety programs:

Inspects buildings, vehicles and operations of commercial and industrial establishments, to determine physical conditions or unsafe practices. Compiles data affecting premiums by measuring area or frontage or making scale drawings of properties. Prepares reports with recommendations for corrective action. Analyzes claims and accident-history data or inspects scene of accident, to determine causes and effects, and to develop safety program compatible with needs and resources of insured. Conducts meetings to promote safety programs among educational, civic and industrial groups, by informing them of government and company safety standards and regulations, using motion pictures and other visual aids to supplement discussion.

1176-122 SAFETY CO-ORDINATOR(motor trans.) DPT:128

GED: 4 SVP: 6 EC: I PA: L 4 5 6

Co-ordinates safety program and instructs truck and tractor-trailer drivers in matters pertaining to traffic and safety regulations, and care of equipment:

Instructs drivers regarding company rules, penalties for infractions, defensive driving, and safety and conservation measures, using blackboard, photographs and movie projector. Rides with drivers to assess operating ability, and to detect errors in driving vehicle and in handling cargo. Patrols highway to detect violations of company regulations by drivers and to observe condition of vehicles and road. Investigates accidents involving company trucks by observing scene of accident, questioning driver and witnesses and by arranging for inspection of vehicles to determine causes of accidents. Directs

1175-199 OTHER PURCHASING OFFICERS AND BUYERS, EXCEPT WHOLESALE AND RETAIL TRADE

This group includes purchasing officers and buyers, except wholesale and retail trade, not elsewhere classified; for example, those who purchase foodstuffs, beverages, furnishings, equipment, services and supplies for hotels, restaurants, ships and other establishments. Typical examples of occupational titles covered by this residual group definition are:

Procurement Officer(gov. serv.)

Purchasing Officer, Hotel(cater. & lodg.)

Purchasing Officer, Restaurant(cater. & lodg.)

Purchasing Steward(cater. & lodg.)

transfer of cargo from damaged truck to substitute vehicle to insure scheduled delivery. Analyzes own or underwriter's accident reports, confers with department heads concerning, such problems as accident rates and abuse of equipment, and recommends remedial measures.

1176-126 TRAFFIC INSPECTOR(motor trans.; rail trans.)
DPT:163
GED: 4 SVP: 6 EC: O PA: L 4 5 6

Co-ordinates scheduled service, and investigates service disruptions within assigned territory of streetcar or bus- transportation system: Observes vehicles along route to ensure service is provided according to schedule. Investigates delays in maintaining schedules, accidents and complaints, and files written reports. Informs dispatcher of disruptions in service, using radiotelephone. Liaises with dispatcher in rerouting traffic around temporary obstructions, such as accidents, fires or water-main breaks, or to supply additional coaches on temporarily-overloaded routes. Determines need for changes in service, such as additional coaches, or changes in route and revised schedules, to increase operating efficiency and improve service. Drives automobile along route to detect conditions hazardous to equipment and passengers. Assists in dispatching equipment when necessary. Recommends promotions and disciplinary action involving transportation personnel. Inspects vehicles having mechanical trouble along route and calls maintenance personnel to repair or recover vehicle.

May liaise with police or city department of works to eliminate hazards along route.

1176-130 RADIATION-CONTAMINATION MONITOR(prof. & tech., n.e.c.)
DPT:264
radiation monitor.
GED: 3 SVP: 7 EC: I 6 7 PA: L 4 5 6 7

Monitors personnel, plant facilities and work environment to detect radioactive contamination:

Measures intensity and identifies type of radiation in working areas, using beta-gamma survey meters, gamma-back-ground monitors and alpha-beta-gamma counters. Collects air samples to determine airborne concentration of radioactivity, and collects film badges and pocket detection chambers and other monitoring equipment worn by personnel to measure individual exposure to radiation. Informs appropriate authorities when individual exposures and area radiation levels approach maximum permissible limits. Instructs personnel in radiation-safety procedures and demonstrates use of protective clothing and equipment. Monitors time and intensity of exposure of personnel working in radiation-waste-disposal areas. Inspects incoming shipments of radio-active materials for contamination, using radiation counter, and tags shipments in which radiation count exceeds specifications. Records data concerning status of areas being decontaminated, rate of radiation exposure to personnel, and location and intensity of radioactivity in contaminated areas. Tests detection instruments against standards to ensure their accuracy. May recommend decontamination procedures.

1176-134 SERVICE-STATION INSPECTOR(whole. trade)
DPT:258
GED: 4 SVP: 6 EC: B PA: L 5 6

Inspects motor-vehicle service stations in designated area, to ensure conformance to company's operating policies and procedures:

Inspects service station stockrooms, to ensure that only firm's approved products are in stock. Inspects machinery and equipment to ensure serviceability. Examines station's appearance, lighting and rest rooms to ensure specified standards of cleanliness and good house-keeping are met by dealers. Develops plans, and counsels dealers on methods to increase sales and profits. Prepares estimates of capital and maintenance expenditures for company's service stations, and advises management on market and competitive developments in designated territory. Resolves major complaints of service station's customers. May interview and recommend suitable applicants as service station lessees.

1176-138 ACREAGE-QUOTA-ASSIGNMENT OFFICER
(whole. trade)
DPT:268
GED: 4 SVP: 6 EC: I PA: S 5 6

Assigns tobacco acreage quotas to members of tobacco farmer's co-operative to regulate production of tobacco:

Analyzes previous tobacco production figures and acreage quotas, and determines current years production requirements based on estimated demand, based on current market conditions. Calculates percentage of production acreage allotment for each co-operative member. Submits quota allotments and supporting data used for calculations, to tobacco growers marketing board for approval. Notifies members of individual assigned quotas.

May re-calculate quota allotments, if member of co-operative files an appeal. May direct activities of land-measuring team and calculate tobacco acreages from measurement data.

1176-142 DINING-SERVICE INSPECTOR(rail trans.)
DPT:268
GED: 4 SVP: 6 EC: I 5 PA: L 5 6 7

Inspects railroad dining and lounge car facilities, observes service, and investigates complaints to ensure conformance to company's standards and regulations:

Inspects cooking utensils and area to ensure they are clean and sanitary. Inspects food and observes preparation to ensure that food is cooked and served in sanitary and appetizing manner. Observes waiters to ensure that service to patrons is efficient and courteous. Investigates complaints by patrons of poor service or discourteous employees. Inspects liquor cabinets to ensure contents are correct, according to invoices and during crew change-over. Instructs dining and lounge personnel regarding rules, regulations and services. Reports complaints by patrons and action taken to resolve complaints. Recommends improvements to service and operating methods.

May inspect railroad passenger-cars to ensure conformance to cleanliness and passenger comfort standards.

1176-146 INSPECTOR, TRAVEL ACCOMMODATION(cater. & lodg.)
DPT:268
travel-accommodation appraiser.
GED: 4 SVP: 6 EC: I PA: L 5 6

Inspects, examines, analyzes and assesses travel accommodation, operations, and services of individual or chain of motels, hotels, restaurants and campsites to ensure conformance to government or company standards and policies:

Inspects and rates accommodation and services according to type, quality, amounts charged, sanitary conditions and related factors. Investigates complaints of patrons, such as increase in rates, condition of accommodation, and failure of company to comply with standards in buildings and services. Examines structures, surroundings, furnishings and supplies, to determine if repairs or replacements are required, and makes appropriate recommendations.

May classify establishment according to travel accommodation standards used by motor vehicle associations.

1176-150 GAS-CUSTOMER-LIAISON MAN(utilities, n.e.c.)
DPT:357
GED: 4 SVP: 6 EC: I PA: L 5 6

Inspects industrial gas-metering equipment and advises customers regarding company regulations and procedures:

Visits and instructs customers on gas-metering (flow regulating) equipment and functional irregularities that may occur. Persuades customers to observe metering procedures and company requests to curtail gas consumption during periods when available gas supply is limited. Collects and examines charts used in metering devices to detect abnormal gas consumption patterns, and reports results to supervisor.

May calculate customer's monthly gas consumption.

1176-154 AMMUNITION-SAFETY INSPECTOR(explosives)
DPT:387
GED: 4 SVP: 6 EC: B 5 6 PA: L 3 4

Inspects ammunition and component materials, and loading, and magazine areas to detect unsafe conditions and to enforce safety regulations:

Examines cartridges and other metallic items for corrosion or physical defects. Visually examines explosive components for evidence of deterioration. Inspects physical condition of buildings and magazines, to ensure adequacy of safety equipment and precautions. Observes methods of storing and handling ammunition by plant personnel, for compliance with safety regulations. Inspects incoming and outgoing shipments for proper loading, bracing, packaging and marking. Prepares inspection reports.

May measure components, such as bullets, pellets and detonators for conformity to standards, using gauges.

1176-158 INSPECTOR, TRANSPORTATION SERVICES
(any ind.) DPT:288
GED: 3 SVP: 5 EC: 1 PA: S

Observes activities and conduct of transportation company employees to assess quality of service and volume of traffic to improve operations:

Assumes role of passenger and observes employees performing assigned duties, to note their efficiency, deportment, treatment of passengers and adherence to company regulations and schedules. Observes and records time required to load and unload passengers or freight, and volume of traffic at each stop or station, at different hours of day. Reports findings to management with recommendations for improvement of operating services and efficiency.

1176-162 FIRE-SAFETY INSPECTOR(any ind.) DPT:367
GED: 3 SVP: 5 EC: B 6 PA: L 2 3 4 5 6 7

Inspects premises of commercial and industrial establishments, to detect and eliminate fire hazards:

Inspects fire-extinguishing and fire-protection equipment, such as sprinkler systems, fire extinguishers and hose houses of fire apparatus, to ensure operating efficiency and compliance with company and government regulations. Tests sprinkler systems by tripping alarm used to detect fires or excess heat in building. Prepares reports listing repairs and replacements required. Patrols premises and investigates unsafe conditions and practices which may cause or increase fire hazards. Reports findings to appropriate authorities with recommendations for eliminating or counteracting hazards. Demonstrates use of fire-fighting equipment and dispenses fire prevention literature to workers. Keeps current plans of all water system lines and information on availability of adequate supply of water in event of fires.

May train employees in fire-fighting procedures and arrange for specified number of workers for fire duties. May prepare fire reports covering cause of fire, procedure used to control fire, injuries sustained and treatment services provided. May keep inventory and requisition supplies for fire-fighting.

1176-166 INSPECTOR, HUMANE SOCIETY(misc. serv.) DPT:368
GED: 3 SVP: 5 EC: B PA: M 4 5 6

Investigates reported cases of neglect or cruelty to animals for humane society:

Answers enquiries from public and gives information regarding current laws and regulations governing neglect or cruelty to animals. Inspects sites and examines animals, to investigate complaints made against individuals to determine if complaints are justified. Interviews witnesses, records statements and particulars and takes photographs. Arranges for transfer of starving, trapped or injured animals to shelter or area where they will be cared for. Confers with society officials and their legal advisors, to determine if court action is warranted. Arranges for issuance of summons to person being charged. Attends court and gives evidence. Inspects premises, such as pet shops, stables, stockyards and circuses to ensure animals are cared for properly.

1176-199 OTHER INSPECTORS AND REGULATORY OFFICERS, NON-GOVERNMENT

This group includes inspectors and regulatory officers, not elsewhere classified; concerned with enforcing and advising on standards and adherence to regulations in non-government organizations or agencies, on matters such as quality of service and observance of company policies and procedures; for example those concerned with inspecting barbershops and beauty salons belonging to a chain of such establishments for conformance to hygiene and licensing

requirements. Typical examples of occupational titles covered by this residual group definition are:

Compliance Officer (bank. & finance)

Beauty Salon Inspector (pers. serv., n.e.c.)

1179-OCCUPATIONS RELATED TO MANAGEMENT AND ADMINISTRATION, N.E.C.

This unit group includes occupations, not elsewhere classified, concerned with carrying out activities directly related to management and administration in government, industry or other organizations. Includes occupations such as business agents, public relations men, sales promotion men, contract administrators, and specialized management consultants. Publicity writers are classified in Unit Group 3359, OCCUPATIONS IN WRITING, N.E.C. Personnel and industrial relations officers are classified in Unit Group 1174, PERSONNEL AND RELATED OFFICERS.

Business Agents

1179-110 through 1179-118

1179-110 EXECUTIVE SECRETARY, ASSOCIATION(misc. serv.) DPT:168

executive director, association.

GED: 5 SVP: 6 EC: 1 PA: S 5 6

Administers and co-ordinates program as formulated by board of directors and members to promote and implement policies and objectives of association.

Interprets program to members and public. Co-ordinates and directs association functions, such as periodic meetings and the production of association publications. Organizes committees and aids them in attaining objectives and developing policies regarding such matters as legislation affecting the association membership, research designed to effect growth and efficiency, and employment conditions. Supervises clerical staff engaged in preparing corporate records and reports. Prepares publicity releases.

May be designated according to the specific association directed; for example,

Executive Director, Alumni

Executive Director, Nurses' Association

Executive Director, Teachers' Federation

1179-114 BUSINESS AGENT, LABOUR UNION(misc. serv.) DPT:218

union representative.

GED: 4 SVP: 6 EC: 1 PA: S 5 6

Administers business affairs of labour-union on behalf of members:

Draws up proposed terms of collective agreement for approval by union membership. Negotiates with management on matters, such as hours of work, wages, individual grievances and fringe benefits. Interprets and assists in implementing collective agreements. Arranges regular meetings of members, hires hall and engages guest speakers. Drafts new releases and articles for union or other publications. Works in liaison with community, welfare, labour and government organizations on matters affecting union members.

May collect dues and maintain appropriate financial records. May assign union members to job vacancies.

1179-118 AGENT(amuse. & rec.; broadcast., motion pic. & stage) DPT:318

business manager.

GED: 4 SVP: 6 EC: 1 PA: S 5 6

Administers business affairs of entertainers and theatrical companies and negotiates contracts with officials of unions and places of entertainment:

Negotiates with officials of unions, motion picture or television studios, theatrical production, or entertainment houses on behalf of performing artist, troupe or company for contracts and financial returns to be received. Manages business details of tours and

engagements. Advises clients concerning contracts, wardrobe, and effective presentation of act, using knowledge of show business. Obtains reservations for transportation and hotel accommodations. Represents client in public contacts, such as handling fan mail, telephone inquiries, and requests for personal appearance on behalf of charitable organizations.

Promotional Agents 1179-138 through 1179-158

1179-138 CAMPAIGN CONSULTANT(bus. serv.) DPT:118
development officer; fund-raising consultant.
GED: 5 SVP: 7 EC: 1 PA: L 5 6

Assists chief executive of gift-supported institutions, agencies and enterprises in administration of fund-raising campaigns: Gathers and assesses facts and opinions concerning fund-raising potential of client institutions, and analyzes information according to principles of successful fund raising. Prepares workable plan, operating schedule, terms of reference, goals and quotas for volunteer organization, and suggests strategies for reaching goals and quotas to chief executive. Implements approved strategies. Directs workers engaged in development, assignment and canvas control of lists of prospective donors, and directs the preparation of the statement of fund-raising case and of other essential materials used to communicate the statement to campaign workers and prospective donors. Briefs volunteer leaders concerning their responsibilities, and trains volunteer workers in effective face-to-face soliciting techniques. Directs campaign headquarters activities, such as supervision of treasury procedures and setting up of controls for all expenditures. See also definition for term title, 02-080 CONSULTANT (any ind.). May direct fund-raising activities of nation-wide benevolent organization. May co-ordinate fund-raising operation with those of similar organizations, or with sub-units in numerous communities. May approach individuals or community groups for donations.

1179-142 CO-ORDINATOR, TOURISM(amuse. & rec.; gov. serv.) DPT:158
GED: 5 SVP: 7 EC: 1 PA: S 5 6

Co-ordinates and directs public-tourist services and facilities within designated area to promote tourist patronage: Directs the activities of workers engaged in the inspection and evaluation of tourist facilities and services to encourage adherence to accepted standards. Prepares publicity materials to stimulate tourist patronage. Assists private agencies in promoting tours and answers inquiries from prospective visitors relative to attractions of area. Confers or corresponds with proprietors of tourist facilities, government officials, and other interested parties, to suggest changes in facilities, standards and legislation to promote tourist trade. Submits recommendation to governments for the development of natural attractions, such as fishing grounds, park areas and waterways to enhance recreational and tourist potential. Plans and gives training to guides and other personnel engaged in tourist trade. Attends conventions and other functions and delivers speeches to stimulate interest in a particular area. Establishes information centers to inform tourists of area's advantages.

1179-146 PUBLIC-RELATIONS MAN(prof. & tech., n.e.c.) DPT:158
publicity director.
GED: 5 SVP: 7 EC: 1 PA: S 5 6 7

Plans, organizes and carries out a program of information designed to influence the public favourably towards employer's organization, product or services, by performing any combination of the following duties:

Plans, organizes, and co-ordinates public-relations activities, explains requirements, and assigns tasks to own or free-lance publicity writers. Prepares news releases. Obtains photographic or other illustrative material. Appraises and revises material submitted by publicity writers, photographers, illustrators and others. Selects written material, photographs and illustrations, judged most likely to create favourable publicity. Organizes special exhibitions, entertainment, competitions and social functions to promote goodwill and favourable publicity. Represents employer in dealings with press, radio, television and other publicity media, and attends business, social and other functions.

May conduct public-opinion polls to ascertain effectiveness of advertising program. May be designated according to specific area of public relations work, and be designated accordingly; for example, Press Agent
Visits Co-ordinator

1179-150 INDUSTRIAL-DEVELOPMENT REPRESENTATIVE(prof. & tech., n.e.c.) DPT:218
area-development officer; economic-development officer.
GED: 5 SVP: 7 EC: 1 PA: S 5 6

Prepares studies and reports and negotiates with representatives of industrial, commercial and other organizations to stimulate industrial development in area served by own organization:

Prepares reports on available plant sites, showing availability and quality of water resources, mineral deposits, electric power, labour supply, transportation facilities and other requirements. Prepares statistical abstracts, indicating such relationships as trends in tax rates in given communities, and proportion of total work forces having specified skills. Visits headquarters of industrial and business firms contemplating relocation, and attends conventions or similar functions, to stimulate interest in a particular area. Negotiates with community, business and public utility representatives to eliminate obstacles to industrial development and to promote harmonious relations. Co-operates with transportation officials to improve service, rate structure and facilities to enhance attractiveness of area to industrial location.

May communicate with representatives of government, public utilities, universities and other groups to co-ordinate research activities.

1179-154 SALES-PROMOTION ADMINISTRATOR(prof. & tech., n.e.c.) DPT:238
sales-promotion manager.
GED: 5 SVP: 7 EC: 1 PA: S 4 5 6 7

Prepares, administers and analyzes programs to promote sale of products or services, by performing any combination of the following duties:

Reviews publications and confers with knowledgeable persons to obtain information regarding existing market conditions. Analyzes market conditions, sales possibilities, consumer-buying habits, competitive conditions, production costs and product lines to determine promotional approach. Develops sales promotion programs to achieve objectives. Recommends research studies, new or improved products and packaging, pricing and dealer-shared advertising expenditures. Informs other departments of marketing strategies and promotional plans to ensure efficiency and co-ordination. Evaluates promotional and marketing results against budgeted sales, costs, profits and effect on future sales. Maintains and analyzes records of pertinent statistical information. Supervises workers engaged in preparing promotional material, displays and other forms of advertising. Plans and organizes demonstrations to promote product or service. Prepares and administers direct-mail-advertising programs. Visits customers to advise on such matters as floor layout, training programs and incentive objectives.

May be designated according to type of promotional activity; for example,

Account Executive
Direct-Mail Specialist
Media-Advertising Director
Product Promoter(food & bev., n.e.c.)
Promotion Representative Vehicle-Leasing-and Sales(ret. trade)
Spare-Parts-Field Representative(motor vehicle)

1179-158 TECHNICAL-SERVICE CONSULTANT(prof. & tech., n.e.c.) DPT:268
GED: 5 SVP: 7 EC: 1 PA: S 5 6

Provides consultative services to customers of manufacturing establishment by giving technical, marketing and other advice:

Supplies information regarding handling, contents installation and technical uses of product. Confers with department managers concerning problems of packaging, customer specifications, and competitive product information. Assists sales staff in promotional activities. Submits reports on product consumption or services rendered. Investigates consumer complaints at source and attempts to remedy situation, exercising tact and knowledge of product. Surveys

potential markets and new uses of products. See also definition for term title, 02-090 CONSULTANT (any ind.). May direct activities of technicians or field engineers providing technical advice or maintenance service to customers on a contract basis.

Other Administrators and Consultants, n.e.c. 1179-178 through 1179-299

1179-178 CORPORATE SECRETARY(prof. & tech., n.e.c.)

DPT:168

administrative secretary.

GED: 5 SVP: 8 EC: 1 PA: S 5 6

Promulgates policy decisions, maintains official records, prepares corporate reports, takes minutes and answers correspondence for Board of Directors of organization, personally or working through subordinates:

Makes arrangements for, prepares agendas, and gives notice of Board of Directors' and shareholders' meetings. Attends meetings, prepares proxies, minutes and subsequent correspondence, and provides departments with copies of approved policy statements, regulations, instructions and amendments. Affixes corporate seal and attests, signs, or countersigns corporate documents as authorized. Acts as custodian of corporate documents, contracts, leases, and deeds to corporate-owned property, minute, and stock transfer books and all general records other than those kept by the treasurer and controller; and files all corporate reports as prescribed by governmental authorities. Maintains current register of names and addresses of shareholders and attends to corporate correspondence concerning matters of general corporate policy.

1179-182 ADMINISTRATIVE OFFICER(prof. & tech., n.e.c.)

DPT:118

GED: 5 SVP: 7 EC: 1 PA: S 5 6

Administers office services, such as personnel, budget preparation and control, accommodation and facilities, housekeeping, records and special management studies, performing any combination of the following duties:

Studies management methods and analyzes operating practices to improve work flow, simplify administrative procedure and implement cost reductions, and makes recommendations to management. Prepares annual estimates of expenditures, and maintains budgetary and inventory controls. Evaluates requests for or changes in accommodations and approves, proposes alternatives or rejects requests. Locates accommodation, and studies real-estate data to compare rental expenditure with purchase cost. Inspects building and office area to evaluate suitability considering such factors as location, floor area, parking facilities and future expansion. Negotiates lease or purchase. Develops and sketches office layout to reflect management requirements. Consults with architect, contractors and others on a continuing basis to ensure scheduled occupancy. Supervises and co-ordinates activities of workers engaged in clerical and maintenance duties. Interviews job applicants, conducts orientation of new employees and implements training program. Reviews and answers correspondence.

May be designated according to type of administration specialization; for example,

Accommodation Officer

Research Administrator. University(educ.)

1179-186 CORPORATE PLANNER(prof. & tech., n.e.c.)

DPT:168

GED: 5 SVP: 7 EC: 1 PA: S 4 5 6

Advises corporate management in the preparation, co-ordination, review and revision of short-term and long-range planning, working in conjunction with managers, supervisors and subordinate staff:

Defines corporate goals and objectives. Plans and develops programs to ensure rates of growth and profitability. Prepares studies and conducts continuing reviews to assess corporate performance, and advises management regarding results of studies. Reviews proposals for major capital expenditures to ensure conformity with corporate plans, and determines economic justification of proposals. Plans and directs or undertakes special studies requested by senior- management officials regarding new or improved products or processes. Seeks out,

investigates and evaluates outside opportunities including licences, patents, joint ventures and possible mergers.

May be designated according to specific assignment or function; for example,

Adviser, Development Planning

Co-ordinator, Profit Planning

1179-190 CONTRACTS ADMINISTRATOR(prof. & tech., n.e.c.)

DPT:218

GED: 5 SVP: 7 EC: 1 PA: S 5 6

Negotiates and administers contracts for the purchase or sale of equipment, materials, products or services and evaluates contractor's claims for additional contractual compensation, by performing any combination of the following duties:

Examines estimates of materials, equipment and production costs, performance requirements and delivery schedules for completeness and accuracy. Prepares bids, process specifications, test and progress reports and other documentary evidence that may be required. Reviews bids from other firms for conformance to contract requirements and determines acceptable bids. Negotiates contract with customer or bidder. Requests or approves amendments to or extensions of contracts. Co-ordinates work of contractors or activities of sales department with production and shipping departments to ensure that contract obligations are fulfilled. Formulates and co-ordinates procurement policies and procedures. Evaluates contractor's claims for additional contractual compensation and negotiates settlements. Confers with engineering or production staff to resolve contractor's differences regarding terms of contract when notice of intent to claim is received. Determines validity of claim and prepares report stating cause, organization's responsibility, and recommended remedial action to prevent recurrence. Negotiates with contractor to effect acceptance of claim settlement and initiate payment procedure. Confers with legal counsel on claims requiring litigation.

May be designated according to the specific phase of contract administration; for example,

Contract-Claims Examiner

Contract Negotiator

1179-194 STATIONS-RELATIONS ADMINISTRATOR

(broadcast., motion pic. & stage)

DPT:118

GED: 5 SVP: 6 EC: 1 PA: S 5 6

Co-ordinates and controls broadcasting-program schedules between network and affiliated independently-owned radio and television stations:

Determines and controls schedules of network programs for affiliated stations. Notifies the network of time changes to broadcasting schedules. Advises station personnel regarding operating procedures to disseminate programs to all parts of network. Ensures that broadcasting policies are enforced throughout the network and informs affiliated stations of policy changes. Negotiates network fees with affiliated stations. Acts as liaison officer between various stations and other networks. Assists in formulating network policies.

1179-198 PROPERTY ADMINISTRATOR(gov. serv.; insur. & real estate)

DPT:218

property manager.

GED: 5 SVP: 6 EC: 1 PA: S 5 6

Administers the acquisition, appraisal, management and disposal of governmental or private properties:

Examines title deeds and documents relating to the sale, purchase and lease of property to ensure that details are recorded and legal requirements covered. Negotiates or approves purchase, rental or sale of property on behalf of government department or property investment section of private corporation. Initiates and directs studies to compile data for the analysis of rents, real property values and maintenance costs. Maintains records of property revenues and expenditures, administers budget and prepares associated reports. Inspects properties and recommends or directs disposal by negotiated sale or lease of those surplus to requirements. Supervises activities of personnel engaged in real estate operations, and in clerical, security and maintenance duties related to management of property.

May write or prepare promotional material such as news releases, photographs and drawings for newspapers, radio and television or display. May negotiate short-term leases for arenas, auditoriums and stadiums or administer residential, commercial or industrial

investment properties for client and arrange maintenance, rentals, rent collections and prepare reports on such matters as mortgage disbursements, taxes, insurance premiums and lease expiration dates and be designated according; for example,
Property-Management Agent(insur. & real estate)
Shopping-Centre Administrator(insur. & real estate; ret. trade)

1179-202 FREIGHT-TRAFFIC CONSULTANT(bus. serv.)

DPT:268

GED: 5 SVP: 6 EC: I PA: S 4 5 6

Advises industries, business firms and individuals regarding tariff rates and preferable modes of shipment for freight:
Quotes overall rates for shipment and indicates number of times freight must be handled and total elapsed time shipment may take. Advises client of preferable mode of transport, such as air, water, railway or truck without regard to higher rates when speed is paramount. Conducts audit on client's freight bills for overcharges due to improper rating and tariff quotations. Files claim with insurance company for losses, damages and overcharges. Files reparation claim on behalf of client with governmental or other agency for improper and unfair freight-tariff charges. See also definition for term title, 02-090 CONSULTANT (any ind.).

1179-206 BAND ADMINISTRATOR(prof. & tech., n.e.c.)

DPT:138

reservation administrator.

GED: 4 SVP: 6 EC: I PA: L 5 6

Administers the business affairs of an Indian reservation and carries out directives issued by the Council:

Attends Council meetings and advises Council on matters that fall within its jurisdiction. Carries out inspections, and reports to Council on all matters pertaining to public works. Accepts tenders for construction or maintenance work to be carried out on reservation, and awards contracts approved by Council. Compiles annual estimates of anticipated reservation revenues and expenditures. Investigates by-laws passed by Council, such as those covering sanitation and zoning, and ensures that by-laws are maintained. Supervises and co-ordinates the activities of other administrative employees working for the reserve, such as financial personnel and clerks, or personally carries out their activities.

1179-299 OTHER OCCUPATIONS RELATED TO MANAGEMENT AND ADMINISTRATION

This group includes workers, not elsewhere classified; related to management and administration, for example, those who engage individual performers or companies for entertainment establishments; interpret and explain hospital- and medical-insurance plans to contracting subscribers; negotiate and settle compensation claims due to prospecting and drilling for oil; investigate and collect information concerning oil-well drill operations and geological and geophysical prospecting; co-ordinate activities to provide facilities and service for conventions; plan locations of franchised-retail outlets; and develop and implement security procedures for confidential material. Typical examples of occupational titles covered by this residual group definition are:

Booking Agent (amuse. & rec.)
Claims Agent, Properties (petrol. & coal prod., trans., n.e.c.)
Conference Co-ordinator (bus. serv.; cater. & lodg.)
Franchise-Outlet Promoter (bus. serv.)
Hospital-Medical-Insurance Plan Representative
(gov. serv.; insur. & real estate)
Leaseman (bus. serv.)
Scout (oil & nat. gas)

OCCUPATIONS IN NATURAL SCIENCES, ENGINEERING AND MATHEMATICS

This major group includes occupations concerned with research and the practical application of scientific knowledge in the field of physical sciences, including specializations such as chemistry, electricity, electronics, geology, physics, mechanics, and meteorology; in life science, including specializations such as agriculture, biology, and pharmacology; in architecture, engineering, surveying and draughting; in mathematics, statistics, systems analysis and actuarial sciences; and in related technical fields. Managerial occupations related to natural science, engineering and mathematics are classified in Unit Group 1131, **MANAGEMENT OCCUPATIONS, NATURAL SCIENCES AND ENGINEERING**. Social science occupations are classified in Major Group 23, **OCCUPATIONS IN SOCIAL SCIENCES AND RELATED FIELDS**. **OCCUPATIONS IN NATURAL SCIENCES, ENGINEERING AND MATHEMATICS** are classified in the following minor groups:

- 211 Occupations in Physical Sciences
- 213 Occupations in Life Sciences
- 214/215 Architects and Engineers
- 216 Other Occupations in Architecture and Engineering
- 218 Occupations in Mathematics, Statistics, Systems Analysis and Related Fields

211-OCCUPATIONS IN PHYSICAL SCIENCES

This minor group includes occupations concerned with research in the physical sciences to discover and establish scientific principles and laws and apply them to specific scientific problems and situations in such fields as chemistry, physics, geology, meteorology and metallurgy. Occupations concerned with providing technical support in physical sciences research are included. These occupations are classified in the following unit groups:

- 2111 Chemists
- 2112 Geologists and Related Occupations
- 2113 Physicists
- 2114 Meteorologists
- 2117 Physical Sciences Technologists and Technicians
- 2119 Occupations in Physical Sciences, n.e.c.

2111-CHEMISTS

This unit group includes occupations concerned with conducting basic research to extend the knowledge of the science of chemistry, and with conducting applied research to develop new or improved materials, compounds and substances for commercial purposes; developing analytical methodology and techniques, and performing quantitative and qualitative analyses and experiments in organic, inorganic and physical chemistry. Activities include: synthesizing compounds and products; analyzing finished products to determine quality; preparing laboratory reports and compiling data for technical reports. Biochemists and clinical chemists are classified in Unit Group 2133, **BIOLOGISTS AND RELATED SCIENTISTS**.

2111-110 AGRICULTURAL CHEMIST(prof. & tech., n.e.c.)

DPT:031

agricultural-research chemist.

GED: 6 SVP: 8 EC: 1 6 PA: L 4 7

Conducts basic and applied research into development of new and better uses for agricultural products and the processing and storage of these commodities:
Performs duties similar to those of 2111-126 **ORGANIC CHEMIST** (prof. & tech., n.e.c.). Utilizes various types of micro-organisms to convert cereal grain carbohydrates to new compounds. Investigates and controls enzyme systems to transform natural substances; such as, proteins, starches, vegetable oils and plant gum, into useful commercial products. Conducts chemical analyses of fruits, vegetables and other plants to develop species or strains resistant to fungi, insects and similar destructive agents. Analyzes soils to determine presence of lime, fertilizer or other chemical ingredients, and devises methods of washing out or neutralizing soil poisons. Develops chemical compounds and synthetic hormones (substances that activate or retard

action in certain cells) for use in weed control or as insecticides, fungicides and rodent poisons. Performs experiments concerning development and utilization of fertilizers and investigates problems; such as, chemistry of phosphate systems, use of insoluble potash ores as fertilizers, and nitrogen fixation in soils. Conducts experiments with natural and synthetic materials or by-products to develop new foods, food preservatives, anti-adulteration agents and similar products. Tests starch and sugar products, cereals, canned or dehydrated foods, dairy products, vegetables, meats, flavouring and other food products to ensure compliance with government food laws and standards of quality and purity. Prepares, or supervises preparation of, laboratory reports, specifications and standards. Supervises and co-ordinates the work of technologists and technicians.

May be concerned with one particular product or process of agricultural chemistry and be designated accordingly; for example, Cereal Chemist(feed & flour mill)

Dairy Chemist(dairy)

Fermentologist

Food Chemist(food & bev., n.e.c.)

Nutritional Chemist

Soil Chemist

2111-114 ANALYTICAL CHEMIST(prof. & tech., n.e.c.)

DPT:031

analytical-research chemist; chemical analyst.

GED: 6 SVP: 8 EC: I 6 PA: L 4 7

Conducts basic research into analytical techniques, methodology and procedures, and applied research into composition and structure of elements, compounds and materials:

Carries out exact qualitative and quantitative analyses to determine relationship between molecular structure and the chemical and physical properties of organic and inorganic compounds by such means as absorption, emission, magnetic resonance and mass spectroscopy; chromatography, distillation, electrochemical, microchemical and gas analysis, fluorometry and titrimetry. Determines the rate of deterioration of stored chemicals and compounds. Conducts experiments and formulates analytical techniques, methodology and procedures based on observations and conclusions of experimentation. Develops techniques for use of different types of instruments; such as, spectrometers, electron microscopes and fluoroscopes. Prepares or supervises preparation of laboratory reports and specifications. Supervises and co-ordinates the work of technologists and technicians in analytical chemistry.

May design and construct apparatus needed for analysis.

2111-118 CHEMICAL OCEANOGRAPHER(prof. & tech., n.e.c.)

DPT:031

GED: 6 SVP: 8 EC: B 2 4 PA: L 4 6 7

Conducts research into the chemical laws, principles and techniques pertaining to the marine environment, including oceans, marine atmosphere and sea floor:

Investigates chemical composition of ocean water and sediments, and chemical reactions that occur in the sea. Studies interactions of components of sea water with atmosphere, sedimentary solids and other marine material. Conducts research into subsurface chemistry and distribution of noble gases and halogens in marine environment. Investigates processes that produce and alter chemical characteristics of ocean and effect of chemical composition of sea water on biological, geological and physical aspects of marine environment. Conducts experiments to determine chemical substances of water; such as, oxygen, nitrogen, carbon-dioxide, iron or radio-active elements. Prepares, or supervises preparation of laboratory reports and technical papers associated with a particular aspect of chemical oceanography. Supervises and co-ordinates the work of technologists and technicians.

2111-122 INORGANIC CHEMIST(prof. & tech., n.e.c.)

DPT:031

inorganic-research chemist.

GED: 6 SVP: 8 EC: I 6 PA: L 4 7

Conducts research to investigate inorganic chemical phenomena, develops programs to study extraction, recovery, purification and conversion of substances free or relatively free of carbon, and advises on their application to industrial processes or on improvement for commercial use:

Investigates inorganic compounds to determine their atomic structure

or other properties. Prepares substances; such as, boron, silicon, graphite, clay, glass and various metals and new inorganic compounds, and investigates possibilities of their application to industrial and commercial uses. Conducts experiments to develop or improve processing of inorganic materials; such as, alkaline earth elements, hydrogen, phosphorus and sulphur, by examining the mechanism of inorganic reactions, reaction kinetics and the synthesis of inorganic materials. Engages in studies related to activities; such as, the production of bulk chemicals used in the manufacture of fertilizers, explosives and inorganic materials useful as solid state electronic devices and semi-conductors. Analyzes metals and ores to determine composition, structure, chemical characteristics and economic value. Develops new or improved methods of production or processing of metals and alloys, and prepares chemical processing formulae. Prepares, or supervises the preparation of laboratory reports and specifications on experiments, development projects and processes, as a result of research. Supervises and co-ordinates the activities of technologists and technicians in a particular aspect of inorganic chemistry.

May be concerned with a product or process and be designated accordingly; for example,

Cement Analyst(cement, stone & clay)

Ceramic Chemist

Glass Chemist(glass)

Metallurgical Chemist

2111-126 ORGANIC CHEMIST(prof. & tech., n.e.c.) DPT:031

organic-research chemist.

GED: 6 SVP: 8 EC: I 6 PA: L 4 7

Conducts research to investigate organic chemical phenomena; develops programs to study, synthesize or modify carbon compounds; and advises on their application in industry and commerce:

Investigates such phenomena as structure of organic molecules and synthesis and compounding of chemical products. Combines organic compounds to make new substances or to duplicate substances found in nature. Develops new uses for chemical by-products. Carries out experiments designed to develop and improve, by chemical means, colour, texture, strength and durability of paint, rubber, wood, dye, petroleum and other organic compounds and by-products. Analyzes and tests dyes, paints, petroleum, polymers and other substances to determine their structure and other physical and chemical properties. Extracts, purifies and ferments animal and vegetable products. Processes foodstuffs and beverages and modifies them by preservatives, mould inhibitors, antioxidants, moisturizers, nutrients, colourants and other additives. Develops and improves methods of processing organic chemical products, such as those produced from petroleum and natural gas liquids, coal-tar distillates, fermentation processes, solvents, plastics and intermediates for other chemicals and chemical process industries. Modifies, converts or compounds organic chemicals for use in leather tanning, textile dyeing and finishing, petroleum and natural gas processing, rubber vulcanization, pulp and paper production, manufacturing explosives and propellants, soaps, detergents, oils, fats, waxes, paints and varnishes, toilet preparations, polishes and other products. Produces polymeric compounds; such as, elastomers, plastics and synthetic resins, fluorine, phosphorus, silicon and sulphur compounds. Prepares, or supervises preparation of laboratory reports and specifications on experiments, development projects and processes. Supervises and co-ordinates activities of technologists and technicians in a particular aspect of organic chemistry.

May be concerned with one product or process, and be designated accordingly; for example,

Chemist, Detergent(chem., n.e.c.)

Chemist, Dye(chem., n.e.c.)

Chemist, Industrial Alcohols(chem., n.e.c.)

Chemist, Leather(leather tan. & fur dress.)

Chemist, Petroleum(petrol. & coal prod.)

Chemist, Pharmaceuticals(pharm. & toil.)

Chemist, Plastics and Resins(chem., n.e.c.)

Chemist, Polymers(chem., n.e.c.)

Chemist, Protective Coatings(paint. & varn.)

Chemist, Textile(syn. fibres)

Chemist, Wood(chem., n.e.c.)

2111-130 PHYSICAL CHEMIST(prof. & tech., n.e.c.) DPT:031
physical-research chemist.
 GED: 6 SVP: 8 EC: I 6 PA: L 4 7

Conducts research to develop techniques and methods of measuring basic chemical and physical properties of organic and inorganic substances, using extensive theoretical knowledge of the laws and theories of physics, chemistry, and mathematics:

Conducts experiments with substances to develop techniques and methods of measuring properties; such as, specific rotation, density, index of refraction, X-ray diffraction patterns and heat reaction or combustion. Determines atomic and molecular weights of substances, including crystal forms, using thermo-magnetic analysis, microscopy measurement and other techniques. Examines molecules to ascertain structure, electrical energy and reaction to energy change, and measures heat of substances under varying conditions to ascertain physical and chemical characteristics. Interprets results of experimentation in fields; such as, chromatography, various types of spectroscopy, electron diffraction and chemical and electron microscopy. Develops techniques for use of instruments that measure heat, light and electricity. Studies rate of chemical reaction, and determines catalytic action required to increase reaction rate. Prepares, or supervises preparation of laboratory reports and analyses, and prepares specifications on experiments. Supervises and co-ordinates the work of technologists and technicians in various aspects of physical chemistry.

May be concerned with one aspect of physical chemistry and be designated accordingly; for example,
 Electrochemist
 Nuclear Chemist

2111-134 QUALITY-CONTROL CHEMIST(prof. & tech., n.e.c.) DPT:031
control chemist; laboratory chemist.
 GED: 6 SVP: 8 EC: I 6 PA: L 4 7

Analyzes and controls quality of raw materials, processes and finished products, in a laboratory of an industrial plant or other organization:

Performs duties similar to those of 2111-114 ANALYTICAL CHEMIST (prof. & tech., n.e.c.). Ensures that proper sampling techniques are carried out in plant so that accurate analysis of processes or products may be determined. Prepares, or supervises the preparation of special solutions used in testing. Interprets and prepares reports on test results to appropriate authorities and other interested personnel. Supervises and co-ordinates the work of technologists and technicians engaged in chemical analysis for quality control.

May specialize in analyzing specific materials and give evidence of findings before courts of law and official enquiries, and be designated,
 Forensic Chemist

2112-GEOLOGISTS AND RELATED OCCUPATIONS

This unit group includes occupations concerned with conducting research into the nature and history of the earth's crust; the physical nature of the atmosphere and hydrosphere; the distribution, circulation and properties of water; and the stratigraphic arrangement of the earth, to increase scientific knowledge and develop practical applications in such fields as mineral exploration and exploitation and water conservation. Activities include: identification and classification of fossils and precious stones, and provision of assistance in locating and developing oil, natural gas and mineral deposits.

2112-110 EXPLORATION GEOPHYSICIST(prof. & tech., n.e.c.) DPT:031
 GED: 6 SVP: 8 EC: B PA: L 4 5 6 7

Studies structure of subsurface rock formations to locate petroleum deposits, using seismograph, gravimeter, torsion balance, magnetometer, pendulum devices and electrical-resistivity apparatus to measure various characteristics of earth:

Conducts surveys to measure seismic, gravitational and magnetic forces affecting the earth, utilizing principles of physics, mathematics and chemistry. Analyzes data obtained from field studies to determine

composition and structure of subsurface materials to assist in locating petroleum and mineral deposits. Computes from instrument readings, charts and graphs, variations in physical forces existing at different locations, and interprets data to reveal subsurface structures likely to contain petroleum deposits. Prepares charts, profiles or subsurface contour maps. Determines desirable locations for drilling operation. Supervises field crews drilling shallow boreholes in designated terrain and collecting samples of soil for chemical analysis of hydrocarbon content. Collects and integrates geological and geophysical data to aid in evaluation and interpretation of information. Supervises preparation, and assists in developing data, for magnetic playback operations, checks for procedural errors, tape distortion, timing, instrumental deviation, and recommends modifications to playback equipment to facilitate programs.

2112-114 GEOLOGIST(prof. & tech., n.e.c.) DPT:031
 GED: 6 SVP: 8 EC: B 2 6 PA: M 2 3 4 7

Conducts research into nature and history of earth's crust to increase scientific knowledge, and to develop practical applications in mineral exploitation and engineering:

Explores areas to determine underground structure of the earth and the types of minerals or rocks that may be discovered. Studies rock cores and cuttings brought up by drills or rock samples obtained from outcrops of rocks. Classifies fossilized life forms found in geological formations, according to their chronology and genus. Studies the nature and effect of forces, such as erosion, sedimentation and glaciation, on the form of the earth's surface and sea beds. Records data in notebooks or on working maps and aerial photographs. Examines geological specimens, in a laboratory, using test instruments and apparatus, such as microscopes, fluoroscopes, spectroscopes and X-ray diffraction cameras. Investigates earth materials for certain chemical or other reactions by exposing them to high temperature and pressures, using furnaces and high pressure chambers. Interprets research data derived from laboratory studies or field explorations, and prepares geological reports and maps. Supervises and co-ordinates the work of technologists and technicians in various aspects of geological activity.

May conduct research into chemical composition of, and chemical change in earth's crust. May examine and interpret aerial photographs to identify rock types, structural trends, seam and fault alignments, indicating features of value for mineral exploitation. May investigate the structure of the earth's crust beneath oceanic depressions and study the material and form of the sea floor. May work as a consultant, and advise clients for a fee. May be concerned with one particular aspect of geological activity and be designated accordingly; for example,

Geochemist
 Geomorphologist
 Marine Geologist
 Petrologist
 Photogeologist
 Stratigrapher

2112-118 GEOPHYSICIST(prof. & tech., n.e.c.) DPT:031
 GED: 6 SVP: 8 EC: B 2 6 PA: L 2 3 4 7

Studies the entire earth from its environment in space and its atmosphere, to the centre of its core, by exploration and research:

Makes precise measurements of earth's gravity and magnetic fields, using survey and geodetic instruments, such as transits, theodolites and other engineering instruments to determine variations in earth's gravitational field and provide data used in determining weight, size and mass of earth. Records seismic waves generated by natural earthquakes or man-made explosions, interprets reflected or refracted readings on electronic devices and prepares seismic cross-section charts to assist in locating oil or mineral-bearing structures. Prepares reports on exploration field trips and laboratory work. Supervises and co-ordinates the work of technologists and technicians in various aspects of geophysical specialties.

May apply geophysical data to problems in various fields, such as telephony, telegraphy, radio broadcasting, navigation, mapping and prospecting. May study effects of glaciation on changing surface of the earth. May study formation of strata underlying continents and the forces at work in earth's crust. May study occurrence, origin and activity of volcanoes, the origin of igneous rocks and ore-forming processes occurring in the earth in the presence of igneous rock. May be concerned with a geophysical specialization and be designated accordingly; for example,

Aeronomist
 Geodesist

Geomagnetician
Glaciologist
Tectonophysicist
Volcanologist

2112-122 HYDROLOGIST(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: B PA: L 4 7

Conducts research into the occurrence, distribution and circulation of waters of the earth; chemical and physical properties of water and the relationship between water and its environment, including its relationship with living things: Studies distribution, disposition and development of waters of land areas, including form and intensity of precipitation and modes of return to ocean and atmosphere. Devises flood-warning systems, and assists in the design and operation of flood-detention reservoirs, dykes and floodways. Designs structures to regulate streamflow and studies streamflow patterns to minimize damaging effects of erosion and sedimentation, utilizing knowledge of evaporation, snow, rainfall and land use. Conducts research in groundwater movement and inventory methods to determine extent of groundwater supplies, water flow, disposition of sediment, manner of recharge and safe rates of withdrawal. Supplies basic data to assist in determining feasibility of developing hydro-electric power sites. Applies knowledge of hydrologic principles to soil-plant-water relationships to assist agrologists and farmers to achieve highest possible level of food and fibre production. Assist health authorities in developing and applying effective remedies for pollution and water-borne disease. Advises appropriate authorities concerning available water supplies to assist in determining priorities, alternative allocations and short-and long-range forecasts of supply and demand. Prepares, or supervises the preparation of various technical reports and studies. Supervises and co-ordinates the work of technologists and technicians in various aspects of hydrological studies.

2112-126 MINERALOGIST(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: B PA: L 4 7

Examines, analyzes and classifies minerals, gems and precious stones: Isolates specimen from ore, rocks or matrices. Makes microscopic examination to determine shape, surface markings and other physical characteristics. Performs physical and chemical tests, using x-ray diffraction and optical methods to examine specimens and determine composition and type of crystalline structure. Identifies and classifies samples. Develops data and theories on origin and occurrence of minerals, and advises on their possible use. Supervises and co-ordinates the work of technologists and technicians. May be concerned with a particular aspect of mineral activity and be designated, Gemmologist.

2112-130 PALEONTOLOGIST(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: B PA: L 4 7

Studies fossilized remains of plants and animals found in geological formations to trace the evolution and development of past life and identify geological formations according to nature and chronology: Recovers and assembles fossilized specimens, notes their position, and classifies them according to their probable botanical or zoological age. Prepares reports on findings as an aid to location of natural resources, such as petroleum-bearing formations. Organizes scientific expeditions and supervises and co-ordinates the work of technologists and technicians in removing fossils from deposits and matrix rock formations. May be concerned with a particular activity in paleontology, such as the study of plant fossils and fossilized micro-organisms, and be designated accordingly; for example, Micropaleontologist
Paleobotanist

2112-134 PETROLEUM GEOLOGIST(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: B 2 6 PA: M 2 3 4 7

Explores and charts stratigraphic arrangement, composition and structure of earth to locate petroleum and natural gas deposits: Studies well logs, analyzes cores and cuttings from well drillings, and interprets data obtained by electrical well logging and other subsurface surveys, using seismographic and other equipment to

identify earth strata. Examines aerial photographs, evaluates results of geophysical prospecting, and prepares surface and subsurface maps and diagrams depicting stratigraphic arrangement and composition of earth and probable deposits of petroleum and natural gas. Estimates oil reserves in proven or prospective fields. Consults with petroleum engineers concerning drilling and production methods. Recommends action for coring, testing, logging, casing, perforating, shooting, acidizing, fracturing of oil wells, and abandoning of non-productive wells. Recommends acquisition, retention or release of property leases or contracts. Supervises and co-ordinates the work of technologists and technicians in various aspects of petroleum geological work. May direct drilling of shallow exploratory wells. May investigate composition, structure and history of rock masses. May act as a consultant and advise clients for a fee.

2112-138 SEISMOLOGIST(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: I PA: L 4 6

Conducts research into the structure of the earth by studying mechanical waves generated by artificial means or by natural earthquakes: Establishes network of seismic observation posts to obtain data, or uses existing facilities. Obtains and analyzes data recorded from siesmographs and other special devices. Studies sources of seismic signals and identifies their location, magnitude, depth and physical nature. Studies strong motions in earth, close to earthquake sources, in order to obtain technical data needed for the design of structures, such as buildings, bridges and dams, which must be protected against earthquake damage. Interprets structure and physical properties of earth from analyzed data, and prepares special maps, charts, graphs, and publications. May study problems involving the detection and measurement of underground nuclear explosions.

2113-PHYSICISTS

This unit group includes occupations concerned with conducting theoretical and experimental research to extend the knowledge of the science of physics, and applied research related to the scientific and commercial utilization of heat, light, acoustics, electricity and magnetism, atoms, molecules and nuclei and other physical phenomena. Activities include: analyzing and postulating, in mathematical terms, the results of experiments; predicting results of experiments designed to detect and measure previously unobserved physical phenomena; synthesizing research data to formulate or substantiate new theories, concepts or laws; studying bodies at rest and in motion; conducting experiments to discover the fundamental particles of matter, and observing the forms of energy and their interaction and effect on matter. Biophysicists are classified in Unit Group 2133. BIOLOGISTS AND RELATED SCIENTISTS.

2113-110 ACOUSTICS PHYSICIST(prof. & tech., n.e.c.) DPT:031
acoustician.
GED: 6 SVP: 8 EC: I PA: L 5 6 7

Conducts research into phenomena of hearing, sound reproduction and vibration to increase scientific knowledge, and applies this knowledge to the design and development of scientific and commercial equipment and processes: Studies propagation and transmission of sound in subsonic, ultrasonic and auditory frequency ranges. Performs experiments to determine effects of sound and vibration on materials. Studies physiological and psychological effects of sound on human beings. Investigates methods of minimizing noise in urban areas, industrial and other establishments, aircraft and automobiles. Prepares, or supervises preparation of scientific papers and reports. Supervises and co-ordinates the work of technologists and technicians. May develop underwater detection devices for ships and submarines. May devise acoustical systems for auditorium, radio and television studios. May design loudspeakers, amplifiers, recorders and other equipment used in sound reproduction and amplification.

2113-114 ASTRONOMER(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: B 2 PA: L 2 3 4 7

Observes, analyzes and interprets data on positions, motions, composition, structure and characteristics of celestial bodies to extend the knowledge of the origin, evolution and eventual destiny of the universe:

Observes celestial bodies from ground observation stations or instrument packages lofted by balloon, rocket or orbiting satellite, using x-ray detectors, and radio or optical telescopes equipped with cameras, spectrographs, photometers, radiometers and other devices. Determines mass, position, distance, motion, composition and structure of members of the solar system, stars, stellar systems, interstellar matter, pulsars, galaxies and quasars, and interprets information obtained in terms of basic physical laws. Calculates orbits of various celestial bodies observed. Conducts research on statistical theory of motions of celestial bodies and analyzes spectra of celestial bodies. Studies structure and evolution of stars, stellar systems and universe, using digital computers for reduction and analysis of data and testing of physical theories (mathematical models) relating to the universe. Prepares, or supervises preparation of, scientific papers and reports. Supervises the work of technologists and technicians.

May prepare mathematical tables for use by air and sea navigators, showing positions relative to earth of sun, moon, planets and stars, at given times. May design and improve mechanical, optical and electronic instruments for astronomical research. May specialize in measuring co-ordinates of celestial bodies; studying motion of objects in the solar system in relation to action of gravity and calculating orbits of artificial satellites and paths of guided missiles; measuring temperature and luminosity, and studying the chemical composition of celestial bodies; observing the distribution and motion of galaxies, theory of relativity, origin, age, nature of the universe, and be designated accordingly; for example,

Astrometrist
Astronomer, Celestial Mechanisms
Astrophysicist
Cosmologist
Radio Astronomer

2113-118 ATOMIC AND MOLECULAR PHYSICIST(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: I PA: L 5 6 7

Conducts research into the structure and behaviour of atoms and molecules, and some aspects of nuclei, to increase scientific knowledge, and devises methods of applying this knowledge to the design and development of scientific equipment and processes:

Observes the normal, excited and ionized states of atoms and molecules, using atomic and molecular beam resonance techniques. Measures and analyzes the intensity and time delay in the emission of radiation, using X-ray, ultra-violet and infra-red spectrometers. Records the electron-paramagnetic resonance of atoms and molecules, using magnetic-resonance spectrometers. Studies the force of impact and scattering of particles in atomic collisions, utilizing on-line computers. Determines the chemical bonds in molecules by studying the structure of atoms and molecules and its unstable states. Formulates theories and laws, in conjunction with research, to describe physical properties that govern the behaviour of atoms and molecules, in matter. Prepares, or supervises preparation of, scientific papers and reports. Supervises and co-ordinates the work of technologists and technicians.

May be concerned with a particular aspect of atomic or molecular physics and be designated accordingly; for example,
Chemical Physicist
Chemical Spectroscopist
Optical Spectroscopist

2113-122 ELECTRICITY AND MAGNETISM PHYSICIST(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: I PA: L 5 6 7

Conducts research into the nature and properties of electricity and magnetism to increase scientific knowledge, and applies this knowledge to the design and development of scientific and commercial equipment and processes:

Conducts research into electrostatics, current electricity, superconductivity, piezoelectricity, magnetism, electromagnetic waves and other phenomena. Investigates problems related to discovery of new sources of electrical energy and to generation and transmission of electrical power. Conducts experiments to determine electric and

magnetic properties of materials and their utilization in electromagnetic devices. Develops new techniques for generation, transmission and reception of electromagnetic waves to improve telephone, telegraph and other electrical systems. Prepares, or supervises preparation of, scientific papers and reports. Supervises and co-ordinates the work of technologists and technicians.

May design and develop special-testing devices for measuring electrical quantities and determining properties of magnetic materials. May assist in design and development of transformers, electric motors and power plants. May be concerned with a particular aspect of electricity and magnetism physics and be designated accordingly; for example,

Magnetism Physicist
Microwave Physicist

2113-126 ELEMENTARY-PARTICLE PHYSICIST(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: I PA: L 5 6 7

Conducts research into the structure and behaviour of elementary particles, and the nature and mechanism of forces between the elementary particles to increase scientific knowledge, and applies this knowledge to the design and development of scientific and commercial equipment and processes:

Develops devices to accelerate elementary particles to extremely high energies, for detection and identification. Measures the mass spectrum, spins and other properties of the elementary particles, using on-line computers, counters, spark chambers, wire chambers, proportional counters and other electronic devices. Supervises and co-ordinates the work of technologists and technicians. Prepares, or supervises preparation of, scientific papers and reports.

May be concerned with conducting research of a theoretical nature into the structure and basic dynamics involving elementary particles and be designated accordingly; for example,
Elementary-Particle Experimentalist
Experimentary-Particle Theorist

2113-130 FLUIDS PHYSICIST(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: I PA: L 5 6 7

Conducts research into the structure and behaviour of liquids and gases to increase scientific knowledge, and applies this knowledge to the design and development of scientific and commercial equipment and processes:

Conducts experiments to measure viscosity, diffusion, specific heat, thermal conductivity and other physical properties of liquids and gases. Investigates structure of liquids, using X-ray and neutron scattering. Constructs models of intermolecular forces and devises theories to understand and explain these properties. Prepares, or supervises preparation of, scientific papers and reports. Supervises and co-ordinates the work of technologists and technicians.

2113-134 HEALTH PHYSICIST(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: B 6 7 PA: S 5 6 7

Conducts research, and training and monitoring programs to protect plant, laboratory personnel and general public from radiation hazards:

Conducts research into radiation exposure limits for personnel, safe work methods and decontamination procedures to develop standards and tests to ensure radiation is not in excess of permissible standards. Designs or modifies detectors, counters, monitors and other protective devices. Assists in developing standards of permissible concentrations of radioisotopes in liquids and gases. Directs testing and monitoring of radiation equipment and recording of personnel and plant area radiation-exposure data. Consults with scientific personnel regarding techniques to determine that equipment or plant design conforms to health-physics standards for protection of personnel. Prepares, or supervises preparation of, scientific papers and reports. Supervises and co-ordinates the work of technologists and technicians.

May advise public authorities on methods of dealing with radiation hazards and on procedures to be followed in radiation incidents. May assist in civil defense planning.

2113-138 MECHANICS PHYSICIST(prof. & tech., n.e.c.)
DPT:031
rheologist.
GED: 6 SVP: 8 EC: 1 PA: L 5 6 7

Conducts research into the action of forces on matter, develops theories and laws to increase scientific knowledge, and applies this knowledge to design and development of scientific and commercial equipment and processes:

Conducts research into motion and condition of equilibrium of bodies as applied to ballistics, rheology, aerodynamics, vibration, high pressure and vacuum. Computes velocities and trajectories of missiles and observes the effect on them of gravitation, atmospheric resistance, friction and other forces. Records contact of shock waves on matter to measure the dynamic and input strengths of materials and the distribution effects of vibration. Prepares, or supervises preparation of, scientific papers and reports. Supervises and co-ordinates the work of technologists and technicians.

May design or construct equipment for a particular experiment. May be concerned with a particular experiment. May be concerned with a particular aspect of mechanical physics and be designated accordingly; for example,

Aerodynamicist

Ballistician

Physical Aerodynamicist

2113-142 NUCLEAR PHYSICIST(prof. & tech., n.e.c.)
DPT:031
GED: 6 SVP: 8 EC: 1 PA: L 5 6 7

Conducts research into the structure and behaviour of atomic nuclei, and the nature of nuclear forces and elementary particles to extend the knowledge of the science of nuclear physics, and applies this knowledge to the design and development of scientific and commercial equipment, processes and safety devices:

Performs experiments with accelerators and reactors which are capable of making radioactive nuclei and producing energetic beams of nuclei which react with the other nuclei to produce isotopes and short-lived states of nuclei and particles, not otherwise present in a terrestrial environment. Investigates and classifies properties of nuclei and determines their effect and penetration through material. Improves or implements radiation-protection methods. Constructs new equipment or improves existing equipment to analyze and record effects of energetic particles and radiation. Prepares, or supervises preparation of, scientific papers and reports. Supervises and co-ordinates the work of technologists and technicians.

May be concerned with a particular aspect of nuclear physics and be designated accordingly; for example,

Accelerator Physicist

Alpha-Spectroscopy Physicist

Beta-Spectroscopy Physicist

Cosmic-Ray Physicist

Nuclear-Reactor Physicist

Theoretical-Nuclear Physicist

2113-146 OPTICS PHYSICIST(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: 1 PA: L 5 6 7

Conducts research into the sources, propagation and effects of light, to increase scientific knowledge, and applies this knowledge to the design and development of scientific and commercial equipment and processes:

Analyzes interference, diffraction, absorption and other properties of light. Analyzes problems concerning maser and laser devices which utilize microwave and optical beams of ultra-high intensity. Applies results of experiments to improve fluorescent lighting, standardizing colour in manufacture of products, and the design of new or improved optical devices. Conducts experiments in areas dealing with films and coatings, colour, illumination, photography, spectroscopy and physical optics. Supervises and co-ordinates the work of technologists and technicians.

May be concerned with instrumentation related to optical physics and be designated,

Optical-Instrument Specialist

2113-150 PHYSICAL OCEANOGRAPHER(prof. & tech., n.e.c.)
DPT:031
GED: 6 SVP: 8 EC: B 2 4 PA: L 4 5 6 7

Carries out research on the mechanisms of energy transfer through the sea and the physical interaction of the sea with its surroundings:

Studies density, salinity, bathymetry, sea ice topography, transmission of light and sound and other physical aspects of the ocean. Measures the structure of the ocean by instrumentation. Observes and analyzes surface and sub-surface movement of the ocean waves, tides, small and large scale circulations, density changes and related factors. Studies all aspects of wave motion on and within the sea due to meteorological, geological or geophysical causes. Investigates the thermo-dynamic properties of the sea. Applies physical oceanographic concepts to small and large scale ocean engineering problems such as pollution dispersal, sea ice pressure on ships, wave forces, harbour design and tidal power. Prepares, or supervises preparation of, reports and observations. Supervises and co-ordinates the work of technologists and technicians.

2113-154 PLASMA PHYSICIST(prof. & tech., n.e.c.)
DPT:031
GED: 6 SVP: 8 EC: 1 PA: L 5 6 7

Conducts research into the properties and dynamics of ionized gases to increase scientific knowledge, and applies this knowledge to the design and development of scientific and commercial equipment and processes:

Studies the behaviour of gases in electrical and magnetic fields. Observes and studies the propagation and scattering of electromagnetic waves through plasma. Investigates plasma containment, stability, propagation of small oscillations, shock waves, direct conversion of kinetic into electrical energy and plasma propulsion in interplanetary travel. Carries out research on devices which produce power by nuclear fusion in plasmas. Prepares, or supervises preparation of, scientific reports and papers dealing with a particular aspect of plasma physics. Supervises and co-ordinates the work of technologists and technicians.

2113-158 SOLID-STATE PHYSICIST(prof. & tech., n.e.c.)
DPT:031
GED: 6 SVP: 8 EC: 1 PA: L 5 6 7

Conducts research into the structure, character and physical properties of solids to obtain information regarding their behaviour, and formulates laws governing their physical processes to increase scientific knowledge, and applies this knowledge to the design and development of scientific and commercial equipment and processes:

Conducts experiments to observe and identify crystal patterns by means of X-ray crystallography. Investigates the thermal, magnetic and electronic properties of ceramics, semi-conductors, and all types of crystals, using spectrometers, X-ray generators, electron microscopes and other optical devices. Analyzes the effect of temperature and pressure on solids to determine metal elasticity. Determines molecular structure of polymers, using acoustic and electromagnetic waves. Studies transport properties of electrons in solids to measure conductivity, mobility and relaxation effects and scattering. Studies the optical properties of crystals by reflectivity, transmission and luminescence of light. Examines elementary excitations in solids by means of electromagnetic waves. Determines magnetic properties of solids by magnetic resonance, neutron diffraction and susceptibility measurements. Applies results of research to problems of metal fatigue, lattice defects, disk locations and colour centers. Supervises and co-ordinates the work of technologists and technicians.

May design and develop equipment for experiments. May be concerned with a particular aspect of solid state physics and be designated accordingly; for example,

Crystal Physicist

Metal Physicist

Semi-Conductor Physicist

2113-162 THERMAL PHYSICIST(prof. & tech., n.e.c.)
DPT:031
GED: 6 SVP: 8 EC: 1 PA: L 5 6 7

Conducts research into the nature and properties of heat, and the effects of temperature changes on the properties of materials to extend the knowledge of the science of thermal physics, and applies this

knowledge to the design and development of scientific and commercial equipment and processes:

Devises and conducts experiments to study the propagation of thermal energy. Records the effects of high temperatures on the physical properties of solids, liquids and gases. Observes superconductivity, superfluidity and other properties of matter at low temperatures. Devises expansion engines, adiabatic demagnetizers and cooling devices for production of liquefied gases, rocket propellants and other material used in quick-freezing processes. Formulates theories to describe the effects of temperature changes on the physical properties of matter. Applies results of experiments to problems of practical importance such as thermal insulation in jet engines or the storage and transfer of liquid gases. Develops methods and equipment for measuring extremely high or low temperatures. Prepares, or supervises preparation of, scientific papers and reports. Supervises and co-ordinates the work of technologists and technicians.

May be concerned with a particular aspect of thermal physics and be designated accordingly; for example,
Cryogenics Physicist

High-Temperature Physicist

2113-199 OTHER PHYSICISTS

This group includes physicists, not elsewhere classified; for example, those who conduct research in the theory of relativity and its applications. An example of an occupational title covered by this residual group definition is:

Relativity Physicist(prof. & tech., n.e.c.)

2114-METEOROLOGISTS

This unit group includes occupations concerned with conducting pure research into atmospheric phenomena to increase the body of meteorological knowledge; and applied research to develop theories, laws, methodology and techniques for more accurate weather analysis and forecasting; and studying and reporting on climatic conditions. Areas of specialization include: climatology and dynamic, industrial, physical or synoptic meteorology.

2114-110 METEOROLOGIST(prof. & tech., n.e.c.) DPT:031

GED: 6 SVP: 8 EC: B 2 3 PA: L 4 7

Observes, records and interprets atmospheric, weather and climatic conditions and uses data to analyze and forecast weather patterns and movements or to conduct pure and applied research into recording and forecasting methods and equipment:

Obtains data on atmospheric conditions, through use of balloons, rockets and artificial earth satellites and techniques; such as, spectroscopy, hygrometry, daylight and infra-red photography, radar and radio, and directs processing of this data. Draws isobars on surface maps indicating weather fronts, areas of precipitation, high and low barometric pressure, and predicted movement of fronts. Analyzes and interprets synoptic and prognostic charts, maps, and studies data; such as, barometric pressures, temperatures, humidity, wind velocities and areas of precipitation, obtained from meteorological stations, to prepare weather forecasts for the general public, aviation, shipping, agriculture and interested agencies or business establishments. Analyzes composition, structure and dynamics of the atmosphere; such as, directions and speed of air movement, pressures and temperatures. Investigates the nature of solar and terrestrial (infra-red) radiation and its effects on the atmosphere. Studies physical nature and properties of solid and liquid particles suspended in the atmosphere and examines phenomena; such as, process of cloud formation, precipitation and electrical disturbances. Studies physical laws related to air currents, climatic composition, and electrical, acoustical and optical properties. Examines climatic conditions of the earth or of a particular region by analyzing meteorological observations made over extended periods to prepare long-range weather forecasts. Supervises and co-ordinates the work of technologists and technicians in various aspects of meteorological activities.

May conduct experiments in fog dispersal, rainmaking and other types of weather control. May conduct research into problems; such as, smoke control and air pollution. May act as a consultant and advise clients for a fee. May specialize in a particular phase of meteorological activity and be designated accordingly; for example,

Climatologist
Dynamic Meteorologist
Industrial Meteorologist
Physical Meteorologist
Synoptic Meteorologist

2117-PHYSICAL SCIENCES TECHNOLOGISTS AND TECHNICIANS

This unit group includes occupations as described under master titles, 01-220 PHYSICAL SCIENCES TECHNOLOGIST (prof. & tech., n.e.c.) and 01-210 PHYSICAL SCIENCES TECHNICIAN (prof. & tech., n.e.c.) concerned with carrying out technological and technical functions in a physical science specialization, such as physics, chemistry, geology, geophysics, meteorology or astronomy, using a knowledge of scientific and mathematical principles and laboratory practises. Non-medical life sciences technologists and technicians are classified in Unit Group 2135, LIFE SCIENCES TECHNOLOGISTS AND TECHNICIANS. Technologists and technicians in the field of medicine and health are classified in Minor Group 315, OTHER OCCUPATIONS IN MEDICINE AND HEALTH. Engineering technologists and technicians are classified in Unit Group 2165, ENGINEERING TECHNOLOGISTS AND TECHNICIANS.

Physical Sciences Technologists

2117-110 through 2117-199

2117-110 CHEMICAL TECHNOLOGIST(prof. & tech., n.e.c.)

DPT:231

GED: 5 SVP: 7 EC: I 5 6 7 PA: L 4 5 6 7

Performs technological functions in chemistry, primarily in support of research, design, and developmental activities:

Performs duties as described under master title, 01-220 PHYSICAL SCIENCES TECHNOLOGIST (prof. & tech., n.e.c.). Applies knowledge of the principles of chemistry to recognize, study and suggest solutions to problems encountered. Conducts experiments, under supervision of chemists, concerned with temperatures, pressures, reactions and other chemical changes to improve quality, quantity and other characteristics of chemically-produced products. Determines procedures and equipment to be used, and undertakes appropriate tests or other operations to ensure that type, quality, quantity and weight of compounds used in laboratories, processes, or research are in accordance with pre-determined instructions or formulae. Investigates processes to convert raw materials into consumer products, using chemical techniques. Supervises and co-ordinates the work of technicians and subordinate tradesmen.

May be concerned with chemical technological activities related to a specialization, and be designated accordingly; for example,

Chemical-Design Specialist
Chemical-Instrumentation Technologist
Chemical-Process Analyst
Chemical-Research Technologist
Head Analyst, Chemical Laboratory
Laboratory Supervisor(chem., n.e.c.)
Product-Evaluation Technologist(chem., n.e.c.)

2117-114 FOREST-PRODUCTS TECHNOLOGIST(prof. & tech., n.e.c.)

DPT:231

GED: 5 SVP: 7 EC: B PA: L 4 7

Carries out technological functions to assist scientists and engineers in conducting research on the structure, properties and uses of wood, and applies results to design and development of new methods of processing and marketing forest products and by-products:

Performs duties as described under master title, 01-220 PHYSICAL SCIENCES TECHNOLOGIST (prof. & tech., n.e.c.). Tests, grades and classifies species of wood according to properties such as, colour, strength, elasticity and hardness, to determine most productive use for each type. Dries, treats and cures wood to increase resistance to wear, fire, acid, fungi and insects, using kilns, preservatives, electric drying techniques and exposure to air. Investigates processes to convert raw wood into consumer products such as lumber, alcohol, veneer,

plywood, fibreboard and other commercially useful products. Experiments with wood wastes and residues to develop new products and conserve supplies:

May study plant organization and business practices associated with the manufacture, distribution and sale of forest products. May be concerned with a particular aspect of forest technology and be designated accordingly; for example,
Laboratory Technologist (veneer & plywood)
Production Technologist (sawmill)

2117-118 GEOLOGICAL TECHNOLOGIST(prof. & tech., n.e.c.) DPT:231
GED: 5 SVP: 7 EC: 0 7 PA: L 4 5 6 7

Performs technological functions in geology, primarily in support of exploration and research:

Performs duties as described under master title, 01-220 PHYSICAL SCIENCES TECHNOLOGIST (prof. & tech., n.e.c.). Analyzes observations of elevations, latitude and irregularities of terrain, using data obtained from geological surveys, computes data and draws contour maps to represent graphically location and extent of rock formations favourable to oil or mineral deposits. Develops and perfects new or improved methods of extracting minerals from rocks and ores to provide mineral concentrates for specific requirements of geological research projects. Supervises and co-ordinates the work of subordinate technicians and tradesmen.

May be concerned with a particular aspect of geological technology and be designated accordingly; for example,
Geochemical Technologist
Geological-Prospecting Technologist

2117-122 GEOPHYSICAL TECHNOLOGIST(prof. & tech., n.e.c.) DPT:231
GED: 5 SVP: 7 EC: B PA: L 4 5 6

Performs technological functions in geophysics and petroleum geology, primarily in support of exploration and research:

Performs duties as described under master title, 01-220 PHYSICAL SCIENCES TECHNOLOGIST (prof. & tech., n.e.c.). Assist in measuring earth's gravity and magnetic fields, using transits, theodolites and other surveying instruments to determine variations in earth's gravitational field and provide other geophysical data. Directs use of seismographic-recording apparatus, and analyzes seismographic recordings made as result of predetermined explosions to provide data for delineating contours of sub-surface stratigraphy which may reveal earth formations favourable to petroleum or natural gas deposition. Verifies accuracy of calculations and directs preparation of charts or profiles from completed data. Supervises and co-ordinates the work of subordinate technicians and tradesmen.

May be concerned with a particular aspect of geophysical or petroleum geology technology and be designated accordingly; for example,
Computer, Geodetic Survey
Geophysical-Prospecting Technologist
Petroleum-Geology Technologist
Seismology Technologist, Petroleum Geology

2117-126 LABORATORY PHYSICAL SCIENCE TECHNOLOGIST(prof. & tech., n.e.c.) DPT:231
GED: 5 SVP: 7 EC: I PA: L 4 5 6 7

Performs technological functions in physics, primarily in support of research, design and development activities:

Performs duties as described under master title, 01-220 PHYSICAL SCIENCES TECHNOLOGIST (prof. & tech., n.e.c.). Carries out experiments, tests and analyzes in mechanics, heat, optics, sound, electricity and magnetism, electronics, nuclear and other branches of physics to investigate the properties of matter and propagation of energy, using quantum meters, spectrometers, densitometers and other technical instruments. Applies knowledge of principles of physics to recognize, study and suggest solutions to problems encountered. Supervises and co-ordinates the work of subordinate technicians and tradesmen.

May be concerned with a particular aspect of physical science technology and be designated accordingly; for example,
Optics Technologist
Spectroscopic Technologist

2117-130 TEXTILE TECHNOLOGIST(prof. & tech., n.e.c.) DPT:231
GED: 5 SVP: 7 EC: I PA: L 4 7

Performs technological functions in various aspects of design, production and quality control of textile products:

Analyzes fibres, designs fabrics and prepares specifications for their production. Selects and develops dyestuffs and dyeing formulae for the production of a given shade of fabric. Obtains and analyzes test data and sets and maintains standards of quality. Supervises production in textile plants in such departments as spinning, weaving, knitting, dyeing and finishing. Establishes production allocation schedules, maintains and supervises preparation of records and analytical reports, and co-ordinates activities between purchasing and sales. Supervises and co-ordinates the work of subordinate technicians and tradesmen. See also definition for term title, 02- 420 TECHNOLOGIST (prof. & tech., n.e.c.).

May assist and advise customers with problems. May be concerned with a particular aspect of textile technology, and be designated accordingly; for example,
Dyeing and Finishing Technologist
Fabric-Design Technologist
Production and Quality-Control Technologist
Textile-Colour Technologist

2117-199 OTHER PHYSICAL SCIENCE TECHNOLOGISTS

This group includes physical science technologists, not elsewhere classified; for example, those who assist in various stages of physical-metallurgy research. A typical example of an occupational title covered by this residual group definition is,
Physical-Metallurgical Technologist(prof. & tech., n.e.c.)

Physical Sciences Technicians 2117-240 through 2117-299

2117-240 ASSAYER(prof. & tech., n.e.c.) DPT:231
GED: 4 SVP: 6 EC: I PA: L 4 5 6 7

Tests ores and alloys, and analyzes test results to determine value and properties of precious metals, using chemical solutions and chemical or physical laboratory equipment:

Separates precious metals from dross materials by solution, flotation or other liquid processes, or by dry methods such as application of heat. Weighs residues on balance scale to determine proportion of pure gold, silver, platinum and other precious metals. Supervises and co-ordinates the activities of workers engaged in sampling, grinding and tending furnaces, and writes reports.

May test and analyze certain types of precious metals and be designated; for example,
Gold-and-Silver Assayer

2117-244 WATER-PURIFICATION TECHNICIAN(waterworks) DPT:261
GED: 4 SVP: 6 EC: I 7 PA: S 4 5 6 7

Performs laboratory tests, according to prescribed procedures, for quality and process control in public water-purification plant:

Sets up and adjusts laboratory apparatus such as, agitators, centrifuges and condensers. Analyzes water samples to determine condition, and amount of chemical treatment required. Determines acidity and colour of water by standard colour-reaction tests. Tests water samples in various stages of purification to determine amounts of impurities in water using conductivity meter and other testing apparatus. Performs qualitative test on raw chemicals used in purification process to ensure that they meet prescribed specifications and standards. Conducts advanced investigation into more economical purification methods and procedures in conjunction with chemists or engineers. Prepares chemical solutions according to standard formulae. Records test results on prescribed forms and writes tests reports describing procedures used. Prepares graphs, charts and reports, when required. Cleans and sterilizes laboratory apparatus, as required.

2117-248 CHEMICAL TECHNICIAN(prof. & tech., n.e.c.)
DPT:361
GED: 4 SVP: 6 EC: I 5 6 7 PA: L 4 5 6 7

Carries out a limited number of technical functions in chemistry, primarily in relation to operation, maintenance and quality and process control activities:

Performs duties as described under master title, 02-210 PHYSICAL SCIENCES TECHNICIAN (prof. & tech., n.e.c.). Sets up and operates small-scale chemical pilot-plant equipment, under laboratory conditions, for testing chemical methods and processes, following specifications and guidance from research chemists and engineers. Mixes chemical solutions, as directed, for use in tests. Tests compounds used in various processes for strength, specific gravity and other factors. May be concerned with a particular technical activity related to chemistry and be designated accordingly; for example, Chemical-Laboratory Technician(chem., n.e.c.)
Household-Products Technician(chem., n.e.c.)
Laboratory Tester
Pilot-Control Operator(chem., n.e.c.)
Quality-Control Technician(chem., n.e.c.)

2117-252 GEOLOGICAL TECHNICIAN(prof. & tech., n.e.c.)
DPT:361
GED: 4 SVP: 6 EC: B 4 6 PA: M 2 3 4 7

Carries out a limited number of technical functions in geology, primarily in relation to analysis, maintenance and repair activities:

Performs duties as described under master title, 01-210 PHYSICAL SCIENCES TECHNICIAN (prof. & tech., n.e.c.). Assists in analyzing rocks and minerals, using gravimetric, titrimetric and other instruments to provide compositional data for scientists engaged in geological, mineralogical and geochemical studies. Performs preliminary classification studies of various fossilized-life forms found in geological formations, according to chronology and genus. Prepares and collects geological samples for analysis, during field expeditions. Maintains and repairs equipment, using hand and power tools and referring to schematic diagrams of equipment. May be concerned with a particular aspect of geology and be designated accordingly; for example, Geochemical Technician
Technical Assistant, Geology

2117-256 HYDROLOGY TECHNICIAN(prof. & tech., n.e.c.)
DPT:361
GED: 4 SVP: 6 EC: B PA: M 4 7

Carries out a limited number of technical functions in hydrology, primarily in relation to measurement, quality control and maintenance activities:

Performs duties as described under master title, 01-210 PHYSICAL SCIENCES TECHNICIAN (prof. & tech., n.e.c.). Lowers flowmeter into moving water to obtain rate of flow at surface and at various depths. Verifies the accuracy of automatic water-level recorders by calibrating them against readings obtained from portable flowmeters. Computes mean cubic-foot-per-second flow, using arithmetic tables and water-flow tables. Prepares graphs, charts and other hydrographic data to depict trends in water-flow pattern at metering stations. Obtains water samples for laboratory analysis using monometer tube and other equipment. Measures water levels in designated wells to ascertain water storage in ground and effect of rainfall. Repairs or replaces defective recorders.

2117-260 METEOROLOGICAL TECHNICIAN(prof. & tech., n.e.c.)
DPT:361
GED: 4 SVP: 6 EC: B PA: L 4 7

Carries out a limited number of technical functions in meteorology, primarily in support of operational activities to provide information for weather reports and forecasts:

Observes and reports, at periodic intervals, temperature, pressure, humidity and wind speed and direction, using hydrogen-filled balloons, radiosondes and other meteorological instruments. Takes observations of clouds including type, height and amount and the presence or absence of snow or rain. Plots weather charts recording isobars, isotherms, temperatures and other data received from radiosondes and transmitted to ground stations, or provides data for plotting by computer. Transmits information to weather-forecast centres throughout world, using international code.

May make observations of sea ice from specially-fitted aircraft, using mapping and doppler navigational radar, high-speed computers and closed television-monitoring systems. May grid and position photographs from satellites in orbit around the earth and prepare location data of orbits passing over their operational areas and compute time of orbits. May plot and analyze charts and graphs to provide special meteorological data for research scientists in cloud seeding, air turbulence, statistical studies and other fields. May provide special transcripts or verbal reports of data, using graphs, charts and publications, for newcasts or airlines. May be concerned with obtaining and processing data in specific areas of meteorological science and be designated accordingly; for example,

Chart Plotter
Climatological Technician
Ice Observer
Satellite Technician
Upper-Air Technician

2117-264 LABORATORY PHYSICAL SCIENCE TECHNICIAN(prof. & tech., n.e.c.)
DPT:361
GED: 4 SVP: 6 EC: I 5 7 PA: L 4 5 6 7

Carries out a limited number of technical functions in physics, primarily in relationship to operation, maintenance and quality-control activities:

Performs duties as described under master title, 01-210 PHYSICAL SCIENCES TECHNICIAN (prof. & tech., n.e.c.). Sets up and operates tensile strength testers, plastometers, hydraulic presses and other special test equipment to test wood, metal, rubber, plastic, glass, ceramic and other products. Examines metal and alloy samples, with ultrasonic, cyclograph and magnetic flux equipment to detect internal fractures, impurities and similar defects, and to sort and grade metal. Tests samples in pressure devices, hot-acid baths and other apparatus to determine strength, hardness, elasticity and other characteristics of metal. Maintains and repairs test equipment, using hand and machine tools and manufacturer's schematic diagrams for guidance.

May be concerned with a particular technical aspect of physics and be designated accordingly; for example, Heat-Metal Technician(iron & steel)
Physical Tester, Ceramics
Rubber-Laboratory Technician(rubber)

2117-268 TEXTILE TECHNICIAN(prof. & tech., n.e.c.)
DPT:361
GED: 4 SVP: 6 EC: I PA: L 4 7

Examines, measures, photographs and tests synthetic fibre samples to facilitate quality control of forming, treating and texturing processes, performing any combination of the following duties:

Dips several twisted threads in melted wax and directs stream of cold water over thread to congeal wax. Slices threads crosswise, using microtome. Dissolves wax, using solvent, and positions thread sample on microscopic slide. Inserts slide in microscope and photographs sample, using standard photographic techniques. Develops, prints, labels photographs for examination of structure and other characteristics of thread. Determines tensile strength of thread samples, using device that draws material between two jaws until breakage occurs. Measures cross-sectional area of thread samples, using planimeter. Operates winding machine to wind textile sample packages (bobbins) or skeins for subsequent tests. Operates knitting machine to knit tubes (hose samples) for dye-testing purposes. Immerses sample in water, corrosives, or cleaning agents to detect shrinkage or damage. Places thread samples in dye bath to evaluate permeability of dye, and exposes samples to controlled light sources to ascertain fade resistance. Measures other yarn characteristics, such as friction coefficient and tension variables, using electronic measuring devices with automatic read-out facilities. Prepares and submits reports of findings to production personnel to facilitate quality control of product. See also definition for term title, 02-410 TECHNICIAN (prof. & tech., n.e.c.).

May be concerned with a particular aspect of textile production and be designated accordingly; for example, Process-Laboratory Operator
Synthetic-Fibre-Sample Tester

2117-272 GEOPHYSICAL-EQUIPMENT OPERATOR,
AIRBORNE(prof. & tech., n.e.c.) DPT:362
aerial-survey operator
 GED: 4 SVP: 6 EC: B 2 3 4 PA: M 4 7

Operates electronic equipment in aircraft to obtain and record geophysical data to be analyzed and used by others, and services electronic equipment between flights:

Calibrates magnetometers, scintillometers, infra-red and other sensors in aircraft prior to flight to ensure that they are prepared for operation. Signals pilot, by intercommunication, that equipment is ready for use, and awaits signal from pilot to begin recording of survey data. Starts equipment, when ordered, and ensures that marking pens and other recording devices are functioning properly. Records data in operational log, noting special settings required by instructions or unusual observations, using pencil and tape recorder. Reviews and summarizes data upon completion of flight. Removes recorded tapes from each instrument and examines data for clarity and completeness. Services equipment, as required, after making systematic examination of each piece, checking functioning of camera shutter, examining for damaged or worn parts and repairing or replacing them in accordance with service manuals.

2117-276 GEOPHYSICAL TECHNICIAN(prof. & tech., n.e.c.)
 DPT:362
 GED: 4 SVP: 6 EC: B PA: L 4 5 6 7

Carries out a limited number of technical functions in geophysics and petroleum geology, primarily in relation to installation, operation, maintenance and repair:

Performs duties as described under master title, 01-210 PHYSICAL SCIENCES TECHNICIAN (prof. & tech., n.e.c.). Directs positioning of instrument truck containing portable seismographic equipment such as, seismometers, amplifiers and recording oscillographs at predetermined location. Verifies distribution of seismometers over area adjacent to previously drilled blasting holes. Directs laying-out and connecting of electrical cables between seismometers and recording truck. Sets-up telephone or short-wave-radio communication systems between recording truck and shooting units. Operates audio-and-video-reproduction equipment to process seismic-wave field recordings for analysis by other personnel. Places recordings on reproduction equipment and moves controls to align recordings against time-base markings. Advances or retards position of waveforms as seen on oscilloscope or other indicator by adjusting controls and reproduces corrected recordings on photographic film for subsequent analysis. Develops negatives of photographically recorded sound waves, and prints photographic charts in portable darkroom. Repairs defective equipment, using instrument maker's hand tools and other diagrams and equipment.

May be concerned with a particular aspect of geophysics or petroleum geology and be designated accordingly; for example, Observer, Seismic Prospecting Section-Plotter Operator(oil & nat. gas)

2117-299 OTHER PHYSICAL SCIENCES TECHNICIANS

This group includes technicians, not elsewhere classified, who perform technical functions, as described under master title, 01-210 PHYSICAL SCIENCES TECHNICIAN (prof. & tech., n.e.c.) in a variety of activities related to physical science for example; those who assist in the installation, operation, maintenance and repair of equipment associated with physical metallurgical research. A typical example of an occupational title covered by this residual group definition is:

Physical-Metallurgical Technician(prof. & tech., n.e.c.)

2119-OCCUPATIONS IN PHYSICAL SCIENCES, N.E.C.

This unit group includes occupations, not elsewhere classified, concerned with research in the physical sciences, and with other physical-science related activities; such as, examining and testing firearms; exploring regions to discover mineral deposits; examining and analyzing written documents; and helping to prepare rock and fossil specimens for laboratory examinations. Metallurgists, other than physical

metallurgists, are classified in Unit Group 2151, METALLURGICAL ENGINEERS.

2119-110 METALLURGIST, PHYSICAL(prof. & tech., n.e.c.)
 DPT:031
 GED: 6 SVP: 8 EC: I 3 6 7 PA: L 4 7

Conducts research to investigate properties of metals, develop alloys, and advises on uses and methods of production:

Observes, measures and records data related to experiments on metals or metal combinations that will perform under extremes of temperature and effects of friction and corrosion, using a variety of testing and measuring equipment. Conducts microscopic, X-ray, X-ray diffraction and spectrographic studies of metals and alloys to determine physical characteristics, such as crystalline structure, dispersion of alloy particles through basic metal, presence of impurities, fractures and other defects. Evaluates variables which influence physical and thermoelectric properties of exotic or unusual metals, such as beryllium, zirconium, columbium and molybdenum. Studies effect of radiation on metals exposed to space environment and nuclear reactors; the joining of diverse materials to form complex structures and the application of metals to optics, vacuum tubes, cryogenics and other systems. Conducts experiments in powder metallurgy and the process of compressing metallic powders and sintering them at high temperatures. Evaluates properties of metals during processes, such as rolling, extruding, casting, forming, welding, corrosion protection, alloying, heat and mechanical treatments to obtain optimum results at minimum costs. Determines type of metal to be used from a design and fabrication standpoint, taking into consideration magnetic and electronic properties, such as strength, weight, temperature resistance and rigidity. Advises on shortcomings of metals in use, and anticipated use. Tests alloys in tension, compression, impact bending and fatigue devices, to study their engineering properties and ensure compliance with prescribed standards. Develops hot-working and cooling processes to obtain desired characteristics, such as hardness, grain size, heat resistance and strength. Gathers documents and other technical information through searches of publications, attendance at technical society meetings and visits to other departments or plants. Consults with engineers and company officials, to develop methods of manufacturing alloys at minimum cost, minimize air pollution, and develop and implement inspection and testing procedures. Supervises and co-ordinates the work of technologists and technicians, and trains mill testers and inspectors in the performance of their duties. May specialize in a particular area of physical metallurgy and be designated accordingly; for example, Metallographer Research Metallurgist

2119-114 FIREARMS EXAMINER(gov. serv.) DPT:261
 GED: 4 SVP: 7 EC: I 6 PA: L 4 5 7

Examines and tests firearms, bullets and cartridge cases, to determine if exhibit bullet and cartridge were fired from a specific firearm: Sorts, marks, labels and records exhibits received for identification and record purposes, following established procedures. Examines, manipulates and operates firearm to determine make, model, manufacturer's name and mechanical condition. Fires test bullets into test equipment and retrieves, examines and compares bullets and cartridge cases with exhibits to determine if they came from the same weapon, using microscope. Examines and compares tools and tool marks and takes comparative photographs. Examines effaced stampings on metal objects, cleans and polishes damaged area, to restore serial numbers using electro-acid etching techniques. Keeps record of all tests performed on exhibits and conclusions reached, for information of investigating police, and for presentation of conclusions to court. Prepares and presents lectures to police personnel on firearms, and the collection and preservation of evidence.

2119-118 PROSPECTOR(mining and quarrying) DPT:281
 GED: 4 SVP: 7 EC: O 6 PA: H 3 4 6 7

Explores likely regions to discover mineral deposits, using topographical maps, surveys and reports, and utilizing a knowledge of geology and mineralogy:

Examines outcrops, floats and stream channels for mineral content. Drills, dynamites or digs trenches or pits along rock formations or creek beds to obtain rock samples. Breaks off samples and tests them for presence of minerals with heat, acid, magnifying glass, or by pulverizing, washing or panning. Assays samples for preliminary quantitative estimates, visually or with geiger counter. Collects data on

rock formations, using geophysical instruments and devices, such as geiger counters, scintillometers and electronic sounding equipment. Draws maps to record data and determines feasibility of staking and developing claim. Stakes claim in accordance with provincial and federal legal requirements.

May develop mineral deposits by means of placer and hard-rock mining. May sell interests in discovered area.

2119-122 DOCUMENT EXAMINER(gov. serv.) DPT:281
GED: 4 SVP: 6 EC: I PA: S 4 7

Examines and analyzes handprinted, handwritten, typewritten or stamped documents, to determine authenticity of document, discover its author and decipher obliterated writings, impressions and markings:

Checks list of exhibits to ensure each item is received and marks them for identification and continuity of possession, in accordance with established procedure. Examines handwritten documents to identify or eliminate known writing with that being questioned, determine probable source, individual characteristics, degree of disguise and method of execution, using magnifying glass, microscope and light filters. Examines typewriters, cheque writers and typewritten documents, comparing type characteristics with impressions made to

determine make and model of equipment used. Treats stamped impressions, carbon paper, torn, aged, charred, blood stained, chemically or otherwise damaged documents, to preserve exhibit, restore text and enable decipherment, using microscopic and infra-red photographic techniques, muffle furnace (controlled heat) and stabilizing chemicals. Compares pens, pencils, inks, crayons and ink impressions with standards to identify type of writing instrument utilized with questioned handwritten detail, using ultraviolet and infra-red light filters, microscope and other test equipment. Prepares notes, sketches, photographs and illustrations, describing methods used, results obtained and conclusions reached. Attends court to present conclusions and uses displays to defend reasons for arriving at these conclusions.

2119-126 PALEONTOLOGICAL-LABORATORY
HELPER(prof. & tech., n.e.c.) DPT:384
GED: 3 SVP: 4 EC: I PA: L 4 7

Helps prepare rock or fossil specimens for laboratory examination: Records receipt of rock samples, cores and cuttings from oil and gas wells or boreholes. Washes or pulverizes specimens to remove extraneous matter. Classifies, sacks and labels samples. Mounts samples for microscopic examination. See also definition for term title, 02-160 HELPER (any ind.).

213-OCCUPATIONS IN LIFE SCIENCES

This minor group includes occupations concerned with research to increase the basic knowledge of all living organisms and the practical application of this knowledge in such fields as biology, zoology, bacteriology, pharmacology and agricultural science. Occupations concerned with providing technical support in life sciences research are included. These occupations are classified in the following unit groups:

- 2131** Agriculturists and Related Scientists
- 2133** Biologists and Related Scientists
- 2135** Life Sciences Technologists and Technicians
- 2139** Occupations in Life Sciences, n.e.c.

2131-AGRICULTURISTS AND RELATED SCIENTISTS

This unit group includes occupations concerned with conducting research into the growth, genetics and viability of plants and animals, and the nature and composition of soils, to extend the knowledge of the science of agriculture and horticulture, and apply this knowledge to the development, propagation and conservation of plants and animals. Typical specializations include studying the location, characteristics and composition of soils; supervising controlled-breeding experiments on plants and animals to ensure higher quality and yield; developing new methods and techniques for the processing and storing of agricultural products; and advising on operation and economics of farms.

2131-110 AGRICULTURAL SCIENTIST(prof. & tech., n.e.c.) DPT:031
agriculturist; agrolologist.
GED: 6 SVP: 8 EC: B PA: S 5 6 7

Conducts research and experimentation in soil composition and use, live-stock and vegetable farming techniques, farm management and agricultural economics, and applies them to the practise of agriculture: Analyzes and classifies soils to determine composition, arability and additional nutrients required for a particular crop. Studies the feasibility of crop or livestock farming in a particular area, by conducting surveys to ascertain availability of markets, potential market prices and other economic variables. Develops new methods of harvesting, processing and transporting fruits and vegetables to minimize waste and spoilage. Teaches, demonstrates and develops new methods of cultivation, fertilization, production and conservation

of range and farm lands. Identifies vegetable and animal pests, and suggests methods of control. Investigates milk production to maintain a standard of quality of dairy products, and protection systems to ensure proper care of cattle and equipment. Studies current techniques of raising animals, poultry and bees, to implement or advise on new developments in animal husbandry. Supervises and co-ordinates the work of technologists and technicians.
May evaluate agricultural land for tax purposes.

2131-114 ANIMAL SCIENTIST(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: B PA: S 5 6 7

Conducts research in animal genetics, advanced animal husbandry methods and related matters, and applies knowledge in selection, breeding, feeding, management and marketing of dairy, beef and dual-purpose cattle, horses, poultry, sheep, hogs and goats: Conducts experiments in controlled breeding to produce improved strains of off-spring, with desired characteristics of fertility, rate and efficiency of growth and greater resistance to disease. Conducts experiments to determine feed requirements of animals and nutritive value of feed materials. Investigates effects of different types of feed and new environmental conditions on the productivity and health of animals, as related to quality and quantity of the food value and fibre produced. Advises on improved methods or developments in housing and sanitation, animal parasite and disease control, meat slaughtering, product preparation and storage. Supervises and co-ordinates the work of technologists and technicians.
May be concerned with a specific type of animal, or a particular aspect of animal science and be designated accordingly; for example, Animal Geneticist
Animal Nutritionist
Poultry Scientist

2131-118 FOOD SCIENTIST(prof. & tech., n.e.c.) DPT:031 GED: 6 SVP: 8 EC: I PA: L 4 5 6 7

Conducts research into development, processing, preservation, and distribution of new or existing food products:
Analyzes food for its chemical constituents by determining such factors as vitamin, protein, fatty acid and cholesterol content. Studies effects of condensation, dehydration, sterilization, pasteurization, homogenization, emulsification and freezing as applied to processing of food products especially on flavour, colour, texture and nutritive value. Develops new methods for cultivating, preserving, controlling or eliminating micro-organisms which have a direct bearing on problems of food preservation, spoilage, and fermentation. Supervises operation of test kitchens and pilot plants to determine best method of preparation by consumer and the most economical method of production. Advises on modifications to existing equipment to produce the new product. Develops food quality-control methods for use in production runs. Supervises test packaging of products from pilot plant for sampling by consumers. Prepares, or supervises the preparation of, scientific papers dealing with subjects in food science. Supervises and co-ordinates the work of technologists.
May be concerned with a particular aspect of food science and be designated accordingly; for example,
Food Analyst
Food Engineer
Food-Research Scientist
Product-or Package-Research Officer
Quality-Control-Research Officer

2131-122 PLANT SCIENTIST(prof. & tech., n.e.c.) DPT:031 agronomist. GED: 6 SVP: 8 EC: B PA: S 5 6 7

Conducts experiments with wheat, corn, potatoes and other vegetable and field crops, soil suitability and new growing and breeding methods, to ensure higher yield, improved quality and increased production:
Conducts breeding studies at research stations, institutes or farms to develop and improve yield, quality, adaptation to specific soils, climatic conditions, resistance to diseases of grains, vegetables and other field crops. Studies crop production to determine most effective means of planting, cultivating and harvesting. Develops methods of control of noxious weeds, crop diseases and insect pests. Analyzes soil to determine composition and suitability for particular plants. Prepares advisory bulletins and disseminates educational information on crops, to growers. Acts as liaison officer between government experimental agencies, universities and contract growers with respect to technical developments in agriculture. Supervises and co-ordinates the work of technologists and technicians.
May be concerned with a specific aspect of agronomy and be designated accordingly; for example,
Crop-Research Scientist
Crop Scientist

2131-126 SOIL SCIENTIST(prof. & tech., n.e.c.) DPT:031 GED: 6 SVP: 8 EC: I PA: S 4 5 6

Investigates, studies and observes location, characteristics, behaviour and composition of soils in order to improve soil management, ensure soil conservation, classify soil types and increase soil productivity and fertility:
Studies composition of soil to determine microbial population, content of organic matter, fertility, and presence of nitrogen, oxygen and other elements. Studies physical characteristics and chemical properties of soils to determine capabilities and limitations of potential growth, water absorption capacity, degree of acidity and texture. Classifies soil management practices, and studies their effects on long-range productivity of soil. Conducts experiments on farms, at research stations or institutes to determine best soil types for specific plants. Investigates problems of strip cropping, contour ploughing and terracing and other soil conservation practices, to reduce soil and mineral erosion, and to retain sufficient water supplies for proper irrigation. Rebuilds deteriorated, over-acidic and barren soils by stabilizing runoff, and applying green manure crops, lime, nitrates, compost residue and other nutrients and fertilizers. Supervises and co-ordinates the work of technologists and technicians.
May advise rural residents on land use and soil management. May

examine problems of layering and drainage of soils used in foundations for roads, dams, buildings and other structures. May direct soil surveys to plot boundaries of deposits, on maps. May be concerned with a particular aspect of soil science and be designated accordingly; for example,
Agrogeologist
Soil Conservationist
Soil-Fertility Expert

2131-130 HORTICULTURIST(prof. & tech., n.e.c.) DPT:131 GED: 5 SVP: 8 EC: B PA: L 4 5 6 7

Conducts experiments and studies and observes the characteristics of fruits and flowers in order to develop and improve plant varieties, production methods and breeding techniques, determine the effects of environmental conditions on plant propagation and growth, and improve the quality and yield of the harvest:
Conducts studies to improve resistance to disease and insect pests, reduce soil erosion, determine adaptability to different soils and climates, and increase yield and quality of fruit and nut trees, flowers, shrubs, vegetables and other horticultural plants. Conducts experiments to achieve optimum viability, strength and growth, using enriched seed, fertilizers, plant hormones, and different planting, spraying, cultivation, rotation, drainage and irrigation methods. Applies such breeding techniques as bud and scion grafts and cross-pollination to develop new strains and to introduce to a particular plant, new variances of colour, size, taste, texture and other characteristics. Analyzes production problems, and develops disinfecting, refrigeration, cauterization, shipping tubes, strong boxes and other equipment and methods to reduce damage, spoilage and waste, and to increase storage life, transportation range and seasons of availability. Classifies plants according to their ornamental, medicinal, nutritional and other values. Supervises and co-ordinates the work of technologists and technicians.
May supervise landscape operations and provide technical advice regarding vegetative growth as it affects highway construction and maintenance. May be concerned with a particular plant, group of plants, process or technique, and be designated accordingly; for example,
Horticultural-Products Specialist
Horticultural Taxonomist
Olericulturist
Ornamental Horticulturist
Pomologist
Research Horticulturist, Breeding
Research Horticulturist, Production

2131-134 FIELD SERVICE MAN(prof. & tech., n.e.c.) DPT:231 GED: 5 SVP: 8 EC: B PA: L 4 5 6 7

Advises farmers on general care of animals and poultry, crops, nutrition, disease prevention and care:
Visits farms to inspect stock and discuss growth and production rates, diseases and feeding problems. Advises farmers on various problems connected with growing and cultivating a particular field crop. Selects, kills and performs post-mortems on diseased poultry to study disease and its effect. Takes samples of plant and farm grain, animal feed and forage for laboratory analysis. Recommends other methods to improve care of stock or increase fertility of crops. Advises and assists farmers in securing veterinary services. Supervises and co-ordinates the work of technologists and technicians. Supervises programs assigned by nutritionists to determine feed conversion and costs.

2133-BIOLOGISTS AND RELATED SCIENTISTS

This unit group includes occupations concerned with conducting basic and applied research into all forms of living organisms and vital processes, and their relationship to each other and to their environment; studying origin, development, growth, reproduction, structure, function, distribution and other life phenomena, of a single species or community of species. Occupations in this unit group supplement their own field of competence by applying principles, methods, and findings of other scientific disciplines, particularly chemistry, physics and mathematics. Typical specializations include

bacteriology, botany, zoology, pathology, pharmacology, physiology, biochemistry and biophysics.

Botanists and Zoologists
2133-110 through 2133-126

2133-110 AQUATIC BIOLOGIST(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: 1 6 PA: S 4 7

Conducts research into origin, relationship, development and functions of plants and animals that live in water: Plans field and laboratory studies of origin, development and functions, structure, distribution, environment, inter-relationship and other aspects of plants and animals that live in water. Observes characteristics and behaviour of water plants and animals in their natural environment. Identifies, classifies and preserves specimens and prepares collections to assist in studies. Examines biological specimens in laboratory employing such techniques as microscopy and photography. Co-ordinates and evaluates data obtained and prepares, or supervises preparation of, reports and scientific papers. Supervises and co-ordinates the work of technologists and technicians. May study plants and animals living in fresh or salt water and the environmental conditions affecting them and be designated accordingly; for example, Limnologist Marine Biologist

2133-114 BOTANIST(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: 1 6 PA: S 4 7

Conducts research into physiology, heredity, environment, distribution, structure and economic value of plants for application in agriculture, forestry, horticulture and medicine: Studies effect on distribution and type of plant growth of environmental elements, such as rainfall, temperature, sunlight, soil, elevation and diseases. Grows plants under controlled conditions to determine best soil, climate and other environmental conditions. Selects, tests and crossbreeds plants to obtain optimum qualities and quantities of plants, for use as food, drugs, fibres and other purposes. Studies nature of chromosomes, cells and tissues of plants using special staining techniques, microscopes, and other scientific equipment. Dissects plants under microscope to identify and accurately classify flower, leaf or whole plant. Studies relationship of environmental conditions to storage life of fruit, plants and vegetables. Prepares reports and studies for use by other agricultural and biological scientists. Supervises and co-ordinates the work of technologists and technicians. May explore little-known areas to search for, identify and classify new species of plants. May be concerned with one particular aspect of botanical science and be designated accordingly; for example, Economic Botanist Plant Ecologist Plant Taxonomist

2133-118 ENTOMOLOGIST(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: 1 6 PA: S 4 7

Conducts research into the classification, life cycle and habits of insects and allied forms of life: Identifies and classifies all species of insects and allied forms of life, such as spiders, grasshoppers, aphids, termites and worms. Conducts research into insect physiology to determine manner in which insect organisms function. Studies insect distribution and habitat and recommends methods to prevent importation and spread of injurious types. Develops means to encourage growth and spread of beneficial insects. Conducts experiments into cause and control of insect diseases. Investigates factors affecting yield of nectar and pollen on various plants utilized by insects as food. Devises methods to control or eliminate harmful insects by developing new or improved insecticides and biological methods, including the use of viruses, predators and parasites. Conducts field and laboratory tests of pesticides and evaluates their effect on different species of insects and on the same species under different conditions. Improves bee and insect strains, utilizing selective breeding by artificial insemination. Supervises and co-ordinates the work of technologists and technicians. May be concerned with specializations such as silk-worm and bee culture and be designated accordingly; for example,

Apiculturist
Sericulturist

2133-122 MYCOLOGIST(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: 1 6 PA: S 4 7

Conducts research studies into physiology of edible, poisonous, saprophytic and parasitic fungi to discover those useful to medicine and industry: Studies morphology, taxonomy, physiology, ecology and pathology of fungi by collecting spores from fungi, placed in sterile container under aseptic conditions, to prevent contamination by airborne moulds. Transfers spores, under aseptic conditions, to sterile medium, incubates spore cultures, and transfers them to sterile bottles to develop into full grown spawn. Studies effects of fungi on growth and yield of various crop plants. Applies findings to agriculture, medicine and industry for development of drugs, medicines, moulds, yeasts and other useful products. Supervises and co-ordinates the work of technologists and technicians.

2133-126 ZOOLOGIST(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: 1 6 PA: S 4 7

Conducts research into origin, physiology, classification, habits, diseases, ecology and distribution of all forms of animal life and life processes, to increase the body of scientific knowledge and to develop practical applications in such fields as agriculture and medicine: Studies animals and fish in natural habitat, to discover the ways in which animals influence and are themselves influenced by their environment. Collects specimens for laboratory study and zoological collections. Interprets data concerning habits, such as growth, migration, food and natural enemies, and devises methods to control them. Dissects and examines specimens, under microscopes, and uses chemicals and various types of scientific equipment to carry out experiments and studies. Collects and preserves specimens or prepares microscopic slides for such purposes as identification and development of species, and study of disease. Studies marine life lacking a vertical column (backbone). Studies functions of animal organisms and their development from the egg or embryo. Prepares, or supervises preparation of, laboratory reports or scientific papers on a particular aspect of zoological science. Supervises and co-ordinates the work of technologists and technicians. May be concerned with a particular species of animal or with a particular specialty and be designated accordingly; for example, Animal Ecologist Animal Taxonomist Herpetologist Ichthyologist Invertebrate Zoologist Mammalogist Ornithologist

Bacteriologists and other Microbiologists
2133-146 through 2133-174

2133-146 BACTERIOLOGIST(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: 1 PA: S 4 7

Conducts research into nature and characteristics of bacteria to increase scientific knowledge and develop medical, industrial, and other practical applications: Identifies bacteria by microscopic examination of physiological, morphological and cultural characteristics. Observes action of bacteria upon living tissues of plants and animals, and on dead organic matter. Classifies bacteria and conducts research and laboratory experiments to study basic biochemical, physiological and genetic aspects of living systems. Isolates and makes cultures of significant bacteria in prescribed or standard inhibitory media, controlling such factors as moisture, aeration, temperature and nutrition. Performs chemical analyses of acids, alcohols, enzymes and other substances produced by bacteria on organic matter. Provides a service to other scientists and to physicians in the diagnosis, prophylaxis and therapeutics of infections in humans and animals. Prepares, or supervises the preparation of, scientific papers dealing with a particular aspect of bacteriology. Supervises and co-ordinates the work of technologists and technicians. May conduct experiments to detect presence of harmful or pathogenic bacteria in water, food or in the general environment of a community, to control possible sources of pollution or contagion. May conduct research into the nature and characteristics of bacteria causing diseases

in animals. May be concerned with a particular aspect of bacteriology and be designated accordingly; for example, Public-Health Bacteriologist(gov. serv.) Veterinary Bacteriologist

2133-150 FISHERY BACTERIOLOGIST(prof. & tech., n.e.c.) DPT:031

GED: 6 SVP: 8 EC: I 6 PA: S 4 7

Conducts research into the nature and characteristics of bacteria found in fish and shellfish products and by-products and identifies those detrimental to public health: Performs duties similar to those of 2133-110 BACTERIOLOGIST (prof. & tech., n.e.c.). Participates in establishment and field surveys and investigational work and provides processors with advisory and technological information in order to improve product quality, water quality and plant sanitation. Ascertains the effectiveness of chemicals and bacteria which are not toxic to fish. Modifies or adapts available procedures, plans the approach to assigned problems and prepares detailed progress and other reports. Studies ecology, physiology, morphology and pathogenicity of bacteria identified with the diseases of fish.

2133-154 FOOD BACTERIOLOGIST(prof. & tech., n.e.c.) DPT:031

GED: 6 SVP: 8 EC: I 6 PA: S 4 7

Conducts research into nature and characteristics of bacteria in the manufacture, spoilage, poisoning and deterioration of food products including dairy: Performs duties similar to those of 2133-110 BACTERIOLOGIST (prof. & tech., n.e.c.). Isolates cultures and identifies bacteria causing decomposition of food products. Investigates viability and activities of bacteria in canned, frozen, pickled and preserved foodstuffs, and in conversion and refining processes of starch, sugar and other products. Observes effects of changing temperatures, and other conditions, on activities of bacteria. Prepares tables and reports concerning effect of bacteria on flavour, body-age and keeping- qualities of cheese and other dairy products. Determines how contamination occurs and investigates methods of preventing contamination, or inhibiting development of objectionable bacteria, including use of acids and other chemical preservatives. Studies metabolism of bacteria and biosynthesis of toxins and mode of action of toxins involved in food poisoning. May be concerned with dairy bacteriology only and be designated accordingly, Dairy Bacteriologist

2133-158 INDUSTRIAL BACTERIOLOGIST(prof. & tech., n.e.c.) DPT:031

GED: 6 SVP: 8 EC: I 6 PA: S 4 7

Conducts research into the nature and characteristics of beneficial or destructive bacteria in the manufacture of industrial products: Performs duties similar to those of 2133-110 BACTERIOLOGIST (prof. & tech., n.e.c.). Investigates synthesis abilities of specific bacteria under a variety of experimental conditions to determine most efficient method for mass production of industrial substances dependent on action of bacteria, for their manufacture and processing, such as industrial and beverage alcohols, amino acids, glycerine, antibiotics, acetone and yeast. Conducts experiments to determine methods of inhibiting or removing, from the environment, harmful bacteria occurring in various fermentation processes, such as, leather tanning, retting of natural fibres and manufacture of alcohol. Performs research to discover best methods of using bacteria to reduce organic industrial waste to useful substances, such as alcohol, amino acid, glycerine, antibiotics, vitamins and protein. Tests various acids and other chemicals for their effectiveness in inhibiting growth of bacteria, causing deterioration in paper, wood, cloth, food and drugs and other materials of organic origin.

2133-162 MEDICAL BACTERIOLOGIST(prof. & tech., n.e.c.) DPT:031

GED: 6 SVP: 8 EC: I 6 PA: S 4 7

Conducts research into nature and characteristics of pathogenic bacteria to identify types and strains found in man and animals: Performs duties similar to those of 2133-110 BACTERIOLOGIST (prof. & tech., n.e.c.). Makes laboratory cultures of pathogenic

bacteria in special or standard media, identifying strains, types and characteristics. Conducts examinations of bacteria, using microscope equipment, serological, immunological, animal inoculation and fluorescent antibody methods and techniques. Tests virulence of pathogenic bacteria by observing effects of inoculations on laboratory animals. Investigates efficacy of chemotherapeutic treatments, antibacterial and antitoxic serums, vaccines, disinfectants and antibodies in prevention, treatment and cure of diseases by tests on laboratory animals. Compares and combines laboratory findings with clinical data supplied by hospitals and medical practitioners with respect to human illnesses.

May be concerned with research and development of immunizing agents and serums and be designated accordingly; for example, Immunologist Serologist

2133-166 MICROBIOLOGIST(prof. & tech., n.e.c.) DPT:031

GED: 6 SVP: 8 EC: I PA: S 4 7

Conducts research into nature and characteristics of viruses, algae, protozoa and other micro-organisms to increase scientific knowledge and develop industrial, medical and other practical applications: Studies the form, structure, reproduction, physiology and metabolism of micro-organisms and the products of their chemical activity. Examines the distribution of micro-organisms in nature, their relation to other living things and their reaction to chemical and physical factors in the environment. Identifies micro-organisms by microscopic examination of their physiological, morphological and cultural characteristics. Observes action of micro-organisms upon living tissue of plants and animals and other micro-organisms. Analyzes substances such as acids, alcohols and enzymes produced by micro- organisms on organic matter. Studies the growth, development and nutritional requirements of micro-organisms in their natural surroundings, and in synthetic media, observing conditions favourable for their reproduction, dissociation or destruction. Prepares, or supervises the preparation of, scientific papers dealing with a particular aspect of microbiology. Supervises and co-ordinates the work of technologists and technicians.

2133-170 PHARMACEUTICAL BACTERIOLOGIST(prof. & tech., n.e.c.) DPT:031

GED: 6 SVP: 8 EC: I PA: S 4 7

Conducts research into nature and characteristics of pharmaceutical products that depend upon action of bacteria for their formation, to discover efficient methods for their manufacture: Performs duties similar to those of 2133-110 BACTERIOLOGIST (prof. & tech., n.e.c.). Determines conditions favourable to maximum effect of specific bacteria in production of pharmaceutical products such as penicillin, streptomycin and vitamins to serve as a guide for large scale production. Prepares vaccines by making emulsion of cultured pathogenic bacteria with antisera or other inhibitory fluids. Adjusts emulsion to predetermined standards of concentration or dilution. Prepares serums and antisera by separation of serum from blood of immunized animals. Supervises and co-ordinates the work of technologists and technicians.

2133-174 SOIL BACTERIOLOGIST(prof. & tech., n.e.c.) DPT:031

GED: 6 SVP: 8 EC: I 6 PA: S 4 7

Conducts research into the nature and characteristics of bacteria in soil, on plant roots and in organic modifications of soil: Performs duties similar to those of 2133-110 BACTERIOLOGIST (prof. & tech., n.e.c.). Isolates, cultivates and identifies specific bacteria, observing ammonia production, nitrogen fixation, stimulation of sulphur and carbon cycles and denitrification and other conditions developed by their action in soils. Investigates beneficial reaction on soil of various organic matter decomposed by action of bacteria, applying bio-assay and chemical tests to organic and inorganic compounds resulting from such decomposition. Prepares and tests bacterial inoculations to increase nitrogen-fixing properties of leguminous plants, evaluating the effectiveness of commercially prepared inoculations.

Pathologists, Pharmacologists and Physiologists

2133-194 through 2133-214

2133-194 ANATOMIST(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: I 6 PA: S 4 7

Studies morphology of humans and animals to increase scientific knowledge and to develop practical applications in medicine and biology:

Examines the organs and tissues of the body, using such tools as the knife for gross anatomy, microscope for histology and embryology and the electron microscope for examining ultrastructure. Investigates the function and chemical composition of organs and tissues. Carries out experiments and investigates such anatomical characteristics and reactions as ability to regenerate damaged or destroyed parts of the body and possibility of transplanting organs and tissue from one living body to another, or organs from a cadaver to a living body. Prepares, or supervises preparation of scientific reports based on observations and experiments. Supervises and co-ordinates the work of technologists and technicians.

May be concerned with the features and phenomena exhibited in the formation and development of an embryo, or with the minute structure of tissue discernable with a microscope, and be designated accordingly; for example,

Embryologist
Histologist

2133-198 PATHOLOGIST, ANIMAL(prof. & tech., n.e.c.) DPT:031
veterinary pathologist.
GED: 6 SVP: 8 EC: I 6 PA: S 4 7

Studies nature, cause and development of diseases in animals and structural and functional changes resulting from them:

Performs duties similar to those of 2133-202 PATHOLOGIST, MEDICAL (prof. & tech., n.e.c.). Supervises and conducts tests, employing chemical, electronic, visual and other techniques to determine presence, nature and status of disease in animal populations, and probable source of contamination or infection. Recommends methods of prevention and treatment based on results of autopsies and microscopic examination of cells and fluids. Conducts studies of various vaccines and sera and outlines effective sanitation programs where animals are housed. Supervises and co-ordinates the activities of technologists and technicians employed in diagnostic laboratories and governmental, industrial and university establishments.

2133-202 PATHOLOGIST, MEDICAL(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: I 6 PA: S 4 7

Studies nature, cause and development of diseases in man and structural and functional changes caused by them:

Diagnoses, from body tissues, fluids, secretions and other specimens, presence and stage of disease, and possible source of infection, utilizing laboratory procedures. Prepares, or supervises preparation of, tissue-section from surgical and diagnostic cases and autopsies, using special stains as a means of identifying function, morphology and pathology of obscure or difficult-to-identify cells, tissues and connecting fibres. Examines tissues under microscope to determine nature, cause or progress of disease. Performs autopsies to determine nature and extent of disease, injury or other disorder, cause of death and effectiveness of treatment. Supervises and co-ordinates the work of technologists and technicians.

May act as a consultant to other scientists and medical practitioners. May direct activities of a pathology department in medical school, hospital clinic, medical examiner's office or research institute. May be concerned with a particular aspect of pathology and be designated accordingly; for example,

Clinical Pathologist
Forensic Pathologist
Haematological Pathologist
Histopathologist
Neuropathologist
Oral Pathologist
Surgical Pathologist

2133-206 PATHOLOGIST, PLANT(prof. & tech., n.e.c.) DPT:031
phytopathologist.
GED: 6 SVP: 8 EC: I 6 PA: S 4 7

Conducts research into nature, cause and control of plant diseases and applies this research to develop plant varieties resistant to disease:

Conducts plant pathology research to investigate nature of disease resistance. Selects and tests chemicals for control of plant diseases. Studies effects of chemicals on plants such as fungi, nutrition and structure of pathogens and characteristics and classification of nematodes. Investigates way in which pathogens attack, enter and kill plants. Inoculates healthy plants with culture of suspected organism taken from diseased plants and studies effects to determine organism responsible for disease. Tests disease control measures under laboratory and field conditions for effectiveness, and investigates susceptibility of different varieties of plants to the spread of disease, under varying soil and climatic conditions. Develops methods and apparatus for securing soil samples containing nematodes, and for isolating, mounting and identifying specimens. Studies losses from deterioration of perishable products in transit or storage, and develops practices to prevent or minimize losses. Studies effects of injuries to plants as a result of air pollution. Supervises and co-ordinates the work of technologists and technicians.

May inspect flower and vegetable seeds and flowering bulbs for disease, infection or insect injury. May be concerned with a particular type of plant, infection or disease and be designated accordingly; for example,

Plant Nematologist
Research-Plant Pathologist.

2133-210 PHARMACOLOGIST(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: I 6 PA: S 4 7

Studies actions of, and relationships between drugs and other substances on living organisms, and develops drugs which are useful in prevention and treatment of disease:

Performs experiments, drug dosage studies, tests and analyses to determine the effects of drugs and chemicals on metabolism, cell growth and reproduction, digestion and other life processes. Collaborates with other medical and biological scientists in testing drugs and standardizing drug dosage for medicinal use utilizing results of animal tests and knowledge gained from clinical experience. Collaborates with industrial chemists and pharmacists in development of drugs and standardization of production methods and drug potency. Analyzes substances which may be taken into the body, including food additives, industrial contaminants and drugs to determine their effect on human and animal cells, tissues, organs and life processes. Supervises and co-ordinates the work of technologists and technicians.

May specialize in a particular branch of pharmacology such as effects of drugs on particular organs of the body and the development of drugs to treat particular diseases. May be concerned with detecting and identifying harmful and poisonous substances and be designated accordingly,
Toxicologist

2133-214 PHYSIOLOGIST(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: I 6 PA: S 4 7

Conducts research on cellular structures, organ-systems, or the whole organism of plants and animals including human beings:

Studies respiration, circulation, digestion, excretion, movement, reproduction, nervous activity, and other functions under normal and abnormal conditions. Performs experiments to determine effects of internal and external environmental factors of life processes and functions of organisms, using microscopes, spectrophotometers, isotopes, X-ray equipment and computers. Studies glands and their relationship to body functions. Prepares, or supervises preparation of, physiological studies for use by other scientists. Supervises and co-ordinates the work of technologists and technicians.

May be concerned with a specialized study of cells, organs and organ systems of plants or animals and be designated accordingly; for example,
Cellular Physiologist
Human Physiologist(medical)
Insect Physiologist
Plant Physiologist
Veterinary Physiologist

Other Biological Scientists
2133-234 through 2133-258

2133-234 BIOCHEMIST(prof. & tech., n.e.c.) DPT:031
chemist, biological.
GED: 6 SVP: 8 EC: I 6 PA: S 4 7

Conducts research into the chemical reactions that take place in living organisms, to increase scientific knowledge and develop medical, industrial and other practical applications:

Performs experiments, tests and analyses to determine action of food, drugs, serums, hormones and other substances on tissues and vital processes of living organisms. Isolates, identifies and synthesizes hormones, vitamins, allergens, minerals and enzymes. Examines the formation of antibodies and conducts research into the chemistry of cells and blood corpuscles. Studies the chemistry of body processes such as breathing and digestion, and of living energy changes such as growth, aging and death. Develops new or improved methods for preservation of food and drink, and preparation of serums, vaccines and hormone, pituitary and thyroid extracts. Advises on most efficient method of water purification and sewage treatment processes. Designs experimental equipment, where appropriate, and determines experimental materials to be used. Supervises and co-ordinates the work of technologists and technicians.

May be concerned with industrial processes in production of alcoholic beverages, carbonated drinks, powdered foods and pharmaceutical products and be designated accordingly; for example,

Chemist, Enzyme
Fermentologist
Medicinal Chemist

2133-238 BIOPHYSICIST(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: I 6 PA: S 4 7

Studies the physical characteristics, principles and behaviour of macromolecules, living cells and organisms, using physical and chemical-physical concepts and methods, applies these principles to the remedy or control of biological processes and measures the interaction and effects of various forms of energy with living matter:

Studies the functions and physical mechanisms of seeing, hearing, tasting, feeling and smelling. Investigates mathematical models which describe cycles or control aspects at all levels of living tissue. Conducts research on mechanism of control by the nervous systems, including linear transmission of electrical impulses from the sensory organs to the brain, and from the brain to other organs and muscles. Studies the human brain in terms of the transfer, manipulation and storage of information, and applies this knowledge to the development of computers. Investigates the absorption and conversion of light energy, via chlorophyll or similar molecules, in the process of photosynthesis of plants, or retinene in the eye. Examines physical forces involved in molecular replication and the manner in which the characteristics of plants and animals are propagated to subsequent generations. Examines the structure and spatial conformation of proteins and determines the effects of radiation on them, using X-ray, electron microscopy and osmometry. Exposes molecules, cells and whole organisms to observe the radioactive decay of living matter. Traces circulatory system and heart action to observe physical flow properties of blood with respect to pressure, fluidity and friction, using fluid-flow meters and radioactive or chemical tracers. Applies results of research to develop laboratory and clinical equipment and techniques; such as, thermographs, X-ray treatments, isotope-scanning devices, plastic arteries and valves, artificial organs and limbs, heart-lung pump systems and respirators. Prepares, or supervises preparation of, scientific papers or articles on a particular aspect of biophysics. Supervises and co-ordinates the work of technologists and technicians. May be concerned with a particular specialty of biophysics and be designated accordingly; for example,

Mathematical Biophysicist
Medical Biophysicist
Medical-Engineering Biophysicist
Molecular Biophysicist
Physiological Biophysicist
Radiation Biophysicist

2133-242 CELL BIOLOGIST(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: I 6 PA: S 4 7

Conducts research into structure, function and development of animal, and plant bacterial cells and viruses of all types:

Studies both living and preserved cells and viruses, using bright-field, phase-contrast, fluorescent, electron and other types of microscopes. Prepares cells and tissues for microscopic study, using wax and plastic embedding, microtomes and other equipment. Stains specimens to visualize structure and indicate chemical composition. Records various stages of research revealed by microscopic examination by special cameras. Analyzes chemical composition of cells by micro-spectrophotometry and micro-fluorimetry. Prepares and studies autoradiographs of cells which have been supplied with radio-active isotopes. Breaks cells and prepares cell fractions, using differential and density gradient centrifugation. Analyzes purified-cell fractions by microscopy, electrophoresis, analytical centrifugation, radio-active counting procedures and chemical and enzymatic extraction. Designs and performs experiments using drugs and other agents which alter the normal situation in controlled ways to completely reveal all of the structures in cells and viruses at the microscopic, sub-microscopic level, and to elucidate the functions of structures in all situations. Supervises and co-ordinates the work of technologists and technicians.

May concentrate on cell molecules dealing with reproduction and gene functions. May study structure and processes in cytoplasm of cell concerned with metabolism and growth. May concentrate entirely on viruses which cause diseases in man and animals. May be concerned with a particular aspect of cell biology and be designated accordingly; for example,

Cellular Biochemist
Cytologist
Veterinary Virologist
Virologist

2133-246 CLINICAL CHEMIST(prof. & tech., n.e.c.) DPT:031
analytical biochemist
GED: 6 SVP: 8 EC: I PA: S 4 7

Conducts research to develop methodology and procedures used in clinical biochemistry, and analyzes substances found in biological fluids:

Formulates analytical techniques, methodology and procedures based on observation and experimentation. Develops techniques for use of different types of instruments, such as automated chemical analyzers, gas chromatographs and spectrometers. Analyzes enzymes, hormones, products of carbohydrates, lipid and protein metabolism found in biological fluids, and conducts toxicological assays. Establishes normal values of spinal and other body fluids, using micro- and ultramicro-analytical techniques. Evaluates commercial diagnostic kits and laboratory instruments. Designs, inaugurates and conducts systems of data-processing and computerization for reporting of biochemical analyses. Supervises and co-ordinates the work of technologists and technicians. Establishes and supervises quality-control programs for clinical-chemistry laboratories and participates in related surveys. Prepares, or supervises preparation of, laboratory reports.

May, on request, advise on biochemical methods to be used in diagnosis, and interpret results of tests.

2133-250 GENETICIST(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: I 6 PA: S 4 7

Studies the inheritance of resemblances and differences among organisms related by descent, and the biochemical and physiological means by which these are established and controlled:

Studies the origin, transmission and development of hereditary characteristics in organisms ranging from viruses and bacteria to the most advanced plants and animals. Determines genetic composition of organisms with respect to such characteristics as colour differences, size, crop yield, climatic adaptation or susceptibility to specific diseases. Analyzes the physical and chemical factors of genes which influence specific traits. Induces mutations or inheritable changes, to study the fundamental laws of heredity, or improve the quality of plants and animals of economic importance, using radiation, chemicals or other experimental agents. Analyzes genetic composition of populations and attempts to show how they may evolve through mutation and selection. Cross-breeds animals and plants within and between different strains to study the relationships between characteristics or to obtain new combinations of desirable

characteristics. Supervises and co-ordinates the work of technologists and technicians.

May be concerned with a particular aspect of genetics and be designated accordingly; for example,

Cytogeneticist
Developmental Geneticist
Molecular Geneticist
Population Geneticist

2133-254 MOLECULAR BIOLOGIST(prof. & tech., n.e.c.) DPT:031

GED: 6 SVP: 8 EC: I 6 PA: S 4 7

Studies the structure and function of animal, plant, bacteria or virus proteins and nucleic acids:

Conducts experiments on cellular regulation, on the mechanism and control of biosynthesis and the enzymic activity of proteins. Examines molecular architecture and function of cellular organelles. Studies gene structure and gene action. Prepares, or supervises preparation of, scientific papers or articles dealing with a particular aspect of molecular biology. Supervises and co-ordinates the work of technologists and technicians.

May be engaged in a specialized field of molecular biology and be designated accordingly; for example,

Development Biologist
Enzymologist
Molecular Physiologist

2133-258 PARASITOLOGIST(prof. & tech., n.e.c.) DPT:031

GED: 6 SVP: 8 EC: I 6 PA: S 4 7

Studies biology of protozoans, tapeworms, roundworms, mites, ticks and other zooparasites to gain an understanding of their relationship with their environment, the animal host:

Studies morphology, ultrastructure, systematic life cycles, development and biochemistry of parasites. Investigates the symptomology, pathology and immunology of parasites and their effects on humans, domestic animals and wildlife. Studies the epidemiology of parasitic diseases to determine methods of control, utilizing a knowledge of the biology of the animal and human hosts involved, in the cyclic pattern of their existence. Prepares, or supervises the preparation of, scientific papers or reports on parasitology. Supervises and co-ordinates the work of technologists and technicians.

May be concerned with a particular type of parasite in medicine, veterinary medicine or wildlife and be designated accordingly; for example,

Medical Parasitologist
Protozoologist
Veterinary Parasitologist
Wildlife Helminthologist

2135-LIFE SCIENCES TECHNOLOGISTS AND TECHNICIANS

This unit group includes occupations as described under master titles, 01-150 LIFE SCIENCES TECHNOLOGIST (prof. & tech., n.e.c.) and 01-140 LIFE SCIENCES TECHNICIAN (prof. & tech., n.e.c.) concerned with carrying out technological and technical functions in a life sciences specialization, such as botany, zoology, forestry, horticulture or agriculture, using a knowledge of scientific and mathematical principles and laboratory practices. Physical sciences technologists and technicians are classified in Unit Group 2117, PHYSICAL SCIENCES TECHNOLOGISTS AND TECHNICIANS and engineering technologist and technicians are classified in Unit Group 2165, ARCHITECTURAL AND ENGINEERING TECHNOLOGISTS AND TECHNICIANS. Life sciences technologists and technicians in the field of medicine and health are classified in Minor Group 315, OTHER OCCUPATIONS IN MEDICINE AND HEALTH.

2135-110 AGRICULTURAL TECHNOLOGIST(prof. & tech., n.e.c.) DPT:231

GED: 5 SVP: 7 EC: B 6 PA: S 4 7

Carries out technological functions in various aspects of agricultural science, primarily in support of research and development, by performing any combination of the following duties:

Performs duties as described under master title, 01-150 LIFE SCIENCES TECHNOLOGIST (prof. & tech., n.e.c.). Studies topographical, physical and soil characteristics of farmland, to determine most effective utilization and the nutrient deficiencies. Assists in developing new methods of planting, fertilizing, harvesting, processing and transporting crops to effect optimum land usage, improve productivity and minimize spoilage. Isolates, examines and identifies pathogenic micro-organisms and insects, parasites, fungi and weeds deleterious to crops and livestock, and assists in devising methods of control. Conducts milk analyses to maintain standards of quality. Draws blood from ven in wings of fowls, using needle, and examines blood for disease symptoms, or sends blood to laboratory for analysis. Artificially inseminates female turkeys by inserting syringe of semen into cloaca and depressing plunger. Inspects cattle and poultry and indicates modifications to feed formulas to improve quality of livestock and accelerate marketability. Aids in experiments of controlled breeding to improve strains with increased fertility, rate of growth and disease resistance. Analyzes and classifies soils to determine composition and crop suitability.

May be concerned with a particular aspect of agricultural technology and be designated accordingly; for example,

Field-Crop Technologist
Poultry Technologist.

Biological Technologists 2135-130 through 2135-142

2135-130 BACTERIOLOGICAL TECHNOLOGIST(prof. & tech., n.e.c.) DPT:231

GED: 5 SVP: 7 EC: B PA: L 3 4 7

Carries out technological functions in bacteriology and microbiology, primarily in support of research and development, by performing any combination of the following duties:

Performs duties as described under master title, 01-150 LIFE SCIENCES TECHNOLOGIST (prof. & tech., n.e.c.). Assists in isolation and identification of live bacteria and other micro-organisms by detailed study of their form, behaviour and by-products, using compound and electron-microscopes. Prepares specimens for study by smearing, dehydrating, staining and fixing micro-organisms on glass slides, using alcohol, dyes and heat. Grows cultures of significant micro-organisms under controlled conditions, such as environment, temperature and nutrition. Studies growth, development and nutritional requirements of bacteria, and observes their reaction to other micro-organisms, noting conditions promoting or inhibiting development, or causing death. Studies action of micro-organisms on plant or animal tissue in vivo or in vitro, and observes their beneficial, pathogenic or toxic effects. Analyzes acids, alkalies, alcohols, ethers, enzymes and other chemicals produced by bacterial action. Experiments with the use of bacteria in fermentation processes relating to food, industrial products and sanitation. Investigates activities of bacteria in canned, pickled and frozen foods, and notes effects on flavour, aging and keeping qualities of food products. Experiments with control of micro-organisms by radiation. Assists in bio-assays and chemical tests of organic and inorganic compounds produced by saprophytic bacteria and investigates reaction on soils. Devises and tests methods of propagating nitrogen-fixing bacteria in root complexes of leguminous plants.

May be concerned in a particular aspect of bacteriology and be designated accordingly; for example,

Fishery-Bacteriological Technologist
Food-Bacteriological Technologist
Industrial-Bacteriological Technologist
Soil-Bacteriological Technologist

2135-134 BIOLOGICAL TECHNOLOGIST(prof. & tech., n.e.c.) DPT:231

GED: 5 SVP: 7 EC: B 6 PA: L 3 4 7

Carries out technological functions in various aspects of biology in support of research, testing and analysis, by performing any combination of the following duties:

Performs duties as described under master title, 01-150 LIFE SCIENCES TECHNOLOGIST (prof. & tech., n.e.c.). Reviews biological publications and papers to determine nature and results of previous research projects. Assembles, systematically classifies and maintains collections of terrestrial and aquatic flora and fauna. Tests, observes and records reactions of organisms to stimuli, for example, by growing plants under controlled-light conditions or subjecting dormant seeds or insect larvae to sub-zero temperatures. Assists in experiments on heredity by interbreeding and cross-breeding fruit flies and other rapidly-developing species and inducing mutation by irradiation. Collects and sterilizes male insects by enticing them into traps with the scent of females of the species, and irradiating them. Cultivates microflora and microfauna in vitro to develop and produce antibiotics or biological controls for animals or vegetable pests. Prepares specimens for microscopic examination by freezing, slicing and staining them and mounting them on slides, using dry ice, microtomes and chemicals. Sets up and uses complex equipment, such as electron microscopes and gas chromatographs. Labels plant-nutrients and insects with isotopes and traces their absorption or activities, using geiger counters or allied radiation counters. Assists in the testing and analysis of soils to determine factors influencing plant growth and controlling plant environment. Conducts field and laboratory studies of the distribution, morphology, physiology, life cycles and ecology of aquatic flora and fauna. May be concerned in a particular aspect of biology, and be designated accordingly; for example, Aquatic-Biology Technologist Ecological Technologist

2135-138 BOTANICAL TECHNOLOGIST(prof. & tech., n.e.c.) DPT:231
GED: 5 SVP: 7 EC: B 6 PA: L 3 4 7

Carries out technological functions in various aspects of botany, primarily in support of research and development, by performing any combination of the following duties:
Performs duties as described under master title, 01-150 LIFE SCIENCES TECHNOLOGIST (prof. & tech., n.e.c.). Sets up experiments to study effects of environmental conditions on plant life by observing natural factors; such as, precipitation, soil composition, erosion, water table, sunlight, temperature, crown and root competition, and insect activities. Grows plants under controlled environmental conditions to determine beneficial or adverse factors. Develops improved plant strains by removing anthers, shielding flowers from insect pollination, and artificially fertilizing them with pollen from selected plants, using artists' brushes. Examines morphological characteristics of plants to assist taxonomic classification, using hand lens and microscope. Assist in experiments with fungi to determine the effects of saprophytes on materials and parasites on plants. Conducts experiments to determine effects of hormones and chemicals on plant species, to control disease, develop herbicides, fungicides, systematic pesticides, and to promote growth. Examines diseased plant tissue to identify pathogen and its modus vivendi. Inoculates healthy plants with pathogens from diseased plant to determine pathogenicity. Examines soils for presence of nematodes, and isolates, identifies and preserves them. Induces mutations in plants by irradiation or chemical agents to study genetic principles. Devises disease-immunizing techniques by experimenting with the grafting of buds and scions on disease-resistant stocks. Sets up and evaluates crop rotation experiments to improve yield and soil condition. Experiments with soil-enrichment by analyzing mineral and organic content, balancing pH, and adding chemical, biotic and organic material. Studies photosynthesis and growth regulators in plants. May be concerned in a particular aspect of botany and be designated accordingly; for example, Horticultural Technologist Mycological Technologist Plant-Pathology Technologist Soil-Science Technologist

2135-142 ZOOLOGICAL TECHNOLOGIST(prof. & tech., n.e.c.) DPT:231
GED: 5 SVP: 7 EC: B 6 PA: L 3 4 7

Carries out technological functions in various aspects of zoology, primarily in support of research and development, by performing any combination of the following duties:
Performs duties as described under master title, 01-150 LIFE SCIENCES TECHNOLOGIST (prof. & tech., n.e.c.). Examines animal carcasses found in natural habitat to determine sex, age, cause

of death (predator, accident, disease or over-parasitism). Counts and measures dentition to ascertain age and state of dental health. Measures and weighs body. Removes certain parts of organs for laboratory study. Records data. Calculates population densities by sighting tracks, counting faeces and carcasses per square mile, and noting amounts of browsing. Examines faeces to discover diet of species. Assists in experiments in animal behaviour, migration patterns, and population dynamics by observing herds, packs, flocks, schools and other aggregations, in natural habitat, compounds, aviaries or pools. Studies hierarchic structure or pecking order and sexual activities. Captures, bands or tags mammals, birds and fish by snaring or tranquilizing, using darts and rifle. Obtains and records pertinent data and releases captive. Affixes telemetering and signal-emitting devices to birds, and animals, and tracks their range and such physiological activities as temperature and heartbeat, using electronic receivers. Studies ecology of aquatic fauna and interprets data collected in terms of life cycles, feeding patterns, predators, populations and mortality rates. Collects specimens for collections or laboratory study or for re-establishment of depleted areas. Records animal vocalization, bird songs and insect stridulations, using portable tape recorders and sound cones (field microphones). Studies insect morphology, physiology, life cycles, distribution and economic value. Photographs or draws wildlife for records or to illustrate project reports. Devises means of biological control to reduce populations of economic nuisances. Breeds, rears and releases insectivorous mammals and insect-predators and parasites in areas infested with insect pests of prey-and host-species. May be concerned in a particular aspect of zoology and be designated accordingly; for example, Entomological Technologist Ichthyological Technologist Mammalogy Technologist Ornithological Technologist Wildlife Technologist

Other Life Science Technologists 2135-162 through 2135-199

2135-162 FISH-FARM TECHNOLOGIST(prof. & tech., n.e.c.) DPT:231
sea-farm technologist.
GED: 5 SVP: 7 EC: B PA: L 3 4 7

Carries out a variety of complex technological functions in ichthyology in support of research and pisciculture:
Performs duties as described under master title, 01-150 LIFE SCIENCES TECHNOLOGIST (prof. & tech., n.e.c.). Assists in analyzing water from fresh and salt water fish-rearing pools to determine salinity, pH and the presence of deleterious micro-organisms, using filters, titration tests and microscopes. Examines tissues, fluids and secretions from dead or live fish to determine causes of mortality or to detect presence and stages of disease or parasitism, and devises prophylaxis or therapy. Experiments with chemical and biological means of controlling predators, parasites and micro-organisms. Interprets and prepares fish-food formulas to promote optimum growth rate and high-quality flesh. Conducts research with various species of edible fish, molluscs and crustaceans to determine suitability for controlled rearing. Supervises technicians and tradesmen in care and maintenance of pools, tanks and equipment.

2135-166 FOOD TECHNOLOGIST(prof. & tech., n.e.c.) DPT:231
GED: 5 SVP: 7 EC: I PA: L 4 7

Performs a variety of technological functions, primarily in support of research, development, testing, analysis and processing activities in food science:
Performs duties as described under master title, 01-150 LIFE SCIENCES TECHNOLOGIST (prof. & tech., n.e.c.). Checks processing-line operating conditions at various stages by conducting mechanical, chemical and microbiological testing. Ensures that processing procedures, such as canning or bottling, meet specifications. Performs chemical tests to determine components; such as, sugar, starch, protein, fat, mineral and vitamin content. Conducts microbiological tests on yeasts, moulds and bacteria to ensure safety and shelf-life of products. Conducts quality-control tests. Supervises operation of test kitchens and pilot plants during development stages of new products. May investigate sources of materials to be used in processing. May be

concerned with a particular aspect of food technology and be designated accordingly; for example,
Food-Process Technologist
Food-Product Technologist
Pilot-Plant Technologist, Food Products
Quality-Control Technologist, Food Processing

2135-199 OTHER LIFE SCIENCES TECHNOLOGISTS

This group includes life sciences technologists, not elsewhere classified; for example, those who carry out a variety of technological functions in a life science, and those who assist in forest-research and development. A typical example of an occupational title covered by this residual group definition is:
Forest Technologist(prof. & tech., n.e.c.).

Agricultural Technicians

2135-220

2135-220 AGRICULTURAL TECHNICIAN(prof. & tech., n.e.c.) DPT:361
GED: 4 SVP: 6 EC: B 6 PA: M 4 7

Carries out technical functions in various aspects of agricultural science, primarily in support of testing and analysis, by performing any combination of the following duties:

Performs duties as described under master title, 01-140 LIFE SCIENCES TECHNICIAN (prof. & tech., n.e.c.). Examines bovine semen to determine gamete motility and to isolate and identify pathogenic organisms, using microscope. Ascertains semen density, using densimeter. Extends and preserves semen by adding diluents and antibiotics, labels it with identifying data and stores it in fast-freezing agent. Assists in livestock feeding experiments. Studies individual animal's or bird's data charts to learn physical characteristics and recommended diet. Prepares feed by weighing and mixing specified quantities of ingredients, and places fixed amounts of prepared feed in each trough. Observes livestock at regulated intervals to note changes in physical condition, revealed by appetite, lustre of coat or plumage, level of activity, weight variation, and egg or milk production and quality, and records individual's response to diet. Administers medication to experimental livestock, observes and records physical condition, and collects excreta for analysis. Prepares sample plots for planting, by analyzing soil and adding mineral and organic nutrients. Plants seeds and tends seedling; records growth-rate and yield, and selects superior plants for breeding. Selectively fertilizes plants by covering inflorescence with paper bags to prevent insect pollination, and transfers pollen from anthers to stigmata, using artists' brushes.

May assist in artificially inseminating hen turkeys by inserting syringe of semen in cloaca and depressing plunger. May be concerned with a particular aspect of agricultural science and be designated accordingly; for example,

Field-Crop Technician
Poultry Technician

Biological Technicians

2135-240 through 2135-272

2135-240 BACTERIOLOGICAL TECHNICIAN(prof. & tech., n.e.c.) DPT:361
microbiological technician.
GED: 4 SVP: 6 EC: I 6 7 PA: L 4 7

Carries out technical functions in various aspects of bacteriology, primarily in support of testing and analysis, by performing any combination of the following duties:

Performs duties as described under master title, 01-140 LIFE SCIENCES TECHNICIAN (prof. & tech., n.e.c.). Sets up laboratory equipment; such as, centrifuges, microscopes, stills and glassware in support of specific experiments and tests. Grows micro-organism colonies in vitro on substrates, such as gelatin and agar or in broths enriched with glucose, blood-serum or other nutrients. Cultures viruses in living cells, such as chorio-allantoic membranes of developing eggs or in minced tissue. Selects single colonies of micro-organisms for sub-culture to obtain pure cultures of certain organisms. Aids in analyses of bacterial by-products to detect presence or absence of compounds; such as carbon dioxide, urea, ammonia, lead acetate and hydrogen

sulphide. Prepares specimens of diseased animal and plant tissue for microscopic study by chilling, sectioning, staining, and mounting them on glass slides, using microtomes, alcohol, dyes and gums. Assists in soil analyses by preparing soil solutions and mixtures for titration and other tests. Records flavour and quality changes in preserved food caused by bacterial action. Conducts experiments with micro-organisms in industrial fermentation and decomposing processes, such as retting of flax and other natural fibres, malt manufacture and the reduction of organic wastes to useful by-products.

May be concerned with a particular aspect of bacteriology and be designated accordingly; for example,
Fishery-Bacteriological Technician
Food-Bacteriological Technician
Industrial-Bacteriological Technician
Soil-Bacteriological Technician

2135-244 BIOLOGICAL TECHNICIAN(prof. & tech., n.e.c.)

DPT:361

GED: 4 SVP: 6 EC: B 6 PA: M 4 7

Carries out technical functions in various aspects of biology, primarily in support of testing and analysis, by performing any combination of the following duties:

Performs duties as described under master title, 01-140 LIFE SCIENCES TECHNICIAN (prof. & tech., n.e.c.). Conducts pH and titration tests on soil samples. Prepares specimens of terrestrial and aquatic plant, animal, fish and insect tissues or organs by dissecting them, using knives or microtomes, fixing and staining them with chemicals and dyes, and mounting them on glass slides. Grows cultures of micro-organisms in vitro on colloid substrates. Sets up laboratory apparatus, such as centrifuges, stills and autoclaves. Records observations during field studies, experiments and tests, and writes reports.

May be concerned with a particular aspect of biology and be designated accordingly; for example,
Aquatic-Biology Technician
Ecological Technician
Vaccine Technician

2135-248 BOTANICAL TECHNICIAN(prof. & tech., n.e.c.)

DPT:361

GED: 4 SVP: 6 EC: B 6 PA: L 4 7

Carries out technical functions in various aspects of botany, primarily in support of botanical testing and analysis, by performing any combination of the following duties:

Performs duties as described under master title, 01-140 LIFE SCIENCES TECHNICIAN (prof. & tech., n.e.c.). Tests seed for germination, purity and weed content. Tends plants being grown in controlled environments; marks, and records growth. Prevents random pollination of plants, by carefully removing anthers or staminate flowers, and covering stigmata or pistillate flowers, using scissors, tweezers and paper or plastic bags. Cross-pollinates plants by transferring pollen from anthers of selected individuals to stigmata of others, using artists' brushes. Cultures fungi under sterile conditions to obtain spores from desirable species or strains. Inoculates or paints plants with hormones or chemicals to determine effects on growth, disease, fungi, parasites or insects. Removes diseased tissue from plants and examines it to identify disease and its cause, using microscope. Collects, dries and presses plants, and systematically identifies and catalogues them for herbarium specimens, using hand lens and microscope. Analyzes soil, using chemicals, chromatography and spectrography. Aids in genetic experiments to transfer morphological and physiological changes in offspring by inducing mutations in parent plants, using radiation and chemicals. Experiments with immunizing techniques of grafting susceptible species on to disease-resistant stocks. Conducts experiments in crop rotation, to improve yield and soil conditions. Inoculates plants with viruses to break down pigmentation and produce varied coloration.

May be concerned in a particular aspect of botany and be designated accordingly; for example,
Horticultural Technician
Mycological Technician
Plant-Pathology Technician
Soil-Science Technician

2135-252 ZOOLOGICAL TECHNICIAN(prof. & tech., n.e.c.)
DPT:361

GED: 4 SVP: 6 EC: 1 PA: L 4 7

Prepares, preserves and catalogues all types of zoological specimens; such as, fish, mammals, reptiles, birds and zooplankton and assists scientists in museums and other institutions:

Performs duties as described under master title, 01-140 LIFE SCIENCES TECHNICIAN (prof. & tech., n.e.c.). Receives and processes specimens as they are collected by field workers by defleshing fresh specimens, shipping skins to tannery, cleaning and preparing skeletal material. Periodically fumigates collections, using various types of fumigants. Catalogues collections by arranging specimens in proper taxonomic and geographic order. Records each collection locality on distribution maps and prepares necessary labels. Assists in research projects by measuring and recording skeletal dimensions, photographing specimens and performing studies and tests on live animals; such as, taking smears, making and staining microscopic slides and performing chromosome counts. Analyzes results under compound microscope. Extracts information, such as sight records, and ecological and behavioural information from field notebooks. Requisitions equipment and supplies and keeps records of their use. Prepares specimens for shipment and receives specimens on loan from other institutions. Maintains files and data pertaining to such loans.

May make field trips to study and collect specimens and assist in the planning of logistics for research field parties including travel, accommodation, meals, equipment and supplies. May specialize in one particular field of zoology and be designated accordingly; for example,

Entomological Technician
Ichthyological Technician
Mammalogy Technician
Ornithological Technician
Wildlife Technician

Other Life Science Technicians

2135-272

2135-272 FOREST TECHNICIAN(prof. & tech., n.e.c.)
DPT:361

GED: 4 SVP: 6 EC: B 6 7 PA: M 3 4 7

Carries out a limited number of technical functions in forest science in support of scientists and foresters engaged in forest- research, -management, or -conservation:

Performs duties as described under master title, 01-140 LIFE SCIENCES TECHNICIAN (prof. & tech., n.e.c.). Surveys, measures, stakes and maps forest areas and access roads, using compass and surveying instruments. Conducts forest inventories by counting and measuring trees, and listing their species, and estimates timber content, using calipers and rangefinder. Prepares and lays out cutting plans, and traces and fixes boundaries. Inspects, and assesses extent of insect and disease damage. Tends, thins and transplants seedlings. Inspects logging operations for compliance with regulations. Conducts pollen counts, collects samples of plants, seeds, foliage, bark and roots, and examines them for evidence of insects and diseases. Assists in laboratory and field experiments conducted with plants, animals, soils, and controlled light and climatic conditions to support research programs. Carries out field experiments by preparing and tending sample plots of specific plant species, and recording growth factors and other characteristics.

May patrol forest areas and record dryness ratings, and state of forest floor.

2139-OCCUPATIONS IN LIFE SCIENCES, N.E.C.

This unit group includes occupations, not elsewhere classified, concerned with research in the life sciences; and with other life- science activities; such as, studying, developing and controlling forest lands and resources; and conducting displays and lectures on historical, natural, and scientific features of public parks.

2139-110 FORESTER(prof. & tech., n.e.c.)
DPT:031
GED: 6 SVP: 8 EC: B PA: L 5 6 7

Studies, develops and controls forest lands and resources lands and resources for economic, recreational and ecological purposes, and for the preservation and controlled exploitation of forest products:

Observes the effects of environmental factors, such as light, precipitation and soil composition on the growth, health and foliage of forest plants. Conducts research to study problems of forest propagation, and to observe the effects of thinning on forest yield. Investigates the adaptability of various species of trees by grafting, cross-pollinating and transplanting and exposing to various soil, climatic conditions, feed supplements and other factors. Determines causes of retarded forest growth, such as poor seed viability, fire and animal grazing. Prepares plans for reforestation, and devises methods to harvest timber with minimal waste and damage. Plans and implements projects for controlling floods, soil erosion, insect pests and tree diseases. Advises officials of government and industry, and the general public, on forestry problems, and conducts educational programs on care of forests. Supervises and co-ordinates the work of technologists and technicians.

May direct or participate in the mapping and surveying of forest areas. May be concerned with a particular aspect of forestry and be designated accordingly; for example,

Forest Ecologist
Research Forester
Silviculturist

2139-114 INTERPRETIVE NATURALIST(gov. serv.)
DPT:118

park naturalist.

GED: 5 SVP: 8 EC: B PA: L 2 4 5 6

Plans and co-ordinates exhibits and audio-visual displays, and gives lectures to inform public of park policies, historical, natural and scientific features according to location and environment of parks:

Confers with park staff to determine subjects to be presented and program schedule. Participates in park survey of forest conditions and distribution, abundance and habits of flora and fauna. Interviews specialist in desired fields to obtain and develop data for programs. Takes photographs, including motion pictures to illustrate lectures and publications and to develop displays. Plans and develops audio- visual devices, prepares and presents illustrated lectures, constructs visitor-centre displays, and conducts field trips to point out scientific, historic and natural resource features of park. Plans, organizes and directs activities of personal staff members. Maintains official photographic and information files for department.

214/215-ARCHITECTS AND ENGINEERS

This minor group includes architectural and engineering occupations concerned with designing and supervising the construction of buildings and other structures, and designing and supervising landscaping; conducting research, advising on, planning, designing, developing, and supervising the manufacturing, testing, installing, operating or maintaining of machines, instruments, facilities, processes and services. These occupations are classified in the following unit groups:

- 2141 Architects
- 2142 Chemical Engineers
- 2143 Civil Engineers
- 2144 Electrical Engineers

- 2145 Industrial Engineers
- 2147 Mechanical Engineers
- 2151 Metallurgical Engineers
- 2153 Mining Engineers
- 2154 Petroleum Engineers
- 2155 Aerospace Engineers
- 2157 Nuclear Engineers
- 2159 Architects and Engineers, n.e.c.

2141-ARCHITECTS

This unit group includes occupations concerned with design and construction of buildings and related structures and the aesthetic landscaping for parks, road development and other projects.

2141-110 ARCHITECT(prof. & tech., n.e.c.) DPT:011
GED: 6 SVP: 8 EC: B PA: S 4 7

Designs buildings, develops plans, specifications and detailed drawings, arranges contracts and exercises general supervision over construction:

Consults with client to determine type, style and size of building. Provides information regarding design, materials, costs and estimated building time. Plans layout, interior walls and location of equipment in project. Prepares sketches and documents of proposed project for client. Prepares or supervises the preparation of scale drawings, integrating structural, mechanical and aesthetic elements in unified design. Writes specifications and other contract documents for use by building contractors and craftsmen. Consults with engineers for specialized advice on soil, structural, electrical, mechanical and other technical problems. Confers with other consultants to develop feasibility studies, financial analyses and arrangements, site location and land assembly. Exercises general supervision over, and inspects construction work to ensure buildings are erected according to specifications.

May act as a consultant and advise clients for a fee, or specialize in design and layout of industrial, commercial, residential, recreational and institutional buildings and be designated accordingly; for example,

Architect, Industrial and Commercial Buildings
Architect, Residential Buildings
Architect, School
Consulting Architect

2141-114 LANDSCAPE ARCHITECT(prof. & tech., n.e.c.) DPT:011
GED: 6 SVP: 8 EC: B PA: S 4 7

Plans and designs aesthetic lay-outs for optimum usage of land areas; such as, parks, airports, industrial, commercial and residential subdivisions:

Confers with clients, economists, engineers and other architects on overall proposal. Compiles and analyzes site data, directing particular attention to geographic location, ecology of area, vegetation, soil, rock features, drainage and location of structures. Prepares site plans, working drawings, specifications and cost estimates for land development, showing ground contours, vegetation to be planted, location of structures, and facilities such as roads, walks, fences, parking areas, walls and utilities. Inspects construction work in progress to ensure compliance with landscape specifications. Approves quality of materials and work and advises clients, engineers and contractors on landscape problems.

2142-CHEMICAL ENGINEERS

This unit group includes occupations concerned with research and design, and development of manufacturing

processes in which chemical changes occur; and supervision of the construction, operation and maintenance of chemical plant equipment. Typical specializations include: oil and metals refining; explosives, medicinals and pharmaceuticals development; pulp and paper production and food processing.

2142-110 CHEMICAL ENGINEER, DESIGN AND DEVELOPMENT(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: I PA: S 4 5 6 7

Designs and prepares specifications for the erection and operation of chemical plants and control systems for the commercialization of new or improved products or processes:

Performs duties as described under master title, 01-060 DESIGN ENGINEER (prof. & tech., n.e.c.). Specializes in preparing designs for chemical processes, and plans lay-outs of control systems of processes such as those used to remove and separate components, effect chemical changes using electric current, test and evaluate fuels, transfer heat by conduction, convection or radiation, and control the moving, storing and packaging of solids, liquids and gases. Designs pilot plants and supervises their operation. Prepares analytical reports. Provides advice and information to sales personnel responsible for field evaluation of products or processes, or market research personnel responsible for estimating market volume and selling price. Consults with patent agents to ensure company interests are protected on new products or processes developed.

May be concerned with development and design of one particular product or process and be designated accordingly; for example,

Combustion Engineer
Design Engineer, Chemical-Products Process
Design Engineer, Explosive-Products Process
Design Engineer, Petroleum-Products Process

2142-114 CHEMICAL ENGINEER, RESEARCH(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: I PA: L 4 5 6 7

Conducts applied research to solve engineering problems concerned with development and improvement of new or existing chemical products or processes, on a commercial scale:

Conducts experiments and correlates data gained from work in areas; such as, chemical reaction, fluid flow, heat and mass transfer, distillation, drying, corrosion and properties of materials. Makes calculations; such as, heat transfer, specific heats and equilibrium constants. Decides on merits of batch versus continuous flow operation. Prepares process-flow diagrams and selects unit process equipment. Selects materials of construction to minimize corrosion and contamination. Estimates scale-up ratio of materials and decides whether a pilot plant step is necessary. Studies product utilization and pollution control problems. Collaborates with chemists and other research engineers. Supervises and co-ordinates the work of technologists, technicians and tradesmen. See also definition for term title, 02-310 RESEARCH ENGINEER (prof. & tech., n.e.c.).

May specialize in research in one particular product of process and be designated accordingly; for example,

Explosives Engineer (explosives)
Plastics Engineer (plastic prod.)
Polymerization Engineer (plastic prod.)

2142-118 CHEMICAL ENGINEER, PRODUCTION(prof. & tech., n.e.c.) DPT:131
GED: 5 SVP: 8 EC: I PA: L 4 5 6 7

Supervises industrial processing, fabrication, maintenance and repair operations to ensure production of scheduled amounts of products undergoing physical and chemical changes:

Interprets analysis and quality control reports received from research, design and development engineers and other technical workers. Determines most effective arrangement of equipment; such as, distillation, absorption, adsorption and evaporation towers, and mixing, blending and separating equipment. Controls processes using automatic devices and instrumentation. Ensures that correct materials and equipment are used and that they conform to specifications. Diagnoses malfunctions and institutes immediate remedial action to ensure efficient operation. Supervises technologists, technicians and tradesmen engaged in support activities.

May specialize in one particular phase of process or production operation and be designated accordingly; for example,

Absorption and Adsorption Engineer

Electrochemical Engineer

Heat-Transfer Engineer

Mixing Engineer

Separation Engineer

Size-Reduction Engineer

2143-CIVIL ENGINEERS

This unit group includes occupations concerned with the planning, design, and/supervision of the construction, maintenance and repair of buildings, bridges, dams, tunnels, ports, docks and other structures, water supply and sewage system, transportation and other facilities for public, industrial or commercial use. Typical areas of specialization include: structural, hydraulic, environmental, irrigation and drainage, harbour, railway, highway, pipeline and tunnel engineering.

2143-110 MATERIALS AND TESTING ENGINEER(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: B PA: S 5 6

Conducts research, development tests and evaluation of quality or suitability of materials and products related to projects; such as, bridges, dams, roads, airports, railways, waste disposal and flood control and industrial and other large buildings:

Co-ordinates and directs research, development and testing of materials; such as, asphalt, concrete, steel, cement, timber and plastics, considering factors; such as, stresses and strains, estimated load, water pressures, wind resistance and temperature fluctuations. Advises contractors and others, on materials most suited to meet individual construction problems. See also definition for term title, 02-310 RESEARCH ENGINEER (prof. & tech., n.e.c.).

2143-114 STRUCTURAL-DESIGN ENGINEER(prof. & tech., n.e.c.) DPT:031
structural engineer.
GED: 6 SVP: 8 EC: I PA: L 4 5 6 7

Plans and designs the load-bearing framework for buildings, towers, bridges, tunnels and other structures:

Performs duties as described under master title, 01-060 DESIGN ENGINEER (prof. & tech., n.e.c.). Designs frameworks of buildings, towers, bridges, tunnels and other structures to ensure strength and rigidity considering factors; such as, tolerable stresses within given safety margins, vibration allowances, size, shape, appearance and economy. Studies developments of new materials and methods and their impact on design and construction.

2143-118 CIVIL ENGINEER, GENERAL(prof. & tech., n.e.c.) DPT:131
GED: 5 SVP: 8 EC: B PA: L 4 5 6 7

Studies design proposals and advises on works and facilities; such as, roads, railways, bridges, dams, disposal systems and buildings, and supervises their construction and maintenance by performing any combination of the following duties:

Studies project proposal, accumulates and analyses basic data; such as, topography and geology for highways, run-off history of a river, population growth statistics, laboratory analysis of cement, soil and water. Prepares preliminary plans for the project applying knowledge of mathematics and engineering design to superstructures, structural frames and infrastructure. Prepares estimate of project to ensure economy of cost in relation to service required. Supervises preparation of detail design drawings and specifications for contractors and consults with other specialists such as mechanical, chemical and electrical engineers and architects regarding technical and aesthetic requirements. Secures approval of plans from client, management and other authorities. Inspects project during construction and certifies, on completion, that it has been built in accordance with specifications. Supervises the maintenance and repair of civil engineering projects such as, transportation systems, water systems, pipelines or water-resource developments. Conducts studies into improving maintenance practices and the use of new materials to keep completed facilities in service. Supervises and co-ordinates the work of technologists, and technicians.

May work as a consultant or collaborate with engineers in other disciplines and advise clients for a fee.

2143-122 AIRPORT ENGINEER(prof. & tech., n.e.c.) DPT:131
GED: 5 SVP: 8 EC: B PA: L

Studies design proposals and advises on construction, maintenance and repair of airports, runways and other facilities:

Performs duties similar to those of 2143-118 CIVIL ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in preparing designs for airports, hangars and control towers. Supervises construction, maintenance and repair of runways, taking into consideration factors; such as, weight, size and speed of aircraft. Advises contractors on technical problems during construction.

2143-126 BUILDINGS AND BRIDGE ENGINEER(prof. & tech., n.e.c.) DPT:131
construction engineer.
GED: 5 SVP: 8 EC: B PA: L 4 5 6 7

Studies design proposals and prepares details of structures, such as buildings and bridges, and supervises their construction or erection:

Performs duties similar to those of 2143-118 CIVIL ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in the erection, maintenance and repair of buildings and bridges for industrial, commercial or public use. Determines the equipment and men required to dig excavations and raise superstructures. Designs and supervises erection of temporary structures, scaffolding, formwork and materials processing plants.

May conduct load and performance capability tests.

2143-130 ENVIRONMENTAL ENGINEER(prof. & tech., n.e.c.) DPT:131
GED: 5 SVP: 8 EC: I PA: S

Studies design proposals and advises on the control of environmental conditions such as those associated with the gross pollution of air and water and the more subtle damage accruing to minds and bodies from poor engineering practices:

Performs duties similar to those of 2143-118 CIVIL ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in preparing specifications for facilities; such as, screens, grids, grit chambers, sedimentation and sludge tanks, digestors, filters and other devices to control water and air pollution. Supervises preparation of designs for incinerators, water treatment and sewage disposal plants. Advises on control of excessive noise, smoke, radiation, and other pollutants. Recommends and supervises disposal procedures to control noise, obnoxious fumes, petroleum products, greases, human and industrial waste and chemicals resulting from poor engineering design, carelessness or ignorance.

May inspect environmental conditions of public places; such as,

markets, camps, factories and parks. May be concerned with a particular aspect of environmental engineering and be designated accordingly; for example,
Air-Pollution-Control Engineer
Industrial-Hygiene Engineer
Noise-Abatement Engineer
Sanitary Engineer
Sewage-Control Engineer
Water-Treatment Engineer

2143-134 HIGHWAY ENGINEER(prof. & tech., n.e.c.) DPT:131
GED: 5 SVP: 8 EC: B PA: L

Studies design proposals and advises on construction, operation and maintenance of highways, streets and roads:
Performs duties similar to those of 2143-118 CIVIL ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in analyzing population and growth statistics and traffic patterns and volume to project future requirements. Consults with government officials and other specialists to design efficient and safe traffic systems. Studies roadway and embankment design, the geometry of highway interchanges and the maintenance of facilities, such as culverts and overpasses.

2143-138 IRRIGATION AND DRAINAGE ENGINEER(prof. & tech., n.e.c.) DPT:131
GED: 5 SVP: 8 EC: I PA: L 4 7

Studies design proposals and advises on construction, maintenance and repair of irrigation and drainage systems:
Performs duties similar to those of 2143-118 CIVIL ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in determining, through tests and measurements, the characteristics of soil; such as, salinity, water table level, areas of sub-normal plant growth, type of soil and surface profile, and studies data. Computes and estimates rates of water flow. Supervises preparation of plans showing channels, conduits, mains, tiling and ditches. Supervises construction of laboratory models to study construction and flow problems. Determines need for securing easements and right-of-way deeds. May be concerned with one particular aspect of irrigation and drainage and be designated accordingly; for example,
Drainage-Design Engineer
Hydraulic Engineer
Irrigation Engineer

2143-142 PIPELINE ENGINEER(prof. & tech., n.e.c.) DPT:131
GED: 5 SVP: 8 EC: B PA: L 4 5 6 7

Studies design proposals and advises on construction, maintenance and repair of pipelines for transmission of liquids, gases and solids in large quantities:
Performs duties similar to those of 2143-118 CIVIL ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in preparing design proposals for pipelines and pipeline equipment, facilities and structures in consultation with petroleum and mechanical engineers. Determines suitable lay-out of lines based on accurate mapping and surveying. Analyzes operations and maintenance costs to determine efficiency and devise improvements or innovations in the systems. Provides technical advice in operation of machinery and equipment used to transport petroleum products through pipeline systems.

2143-146 RAILWAY ENGINEER(prof. & tech., n.e.c.) DPT:131
GED: 5 SVP: 8 EC: I PA: L

Studies design proposals and advises on construction, maintenance and repair of new or existing railway systems including tracks, terminals, yards and other facilities:
Performs duties similar to those of 2143-118 CIVIL ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in studying natural features of proposed routes. Plans types of rail beds, rail size and curves to meet train speed and load requirements. Conducts traffic surveys to establish most suitable route for rapid transit or urban railway systems.

2143-150 SOIL ENGINEER(prof. & tech., n.e.c.) DPT:131
GED: 5 SVP: 8 EC: I PA: L 7

Conducts field and laboratory test of soils to determine their properties in relation to design, foundation and construction problems:
Inspects proposed construction sites to analyze and determine general type and characteristics of the soil. Conducts drilling and sampling programs to establish soil and foundation conditions at the construction site. Oversees and participates in field and laboratory testing of soils, and ensures that test equipment and machinery is properly set up. Reviews and prepares reports of test results and makes recommendations for the solution of engineering problems identified in test reports. Prepares specifications of soil mixtures for use in roads, embankments and other construction. Calculates and advises on required slope at cuttings and thickness of soil dams and retaining walls. Supervises and co-ordinates the work of technologists and technicians.
May work as a consultant and advise clients for a fee.

2143-154 WATER-RESOURCES ENGINEER(prof. & tech., n.e.c.) DPT:131
waterworks and water-supply engineer.
GED: 5 SVP: 8 EC: B PA: L 5 6

Supervises construction and advises on operation, maintenance and repair of water resource facilities; such as, dams, aqueducts, hydro-electric and pumping plants, and water-supply systems:
Performs duties similar to those of 2143-118 CIVIL ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in control and utilization of water resources involving the design and construction of reservoirs, dams, conduit systems, canals and storage bays. Evaluates plans and specifications for conformance to established water works standards. Initiates and directs studies, and advises on the economics of systems operation, water distribution and equipment performance to determine suitable solutions to operational and technical problems. May be concerned with one particular aspect of water resources engineering and be designated accordingly; for example,
Pumping and Supply Engineer
Purification Engineer
Water-Distribution Engineer

2143-199 OTHER CIVIL ENGINEERS

This group includes civil engineers, not elsewhere classified; for example, those who specialize in the dredging of harbours and ship channels, and co-ordinating, and directing surveying, photogrammetry and mapping. A typical example of an occupational title covered by this residual group definition is:
Chief-Photogrammetric Engineer(prof. & tech., n.e.c.)

2144-ELECTRICAL ENGINEERS

This unit group includes occupations concerned with the design, construction, maintenance and repair of systems which generate, transmit, distribute, control and utilize electric energy; research into electrical engineering problems and development of electrical and electronic products; and provision of technical direction in the manufacture of a wide variety of electrical and electronic equipment; such as, communications equipment for telephone, radio, television and satellite systems, automatic control systems and computers, domestic equipment and other labour saving devices. Typical areas of specialization include: electric power systems, telephone, illumination, communication, audio and electronic-power systems.

2144-110 DESIGN AND DEVELOPMENT ENGINEER, ELECTRICAL AND ELECTRONIC(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: I PA: L 4 5 6

Designs and develops circuits for manufacture and installation of electrical and electronic equipment:
Performs duties as described under master title, 01-060 DESIGN

ENGINEER (prof. & tech., n.e.c.). Prepares specifications of circuits for electrical and electronic equipment; such as, turbines, generators, receivers, transmitters, navigational aids, facsimile and computing equipment. Supervises the installation and setting-up of equipment; such as, electrical generating equipment, radar, frequency modulation transmitters and receivers, radiosonde and navigation equipment and electronic computing devices.

May be concerned with designing, developing and installing a specific type of equipment or component and be designated accordingly; for example,

Circuit-Design Engineer

Design Engineer, Radio and Television Broadcasting

Traffic-Circuit Engineer, Telephone Systems

2144-114 RESEARCH ENGINEER, ELECTRICAL AND ELECTRONIC (prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: 1 PA: L 4 5 6

Conducts research into various fields of electrical and electronic phenomena to investigate, evaluate and apply results of this research to solve practical problems:

Studies problems and conducts experimentation concerning generation, transmission and distribution of electrical power and the propagation, modulation and reception of electro-magnetic wave impulses to develop new or more efficient communication, navigation and competing electronic equipment and components. Studies effects; such as, radio interference, loss of wave strength and limitations on radio navigation, diathermy, television, radio and radar equipment related to efficiency of operation, using sophisticated test apparatus and computers, to gather data. Supervises and co-ordinates the work of technologists and technicians. See definition for term title, 02-310 RESEARCH ENGINEER (Prof. & tech., n.e.c.)

May conduct research in a particular area of electrical or electronic phenomena and be designated accordingly; for example,

Electrical-Research Engineer

Electronic-Research Engineer

Illuminating-Research Engineer

Radio-Research Engineer

2144-118 ELECTRICAL ENGINEER, GENERAL (prof. & tech., n.e.c.) DPT:131
GED: 5 SVP: 8 EC: B PA: L 4 5 6 7

Studies design proposals and supervises the manufacture, installation, testing, maintenance, modification and repair of electrical equipment and components used for generation, transmission, distribution and utilization of electrical energy by performing any combination of the following duties:

Develops products and systems; such as, domestic electrical appliances, ignition systems, electro-magnets for motors and circuits for power-driven industrial machinery or components. Prepares preliminary cost estimates for construction of facilities; such as, generating, sub-and relay-stations for transmitting power from distribution points to consumers. Determines type and arrangement of circuits, transformers, switches and lighting arresters, using mathematical formulae, and performing complex computations. Supervises installation and lay-out of machinery and equipment to ensure that adequate power supply and protection methods are provided. Directs modification and repair of electrical power systems and of complicated and sensitive automatic controls and components that govern production processes. Prepares working drawings and specifications indicating materials to be used and method of manufacture. Supervises technical aspects of manufacturing processes, and compilation of estimates of labour required and other costs of manufacture, installation, maintenance and repair. Compiles, evaluates and interprets and writes reports. Evaluates technical specifications, examines installed electrical equipment to ensure compliance with safety standards, and recommends modification, maintenance and repair procedures. Supervises and co-ordinates the work of technologists and technicians in various aspects of technical assignments; such as, preparation of schematics, wiring and diagrams and equipment layouts.

May collaborate with engineers in other disciplines and act as a consultant and advise clients for a fee.

2144-122 ELECTRONIC ENGINEER, GENERAL (prof. & tech., n.e.c.) DPT:131
GED: 5 SVP: 8 EC: B PA: L 4 5 6 7

Studies design proposals, develops and supervises the manufacture, installation, testing, inspection, repair and maintenance of electronic equipment, systems and components used in fields; such as, communications, entertainment, navigation and data-processing equipment, by performing any combination of the following duties:

Prepares preliminary cost estimates for manufacture of electronic equipment and components which involve the passage of electricity through vacuum tubes, gases and semi-conducting materials, such as transistors and diodes, providing a controlled electron flow. Develops test apparatus and devises procedures to evaluate circuits utilizing ferroelectric, nonlinear, dielectric, photo-conductive and thermoelectric properties of materials. Supervises construction of prototype circuits and controls used in equipment; such as, radar, telemetering equipment, guidance and navigation systems, micro-wave systems and electronic data-processing equipment. Supervises construction and operation of individual or central communications systems; such as, telephones, radio and television broadcasting and other communications facilities. Directs maintenance and calibration of electronic test equipment. Supervises manufacture, inspection, testing and installation of electronic components and systems to ensure high quality in manufacturing, and compliance with specifications and safety standards. Prepares reports and process descriptions, instructional manuals on modification, maintenance and repair procedures, and product catalogues for electronic components and systems. Supervises and co-ordinates the work of technologists and technicians.

May collaborate with engineers in other disciplines, and work as a consultant and advise clients for a fee.

2144-126 AUDIO ENGINEER (prof. & tech., n.e.c.) DPT:131
GED: 5 SVP: 8 EC: 1 6 PA: L 4 5 6 7

Develops electronic and mechanical equipment for recording and reproduction of sound in fields; such as, studio broadcasting, motion pictures and public address systems:

Performs duties similar to those of 2144-122 ELECTRONIC ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in developing sound propagation, absorption and reproduction systems within and outside aural range. Designs special types of loudspeakers, enclosures, reverberators and echo chambers.

May assist in the design of studios, halls and recording areas by making suggestions to architects and engineers for improving acoustical properties of structures.

2144-130 DISTRIBUTION ENGINEER (elec. power) DPT:131
GED: 5 SVP: 8 EC: 1 PA: L 4 5 6 7

Plans and develops electrical-power-distribution systems to provide electrical energy for industrial, commercial and domestic users:

Performs duties similar to those of 2144-118 ELECTRICAL ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in the development of electrical-power-distribution systems. Ensures that planning reports are kept up-to-date and essential records maintained. Assigns development of distribution plant to engineering staff, and ensures that it is developed in an economical and logical manner for the complete period of its depreciation life. Analyzes field reports and load forecasts to ensure adequacy of present systems and as a basis for annual revision of forecasts. Prepares feasibility studies on need to extend operation to new areas, considering such factors as field services, designs, and estimates, appraisal of existing electrical distribution systems, and economic matters. Ensures that acquired distribution systems are integrated with existing plant. Provides advice, as required, on problems of operating distribution systems, particularly with regard to system co-ordination, voltage levels, transformer connections, series and shunt capacitor installations, flicker problems and power-bank designs.

May be concerned with a particular type of distribution engineering and be designated accordingly; for example,

Overhead-Distribution Engineer

Underground-Distribution Engineer

2144-134 ELECTRICAL AND ELECTRONIC AEROSPACE ENGINEER(air & space-craft) DPT:131 GED: 5 SVP: 8 EC: B PA: L 4 5 6 7

Plans and develops aerospace electronic and electrical control equipment for aircraft, spacecraft and rocket vehicles: Performs duties similar to those of 2144-118 ELECTRICAL ENGINEER, GENERAL (prof. & tech., n.e.c.), and 2144-122 ELECTRONIC ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in designing, developing, and test-operating equipment; such as, communications and navigation apparatus, ground-based control systems of vehicles and their payloads, and remote sensing devices. Plans and oversees tests of control equipment during production and after installation.

2144-138 ELECTRICAL-EQUIPMENT ENGINEER(prof. & tech., n.e.c.) DPT:131 GED: 5 SVP: 8 EC: B PA: L 4 5 6 7

Studies design proposals and supervises development, manufacture and installation of various types of electrical machinery and apparatus forming part of complete assembly of industrial and commercial machinery and equipment: Performs duties similar to those of 2144-118 ELECTRICAL ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in developing and supervising the manufacture and installation of various types of motors, generators, converters, rectifiers, transformers, regulators and switch gear that form part of the complete assembly of industrial and commercial machinery and equipment; such as, ignition systems, electric hoists, cranes, portable welding equipment and materials- handling equipment. May develop and supervise manufacture of instruments and equipment used with seismographs, magnetometers and other instruments in petroleum prospecting, and be designated accordingly; for example, Electrical-Prospecting Engineer(petrol. & nat. gas)

2144-142 ELECTRICAL-SYSTEMS-PLANNING ENGINEER(prof. & tech., n.e.c.) DPT:131 GED: 5 SVP: 8 EC: I PA: S 4 5 6 7

Plans and supervises installation, operation and maintenance of electrical generation and transmission systems and conducts feasibility studies for alternative systems: Performs duties similar to those of 2144-118 ELECTRICAL ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in studying proposed systems to establish short-and long-range planning objectives for major electrical components; such as, generation, transmission, subtransmission, transformer and substation facilities. Supervises preparation of detailed plans for extension of a major section of electrical system, considering such factors as, equipment characteristics, ground routing, voltage level, electrical characteristics of lines and allocation of system equipment, using computer services. Analyzes system-load data including historical records and official hydro-load forecasts, and collaborates with distribution engineers to ensure adequate capacity is provided in the system to meet normal and emergency requirements. Advises on preparation of contracts for purchase and sale of power and energy, and for cost of facilities to provide bulk power for major electrical customers served directly from transmission system. May specialize in preparing generating and maintenance schedules, and be designated accordingly; for example, Power-Scheduling Engineer

2144-146 ILLUMINATING ENGINEER(prof. & tech., n.e.c.) DPT:131 GED: 5 SVP: 8 EC: B PA: L 4 5 6 7

Studies design proposals, develops preparation of plans, specifications and cost estimates, and supervises the installation and operation of lighting requirements for buildings, streets, highways and outdoor areas: Performs duties similar to those of 2144-118 ELECTRICAL ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in studying the exteriors of structures, interiors and work sites to assess peculiarities, work activity, aesthetic features, availability of natural light and clients lighting requirements. Measures intensity of light at specific locations, using light-sensitive meters to measure foot-candle value of light. Determines type of lighting required; such as, diffused

light, glare free and directional lighting. Prepares sketches of floor and wall plans, under-pavement conduits and feeder lines for highway-lighting systems and traffic- control lights, showing location, spacing and spread of light sources.

May be concerned with a particular phase of illuminating engineering and be designated accordingly; for example,

Building-Illuminating Engineer
Industrial-Illuminating Engineer
Outdoor-Illuminating Engineer

2144-150 PLANT ENGINEER, ELECTRICAL(prof. & tech., n.e.c.) DPT:131 GED: 5 SVP: 8 EC: B PA: L 4 5 6 7

Supervises operation and maintenance of plant electrical equipment: Performs duties similar to those of 2144-118 ELECTRICAL ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in inspecting and directing tests of new or repaired installations; such as, switchgear, motors, distribution and feeder circuits, protective equipment, lighting systems, communication and other control systems. Studies technical problems of power and heating applications, distribution, protection, illumination and communications systems in a plant. Lays out and selects electrical equipment and materials for plant additions or alterations, and supervises installations. Determines type, number, location and integration of protective devices; such as, relays, circuit breakers, fuses and grounding devices.

2144-154 SIGNAL ENGINEER(prof. & tech., n.e.c.) DPT:131 GED: 5 SVP: 8 EC: I PA: L 4 5 6 7

Plans and develops electrical circuitry and electronic systems for the manufacture and installation of railway signals, train control and identification equipment: Performs duties similar to those of 2144-118 ELECTRICAL ENGINEER, GENERAL (prof. & tech., n.e.c.), and 2144-122 ELECTRICAL ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in developing electric colour-light signal systems and protective safety devices used on railroads; such as, light signals, highway crossing protective devices, and lines and fixtures for centralized-traffic-control installations and sub-stations. Analyzes systems incorporation solid-state coded equipment, digital codes and frequency overlay circuits to allow several messages to utilize one circuit simultaneously.

2144-158 TELEPHONE ENGINEER(prof. & tech., n.e.c.) DPT:131 GED: 5 SVP: 8 EC: I PA: L 4 5 6 7

Studies design proposals, develops central and individual communications systems and facilities, and supervises their construction, installation, maintenance and repair: Performs duties similar to those of 2144-122 ELECTRONIC ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in analyzing traffic and economic studies and engineering estimates from reports of other departments to establish balance between service and economics, and determine type, location and layout of telephone equipment, such as toll, dial, teletypewriters, switching equipment, cable conduits, submarine cables and micro-wave systems. Computes changes in revenue costs to connecting telephone companies, based on additional facilities investment. Advises on protection of telephone service and facilities in conjunction with power companies in the field of inductive co-ordination to prevent noise, cross-talk, electrolysis and other adverse electrical effects. May be concerned with a particular phase of telephone engineering and be designated accordingly; for example, Antenna Engineer
Outside-Plant Engineer
Telegraph Engineer
Transmission-Protection Engineer

2144-162 TRANSMISSION ENGINEER(elec. power) DPT:131 GED: 5 SVP: 8 EC: I PA: L 4 5 6 7

Plans, estimates costs and supervises construction of transmission lines for carrying power from source to distribution points: Performs duties similar to those of 2144-118 ELECTRICAL ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in laying out transmission lines and facilities, prepares drawings, and specifies

type of equipment and materials to be used. Plans equipment installation, and inspects complete work for efficient operation and compliance with specifications and safety standards. Co-ordinates all phases of transmission construction, visits proposed sites, and selects route which will avoid interference with telephone or other lines. Submits data on proposed route to appropriate department to obtain necessary easements. Arranges for aerial, topographical and other surveys to obtain data pertinent to planning line routes. Devises steel- and wood-supporting structures for cables, and prepares sketch showing their location. Performs detailed engineering calculations regarding cable sag, pole strength and cable grounding. Prepares and reviews construction schedules to correlate construction with material and equipment deliveries, verifies appropriations, work orders, contractors' progress payments and other cost control documents.

May be concerned with a particular aspect of transmission engineering and be designated accordingly; for example,

Cable Engineer

Line-Construction Engineer

2145-INDUSTRIAL ENGINEERS

This unit group includes occupations concerned with the design, initiation and development of production procedures to manufacture units in large quantities of high competitive quality, while maintaining low production overhead; safe and efficient operations. Typical areas of specialization include: plant lay-out, production methods and standards, cost and quality control and industrial safety.

2145-110 INDUSTRIAL ENGINEER, GENERAL(prof. & tech., n.e.c.) DPT:131

industrial-efficiency engineer.

GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans and oversees utilization of production facilities to promote efficient, safe and economic use of personnel, materials and equipment:

Consults with management and supervisory personnel to ascertain production objectives and identify problems. Plans and supervises time and motion studies, compares results with predetermined standards and makes recommendations to promote efficiency. Analyzes data obtained from studies to establish time and production standards. Initiates or recommends changes in organization, work procedures, methods, equipment utilization, safety programs and other factors to achieve economic objectives. Analyzes requirements of production department in relation to sales forecasts and specific customer requirements. Selects or develops work flow methods which minimize physical exertion, duplication and delays, and rearranges plant layouts to minimize waste space, movement of personnel between equipment and material-handling distances. Plans and recommends program for development, application and continued maintenance of quality control standards for processing materials or fabricating products into finished material or product. Develops performance standards and evaluates results obtained from quantitative and qualitative studies, using statistical methods to establish standards. Informs supervisors and managers how proposed systems or procedures will increase efficiency and output in their departments. Makes recommendations on selection and use of capital equipment and facilities. Supervises and co-ordinates the work of technologists and technicians.

May act as a consultant and advise clients for a fee.

2145-114 INDUSTRIAL HYGIENIST(prof. & tech., n.e.c.)

DPT:131

GED: 5 SVP: 8 EC: 1 6 7 PA: L 4 5 6 7

Studies, evaluates and conducts a health program to control those environmental factors or stresses arising in a work situation which may cause sickness, injury or significant discomfort and inefficiency among workers:

Collects, measures and analyzes samples of dust, gases, vapors and other potentially-toxic materials to determine adherence to prescribed standards. Investigates adequacy of ventilation, exhaust equipment, lighting and other conditions which may effect employee health. Performs sound-level evaluations to determine relationship of noise to employee discomfort and efficiency. Collaborates with other scientists

and engineers to institute control and remedial measures for potentially hazardous conditions and equipment. Prepares reports, and makes recommendations for control and correction of hazards. Participates in educational meetings to instruct employees in matters pertaining to occupational health. Supervises and co-ordinates the work of technologists and technicians.

2145-118 INDUSTRIAL-SAFETY ENGINEER(prof. & tech.,

n.e.c.)

DPT:131

safety director.

GED: 5 SVP: 8 EC: B PA: L 5 6 7

Analyzes industrial accidents and diseases, identifies potential hazards and develops and introduces safety procedures and devices to minimize conditions which create hazards to life, property, worker morale and efficiency:

Examines plans and specifications for new machinery, equipment, buildings and structures to ascertain if all safety precautions have been included. Determines amount of weight that can be placed on plant floor and other supports with safety. Inspects machinery to determine places where danger of injury exists. Designs, builds and installs or supervises installation of guards on machinery, belts and conveyors. Inspects premises for fire hazards and adequacy of fire protection and inspects fire fighting equipment. Studies each accident to determine and overcome its cause. Educates workers to dangers existing in plant, through accident control campaign. Determines ventilation requirements and adequacy of equipment. Inspects work areas for presence of harmful or hazardous dusts, vapours or gases and advises what remedial measures must be taken. Supervises and co-ordinates the work of technologists and technicians.

May conduct noise level surveys. May conduct safety and first-aid classes or train first-aid instructors. May be concerned with planning and co-ordinating health programs within a plant.

2145-122 TIME-STUDY ENGINEER(prof. & tech., n.e.c.)

DPT:131

industrial-engineering analyst.

GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Develops work measurement procedures and directs time-and-motion studies to promote efficient and economic utilization of personnel and facilities:

Performs duties similar to those of 2145-110 INDUSTRIAL ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in directing or conducting observation of personnel at work to determine time-and-motion factors of job duties and set standards. Applies principles of industrial engineering and psychology to evaluate work-method proposals, and collaborates with other engineers in making recommendations to management affecting work methods, wage rates and budget decisions.

2145-126 MANUFACTURING ENGINEER(prof. & tech.,

n.e.c.)

DPT:131

GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Studies and advises on the operation of industrial machinery and equipment to improve its operational efficiency:

Performs duties similar to those of 2145-110 INDUSTRIAL ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in studying hardening, welding, plating, cleaning and other processes, utilizing new or existing machinery and equipment. Plans sequence of operations and efficient steps of manufacturing such as cutting, shaping or forming material. Evaluates performance of existing machinery and equipment to determine suitability for manufacturing process. Recommends replacement or modification of new or existing machinery to ensure operating efficiency within economic limits predetermined by company policy. Co-ordinates work of research and design groups with manufacturing and production departments and acts as a consultant for manufacturing establishments engaged in designing new products.

2145-130 METHODS ENGINEER(prof. & tech., n.e.c.) DPT:131
methods designer.
 GED: 5 SVP: 8 EC: 1 PA: S 7

Analyzes industrial and commercial projects and administrative, operational and office procedures and makes recommendations regarding organization, methods of work and sequence of operations: Performs duties similar to those of 2145-110 INDUSTRIAL ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in evaluating operational plans, drawings and other specifications of product to be made or service to be rendered, and examines administrative procedures, to identify essential operations. Decides steps to be followed in the process or procedure to select least expensive and most efficient operational method.

2145-134 PRODUCTION ENGINEER(prof. & tech., n.e.c.) DPT:131
production planner.
 GED: 5 SVP: 8 EC: 1 PA: S 5 6

Oversees preparation and improvement of production procedures in industrial plant or office: Performs duties similar to those of 2145-110 INDUSTRIAL ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in planning and initiating production line methods and sequence of operations to ensure efficient and economic progress of work. Prepares production master plan, taking into consideration sequence and lead time of each operation, tool requirements, machine loads, material and manpower needed and other factors. Plans and schedules contract work, and schedules work flow for each department and operation according to previously established manufacturing sequences. Prepares production reports and charts on progress of work.

2145-138 QUALITY-CONTROL ENGINEER(prof. & tech., n.e.c.) DPT:131
 GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Plans and recommends program for development, application and maintenance of quality-control standards for processing materials into finished materials products: Devises quality-control methods for production-line staff and other groups, and develops procedures for inspecting, testing and evaluating new materials and finished products, to ensure adherence to engineering specifications. Assists engineering and sales staff in determining standards for new and existing products. Supervises technologists and technicians engaged in measuring and testing products and tabulating quality and reliability data. Compiles and writes training material and conducts training sessions on quality-control methods.

2147-MECHANICAL ENGINEERS

This unit group includes occupations concerned with applied research, development and design of mechanical equipment and its manufacture; supervision of the operation, maintenance or repair of machines that produce, transmit or consume power or energy and the tools with which machinery and equipment are made, and evaluation of installed plant and processes related to machines. Typical areas of specialization include: heating, air-conditioning, refrigeration, automotive, tool and power engineering.

2147-110 POWER ENGINEER, MECHANICAL(prof. & tech., n.e.c.) DPT:031
power-plant engineer.
 GED: 6 SVP: 8 EC: 1 5 6 PA: L 4 7

Designs thermal power plants, prepares specifications, and advises on erection, operation and maintenance: Performs duties as described under master title, 01-060 DESIGN ENGINEER (prof. & tech., n.e.c.). Designs pressure vessels and plant lay-outs using, structural, thermodynamic and operating principles as

applied to steam-plants, refineries, thermal and nuclear power and process plant equipment. May be concerned with a specific type of power engineering and be designated accordingly, Thermal-Power Engineer

2147-114 TOOL ENGINEER(prof. & tech., n.e.c.) DPT:031
machine-tool designer.
 GED: 6 SVP: 8 EC: 1 5 6 PA: S 4 7

Designs machine tools and machinery used for industrial purposes: Performs duties as described under master title, 01-060 DESIGN ENGINEER (prof. & tech., n.e.c.). Designs and develops new, or modifies existing machine tools and machinery; such as, dies, lathes, jigs, fixtures and attachments. May design a specific type of machine or tool and be designated accordingly; for example, Design Engineer, Oil-Well Equipment Gauge Designer Tool and Die Designer

2147-118 MECHANICAL ENGINEER, GENERAL(prof. & tech., n.e.c.) DPT:131
 GED: 5 SVP: 8 EC: 1 5 6 PA: L 5 6 7

Arranges, supervises or conducts the study, design, development, construction, operation and maintenance of machines, mechanisms and processes by performing any combination of the following duties: Prepares designs and cost estimates for machines, mechanisms and industrial processes. Analyzes and solves problems concerned with the utilization of power, machinery, materials and equipment as a result of research and experiments. Collates data and writes reports. Supervises preparation of working drawings and specifications, indicating materials to be used and the method of manufacture. Directs feasibility studies, construction, modification and final testing of prototypes, products or pilot plants. Evaluates installed plants, mechanical processes and products to ensure compliance with specifications and safety standards, and recommends modifications, repairs or maintenance procedures. Supervises and co-ordinates the work of technologists and technicians. May work as a consultant or collaborate with engineers and scientists in other disciplines and advise clients for a fee.

2147-122 AUTOMOTIVE ENGINEER(prof. & tech., n.e.c.) DPT:131
 GED: 5 SVP: 8 EC: 1 5 6 PA: L 3 6 7

Studies design specifications, conducts tests, and advises on performance of automotive components: Performs duties similar to those of 2147-118 MECHANICAL ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in testing the performance of automotive components; such as, engines, transmissions, power trains, steering mechanism and brakes to ensure mechanical efficiency and suitability, economical operation and lower manufacturing costs. May specialize in a particular type of engine or component of an automotive vehicle and be designated accordingly, Internal-Combustion Engineer

2147-126 HEATING, VENTILATING AND AIR-CONDITIONING ENGINEER(prof. & tech., n.e.c.) DPT:131
 GED: 5 SVP: 8 EC: 1 PA: L 4 6 7

Studies design specifications of structures, and develops and advises on heating, ventilation and air-conditioning equipment for human comfort and industrial use: Performs duties similar to those of 2147-118 MECHANICAL ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in designing systems, pneumatic controls and electrical circuits of central and utility plant installations to supply heating, ventilation and air-conditioning to homes, factories, schools and other structures. Develops systems to decontaminate air and circulate purified air, with minimum demands on power supplies.

2147-130 LUBRICATION ENGINEER(prof. & tech., n.e.c.)
DPT:131
GED: 5 SVP: 8 EC: 1 PA: S 4 6 7

Develops, tests and advises on the most efficient and economical oil, grease, and dry lubricant or metal machining fluids for engines, machine tools and other mechanical equipment:

Analyzes design specifications, construction, operation and servicing of equipment or products, and consults with designers, operators and maintenance personnel to determine lubrication problems. Recommends lubricants to reduce effects of friction, wear, vibration, power loss, corrosion and leakage. Conducts investigations and experimental tests to develop new types of lubricants. Tests measuring and recording instruments, pumps, filters and regulators used to evaluate lubricants. Develops and writes operating procedures indicating factors such as rates of feed of lubricants under various conditions, frequency of change, methods of cleaning and filtering, reclamation and storage techniques. Conducts seminars for training and guidance of marketing staff. Plans and arranges programs to implement product changes and improvements, and collates information received from area sales representatives. Supervises and co-ordinates the work of technologists, and technicians.

2147-134 MECHANICAL ENGINEER, GAS UTILIZATION(prof. & tech., n.e.c.) DPT:131
utilization engineer.
GED: 5 SVP: 8 EC: 1 6 PA: L 5 6 7

Designs equipment and solves engineering problems concerned with industrial and domestic utilization of manufactured or natural gas:

Performs duties similar to those of 2147-118 MECHANICAL ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in studying industrial processes to determine where and how gas-fuel consuming equipment can be utilized, and prepares designs to meet process requirements.

May solve problems concerned with air-conditioning and heating units, using gas as a source of power. May endeavour to convince industrial concerns of advantages of using gas over oil, coke, coal or electricity as a source of power for various operations.

2147-138 PROPULSION ENGINEER, AEROSPACE VEHICLES(air & space-craft) DPT:131
GED: 5 SVP: 8 EC: B 5 7 PA: L 4 7

Designs and supervises development and operation of flight propulsion systems:

Performs duties similar to those of 2147-118 MECHANICAL ENGINEER, GENERAL (prof. & tech., n.e.c.). Designs and develops aero-engines, rocket motors, power-plant systems, gearings and transmission. Plans and designs power-plant installations. Prepares and supervises test programs and analyzes test data to ensure propulsion systems meet design standards.

2147-142 REFRIGERATION ENGINEER(prof. & tech., n.e.c.)
DPT:131
GED: 5 SVP: 8 EC: 1 7 PA: L 4 6 7

Studies design specifications of structures, develops and advises on refrigeration systems and equipment, primarily for industrial use:

Performs duties similar to those of 2147-118 MECHANICAL ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in designing electrical controls and circuits for refrigeration systems including thermo-electric and thermionic systems. Studies effects of certain liquefied gases as direct refrigerants for special low-temperature purposes. May perform some of the duties of 2144-118 ELECTRICAL ENGINEER, GENERAL (prof. & tech., n.e.c.).

2151-METALLURGICAL ENGINEERS

This unit group includes occupations concerned with studying properties and characteristics of metals; developing, controlling and advising on processes for the extraction of metals from their ores; developing alloys; overseeing metal-manufacturing processes for making finished products. Physi-

cal Metallurgists and Metallographers are classified in Unit Group 2119, OCCUPATIONS IN PHYSICAL SCIENCES, N.E.C.

2151-110 METALLURGICAL ENGINEER(prof. & tech., n.e.c.) DPT:131
metallurgist, extractive.
GED: 5 SVP: 8 EC: 1 5 6 7 PA: L 4 5 6 7

Studies the properties of metals, develops and advises on various processes to win metals from their ores, to produce iron, steel and other metals:

Studies ore production problems in pyrometallurgy and hydrometallurgy to determine the most efficient method of producing ores in commercial quantities. Co-ordinates recovery of samples from various stages of processing, for laboratory analysis. Advises operations personnel on process changes, reagent consumption and electric current adjustments required to obtain desired process, and on quality control. Specifies temperature adjustments, charge mixtures and other variables in blast-furnace operations to obtain pig iron and steel or other ore concentrate of specified quality. Investigates methods of improving metallurgical processes; such as, selective oxidation, electrolysis and distillation, to extract lead, mercury, nickel and other ferrous and non-ferrous metals from their ores. Prepares cost budget of operations to evaluate economic feasibility of processes. Supervises and co-ordinates the work of technologists, and technicians.

May specialize in extraction of ferrous, non-ferrous or a particular metal. May be concerned with a particular aspect of metallurgical engineering and be designated accordingly; for example,
Foundry Metallurgist
Hydrometallurgical Engineer
Mineral-Dressing Engineer
Mould-Design Engineer
Pattern Engineer
Pyrometallurgical Engineer

2153-MINING ENGINEERS

This unit group includes occupations concerned with conducting studies on mining engineering problems; determining mine location; planning and designing the development of the mines, mine facilities, systems and equipment; advising on methods of extracting coal, minerals and metal-bearing ores from the earth; planning; organizing and supervising the extraction of minerals and their preparation or processing. Typical areas of specialization include: operation of mines and mine safety, ventilation, water supply, power, communications and maintenance of equipment.

2153-110 MINING ENGINEER(prof. & tech., n.e.c.) DPT:131
mineral engineer.
GED: 5 SVP: 8 EC: B 6 7 PA: L 4 5 6 7

Determines location, and prepares plans for extraction of coal, minerals and metal-bearing ores from the earth, and the design and development of mining facilities:

Conducts preliminary surveys of mineral deposits, in collaboration with geologists or prospectors, to ascertain whether ore can be extracted economically. Determines most suitable method, or combination of methods, of extraction by considering factors; such as, depth of overburden, character of deposit and surrounding strata. Prepares plans for location and construction of mine shafts, tunnels and chambers, and ensures consideration is given to using proper drilling and blasting techniques. Selects most efficient and economical underground materials-handling equipment to transport minerals to the surface. Collaborates with engineers, in other disciplines, to design, select or provide machines, systems or facilities that are best suited to mine's requirements; such as, separating, cleaning, grading and reduction equipment and access roads, water and power supply, drainage, ventilation, mine railways and conveyors. Plans and co-ordinates utilization of manpower and equipment consistent with efficiency, safety, and environmental conditions. Prepares operation and project estimates, and controls expenditures when mine comes into production. Supervises and co-ordinates the work of technologists and technicians.

May work as a consultant and advise clients for a fee. May coordinate mine-rescue and recovery facilities by ensuring that rescue stations are properly maintained and trained rescue personnel are located at the mine. May specialize in one particular phase of mining engineering and be designated accordingly; for example,

Mine-Lay-Out Engineer
Mine-Planning Engineer
Mine-Production Engineer
Mine-Ventilation Engineer

2154-PETROLEUM ENGINEERS

This unit group includes occupations concerned with studying geological surveys, earth samples and other data to advise on the means of developing oil and gas fields and the equipment to be used in the extraction, storage and initial treatment prior to transportation. Typical areas of specialization include: exploration, drilling, core and mud analysis, conservation and transportation.

2154-110 CHIEF-PETROLEUM ENGINEER(oil & nat. gas)

DPT:031

GED: 6 SVP: 8 EC: B PA: S 5 6 7

Plans and directs activities of engineering departments of petroleum company to develop oil fields and pipelines, and advises management on engineering problems:

Apportions work among engineering staff engaged in drilling new wells, gas or oil production, maintaining well logs, developing and improving drilling and production equipment, investigating composition of drilling mud, dehydration of crude petroleum and recovery procedures for oil and gas. Reviews engineering designs for accuracy of presentation. Formulates plans, designs, estimates and specifications for oilfield or pipeline construction, oil and gas drilling, pump station construction, crude oil treating units, maintenance, modification and modernization programs. Supervises computation of operating budgets, reports and special studies to assist in evaluation of engineering programs. Supervises selection, installation, use and repair of oilfield exploration and production equipment.

May co-ordinate projected activities with other departments such as electrical, mechanical or civil engineering. May supervise petroleum geologists, geophysicists or seismograph computers in exploration and discovery of oil fields. May give technical advice to drilling and production managers on new techniques developed as a result of experiment or experience. May be classified according to engineering specialty and designated as follows; for example,
Chief Engineer, Drilling and Recovery
Chief Engineer, Production

2154-114 PETROLEUM ENGINEER(prof. & tech., n.e.c.)

DPT:131

GED: 5 SVP: 8 EC: B 6 PA: L 4 5 6 7

Studies and advises on petroleum and natural gas extraction engineering problems and plans, organizes and supervises the extraction of petroleum and natural gas:

Studies geological surveys, and other data, with samples and advises on types of derrick and drilling equipment to be used. Computes and maps inclination of boreholes from photographic records and observations obtained from subsurface directional surveys. Plans method of drilling to maintain verticality of borehole and directs plugging and redrilling of crooked holes. Directs drilling crew in use of whipstocks, knuckle joints and special joints. Recommends, and supervises the use of drilling mud and casing cement, and directs gun-perforating, squeeze-cementing and other special techniques to solve drilling problems. Investigates and tests new drilling equipment and suggests any modifications required. Directs testing of boreholes to determine pressures, temperatures, strata encountered and other factors. Devises methods of bringing wells into production and controlling flow of oil or gas. Initiates means to re-establish flow after natural flow has ceased. Recommends procedures for treating oil to remove sediment and water. Supervises maintenance and cleaning of producing wells and operating equipment. Determines oil-gas ratios, of producing wells, and designates allowable flow to meet proration regulations. Compiles logs for each well, production records on flowing wells and other data. Prepares regular engineering reports and

conducts special studies on subjects; such as, salt water enroachment, operating equipment and conservation problems.

May assist on geological and geophysical surveys. May work as a consultant and collaborate with engineers in other disciplines and advise clients for a fee. May specialize in drilling and recovery, production or natural gas-well engineering and be designated accordingly; for example,

Natural-Gas Engineer
Petroleum Engineer, Drilling and Recovery
Petroleum Engineer, Production

2154-118 RESERVOIR ENGINEER, PETROLEUM(prof. & tech., n.e.c.)

DPT:131

GED: 5 SVP: 8 EC: B 6 7 PA: L 4 5 6 7

Analyzes and predicts the behaviour of individual wells and oil and gas reservoirs and their economic significance:

Studies geological samples, records of reservoir pressure, and gas, oil and water production. Utilizes knowledge of basic physical principles of fluid flow and conservation of mass to determine behaviour of reservoir. Correlates this data with the operational data obtained from petroleum engineers to estimate the ultimate production and value of products. Plans recovery schemes, as a result of these studies, taking into consideration well densities, flow rates and recovery methods to determine the most profitable and efficient approach to the exploitation of reservoir. Supervises and co-ordinates the work of technologists and technicians.

2155-AEROSPACE ENGINEERS

This unit group includes occupations concerned with research, design, development, manufacture, and maintenance of aerospace vehicles and equipment for flight in and out of the earth's atmosphere, and preparation of their operational specifications. Typical areas of specialization include: aerodynamics, thermodynamics, mass and weight analysis, systems and weapons control and flight testing. Includes engineers specializing in air-cushion vehicles.

2155-110 AEROSPACE ENGINEER, DESIGN AND

DEVELOPMENT(prof. & tech., n.e.c.) DPT:031

GED: 6 SVP: 8 EC: B PA: L 4 7

Analyzes, evaluates and designs, and advises on development of specifications for aerospace engines, systems, structures, components and support equipment:

Performs duties as described under master title, 01-060 DESIGN ENGINEER (prof. & tech., n.e.c.). Designs and develops aerospace vehicles, systems and components; such as, hydraulic, pneumatic, pressurization, air conditioning, oxygen and fire extinguishing systems, and electronic navigation and communications equipment, ordnance and fire control devices and electro-optical-magnetic sensors and computers. Studies and develops appropriate configuration of aircraft, spacecraft and rocket vehicles. Analyzes behaviour of airflow to determine aerodynamic and thermodynamic qualities. Analyzes new designs or major modifications to determine weight distribution, and advise designers and operators on efficient distribution of equipment and movable loads. Evaluates results of research and prepares reports for manufacturers, regulatory bodies or operators on properties of various materials and effectiveness of various manufacturing processes.

May design and develop specific materials, systems, structures and components and be designated accordingly; for example,

Aerodynamicist(air & space-craft)
Aerospace Engineer, Structures
Aerospace Engineer, Systems Analysis
Aerospace Engineer, Systems Installations

2155-114 AEROSPACE ENGINEER, MASS PROPERTIES(prof. & tech., n.e.c.) DPT:038
weight and balance engineer; weight analyst, aerospace vehicles.
GED: 6 SVP: 8 EC: B PA: L 4 7

Estimates and specifies weights and balances of parts, components and assemblies of aerospace vehicles:
Performs duties as described under master title, 01-060 DESIGN ENGINEER (prof. & tech., n.e.c.). Analyzes weight distribution factors, involved in new design and major modification, and translates resulting mathematical equations into form for solution by analog or digital computer. Combines mathematical solutions with other data to prepare weight distribution estimates for preliminary design studies. Confers with other aerospace engineers to ensure co-ordination of weight and balance estimates and other phases of aerospace vehicle development. Compares efficiency of alternative designs. Develops operational weight and balance, and loading instructions. Studies and develops methods of mass estimation, measurement and control.

2155-118 AEROSPACE ENGINEER, GENERAL(prof & tech., n.e.c.) DPT:131
aeronautical engineer.
GED: 5 SVP: 8 EC: B PA: L 4 6 7

Studies designs for aerospace vehicles; such as, civilian and military aircraft, air cushion vehicles, rockets and satellites, and supervises their manufacture, testing, modification, maintenance and repair by performing any combination of the following duties:
Studies designs and prepares cost estimates for various types of aerospace vehicles, components and support equipment. Examines controls, structural integrity and stability, and other characteristics in a laboratory or under flight conditions. Analyzes and solves problems arising from these experiments to ensure that aerospace vehicles are capable of meeting operational environmental conditions. Studies airframes under stress conditions to determine solutions to problems, such as those resulting from metal fatigue and flutter. Supervises preparation of working drawings and specifications. Supervises the assembly of airframe and installation of engines, instruments and other equipment. Evaluates test flights to ensure vehicle conforms to specifications and safety standards. Recommends or authorizes modifications, repairs or maintenance. Supervises and co-ordinates the work of technologists and technicians.

2155-122 AEROSPACE ENGINEER, FLIGHT-TEST(air & space-craft) DPT:031
GED: 5 SVP: 8 EC: B PA: L 4 7

Plans and directs flight tests of experimental aircraft, space-craft and rocket vehicles, their systems and equipment:
Performs duties similar to those of 2155-110 AEROSPACE ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in studying and interpreting specifications issued by regulatory agencies, customers and design engineers. Prepares test schedules and flight plans of experimental aerospace vehicles and participates in flight tests. Evaluates design and specifies purchase of test equipment. Supervises calibration of test equipment, and recording and compiling of flight test data. Evaluates and reports on flight test results. Develops operational techniques and prepares related instructions.

2155-126 AEROSPACE ENGINEER, MATERIALS AND PROCESSES(air & space-craft) DPT:031
GED: 5 SVP: 8 EC: B PA: L 4 7

Plans and oversees control of materials and processes in the manufacture and repair of aircraft, space-craft and rocket vehicles, their powerplants and equipment:
Performs duties similar to those of 2155-110 AEROSPACE ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in preparing specifications and procedures for the use of material and for processes; such as, shop applications, standards, inspection and tests. Advises engineering, manufacturing and quality control departments on properties, application, treatment and salvage of materials and substitute materials. Maintains liaison with material suppliers.

2155-130 AEROSPACE ENGINEER, FLIGHT OPERATIONS(air & space-craft) DPT:131
GED: 5 SVP: 8 EC: B PA: L 4 6 7

Co-ordinates the flight tests of air and space-craft in production and in operations:
Compiles material for operating manuals. Prepares flight tests required as a result of overhaul and maintenance of aerospace vehicles. Participates in flight tests as aircrew member, and evaluates test results. Supervises and advises aircrew of flight procedures to ensure proper aircraft operation. Performs other engineering functions in connection with vehicle flight performance and related operational problems.

2155-134 AEROSPACE ENGINEER, FLIGHT SUPPORT(air & space-craft) DPT:138
GED: 5 SVP: 8 EC: B PA: L 4 7

Studies, plans and advises on the utilization of flight support equipment and facilities:
Specifies equipment for various ground-support functions; such as, ramp equipment including air-conditioning, refuelling, launching and test equipment, installations and systems. Evaluates available support equipment for suitability of performance. Confers with designers and suppliers and suggests modifications to equipment to ensure compliance with requirements. Prepares test schedules to verify performance of flight-support equipment. Schedules the availability of equipment in proper locations and quantities to meet operational requirements. Supervises and co-ordinates the work of technologists and technicians.

2157-NUCLEAR ENGINEERS

This unit group includes occupations concerned with applying the principles and theory of nuclear science to problems related to release, control and utilization of nuclear energy for the transmutation of elements and the productive efficiency of nuclear reactors. Typical areas of specialization include: design of components for reactors and nuclear energy systems, analysis of radiation effects and shielding-design problems, processing radioactive materials and waste, and radiological-safety control.

2157-110 NUCLEAR ENGINEER(prof. & tech., n.e.c.) DPT:031
GED: 6 SVP: 8 EC: I 6 PA: L 7

Applies engineering principles in the research, design and development of plant and equipment for the release, control and utilization of nuclear energy, and plans and supervises their development, manufacture, installation, maintenance and repair:
Performs duties as described under master title, 01-060 DESIGN ENGINEER (prof. & tech., n.e.c.) Designs components of reactors and nuclear energy systems. Analyzes radiation effects and shielding-design problems in the processing of radioactive materials and radioactive waste. Ensures that radiological safety-control measures are instituted and enforced. Directs operational and maintenance activities in nuclear facilities. Supervises and co-ordinates the work of technologists and technicians in various aspects of nuclear engineering.

2159-ARCHITECTS AND ENGINEERS, N.E.C.

This unit group includes occupations, not elsewhere classified, concerned with the practical application of the laws and principles of architecture and engineering for the design, development, installation, production, utilization or maintenance of machines, materials, instruments, structures, processes and services. Marine engineer officers in water transportation are classified in Unit Group 9153, ENGINEER OFFICERS, SHIP.

2159-110 AGRICULTURAL ENGINEER(prof. & tech., n.e.c.)

DPT:031

GED: 6 SVP: 8 EC: B PA: L 5 6 7

Studies and advises on engineering problems unique to agriculture, designs agricultural machinery, structures and equipment, and supervises their manufacture, construction and installation:

Performs duties as described under master title 01-060, DESIGN ENGINEER (prof. & tech., n.e.c.). Develops criteria for design, manufacture or construction of equipment, structures and facilities, such as machines for agricultural automation, processing equipment and systems for dairy and food plants, and controlled atmosphere buildings for animal and food products in conjunction with civil and mechanical engineers. Designs sensing, measuring and recording devices and instrumentation for the study of problems such as, effects of temperature, humidity and light on plants and animals, or the relative effectiveness of different methods of applying insecticides. Designs and supervises installation of equipment and instruments used to evaluate and process farm products, and to automate agricultural operations. Designs and supervises construction of agricultural buildings and accessory equipment incorporating materials of all kinds, in accordance with Farm-Building Standards of the National Building Code. Supervises and co-ordinates the work of technologists and technicians.

May work as a consultant and advise clients for a fee. May specialize in the design and layout of a particular product or system in food or dairy product processing and be designated accordingly; for example, Dairy-Plant Engineer.

2159-114 CERAMICS ENGINEER(prof. & tech., n.e.c.)

DPT:031

GED: 6 SVP: 8 EC: I 3 6 7 PA: L 4 7

Conducts research, design and development of machinery and processing techniques concerned with the manufacture of ceramic products:

Supervises testing of physical, chemical and heat-resisting properties of materials, such as clays and silicas. Analyzes test results to determine combination of materials which will improve quality and reduce costs of products. Conducts research into processing methods including forming and firing of raw materials, to develop ceramic products, such as ceramic furnace liners, ceramic tools and other products. Prepares design of equipment and apparatus for forming, firing and handling products. Co-ordinates testing of finished products for characteristics; such as, texture, colour, durability, glaze and refractory properties. Supervises and co-ordinates the work of technologists, and technicians engaged in various ceramic processes. See also definition for term title, 02-310 RESEARCH ENGINEER (prof. & tech., n.e.c.).

May specialize in one branch of ceramic production; such as, brick, glass, crockery, tile or pipe. May specialize in developing heat-resistant and corrosion-resistant materials for use in jet and rocket propulsion and in nuclear energy field.

2159-118 MARINE ENGINEER(ship & boat bldg.) DPT:031

GED: 6 SVP: 8 EC: B PA: L 2 3 4 5 6 7

Designs and supervises installation and repair of marine power plants, propulsion systems, heating and ventilating systems and other mechanical and electrical equipment in ships and marine facilities:

Performs duties as described under master title, 01-060 DESIGN ENGINEER (prof. & tech., n.e.c.). Studies drawings and specifications and performs complex calculations to conceive equipment and systems designed to meet requirements of marine craft or facility. Prepares cost estimates for engineering contract bids, referring to technical drawings and specifications. Supervises repair of ship equipment; such as, power plants, propulsion systems and other electrical and mechanical equipment. Oversees and evaluates operation of this equipment during acceptance testing and shakedown cruises. Supervises and co-ordinates the work of technologists and technicians in various phases of marine engineering.

2159-122 SHIP-CONSTRUCTION ENGINEER(prof. & tech., n.e.c.) DPT:031

marine architect.

GED: 6 SVP: 8 EC: B PA: L 2 3 4 5 6 7

Designs and supervises construction, repair, and trials of marine vessels and floating structures of all types:

Consults with owners, shipping organizations and oceanographic research institutes to prepare preliminary ship designs and capital and life time cost estimates. Carries out studies; such as, hydrostatic, hydrodynamic, strength and vibration calculations, to determine optimum vessel weight and to ensure that proposed design meets desired performance requirements. Establishes operational constraints and alternatives as a result of these studies. Directs preparation of detailed ship-design contract package consisting of drawings, specifications and building contracts, co-ordinating the input of other engineering participants, such as engine designers and systems engineers. Obtains approval of plans by governmental or other regulatory agencies, as required by legislation. Exercises overall supervision of ship during construction, either as the owners' representative or shipbuilders' superintendent, by enforcing uniform standards and quality assurance inspections and supervises and co-ordinates the work of technologists and technicians. Directs preparation of, and approves, launching calculations. Attends inspections and trials to ensure vessel is classed by regulatory authorities and that all contractual requirements have been met.

May negotiate technical or financial changes in contract and approve term payments. May specialize in design of naval vessels and be designated accordingly, Naval Architect

2159-126 GAS AND STEAM-DISTRIBUTION

ENGINEER(prof. & tech., n.e.c.)

DPT:081

GED: 6 SVP: 8 EC: I PA: L 4 7

Designs, estimates costs and prepares specifications for the installation, maintenance and repair of gas or steam mains and for extension of existing mains and distribution equipment and facilities:

Performs duties as described under master title, 01-060 DESIGN ENGINEER (prof. & tech., n.e.c.). Studies maps of existing mains and investigates records of other underground pipe and cable installations to avoid interference with existing installations. Supervises and co-ordinates the work of technologists and technicians. May supervise the survey of the location of underground installations to ensure proper grading. May prepare instructions for operation and maintenance of meters, pipes, mains, odorizers and related distribution facilities. May be concerned with a particular type of energy being distributed and be designated accordingly; for example, Gas-Distribution Engineer(utilities, n.e.c.)

Steam-Distribution Engineer(utilities, n.e.c.)

2159-130 CRYOGENICS ENGINEER(prof. & tech., n.e.c.)

DPT:138

GED: 6 SVP: 8 EC: I 2 6 7 PA: L 4 7

Applies established engineering principles to design and development of cryogenic materials and equipment, and supervises the construction of cryogenics equipment and plants:

Performs duties as described under master title, 01-060 DESIGN ENGINEER (prof. & tech., n.e.c.). Produces oxygen and nitrogen supplies using processes, such as, liquefaction and fractional distillation of air. Designs equipment; such as, special pumps, valves, insulation systems and other components, for experimental use at low temperatures. Develops methods and techniques to liquefy natural gas, for use in various industrial processes, and for shipment by road, rail and sea. Supervises and co-ordinates the work of technologists and technicians in direct support of a particular phase of cryogenic engineering activity.

May report or supervise preparation of reports on research activity, and collate data in coherent descriptions of cryogenic phenomena.

2159-134 GEOLOGICAL ENGINEER(prof. & tech., n.e.c.)

DPT:031

GED: 5 SVP: 8 EC: B 6 PA: L 4 5 7

Investigates prospective areas for the occurrence of geological structures that might be oil or mineral bearing:

Examines and performs quantitative analysis of seismic and other geological data, using geochemical instruments to assess development potential of mineral, gas, oil and underground water resources. Interprets records of computations and of electronically processed seismic data, and prepares seismic cross-section charts to evaluate methods used to locate oil and mineral-bearing structures. Gathers and studies data relating to ore deposits to advise mining engineers and production personnel on most economical methods of extraction. Interprets records obtained in the field. Advises on engineering

problems encountered in projects; such as, construction of dams, bridges, tunnels and large buildings, applying results of geological investigations. Supervises and co-ordinates the work of technologists and technicians.

May conduct laboratory research into development of new instruments and improved techniques using these instruments. May be concerned with one particular phase of geological engineering and be designated accordingly; for example, Mining Geologist

2159-138 FOREST ENGINEER(forest. & log.) DPT:131
logging engineer.

GED: 5 SVP: 8 EC: B PA: L 5 6 7

Plans timber cutting, loading and storing areas:

Performs duties similar to those of 2143-110 CIVIL ENGINEER, GENERAL (prof. & tech., n.e.c.). Specializes in reviewing survey maps and air photographs to determine most suitable location for cutting, storing and loading areas. Selects equipment and devises methods of handling and transporting logs. Advises on and supervises construction, installation and use of structures, equipment, transportation facilities, and maintenance of roads, bridges, camp sites and camp structures.

2159-142 WELDING ENGINEER(prof. & tech., n.e.c) DPT:131

GED: 5 SVP: 8 EC: I 5 6 PA: L 4 5 6 7

Studies design proposals, and develops shop and field procedures and techniques for the fabrication of welded connections and welding equipment:

Analyzes mechanical drawings and specifications to determine most practical design to facilitate economical welding of parts, taking into consideration such factors as, equipment available, types of joint preparation, use of jigs, positioners and manipulators, and the use of formed plate, tubular sections, forgings and castings. Recommends use of metals, alloys, welding equipment and techniques according to specification of product. Develops suitable sequences for shop and field welding to control distortion and residual stress, static and fatigue-loading and joint behaviour. Tests weldments to ensure joints meet requirements, using radiographic and other apparatus. Conducts experiments to develop and improve equipment and methods of welding pure metals and alloys, utilizing knowledge of physical metallurgy. Supervises quality control of welding processes independently or in conjunction with inspection department. Supervises and co-ordinates the work of technologists and technicians in various phases of welding activities.

2159-146 FIRE-PREVENTION ENGINEER(prof. & tech., n.e.c.) DPT:181

GED: 5 SVP: 8 EC: B6 PA: S 5 6 7

Conducts studies to determine cause of fires and their prevention, and prepares educational material concerning fire prevention:

Tests and classifies building materials, chemicals, paints, interior design materials or other combustibles, and catalogues and publishes results to assist users, such as, safety associations, governments, public or private institutions in establishing standards for building codes. Determines safe distances from the public for storage of combustible materials. Studies and analyzes reports and statistics to determine fire causes and losses. Investigates fire hazards in building construction and overheating of electrical systems, and develops safety measures to overcome them. Prepares instructions, posters, films, codes and regulations to prevent fires and to minimize fire hazards.

2159-150 TRAFFIC ENGINEER(prof. & tech., n.e.c) DPT:138
traffic-operations engineer.

GED: 5 SVP: 8 EC: I PA: S 5 6 7

Studies vehicular-traffic conditions on urban or rural roads and develops plans for altering conditions to promote safety and reduce congestion:

Studies traffic conditions from fixed position, vehicle or helicopter to detect unsafe or congested conditions and observe location of alternative routes. Evaluates statistical and physical data supplied by engineering staff, regarding such factors as vehicle count per mile, load capacity of pavement, feasibility of widening pavement and future projected traffic loads. Conducts experiments with alternative traffic plans on nearby routes and on same route with modification in signals, traffic direction, or other control devices and techniques. Evaluates results of experiments and recommends changes to improve conditions. Confers with various citizens, businessmen and government officials to resolve complaints concerning traffic problems requiring co-operation of public or other jurisdictions. Recommends major capital investment expenditures to responsible officials. Supervises and co-ordinates the work of technologists and technicians in various phases of traffic engineering.

May prepare speeches and public-information material to enlist co-operation of public in reducing congestion and accidents. May integrate results of traffic studies with work of other agencies to develop transportation plan.

2159-154 CORROSION ENGINEER(prof. & tech., n.e.c.) DPT:168

GED: 5 SVP: 8 EC: B PA: L 5 6 7

Applies accumulated scientific knowledge to the abatement of corrosion damage, by practical and economic means:

Designs cathodic protection systems to prevent corrosion of buried pipelines, steel jetties, submerged marine structures and off-shore drilling rigs. Recommends metals suitable for specific industrial applications to eliminate galvanic, stress-cracking and other forms of corrosion in chemical process plants, pulp and paper plants, ships, pipelines and bridges and other structures. Develops and tests new and better protective coatings, and prescribes proper dosages of corrosion inhibitors to combat air, water and soil pollution and corrosion. Develops anodic passivity systems for chemical storage tanks to eliminate corrosion and contamination. Determines existence of, and takes measures to prevent and remove damaging stray electric currents. Studies destructive properties, corrosive action and problems of deterioration of soil, suggests methods of preventing or mitigating the trouble, and explains the mechanisms of corrosion failures to scientists, engineers and other persons concerned.

2159-158 LOGGING ENGINEER, OIL WELL(prof. & tech., n.e.c.) DPT:261

GED: 5 SVP: 8 EC: B6 PA: L 4 5 6 7

Measures sonar, electrical or radioactive characteristics of earth formations in oil-or-gas well boreholes to evaluate productivity of oil-or-gas-bearing reservoirs:

Signals hoist operators to lower measuring instruments into well and observes oscillograph and meters on control panel to verify operating conditions of instruments. Turns dials on control panel to adjust instrument for specified recording and starts recording device when instruments reach bottom of borehole. Prints copies of recorded graphs in truck dark room. Interprets graphs to indicate identity, porosity, oil-or-gas-bearing content and productivity of geological formations. Measure borehole diameters, direction of borehole and inclination of geological strata, using microcalipers, clinometers and dipmeters.

216-OTHER OCCUPATIONS IN ARCHITECTURE AND ENGINEERING

This minor group includes occupations concerned with collecting, analyzing and plotting marine survey data and surveying the earth's surface; preparing working plans, detailed drawings and maps to specific dimensions for engineering, manufacturing, construction and exploration purposes; and carrying out technological and technical functions in specializations, such as chemical, civil, electrical, industrial and aeronautical engineering; and in architecture, using knowledge of scientific, mathematical and draughting design and other principles. These occupations are classified in the following unit groups:

- 2160 Supervisors, Other Occupations in
Architecture and Engineering**
- 2161 Surveyors**
- 2163 Draughtsmen**
- 2165 Architectural and Engineering
Technologists and Technicians**
- 2169 Other Occupations in Architecture and
Engineering, n.e.c.**

2160-SUPERVISORS, OTHER OCCUPATIONS IN ARCHITECTURE AND ENGINEERING

This unit group includes occupations as described under the master title, 01-250 SUPERVISOR/FOREMAN (any ind.) concerned with activities of workers engaged in surveying, draughting, and in engineering technology.

2160-110 SUPERVISOR, ARCHITECTURAL AND ENGINEERING TECHNOLOGISTS AND TECHNICIANS (prof. & tech., n.e.c.) DPT:138

Supervises and co-ordinates the activities of technologists and technicians engaged in direct support of architects, and in support of engineers in chemical, civil, electrical, industrial, mechanical, petroleum and aerospace engineering and related fields, (Unit Group 2165):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

May be concerned with the supervision of technologists and technicians in a particular branch of architecture or engineering and be designated accordingly,
Supervisor, Material Testing

2160-114 SUPERVISOR, DRAUGHTSMEN (prof. & tech., n.e.c.) DPT:138 chief draughtsman.

Supervises and co-ordinates the activities of draughtsmen engaged in the preparation of working plans and detailed drawings, maps, specifications and estimates in manufacturing, industrial, commercial and other establishments, (Unit Group 2163):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

May be concerned with the supervision of a particular branch or specialty and be designated accordingly; for example,
Draughtsman, Chief Design (elec. power; utilities, n.e.c.)

Supervisor, Electrical Draughting
Supervisor, Estimator and Draughtsman (elec. power)
Supervisor, Mapping (oil & nat. gas)
Supervisor, Marine Draughting
Supervisor, Mechanical Draughting

2160-118 SUPERVISOR, SURVEYORS (prof. & tech., n.e.c.) DPT:138

Supervises and co-ordinates the activities of surveyors and survey parties engaged in determining linear and angular measurements of points, areas, elevations and boundaries, or contours and other topographical features, or in hydrographic mapping, (Unit Group 2161):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

May be concerned with the supervision of a particular section, area or region and be designated accordingly.

2161-SURVEYORS

This unit group includes occupations concerned with surveying land surfaces to determine boundaries and exact locations, delineate topographic features and measure land areas for the purpose of mapmaking and construction work, surveying mines and delineating surface and underground features to control direction and extent of mining; surveying sea, river and lake beds for such purposes as chart making, determining navigable channels and planning construction of marine structures, and analyzing aerial photographs to prepare or revise topographic maps and charts.

2161-110 HYDROGRAPHIC SURVEYOR (prof. & tech., n.e.c.) DPT:131 marine surveyor. GED: 5 SVP: 7 EC: B 4 PA: M 2 3 4 5 6 7

Performs a variety of complex technical functions in the collection, analysis and plotting of marine survey data used in the production of nautical publications, such as navigational charts, sailing directions and tide tables:

Studies existing documents on the location of geographic control positions, field manuscripts, charts, and other publications to plan method and procedure of executing hydrographic survey. Assists in the precise locating of visual and electronic position-finding shore stations, such as triangulation and traversing. Determines angular and linear measurements, and relates them to existing geodetic control points, using sextant, tellurometer, transit, level and electronic position-finding devices. Installs temporary tide gauge that automatically monitors times and heights of tide movements, at site of survey, to establish tidal bench mark. Anchors current meter at predetermined depth below surface to record automatically direction and speed of currents at fixed intervals. Directs operation of survey launch or recommends positioning and manoeuvring of ship as required to conduct survey. Determines depth and nature of bottom by running lines of soundings, using electronic-sounding devices and bottom-sampling equipment while simultaneously fixing position of vessel, using electronic position-finding equipment and horizontal sextant angles of predetermined positions ashore. Locates position of rocks, reefs, shoals and aids to navigation, such as buoys and lighthouses. Plots data on field sheet by inking in depths, and bottom-contour lines, and transferring shore line and other topographical details from aerial photographs, topographical maps, and stadia surveys, using drawing instruments. Assists in the calibration of equipment. Takes soundings manually to determine depth and nature of bottom or shoal when closely-spaced soundings are required, using hand lead armed with tallow. Instructs trainees during on-the-job training.

2161-114 SURVEYOR (prof. & tech., n.e.c.) DPT:131 GED: 5 SVP: 7 EC: B 4 6 PA: L 2 4 5 6 7

Surveys earth's surface and oversees engineering survey parties engaged in determining exact location and measurement of points, elevations, lines, areas and contours of earth's surface to secure data used for construction, map making, land valuation and other purposes:

Determines information needed to conduct survey from notes, maps, deeds or other records. Surveys earth's surface, using survey instruments; such as, theodolites, transits, levels and chains, and

verifies accuracy of survey data by calculation. Calculates latitude, longitude, angles, areas and other information for map making from field notes secured by survey party. Keeps accurate records, notes and sketches of work performed or data obtained. Adjusts survey instruments to maintain accuracy or directs instrument man to adjust them. Prepares drawings, such as plot plans, contour drawings and cross sections for land usage planning. Directs activities of survey crew in surveying duties. Prepares land descriptions and plans, searches titles and survey records in survey and registry offices.

May conduct surface and underground surveys at coal or ore mines to control direction and extent of mining. May compute data necessary for driving and connecting underground passages, measure distance which shafts have advanced over set period, and calculate ore removed and broken ore remaining. May photograph topography of ground from air and prepare or revise topographical maps from such photographs, or use special high-accuracy techniques including astronomical observations. May specialize in a kind of survey work; such as, geodesy, topographical mapping, control surveys, geophysical surveys, town planning, supervision of industrial or governmental survey parties, and be designated accordingly; for example, County Surveyor
Dominion-Land Surveyor
Geodetic Computer
Mine Surveyor
Provincial-Land Surveyor
Topographic Surveyor

2161-118 INSTRUMENT MAN(prof. & tech., n.e.c.) DPT:361 GED: 4 SVP: 7 EC: O 2 3 6 PA: M 2 4 5 6 7

Obtains data pertaining to angles, deviations, points and contours used for construction, map making, mining or other purposes, using alidade, transit, level and other surveying instruments:

Compiles notes, sketches and records of data obtained and work performed by members of survey crew. Observes light and mirror signals from distant points to establish angles and elevations above datum plane, usually sea level, using distomat, geodimeter or tellurometer. Makes necessary calculations from data to establish location and elevation of surface features and plots information on maps being developed on plane table. Locates and marks sites selected for conducting geophysical prospecting activities concerned with locating subsurface earth formations. Makes or revises maps in the field from data gathered by means of plane table and alidade. May be concerned with one particular instrument or with one particular aspect of prospecting or surveying and be designated accordingly; for example,
Level Man
Lightkeeper, Triangulation
Plane-Table Man
Surveyor, Geophysical Prospecting(oil & nat. gas)
Transit Man

2161-122 SURVEYOR HELPER(prof. & tech., n.e.c.) DPT:567 GED: 3 SVP: 4 EC: B 2 3 6 PA: M 2 3 4 5 6 7

Helps surveyor as member of crew surveying land areas including underwater beds, by performing any combination of the following duties:

Cuts, marks, tags, and drives or embeds wooden, metal, or concrete stakes into ground to indicate grade settings, markers, or boundaries. Measures distances between survey points, as indicated by surveyor, using steel measuring tape or surveyor's chain. Marks measured point, using keel (marking crayon), paint sticks, tacks, or stakes. Holds level rod, stadia board, or range pole in vertical position at point indicated by surveyor to determine elevation. Moves rod, or target on rod, following hand or verbal signals from instrument man, to determine exact point or reading required. Calls out reading to note keeper or instrument man, or records it in notebook. Blazes (chips) trees to indicate approximate direction of survey line, and location of more accurate marker. Clears brush and debris from line of survey. Transports tools and supplies to work area. Performs inside work preparing equipment, making rough drawings, posting and indexing field books, and maintaining files. See also definition for term title, 02-160 HELPER (any ind.).

May be engaged in a particular task associated with helping surveyor

and survey crew, such as measuring horizontal distances with tape or chain, or holding graduated rod for elevations, and be designated accordingly; for example,

Axman

Chairman

Rodman

Stakeman

2163-DRAUGHTSMEN

This unit group includes occupations concerned with preparing drawings from designers' sketches and specifications for such purposes as manufacture and installation of machinery and equipment, or for construction of buildings, bridges, dams, roads and other civil engineering projects; preparing topographical, political, economic, nautical and other maps and charts; drawing technical manuals dealing with assembly, installation, operation, maintenance and repair of machinery and other equipment; and copying plans and drawings.

2163-110 DRAUGHTSMAN, GENERAL(prof. & tech., n.e.c.)

DPT:261

GED: 4 SVP: 7 EC: I PA: S 4 5 6 7

Prepares general assembly and detail drawings from sketches, specifications and notes, and discussion with designers, for manufacturing, construction and other projects by performing any combination of the following duties:

Studies preliminary sketches, makes calculations and analyzes data prior to producing preliminary drawings and makes any changes in consultation with designer. Selects scale for drawings and determines scaled dimensions, radii, point locations and other data. Prepares working plans for the development, manufacture, and installation of machinery and equipment, and of electrical and electronic circuitry. Completes design drawings, showing structural and mechanical features of docks, buildings, bridges, roads, dams and other architectural or civil engineering projects. Prepares drawings for a wide variety of products, including aircraft and ancillary equipment, marine structures and equipment, household appliances and other manufactured items. Reads catalogues and publications for suitable parts and materials.

May prepare bills of material, estimates of cost and charts of statistical data. May make field or shop trips to obtain measurements, restrictions, pertinent codes and applicable by-laws.

2163-114 CARTOGRAPHER(prof. & tech., n.e.c.) DPT:261 cartographic compiler; cartographic draughtsman; cartographic technician.

GED: 4 SVP: 7 EC: I PA: S 4 6 7

Prepares and revises maps and charts of all types:

Compiles map manuscripts from aerial photographs, other maps, survey notes, records and reports, to portray hydrographic, cultural, relief and other types of features. Prepares reproduction material by scribing on acetate, images of original manuscript to produce final negatives in colour-separated form. Applies names of geographical features, municipalities and other particulars in appropriate positions on original drawing or separate type overlay. Examines final composites to ensure completeness and accuracy. Occasionally accompanies crew in field to verify and complete map detail.

2163-118 DESIGN CHECKER(prof. & tech., n.e.c.) DPT:261 tool-drawing checker.

GED: 4 SVP: 7 EC: I PA: S 4 5 6 7

Examines engineering drawings to correct errors in computing and recording dimensions and specifications:

Compares figures on production layout with drawing, examining angles, tolerances, bend allowance and dimensions, for accuracy. Determines suitability of design, materials, tooling and fabrication sequences, utilizing knowledge of draughting and methods of manufacture. Confers with design personnel to resolve design problems.

2163-122 DETAIL DRAUGHTSMAN(prof. & tech., n.e.c.)
DPT:261
detailer.
GED: 4 SVP: 7 EC: 1 PA: S 4 5 6 7

Prepares detail drawings for a specific part of machines, structures or products:

Studies general assembly drawings, prototype models and other data and makes calculations for preparation of detail parts drawings. Makes detail drawings showing dimensions and material to be used, and related data, for use in production department, utilizing knowledge of materials and manufacturing techniques. Advises production personnel on problems of interpreting drawings or sketches.

May confer with customers and make freehand sketches of approved drawings and designs. May be concerned with preparing detail drawings for a specific machine, structure or product and be designated accordingly; for example,

Auto-Body Design Detailer(motor vehicle)

Detail Man, Furniture(furn.)

Drawing-Detail Man, Sheet Metal(struct., plate & ornam. metal)

2163-126 DRAUGHTSMAN, ARCHITECTURAL(prof. & tech., n.e.c.)
DPT:261
GED: 4 SVP: 7 EC: 1 PA: S 4 5 6 7

Prepares drawings showing internal, external or other architectural features of office blocks, residential structures, industrial, commercial and other buildings:

Performs duties similar to those of 2163-110 DRAUGHTSMAN, GENERAL (prof. & tech., n.e.c.). Prepares preliminary sketches showing proposed internal, external and other principal features, as directed by architect. Makes calculations to determine type and quality of materials required. Prepares working drawings showing plans, elevations, sections and typical details, for use on construction site, using a variety of draughting instruments.

May estimate quantities of materials required for project and compute costs.

2163-130 DRAUGHTSMAN, CIVIL(prof. & tech., n.e.c.)
DPT:261
GED: 4 SVP: 7 EC: 1 PA: S 4 5 6 7

Prepares drawings for the construction of structural, sanitary, transportation, hydrological and other civil engineering projects by performing any combination of the following duties:

Performs duties similar to those of 2163-110 DRAUGHTSMAN, GENERAL (prof. & tech., n.e.c.). Prepares plans for structures, using structural steel, such as bridge trusses, plate girders, roof trusses, trestle bridges and columns and other integral parts. Drafts diagrams of water, gas and sewage disposal systems for use of maintenance crews in diagnosing and locating causes of disturbances or failures. Develops plans for highways and auxiliary projects, such as roads, culverts and bridges from data received from field surveys. Drafts detailed drawings of wharfs, breakwaters, dikes and other hydrological structures. Prepares drawings showing profiles, cross-sections and right-of-way indicating relation of topographical contours and elevations to buildings, road, tunnels, mains and other civil engineering projects.

May be concerned with a particular aspect of civil-engineering draughting and be designated accordingly; for example,

Designer, Highways

Structural-Steel Draughtsman

2163-134 DRAUGHTSMAN, COMMERCIAL(prof. & tech., n.e.c.)
DPT:261
office-layout designer.
GED: 4 SVP: 7 EC: 1 PA: S 4 5 6 7

Prepares office floor plans showing layout of furniture, equipment and movable partitions:

Performs duties similar to those of 2163-110 DRAUGHTSMAN, GENERAL (prof. & tech., n.e.c.). Plans office layouts according to customer's specifications. Draws plans to show efficient use of office space and desired decor. Prepares sketches showing location and type of furniture, equipment and movable partitions.

2163-138 DRAUGHTSMAN, ELECTRICAL(prof. & tech., n.e.c.)
DPT:261
GED: 4 SVP: 7 EC: 1 PA: S 4 5 6 7

Prepares drawings and wiring diagrams for the assembly, installation and maintenance of electrical equipment, and circuits, in industrial, commercial and residential establishments, and electrical distribution systems:

Performs duties similar to those of 2163-110 DRAUGHTSMAN, GENERAL (prof. & tech., n.e.c.). Prepares detailed layout drawings, wiring diagrams, schematic and system block diagrams from oral instructions, notes and sketches. Assists in the examination of structures and equipment requiring alterations and takes measurements and prepares sketches. Prepares diagrams of communications systems overlays. Prepares power-line relay-circuit diagrams for use in diagnosing and locating cause of line disturbances and failures.

May be concerned with preparation of electrical drawings and diagrams for vehicles, industrial machinery, domestic appliances and other manufactured appliances and be designated accordingly; for example,

Communications Draughtsman(elec. power)

Draughtsman, Relay(electric. equip.)

Marine Draughtsman, Electrical(ship & boat bldg.)

2163-142 DRAUGHTSMAN, ELECTRONIC(prof. & tech., n.e.c.)
DPT:261
GED: 4 SVP: 7 EC: 1 PA: S 4 5 6 7

Prepares diagrams and layout drawings used in manufacture, assembly, installation and repair of electronic equipment and electromechanisms:

Performs duties similar to those of 2163-110 DRAUGHTSMAN, GENERAL (prof. & tech., n.e.c.). Drafts layout and detail production drawings for a wide variety of manufactured products, such as televisions, radios, transmitters, amplifiers, computers and radiation detectors. Prepares detail drawings for relays, switches, indicators and other electronic components.

May conduct service and interference studies and prepare maps and charts related to radio and television surveys. May be concerned with a particular type of equipment and be designated accordingly, Draughtsman, Radio

2163-146 DRAUGHTSMAN, HEATING AND VENTILATING(prof. & tech., n.e.c.)
DPT:261
GED: 4 SVP: 7 EC: 1 PA: S 4 5 6 7

Prepares detail plans for the installation of heating, air-conditioning, ventilating and refrigeration systems and equipment:

Performs duties similar to those of 2163-110 DRAUGHTSMAN, GENERAL (prof. & tech., n.e.c.). Prepares detail drawings for installation of compressors, absorption units, evaporators and other components of air-conditioning, refrigeration, heating and ventilating systems.

May calculate heat loss and gain, for buildings, to assist in determining equipment specifications, using slide rule and following standard procedures for making these calculations. May be concerned with a particular system and be designated accordingly; for example, Draughtsman, Air-Conditioning Systems

Draughtsman, Refrigeration Systems

2163-150 DRAUGHTSMAN, MARINE(prof. & tech., n.e.c.)
DPT:261
GED: 4 SVP: 7 EC: 1 PA: S 4 5 6 7

Prepares drawings of structural and mechanical features of ships and other equipment:

Performs duties similar to those of 2163-110 DRAUGHTSMAN, GENERAL (prof. & tech., n.e.c.). Prepares drawings of horizontal and longitudinal cross sections, deck plans, transverse bulkheads, rigging details, cargo boom and fittings, watertight doors, stern frame and rudder arrangements and ventilation shaft, using knowledge of various types of ships, including principal dimensions, lines, beam members and structural details. Prepares calculations and design data necessary for developing layouts, rigging arrangements and structural details. Compiles itemized lists of materials and specifications from drawings. Examines detailed listings of all spare gear and equipment installed for conformance to client's specifications. Assists on sea trials,

equipment tests and other experiments. Revises design information and keeps drawings up-to-date.
May be concerned with one particular aspect of marine draughting and be designated accordingly; for example,
Draughtsman, Hull(ship & boat bldg.)
Draughtsman, Hydraulic Machinery(ship & boat bldg.)
Draughtsman, Ship Detail(ship & boat bldg.)

2163-154 DRAUGHTSMAN, MECHANICAL(prof. & tech., n.e.c.) DPT:261
GED: 4 SVP: 7 EC: I PA: S 4 5 6 7

Prepares drawings of industrial machines, machine parts, engines, tools and other mechanical equipment:
Performs duties similar to those of 2163-110 DRAUGHTSMAN, GENERAL (prof. & tech., n.e.c.). Drafts general assembly and detail drawings of gears, levers, pulleys and reduction gears indicating dimensions and tolerance, fasteners and joining requirements and other engineering data. Prepares working drawings showing methods of manufacture, joining and fastening, utilizing knowledge of machine shop practices.
May be concerned with drawing machine parts, cutting and forming tools, jigs and fixtures and be designated accordingly,
Draughtsman, Tool Design

2163-158 DRAUGHTSMAN, MINE(prof. & tech., n.e.c.) DPT:261
GED: 4 SVP: 7 EC: I PA: S 4 5 6 7

Prepares drawings of mine machinery of structural features of mines:
Performs duties similar to those of 2163-110 DRAUGHTSMAN, GENERAL (prof. & tech., n.e.c.). Prepares drawings of mine machinery such as conveyors and hoists from general design notes prepared by mining engineer. Makes graphic diagrams, profiles and cross-sections to show geological stratigraphy and location of mineral deposits from notes prepared by geologist or surveyor.

2163-162 DRAUGHTSMAN, ONE-TENTH SCALE(ship & boat bldg.) DPT:261
monopol draughtsman; optical draughtsman.
GED: 4 SVP: 7 EC: I PA: S 4 5 6 7

Prepares reduced scale drawings of ships' plate sections, requiring extremely precise draughtsmanship, to be used as a guide to automatic flame cutting machines:
Performs duties similar to those of 2163-110 DRAUGHTSMAN, GENERAL (prof. & tech., n.e.c.). Studies table of off-sets and drawings of hull and deck plates prior to developing lay-out sheet. Draws lay-out sheet to one-tenth scale showing front, side and plan views of plates. Prepares negative (black on white) drawing of plate section from lay-out sheet. Marks in size, plate and section number and other identifying information. Photographs negative drawing and prepares photographic plate to be used in monopol machine that cuts out ships plate sections from steel stock plates.

2163-164 DRAUGHTSMAN, PETROLEUM EXPLORATION(prof. & tech., n.e.c.) DPT:261
GED: 4 SVP: 7 EC: I PA: S 4 5 6 7

Prepares maps, diagrams, profiles and cross-sections used in petroleum explorations:
Performs duties similar to those of 2163-110 DRAUGHTSMAN, GENERAL (prof. & tech., n.e.c.). Draws sub-surface contours and cross-sections of rock formations, location of oil and gas deposits from data obtained by geophysical prospecting parties, utilizing special symbols. Plots boreholes of gas or oil wells from photographic sub-surface survey recordings and other data. Computes and represents diameter, depth, degree and direction of inclination, location of equipment and other dimensions and characteristics of boreholes. Plots maps and diagrams from computations based on recordings of seismograph, gravity meter, magnetometer and other petroleum prospecting instruments and prospecting and survey field notes.
May be concerned with one aspect of petroleum exploration draughting and be designated accordingly; for example,
Draughtsman, Directional Survey(oil & nat. gas)
Draughtsman, Geological
Draughtsman, Geophysical

2163-168 DRAUGHTSMAN, PIPE ORGAN(prof. & tech., n.e.c.) DPT:261
GED: 4 SVP: 7 EC: I PA: S 4 5 6 7

Prepares working plans and detailed drawings of pipe organs and determines number and position of organ stops:
Performs duties similar to those of 2163-110 DRAUGHTSMAN, GENERAL (prof. & tech., n.e.c.). Studies and analyzes sketches, drawings and photographs to determine space available for erection of pipe organ. Computes floor space, depth and height available from information supplied by sales representatives. Determines number of organ stops that can be installed considering dimensions of proposed organ and customer's requirements. Adjusts and amends sketches as required. Analyzes operational data to establish performance standards.

2163-172 EDITOR, MAP(prof. & tech., n.e.c.) DPT:261
GED: 4 SVP: 7 EC: I PA: L 47

Verifies accuracy and completeness of draft map from mounted photographs and other data:
Views photographs through stereoscope and examines corresponding area of manuscript to verify correct identification of specified topographical features and accuracy of contour lines. Verifies correct location and accuracy of scales, distances between control points and reference lines, using slide rule, dividers and scale tables. Examines mosaic or composite picture to detect omission of topographical features, double images, poor registration and other defects in photography or draughtsmanship and marks observations, using specified symbols. Marks errors, and makes corrections on numbering of grid lines, and letters names of rivers or towns and other data. Advises cartographic draughtsman concerning changes to be made on maps. Examines work order from client and compares data with manuscripts and photographs to ensure that area photographed has been completely covered.
May travel over photographed area to observe and record cultural and drainage features not shown on photograph. May verify number and class of roads, and highways, township and country boundaries.

2163-176 TECHNICAL ILLUSTRATOR(prof. & tech., n.e.c.) DPT:281
GED: 4 SVP: 7 EC: I PA: S 4 7

Lays out and draws illustrations for reproduction in reference books, technical manuals and other publications dealing with assembly, installation, operation, maintenance and repair of machines, tools and equipment:
Prepares illustrations from drawings, designs, mock-ups and photoprints utilizing methods and techniques suitable for processing by photo-offset, projection transparencies or other reproduction processes, using a variety of draughting and optical equipment. Lays out and draws schematic, perspective, orthographic or oblique-angle views to depict function, relationship and assembly sequence of parts and assemblies, such as gears, engines and instruments. Shades or colours drawings to emphasize details or to eliminate undesired background, using ink, crayon, airbrush and overlays. Pastes instructions or comments in position on drawing.
May draw cartoons and caricatures to illustrate operation, maintenance, safety manuals and posters. May supervise production of displays and exhibits or of promotional literature and other graphics.

2163-178 TRACER(prof. & tech., n.e.c.) DPT:581
GED: 3 SVP: 4 EC: I PA: S 4 5 6 7

Copies plans and drawings prepared by draughtsmen, using a variety of draughting instruments:
Traces drawing or plans by placing transparent paper over the drawing, using pens, pencils, triangles, T-squares, lettering guides and other draughting instruments. Drafts office forms, charts and simple detail drawings from sketches. Files maps, sketches and drawings to facilitate retrieval of data.

2163-199 OTHER DRAUGHTSMEN

This group includes draughtsmen, not elsewhere classified, for example, those who prepare drawings for injection moulds, cable layouts and special tools and equipment. Typical examples of occupational titles covered by this residual-group definition are:

Draughtsman, Cable Layout(telecom.)

Draughtsman, Mould Injection(prof. & tech., n.e.c.)

2165-ARCHITECTURAL AND ENGINEERING TECHNOLOGISTS AND TECHNICIANS

This unit group includes occupations, as described under master titles, 01-080 ENGINEERING TECHNOLOGIST (prof. & tech., n.e.c.) and 01-070 ENGINEERING TECHNICIAN (prof. & tech., n.e.c.), concerned with carrying out technological and technical functions in an engineering specialization; such as, chemical, civil, electrical, industrial, mechanical metallurgical, mining, petroleum, aeronautical and nuclear engineering, or in architecture, using a knowledge of architectural, engineering, scientific, mathematical and draughting design principles and practises. Physical science technologists and technicians are classified in Unit Group 2117. Technologists and technicians in the field of medicine and health are classified in Minor Group 315, OTHER OCCUPATIONS IN MEDICINE AND HEALTH. Life science technologists and technicians are classified in Unit Group 2135, LIFE SCIENCES TECHNOLOGISTS AND TECHNICIANS.

Architectural and Engineering Technologists

2165-110 through 2165-199

2165-110 AEROSPACE-ENGINEERING

TECHNOLOGIST(prof. & tech., n.e.c.) DPT:231
GED: 5 SVP: 7 EC: 1 PA: L 4 5 6 7

Performs technological functions in various aspects of aerospace engineering, primarily in support of research, design and development:

Performs duties as described under master title, 01-080 ENGINEERING TECHNOLOGIST (prof. & tech., n.e.c.). Conducts aerodynamic and thermodynamic tests of aircraft models in wind-tunnels, maintaining precise control over test conditions. Tests physical properties of raw materials and strength of bonded or welded aircraft parts to determine conformity to specifications, using measuring and recording equipment. Conducts metallographic tests and photomicrography, and interprets micro-structures. Plots stress-strain curve on graph paper and converts data, using trigonometric formulae and tables to determine such factors as tensile strength, yield and torque. Compares test results with specified standards and writes reports. Reviews quality and performance problems with engineers to determine corrective action. Designs tools, dies and fixtures necessary to fabricate or modify one-of-a-kind research or development devices. May be concerned with a particular aspect of aerospace technology and be designated accordingly; for example,

Testing-Laboratory Technologist(air & space-craft)

Vendor-Quality Technologist(air & space-craft)

Wind-Tunnel-Test Technologist

2165-114 ARCHITECTURAL TECHNOLOGIST(prof. & tech., n.e.c.) DPT:231
GED: 5 SVP: 7 EC: 1 PA: S 4 5 6 7

Performs technological functions in various aspects of architecture, primarily in support of design, development, estimation and site supervision:

Implements architect's design concept with a responsible analysis of its technical implications by means of clear, concise drawings and detailed instructions. Prepares cost and work-completion estimates to support contract bids, utilizing a knowledge of building construction methods, labour costs and ranges of materials. Represents building architect on construction site to ensure compliance with design specifications and maintenance of desired standards of material and workmanship. Consults with architect or contractor on standards of work and deviations from original design. Transmits instructions to

site manager or contractor concerning work necessary to remedy defect discovered and advise him of any queries arising from changed specifications. See also definition for term title, 01-0420 TECHNOLOGIST (prof. & tech., n.e.c.).

May be concerned with a particular aspect of architectural technology and be designated accordingly; for example,

Architectural Assistant

Clerk of Works

Estimator

Inspector of Plans(gov. serv.)

Quantity Surveyor

2165-118 CHEMICAL-ENGINEERING

TECHNOLOGIST(prof. & tech., n.e.c.) 231

GED: 5 SVP: 7 EC: 1 6 7 PA: L 4 5 6 7

Performs technological functions in various aspects of chemical engineering, excluding petrochemical engineering, primarily in support of research, design and development:

Performs duties as described under master title 01-080, ENGINEERING TECHNOLOGIST (prof. & tech., n.e.c.). Designs and constructs prototypes, test equipment and apparatus for chemical engineering processes. Evaluates technical and economic feasibility of modifying existing chemical-engineering equipment in plant, or replacing it with new equipment. Verifies instrument accuracy by calibrating instrument against known standard. Supervises routine quality control operations.

May be concerned with a particular aspect of chemical-engineering technology and be designated accordingly; for example,

Chemical-Instrumentation Technologist

Chemical-Process Technologist(chem., n.e.c.)

Product-Evaluation Technologist(chem., n.e.c.)

Quality-Control Technologist(chem., n.e.c.)

2165-122 CIVIL-ENGINEERING TECHNOLOGIST(prof. & tech., n.e.c.) DPT: 231

GED: 5 SVP: 7 EC: B PA: L 4 5 6 7

Performs technological functions in various aspects of civil engineering, primarily in support of research, design and development:

Performs duties as described under master title, 01-080 ENGINEERING TECHNOLOGIST (prof. & tech., n.e.c.). Conducts materials testing in research and development laboratories, and writes reports. Undertakes traffic surveys, analyzes results and prepares statistical data, tables and drawings. Conducts field and laboratory tests of soils, and prepares technical reports. Assists in recommending design parameters to engineers in other disciplines. Conducts inspections of dams, power plants, generating plants and other structures to determine need for maintenance and repair work.

May be concerned with a particular aspect of civil-engineering technology and be designated accordingly; for example,

Building Inspector

Civil-Engineering-Design Technologist

Materials-Testing Technologist

Power-Plant-Inspection Technologist(elec. power)

Soils-Testing Technologist

Traffic Technologist

2165-126 ELECTRICAL-ENGINEERING

TECHNOLOGIST(prof. & tech., n.e.c.) DPT:231

GED: 5 SVP: 7 EC: B 6 PA: L 4 5 6 7

Performs technological functions in various aspects of electrical engineering, primarily in support of research, development and design:

Performs duties as described under master title, 01-080 ENGINEERING TECHNOLOGIST (prof. & tech., n.e.c.). Assists with design, and draws equipment installation and distribution layouts and profile drawings for transmission lines, underground stations and other distribution facilities. Makes sag and tension calculations, sag templates and profile drawings for erection of transmission towers and lines; makes periodic inspections of construction and provides technical advice to contractor's supervisors. Compiles data to be analyzed by digital computer to assist in operation of power network. Analyzes technical and statistical records of unit costs for generating and distributing stations. Modifies new electrical equipment to correct functional deviations, under direction of electrical engineer. Provides technical advice to promote good

lighting practices, and makes surveys to determine lighting requirements.

May be concerned with a particular aspect of electrical-engineering technology and be designated accordingly; for example
Distribution-Planning Technologist(elec. power)

Lighting Designer

Transmission-Engineering Technologist(elec. power)

Underground-Distribution Technologist(elec. power)

2165-130 ELECTRONIC-ENGINEERING

TECHNOLOGIST(prof. & tech., n.e.c.) DPT:231

GED: 5 SVP: 7 EC: 1 6 PA: L 4 5 6 7

Performs technological functions in various aspects of electronic engineering, primarily in support of research, design and development:

Performs duties as described under master title, 01-080 **ENGINEERING TECHNOLOGIST** (prof. & tech., n.e.c.). Determines circuit-layout utilizing mathematical calculations and knowledge of electronic theory for new or modified radio equipment, telemetering systems and other electronic devices and components. Designs signal circuits to accommodate railway traffic on existing track layout and develops program circuits, crossing signals, switches and centralized traffic control boards. Constructs prototypes from approved sketches or drawings, installs circuitry and verifies calibrations of circuitry, using test apparatus, such as voltmeters and bridges. Evaluates performance and reliability of prototypes or production models of electronic equipment and recommends necessary changes to engineering staff. Devises and modifies electronic instrumentation and apparatus used to test and evaluate experimental electronic, electromechanical and electrohydraulic systems and equipment.

May be concerned with a particular phase of electronic-engineering technology and be designated accordingly; for example,

Aircraft-Electronics Technologist(air & space-craft)

Circuit Designer(rail trans.)

Development Technologist(telecom.)

Electronic-Prototype Technologist(electronic equip.)

2165-134 INDUSTRIAL-ENGINEERING

TECHNOLOGIST(prof. & tech., n.e.c.) DPT: 231

GED: 5 SVP: 7 EC: 1 PA: L 4 5 6 7

Performs technological functions in various aspects of industrial engineering, primarily in support of operations research:

Performs duties as described under master title, 01-080 **ENGINEERING TECHNOLOGIST** (prof. & tech., n.e.c.). Analyzes specifications and prepares audit-requirements for raw materials, sub-assemblies or assemblies to meet production requirements. Analyzes such production problems as scarcity of components, materials or personnel. Determines and verifies quality and reliability of product, during initial production stages, considering such factors as time, cost and quality control standards.

May be concerned with a particular aspect of industrial-engineering technology and be designated accordingly; for example,

Operations-Research Technologist

Production-Control Technologist

Quality-Control Technologist

Time-Study Technologist

2165-138 MARINE-ENGINEERING TECHNOLOGIST

(prof. & tech., n.e.c.) DPT:231

GED: 5 SVP: 7 EC: B 6 PA: L 4 5 6 7

Performs technological functions in various aspects of marine engineering, primarily in support of design and development:

Performs duties as described under master title, 01-080, **ENGINEERING TECHNOLOGIST** (prof. & tech., n.e.c.). Calculates stresses and strains on hull and structural members, and prepares related working drawings. Prepares detailed specifications of ship's machinery and equipment. Co-operates with contractors and regulatory boards to ensure that construction, alterations, modifications or repairs are kept at minimum cost consistent with safety. Determines necessary weight and position of ballast prior to launching. Investigates recurring machinery failures to determine design deficiencies and recommends modifications or repairs are kept at minimum cost consistent with safety.

May be concerned with a particular aspect of marine-engineering technology and be designated accordingly,

Hull-Ballast-Calculation Technologist(ship & boat bldg.)

2165-142 MECHANICAL-ENGINEERING

TECHNOLOGIST(prof. & tech., n.e.c.) DPT:231

GED: 5 SVP: 7 EC: 1 6 PA: S 4 5 6 7

Performs technological functions in various aspects of mechanical engineering, primarily in support of design and development:

Performs duties as described under master title, 01-080 **ENGINEERING TECHNOLOGIST** (prof. & tech., n.e.c.). Analyzes engineering sketches, specifications and related data and drawings to determine shape, dimensions, tolerances, type, hardness and machining properties of metal, and other design factors in the development of industrial engineering equipment, processes and products. Examines feasibility of using one or more machines to carry out sequential operations. Compiles and analyzes data to determine effect of design on machine or product in relation to temperature, pressure, speed, fuel consumption, horsepower and other factors. Drafts working drawings or detailed multi-view drawings of equipment, sub-assemblies or product, using engineering data and standard references, showing direction of any moving parts. Determines tools, fixtures and equipment to be used in fabrication and assembly of mechanical components and complete assemblies. Examines project instructions and drawings to determine test specifications, procedures, objectives, test equipment and problems involved in re-designing, changing or re-arranging material, parts of sub-assemblies.

May be concerned with a particular aspect of mechanical engineering technology and be designated accordingly; for example,

Designer, Mechanical-Engineering Equipment

Development Technologist, Mechanical Engineering.

Engineering-Assistant, Mechanical Equipment

2165-146 METALLURGICAL-ENGINEERING

TECHNOLOGIST(prof. & tech., n.e.c.) DPT:231

GED: 5 SVP: 7 EC: 1 4 5 6 7 PA: L 4 7

Performs technological functions in various aspects of metallurgical engineering, primarily in support of research, design and development:

Performs duties as described under master title, 01-080 **ENGINEERING TECHNOLOGIST** (prof. & tech., n.e.c.). Tests for presence and concentration of specified elements in metal ore samples, by titration, filtration, colorimetric analysis and spectrophotometry, which would render commercial refining and production impractical. Sets up pilot-plant to analyze roasting, sintering, smelting, electrolytic and other processes for improvement of production methods. Reviews all designs, where welding is involved to ensure that it meets metallurgical specifications. Determines welding procedures for complex or unconventional weldments, utilizing a knowledge of mathematics and physical properties of metals. Acts as technical advisor on all matters relating to suitability, reliability and weldability of steel.

May be concerned with a particular aspect of metallurgical technology and be designated accordingly; for example,

Control Analyst, Metallurgical

Technical Advisor, Welding

Technologist, Production Research, Metallurgical

2165-150 MINING-ENGINEERING TECHNOLOGIST

(prof. & tech., n.e.c.) DPT:231

GED: 5 SVP: 7 EC: B 6 7 PA: L 4 5 6 7

Performs technological functions in various aspects of mining engineering, primarily in support of design and development:

Performs duties as described under master title, 01-080 **ENGINEERING TECHNOLOGIST** (prof. & tech., n.e.c.). Assists in underground and surface-mining activities; such as, planning and surveying, stope development, developing improved production-drilling techniques, mine ventilation layout, ore-dressing metallurgy and metal refining.

May be concerned with a particular aspect of mining-engineering technology and be designated accordingly,

Mine-Development Technologist

2165-154 NUCLEAR-ENGINEERING TECHNOLOGIST(prof. & tech., n.e.c.) DPT:231 GED: 5 SVP: 7 EC: 1 6 PA: L 4 6 7

Performs technological functions in various aspects of nuclear engineering, primarily in support of research:

Performs duties as described under master title, 01-080 ENGINEERING TECHNOLOGIST (prof. & tech., n.e.c.). Sets up and controls operation of nuclear reactor in which neutrons and gamma rays are used to study structure of atoms to determine properties of materials, and create radio-isotopes and radio-active fission products for research purposes. Compiles lists of events (collisions of atomic nuclei) from photographs of cloud chambers, or other particle detectors, and operates machine to record on magnetic tape or punch cards characteristics of events to extend knowledge of atomic and sub-atomic particles. Operates particle accelerator to accelerate and hurl protons (hydrogen nuclei) and other ions into target atoms of various elements, in numbers and at energies specified by engineers or scientists.

May be concerned with a particular aspect of nuclear engineering technology and be designated accordingly; for example, Accelerator Technologist
Radio-Isotope-Production Technologist
Scanner
Test-Reactor Technologist

2165-158 PETROCHEMICAL-ENGINEERING TECHNOLOGIST(prof. & tech., n.e.c.) DPT:231 GED: 5 SVP: 7 EC: 1 6 7 PA: M 4 6 7

Performs technological functions in various aspects of petrochemistry and petrochemical engineering, primarily in support of research, development and operation:

Performs duties as described under master title, 01-080 ENGINEERING TECHNOLOGIST (prof. & tech., n.e.c.). Conducts chemical and physical laboratory tests and analyses on gasoline, fuel oil, asphalt and other petrochemicals to determine composition, strength, flash point and other characteristics, for development of new or improved products. Analyzes crude-oil samples from various oil fields, using fractional-distillation equipment to determine processing requirements. Operates motors and pumps by adjusting valves to control and regulate temperature, pressure and rate of flow of petrochemical products through processing units, according to specification. Tests engines to determine behaviour of fuels and lubricants under simulated operating conditions. Dismantles test engine, after test run, and inspects valves, pistons, valve lifter, rings and rods for wear and deposits, using microscope and precision weighing and measuring instruments.

May be concerned with a particular aspect of petrochemistry or petrochemical-engineering technology and be designated accordingly; for example,

Petrochemical-Laboratory Technologist
Pilot-Plant Technologist(petrol. & coal prod.)
Research Technologist, Petroleum(petrol. & coal prod.)
Test-Engine Evaluator

2165-199 OTHER ARCHITECTURAL AND ENGINEERING TECHNOLOGISTS

This group includes architectural and engineering technologists, not elsewhere classified; for example, those who perform technological functions in various architectural and engineering disciplines in such fields as ceramics, forestry and cryogenics. Typical examples of occupational titles covered by this residual group definition are:

Cryogenic-Engineering Technologist (prof. & tech., n.e.c.)
Forest-Engineering Technologist (prof. & tech., n.e.c.)

Engineering Technicians 2165-210 through 2165-299

2165-210 AEROSPACE-ENGINEERING TECHNICIAN(prof. & tech., n.e.c.) DPT:361 GED: 4 SVP: 6 EC: 1 5 PA: M 2 4 5 6 7

Performs technical functions in various aspects of aerospace engineering, primarily in support of installation, operation, maintenance, production and quality control:

Performs duties as described under master title, 01-070

ENGINEERING TECHNICIAN (prof. & tech., n.e.c.). Sets up wind-tunnel tests of aircraft models and other equipment for collection of aerodynamic and thermodynamic data. Maintains wind-tunnel equipment and oversees repair of components by outside contractors. Sets up and operates equipment to test experimental aircraft-metal parts. Assists in quality control inspection on production aircraft engines, parts, airframes and ancillary equipment. Repairs, tests and adjusts precision electro-mechanical instruments, such as temperature and aerodynamic probes, following mechanical drawings and specifications, using precision hand and power tools and testing instruments.

May train customer personnel on technical operation, maintenance and overhaul of aircraft. May be concerned with a particular technical aspect of aerospace-engineering activity and be designated accordingly; for example,

Electromechanical Technician(air & space-craft)
Field-Service Representative(air & space-craft)
Laboratory-Test Technician(air & space-craft)
Quality-Control Technician(air & space-craft)
Wind-Tunnel-Test Technician

2165-214 AGRICULTURAL-ENGINEERING TECHNICIAN(prof. & tech., n.e.c.) DPT:361 GED: 4 SVP: 6 EC: 1 PA: S 4 6 7

Performs technical functions in various aspects of agricultural engineering, primarily in support of installation, operation, maintenance, production and quality control:

Performs duties as described under master title, 01-070 ENGINEERING TECHNICIAN (prof. & tech., n.e.c.). Assists in programs to mechanize field crop experiments. Aids in design and development of laboratory apparatus and specialized field equipment; such as, plot harvesters, threshers, sprayers and seeders by preparing detailed specifications from engineering drawings, and constructs prototype equipment. Conducts evaluation tests of experimental field equipment.

2165-218 CHEMICAL-ENGINEERING TECHNICIAN(prof. & tech., n.e.c.) DPT:361 GED: 4 SVP: 6 EC: 1 6 7 PA: L 4 5 6 7

Performs technical functions in various aspects of chemical engineering, excluding petrochemical engineering, primarily in support of installation, operation, maintenance, production and quality control:

Performs duties as described under master title, 01-070 ENGINEERING TECHNICIAN (prof. & tech., n.e.c.). Modifies or replaces equipment, as directed, following feasibility studies conducted by technologists and engineers. Assists in calibration or modification of instruments used in chemical engineering processes. Undertakes routine testing of chemical processing equipment, and of material being processed.

May be concerned with a particular technical aspect in support of chemical engineering and be designated accordingly; for example, Chemical-Laboratory Technician
Chemical-Instrument Technician(chem., n.e.c.)

2165-222 CIVIL-ENGINEERING TECHNICIAN(prof. & tech., n.e.c.) DPT:361 GED: 4 SVP: 6 EC: B PA: L 4 5 6 7

Performs technical functions in various aspects of civil engineering, primarily in support of installation, operation, maintenance, production and quality control:

Performs duties as described under master title, 01-070 ENGINEERING TECHNICIAN (prof. & tech., n.e.c.). Makes routine computations and cost estimates, and assists in preparation of engineering drawings for buildings, bridges and structures. Conducts field and laboratory tests of construction materials, takes soil samples, summarizes data and writes reports for construction and maintenance of highways, railways, waterways and other civil engineering projects. Collects data for traffic volume studies, using electric timing devices and counters, stop watches and radar. Summarizes information from maps, reports, field investigations and books for urban planning studies. Prepares, operates and maintains field experiment and sampling stations for air-pollution monitoring; processes air and other source samples to determine level of pollution, and reports findings to regulatory agencies.

May be concerned with air-pollution control in an industrial

establishment. May be concerned with a particular technical aspect in support of civil engineering and be designated accordingly; for example,

Air-Pollution, Field Technician
Highway Technician
Materials-Testing Technician
Railway Technician
Smoke Tester(iron & steel)
Structural-Engineering Technician
Traffic Technician

2165-226 ELECTRICAL-ENGINEERING TECHNICIAN(prof. & tech., n.e.c.) DPT:361
GED: 4 SVP: 6 EC: I 6 PA: L 4 5 6 7

Performs technical functions in various aspects of electrical engineering, primarily in support of installation, operation, maintenance, production and quality control:

Performs duties as described under master title, 01-070 ENGINEERING TECHNICIAN (prof. & tech., n.e.c.). Maintains power-generation and distribution equipment, and tests water and coal used in boilers, and oil used in circuit breakers and as a lubricant in generators. Assembles prototypes or final assemblies of protected relays and metering and indicating devices and other electrical equipment, using hand and power tools and test equipment. Assembles, installs, tests and calibrates electrical-testing equipment. Assists corrosion engineers with problems related to measuring static electricity discharge between gas pipeline and ground. Makes recommendations to correct or improve lighting arrangements.

May be concerned with a particular technical aspect in support of electrical engineering activity and be designated accordingly; for example,

Corrosion-Control Technician(elec. power)
Electrical-Instrument Technician
Home-Lighting Technician(elec. power)
Power-System Technician(elec. power)

2165-230 ELECTRONIC-ENGINEERING TECHNICIAN(prof. & tech., n.e.c.) DPT:361
GED: 4 SVP: 6 EC: I 6 PA: L 4 5 6 7

Performs technical functions in various aspects of electronic engineering, primarily in support of installation, operation, maintenance, production and quality control:

Performs duties as described under master title, 01-070 ENGINEERING TECHNICIAN (prof. & tech., n.e.c.). Assembles circuitry for electronic equipment in accordance with engineering instructions and technical manuals. Dismantles various types of electronic instruments and equipment and replaces defective components and parts, using hand tools and other precision tools. Calibrates electronic measuring and indicating instruments to established standards. Inspects equipment installed in aircraft, ships and other structures to rectify any operating problems. Installs, tests and repairs electromedical equipment, following technical manuals and using electronic test equipment and hand tools.

May be concerned with a particular technical aspect of electronic engineering and be designated accordingly; for example,

Calibration Technician
Electromedical-Equipment Technician (scient. & ind. equip., n.e.c.)
Electronic Mechanic, Field
Inspection Technician, Electronics
Test-Equipment Technician (electronic equip.)

2165-234 GEOLOGICAL-ENGINEERING TECHNICIAN(prof. & tech., n.e.c.) DPT:361
GED: 4 SVP: 6 EC: B 2 3 6 PA: L 4 5 6 7

Performs technical functions in various phases of geological engineering in support of installation, operation, maintenance, production and quality control:

Performs duties as described under master title, 01-070 ENGINEERING TECHNICIAN (prof. & tech., n.e.c.). Prepares organizational details for surveys, in conjunction with engineers and geologists. Collects information by operating magnetometers, electromagnetic units and other instruments. Participates in field mapping, surveying, camp organization and other field activities. Prepares maps from field notes of geological or geophysical nature. Assists in preparation of feasibility studies and interpretation of field surveys. Prepares specimens for study by grinding rock samples and

performing routine chemical analyses. Assists in collecting specimens by operating diamond drilling machines which produce core samples. Calibrates instruments magnetometers and other electro-magnetic instruments.

May be concerned with a particular technical aspect in support of geological engineering and be designated accordingly; for example,

Diamond-Drilling Technician
Geological-Instrument-Operations Technician
Geological-Mapping Technician
Geological-Survey Technician
Research-and-Development Technician, Geological Engineering

2165-238 INDUSTRIAL-ENGINEERING TECHNICIAN(prof. & tech., n.e.c.) DPT:361
GED: 4 SVP: 6 EC: I PA: L 4 5 6 7

Performs technical functions in various aspects of industrial engineering, primarily in support of operation, production and quality control:

Performs duties as described under master title, 01-070 ENGINEERING TECHNICIAN (prof. & tech., n.e.c.). Conducts time-and-motion studies to evaluate production and worker efficiency. Studies material- handling methods and suggests changes which will reduce physical effort, increase safety and reduce handling costs. Measures and studies available floor space and draws plans of efficient plant layout to scale, using draughting instruments. Assists in developing tests for components and finished products to ensure that product meets quality standards and operating requirements. Plans assignments and makes recommendations based on worker performance, machine capacity and production schedules. Aids in surveillance of all inventories from raw materials to finished products, and prepares necessary status reports.

May confer with union stewards, production workers and time-study technicians to review disputes and resolve pay and pay-rate problems. May be concerned with a particular technical aspect in support of industrial engineering and be designated accordingly; for example,

Inspector, Set-Up and Lay-Out
Inventory-Control Technician
Materials-Handling Technician
Plant-Layout Technician
Production-Planning Technician
Quality-Control Technician
Time-and-Motion Technician
Union-Time-Study Representative.

2165-242 MARINE-ENGINEERING TECHNICIAN(prof. & tech., n.e.c.) DPT:361
GED: 4 SVP: 6 EC: B 6 PA: L 2 4 5 6 7

Performs technical functions in various phases of marine engineering, primarily in support of installation, operation, maintenance, production and quality control:

Performs duties as described under master title, 01-070 ENGINEERING TECHNICIAN (prof. & tech., n.e.c.). Carries out installation, repair and maintenance activities concerned with mechanical equipment aboard ships to ensure efficient operation in conformance with government operating and safety regulations. Inspects repair work done under contract to ensure compliance with specifications. Maintains records of repair work performed on each vessel and prepares reports for management.

May be concerned with a particular technical aspect of marine engineering activity and be designated accordingly,

Technician, Ship Repair(ship & boat bldg.)

2165-246 MECHANICAL-ENGINEERING TECHNICIAN(prof. & tech., n.e.c.) DPT:361
GED: 4 SVP: 6 EC: I 6 PA: M 3 4 5 6 7

Performs technical functions in various aspects of mechanical engineering, primarily in support of installation, operation, maintenance, production and quality control:

Performs duties as described under master title, 01-070 ENGINEERING TECHNICIAN (prof. & tech., n.e.c.). Develops specifications for non-standard instrumentation apparatus according to engineering data, characteristics of equipment and capabilities of procurable test apparatus. Selects, installs, calibrates and checks out sensing, telemetering and recording instrumentation and circuitry to control plant processes. Operates instrumentation test apparatus to produce, regulate and record effects of actual or simulated conditions;

such as, vibration, stress, temperature, humidity, pressure, altitude and acceleration in testing of mechanical components and sub-assemblies. Assembles or installs new or modified mechanical components or assemblies for industrial or power equipment, machine tools, measuring and control instruments. Designs and makes metalworking dies, cutting tools, jigs and fixtures, using milling machines, lathes, shapers and other metalworking machines, and inspects finished dies for conformance to original model or drawing, using calipers, micrometers and other measuring devices.

May be concerned with a particular technical aspect of mechanical engineering and be designated accordingly; for example,
Engineering Checker
Equipment-Development Technician
Tool-Planning-Liaison Man

2165-250 METALLURGICAL-ENGINEERING TECHNICIAN(prof. & tech., n.e.c.) DPT:361 GED: 4 SVP: 6 EC: I 4 5 6 7 PA: L 4 7

Performs technical functions in various aspects of metallurgical engineering, primarily in support of operation, production and quality control:

Performs duties as described under master title, 01-070 ENGINEERING TECHNICIAN (prof. & tech., n.e.c.). Conducts shear, hardness, tensile, impact, compression, fatigue and other tests to determine physical properties of refined metal specimens. Conducts tests on foundry sands to determine moisture, permeability, clay content and bond strength for suitability in moulding and casting operations. Determines temperature of molten metal during rolling mill process, using optical or thermocouple pyrometers, to maintain standards for grade of steel plate required. Calculates charges for foundry furnaces, checks quality of metal while undergoing heat treatment and performs chemical analysis of alloys. Checks calibration of pyrometers and other test equipment.

May be concerned with a particular aspect in support of metallurgical engineering and be designated accordingly; for example,
Foundry-Laboratory Technician
Heat-Treat Technician
Materials-Testing Technician(iron & steel)
Metallurgical-Laboratory Technician

2165-254 MINING-ENGINEERING TECHNICIAN(prof. & tech., n.e.c.) DPT:361 GED: 4 SVP: 6 EC: B 6 7 PA: L 4 5 6 7

Performs technical functions in various aspects of mining engineering, primarily in support of operation, maintenance, production and quality control:

Performs duties as described under master title, 01-070 ENGINEERING TECHNICIAN (prof. & tech., n.e.c.). Performs routine maintenance on underground drilling machines, mine engines, cars and other underground mine equipment. Investigates operation of underground mine equipment to improve methods and reduce costs, and recommends replacement, if necessary. Operates equipment to obtain ore samples from drill cores or stope face for quality and quantity testing.

May be concerned with a particular technical aspect of mining engineering activities and be designated accordingly,
Mine-Production Technician

2165-258 NUCLEAR-ENGINEERING TECHNICIAN(prof. & tech., n.e.c.) DPT:361 GED: 4 SVP: 6 EC: I 6 PA: L 4 6 7

Performs technical functions in various aspects of nuclear engineering, primarily in support of operation, maintenance, production and quality control:

Performs duties as described under master title, 01-070 ENGINEERING TECHNICIAN (prof. & tech., n.e.c.). Computes radiation time and dosage, and gamma intensities required at various distances from grid, using standard formulae, conversion tables and slide rule, and submits data to supervisor for review, prior to operation of nuclear reactor. Inserts capsules of materials to be irradiated into tubes leading to reactor core, using extension tool. Adjusts controls, under supervision, to start and shut down nuclear reactor and regulate flux level, reactor period, coolant temperature, rate of flow, rod positions and other control elements that affect power level within the nuclear reactor. Controls laboratory equipment to prepare radio-isotopes and other radio-active materials for use as tracers in

biological, biochemical, physiological and industrial research. Controls slave manipulators from outside cell to perform a variety of machining operations, chemical and metallurgical tests and decontamination procedures, using cleaning agents and chemical solutions. Controls distillation towers and associated equipment to process spent nuclear fuels and recover unconsumed uranium.

May be concerned with a particular technical aspect in support of nuclear engineering and be designated accordingly; for example,
Control-Room Operator, Nuclear
Fuel-Handling Operator, Nuclear
Gamma-Facilities Operator
Heavy-Water-Reconcentration Operator
Hot-Cell Technician, Nuclear

2165-262 PETROCHEMICAL-ENGINEERING TECHNICIAN(prof. & tech., n.e.c.) DPT:361 GED: 4 SVP: 6 EC: I 6 7 PA: M 4 6 7

Performs technical functions in various aspects of petrochemistry and petrochemical engineering, primarily in support of installation, operation, maintenance, production and quality control:

Performs duties as described under master title, 01-070 ENGINEERING TECHNICIAN (prof. & tech., n.e.c.). Performs routine quality control testing of crude and blended oils, gases, asphalt and pressure distillates to determine boiling point, condensation, flash point, viscosity, specific gravity and other characteristics, using distillation apparatus, analytical scales and other laboratory equipment. Compares colour of liquid petrochemical products with charts, to determine processing factors measurable by colour, and reports results to supervisor. Operates test engine to determine behaviour of fuels and lubricants, and whether they meet specifications. Maintains and overhauls laboratory knock-testing engines and other petrochemical processing equipment.

May be concerned with a particular aspect of petrochemistry and petrochemical engineering and be designated accordingly; for example,
Fuel Technician
Gas Chromatographer(petrol. & coal prod.)
Laboratory Technician, Octane(petrol. & coal prod.)
Test-Engine Technician

2165-266 PETROLEUM-ENGINEERING TECHNICIAN(prof. & tech., n.e.c.) DPT:361 GED: 4 SVP: 6 EC: B 7 PA: L 4 7

Performs technical functions in various aspects of petroleum engineering primarily in support of operation, maintenance and production:

Performs duties as described under master title, 01-070 ENGINEERING TECHNICIAN (prof. & tech., n.e.c.). Directs workers in assembling mechanical and electrical-testing instruments and equipment, at well site, to measure and record pressures and temperatures at various depths. Analyzes mud circulated through boreholes during drilling operations. Removes chart recordings from pressure and temperature instruments and makes preliminary interpretations of data for use by engineering personnel in determining rate of natural flow from well. Keeps records of depth and formation tests and calculates consistency of mud required to maintain optimum drilling conditions. Calibrates and repairs recording instruments.

May be concerned with a particular technical aspect in support of petroleum engineering, and be designated accordingly; for example,
Technical Operator, Petroleum Drilling(oil & nat. gas)
Well-Logging Operator, Mud Analysis(oil & nat. gas)

2165-299 OTHER ENGINEERING TECHNICIANS

This group includes engineering technicians, not elsewhere classified; for example, those who perform technical functions in various engineering disciplines in such fields as ceramics, cryogenics and forestry. Typical examples of occupational titles covered by this residual group definition are:

Ceramic-Engineering Technician(prof. & tech., n.e.c.)
Wood Technician(prof. & tech., n.e.c.)

2169-OTHER OCCUPATIONS IN ARCHITECTURE AND ENGINEERING, N.E.C.

This unit group includes occupations, not elsewhere classified, concerned with planning and conducting aerial photographic surveys; analyzing aerial photographs to prepare or revise maps and charts; preparing maps, graphs and charts for transit companies; and designing and lettering forms for commercial, industrial and government organizations.

2169-110 PHOTOGRAMMETRIST(prof. & tech., n.e.c.) DPT:131
GED: 5 SVP: 7 EC: B PA: L 4 7

Plans aerial surveys, and co-ordinates preparation of topographical maps, charts and related material from aerial photographs and other data:

Examines and interprets aerial photographs to determine topographic mapping control points, prepare aerial-photograph mosaics, and provides data for hydrology and drainage studies. Applies standard mathematical formulas and photogrammetric techniques to identify, scale and orient geodetic points, elevations and other planimetric or topographic features and cartographic detail. Supervises establishment of base lines by ground survey. Determines type of camera to be used and flight altitude of camera-carrying aircraft. Calculates time between camera shots to ensure proper overlapping of exposures and spacing of flight lines (routes travelled by aircraft). Provides technical direction concerning processing and reproduction of topographical maps and charts and other survey data. Prepares charts and tables required for aerial navigation over land or water. Computes geodetic measurements and interprets survey data to determine position, shape, elevation of geomorphic and topographic features on earth's surface, from ground and aerial photographs or mosaics.

May give instruction to aerial photographers responsible for operating aerial cameras.

2169-114 AERIAL-PHOTOGRAPH ANALYST(prof. & tech., n.e.c.) DPT:287
aerial-photograph interpreter.
GED: 5 SVP: 6 EC: I PA: L 4 7

Analyzes aerial photographs to ascertain significant industrial or topographical data:

Studies aerial photographs to locate roads, rivers, industrial centers, wooded areas and other features, using desk mounted stereoscopic equipment, to determine nature of terrain. Assesses data obtained by airborne electronic sensors that provide infra-red information to ascertain thermal data of water and land. Utilizes data obtained from radar studies to locate and identify features. Combines these data with other photographic data and prepares preliminary assessment reports. May compare previously prepared maps with data extracted from photographs to determine accuracy of maps.

May plan photographic programs to obtain most suitable data for planned application.

2169-118 STEREOPLOTTER(prof. & tech., n.e.c.) DPT:281
GED: 4 SVP: 7 EC: I PA: L 4 7

Plots scaled topographic and planimetric maps, and records cross-section and profile data from aerial-survey photographs, using stereoplotting equipment:

Analyzes aerial survey photographs, using stereoplotting instruments. Determines proper orientation and control of stereoplotting equipment, using plans, profiles and field survey notes. Sets up stereoplotting instruments and makes adjustments so that image from one photograph is seen by one eye and image from the other is seen by other eye. Views screen through coloured lenses arranged so that each lens permits view of image only in opposing colour, enabling operator to view three-dimensional image. Determines contour interval and vertical scale of image, using mathematical table. Interprets colours and topographical details to produce maps, controlling pencil point through stereoscope. Determines cross-section elevations, and records data through programed electronic read-out units.

2169-122 MOSAICER(prof. & tech., n.e.c.) DPT:381
GED: 4 SVP: 7 EC: I PA: L 4 7

Lays out and matches aerial photographs to form photographic mosaic of geographic area for use by photogrammetrists and topographical draughtsmen:

Lays out aerial photographs on table according to sequence in which they were taken and according to flight path of aircraft. Examines prints to locate established landmarks. Observes and records absence of normal overlap on adjacent prints indicating deflection of aircraft from pre-determined flight path. Locates and marks specific reference points including structures, highways, rail junctions and other prominent geographic features. Computes and measures scaled distances between reference points to establish exact relative position of adjoining prints, using tables, slide rule, dividers and protractor. Trims excess from edges of overlapping prints and glues prints to backing board, ensuring that scaled distances between reference points is maintained and print alignment is constant. Attaches numbered tag to backing board and sends mounted photographs for processing and reproduction after retouching to eliminate join lines.

2169-126 DRAUGHTING CLERK, TRANSIT(clerical) DPT:381
GED: 4 SVP: 6 EC: I PA: S 4 7

Prepares maps, charts and graphs showing transit company operations and statistics:

Draws and letters charts, maps and graphs illustrating specific data; such as, company statistics, traffic flow, building development and population distribution. Gathers, reviews and arranges data in sequence for graphic presentation.

May prepare ink tracings of charts, maps and graphs. May prepare drawings or sketches for newspaper publication, showing route diversions, extensions and similar information.

2169-130 FORMS-LAYOUT MAN(any ind.) DPT:281
forms designer.
GED: 3 SVP: 6 EC: I PA: L 4 7

Prepares finished layout, lettering and paste-ups of forms to be used in commercial, industrial or government organizations:

Prepares sketches of invoices, production records or other forms, according to client's or forms-analyst's specifications, using drafting techniques and instruments. Lays out and draws form, using knowledge of business machines and forms-design principles. Submits initial draft for review and makes changes as required. Prepares final drawing of approved design for printing and prepares specifications for reproduction of form.

218-OCCUPATIONS IN MATHEMATICS, STATISTICS, SYSTEMS ANALYSIS AND RELATED FIELDS

This minor group includes occupations concerned with research in mathematics, statistics and actuarial science, the application of original and standardized techniques to solve problems in science, engineering and management, programming mathematical statements of problems to permit solution by electronic data-processing systems, analyzing coding systems and performing technical support duties for statistical programs. These occupations are classified in the following unit groups:

2181 Mathematicians, Statisticians and Actuaries

2183 Systems Analysts, Computer Programmers
and Related Occupations

2189 Occupations in Mathematics, Statistics,
Systems Analysis and Related Fields, n.e.c.

**2181-MATHEMATICIANS, STATISTICIANS AND
ACTUARIES**

This unit group includes occupations concerned with research in mathematical theory, and the development and application of mathematical techniques for solving problems in fields, such as science and engineering and social science, with conducting total or sample surveys to compile statistical data and draw valid conclusions; and with applying mathematical and statistical methods to calculate premium and benefit payments of financial programs, such as insurance and annuities.

2181-110 MATHEMATICIAN, RESEARCH(prof. & tech.,
n.e.c.) DPT:088
mathematician, pure mathematics.
GED: 6 SVP: 8 EC: I PA: S

Undertakes research in fundamental mathematics to advance mathematical knowledge, and develop and improve mathematical techniques:

Studies fundamental theories of algebra, geometry, number theory, logic and other branches of mathematics, and tests hypotheses and alternative mathematical theories. Conducts experiments to discover new application of mathematical principles and techniques for use in particular applications, such as scientific investigations, engineering projects, management decision making and electronic data processing. May provide services, as a consultant or as an advisor, to research personnel concerning mathematical applications and methods. May utilize or direct use of electronic computers and related aids in solving problems.

2181-114 STATISTICIAN, MATHEMATICAL(prof. & tech.,
n.e.c.) DPT:088
GED: 6 SVP: 8 EC: I PA: S

Conducts research into mathematical basis of the science of statistics, develops statistical methodology and advises on practical application of statistical method:

Examines theories, such as those of probability, inference and variance to discover mathematical bases for new and improved methods of obtaining and evaluating numerical data. Develops and tests experimental designs, sampling techniques and analytical methods. Makes recommendations concerning their utilization in statistical surveys, experiments and tests. Investigates, evaluates and makes recommendations concerning applicability, efficiency and accuracy of statistical methods used by physical and social scientists in obtaining and evaluating data.

2181-118 ACTUARY(insur. & real estate) DPT:038
GED: 5 SVP: 9 EC: I PA: S 7

Plans and develops insurance, annuity and pension programs by assembling and evaluating statistics and other data to set terms, provisions and premiums of policies and contracts:

Prepares records on mortality, sickness, accident, disability and retirements on the basis of continual research and analysis of statistical, economic and other data. Constructs probability tables used to calculate premium rates and policy values. Designs insurance, and annuity and pension plans, and ascertains premium rates required, cash reserves and liabilities necessary, to ensure payment of future benefits. Determines equitable basis for distributing surplus earnings under participating insurance and annuity contracts, in mutual companies.

May supervise and co-ordinate activities of workers engaged in

preparing and processing insurance, annuity and pension policies and contracts. May interview and hire actuarial department personnel. May specialize in one type of insurance and be designated accordingly; for example,
Actuary, Casualty
Actuary, Life

2181-122 OPERATIONS-RESEARCH ANALYST(prof. &
tech., n.e.c.) DPT:068
GED: 5 SVP: 8 EC: I PA: S 4 5

Conducts logical analyses of management problems, and formulates mathematical model of problem for solution by digital computer:

Analyzes problem in terms of management information requirements. Prepares mathematical model of problem in form of one or several equations that relate constants and variables, restrictions, alternatives, conflicting objectives, and their numerical parameters. Gathers, relates, and identifies data with variables in model by applying personal judgement and mathematical tests. Specifies manipulative and computational methods to be applied to formulations, and refers data to processing division for solving equations, programming and processing. Reviews operations and testing of model to ensure adequacy or determine need for reformulation. Prepares written reports to management, indicating problem solution or range of possible alternatives in rank of desirability and probability of success in terms of cost, profit, effectiveness or risk.

May specialize in research and preparation of contract proposals, or in specifying the competence of an organization to perform research, development or production work. May develop time and cost networks, such as program evaluation and review technique (PERT), to plan and control large scale business projects. May work in areas associated with engineering, as when analyzing and evaluating alternative physical systems, such as production processes.

2181-126 DEMOGRAPHER(prof. & tech., n.e.c.) DPT:188
GED: 5 SVP: 8 EC: I PA: S

Plans and conducts surveys and experiments to obtain and analyze statistics concerning human populations:

Performs duties similar to those of 2181-134 STATISTICIAN, APPLIED (prof. & tech., n.e.c.). Specializes in obtaining statistics concerning human populations including their size, growth, family structure, distribution, movement, composition, age, sex, race and economic status.

2181-130 MATHEMATICIAN, APPLIED(prof. & tech., n.e.c.)
DPT:188
GED: 5 SVP: 8 EC: I PA: S

Applies mathematical principles and techniques to solve problems in activities, such as scientific research, engineering and management:

Studies problems raised by scientists, engineers, managers and others to determine suitable methods of solution. Applies mathematical principles and techniques to solve problems in research, development, production, logistics and other functional areas, utilizing knowledge of subject matter or field to which applied; such as, electronics, atomic energy, life sciences or economics. Performs computations and applies methods of numerical analysis. Operates or directs operation of electronic and mechanical computation equipment and other aids.

May act as advisor or consultant.

2181-134 STATISTICIAN, APPLIED(prof. & tech., n.e.c.)
DPT:188
GED: 5 SVP: 8 EC: 1 PA: S

Plans surveys, and collects, organizes, interprets, summarizes and analyzes numerical data on sampling or complete enumeration bases, applying statistical theory and methods to provide usable information in scientific and other fields:

Develops questionnaire to elicit information required by survey design. Conducts surveys utilizing sampling techniques, or monitors experiments to obtain types of information desired. Evaluates reliability of sources of data. Adjusts and weighs raw data as necessary and organizes and summarizes data into tabular forms amenable to analysis and interpretation. Directs computation of averages, ratios, distributions, correlation coefficients and other items. Presents data in form of tables and graphs. Writes reports describing sources of data and limitations on data reliability or usability by management, scientists and others. Analyzes and interprets data to point up significant differences and relationships among sources of data, preparing conclusions and forecasts based on data summaries. May specialize in analyzing and interpreting data in one or more subject matter fields and be designated accordingly; for example, Statistician, Analytical

2181-138 STATISTICIAN, BIOLOGICAL AND AGRICULTURAL SCIENCE(prof. & tech., n.e.c.)
DPT:188
GED: 5 SVP: 8 EC: 1 PA: S

Plans and conducts surveys and experiments to obtain statistics for use in fields of basic scientific research related to life processes of plants, animals and humans:

Performs duties similar to those of 2181-134 STATISTICIAN, APPLIED (prof. & tech., n.e.c.). Specializes in obtaining statistics to study the relationships between groups of organisms, using statistical methods. Obtains statistics; such as, those concerning cause and incidence of disease and efficacy of preventive measures and immunization techniques, to assist in medical research and public health programs. May be classified according to a particular specialization and be designated accordingly; for example, Statistician, Medicine

2181-142 STATISTICIAN, BUSINESS AND ECONOMICS
(prof. & tech., n.e.c.) DPT:188
GED: 5 SVP: 8 EC: 1 PA: S

Plans and conducts surveys and experiments to obtain statistical information business on economic activities:

Performs tasks similar to those of 2181-134 STATISTICIAN, APPLIED (prof. & tech., n.e.c.). Specializes in planning and conducting surveys and experiments to obtain statistical information on income, trade, production, prices, finance, taxation, labour and employment.

May obtain and evaluate data concerning operations of financial institutions and be designated accordingly, Statistician, Financial

2181-146 STATISTICIAN, PHYSICAL SCIENCE AND ENGINEERING(prof. & tech., n.e.c.) DPT:188
GED: 5 SVP: 8 EC: 1 PA: S

Plans and conducts surveys and experiments to obtain statistical information for use in physical science and engineering:

Performs tasks similar to those of 2181-134 STATISTICIAN, APPLIED (prof. & tech., n.e.c.). Specializes in planning and conducting surveys and experiments to obtain statistical information, and in applying such specialized theory and methodology as statistical mechanics (prediction of properties of matter in terms of properties of molecular composition).

May devise procedures for testing and inspecting industrial products produced on mass scale and establish plant quality control programs based on theory of probability. May make statistical analyses of information affecting operations of industrial establishments. May be classified according to procedure, product or establishment and be designated accordingly; for example,

Quality-Control Analyst
Statistician, Chemistry
Statistician, Industrial

2181-150 STATISTICIAN, SOCIAL SCIENCE(prof. & tech., n.e.c.)
DPT:188
GED: 5 SVP: 8 EC: 1 PA: S

Plans and conducts surveys and experiments to obtain statistical information for use in field of social science:

Performs duties similar to those of 2181-134 STATISTICIAN, APPLIED (prof. & tech., n.e.c.). Specializes in planning and conducting surveys and experiments to obtain statistical information in political science, anthropology, sociology and psychology.

May obtain and evaluate data concerning public opinion and education and be designated accordingly; for example, Statistician, Education
Statistician, Opinion Polling

2181-154 STATISTICIAN, VITAL(gov. serv.) DPT:188
GED: 5 SVP: 8 EC: 1 PA: S

Plans surveys, and collects and analyzes vital statistics related to variables, such as, births, marriages and deaths:

Performs duties similar to those of STATISTICIAN, APPLIED (prof. & tech., n.e.c.). Specializes in planning registration systems for recording data on births, deaths, stillbirths, notifiable diseases, accidents, marriage, divorces and annulments. Designs tabulations and publications from registers and analyzes resulting statistics.

May specialize in vital statistics on public health and be designated accordingly; for example, Statistician, Public Health

2183-SYSTEMS ANALYSTS, COMPUTER PROGRAMMERS AND RELATED OCCUPATIONS

This unit group includes occupations concerned with planning, implementing and controlling electronic data-processing services and the programming of computer systems. Typical areas of specialization include: analysis of computer systems; and providing advice on availability and use of electronic data-processing resources, capabilities and technological development. Occupations concerned with organizational and methods analysis are classified in Unit Group 1173, ORGANIZATION AND METHODS ANALYSTS. Occupations concerned with the operation of electronic data-processing equipment are classified in Unit Group 4143 ELECTRONIC DATA-PROCESSING EQUIPMENT OPERATORS.

2183-110 SYSTEM ANALYST BUSINESS, ELECTRONIC DATA-PROCESSING(prof. & tech., n.e.c.) DPT:131
commercial-systems analyst.
GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Analyzes business problems, such as development of integrated production and inventory control, cost analysis, selects appropriate equipment, and develops programs for electronic data-processing systems: Confers with department heads or project directors to ascertain specific management information requirements; such as, nature and degree of summarization, identification of items and format for presentation of results. Analyzes systems, procedures and methods used in various operations selected for conversion, determines feasibility and extent of conversion, and prepares process flow-charts and diagrams. Develops new applications and long-range plans for customer utilization of electronic-data-processing system, and analyzes capabilities and limitations of computers and peripheral equipment. Devises means of deriving input data to select a feasible and economic method for personnel operating equipment. Tests and eliminates errors in computer programs, to prepare final system of operations. Assists sales personnel of electronic-data-processing services in preparation and presentation of proposals to customer, in non-technical language. Prepares cost estimates and summary of savings resulting from proposed systems. Maintains accurate records and documentation of system analysis to facilitate follow-up action. Prepares instruction manuals covering use, operation, routine maintenance and technical specifications of key-punch machines, sorters, and other related tabulator equipment, and trains operating and supervisory personnel. Designs new forms and other documents relating to computer opera-

tions. Supervises and co-ordinates the work of programmers. May write programs, using computer coding symbols in language processable by computer. May specify power-supply requirements and recommend purchase of air-conditioning equipment to control temperature, humidity and dust. May select and design forms of use in program.

2183-114 SYSTEMS ANALYST ENGINEERING-SCIENTIFIC, ELECTRONIC DATA-PROCESSING(prof. & tech., n.e.c.) DPT:131
GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Analyzes physical systems and scientific, engineering and other technical problems and formulates mathematical models for solution by electronic data processes:

Consults with engineers and scientists to define and analyze problem. Determines design configuration and process and computer system required. Searches libraries and other sources for applicable mathematical formulations and pertinent data. Examines verbal descriptions or graphic representations of problem. Defines definition of project and prepares mathematical model of problem area, applying knowledge of higher mathematics, to relate constants, variables, restrictions, alternatives, objectives and their numerical parameters. Reduces problem to computer-processable form by applying knowledge of numerical analyses, expressing it in computer-oriented language, and preparing data-flow chart. Refers formulations to programmers. Confers with originator of problem to discuss adequacy and applicability of computer output or need for reformulation of model after trial run on the computer. Prepares technical reports describing step-by-step solution of problem, and develops problem-solving techniques. Supervises and co-ordinates the work of programmers.

May prepare articles for publication in engineering and scientific journals. May use small-scale analog or keyboard-input-digital computer to assist in preparing or testing parts of model formulation.

2183-118 PROGRAMMER, BUSINESS(prof. & tech., n.e.c.) DPT:231
GED: 5 SVP: 7 EC: 1 PA: S 6 7

Writes program in computer-process language to provide required data for management and resolve business problems:

Studies business-problem work-flow chart or diagram prepared by systems analysts. Confers with systems analysts or departmental representatives concerned with program to resolve questions of intent, output requirements, input data acquisition, extent of automatic programming, coding use and modifications, and inclusion of internal checks and controls. Writes program in logical sequence, by applying knowledge of computer capabilities, subject matter and symbolic logic. Writes detailed logical flow-chart in symbolic form to represent work order of data to be processed by computer system, and to describe input, output, and arithmetic and logical operation involved. Prepares block diagrams to specify equipment lay-out. Devises sample input data to test adequacy of program. Corrects program errors by such methods as altering program steps and program sequence. Prepares written instructions to guide operating personnel during production runs. Supervises junior programmers on a project.

May analyze, review and rewrite programs to increase operating efficiency or adapt to new requirements. May compile documentation of program development and subsequent revisions. May train subordinates in programming. May plan, schedule, analyze and direct preparation of programs and be designated accordingly; for example, Programmer Chief, Business

2183-122 PROGRAMMER, ENGINEERING AND SCIENTIFIC(prof. & tech., n.e.c.) DPT:231
GED: 5 SVP: 7 EC: 1 PA: S 6 7

Writes program in computer-process language to solve engineering and scientific problems:

Studies problem statement prepared by systems analysts to determine nature of data-processing requirements. Interprets symbolic statement of problem, prepares logical flow-charts and block diagrams, and encodes resolvent equations for processing, by applying knowledge of differential equations and numerical analysis, and the capabilities and limitations of computers. Confers with engineers, scientists, technical personnel and customers to resolve problems of intent, inaccuracy, or

feasibility of computer processing. Writes program, in a logical sequence, by applying knowledge of computer capabilities, subject matter and symbolic logic. Observes or operates computer during testing or processing runs to analyze and correct programming and coding errors. Reviews results of computer runs with interested personnel to determine necessity for modifications and re-run. Develops new sub-routines for a specific area of application or expands on applicability of current general programs to simplify statement, programming or coding of future problems. Supervises junior programming personnel on a project.

2183-126 TOOL PROGRAMMER, NUMERICAL CONTROL(any ind.) DPT:261
GED: 4 SVP: 8 EC: 1 PA: S 4 6 7

Writes program in computer-process language to control automatic machining of metal parts:

Analyzes such data as complexity of machining required, production process and time involved, to determine whether more economic production would result from numerically-or manually-controlled machine tools; such as, punch presses, shearing machines and lathes. Studies design data and drawings to determine intent of designer and visualize configuration of work piece. Examines specifications to determine dimensions of parts. Determines type and size of cutting tools, according to hardness of metal stock at which machining would start. Draws sketches of part to plan number, location and direction of cutter paths. Establishes location of tool set point, starting point, and cutter change points by three-dimensional co-ordinates, according to reference point and location of stock on fixture, and plots cutter centre paths on graph paper. Calculates radii of simple and complex irregular curves, using square root calculator and calculating machine. Writes program in series of symbolic and numeric statements that prescribe machining of work piece in factors; such as, geometric regions and boundaries, radii, clearance planes, machine modes, tolerance limits, size and type of cutting tool, initial position, feed rates, direction and movement of cutting tools, and coolant use. Observes machining of first part produced by automatically-controlled machine, and verifies accuracy of programming, using micrometer and gauges.

2183-130 PROGRAMMER, DETAIL(prof. & tech., n.e.c.) DPT:361
GED: 4 SVP: 6 EC: 1 PA: S 6 7

Selects symbols from coding system peculiar to model of computer, applies them to successive steps of program, and writes machine process instructions:

Identifies input data; such as, type, quantity and quality of products, quantity and quality of raw material and production capacity of equipment, utilizing knowledge of computer program. Reads and interprets sequence of alphabetic, numeric or special characters from handbook, or memory, for each program step. Writes computer-process machine instructions in symbolic language or code for transfer to punch cards or machine input tape. Marks code sheets indicating relationship between code and program steps to simplify debugging of program. Confers with other programming personnel to clarify input program.

May assist in analyzing computer results and developing operating schedules in conjunction with business, engineering and scientific programmers.

2189-OCCUPATIONS IN MATHEMATICS, STATISTICS, SYSTEMS ANALYSIS AND RELATED FIELDS, N.E.C.

This unit group includes occupations, not elsewhere classified, concerned with activities in the fields of mathematics, statistics and systems analysis; such as, analyzing coding systems and performing technical duties in statistical programs.

2189-110 CRYPTANALYST(gov. serv.) DPT:281
cipher expert.

GED: 5 SVP: 7 EC: I PA: S 5 7

Analyzes secret coding systems and decodes messages for military, diplomatic or law-enforcement agencies:

Examines secret messages for characteristics that reveal coding system employed in message. Analyzes message, using formulas, code books, chemicals, computer technology, mechanical devices, and knowledge of commonly-used coding keys. Decodes entire message and consults books, magazines, government publications and police files to obtain corroborative evidence.

May design and develop codes.

2189-114 STATISTICAL TECHNICIAN(prof. & tech., n.e.c.) DPT:231

GED: 4 SVP: 7 EC: I PA: S 4 7

Carries out a variety of technical functions of a statistical nature in

support of engineers, economists, statisticians, mathematicians and other scientists, using a knowledge of mathematical and statistical principles, by performing any combination of the following duties:

Assists in determining survey designs, and drafting questionnaires to obtain information on employment, working conditions, salaries, product suitability and various other subjects. Develops coding systems and tabulation methods for processing informations received. Supervises the mailing of questionnaires, collection and compilation of data, coding and mechanical tabulation procedures during survey operations. Computes averages, means, modes, deciles, quartiles, medians, deviations, correlations and other statistical data to aid in the examination and evaluation of trends. Compiles, analyzes and presents data in mathematical, tabular or chart form for interpretation by statisticians, economists and others. Corresponds with survey participants to explain purpose of survey, clarify problems and collect other required information. Assists in the preparation and distribution of final reports.

ARTISTIC, LITERARY, PERFORMING ARTS AND RELATED OCCUPATIONS

This major group includes occupations concerned with creating and executing artistic works, by sculpturing, painting, drawing, engraving, etching, and by applying artistic media for illustrative, decorative and sales promotion purposes; creating designs for product and interior decoration; taking photographs; directing and operating motion picture and television cameras; composing, adapting, conducting and performing musical works and dances; producing, directing, and acting in theatrical, motion picture and broadcast productions; making broadcast announcements; translating and interpreting languages, and preparing and editing written material. Occupations primarily concerned with teaching music, dancing, and drama are classified in Major Group 27, **TEACHING AND RELATED OCCUPATIONS**. **ARTISTIC, LITERARY, PERFORMING ARTS AND RELATED OCCUPATIONS** are classified in the following minor groups:

- 331 Occupations in Fine and Commercial Art,
Photography and Related Fields
- 333 Occupations in Performing and Audio-
visual Arts
- 335 Occupations in Writing

331-OCCUPATIONS IN FINE AND COMMERCIAL ART, PHOTOGRAPHY AND RELATED FIELDS

This minor group includes occupations concerned with creating and executing artistic works in a personally interpreted manner, by painting, sculpturing, drawing, engraving, etching, and other methods; creating designs for industrial and commercial products and interior decoration; designing cartoons and illustrations for books, magazines and other publications; applying artistic media for illustrative, decorative, and sales promotion purposes; and obtaining pictures and likenesses with still, motion picture and television cameras. Supervisory occupations in this minor group are classified in the same unit groups as the workers they supervise. **OCCUPATIONS IN FINE AND COMMERCIAL ART, PHOTOGRAPHY AND RELATED FIELDS** are classified in the following unit groups:

- 3311** Painters, Sculptors and Related Artists
- 3313** Product and Interior Designers
- 3314** Advertising and Illustrating Artists
- 3315** Photographers and Cameramen
- 3319** Occupations in Fine and Commercial Art,
Photography and Related Fields, n.e.c.

3311-PAINTERS, SCULPTORS AND RELATED ARTISTS

This unit group includes occupations concerned with creating and executing original artistic works in a personally interpreted manner, by painting, drawing, sculpturing, engraving and etching. Activities include: creating pictures, abstract designs and similar artistic compositions, employing paints, pencils, pastels, ink or other media; creating three-dimensional decorative and representational forms by shaping materials, such as wood, stone, clay or metal; and creating original designs and engraving or etching them on metal, wood or other materials for reproduction. Occupations concerned with painting, sculpturing, engraving and etching in which work is performed on a production basis are classified

in other major, minor, and unit groups. Occupations concerned with conserving and restoring art works are classified in Minor Group 235, **OCCUPATIONS IN LIBRARY, MUSEUM AND ARCHIVAL SCIENCES**. Carvers in wood, stone or other materials engaged in commercial reproduction of artistic objects are classified in Unit Group 3319.

3311-110 ARTIST, PICTORIAL(prof. & tech., n.e.c.) DPT:061
GED: 4 SVP: 8 EC: B PA: L 4 5 7

Creates pictures, abstract designs, and similar original compositions, employing various media and techniques: Conceives picture or design, and selects medium, such as oil, water colours, pencil, pastels or ink, and prepares material to be used for the painting or drawing. Arranges objects in required composition, or directs model to pose for desired effect. Sketches preliminary outline

of composition on paper, canvas, wood panel or other chosen surface. Mixes liquid colouring matter, if required, and applies medium, using appropriate techniques to harmonize relationships of line, colour, design and mass into a unified and artistic arrangement. Coats or sprays finished artwork with fixative or preservative, such as varnish or acrylic solution.

May produce illustrations for publication. May be designated according to specialization in medium, technique and subject matter; for example,

Artist, Charcoal
Painter, Landscape
Painter, Oils
Portrait Painter
Sketcher, Ink

3311-114 SCULPTOR(prof. & tech., n.e.c.) DPT:061
GED: 4 SVP: 8 EC: B 6 PA: L 4 5 7

Creates three-dimensional decorative and representational forms by shaping materials, such as wood, stone, clay or metal, performing any combination of the following duties:

Conceives design for sculpture, and decides on material and techniques to be used. Selects material of suitable proportions, quality and texture. Sketches design of proposed sculpture, or makes models of wax or plaster. Arranges objects for required composition, or directs model to pose for artistic works. Carves, or otherwise shapes, material to desired form, using hand or power tools, such as hammers, drills, chisels and knives. Models plastic substances, such as clay or wax, using fingers or hand tools to form objects. Fires clay objects in kiln, or prepares moulds for casting sculpture in metal. Devises artistic forms from metal, using welding or metal-working equipment, or from stone, using masonry tools.

May be designated according to technique or medium employed, or type of sculpture executed; for example,

Modeler Clay
Sculptor, Eskimo Art
Sculptor, Metal
Sculptor, Monument
Sculptor, Wood

3311-118 PRINTMAKER(prof. & tech., n.e.c.) DPT:081
engraver and etcher, artistic.
GED: 4 SVP: 7 EC: I PA: S 4 7

Creates, engraves, etches and prints fine-art graphics, by any of the following methods:

1. Conceives, and draws design on plate or block of metal, wood or other material, using ink, crayon or chalk. Cuts design into plate or block following lines of drawing to produce a surface-in-relief, using graving tools. 2. Cleans surface of plate and coats surface of plate with acid-resistant compound. Conceives, and cuts design through compound, exposing parts of plate to be etched, using graving tools. Immerses plate in acid solution to corrode exposed parts and produce a surface-in-relief. Removes plate and washes plate to halt etching action. Repeats etching process, coating parts of the design with compound when they are sufficiently etched, until desired effect is achieved. 3. Conceives and draws design or sketch on paper, using pen and ink, pencil or charcoal. Perforates outline of design by hand, using perforating tool. Lays perforated design, face down, on smooth block of soft stone and applies marking material to perforations. Removes perforated design, leaving marked outline on surface of block. Cuts and chips along lines of outline using stone-working tools. Positions plate or block in hand press. Coats printing surface of block or plate with ink, using roller or fills depressions in surface with ink. Lays sheet of paper, cloth or other material on inked printing surface. Pulls lever or turns screw of press to exert pressure on sheet and print design. Corrects engraving or etching as required after trial impression.

3311-122 CARVER, TOTEM POLE(woodworking) DPT:281
GED: 3 SVP: 8 EC: B PA: H 3 4 7

Carves and paints designs or figures of people or animals representing Canadian Indian tribal history, legends, and motifs on wooden pole, using hand tools:

Positions pole in cradle or on wood blocks, preparatory to carving, using crow bars or jacks. Analyzes information concerning family lineage or tribal history to be depicted, and draws outline of appropriate symbols on pole, using pencil or chalk. Carves symbols in relief, cutting along outlines, using hand tools such as axe, adze, and

double-bladed curved and straight knives. Paints carved totem pole in appropriate colours, using brush and native-dye mixtures or commercial paints.

May select tree to be used for totem pole in forest or lumberyard, trim, de-bark, and transport it to workshop.

3313-PRODUCT AND INTERIOR DESIGNERS

This unit group includes occupations concerned with creating designs for industrial and commercial products and interior decoration, by harmonizing aesthetic considerations with technical and other requirements. Activities include: creating designs for a wide variety of manufactured products, such as furniture and furnishings, clothing, textiles, pottery, handbags, shoes, paper securities, and packaging containers; designing interior decorations and planning furnishing of homes, public buildings and other places; setting-up advertising displays; designing and laying-out stained-glass windows, and designing sets for stage, motion picture, and television productions.

3313-110 EXHIBITION AND DISPLAY DESIGNER(prof. & tech., n.e.c.) DPT:031
designer, shows and demonstrations.
GED: 5 SVP: 8 EC: B PA: L 4 5 6 7

Designs and sets up exhibitions and displays, for purposes such as advertising, publicity and education:

Discusses design project with supervisor or client. Examines site of proposed display, and sketches or photographs area. Studies sketches or photos to determine colours, shading and perspective, and to formulate a suitable arrangement of materials and background. Makes, or directs other workers to make working drawings and models of displays, using drafting instruments, scissors and cardboard. Submits final design to supervisor or client for approval. Directs workers erecting displays from materials; such as, wood, plastic, plaster, cloth and crepe paper. Designs and positions explanatory signs or pictures to assist understanding of exhibit or display by viewers. Directs positioning of spotlights, coloured lighting and other illumination.

3313-114 INTERIOR DESIGNER AND DECORATOR(bus. serv.) DPT:051
home-decorating consultant; interior decorator.
GED: 5 SVP: 8 EC: I PA: L 4 5 6 7

Plans and designs aesthetic interiors for homes, industrial, commercial and institutional establishments and other structures:

Analyzes functional requirements, desired mood and purpose of furnishing interior, based on client's needs and preferences. Devises harmonious colour scheme, and sketches plans of areas showing arrangement of furniture and accessories. Estimates cost and amount of materials required, and presents plans to client for approval. Selects or recommends purchases of decorative and functional materials and accessories, such as, furniture, lighting fixtures and pictures, or creates original designs for furnishings to conform with decorative scheme. May direct workers painting walls, laying carpets, installing fixtures and draperies, and arranging furniture and accessories.

3313-118 FURNITURE DESIGNER(furn.) DPT:061
GED: 5 SVP: 8 EC: I PA: S 4 5 6 7

Designs furniture line or individual pieces for manufacture, using knowledge of design trends and manufacturing techniques:

Confers with production, design, and sales personnel to obtain and discuss design suggestions. Evaluates proposals and prepares freehand sketches of promising designs. Obtains approval from customer, design committee, or authorized company officials, and prepares scale drawing of design. Draws or directs preparation of working drawings specifying dimensions and materials to be used in manufacturing of product.

May plan modifications to conform to changes in design trends and customer preferences. May train assistants or instruct factory personnel on special requirements when introducing new models.

3313-122 SET DESIGNER(broadcast, motion pic. & stage)
DPT:061
stage-scenery designer.
GED: 5 SVP: 8 EC: 1 PA: L 4 5 6 7

Designs sets for stage, television and motion picture productions: Reads script to determine setting in time, place and mood. Studies pictorial and written information in libraries and archives, and visits museums and art galleries to become familiar with architecture and decor of locale and period to be portrayed. Sketches and paints plans, using artists' materials. Submits plans to director and producer for approval. Constructs miniature sets in cardboard, plaster or plastic material, using hand tools. Prepares working drawings indicating elevation and detailed plan of set for scene builders. Oversees construction of setting and furnishings according to miniature set. Creates special stage lighting patterns to achieve dramatic or decorative effects.

3313-126 STAINED-GLASS ARTIST(glass)
DPT:061
painter,glass; stained-glass-window designer.
GED: 5 SVP: 8 EC: 1 PA: L 4 5 6 7

Designs and creates stained-glass for windows, lampshades and other articles, utilizing knowledge of portraiture, church symbolism, heraldry, ornamental design, and effect of colour, light and shade on glass:

Consults with client or supervisor to determine subject matter to be portrayed. Creates colour design in miniature or facsimile, for customer's approval, using coloured papers. Discusses, with other workers, technical problems encountered. Indicates on design, where glass is to be cut and leaded. Stains and paints pieces of coloured glass. Accents mosaic design by darkening hair, painting out background around head, and marking features of face, folds of drapery and other details, using artist's brush and powder colours blended with liquid base.

May fire pieces of glass in kiln to harden colours, and retouch glass between firings. May specialize in a particular aspect of production and be designated accordingly,
Cartoon Maker, Stained Glass

3313-130 FUR DESIGNER(fur goods)
DPT:081
GED: 5 SVP: 8 EC: 1 PA: L 4 5 6 7

Designs and prepares patterns of fur garments, such as coats, capes, jackets and stoles, for customers:

Sketches design on paper to make garment, utilizing knowledge of various kinds of furs, fur-handling techniques and fashion trends. Draws patterns to scale, from sketched design, on paper for application to large production of garment, using drawing instruments, and cuts out patterns, using cutting tool.

May design cloth coats or coats combining cloth and fur materials. May perform custom design work for special clients and oversee manufacture of designed items.

3313-134 GARMENT DESIGNER(garment & fabric; knit goods)
DPT:081
clothes designer.
GED: 5 SVP: 8 EC: 1 PA: L 4 7

Creates designs and prepares patterns for manufacture of new types and styles of garments:

Sketches outline of pattern on printed forms. Draws various parts of garment to full scale on sheet of paper, using ruler and drawing instruments. Cuts out drawings with scissors to make pattern for experimental garment. Writes specifications for garment, describing construction, colour scheme and type of material to be used. Examines experimental garment on model or form, and makes any necessary changes to pattern.

May arrange for newly designed garments to be tested by actual use, washing or dry-cleaning. May direct activities of garment cutters and sewers. May be designated according to garment designed; for example,
Glove Designer
Jacket Designer

3313-138 INDUSTRIAL PRODUCTS DESIGNER(prof. & tech., n.e.c.)
DPT:081
GED: 5 SVP: 8 EC: 1 PA: L 4 5 6 7

Creates designs for the fabrication of products, considering both aesthetic qualities and technical requirements:

Studies purpose, technical specifications, cost limitations, available materials and methods of production, preferences of potential users, and other factors influencing design of a wide variety of products. Formulates design to achieve a pleasing appearance compatible with utilitarian function and cost requirements. Prepares sketches, showing style, shape, size, and general appearance of product. Makes alterations to designs, as required by management or clients.

May make technical drawings, models, or patterns of products for guidance of production engineers and craftsmen. May supervise technical staff engaged in preparing detail drawings and production specifications. May specialize in design of particular type of product and be designated accordingly.

3313-142 SHOE DESIGNER(shoes)
DPT:081
GED: 5 SVP: 8 EC: 1 PA: S 4 7

Creates or modifies designs for shoes:

Prepares sketches, diagrams or charts to illustrate design, using drawing instruments, such as crayons, coloured ink, shading pencils, rulers and angles. Writes specifications, such as colour scheme, type of construction and materials to be used, on design. Devises changes in established manufacturing methods or procedures, such as deletion or addition of operations to produce designed shoe. Compiles instructions for factory production and administrative departments on changes of new designs. Cuts paper patterns and makes cardboard templates, and metal or wooden patterns of shoe design.

May gather data on competitors' products and analyze new styles, materials, and manufacturing methods. May direct activities of other designers and pattern makers and be designated accordingly.

3313-146 TEXTILE DESIGNER(textile)
DPT:061
cloth designer.
GED: 5 SVP: 8 EC: 1 PA: S 4 5 6 7

Originates designs for fabrication of textile cloth, specifying weave, pattern, colour and gauge of thread, to create new fabrics that meet functional requirements and fashion preferences of consumers:

Develops new ideas for fabrics through study of fashion trends and knowledge of textiles and their various uses. Consults with technical and merchandising staff to obtain design ideas and to evaluate customer acceptance of new types and kinds of fabrics. Sketches designs for patterns on graph paper, using pens and rulers. Prepares written instructions to specify such details as weave of fabric, finish to be applied, and colour to be used. Examines sample woven on sample loom and modifies design if necessary.

May prepare cost estimates for producing new fabrics. May be designated according to product designed; for example,
Rug Designer
Woven-Label Designer

3313-150 COMMERCIAL-DESIGN ARTIST(prof. & tech., n.e.c.)
DPT:081
GED: 5 SVP: 7 EC: 1 PA: S 4 7

Designs decorative patterns for application to commercial products: Studies purpose, technical specifications, cost limitations and other factors influencing decoration of products such as, fabrics, wallpaper, ceramics, and glassware. Creates and executes design, using artists' materials, and submits design for approval. Makes alterations as required by management or customer. Does not design shape or texture of industrial products, such as appliances, furniture and textiles.

May make drawings or samples of decoration for guidance of production engineers or craftsmen. May specialize in decoration of particular type of product and be designated accordingly.

3313-154 PACKAGE DESIGNER(prof. & tech., n.e.c.)
DPT:081
GED: 5 SVP: 7 EC: 1 PA: L 4 7

Designs containers for products, such as foods, beverages, toiletries, cigarettes and medicines:

Considers package factors, such as ease of handling, storage, con-

sumer appeal, identity of product, and production cost, and sketches basic design of container. Revises and completes design, adding colour and other markings, using paint and brushes. Fabricates model in actual or facsimile of material to be used for production package.

3313-158 POTTERY DESIGNER(cement, stone & clay) DPT:081
GED: 5 SVP: 7 EC: 1 PA: L 4 7

Creates drawings of pottery shapes and patterns, and makes prototype piece:
Sketches new designs, motifs and styles, using drawing instruments. Transfers decorative design to finished drawing of pottery piece, and applies water colours, arranging shades and colours harmoniously. Makes clay prototype by hand on potter's wheel. Paints design on prototype piece and applies underglaze, using brushes. Revises and adapts shape and pattern designs to production requirements, applying knowledge of glazes, firing, decorating and production processes. May fire sample piece in kiln.

3313-162 WOMEN'S FASHION DESIGNER(ret. 'trade) DPT:061
custom designer.
GED: 5 SVP: 7 EC: 1 PA: L 4 5 6 7

Designs custom-styled women's garments, according to customers' measurements and fashion preferences:
Discusses fabric, style and colour, advising customer on current fashion trends, suitability and desired appearance. Records garment specifications on sketch for guidance of seamstress. Fits partially completed garment on customer, and marks alterations necessary to achieve correct fitting.
May design single garment or entire wardrobe for customer. May supervise staff engaged in sewing and altering garments.

3313-166 DESIGNER, PAPER SECURITIES(prof. & tech., n.e.c.) DPT:061
GED: 4 SVP: 8 EC: 1 PA: S 4 5 6 7

Designs artwork for the printing of securities, such as currency and bonds, and modifies submitted sketches, employing knowledge of engraving and printing techniques:
Examines client's sketch of proposed design. Modifies proposed design to conform with characteristics and limitations of engraving and printing equipment, and to introduce elements to discourage counterfeiting, using drawing instruments. Selects or suggests colours pleasing to the eye, consistent with security requirements.
May originate designs and design suggestions for clients. May suggest decorative elements and various printing techniques and combinations to further foil counterfeiting and add artistic merit. May be designated according to type of security designed; for example, Bank-Note Designer

3313-170 SUPERVISOR, DISPLAY(bus. serv.) DPT:031
fashion co-ordinator; senior-display artist.
GED: 4 SVP: 7 EC: 1 PA: L 4 5 6 7

Supervises and co-ordinates activities of workers engaged in designing, laying out and constructing displays for store windows or interiors:
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.). Designs layout for display, and selects themes, colours and properties to be used. Oversees construction of decorative props from such materials as wood, plastic, paper and glass. Plans lighting arrangement and selects colouring medium. May prepare and maintain complete set of store-floor plans.

3313-174 EMBROIDERY DESIGNER(textile) DPT:081
GED: 4 SVP: 7 EC: 1 PA: S 4 7

Creates designs to be embroidered on fabrics:
Develops new designs and patterns, utilizing knowledge of customer preferences, aesthetic appeal and embroidery techniques. Draws design on paper and submits it to management or customer for approval. Draws design to scale from original drawing, or from sketches, samples or pictures, using pens and coloured inks. Transfers design to paper pattern by rubbing red marking wax over perforations made in design.

May draw enlargement of design to be used in pantograph machine. May perforate designs, using electric-perforating tool.

3313-178 HANDBAG DESIGNER(leather goods) DPT:081
GED: 4 SVP: 7 EC: 1 PA: S 4 7

Creates designs for ladies' handbags:
Sketches design on paper, using drawing instruments and materials, such as coloured ink, pens, shading pencils, and rulers. Writes design specifications, such as colour scheme, type of handbag, and material, in margin of sketch. Drafts master pattern of designed parts onto manila paper, cardboard, or pressboard, and draws in details, such as stitching and ornamentation, using drafting instruments. Cuts pattern and handbag materials, and makes sample article, using scissors, knife and sewing machine. Draws diagrams or sketches to illustrate design for commercial publications.
May make fibre, metal, or wooden patterns. May specialize in designing metal frames for women's handbags and be designated accordingly; for example, Handbag-Frame Designer

3313-182 SIGN DESIGNER(bus. serv.) DPT:081
GED: 4 SVP: 7 EC: 1 PA: S 4 7

Designs illuminated and non-illuminated signs for buildings, or other structures:
Drawn design outlines on poster sheet showing details according to customers' instructions. Determines style of lettering, and positions and draws letters for sign, using artists' tools. Draws pictorials, special effects and background treatment for sign, applying knowledge of production limitations for plastic materials and glass tubing. Determines sign colouring or matches colour requests of customer, and colours design, using paints or crayons. Sketches sign in perspective as it will appear in mounting, for customer approval. Writes detailed specifications, indicating dimensions, colours, materials, special effects and background treatment for draftsman's use in preparing working drawing for production purposes.

3313-186 CREST DESIGNER(misc. prod. fab., n.e.c.) DPT:281
GED: 4 SVP: 5 EC: 1 PA: L 4 7

Designs and lays out patterns to be utilized in the printing of fabric crests for organizations, such as sports clubs and schools:
Draws scaled designs containing letters, numbers and symbols, such as crowns or animals to depict traditions or characteristics of organizations, using draughting instruments. Marks specified colours and printing instructions on finished drawing, employing knowledge and experience of printing methods.

3313-199 MISCELLANEOUS PRODUCT-AND-INTERIOR DESIGNERS

This group includes product and interior designers, not elsewhere classified; for example those who design fishing-lures, luggage, interiors of travel trailers and mobile homes, and novelties, such as, brushes, housewares and eyeglass frames. Typical examples of occupational titles covered by this residual group definition are:
Designer, Luggage(leather goods)
Designer, Novelties(misc. prod. fab., n.e.c.)
Fishing-Lure Designer(sport & toy)
Interior Designer, Mobile Homes(motor vehicle)

3314-ADVERTISING AND ILLUSTRATING ARTISTS

This unit group includes occupations concerned with creating and executing illustrations, designs, cartoons and caricatures for books, magazines, posters, newspapers, roadside billboards, television commercials, animated motion pictures and for other purposes related to advertising, illustration, entertainment, and the distribution of information. Scientific illustrators are classified in this unit group. Technical illustrators in the fields of engineering and architecture are classified in Unit Group 2163, DRAUGHTSMEN.

3314-110 SUPERVISOR, ART(prof. & tech., n.e.c.) DPT:031
GED: 5 SVP: 8 EC: 1 PA: L 4 5 6 7

Supervises and co-ordinates activities of artists engaged in preparing illustrations and layouts for publications or for posters, signs and films:

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.). Designs artwork, either with or without specifications, and prepares layouts for single and multicolour illustrations, using knowledge of graphic-arts techniques.

May direct photographing of machines, machine parts, or other subject matter to illustrate texts. May supervise artists engaged in a particular activity, such as illustrating and laying out advertisements for newspaper publication, and be designated accordingly; for example,

Supervisor, Advertising Art

3314-114 ANIMATOR(broadcast., motion pic. & stage) DPT:061
animation artist; cartoonist, motion picture.
GED: 5 SVP: 7 EC: 1 PA: S 4 7

Creates and draws motion-picture-animated cartoons, delineating in successive drawings, action necessary to portray and dramatize movement of characters:

Prepares script or story board for production of film. Makes layout of scenes, and labels each section with designated colours, or indicates colours to be used. Creates and prepares sketches and model drawings of characters. Draws detailed cartoons of all moving objects for all frames of animated films, delineating sufficient number of successive drawings to create illusion of animated characters when sequence is projected. Co-ordinates work of assistants.

May prepare successive drawings to portray wind, rain, fire and similar effects. May direct and edit sound recording of dialogue to prepare audio-video synchronization.

3314-118 COMMERCIAL ARTIST(prof. & tech., n.e.c.) DPT:061
graphic artist.
GED: 5 SVP: 7 EC: 1 PA: S 4 5 6 7

Creates and executes illustrations and designs for reproduction in newspapers, books or other publications, or for posters, signs and billboards:

Studies proposals, sketches or written instructions, and confers with colleagues and clients to determine style of illustrations, space limitations, colour restrictions and similar considerations. Sketches subject to be illustrated, rendering details from memory, models or reference materials, and submits drawings for approval. Executes approved work in medium best suited to produce desired visual effect in proposed method of reproduction. Designs lettering for captions, titles, advertisements and other purposes.

May specialize in a particular field and be designated accordingly; for example,
Advertising Illustrator
Fashion Artist
Litho Artist
Poster Artist
Sign Writer, Hand

3314-122 MEDICAL ILLUSTRATOR(prof. & tech., n.e.c.) DPT:061
GED: 5 SVP: 7 EC: 1 PA: L 4 5 6 7

Develops drawings, paintings, diagrams, cartoons and models, illustrating medical findings for use in publications, exhibits, visual aids, consultations, and in teaching and research activities:

Confers with medical and teaching personnel to determine requirements and subject treatment. Makes preliminary sketches while observing actual or recorded surgical and medical research procedures, anatomical and pathological specimens, unusual clinical disorders, magnified micro-organisms, and plant and animal tissue. Completes illustration in pen and ink, monochromatic wash, watercolour, carbon dust and mixed media. Constructs or advises on construction of three-dimensional models in plaster, wax, plastic and other materials. Devises material for visual-aids, such as animated cartoon films and film strips, preparing sequential illustrations to suggest motion or continuity.

May specialize in illustrations in a particular medical field and be designated accordingly.

3314-126 SCIENTIFIC ILLUSTRATOR(prof. & tech., n.e.c.) DPT:061
GED: 5 SVP: 6 EC: 1 PA: S 4 5 6 7

Draws illustrations and diagrams, and constructs models of scientific subjects for use in publications, exhibits, research and teaching activities, using a basic knowledge of science:

Confers with teachers, publishers and other personnel to determine requirements as to treatment of subject matter. Makes sketches, from observation, of scientific experiments and specimens, or from photographs, using artist's tools and optical instruments, such as microscope and camera lucida. Completes illustration in a variety of media and colours depending on purpose of finished work. Prepares graphs, charts and schematic diagrams and other visual aids to assist in interpreting subject matter. Assembles or advises in assembly of teaching models in materials, such as, plastic, plaster and wax.

May specialize in illustrations in a particular scientific field and be designated accordingly; for example,
Biological Illustrator

3314-130 BACKGROUND-AND-TITLE ARTIST(broadcast., motion pic. & stage) DPT:081
GED: 5 SVP: 7 EC: 1 PA: L 4 7

Draws and paints motion picture titles, sub-titles, narratives and title backgrounds:

Studies rough layout of lettering, and selects technique and media; such as, pen and ink, watercolour, pastels, scratchboard, tempera or oils, best suited to produce desired visual effect and to conform with photographic requirements. Executes finished layout on celluloid or paper, using specified type of lettering. Draws and paints scenes, patterns and layouts used as title backgrounds. Letters explanatory copy on sketches to show filming instructions. Submits sketches for approval. Renders final artwork to be photographed.

May prepare typographical lettering by phototypesetting and operate hand press to print lettering on celluloid. May compose paste-ups of titles and texts drawn or imprinted on celluloid sheets. May write original captions, titles and narrative after film is completed.

3314-134 CARTOONIST(print. & pub.) DPT:081
GED: 5 SVP: 7 EC: 1 PA: S 4 7

Creates cartoons to illustrate stories or to depict persons and events, often in caricature:

Determines subject-matter, such as illustration of a story by sequence of drawings, or humorous or satirical portrayal of a current social or political event. Sketches cartoon in pencil on cardboard or paper, and completes shading and colouring, using pens, brushes, inks, paints or pressure adhesive patterns.

May prepare captions for cartoons. May submit cartoon to editorial or engraving departments. May sketch likenesses or caricatures of prominent persons, or specialize in politics or sports and be designated accordingly; for example,
Political Cartoonist
Sketch Cartoonist
Sports Cartoonist

3314-136 LAYOUT MAN(prof. & tech., n.e.c.) DPT:081
art layout man.
GED: 4 SVP: 7 EC: 1 PA: S 4 7

Designs art layouts for use in preparing advertisements or to illustrate books, magazines and newspapers:

Studies drawings illustrations, photographs and text to be used in layout, or sketches illustrations, using clients' specifications to plan design layout. Determines portion of photographs to be reproduced, cropping extraneous elements to conserve space and obtain most desirable effect. Paints or draws comprehensive (sample of finished layout), and submits it for approval. Executes approved design, arranging drawings photographs and text in well-balanced artistic layout. Decides size and style of type to be used Marks . work sheets with explanatory legends for printing.

May retouch photographs with ink and brush. May specialize in designing advertising layouts, and be designated accordingly; for example,
Advertising Lay-Out Man

3314-140 CARTOON-BACKGROUND ARTIST(broadcast., motion pic. & stage) DPT:061
GED: 4 SVP: 7 EC: 1 PA: S 4 7

Assists in artistic creation of motion-picture-animated films: Examines sketches of cartoon characters and action sequences, evaluating them in relation to background layouts and other scenic effects, and determines colours to be used in painting scenes. Discusses with animator the effect of colour patterns and combinations to be used in scenes. Attaches colouring instructions to pictures or develops colour patterns and moods, and paints background layouts for animated cartoon scenes, using water colours, oils or ink. See also definition for term title, 02-040 ASSISTANT (any ind.).

3314-146 LETTERING ARTIST(prof. & tech., n.e.c.) DPT:281
GED: 4 SVP: 6 EC: 1 PA: S 4 7

Paints, or draws precise lettering for advertisements, books and other printed materials: Studies order form and subject matter layout to determine nature and style of lettering required. Outlines lettering, using pencils, rulers, straight edge and curves. Draws or paints final lettering, using lettering pen and inks, or brush and paints, in a form suitable for reproduction by printing. May do involved decorative lettering for formal documents, such as diplomas, and be designated accordingly; for example, Engrosser

3315-PHOTOGRAPHERS AND CAMERAMEN

This unit group includes occupations concerned with photographing people, events, scenes, materials and products with still, motion-picture and television cameras. Activities include: conceiving artistic and special effects, arranging and preparing subject matter, and devising and setting up special photographic equipment.

Photographers

3315-110 through 3315-150

3315-110 PHOTOGRAPHER, GENERAL(prof. & tech., n.e.c.) DPT:062
GED: 4 SVP: 7 EC: B PA: L 4 5 6 7

Operates a still camera to take photographs of persons, places, merchandise and other subjects, and processes exposed film, applying knowledge of effect of light on sensitized material, camera capabilities and artistic composition:

Studies requirements of particular assignment and decides on type of camera, and film. Chooses artificial-lighting accessories, such as reflecting screens or ultra-high-speed flash, if required. Transports and sets up or directs helper to set up equipment at assigned location. Selects or arranges suitable background setting and positions subject and accessories. Measures light reflectivity of subject, using photo-electric meter. Loads film in camera or film holders. Sets camera at desired angle, adjusts lens for focus, aperture for light conditions, and shutter for desired speed of exposure. Studies subject through viewfinder and adjusts camera angle to achieve appropriate artistic composition of picture. Rearranges lighting equipment, if necessary, to bring out highlights and colours. Presses button, lever or bulb to expose film, and winds film to next exposure or changes film plate. Takes exposed film to dark room, mixes chemicals, and processes film to make negatives and prints, either by hand or using processing machines.

May direct and instruct other photographers. May use lens filters, when appropriate, to alter type of light reaching film. May retouch negatives, using air brush, make enlarged prints from negatives using projector, and mount and frame prints.

3315-114 SCIENTIFIC PHOTOGRAPHER(prof. & tech., n.e.c.) DPT:060
GED: 4 SVP: 7 EC: B PA: L 4 5 6 7

Photographs plant, animal and mineral specimens to provide illustrations and visual evidence for scientific or medical publications, records, research and teaching purposes:

Performs duties similar to those of 3315-110 PHOTOGRAPHER, GENERAL (prof. & tech., n.e.c.). Specializes in making still and motion pictures of patients, anatomical structures, gross and minute specimens, plant and animal tissues, and physiological and pathological processes. Utilizes basic scientific knowledge and special techniques, such as time-lapse and high-speed pictures, and ultraviolet or infra-red light to produce visible records of normally invisible phenomena involving the design and setting up of special equipment. Prepares chemicals for processing photosensitive materials to make transparencies, lantern slides, photomontages, colour prints, and enlargements, using projection technique. Designs special equipment and processing formulae. Makes copies of X-ray and similar film.

May conduct research studies in the field of photography to develop new methods for the presentation of scientific data. May specialize in a particular field or technique and be designated accordingly; for example,

Biological Photographer
Medical Photographer
Photomicrographer

3315-118 COMMERCIAL PHOTOGRAPHER(prof. & tech., n.e.c.) DPT:062
GED: 4 SVP: 7 EC: B PA: L 4 5 6 7

Takes photographs for commercial and industrial purposes, such as advertising and publicity:

Performs duties similar to those of 3315-110 PHOTOGRAPHER, GENERAL (prof. & tech., n.e.c.). Specializes in photographing merchandise, industrial products, fashion clothes, machinery, buildings, persons and other subjects for use in advertising displays or literature, public relations, instruction-manual illustration and other commercial and industrial subjects. Confers with clients or employer to determine photographic requirements. Consults with advertising personnel, artists and other staff to arrive at desired motivational quality of photographs. Instructs models to strike poses best suited to illustrate manufacturers' products when engaged in photographing fashion clothes.

3315-122 CHIEF PHOTOGRAPHER(any ind.) DPT:138
GED: 4 SVP: 7 EC: 1 PA: S 4 5 6 7

Supervises and co-ordinates activities of industrial and commercial photographers:

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.). Directs photographer in taking and developing all types of pictures, to meet company's and client's requirements. Trains and supervises darkroom technicians in processing film. Plans technical aspects of picture taking to prepare representations or publications. Develops and maintains good public relations with company's personnel and customers.

3315-126 PORTRAIT PHOTOGRAPHER(prof. & tech., n.e.c.) DPT:052
GED: 4 SVP: 7 EC: 1 PA: L 4 7

Photographs persons in studio or other location to produce pictures which faithfully represent the subject's physical features and personality:

Performs duties similar to those of 3315-110 PHOTOGRAPHER, GENERAL (prof. & tech., n.e.c.). Specializes in portrait photography. Discusses customer's requirements to determine preferences, and to allow customer to become relaxed before sitting. Persuades individual to assume poses which will emphasize desirable features and subdue less attractive ones. May specialize in passport or identification photography or in photographing people at social functions. May own and operate photographic gallery or studio and be designated accordingly.

3315-130 NEWS PHOTOGRAPHER(print. & pub.) DPT:182
GED: 4 SVP: 7 EC: B PA: L 4 7

Photographs newsworthy subjects and events for use in newspaper, magazines and other publications using a still camera:

Performs duties similar to those of 3315-110 PHOTOGRAPHER, GENERAL (prof. & tech., n.e.c.). Specializes in travelling to locations to photograph people and events of current interest. Personally returns exposed film for processing or issues film to messengers for forwarding to headquarters.

May transmit processed film to office or other locations, using wire-photo equipment to facilitate immediate publication. May specialize in a particular news field, such as sports or international affairs and be designated accordingly.

3315-134 ANIMATION CAMERAMAN(broadcast., motion pic. & stage) DPT:262
GED: 4 SVP: 7 EC: I 6 PA: L 4 5 6 7

Operates special cameras to make single frame exposures used to produce colour or monochrome-film cartoon, graphic animation and titles:

Studies film work order, and decides on equipment and techniques needed for desired results. Places background drawing on moveable table over which camera is suspended. Positions one or more acetate sheets, on which animation or lettering has been drawn, over background, and covers drawings with glass plate. Exposes one frame of motion picture film and repeats process, using next drawing in animation sequence. Calculates exact distance animation table must be moved between exposures to achieve desired effect of motion on film, and adjusts exposure and aperture to obtain special effects such as fade-outs or fade-ins, using mathematical formulae. Advises cartoonist on suitability of colour for reproduction on various film stocks or other matters.

May prepare instructions for computer used for automatic set-up and movements of camera and animation stand, shutter and aperture settings, when working with electrically and electronically guided apparatus.

3315-138 AERIAL PHOTOGRAPHER(prof. & tech., n.e.c.) DPT:282
GED: 4 SVP: 7 EC: B 2 5 6 PA: L 4 6 7

Photographs sites from aircraft in flight for news, scientific, town planning, rural development, cartographic, economic or military purposes:

Studies plotted course on map which shows altitude and area to be covered. Calculates number of exposures and time lapses required to obtain pictures, and makes necessary camera adjustments. Determines type of film to be used, such as monochrome, colour or infra-red, and loads camera with roll of film. Secures camera to special camera mount in aircraft. Adjusts exposure time. Keeps camera level and oriented in flight path, and makes frequent adjustments.

May manually trip shutter at calculated intervals. May prepare solutions and chemicals used in developing films and printing positives. May match individual photographs for terrain maps. May plot flight course on map, indicating altitude of aircraft.

3315-142 RACETRACK-FINISH PHOTOGRAPHER(amuse. & rec.) DPT:382
GED: 3 SVP: 5 EC: I PA: L 4 7

Operates photographic equipment to take, process, and display pictures of horserace finishes at racetrack:

Mixes chemicals for exposed film and lays them out ready for instant processing. Loads film into special camera fixed at angle to view finish line of race. Adjusts aperture according to light conditions. Presses button to start electrically-operated camera as horses approach finish line, and to stop camera after last horse has passed. Quickly removes exposed film from camera and develops it manually or in developing machine. Immediately places negative in projector for viewing on screen by judges. Prints and enlarges photographs that are used in deciding winner of race when finish is close.

3315-146 STREET PHOTOGRAPHER(amuse. & rec.) DPT:654
GED: 3 SVP: 2 EC: B PA: L 4 5 7

Operates a still camera to photograph passers-by on street and persuades them to buy snapshots:

Loads camera with film, adjusts camera settings and electronic flash according to light conditions and subjects' activities. Inserts numbered card or envelope in camera slot so that identification number will be registered on film when subject is photographed. Selects subject at random, takes picture, and hands person numbered card or printed envelope containing instructions for obtaining prints. Talks to passers-by to persuade them to purchase prints or to pose for additional photographs.

May collect payment and arrange for delivery of prints. May photograph patrons in nightclubs and restaurants and be designated accordingly.

3315-150 PHOTOGRAPHER'S HELPER(misc. serv.) DPT:667
GED: 2 SVP: 3 EC: I PA: M 4 5 6

Helps photographer in taking and developing photographs:

Arranges lights and screens, positions camera at proper angle and moves objects to secure desired background for photographs as directed. Cleans and oils camera equipment, and recharges camera batteries. Threads camera manually with film preparatory to filming. Loads and unloads film magazines as directed. Helps with darkroom duties, such as mixing chemical solutions and developing films. See also definition for term title, 02-160 HELPER (any ind.).

May label photographs.

Cameramen
3315-170 through 3315-178

3315-170 CAMERAMAN, SENIOR, MOTION-PICTURE(broadcast., motion pic., & stage) DPT:138
GED: 5 SVP: 7 EC: B PA: L 4 5 6 7

Supervises and co-ordinates camera work and lighting at photographing of motion-picture scenes:

Confers with director as to details of scene to be photographed, and informs set electrician of lighting specification required to achieve desired effect. Determines type of equipment, film and lenses to be used. Orders cameraman to set up camera and gives instructions as to focus setting of lens, distance of shot, and angle of camera, comply with mood, character and technical requirements of film subject. Surveys general effect of stage setting and directs any necessary changes in set lighting. Signals cameraman to start camera and photograph scene.

May set up and operate camera to photograph scenes. May perform some or all duties of motion-picture cameramen in small establishments or small productions.

3315-172 CAMERAMAN, MOTION-PICTURE(broadcast., motion pic. & stage) DPT:062
cameraman, second.
GED: 4 SVP: 7 EC: B PA: M 4 5 6 7

Sets up and operates power-driven camera to photograph motion-picture scenes:

Confers with senior cameraman to receive instructions, such as, type of film and lenses to be used, focus setting, distance of shot, and angle of camera. Selects and attaches lens and film magazine to camera, and adjusts focus and distance settings. Views scene through view finder and makes final adjustments to camera. Starts camera and photographs scene, on receiving signal from senior cameraman. Moves camera and adjusts controls to follow action of scenes being photographed.

May operate hand-held camera to convey certain effects.

3315-174 NEWS CAMERAMAN(broadcast., motion pic. & stage) DPT:062
screen reporter.
GED: 5 SVP: 7 EC: B 6 PA: M 4 5 6 7

Operates a motion-picture camera to record newsworthy events and subjects for television or theatre presentation:

Selects type of equipment and accessories to be used according to nature of assignment. Travels to assigned locations, and sets up equipment. Adjusts controls of camera for light conditions, correct focus and other settings. Sights subject through viewfinder and starts camera. Moves camera to follow action of subject and adjusts focus or lenses as required, while maintaining balance and composition of picture. Returns exposed film personally, or sends film by messenger while remaining on scene to obtain additional coverage. May instruct assistant cameramen to move and set up equipment, or lighting technicians to obtain special lighting requirements. May operate camera in conjunction with sound equipment.

3315-178 TELEVISION CAMERAMAN(broadcast., motion pic. & stage) DPT:062
GED: 4 SVP: 7 EC: 1 PA: L 4 5 6 7

Operates television camera, in studios or outdoors, to photograph events or scenes for immediate broadcast, or for recording on videotape:

Confers with director on dramatic effects, photographic composition and mood of scenes to be televised. Prepares aligns, sets up and operates, in conjunction with other workers, the camera optical and electronic facilities to produce proper light-to-signal transfer characteristics. Prepares lenses for use and removes and stores them. Observes scenes through camera monitor, and makes scanning and other adjustments. Moves or instructs other workers to move camera, before or during operation, following directions received from director through headphones. Moves levers to alter angle or distance of shot as required, endeavouring to maintain balance and composition of picture, and to interpret director's ideas regarding dramatic presentation.

May carry and operate miniature television camera to photograph scenes which prevent use of regular equipment. May specialize in covering news events and be designated accordingly, Television-News Cameraman

3319-OCCUPATIONS IN FINE AND COMMERCIAL ART, PHOTOGRAPHY AND RELATED FIELDS, N.E.C.

This unit group includes occupations, not elsewhere classified, in fine and commercial art, photography and related fields concerned with less creative painting and decorating; laying-out graphic- material; constructing three-dimensional displays; and related work such as, posing for artists and photographers, carving reproductions of artistic objects, arranging flowers, cutting out silhouettes, and making artificial flowers. Occupations concerned with processing exposed photographic film and making photographic prints are classified in unit group 9591, PHOTOGRAPHIC PROCESSING OCCUPATIONS.

Other Painters and Related Occupations, Commercial Art and Photography

3319-110 through 3319-142

3319-110 SCENERY ARTIST(broadcast., motion pic. & stage) DPT:281
GED: 4 SVP: 6 EC: B PA: L 3 4 7

Plans and paints scenery for motion-picture and television sets: Sketches preliminary outlines of scene design on surface to be painted, following suggestions or drawings of art director. Blends ingredients to make oil or water-based paints or obtains premixed paints. Paints scene, using brush or spray gun. Prepares back drops and other scenery parts for reuse by repainting surfaces with base colour. Applies paint to objects, such as furniture, fixtures, buildings and other set accessories to create illusions of age or usage. Burns wood surfaces with torch to darken or char surface.

May co-ordinate and supervise work of set painters. May specialize in treating surfaces to create illusion of age, and be designated accordingly,

Ager

3319-114 SIGN PAINTER(bus. serv.) DPT:381
signwriter painter.
GED: 3 SVP: 7 EC: B 6 7 PA: M 2 4 7

Lays out and paints letters, figures and designs, from artist's sketch, on advertising-bulletin boards, windows, outside walls, and business signs, using layout instruments and painting equipment:

Obtains artist's sketch and determines scale for reproducing design, letter or figure. Lays out design on plastic, silk or tin to prepare stencil, or makes paper pattern, using projector, perforating tool and shading pencils. Applies pattern or stencil to sign and draws in detail. Mixes paint according to colour specifications or to match colour keys illustrated on artist's sketch. Applies paint, lacquer, or enamel to bulletin board, wall or other display, using various types of brushes and maulstick. Draws outline of letters or sign, using pounce pattern and bag to mark outline, when painting window signs. Repaints electric signs by removing sign face, cleaning off old paint and applying new lettering. Draws layout for use in silk screen printing of posters, using artist's sketch, scale drawing, projector and lay-out instruments. Cleans brushes and spray gun, using paint thinners.

May apply paint remover and scrape off paint when repainting outside signs or bulletins. May supervise setting up of swing stage or scaffolds on outside of buildings, walls or display billboards to paint designs, letters or figures. May specialize in a particular type of sign painting and be designated accordingly; for example,

Bulletin Painter
Poster Painter
Sign Painter, Maintenance

3319-118 AIRBRUSH ARTIST(prof. & tech., n.e.c.) DPT:281
GED: 3 SVP: 6 EC: 1 PA: S 4 7

Restores damaged and faded photographs, or colours and shades drawings to simulate photographs, using airbrush:

Examines drawing or photographic print to determine colouring, shading and changes required. Cuts out masking templates (friskets) and positions them to control areas to be sprayed. Mixes ink or paint solutions according to colour specifications and spraying consistency desired. Sprays solution while manipulating airbrush, to fill in and blend missing parts of photograph, or to give depth, perspective, and tone. Builds up or changes background of photograph to block out undesirable or distracting details. Inks borders and lettering on illustrations, and paints in details, missing from photographs or obscured by colouring, using pen, brush and drafting instruments. Highlights illustrations by applying white ink or paint.

May only be concerned with restoring photograph and be designated accordingly,

Airbrush Artist, Photography

3319-122 ARTIST, POSITIVE(prof. & tech., n.e.c.) DPT:281
GED: 3 SVP: 6 EC: 1 PA: S 4 7

Devises and paints colour schemes on prepared designs and makes transparent positives for silk-screen printing:

Mixes pigments to obtain paints of various hues. Devises and paints colour schemes on sample design with artists' brushes. Positions transparent overlays (positives) over original design and tapes both to light table. Traces design on overlay, preparing separate overlay for each colour. Opaques non-printing areas with artists' brush to prevent light transfer during photographic process.

May be designated according to product for which design is intended; for example,

Artist, Glass
Artist, Wallpaper-

3319-126 PHOTOGRAPH RETOUCHER(misc. serv.) DPT:281
GED: 3 SVP: 6 EC: 1 PA: S 4 7

Retouches portrait, commercial or other photographic negatives and prints, to accentuate desirable features of subject, using pencils, or watercolours and brushes:

Examines negative or print to determine which features should be accented or minimized. Paints negative or print with retouching medium so that retouching pencil will mark glossy surface. Shades negative or print with pencil or airbrush to smooth facial contours, conceal blemishes, soften harsh highlights or emphasize desirable features. Brushes or sprays colours on print to accentuate lights and shadows and produce clear and attractive features.

May work entirely with negatives. May process film, using darkroom equipment.

3319-130 MANNEQUIN ARTIST(plastic prod.) DPT:381
mannequin cosmetician; mannequin painter.
GED: 3 SVP: 6 EC: I PA: S 4 7

Paints facial and hand features on mannequins, using brushes and oil paints:

Mixes and blends oil colours to produce required shades of paint, using palette and palette knife. Paints cheeks, lips and eyebrow features on contoured, flesh-coloured face of mannequin, using knowledge of cosmetics. Paints simulated-polished fingernails and life-like coloured eyes that complement shade of mannequin's wig. Fabricates fancy eyelashes from meshlike fabric, using scissors, and glues them in place.

3319-134 COLOURIST, PHOTOGRAPHY(misc. serv.) DPT:681
GED: 3 SVP: 6 EC: I PA: S 4 7

Colours photographic portraits with oil colours, as specified, to give them natural, lifelike appearance:

Dips brush in photographic colours, and applies it on face of portrait, freehand, being careful to apply appropriate amount. Applies colour to shaded spots of portrait, using fine brush, and rubs it to blend in with previously applied colour. Colours eyes to fine detail, using special camel's hair brush.

May colour scenic or other photographs, using water colours.

3319-138 INKER AND PAINTER(broadcast., motion pic. & stage) DPT:581
inker and opaquer; painter, animated cartoon.
GED: 3 SVP: 4 EC: I PA: S 4 7

Traces and paints drawings on acetate sheets for production of animated cartoons:

Overlays acetate on original drawing and traces it in ink. Blends pigments to match colour samples, or selects specified premixed paints. Reverses acetate and applies coloured, opaque paints to characters and backgrounds, using artist's brushes or airbrush.

3319-142 PAINTER, HAND(cement, stone & clay) DPT:384
decorator.
GED: 3 SVP: 3 EC: I PA: S 4 7

Paints decorative designs on pottery objects, using brush and pen: Sketches design on object, using pen and ink to produce an artistic effect. Paints freehand or within sketched design, using pre-mixed colours and brush.

May specialize in painting line of colour around edge of bisque or glost ware, using potters' wheel and brush, and be designated accordingly; for example,

Liner

Graphic Lay-Out Workers
3319-162 through 3319-182

3319-162 PASTE-UP MAN(print. & pub.) DPT:381
assembler, art work.
GED: 4 SVP: 6 EC: I PA: L 4 7

Arranges and mounts copy material on paper according to instructions, and photographs completed layout:

Measures and marks paper according to artist's layout, customer's instructions, or layout-man's marks, to determine position of illustrations and printed legends, using ruler and drafting instruments. Cuts copy material, such as illustrations, typed matter and various shapes of black construction paper, using knife or scissors. Attaches material on allocated space, or positions it for spot emphasis or background, using paste or adhesive tape. Prepares type headings to specified size and style, using bench type photoletering machine. Photographs illustrations directly onto paper, reducing or enlarging image, using automatic focussing studio camera. Develops and fixes photographs and headings, and dries them on heated drum. Draws in borders, blocks, leads, lines, outlines and emphasis marks, using draftsmans' tools, pen and

ink. Marks order, copy, illustrations and layout sheet with instructions. Prepares overlays for second-colour reproductions, according to artist's layout.

3319-166 COPY STYLIST(print. & pub.) DPT:384
typographer-proofer.
GED: 4 SVP: 6 EC: I PA: S 4

Designates type size and face to conform with layout and allocated space of copy to be printed on advertising pages of periodicals or catalogues:

Examines copy for layout, number of words, word spacing and borders. Estimates space to be occupied in type by copy, using pica rule and agate line gauge. Marks copy for typesetting, indicating type font, leading and style of border. Forwards layout to printing department.

May file advance copy according to date scheduled. May carry matrices and metal engravings associated with copy to stereotype section for processing. May read proof and forward it to customer for approval. May advise typesetters of changes required.

3319-170 SIGN-LAYOUT MAN(bus. serv.) DPT:381
GED: 4 SVP: 7 EC: I PA: L 4 7

Draws and paints smaller scale or full-sized layouts for use in the production of illuminated and non-illuminated signs:

Studies sketch or drawing and written instructions to determine effective layout, lettering and colour scheme. Draws, or traces pictorial portion of sign on paper, cardboard, metal or wooden panels, using artists' materials and drafting instruments. Completes drawing, using one or more media, such as pen, ink or paint. Marks position for prepared illustrative material or lettering on layout. Draws, traces or stencils lettering and borders, using lettering pen or brush. Writes reproduction instructions to accompany layout.

May prepare material estimates for production purposes. May transfer detail from master pattern to full-size drawing, using projector and electric pencil, stylus, or other perforating tool. May perforate outline of drawing for transfer to asbestos sheet when laying out neon signs, using stylus and powdered charcoal. May render perspective drawings of buildings and manufactured products for display or advertising purposes. May specialize in a particular aspect of sign layout and be designated accordingly; for example,

Delineator
Poster-Layout Man
Projection Illustrator

3319-174 LETTERING, PHOTO PROCESS(print. & pub.) DPT:384
photo-process-lettering man.
GED: 3 SVP: 4 EC: I PA: L 4 7

Lays out lettering designs, for production of photographic prints used in advertising layouts, posters and publications, by one of the following methods:

1. Selects designated adhesive-tipped-lettered transparencies from files and arranges them on glass plate in straight line or predetermined design to form words. 2. Selects designated type of paper lettering and removes individual letters from alphabet sheet, securing them to cardboard background in appropriate design with adhesive tape. 3. Forms lettering on paper-board background by hand, using ink, drawing pens and brushes, set square and stencils. Passes completed design, to camera man for production of negative prints. Corrects defects in negatives, using brush and ink and returns corrected negatives to camera man for production of positive prints.

3319-178 SPACE ALLOCATOR, NEWSPAPER
ADVERTISING(print. & pub.) DPT:384
GED: 3 SVP: 4 EC: I PA: S 4 7

Prepares initial layout of pages for newspaper edition, showing space consumed by advertising material:

Obtains information from listing clerk to ascertain total number of lines reserved for display advertising, and from advertisement marker to ascertain total number of columns reserved for classified advertising. Reserves space for news stories, according to standard layout procedure. Estimates number of pages required to accommodate news and advertising. Assigns and marks off designated space on layout form, using ruler, according to size and position specified by advertiser, and writes advertiser's name in space assigned. Lists number of

pages and indicates material to appear on each page, such as editorials, sports or classified advertisements. Verifies accuracy of layout form against list sheet. Routes layout form to newsroom for news layout.

3319-182 STENCIL MAKER(bus. serv.) DPT:384
GED: 3 SVP: 4 EC: 1 PA: L 4 7

Lays out and cuts stencils to specified designs for use in marking: Draws design letters and numerals on paper or board, using drawing instruments. Brushes shellac on both sides of paper to stiffen and protect it. Cuts out design letters and numerals, using knife. Constructs wooden stencil frame, using mitre box, saw and hammer. Tacks stencil on frame. May reinforce stencil frame with wire, using soldering iron. May stencil letters and numerals on products, using brush or spray gun. May repair stencils and stencil frames, using knife and hand tools.

Display Makers

3319-202 through 3319-206

3319-202 DISPLAY MAN(bus. serv.) DPT:081
display designer.
GED: 4 SVP: 6 EC: 1 PA: L 4 7

Designs, draws, shapes, paints and arranges backgrounds and other fixtures made of paper, cardboard, wallboard, plaster, canvas, wire or wood, for use in window or interior displays of merchandise: Prepares sketch or model, showing layout, colour and other features, and submits it for approval. Cuts, shapes, drapes and paints metal, paper, wood, fabric and other materials, using brush, knife, scissors and carpentry and metalworking tools to fabricate display. Sets up fabricated display in store window or other designated area. May arrange merchandise or articles to be shown on and around display.

3319-206 DIORAMA MAKER(bus. serv.) DPT:684
display maker.
GED: 3 SVP: 6 EC: 1 PA: M 4 7

Prepares and installs three-dimensional displays and decorations, with lighting effects, and frequently against a scenic background: Measures, marks, cuts out and shapes parts from various materials such as, wood, cardboard, glass, plastic or sheet metal, using hand and power tools. Assembles parts, using nails, screws, bolts and adhesives. Paints display fixtures with spray gun or brush. Installs booths, exhibits, displays, furniture and accessories according to specifications. Decorates booth or interior of building with flags, banners or lights, and makes signs with brush, pen or pencil. May construct travelling exhibits to client's specifications. May specialize in making point-of-sale displays and animated billboards or displays.

Miscellaneous Workers in Fine and Commercial Art, Photography and Related Fields

3319-226 through 3319-299

3319-226 SILHOUETTE ARTIST(prof. & tech., n.e.c.) DPT:251
GED: 4 SVP: 6 EC: B PA: L 4 7

Creates and sells silhouette portraits: Displays samples of work, engages passers-by in conversation, and demonstrates silhouette technique, to solicit business. Requests individual to pose, and observes individual to determine identifying features. Cuts freehand profile portraits of subject from dark paper, using scissors or knife. Glues silhouette on light-coloured paper or mounts it in prepared frame. May draw profile prior to cutting it. May cut profile from photograph. May use lights, adjusted to cast subject's shadow on backdrop, as an aid in viewing profile.

3319-228 CARVER, REPRODUCTION(prof. & tech., n.e.c.) DPT:681

GED: 3 SVP: 7 EC: 1 PA: L 4 7

Carves reproductions of artistic objects in wood, stone or other materials, using hand tools: Studies artistic object or sketch to determine required treatment. Selects piece or type of material according to type of object to be carved. Carves detail of object from material, using various gouges, knives and chisels. Grinds hand tools using hone and grinding wheel. May smooth and polish objects, using abrasives and rubbing compounds. May be designated according to type of material carved or artistic style reproduced; for example, Carver, Native Art Wood Carver, Reproduction

3319-230 FLORAL ARRANGER(ret. trade) DPT:654
GED: 4 SVP: 6 EC: 1 PA: L 4 5 6 7

Arranges and sells floral decorations, such as bouquets, corsages, sprays and wreaths: Suggests type of flowers, plants, floral arrangements and decorations appropriate for customers' requirements, applying knowledge of social, religious and ethnic customs. Selects natural and artificial flowers, foliage and decorative accessories; such as, ribbons, bows, vases and ceramic pieces. Assembles floral pieces, using wire, pins, tape, scissors, knife and styrofoam. Paints wreaths and sprays, using aerosol can. Discusses floral settings for special events with customers and arranges floral displays in shops, churches, homes, and banquet halls. Telegraphs or telephones florists in other communities or countries to place orders for out-of-town delivery. Verifies order information, such as delivery address, and time and place of event. Wraps or boxes flowers, plants, and small arrangements. May own and operate a florist establishment and be designated accordingly, Florist

3319-234 MODEL, ART AND PHOTOGRAPHY(misc. serv.) DPT:668
GED: 3 SVP: 3 EC: B PA: L 3 4 5 6

Poses as subject for paintings, sculptures and photographs, by performing any combination of the following duties: Discusses required poses with artist or painter and poses as directed, to express mood or represented activity of artwork. Applies special make-up to face, and styles hair to enhance appearance, considering such factors as colour, camera techniques and own facial features. Assumes and maintains facial expression and body position until directed otherwise. May specialize in modeling for fashion shows or illustrations or in modeling one part of body, such as face, hands, or feet.

3319-238 ARTIFICIAL-FLOWER MAKER(misc. prod. fab., n.e.c.) DPT:684
GED: 2 SVP: 2 EC: 1 PA: S 4 7

Cuts out, assembles and arranges artificial flowers, performing any combination of the following duties: Cuts out parts, such as leaves and petals, from paper, plastic, fabric or feathers, using knife, scissors, mallet and dies. Curls feathers by drawing them between knife and thumb. Operates hand press to emboss and stamp out leaves. Fastens simulated twigs or buds to fabric or paper-covered-steel wire to form branch. Wire or glues flowers, leaves and feathers to stem or branch. Glues fabric or paper-covered wire to artificial flowers for stiffness and strength. Cuts, glues and arranges flowers, feathers and foliage in styrofoam to make floral decorations or wreaths.

3319-299 OTHER OCCUPATIONS IN FINE AND COMMERCIAL ART AND PHOTOGRAPHY

This group includes artists, photographers and related workers, not elsewhere classified; for example, those who select and train models for photography, and colour pre-drawn patterns on zinc pantographic plates. Typical examples of occupational titles covered by this residual group definition are: Modelling Consultamt(bus. serv.) Painter, Plate(print. & pub.)

333-OCCUPATIONS IN PERFORMING AND AUDIOVISUAL ARTS

This minor group includes occupations concerned with producing, directing, staging and acting in motion picture, broadcast and theatrical productions; composing, adapting, conducting and performing musical works and dances; making broadcast announcements; performing a variety of amusing, mystifying and spectacular acts for the entertainment of audiences. Occupations primarily concerned with teaching the skills necessary for such performances are classified in Major Group 27, TEACHING AND RELATED OCCUPATIONS. OCCUPATIONS IN PERFORMING AND AUDIOVISUAL ARTS are classified in the following unit groups:

- 3330** Producers and Directors, Performing and
Audiovisual Arts
- 3332** Musicians
- 3333** Choreographers and Dancers
- 3335** Actors
- 3337** Radio and Television Announcers
- 3339** Occupations in Performing and
Audiovisual Arts, n.e.c.

3330-PRODUCERS AND DIRECTORS, PERFORMING AND AUDIOVISUAL ARTS

This unit group includes occupations concerned with producing and directing theatrical performances, motion picture productions and radio and television programs for entertainment, information and instruction.

Producers and Related Occupations
3330-110 through 3330-130

- 3330-110 PRODUCER, MOTION PICTURE**(broadcast.,
motion pic. & stage) **DPT:118**
GED: 6 SVP: 8 EC: B PA: L 5 6 7

Plans, organizes and co-ordinates production of motion pictures: Reviews scripts and selects those suitable for presentation. Directs personnel adapting scripts for filming, using artistic and commercial judgement to reach a specific audience. Prepares production budget and maintains expenditures within budgetary limits. Selects director and key production personnel, such as cameramen, sound mixers and location business manager. Determines treatment and scope of production and establishes schedules. Conducts auditions and selects cast in consultation with director. Co-ordinates production and suggests or approves changes in script or presentation. Reviews takes filmed each day and orders retakes in cases of technical shortcomings or artistic deviations. Works closely and continually with director to ensure quality of production and to maintain schedules. Conducts meetings with director, writers and other staff members to discuss and resolve production problems and to evaluate progress and results. Approves final editing of filmed productions. May direct motion pictures.

- 3330-114 PRODUCER, STAGE**(broadcast., motion pic. &
stage) **DPT:118**
GED: 6 SVP: 8 EC: I PA: L 5 6 7

Selects play for stage performance, arranges finances, and plans, organizes and co-ordinates production of theatrical presentation: Considers and selects material on basis of plot, timeliness, audience appeal and quality of writing, and plans production. Sells shares to investors to finance production. Formulates business management policies in consultation with administrators. Prepares production budget and maintains expenditures within budget limits. Engages director and key production staff. Determines treatment, scope and scheduling of production and explains general requirements to director. Outlines production to writers, reviews and approves scripts and suggests changes to meet management and production require-

ments. Selects cast, costumes, props, music and other production personnel and equipment in consultation with director. Instructs director to schedule and conduct rehearsals and to develop details to obtain desired production. Co-ordinates elements of production to ensure quality and to maintain production schedules. Reviews production prior to presentation to ensure objectives are attained. May direct theatrical presentations. May produce shows for special occasions, such as fund-raising events and industrial shows.

- 3330-118 PRODUCER, BROADCASTING**(broadcast., motion
pic. & stage) **DPT:118**
GED: 5 SVP: 8 EC: I PA: L 5 6 7

Plans, organizes and co-ordinates production of radio or television programs: Reviews and selects suitable material and plans program. Prepares production budget and maintains expenditure within budget limits. Determines treatment, scope and scheduling of production and explains general requirements to director. Engages script writers and outlines program requirements. Reviews and approves scripts and suggests changes to meet management and production requirements. Selects cast, costumes, props, music and other production personnel and equipment in consultation with director. Co-ordinates elements of production; such as, audio, music, scenes, timing, camera work and script to ensure quality of production and maintenance of schedules. Instructs director to schedule and conduct rehearsals and to develop details to obtain desired production. Reviews and approves production prior to broadcasting to ensure objectives are attained. May direct television and radio programs. May specialize in particular medium of presentation and be designated accordingly; for example, Producer, Radio
Producer, Television

- 3330-122 TECHNICAL PRODUCER**(broadcast., motion pic. &
stage) **DPT:138**
GED: 5 SVP: 8 EC: B PA: L 4 5 6 7

Plans and organizes required technical facilities and supervises and co-ordinates activities of studio and control-room technicians to ensure technical quality of pictures and sound for radio or television programs: Studies script to determine technical treatment. Attends production meetings to discuss program content, set locations, stage directions and technical production requirements. Conducts on-location surveys to establish technical production facilities requirements. Recommends to producer the purchase or improvement of audiovisual equipment. Plans and arranges for special effects requested by producer. Assigns tasks to technicians engaged in maintaining, operating and controlling lights, audio and video control equipment, microphones and cameras. Observes television picture through monitor to evaluate shading and

composition and instructs video operator and cameramen to adjust equipment for desired technical quality.

3330-126 PROGRAM CO-ORDINATOR, BROADCASTING(broadcast., motion pic. & stage) DPT:118

GED: 5 SVP: 7 EC: I PA: S 5 6

Plans, organizes, directs and co-ordinates, through subordinate supervisors, program department of radio or television station, by performing any combination of the following duties:
Prepares and submits budget, and administers approved budget for department. Selects types of programs to be presented and content of each program. Evaluates programs to ensure conformance to network policy. Determines length of program and liaises with other department managers to ensure adherence to production schedule of station and network. Plans and arranges production and broadcast facilities to provide on-the-spot coverage of current events. Negotiates contracts with sponsors. Negotiates purchase of films or programs from independent producers. Directs, through subordinate supervisors, personnel department activities, such as hiring and training of staff. May produce and direct programs within department. May be designated according to type of department controlled or program co-ordinated; for example,
Educational-Program Co-ordinator
International-Program Co-ordinator
Public-Affairs-Program Co-ordinator
Sports-Program Co-ordinator

3330-130 CASTING OFFICER(broadcast., motion pic. & stage) DPT:218
director, casting.
GED: 5 SVP: 7 EC: I PA: S 5 6 7

Auditions and interviews performers for specific parts in motion picture, stage, radio and television productions:
Maintains talent file to include information such as, personality types, specialties, past performances and availability of performers. Views professional, amateur and foreign productions to search out and assess talent. Submits lists of suitable performers to producers and directors for final selection. Conducts screen tests and auditions to verify suitability of performers, considering factors such as, physical size and appearance, quality of voice, expressiveness and experience. Negotiates with performers and agents to obtain contractual agreement on items such as, salary, fees, program credits, residual payments, performance dates and production schedules. Scrutinizes rehearsals and presentation to evaluate dramatic talent of performers hired.

Directors and Related Occupations
3330-150 through 3330-178

3330-150 DIRECTOR, MOTION PICTURE(broadcast., motion pic. & stage) DPT:128
GED: 6 SVP: 8 EC: B PA: L 5 6 7

Interprets script for motion picture presentation, directs and instructs cast and production personnel to achieve desired mood, treatment and style of presentation:
Studies script to determine artistic interpretation. Confers with specialists, such as producer, musical director and technical producer to develop suitable choreography, sound and lighting effects, costumes and set designs. Assists producer and casting officer in auditioning and selecting cast. Assigns parts to cast and explains desired interpretations. Schedules rehearsals and filming. Directs rehearsals and filming, criticizing the acting and suggesting changes necessary to obtain the required standard of production. Gives direction to cast between filming sequences to keep them informed of desired interpretations. Co-ordinates activities of production staff, such as sound and lighting technicians, property men and cameramen during filming sequences to ensure effective takes. Participates in evaluating rushes and suggests changes to film and sound editors.
May produce motion pictures.

3330-154 MUSICAL DIRECTOR(broadcast., motion pic. & stage) DPT:118
GED: 5 SVP: 8 EC: I PA: S 5 6

Plans, organizes, directs and controls the musical aspects of motion picture, stage or broadcasting productions:
Plans and organizes musical production to create appeal, using knowledge of language, musical habits and tastes of audience. Selects vocal and instrumental music suitable to type of production and performers. Engages composer to write theme or score for production. Auditions and hires vocal and instrumental performers. Supervises and co-ordinates activities of personnel of studio music department. Issues and reviews assignments; such as, lyric writing, vocal coaching, scoring, arranging and copying music. Engages in and supervises writing of scripts, notes and biographies pertaining to musical transcriptions. Plans, co-ordinates and directs the mixing and editing of master tapes used in musical transcriptions. Controls and approves quality of recorded material used in musical transcriptions.
May specialize in particular medium of presentation and be designated accordingly; for example,
Musical Director, International Broadcasting
Musical Director, Motion Picture
Musical Director, Stage
Musical Director, Television

3330-158 DIRECTOR, BROADCASTING(broadcast., motion pic. & stage) DPT:128
program director.
GED: 5 SVP: 7 EC: I PA: L 5 6 7

Interprets script for radio or television presentations, directs and instructs cast and production personnel to achieve desired mood, treatment and style of presentation:
Studies script to determine artistic interpretation. Confers with specialists, such as producer, musical director and technical producer to develop suitable sound and lighting effects, set designs, costumes and choreography. Selects cast, or assists producer and casting officer in auditions and selections. Assembles program sequences to provide entertainment balance. Assigns parts to cast and explains desired interpretations. Directs rehearsal, filming, taping and broadcast activities. Criticizes performances, and suggests changes necessary to obtain the required standard of production. Coaches cast in delivery of dramatic lines and in rendition of vocal and instrumental music. Co-ordinates activities of production staff such as, sound and light technicians, property men and cameramen to ensure effective presentation. Establishes pace of program and verifies timing.
May specialize in particular medium or type of program; for example,
Director, Current Affairs
Director, Radio
Director, Television

3330-162 DIRECTOR, STAGE(broadcast., motion pic. & stage) DPT:128
GED: 5 SVP: 7 EC: I PA: L 5 6 7

Interprets play script for stage presentation, directs and instructs cast and production personnel to achieve desired mood, treatment and style of presentation:
Studies script to determine artistic interpretation. Confers with specialists, such as producer, writer and musical director, to develop suitability of script, costumes, scenery designs, choreography, and sound and lighting effects. Selects cast, or assists producer and casting officer in auditions and selections. Assigns parts to cast and explains desired interpretations. Schedules and directs rehearsals to obtain the required performance standard. Instructs and criticizes performers in interpretation of script until roles are mastered. Co-ordinates activities of production staff, such as property men and sound and lighting technicians to ensure effective presentation.
May pass responsibility for routine management of daily stage performance to stage manager when production is ready for indefinite run.

3330-166 STAGE MANAGER(broadcast., motion pic. & stage) DPT:137
GED: 5 SVP: 7 EC: I PA: L 4 5 6 7

Plans, organizes, supervises and co-ordinates activities of stage crew in the production and presentation of theatrical performances:
Confers with production and directing personnel concerning produc-

tion requirements. Arranges conference time for cast and crew, and disseminates general information about production. Calls performers at specified intervals before curtain time. Reads annotated script during each performance and gives cues for curtain, lights, properties and sound effects, using cue cards or head-phones. Interprets stage-set diagrams to determine layout. Supervises stage crew engaged in placing scenery and properties during performance. Devises emergency substitutes for stage equipment or properties.

May assume responsibility for routine management of daily stage performance when production is ready for indefinite run.

3330-170 ART DIRECTOR(broadcast., motion pic. & stage) DPT:138

GED: 5 SVP: 7 EC: B PA: L 4 5 6 7

Plans, organizes, directs and controls the artistic aspects of motion picture, stage or broadcasting productions:

Reads books, script or scenario concerning work to be performed to determine theme and setting. Reviews relevant literature such as encyclopedias, books and catalogues; visits museums and art galleries; and delves into archives to obtain knowledge of history and culture of the setting. Plans decor and selects costumes, furnishings, props and artifacts for aesthetic appeal and realistic portrayal of the setting. Directs the placing of items on set to permit free movement of cast and to provide a clear view to audience or camera. Supervises and coordinates activities of art department personnel to achieve harmonious overall artistic presentation.

May prepare sketches, scale drawings or models of sets and scenes using artistic materials. May specialize in a particular medium of presentation and be designated accordingly; for example,

Art Director, Motion Picture

Art Director, Stage

Art Director, Television

3330-174 FILM EDITOR(broadcast., motion pic. & stage) DPT:164

GED: 5 SVP: 7 EC: I PA: L 4 5 6 7

Edits visual aspects of motion picture films:

Views film to analyze, evaluate and select scenes in terms of story continuity and dramatic and entertainment value, using equipment, such as viewers, movieolas (miniature audio and video reproducing equipment) and projectors. Trims film segments to specified lengths, using scissors and hand splicers. Selects stock shots from film library, as called for by script, and edits and incorporates them into film. Arranges film segments in sequence that presents story with maximum effect to highlight mood, pace and climax of film. Confers with other production and directing personnel concerning all aspects of motion picture film editing. Reviews assembled film on screen in concert with producer and/or director, and edits accordingly.

May edit specific type of film presentation and be designated accordingly; for example,

Newsreel Editor

Scientific-Film Editor

3330-178 RECORDING DIRECTOR(amuse. & rec.) DPT:118

GED: 4 SVP: 7 EC: I PA: L 4 5 6

Plans, co-ordinates and directs production of master musical recordings:

Selects music for production of records and tapes, employing knowledge of tastes and trends in music. Auditions and selects recording artists most appropriate for each recording, employing knowledge of vocal and instrumental techniques and requirements, and using tape recorder as verification aid. Negotiates contractual agreements between artist or agent, and recording company concerning time and place of recording, expense accounts, commissions and royalties. Directs artists and technicians during rehearsals and recording sessions to obtain the desired presentation. Times recording to ensure length of rendition meets recording time specifications. Attends company selection committee meetings to evaluate and select records and tapes for mass production on basis of potential market value. Arranges guest appearances with broadcasting personalities to promote sale of records and tapes.

3332-MUSICIANS

This unit group includes occupations concerned with creating and writing musical compositions; adapting, arranging or copying music; conducting instrumental or vocal performances; playing musical instruments; and singing as soloists or members of vocal groups. Occupations primarily concerned with teaching music are classified in Major Group 27, TEACHING AND RELATED OCCUPATIONS.

3332-110 ORCHESTRA CONDUCTOR(amuse. & rec.) DPT:021

maestro.

GED: 6 SVP: 9 EC: I PA: L 4 5 6

Conducts instrumental groups such as symphony orchestra and large band:

Auditions and selects members of group. Selects music to accommodate talents and abilities of group, and to suit type of performance to be given. Assigns instrumental parts to individual musicians. Positions musicians in group to obtain balance and harmony of instruments. Memorizes or familiarizes himself with complete musical score. Conducts rehearsals, instructing instrumentalists concerning rendition required, and endeavouring to make optimum use of each instrumentalist's talents. Conducts performance, controlling factors such as, balance, rhythm, dynamics and entries of particular instruments, to create effect consistent with own interpretation of score.

May arrange and orchestrate score. May play instrument and act as soloist.

3332-114 COMPOSER(amuse. & rec.) DPT:081

GED: 6 SVP: 9 EC: I PA: S 4 5 6

Creates and writes musical compositions:

Invents melodic, harmonic and rhythmic structures to express ideas and emotions in musical form such as, symphony, opera, film and play scores. Applies knowledge or understanding of harmony, counterpoint, orchestration and musical forms. Translates composition into standard musical signs and symbols on scored music paper. Plays musical instrument to assist in composing.

May specialize in one type of music or in compositions for particular instruments. May write words to accompany music. May engage in other musical activities; such as, conducting orchestra, playing instruments, singing, and teaching music.

3332-118 ARRANGER(amuse. & rec.) DPT:081

GED: 6 SVP: 8 EC: I PA: S 4 6 7

Transcribes musical compositions or melodic lines to adapt and modify them or create particular style for orchestra, band, choral group or individual:

Familiarizes self with composition to be adapted, using musical instrument. Imagines effects of various combination of instruments, voices, harmonic structures, rhythms, tempos and music dynamics. Selects instruments or voices to be employed to obtain desired style and effect, using knowledge of their range, characteristics, limitations and key, as well as talents of individual performers. Annotates original composition according to selection or writes arrangement on scored music papers.

3332-122 ORCHESTRATOR(amuse. & rec.) DPT:081

GED: 6 SVP: 8 EC: I PA: S 4 5 6 7

Writes score from arranged composition, for orchestra, band, choral group or individual, changing music from one medium to another:

Transposes from one instrument or voice to another to accommodate particular instrumentation or make-up of group, using knowledge of range, characteristics, limitations and key of instrument or voice. Improves dynamics, tempo and harmonic effects, using knowledge of music theory, harmony, form, shading and notation. Copies parts from score for individual performers within group. Plays musical instrument to plan harmony and chords.

3332-126 CHOIRMASTER(amuse. & rec.) DPT:028
 choral director.
 GED: 5 SVP: 8 EC: I PA: L 4 5 6

Conducts vocal groups, such as choirs and glee clubs: Auditions and selects members of group. Selects music to accommodate talents and abilities of group, and to suit type of performance to be given. Studies composition and imagines effect of various combinations of voices. Assigns vocal parts to individual singers. Directs group at rehearsals and performances to achieve desired effects, such as tonal and harmonic balance, dynamics, rhythms, tempos, and shadings, utilizing knowledge of conducting techniques, music theory and harmony, and characteristics, range, and individual talents of voices. May schedule tours and performances. May adapt musical compositions to create a particular style for choral group. May conduct group and accompanying orchestra. May play musical instrument.

3332-128 CARILLONNEUR(amuse. & rec.) DPT:041
 GED: 5 SVP: 8 EC: I 5 PA: L 4 6 7.

Selects, arranges and plays music on carillon to provide regular recitals or concerts for special occasions: Selects music according to the occasion and taste of listeners. Arranges selections for carillon, using knowledge of music theory and technical capabilities of instrument. Strikes appropriate keys on keyboard using clenched fists and depresses foot-pedals to play carillon, sliding back and forth on bench as required to reach notes. Moderates pressure with which notes are struck to control volume and clarity of bells, and sustains sound of high-pitched bells by striking several times in succession. Starts foot-pedal action in advance of hand keys to ensure large and small bells speak together. Adjusts turnbuckles to control distances between bells and clappers. Supervises maintenance of carillon mechanism and bells. May compose music for special occasions. May be designated according to position held; for example, Dominion Carillonneur

3332-130 MUSICIAN, INSTRUMENTAL(amuse. & rec.) DPT:141
 instrumentalist.
 GED: 5 SVP: 8 EC: B 5 PA: L 4 5 6 7

Plays one or more instruments in recital, in accompaniment, or as member of orchestra, band, or other musical group to entertain: Studies and rehearses score prior to performance. Plays music from score or by memory, manipulating keys, bow, valves, strings, percussion devices, or depressing pedals, depending on instrument played. May improvise, transpose, compose, or arrange music. May specialize in particular instrument or service performed and be designated accordingly; for example, Accompanist Horn Player Organist Pianist Violinist

3332-134 CONCERT SINGER(amuse. & rec.) DPT:148
 GED: 5 SVP: 8 EC: I PA: L 5 6

Sings classical, operatic, or church music in musical programs: Studies and rehearses words and music for performance as soloist or member of vocal ensemble, using sheet music and libretto. Sings music such as lieder, arias and cantatas, combining musical training, expression and quality of voice with histrionic ability. Watches conductor or accompanist for directions during rehearsal or performance. May be known according to voice range of singing specialty and be designated accordingly; for example, Baritone Lieder Singer Recitalist Soprano Vocal Soloist

3332-138 POPULAR SINGER(amuse. & rec.) DPT:148
 musical entertainer.
 GED: 4 SVP: 7 EC: I PA: L 4 5

Sings songs in popular idiom to entertain audiences: Studies and rehearses music and special arrangements prior to performance. Entertains in a group or individually on stage, radio, and television, projecting forms of expression in voice, such as pathos and whimsicality, using own phrasing and special musical arrangements to achieve individual style of vocal delivery. May accompany self on musical instrument. May perform musical specialty by exhibiting other skills, such as whistling, dancing or telling humorous stories. May be designated according to singing style, material, or specialty performed; for example, Blues Singer Folk Singer Song and Dance Man

3332-142 COPYIST(amuse. & rec.) DPT:388
 GED: 4 SVP: 7 EC: I PA: S 4 7

Copies and compiles parts from musical score for individual performers within musical group: Studies musical score to determine treatment. Transcribes parts from score onto staff-paper for each instrument or voice within musical group, utilizing knowledge of musical notation and experience. May transpose score to different key prior to copying individual musical parts.

3332-199 OTHER MUSICIANS

This group includes musicians, not elsewhere classified; for example, those who compose or play electronic music, and compose instrumental and vocal music in the popular idiom. A typical example of an occupational title covered by this residual group definition is: Composer, Popular Music(amuse. & rec.)

3333-CHOREOGRAPHERS AND DANCERS

This unit group includes occupations concerned with composing and performing dances. Activities include: creating dances and instructing dancers in their performance; performing dances as a soloist, with a partner or as a member of a dancing group. Occupations primarily concerned with teaching dancing are classified in Major Group 27, TEACHING AND RELATED OCCUPATIONS.

3333-110 CHOREOGRAPHER(broadcast., motion pic. & stage) DPT:028
 GED: 5 SVP: 8 EC: I PA: L 2 3 4 5 6 7

Creates original dances for stage, television, motion picture or nightclub productions, and instructs dancers in their interpretation and performance: Studies production factors such as, musical score, story or theme, and consults with production personnel concerning the interpretation required. Creates dances designed to harmonize with music and subject, illustrate unfolding of story, interpret emotion or complement musical show. Plans and records required movements of dancers, using standard notation symbols. Conducts rehearsals of dances, demonstrating movements required and instructing dancers in desired interpretation. May perform dances. May plan and arrange movements of performers and extras in pageants or other outdoor spectacles. May direct and stage dance presentation. May specialize in ballet, dances for musical shows or revues or other types of dancing presentations and be designated accordingly.

3333-114 DANCER(amuse. & rec.) DPT:048
 GED: 4 SVP: 7 EC: I PA: M 2 3 4 5 7

Performs dances as soloist, with partner, or as member of group to entertain audiences: Executes regular dance exercises to maintain required physical condition of body and limbs and control of movements. Rehearses dances

under direction and instruction, or develops own interpretation. Attends wardrobe fittings to ensure proper costuming. Performs classical, modern or acrobatic dances for audience entertainment, coordinating body movements and facial expressions usually with musical accompaniment, endeavouring to interpret the dance as rehearsed.

May sing and provide other forms of entertainment. May compose own dances. May specialize in particular style or type of dancing and be designated accordingly; for example,

Ballet Dancer
Chorus Dancer
Tap Dancer

3335-ACTORS

This unit group includes occupations concerned with playing parts in productions for stage, television, radio, motion-pictures, and other settings, to entertain and educate audiences. Includes occupations concerned with telling stories, performing ventriloquism and presenting humorous routines.

3335-110 ACTOR(amuse. & rec.) DPT:048
GED: 5 SVP: 7 EC: 1 PA: L 5 6

Portrays roles in dramatic productions for theatre, motion-picture, radio, television or other audiences:

Studies play or production to gain understanding of part. Learns lines and cues, and rehearses part, interpreting role by speech and gesture as directed. Attends wardrobe fittings to ensure proper costume fit. Acts part in medium of presentation, endeavouring to interpret role as developed in rehearsals.

May specialize in particular type of role or medium of presentation, and be designated accordingly; for example,

Actor-Dancer
Dramatic Reader
Juvenile
Motion-Picture Actor
Story Teller

3335-114 MIME(amuse. & rec.) DPT:048
GED: 5 SVP: 7 EC: 1 PA: L 4

Portrays role in pantomime, using mimic gestures, usually without words, to entertain audiences:

Studies story-line or character sketch to gain understanding of part. Rehearses serious, humorous or burlesqued interpretations and dramatic actions, using body movements, facial expressions and gestures. Attends costume fittings and make-up sessions to achieve desired appearance. Acts part in performance, endeavouring to interpret role as developed in rehearsals.

3335-118 VENTRILOQUIST(amuse. & rec.) DPT:044
GED: 4 SVP: 7 EC: 1 PA: L 4 5

Utters sounds to entertain audience, using art of ventriloquism: Speaks or utters sound in such a manner that the voices appear to come from sources other than speaker's vocal chords. Makes use of dummy, hand puppet or other objects as foil to conduct apparent dialogue. Manipulates dummy or puppet during humorous or burlesqued performance to give illusion of voice and movement.

3335-122 COMEDIAN(amuse. & rec.) DPT:048
GED: 4 SVP: 6 EC: 1 PA: L 5

Performs humorously to entertain audience: Tells jokes, delivers comic lines, sings humorous songs, and performs comedy dances and acts to make audience laugh. Wears funny costumes, contorts face or resorts to similar antics to amuse audience. May do amusing impersonations. May specialize in particular medium of presentation and be designated accordingly.

3335-126 IMPERSONATOR(amuse. & rec.) DPT:048
GED: 4 SVP: 6 EC: 1 PA: L 4 5

Impersonates persons or things to entertain audience:

Represents in bodily form, or plays part of another person, type of person, animal or inanimate object. Imitates mannerisms, form, expression, dress, voice or sound of character or thing impersonated.

May present exaggerated imitations, ridiculing and making sport of character imitated, and be designated accordingly; for example, Mimic

3337-RADIO AND TELEVISION ANNOUNCERS

This unit group includes occupations concerned with announcing radio or television programs; preparing, reading and commenting on news, sports and other broadcast events; and giving commentaries on public address systems at sporting and entertainment events. Radio and television broadcast writers and editors are classified in Unit Group 3353, WRITERS AND EDITORS: RADIO, TELEVISION, THEATRE AND MOTION PICTURES.

3337-110 ANNOUNCER-PRODUCER INTERNATIONAL SERVICE(broadcast., motion pic. & stage) DPT:134
GED: 5 SVP: 7 EC: B PA: L 4 5 6 7

Plans, organizes, produces and announces foreign language broadcasts to inform, educate, and entertain foreign audiences by performing any combination of the following duties:

Consults with representatives of diplomatic, governmental, ethnic, and news organizations to arrange programs. Conducts live, or taped interviews for radio broadcast. Writes script and news copy. Voices dramatic programs for live or recorded presentation, using sound equipment. Gives cues to control room to ensure connected stations receive intended program. Identifies station, using call letters. Announces program in language of country to which program is broadcast. Reads news items and describes public events. Supervises activities of program assistants and radio performers. Operates control board or sound equipment. Maintains program log.

3337-114 ANNOUNCER(broadcast., motion pic. & stage) DPT:144
GED: 5 SVP: 7 EC: B PA: L 4 5 6

Introduces various types of programs, interviews guests, acts as master-of-ceremonies, reads news bulletins and makes other announcements for radio and television broadcasting by performing any combination of the following duties:

Identifies station using call letters. Gives cues to control room to ensure affiliated stations receive intended program. Reads prepared news bulletins and makes special announcements. Reads advertisements at specified times on sponsored programs. Conducts interviews with persons of interest and acts as master-of-ceremonies for certain programs. Broadcasts events of unusual interest that originate outside the studio such as, rallies, demonstrations, parades, greeting of notables and on-the-street interviews. Observes, evaluates and broadcasts weather, traffic conditions, and related information, from air or land vehicle, as a public service feature. Narrates explanatory comments, as directed, to accompany action parts of motion-picture, radio or television presentations. Operates control board or recording equipment. Sells advertising time. Writes scripts and news copy. Maintains program log.

3337-118 SPORTS ANNOUNCER(broadcast., motion pic. & stage) DPT:144
GED: 5 SVP: 6 EC: B PA: L 5 6 7

Broadcasts sports news, events and information over radio and television:

Appraises sports news and information available through sources; such as, wire service, press conference and interview. Travels to scene of sports event and collects all available information concerning assignment through observation, interview and investigation. Writes script on basis of timeliness and likely audience interest. Reads script on television or radio sportscast. Broadcasts running commentary or

play-by-play description of sports event, inserting biographical and statistical data, to inform and entertain audience. Interviews sports or public personalities at sports events or in studio for live or taped broadcast.

May perform other announcing duties, such as making special announcements and selling advertising time.

3337-122 MASTER OF CEREMONIES(amuse. & rec.; broadcast., motion pic. & stage) DPT:348
GED: 5 SVP: 6 EC: B PA: L 5 6

Introduces entertainers, speakers or celebrities to audience and generally conducts proceedings of show or program. Addresses audience to open show or program. Introduces entertainers, speakers or celebrities, interspersing introductions with humorous stories and biographical sketches, using written notes and microphone. Comments on acts or events.

May arrange for particular tunes to be played on request. May announce arrival of celebrities. May tell jokes, sing, dance, play musical instrument or otherwise entertain audience between act or events.

3337-126 PUBLIC-ADDRESS ANNOUNCER(amuse. & rec.) DPT:348
GED: 4 SVP: 6 EC: B PA: L 5 6

Announces information of interest to fans at sporting or other events, using public-address system:

Reads list of participants and identifying numbers on program. Announces program changes, such as scratches, additions and substitutions. Explains decisions of officials or any part of event difficult for majority of spectators to see clearly or understand fully.

May make running commentary on event, presenting running or play-by-play description and inserting biographical data on participants to keep spectators informed and entertained. May furnish information concerning competition to scoreboard operator. May make public announcements at events, such as conventions, rallies and rodeos.

3337-130 DISK JOCKEY(broadcast., motion pic. & stage) DPT:347
GED: 4 SVP: 5 EC: I PA: L 4 5 6

Announces program of musical recordings, commenting on the music and other matters of interest to entertain and inform radio audience, broadcasting from studio or on-location:

Maintains lists, by category, of musical recording ratings provided by popularity surveys. Selects program of recordings having appeal for specific audience. Identifies radio station by giving call letters, using microphone. Announces program of recordings, commenting on music and other matters of audience interest, such as weather, time checks, traffic conditions and public service announcements. Reads advertising copy at specified times during broadcast. Operates sound reproducing equipment, or cues technician to perform functions, as he integrates program chatter and announcements, either extemporaneously or from script, with music. Interviews guest recording artists on program to popularize and promote recordings.

May play requests or dedications. May select and play recorded music on-location for functions, such as school, club and wedding dances, and act as a master of ceremonies. May perform other announcing duties.

3339-OCCUPATIONS IN PERFORMING AND AUDIOVISUAL ARTS, N.E.C.

This unit group includes performing and audiovisual arts occupations, not elsewhere classified, concerned with providing production support services; such as, stage properties, costuming supervision and special effects, assisting with planning and presentation of radio and television programs; training and presenting animals; performing mystifying, humorous, provocative, thrilling and other acts to entertain audiences. Make-up artists are classified in Unit Group 6143, BARBERS, HAIRDRESSERS AND RELATED OCCUPATIONS. Radio and Television Broadcasting Equipment Operators, Sound Recording and Reproduction Equipment

Operators and Motion Picture Projectionists are classified in Minor Group 955, ELECTRONIC AND RELATED COMMUNICATIONS EQUIPMENT OPERATING OCCUPATIONS, N.E.C.

Production Support Personnel 3339-110 through 3339-138

3339-110 PROPERTY MASTER(broadcast., motion pic. & stage.) DPT:138
foreman, stage-property.
GED: 4 SVP: 7 EC: B PA: L 5 6 7

Supervises and co-ordinates activities of personnel engaged in obtaining, moving, fabricating and storing properties used in motion picture or theatrical productions:

Reads script and confers with production and directing personnel to determine prop requirements. Studies period styles to correctly represent time of plot, consulting period files and utilizing knowledge of historical, geographical and artistic factors. Requisitions properties required from studio prop room. Arranges for construction, purchase and rental of properties not available from existing inventory. Arranges for placing properties on stage and directs clearing of properties at conclusion of each scene. Ensures that properties are in good repair. Arranges transportation of properties to outside location when required.

May arrange for special wardrobe items or setting-up special effects, such as smoke or fire. May maintain picture identification file of properties in inventory.

3339-114 WARDROBE SUPERVISOR(broadcast., motion pic. & stage) DPT:138
GED: 4 SVP: 7 EC: I PA: S 5 6 7

Supervises and co-ordinates costuming of cast for motion picture, television and stage productions:

Confers with directing and production personnel, and analyzes script and research material, to determine style of dress for cast according to period and characters to be represented. Prepares and issues requisitions and work orders for procurement, production and care of costumes and wardrobe accessories. Supervises and co-ordinates activities of workers engaged in procuring, making, altering and caring for costumes and other wardrobe accessories.

May sketch and design costumes and other wardrobe accessories.

3339-116 SPECIAL-EFFECTS MAN(broadcast., motion pic. & stage) DPT:281
GED: 4 SVP: 7 EC: B 6 7 PA: L 2 3 4 6 7

Designs, fabricates and uses devices to simulate special sound and visual effects for broadcasting, motion picture and stage productions:

Contrives and uses a variety of mechanical, chemical and electrical devices to animate incidents. Creates the illusion of phenomena; such as, snow, rain, smoke, waves, thunder and impact of projectiles, using chemicals and explosives. Draws plans for and arranges provision of contrivances; such as, towers, conveyors and wiring layouts for the setup of special-effects. Obtains permits for use of special-effects devices and ensures compliance with safety regulations.

3339-118 CHIEF-STAGE ELECTRICIAN(broadcast., motion pic. & stage) DPT:338
sight-effects man.
GED: 4 SVP: 7 EC: I PA: M 4 5 7

Provides lighting and sight effects for theatrical stages and motion picture sets:

Studies continuity script and work drawings of stage and studio sets showing light details and special sight effects desired. Originates designs for artistic lighting of sets based on extensive knowledge of stage lighting and sight presentation. Confers with producing personnel and suggests changes in lighting plans. Supervises crew engaged in setting up and arranging electrical equipment for use on stage and motion picture sets.

May direct maintenance and repair lighting equipment.

3339-120 LIGHT TECHNICIAN(broadcast., motion pic. & stage) DPT:361
set-electrician.
 GED: 4 SVP: 7 EC: B PA: M 2 4 5

Positions, sets-up, and operates various lighting equipment used to illuminate set or studio during stage performance, television broadcasting or photographing motion picture scenes:

Studies script and confers with production personnel and chief electrician to determine lighting effects required. Co-ordinates activities with electrical crew in erecting metal scaffolding to support lighting equipment. Selects and positions equipment, such as spotlights and flood-lights, manually or using hoist. Arranges cables into groups and connects conduits to source of electricity supply, using portable junction boxes. Operates lights during filming or broadcasting, following cue sheet or script. Varies intensity of light, using silk, spun glass, or gelatin diffusion disks over lens of light source. Maintains and repairs lighting equipment.

May arrange for transportation of lighting equipment to remote locations.

3339-122 PROGRAM PLANNER, MUSIC(broadcast., motion pic. & stage) DPT:367
musical-program director.
 GED: 4 SVP: 7 EC: I PA: S 4 5 6

Selects and arranges program of music to meet time and content requirements for specified broadcast:

Consults with production personnel to determine type of music desired. Selects and integrates music within time and program requirements. Contacts recording companies and music publishers to become acquainted with current ratings and public preferences. Listens to recordings using audio recorder to select and program music for use in broadcasts. Maintains musical library for documentation and research.

May verify copyright clearance for music to be used on broadcasts.

3339-126 PRODUCTION MAN(broadcast., motion pic. & stage) DPT:367
production assistant.
 GED: 4 SVP: 6 EC: B PA: L 4 5 6 7

Aids producing personnel in staging rehearsals and presenting television programs:

Oversees distribution of studio equipment, such as scenery, cameras, and microphone placement, according to staging or floor plan. Transmits instructions received over telephone headset to performers and others on set, and gives cues, using hand signals. Directs production of sound effects. Times broadcast duration, using stop watch.

May prepare rehearsal schedules and arrange for rehearsal halls. May attend production meetings on program content and requirements.

3339-130 SCRIPT ASSISTANT(broadcast., motion pic. & stage) DPT:367
 GED: 4 SVP: 6 EC: B PA: S 4 5 6 7

Performs any combination of following or similar duties as directed by producer in the rehearsal and broadcasting of television programs: Distributes copies of script and arranges for rehearsal quarters. Examines script and prepares list of props required. Prepares and distributes rehearsal call sheets, and amended scripts for members of cast and crew to insure proper timing of program. Times and records duration of individual scenes and overall program, using stop-watch. Prompts members of cast and guests from script during rehearsals or broadcast. Verifies placement of props, films, slides, title cards, and similar items prior to broadcast. Contacts members of cast and guests to insure that they have been made up. Gives directions to personnel in rehearsal and broadcast of sign-ons and sign-offs, station breaks, and film feature programs, using oral and hand signals.

May keep rehearsal attendance records.

3339-134 FIREWORKS MAN(amuse. & rec.; explosives) DPT:664
 GED: 3 SVP: 3 EC: O 5 PA: M 4 5

Assembles and sets off fireworks displays at fairs, expositions or celebrations, according to diagrams:

Advises committee of the distance audience should be from set-off site of display, considering wind velocity, fallout of sparks and types of fireworks used. Lays out set-off arrangement. Directs workers to set mortars apart from ground display and place barriers of sandbags or gravel to prevent sparks from detonating shells. Assembles framework and affixes display to framework, using equipment, such as hand tools, glue and twine. Connects fuses to electric squib, twisting together manually to stagger or co-ordinate time of firing. Determines appropriate time for firing display, considering darkness and humidity. Depresses button on electric squib, or ignites lead fuses, using portfire, to fire display.

3339-138 STAGE HAND(broadcast., motion pic. & stage) DPT:684
grip man.

GED: 2 SVP: 3 EC: B PA: H 2 4

Moves stage equipment, and builds temporary structures to accommodate equipment, following directions of foreman:

Transports and positions equipment, such as cameras, electrical fixtures and props, on stage or motion picture set, using dolly or handtruck. Erects structures from stock scaffolding, using hand tools.

Miscellaneous Performers, Entertainers and Related Occupations 3339-158 through 3339-199

3339-158 HORSE TRAINER, DRESSAGE-AND-STUNT DPT:127
 (amuse. & rec.)
 GED: 4 SVP: 7 EC: B PA: L 2 4 5

Trains horses to execute complex manoeuvres in response to directions:

Evaluates ability and performance of each horse and devises most appropriate training program. Familiarizes horses with riding equipment, such as bridles and saddles, and with training devices, such as ropes and jumps. Exercises and works out horses to condition them for competition, exhibition and performance. Trains and directs horses to perform tricks for entertainment of audiences and to compete in horse shows. Trains horses in art of dressage, repeating training routine until horse responds to barely perceptible movements of rider's hands, legs and weight. Trains horses for specific styles of riding, such as English and Western. Supervises workers engaged in grooming, feeding, exercising and general care of horses.

3339-162 CLOWN(amuse. & rec.) DPT:047
 GED: 4 SVP: 6 EC: B PA: L 2 3 4 5 6

Performs amusing antics and tricks to entertain audience:

Dresses in traditional clown costume and make-up or other bizarre or amusing style. Performs original or stock comedy routines, such as amusing antics, acrobatics and tricks.

May tell funny stories, perform with animals, and participate in slapstick comedy sketches, caricaturizing other performers, well-known persons or events.

3339-166 MAGICIAN(amuse. & rec.) DPT:144
prestidigitator.
 GED: 4 SVP: 6 EC: I PA: L 4 5 7

Performs acts of illusion and sleight-of-hand to entertain audiences:

Performs original and stock conjuring and other tricks of illusion to mystify audience, using a variety of objects; such as, rope, handkerchiefs, hoops and small animals. Performs sleight-of-hand tricks, using props, such as playing cards and cigarettes. Involves members of audience in act, and removes valuables, such as jewellery and wallets from their person without their knowledge. Talks extemporaneously to divert attention of audience when performing tricks.

May use an assistant to perform illusory acts.

3339-170 PUPPETEER(amuse. & rec.) DPT:144
marionette man.
GED: 4 SVP: 6 EC: 1 PA: L 4 5 6

Creates puppet program and manipulates puppets to animate them for entertainment of audience, performing any combination of the following duties:

Creates original routines and dialogue or adapts stock presentation. Carves, shapes or sews puppet parts from materials; such as, wood, plaster, papier mache and cloth. Assembles puppets, using wire, string and hand tools. Sews articles of clothing and dresses puppets in appropriate costumes. Manipulates bar to which puppet-control strings or wires are attached, from position above or below stage, to direct movement of puppets during performance. Inserts hand into puppet and manipulates to produce animation. Talks or sings during performance to give illusion of voice to puppets.

3339-174 MARINE-MAMMAL TRAINER(amuse. & rec.) DPT:227
GED: 4 SVP: 6 EC: B 4 PA: L 3 4 5

Trains and directs marine mammals; such as, seals, porpoises, sea lions and whales, to perform tricks for entertainment of audience:

Observes mammal to evaluate its training potential. Devises and conducts training programs best suited to mammal. Studies and rehearses specific signals to develop desired behaviour and rapport with mammals for public performance. Teaches selected mammals to perform desired tricks; such as, leaping vertically out of water, retrieving objects, balancing objects, playing various adaptations of ball games, and rendering musical numbers by singing, blowing horns or beating drums.

3339-178 DOG TRAINER(amuse. & rec.) DPT:227
GED: 4 SVP: 5 EC: B PA: L 4 5

Trains dogs to perform tricks for entertainment of audiences:

Evaluates characteristics of each breed or individual dog to devise the most appropriate training program. Familiarizes dogs with training devices. Trains dogs to perform duties or tricks in response to oral direction, using slip chain and leash. Rehearses dog to perform according to script and oral direction. Directs dogs to perform in entertainment field; such as, stage or circus ring, motion picture and television.

May train dogs for activities; such as, racing, hunting and tracking, guarding persons and property and leading blind persons.

3339-182 ASTROLOGER(amuse. & rec.) DPT:368
GED: 4 SVP: 5 EC: 1 PA: S 5 6

Charts and interprets significance of stellar and planetary positions on horoscope to forecast future events and trends for particular client or general public:

Charts horoscope showing relative position of planets and stars to each other, to signs of zodiac and to twelve Houses of Heaven at specified times and places. Interprets significance of horoscope, predicts probability of success or failure in specified courses of action by client, and recommends propitious dates for pursuit of particular objectives.

May prepare general forecasts for regular publications.

3339-186 STUNT RIDER(amuse. & rec.) DPT:647
GED: 3 SVP: 6 EC: B PA: M 2 3 4 7

Performs acrobatic stunts or feats of equestrian skill and daring to entertain audiences or compete for prize money:

Devises acrobatic routines to be performed on horseback. Trains horse to achieve regularity in variable gaits and speeds. Rehearses program with and without horse. Performs routine at public events, such as stampedes and exhibitions.

3339-190 STAMPEDE PERFORMER(amuse. & rec.) DPT:647
rodeo performer.
GED: 3 SVP: 6 EC: B PA: H 2 3 4 6 7

Performs feats of skill and daring at stampede (rodeo) to compete for prize money and to entertain audience:

Mounts bronco or brahma bull in chute and attempts to remain mounted on bucking animal for specified time when animal is released from chute, demonstrating riding skill and daring. Ropes calf while riding horse, using a lariat, dismounts and wrestles calf to ground, and tethers calf's legs together to immobilize. Rides horse after running steer, jumps from horse, grabs steer by horns and bulldogs to ground. Rides as outrider in chuck-wagon race spectacle. Drives team of horses in chuck-wagon, or chariot race. Performs rope tricks, mounted or dismounted, using lariats.

3339-194 DIVER(amuse. & rec.) DPT:647
GED: 3 SVP: 3 EC: B 4 PA: M 2 4 5 7

Feeds, identifies, and describes fish enclosed in aquarium or fish tank for public amusement:

Dons wet suit and other underwater equipment and drops to floor of tank. Circulates underwater to feed fish during show periods. Identifies and briefly describes individual species being fed, using underwater sound system. Cleans bottom and windows of tank, using suction hose and scrubbing brushes. Observes and reports diseased, injured, or dead fish. Gives routine medical treatment to fish. May restock tanks with specimens of fish, crustaceans, and other organisms.

3339-199 OTHER PERFORMERS AND ENTERTAINERS

This group includes performers and entertainers, not elsewhere classified; for example, those who perform feats of hypnotism, and difficult or spectacular feats of acrobatics, gymnastics, juggling and daredevil stunts; act as double or stand-in for star; perform exotic or provocative dances; display some physical oddity; read character and perceive thoughts of others; control behaviour of animals and reptiles; and provide other forms of public entertainment. Typical examples of occupational titles covered by this residual group definition are:

Acrobat(amuse. & rec.)
Double(amuse. & rec.)
Fortune Teller(amuse. & rec.)
Graphologist(amuse. & rec.)
Hypnotist(amuse. & rec.)
Juggler(amuse. & rec.)
Phrenologist(amuse. & rec.)
Strip-Tease-Artist(amuse. & rec.)
Thrill Performer(amuse. & rec.)

335-OCCUPATIONS IN WRITING

This minor group includes occupations concerned with originating and editing written material for publication in printed form and for spoken use, broadcasting, and dramatic presentation; and translating or interpreting written or spoken words from one language to another. Includes authors, critics, columnists, editors, reporters, technical writers, script writers, continuity writers, and others engaged in preparing written material on a free-lance basis or as staff members of a publishing organization. These occupations are classified in the following unit groups:

3351 Writers and Editors, Publication

3353 Writers and Editors: Radio, Television,
Theatre and Motion Pictures

3355 Translators and Interpreters

3359 Occupations in Writing, n.e.c.

3351-WRITERS AND EDITORS, PUBLICATION

This unit group includes occupations concerned with the preparation of written material for publication in newspapers, books, magazines, technical manuals, trade journals and related publications. Activities include: searching, interviewing and writing to prepare material; selecting and revising written material; and planning, supervising and co-ordinating activities of workers.

3351-110 EDITOR, BOOK(print. & pub.) **DPT:018**
critic, book.
GED: 5 SVP: 8 EC: I PA: S 5 6 7

Evaluates manuscripts of books to determine suitability for publication and supervises preparation of manuscript for publication: Reviews and evaluates manuscripts of novels, biographies, collections of short stories, essays and poems, text books and other books submitted by authors and literary agents. Makes recommendations to publisher regarding acceptability of material for publication and conditions of publication contract. Suggests changes in manuscript and negotiates with author regarding details of publication, such as royalties to be paid, publication date, and number of copies to be printed, according to knowledge of production requirements and estimation of public demand for book. Edits or supervises editing of material for coherence of style and punctuation and oversees preparation of manuscript for publication.
May negotiate with authors concerning contracts for future writing.

3351-114 EDITOR, ADVERTISING(bus. serv.; print & pub.) **DPT:038**
GED: 5 SVP: 8 EC: I PA: S 5 6 7

Directs workers engaged in preparation of advertising material, and edits art work and copy for publication:
Assigns work to advertising copy writers according to publication schedule and budget allocation. Reviews advertising copy, photographs and art work for effectiveness and accuracy of expression. Ensures conformity with advertising regulations and with company sales, credit and pricing policies, and completeness and accuracy of product specifications. Edits and directs copy rewriting by staff, or personally rewrites or re-arranges copy to improve wording and continuity. Selects and examines page lay-outs to emphasize sales presentation and to create interest and appeal. Confers or corresponds with staff members, supervisors and managers to impart or obtain information related to editing or preparation for publication. Maintains records and reference files.
May edit company's employee publications, letters, handbooks, instructions and operational manuals. May instruct copy writers and advertising department staff according to company's preferred style and publication methods. May determine format, style and type of advertising according to allocation of advertising funds. May direct preparation of sample lay-outs for submission to management or clients.

3351-118 EDITOR, CITY(print. & pub.) **DPT:038**
GED: 5 SVP: 8 EC: I PA: S 5 6 7

Directs gathering, selecting, and editing of local news for newspaper: Assigns reporting and photographic staff to cover various news events, acting on information received by telephone, or personal contact. Receives and rewrites, or assigns for rewriting, news copy, and edits copy for conformity with accepted rules of style and syntax, and to shorten or lengthen items to fit allocated space on newspaper pages. Relays copy to news editor or to composing room Writes or directs writing of headlines.
May hire and discharge staff. May direct gathering, writing, and publishing of news stories of regional interest and be designated accordingly; for example, Editor, Region

3351-122 EDITOR, EDITORIAL PAGE(print. & pub.) **DPT:038**
GED: 5 SVP: 8 EC: I PA: S 5 6 7

Plans and directs activities of editorial department and supervises personnel engaged in writing editorials:
Selects and assigns to editorial writers, topics of timely interest,

according to writer's specialty. Selects letters, poems, and similar contributions from readers for publication. Examines editorial copy for clarity, conciseness and adherence to publication policy. Makes up editorial page by marking position and length of editorial features on dummy sheet. Writes leading editorials. Participates in conferences of editorial policy committee to recommend position to be taken by publication on specific public issues.
May select editorial cartoons to illustrate position of publication on public issues or assign staff artist to prepare pertinent drawings.

3351-126 EDITOR, FINANCIAL(print. & pub.) **DPT:038**
business editor.
GED: 5 SVP: 8 EC: I PA: S 5 6 7

Directs newspaper or magazine department dealing with financial and business news:
Assigns reporting staff to cover business or financial news stories or to prepare feature articles. Reviews copy for publication in accordance with accepted rules of style and format. Attends press conferences, dedications of new plant sites and business structures, and business conventions or other meetings. Interviews business, government, and industrial leaders to secure information for news and feature articles. Edits news releases submitted by business firms. Analyzes, from experience, financial and stock-market transactions and projects business trends.
May review press dispatches from wire services to determine use and placement of story in financial section of newspaper, basing determination on relative significance of news item. May edit copy, write headlines, and plan layout of news items in financial section of newspaper.

3351-130 EDITOR, MAGAZINE(print. & pub.) **DPT:038**
GED: 5 SVP: 8 EC: I PA: S 5 6 7

Formulates editorial policy of periodical and directs activities of editorial personnel to conform with interests and tastes of readership and accepted standards of literary or journalistic expression:
Selects and edits or directs editing of articles submitted by contributors. Assigns staff writers to prepare articles on subjects of interest to magazine readership by conducting interviews, and by searching reference materials. Reviews articles and recommends or makes changes according to knowledge and experience of subject, and established policy. Confers with subordinate editorial personnel to formulate editorial policy and to resolve specific issues affecting readership. Confers with art, production, circulation, and other personnel to co-ordinate editorial efforts with workload of supporting departments. Writes columns or special articles and editorials of concern to readership.

3351-134 EDITOR, NEWS(print. & pub.) **DPT:038**
GED: 5 SVP: 8 EC: I PA: S 5 6 7

Plans layout of news stories for newspaper edition, according to prescribed space allocation, principles of layout, and relative significance of each story:
Confers with senior management to discuss page makeup of publication as a whole. Receives notification of available column-inches of space to be allotted to news stories. Receives dummy sheet of each news page, showing portion of each column consumed by advertising matter. Edits, or assigns for editing, news copy received from each department in editorial room. Marks dummy sheet indicating position and length of each story and accompanying cuts (photographs), according to relative significance of stories and knowledge of newspaper-layout principles. Approves proofs submitted by composing room. Writes and alters headlines to fit space allotment.
May select items from telegraph copy for publication.

3351-138 EDITOR, TECHNICAL PUBLICATION(print & pub.; prof. & tech., n.e.c.) **DPT:038**
GED: 5 SVP: 8 EC: I PA: S 5 6 7

Plans and directs activities of writers, illustrators and other workers, and edits technical manuals, brochures and similar publications for industrial, commercial, governmental or institutional organizations:
Consults with organization officials to determine objectives of proposed publication. Consults with management to attain objectives and plans and prepares lay-out proposals. Plans staff requirements to meet publication date, and determines preparation and production procedures for gathering data and preparation of illustrations within

allotted time. Directs writers and illustrators. Edits copy for technical content, style and syntax. Specifies size, quality of paper, colours and quantity, and arranges for reproduction with printer. Edits galleys, arranges lay-out and examines proof copies for conformity with policy of organization, and directs distribution of printed material as required.

May prepare operating and financial plans for press, and public relations program, and recommend plans for approval by superiors. May supervise staff engaged in press and public relations activities, and co-ordinate such activities with those from organization's headquarters. May direct production of employee publications, company training manuals and publicity releases. May be designated according to field of specialization; for example,
Information-and-Communications Manager
Supervisor, Manuals

3351-142 EDITOR, TRADE OR TECHNICAL JOURNAL(print. & pub.) DPT:038
GED: 5 SVP: 8 EC: 1 PA: S 5 6 7

Selects, writes, and reviews material for publication, plans layout, and supervises editorial staff of publication devoted to activities of commercial or institutional organization, professional group, or field of knowledge:

Assigns and directs activities of writing staff and supporting personnel. Writes editorials and special articles, according to established editorial policy of publication. Reviews material prepared by staff or other contributors. Interviews officials, workers, or other individuals to obtain items for publication, and to verify facts regarding technical matters. Plans page layout by marking dummy pages to show position and length of articles and size of photographs. Approves final proofs, and authorizes departures from usual practices, such as use of colour printing or changes in page size.

May direct activities of production, circulation, or promotion personnel. May prepare news releases, special brochures, and similar materials relating to field of publication. May be designated according to type of publication; for example,
Editor, Employee Publication
Editor, Farm Journal

3351-146 LEXICOGRAPHER(print. & pub.; prof. & tech., n.e.c.) DPT:068
morphologist
GED: 5 SVP: 8 EC: 1 PA: S 7

Composes and edits definitions of words for publication in dictionary: Ascertains or determines the nature and scope of publication policy and style required for compilation of dictionary. Determines and defines the meaning of each word, its origin, derivation and correct use by reference to source documents and using knowledge of word origins.

May compile biographical information about persons, or descriptive material about places, or abbreviations, synonyms and antonyms, prefixes and suffixes, or terms used in a particular branch of knowledge or science. May supervise and co-ordinate activities of writers engaged in preparation of dictionary, and edit material for conformity with accepted standards and be designated accordingly,
Senior Editor, Dictionary

3351-150 CRITIC(print. & pub.) DPT:088
GED: 5 SVP: 8 EC: 1 PA: S 6 7

Writes critical reviews on merits of literary or artistic works, for publication in newspapers or periodicals:

Reads books, attends art exhibits, or stage, screen, and musical performances, and forms critical opinions of them based on knowledge, judgment, and experience. Writes criticisms, usually making comparisons with other works or productions, and discussing such pertinent factors as artistic motif, expression, and technique.

May be designated according to major field of interest; for example,
Art Critic
Drama Critic
Movie Critic
Music Critic

3351-154 LITERARY WRITER(prof. & tech., n.e.c.) DPT:088
author
GED: 5 SVP: 8 EC: 1 PA: S 7

Plans and writes literary works for publication:

Chooses own subject for theme of essay, novel, poem or other literary composition. Conducts research into subject to establish factual content, assemble background material and obtain other necessary data. Plans and organizes material and composes original manuscript. Revises work, ensuring coherence of style, proper development of theme or plot and characterization.

May specialize in a particular form of writing and be designated accordingly; for example,

Essayist
Novelist
Poet
Short-Story Writer

3351-158 EDITOR, SPORTS(print. & pub.) DPT:038
GED: 5 SVP: 7 EC: B PA: S 5 6 7

Directs sports department of newspaper:

Assigns reporting staff to obtain news coverage of sporting events and personalities. Edits copy according to established format, style, and rules of syntax. Attends games and events, and interviews sports personalities to obtain information for news stories, columns, or feature articles.

May perform promotional work for sports activities sponsored by newspaper, such as conducting benefit football or basketball games, sports car races, or other events. May prepare news and feature copy, write headlines and plan layout of news items in sports section of newspaper.

3351-162 ADVERTISING COPYWRITER(prof. & tech., n.e.c.) DPT:068
copywriter.
GED: 5 SVP: 7 EC: 1 PA: S 5 6 7

Composes written material to advertise products or services:

Discusses theme, style, and length of copy with advertiser or management to determine most suitable approach, considering advertiser's particular needs and budget and media limitations. Studies product or service to ascertain principal selling features. Plans and writes headline and text, obtaining desired effect by skillful use of words, and submits copy to editor for approval.

May specialize in particular medium, such as the press, radio or television.

3351-166 COLUMNIST(print. & pub.) DPT:068
journalist.
GED: 5 SVP: 7 EC: B PA: S 5 6 7

Writes feature column, appearing periodically in newspaper or magazine, based on personal observations and knowledge of subject matter:

Comments on events, persons, or places of social, political, athletic, or economic interest. Attends fashion shows, political, business and governmental activities, or sports, social, or other special events to obtain news items for column. Interviews celebrities or other newsworthy individuals to obtain their viewpoint and comments. Quotes and discusses letters and poems from contributors.

May write columns or articles on world affairs, international law, and similar topics of political interest. May be designated according to type of column; for example,

Fashion Columnist
Political Columnist
Society Columnist
Sports Columnist

3351-170 EDITORIAL WRITER(print. & pub.) DPT:068
GED: 5 SVP: 7 EC: 1 PA: S 7

Writes comments on topics of current interest to stimulate or mould public opinion in accordance with policies of publication:

Consults editor to obtain topic approval or directions. Writes articles, utilizing knowledge of subject matter supplemented by additional research in accordance with editorial policy. Specializes in one or more fields, such as fiscal matters or national, provincial or local political issues. Participates in conferences of editorial policy committee to

recommend topics and stand to be taken by publication on specific issues.

May compile articles on particular issues for publication in pamphlet format.

3351-174 REPORTER(print. & pub.) DPT:068
GED: 5 SVP: 7 EC: B PA: S 5 6 7

Collects and analyzes facts about news-worthy events by interview, investigation, or observation, and writes newspaper stories conforming to prescribed editorial techniques and format:

Reports to scene of event, as directed. Interviews persons and observes events to obtain and verify story facts, and to develop leads for future news items. Takes notes and reads publicity releases, copies of speeches or similar materials to facilitate organization and writing of story. Types or writes story, referring to reference books, newspaper files, or other authoritative sources to secure additional relevant facts that may have a bearing on the story. Refers stories to editor for approval. Receives and evaluates news reports and suggestions for future stories. Monitors police and fire radio communications to obtain news story leads.

May transmit details of news items to editorial staff, using telephone. May specialize in one type of story, such as sports events, political affairs, or police activities. May specialize in reporting stories, articles, and news items by mail, telephone, radio, or telegraph from locations distant from publishing establishment or broadcasting station, or in writing newspaper stories of humorous, interpretive, narrative, or otherwise subjective character, and be designated accordingly; for example,

Correspondent
Feature Reporter

3351-178 TECHNICAL WRITER(prof. & tech., n.e.c.) DPT:068
GED: 5 SVP: 7 EC: I PA: S 5 6 7

Writes manuals and related technical publications concerned with the description, installation, operation, and maintenance of electronic, electrical, mechanical, and other equipment:

Acquires knowledge of product by referring to trade and technical specifications, sketches, notes, drawings, and catalogues. Verifies knowledge of product by interviewing personnel engaged in developing or improving equipment, and by observing performance of experiments and methods of production. Analyzes material and writes, in clear and concise language, draft publication. Oversees preparation of illustrative material, making rough sketches to aid artist in making final drawings, and selects photographs, drawings, sketches, diagrams, and charts. Selects, organizes, edits and revises articles, bulletins, manuals, or similar publications.

May assist in preparation and layout of work for publication. May specialize in particular technical subject and be designated accordingly; for example,

Aeronautical-Engineering Technical Writer(air & space craft.)
Chemical-Process Writer
Technical-Writer, Electrical and Electronic Products(elec. equip.)

3351-182 REWRITE MAN(print. & pub.) DPT:268
GED: 5 SVP: 7 EC: I PA: S 5 6 7

Writes news copy for publication from written or telephoned notes supplied by reporting staff:

Reviews and organizes notes received on pertinent facts and details of news events. Writes or types lead (first) paragraph of article, and expands story, verifying or supplementing facts as necessary from newspaper files or other reference sources, or by telephoning reporters for additional details. Submits copy for editing.

May collect and analyze facts about newsworthy events by interview, investigation, or observation.

3351-186 EDITOR, TELECOMMUNICATIONS(print. & pub.) DPT:268
GED: 5 SVP: 7 EC: I PA: S 7

Selects and edits provincial, national and international news items as received by wire from press associations:

Changes copy received by wire to correct errors of spelling and punctuation, and deletes paragraphs as necessary, to fit available space. Issues selected items to departments with notations of desired length of story in accordance with predetermined space allotment. Monitors teleprinter machines for new leads on important news items

received before press time of edition, and reserves space for copy on such items. Selects news of local events of national or international interest, and prepares copy to be forwarded to central news associations by wire. Rewrites stories to include information of special interest to subscribers of publication.

3351-190 EDITOR, COPY(print. & pub.; prof. & tech., n.e.c.) DPT:268
GED: 5 SVP: 6 EC: I PA: S 7

Edits and corrects printed proof copy to conform with established format, style, and policy of publication:

Reads copy to detect errors in spelling, construction, continuity, punctuation, and content. Verifies facts, such as birth dates of persons mentioned in news stories, by reference to newspaper files or other sources, and by discussion with writers. Marks corrections and rearrangement of story organization, using standard proofreading symbols. Writes headlines of specified size and type style to fit space allotted to individual story on copy. Attaches photographs and drawings to finished copy for preparation of printing plates.

May write or rewrite stories. May specialize in editing and correcting copy of manuscripts to be printed in book form and be designated accordingly. May supervise other workers engaged in preparing or editing copy, and be designated accordingly; for example,
Copy Chief

3351-194 EDITORIAL ASSISTANT(print. & pub.) DPT:268
GED: 5 SVP: 6 EC: I PA: S 5 6 7

Participates in editorial activities of newspaper, magazine, trade journal or other publication, and, under supervision, performs any combination of the following duties:

Edits copy for spelling, punctuation and grammatical errors according to accepted rules of style and syntax, using standard proofreaders' symbols. Verifies facts, dates, and statistics in articles from standard reference sources. Prepares layout of pages, showing position and size of all articles and illustrations according to knowledge of accepted techniques of presentation. Selects cuts (photographs and other illustrative material) and determines portion of cut to be reproduced, cropping extraneous elements to conserve space and emphasize subject of illustration. Writes columns, articles, or feature stories reflecting viewpoints of publication and characteristics of readership. Writes headlines and captions. Rewrites articles to improve consistency and clarity, and to conform to space limitations of publications.

May select unsolicited manuscripts for screening by senior editorial personnel.

3351-198 EDITOR, SPECIAL FEATURES(print. & pub.) DPT:068
GED: 4 SVP: 7 EC: B PA: S 5 6 7

Plans layout of news items, and prepares and edits copy for special newspaper supplements:

Receives and reviews instructions concerning proposed supplements. Searches files and determines details of similar supplements, as well as names of advertisers and personalities who might contribute news material. Selects names of personalities and field correspondents, and confers with them to inform them of special publication and invite comments or information. Interviews personalities to elaborate on or clarify, information supplied. Edits news material, plans layout of news items for supplement and prepares suitable headlines for news items. Writes articles, and edits articles received from correspondents for conformity with publication policies and rules of grammar. Forwards edited material to composing room to be set in type for making proofs. Reviews and corrects proofs. Selects photographs for supplement, according to availability of space, and sends photographs to engraving department to have cuts made. Sends cuts to composing room. Marks lay-out sheets to locate and indicate length of news, articles and photographs. Delivers completed lay-outs of supplement to composing room.

3351-202 DESKMAN, SPORTS(print. & pub.) DPT:268
GED: 4 SVP: 7 EC: I PA: S 5 6 7

Plans lay-out of sports pages of newspaper according to allocated space and relative significance of stories:

Reviews instructions concerning available space and amount of space to be allotted sports stories. Edits copy of sports stories to conform with available space, and writes headlines highlighting stories, using

knowledge of subject, language and size and style of type. Selects appropriate photographs from newspaper files to accompany certain stories. Marks lay-out sheets to locate and indicate length of stories and to locate photographs. Selects filler stories to complete columns, and indicates position of filler on lay-out sheets. Forwards completed lay-out sheet to composing room preparatory to publishing.

3351-206 EDITOR, MAKE-UP(print. & pub.) DPT:068
GED: 4 SVP: 6 EC: I PA: S 7

Writes undated articles of general interest for use as filler material in newspaper and magazines:
Reads source material, including press releases, travel brochures, and press-agency features to locate and select suitable articles for use as filler, utilizing knowledge of reader interest and company policy. Writes articles of varying lengths to provide wide selection of material for other editors. Rewrites headings and updates or revises outdated articles preparatory to republishing, conforming with space allotments. Gives instructions to printers concerning size and style of type to be used. Sends copy to be set up in composing room. Reviews and corrects errors and files approved setup for use as required by editors.

3351-210 EDITOR, PICTURE(print. & pub.) DPT:268
photo editor.
GED: 4 SVP: 6 EC: I PA: S 5 6 7

Examines and selects photographs to illustrate newspapers, magazines or other publications:
Examines photographs for news and photographic and pictorial value. Writes cut lines (descriptive text) to accompany each picture. Distributes pictures to appropriate departments. Makes up rotogravure section of publication by marking position and size of articles and pictures on dummy sheet. Makes assignments to news photographers to obtain photographs.
May make up picture page or sequences to present ideas or stories pictorially and be designated accordingly.

3353-WRITERS AND EDITORS: RADIO, TELEVISION, THEATRE AND MOTION PICTURES

This unit group includes occupations concerned with selecting, interpreting and editing news and other materials for information, or entertainment through radio or television broadcasting; writing and editing scripts for sketches, motion pictures, stage presentations, advertising, and broadcast programs. Radio and television announcers are classified in Unit Group 3337, RADIO AND TELEVISION ANNOUNCERS.

3353-110 EDITOR, NEWS, SPECIAL EVENTS AND PUBLIC AFFAIRS(broadcast., motion pic. & stage) DPT:038
GED: 5 SVP: 8 EC: I PA: S 5 6 7

Supervises and co-ordinates activities of workers engaged in gathering editing and broadcasting news reports, special events and public affairs programs:
Plans and develops assignment procedures for coverage of regional, national and international news for network programs, and co-ordinates regional coverage of news events to be used nationally. Plans coverage and broadcasting of news specials and public affairs programs. Selects news topics and originates ideas for news specials, and briefs cameramen, editors and reporters on coverage plans. Decides format for programs, selecting and evaluating copy, film, video tape and graphics to be used, and organizes the recording, editing and scripting of program material. Verifies material gathered against other sources of information for accuracy, clarity, good taste and newsworthiness. Writes film scripts, news items and continuity for programs, and edits copy prepared by other editors. Monitors news programs periodically for errors in reading or production.
May specialize in a particular area and be designated accordingly; for example,
Editor, Foreign-News Broadcasting
Film and Script Editor, Television News
News Editor, Broadcasting

3353-114 EDITOR, CONTINUITY AND SCRIPT(broadcast., motion pic. & stage) DPT:038
GED: 5 SVP: 8 EC: I PA: S 5 6 7

Edits, and supervises preparation of continuity and script material for broadcasting:
Reviews, or assigns others to review scripts, stories and other material prepared by staff or free-lance writers for station or network presentation. Assesses suitability of material for broadcasting, and recommends purchase of material submitted by free-lance writers. Directs preparation of scripts to be read by announcers to introduce and connect various parts of musical, news, sports or special events programs. Edits material to ensure conformance with company policy and laws. Maintains liaison with universities, writers' groups and other organizations to extend and publicize company's interest in Canadian writers.

3353-118 NEWS ANALYST, BROADCASTING(broadcast., motion pic. & stage) DPT:068
GED: 5 SVP: 8 EC: B PA: S 5 6

Prepares comments on news and current affairs for broadcasting over radio or television:
Analyzes and evaluates news items of local, national and international significance. Conducts interviews with persons knowledgeable on or involved in events of current interest. Prepares scripts for broadcasts, interpreting the facts to give a personal assessment of their causes, consequences and likely implications.
May collect and report facts about newsworthy events at scene of special assignment or other locations distant from broadcasting station. May provide extemporaneous commentary on important public events. May specialize in a particular field of news reporting and be designated accordingly; for example,
Political Analyst
Stock-Market Analyst

3353-122 SCRIPT WRITER(broadcast., motion pic. & stage) DPT:068
GED: 5 SVP: 7 EC: I PA: S 5 6

Writes original scripts for stage plays, screenplays and broadcasts, working alone or as member of team:
Chooses own theme and subject matter, or writes on particular subject for specific occasion, as directed. Conducts research into subject matter to obtain authentic details of manners, customs and speech, characteristic of specific period, locale or race. Writes script, including dialogue, description of characters and details of scenes and settings, using knowledge of limitations and opportunities of media. Submits script to editor for approval, and discusses recommended alterations with colleagues or producer. Revises script where necessary by eliminating scenes, changing sequence or characterizations, brightening dialogue or cutting length.
May write material that is read by announcers to introduce and connect various parts of musical, news, sports and special events programs and be designated accordingly,
Continuity Writer

3353-126 WRITER, NEWS OR SCRIPT, INTERNATIONAL BROADCASTING(broadcast., motion pic. & stage) DPT:088
GED: 5 SVP: 7 EC: I PA: S

Writes news items or topical scripts in foreign language for broadcast to foreign country:
Compiles and writes news items to give listeners a resume of world affairs, with emphasis on events occurring within their own countries. Writes original scripts on topics to stimulate interest of listeners, employing knowledge of customs and tastes of foreign peoples to whom broadcasts are directed.
May announce programs in language of country to which program is broadcast and be designated accordingly,
Writer-Announcer, International Broadcasting

3353-130 SCRIPT READER(broadcast., motion pic. & stage) DPT:268
GED: 4 SVP: 6 EC: I PA: S 5 7

Appraises written material submitted for broadcasting for conformity with standards of good expression:
Reads book or script of radio and television programs to refine forms of language expression or to detect and recommend deletion of vulgar, immoral, libellous or misleading statements. Evaluates style and content of script and suggests changes to writer.

3353-199 OTHER WRITING AND EDITING
OCCUPATIONS: RADIO, TELEVISION,
THEATRE AND MOTION PICTURES

This group includes writers and editors, not elsewhere classified; for example, those who write texts for operas, musical plays or extended choral works by fitting words to music composed by another; write original plays, or adapt themes from fictional, historical or narrative sources for dramatic presentation; and write words to be sung or spoken to accompaniment of music. Typical examples of occupational titles covered by this residual group definition are:

Librettist(prof. & tech., n.e.c.)
Playwright(prof. & tech., n.e.c.)
Song Writer(prof. & tech., n.e.c.)

3355-TRANSLATORS AND INTERPRETERS

This unit group includes occupations concerned with interpreting the spoken word from one language into another and translating written or spoken words to one or more different languages, and includes translation of trade, technical, professional or scientific terminology.

3355-110 INTERPRETER(prof. & tech., n.e.c.) DPT:268
GED: 5 SVP: 7 EC: I PA: S 5 6

States orally in one language what has been stated orally in another language:

Listens to speaker, and reads from working papers or correspondence to interpret statements made, utilizing knowledge and training in logical and scientific thinking, professional, technical and cultural terminology, and a thorough understanding of the specific languages used. Restates, either simultaneously or consecutively, interpreted statements to facilitate understanding of proceedings by listeners. May be required to translate written matter into a different language, and revise translations prepared by others. May be designated according to language or languages interpreted, or kind of interpretation rendered; for example,
Interpreter, Simultaneous
Interpreter, Slavic Languages

3355-114 TRANSLATOR, SCIENTIFIC DOCUMENTS(prof. & tech., n.e.c.) DPT:288
GED: 5 SVP: 7 EC: I PA: S 4

Translates scientific or technical writings into another language:
Translates scientific and technical documents, texts and correspondence from one language into another, using training in logical and scientific thinking and a thorough knowledge of the languages, and of cultural, technical and professional terminology, to facilitate understanding of original document by reader.
May revise translations prepared by others, consulting dictionaries and other reference sources as required. May specialize in the subject matter of a particular science or profession, such as engineering, physics, law or medicine and be designated accordingly; for example,
Translator, Law
Translator, Medicine
Translator, Physical Sciences

3355-118 FOREIGN-BROADCAST TRANSLATOR(broadcast., motion pic. & stage) DPT:288
GED: 5 SVP: 6 EC: I PA: S 6

Translates and transcribes radio messages:
Translates radio messages, news and script, and transcribes texts into language and form required. Prepares replies to mail received from audience in language of senders. Records and files mail received, together with copies of replies.
May specialize in type of material translated and transcribed, and be designated accordingly; for example,
Foreign-News Translator

3355-122 TRANSLATOR(bus. serv.; prof. & tech., n.e.c.) DPT:288
GED: 5 SVP: 6 EC: I PA: S 4

Translates and transcribes texts into one or more languages:
Translates documents and correspondence into another specified language, using thorough knowledge of the language and specialized terminology to facilitate understanding of contents of original document by reader. Transcribes translated text, using knowledge of grammar and terms employed in business, professional, technical or trade organizations, in specified format such as memorandum, report, or letter.
May act as interpreter during conversations with visitors from abroad or during telephone calls conducted in a foreign language. May be designated according to knowledge of specific professional or technical terminology, or according to foreign language; for example,
Insurance Translator
Translator, German
Translator, Russian

3359-OCCUPATIONS IN WRITING, N.E.C.

This unit group includes occupations, not elsewhere classified, concerned with writing and editing activities for broadcasting or for publications; such as, writing humorous material for publications, reading and evaluating magazine manuscripts, writing self-instructional texts, composing crossword puzzles, and writing articles for scientific and other journals.

3359-110 HUMORIST(print. & pub.; broadcast., motion pic. & stage) DPT:068
GED: 5 SVP: 7 EC: I PA: S 4 5 6

Writes humorous material for publication or for oral or dramatic presentation:
Writes humorous books, articles, plays or comic sketches, using knowledge gained from observation of human behaviour, situations, and current affairs. Writes humorous dialogues, jokes, and descriptions of episodes, gestures or facial expressions to be performed by cast members to enhance entertainment or comedy in motion-pictures or radio and television productions. Discusses work with producer, cast members, or other writers and revises manuscript where necessary.
May specialize in writing particular kind of humour and be designated accordingly,
Gag Writer

3359-114 READER, FIRST(print. & pub.) DPT:288
GED: 5 SVP: 6 EC: I PA: S

Reads and evaluates submitted magazine manuscripts to select those suited for publication:
Reads manuscripts to evaluate their journalistic or literary merit and probable reader interest, and lists reasons for rejection or submits approved manuscripts to supervisor or subject specialist for final decision.

3359-118 PROGRAMMED-INSTRUCTION WRITER(bus. serv.; educ.) DPT:068
instructional programmer; writer, self- instruction manual.

GED: 5 SVP: 5 EC: I PA: S 5 6 7

Writes self-instructional texts and related material exploring, explaining and teaching academic, cultural, commercial or technical subjects: Reviews customer's specifications for training-program needs. Writes statement of instructional objectives and measurement criteria. Writes programmed instructions to meet objectives and criteria, utilizing knowledge of principles of psychology and learning theory, for presentation in printed text or other suitable medium. Consults with subject-matter specialists at various stages of preparation of program. Tests the program with selected learners, first with small groups, then with large groups, to establish statistical validity. Revises program after each trial until program appears to be suitable for publication.

3359-122 CROSS-WORD-PUZZLE MAKER(print. & pub.) DPT:088

GED: 4 SVP: 6 EC: I PA: S 7

Devises and composes cross-word puzzles for publication:

Draws form, setting up numbered blank squares for insertion of words and filled in squares to complete design. Fits words, whose spelling coincides vertically and horizontally, into blank areas, making use of knowledge of spelling and grammar of one or more languages. Composes short definitions numbered correspondingly to match series of blank squares. Completes puzzle for use as key to solution.

May originate puzzles for specific purposes such as advertisements or special days or events. May originate puzzles, making use of words in two languages, and be designated accordingly, Bilingual-Puzzle Maker

3359-199 OTHER OCCUPATIONS IN WRITING

This group includes writers, not elsewhere classified; for example, those who write articles for scientific or other journals, encyclopedias and university and school texts. Typical examples of occupational titles covered by this residual group definition are:

Collaborator, Encyclopedia(print. & pub.)

Contributor, Scientific(print. & pub.)

Specialist Writer, History(prof. & tech., n.e.c.)

OCCUPATIONS IN SPORT AND RECREATION

This major group includes occupations concerned with employment for monetary gain in athletics, sports, recreation and amusement. Activities include: administering and directing athletic programs; selecting, training and managing athletes; giving instruction in professional sports; officiating at games and sporting events; participating in sports and athletics as competitor or player; and providing services directly related to athletics, sports, recreation and amusement. Occupations concerned with teaching athletics, sports and physical education in educational institutions are classified in Major Group 27, **TEACHING AND RELATED OCCUPATIONS**. Occupations concerned with the performing arts for the amusement and entertainment of audiences are classified in Minor Group 333, **OCCUPATIONS IN PERFORMING AND AUDIOVISUAL ARTS**. **OCCUPATIONS IN SPORT AND RECREATION** are classified in the following minor group:

371 Occupations in Sport and Recreation**371-OCCUPATIONS IN SPORT AND RECREATION**

This minor group includes occupations concerned with administering and directing athletic programs; managing, coaching, scouting, training and instructing athletes; observing and enforcing rules and regulations governing sporting events, athletic games and competitions; participating in sports and athletics as competitor or player; attending to the needs of persons engaged in sports and recreational activities; providing services to patrons at amusement parks, carnivals and other amusement centres; and serving as guides to hunters, mountaineers and other sportsmen. These occupations are classified in the following unit groups:

- 3710** Coaches, Trainers, Instructors and Managers,
Sport and Recreation
- 3711** Referees and Related Officials
- 3713** Athletes
- 3715** Attendants, Sport and Recreation
- 3719** Occupations in Sport and Recreation, n.e.c.

3710-COACHES, TRAINERS, INSTRUCTORS AND MANAGERS, SPORT AND RECREATION

This unit group includes occupations concerned with administering and directing athletic programs; managing, coaching, scouting, training and instructing athletes for team sports; and training and instructing athletes and other individuals in competitive and recreational sport. Activities include: negotiating contracts with players; arranging for their participation in sports events; and giving instructions in theoretical and practical aspects of sports and recreation to individuals or groups desiring to gain sports skills or to increase physical fitness. Occupations concerned with teaching athletics, sports and physical education in educational institutions are classified in Major Group 27, **TEACHING AND RELATED OCCUPATIONS**.

3710-110 Director, Athletics(educ.) DPT:118
GED: 5 SVP: 8 EC: I PA: S 4

Directs and administers athletic activities in college or university and negotiates with other colleges or universities to co-ordinate intercollegiate sports programs; Interprets and participates in formulating extramural athletic policies. Employs and discharges coaches and other athletic department employees on own initiative or at direction of board of directors. Assumes responsibility for athletic publicity. Oversees and directs

coaches and members of coaching staff. Prepares budget estimates. Assumes responsibility for receipts and expenditures of department and for production of income, such as scheduling sports events and controlling ticket sales. Supervises physical education staff. May direct program for students of physical education.

3710-114 MANAGER, PROFESSIONAL ATHLETIC TEAM(amuse. & rec.) DPT:118
GED: 5 SVP: 8 EC: B PA: L 5

Manages, directs and controls the activities of personnel concerned with the operation of a professional athletic team and its players: Performs duties as described under master title, 01-180 **MANAGING SUPERVISOR** (any ind.). Directs and co-ordinates activities of the scouting, coaching and training staff. Discusses terms and bargains with other clubs to buy, sell or trade players. Negotiates with players regarding salary contracts, and working agreements. Employs and discharges staff members on own initiative or as instructed by board of directors. Controls team's finances, ticket sales and travel accommodations.

May manage a team engaged in a particular sport and be designated accordingly; for example,
Manager, Baseball Team
Manager, Basketball Team
Manager, Football Team
Manager, Hockey Team
Manager, Lacrosse Team

3710-118 MANAGER, ATHLETE(amuse. & rec.) DPT:118
GED: 5 SVP: 7 EC: 1 PA: L 5

Manages affairs of athletes by negotiating with promoters and other sports groups to settle business matters such as contracts, and directs training:

Negotiates with promoters or team management to obtain favourable contracts for client. Prescribes exercises, rest periods, and diet to be followed by client. Directs those concerned with the training and conditioning of client. Determines strategy to be followed by client in competition with others.

May be designated according to sport of athlete; for example,
Manager, Boxer
Manager, Wrestler

3710-122 COACH, PROFESSIONAL ATHLETIC TEAM(amuse. & rec.) DPT:128
GED: 5 SVP: 7 EC: B 5 PA: L 2 3 4 5 6 7

Coaches players by analyzing their performances, instructing them in areas of deficiency, and developing team coordination for sports events:

Observes performance of players to determine need for individual or team improvement. Coaches players individually or in groups, by demonstrating techniques of game. Oversees daily practice of players and ensures that players adhere to club's training rules during off-duty time. Plans and directs game strategy on own initiative or with other club officials. Develops play patterns, and instructs and drills players in briefing and practice sessions. Analyzes game progress and gives signals and instructions to players. Conducts after-game analyses of play, and makes changes in strategy, play patterns and player utilization and performance.

May be concerned with a particular sport and be designated accordingly; for example,
Coach, Baseball Team
Coach, Basketball Team
Coach, Football Team
Coach, Hockey Team
Coach, Lacrosse Team

3710-126 SCOUT, PROFESSIONAL SPORTS(amuse. & rec.) DPT:218
GED: 4 SVP: 8 EC: B 5 PA: L 5 6 7

Searches for talented players and evaluates their athletic skills to determine their fitness and potential for professional sports, and negotiates with them or their manager to obtain their services:

Observes prospects' performances and reviews past records. Negotiates with players or their manager to arrange contracts. Reports to management of team he represents, the results of scouting assignments, such as selection or rejection of players observed and interviewed, and persons to be considered for future recruitment.

May sign player contracts on behalf of club management. May be concerned with a particular sport and be designated accordingly; for example,

Baseball Scout
Basketball Scout
Football Scout
Hockey Scout
Lacrosse Scout

3710-130 INSTRUCTOR, PHYSICAL TRAINING(amuse. & rec.; educ.; pers. serv., n.e.c.) DPT:224
GED: 4 SVP: 7 EC: B PA: M 2 3 4 5 7

Teaches individuals or groups beginning or advanced calisthenics, gymnastics and reducing or corrective exercises, in private health club, gymnasium or outdoors:

Evaluates abilities and needs of individual by observation and interview to determine suitable training program. Teaches and demonstrates use of gymnastic apparatus, such as trampoline, mechanical exercisers, and corrective weights. Teaches manipulative skills required for sports and games. Organizes, leads, instructs, and referees games, such as volleyball, squash, and racquetball.

May train volunteer leaders. May give massages and alcohol rubs, and assist clients receiving heat or ultraviolet treatments and hot baths.

3710-134 SWIMMING INSTRUCTOR(amuse. & rec.) DPT:224
GED: 4 SVP: 7 EC: B 4 PA: H 2 3 4 5 7

Teaches swimming and diving skills, life saving and water safety measures to individuals and groups:

Instructs beginners in swimming, usually by entering water or from deck, demonstrating correct movements, and assisting them to remain afloat. Instructs those attempting to gain proficiency in swimming or diving, orally or by demonstration. Teaches lifesaving and water safety, including safe practice with small boats.

3710-138 ATHLETIC TRAINER(amuse. & rec.) DPT:224
GED: 4 SVP: 7 EC: B PA: L 2 3 4 5 7

Instructs athletes to improve their physical fitness for participation in various sports, such as baseball, boxing, football and hockey:

Prescribes routine and corrective exercises to strengthen muscles. Recommends special diets to build up health and reduce weight. Massages parts of players' bodies to relieve soreness, strains and bruises. Renders first aid to injured persons, such as giving artificial respiration, cleaning and bandaging wounds, and applying heat and cold to promote healing.

May give heat and diathermy treatments as prescribed by health services. May be designated according to type of sport concerned; for example,
Baseball Trainer
Boxing Trainer
Football Trainer
Hockey Trainer
Lacrosse Trainer

3710-142 COACH, AMATEUR ATHLETIC TEAM(amuse. & rec.) DPT:124
GED: 4 SVP: 6 EC: B 5 PA: L 2 3 4 5 6 7

Coaches amateur players of various age groups in fundamentals and rules of competitive sports:

Forms groups into competing units. Demonstrates techniques of play. Drills members of group in fundamentals until they are familiar with and adept in all phases of game, giving particular attention to physical conditioning. Plans and directs game strategy on own initiative or with other club officials. Develops play patterns, and instructs and drills players in briefing and practice sessions. Analyzes game progress and gives signals and instructions to players. Conducts other-game analysis of play, and makes changes in strategy, play patterns and player utilization and performance.

May purchase and maintain athletic equipment. May coach a particular sport and be designated accordingly; for example,
Coach, Junior Hockey

3710-146 GOLF PROFESSIONAL(amuse. & rec.) DPT:224
GED: 3 SVP: 7 EC: B PA: L 2 3 4 5 6 7

Instructs novices and players to improve their skill in playing golf:

Describes and demonstrates correct techniques to new and experienced golfers to improve their golfing skill. Organizes and conducts tournaments for club members. Purchases, displays, and sells golf equipment. Maintains records of receipts and expenditures.

May represent golf club as player in various tournaments. May advise on construction and maintenance of golf course.

3710-150 SKI INSTRUCTOR(amuse. & rec.) DPT:224
GED: 4 SVP: 6 EC: O PA: M 2 3 4 5 6 7

Instructs and demonstrates techniques of skiing to individuals or groups:

Explains and demonstrates skiing techniques, such as walking, turning, stopping, bending knees, balancing body while on skis, and down-hill techniques. Demonstrates physical exercises required to maintain physical fitness. Recommends appropriate ski equipment and wearing apparel to individuals. Explains safety measures to follow while skiing. Observes persons to detect mistakes and recommends techniques to correct errors.

May participate in skiing demonstrations, ski racing, and jumping competitions. May sell skis and equipment.

3710-154 JUDO INSTRUCTOR(amuse. & rec.) DPT:224
ju-jitsu instructor; karate instructor.
GED: 3 SVP: 6 EC: I 6 PA: H 2 3 4 5 7

Teaches individual and group classes in judo, ju-jitsu, karate or other methods of self-defence:

Lectures on history and purpose of self-defence technique. Explains and demonstrates use of basic anatomical knowledge to exploit weak parts of adversary's body. Explains and illustrates principles of leverage, foot action, and body movement. Conducts classes ranging from basic level of skill and knowledge to highly advanced stage of proficiency.

May participate in competition to demonstrate self-defence.

3710-158 INSTRUCTOR, ICE SKATING(amuse. & rec.) DPT:224
GED: 3 SVP: 6 EC: B PA: L 2 3 4 5 6 7

Instructs individuals or groups in techniques of ice skating:

Instructs by demonstration and oral presentation, the techniques of body balance and skating strokes.

May participate in and organize exhibitions of figure, dance, and free skating. May sell skating equipment.

3710-162 RIDING INSTRUCTOR(amuse. & rec.) DPT:224
GED: 3 SVP: 6 EC: O PA: H 2 3 4 5 7

Instructs pupils in techniques of horsemanship:

Teaches pupils how to mount horse and how to post. Explains and demonstrates methods of controlling horse's actions in walking, trotting, cantering, pacing, and other gaits. Instructs pupils how to saddle and groom horse.

May drill advanced pupils in the art of jumping and in horsemanship competitions.

3710-166 INSTRUCTOR, BOWLING(amuse. & rec.) DPT:224
GED: 3 SVP: 5 EC: I PA: M 2 3 4 5 7

Instructs individuals or groups of persons how to bowl by explaining and demonstrating techniques and methods of bowling:

Explains and demonstrates various approaches, fingering, wrist action, and follow-through techniques of bowling. Observes students during practice bowling to detect their mistakes. Informs them of mistakes and of action required to correct them. Recommends type and weight of bowling ball to use. Explains bowling rules and regulations and method of keeping score.

May sell bowling equipment, such as shoes, gloves and balls.

3710-199 OTHER COACHES, TRAINERS, INSTRUCTORS AND MANAGERS, SPORTS AND RECREATION

This group includes sports and recreation coaches, trainers, instructors and managers, not elsewhere classified; for example, those who hire and train caddies, and specialize in gymnastic apparatus exercises. Typical examples of occupational titles covered by this residual group definition are:

Caddie Master(amuse. & rec.)

Gymnastics Instructor(amuse. & rec.)

3711-REFEREES AND RELATED OFFICIALS

This unit group includes occupations concerned with observing and enforcing rules and regulations governing sporting events, athletic games and competitions. Activities include: refereeing; keeping scores and other records; judging performances and determining results; and verifying credentials of persons or animals engaged in sports and other special events.

3711-110 STEWARD, RACETRACK(amuse. & rec.) DPT:118
GED: 5 SVP: 7 EC: I PA: S 5 6 7

Co-ordinates activities of racetrack personnel and negotiates with other racetrack officials and provincial racing commission to interpret and enforce racing rules and regulations as member of board of stewards:

Supervises all employees of track engaged in conducting horse races. Approves or disapproves requests for equipment changes on horses by owners and trainers. Orders removal of unfit horses from race. Observes entry of horses into starting gate to ensure that each horse gets a fair start from gate. Determines jointly, with other track officials, violations of racing rules and penalties to be assessed in accordance with provincial racing commission. Directs claiming of horses when owners use them for betting on races. Alternates duties with other members on board of stewards.

May be engaged in a particular activity and be designated accordingly; for example,
Commission Steward
Presiding Steward
Steward-at-Start

3711-114 REFEREE(amuse. & rec.) DPT:268
umpire.
GED: 4 SVP: 7 EC: B 5 PA: L 2 3 4 5 7

Officiates at sporting events, such as baseball, basketball or football games and boxing or wrestling matches to maintain standard of play and to assess penalties:

Officiates at sporting events and observes actions of participants in events to detect infractions of rules, such as tripping or fouling opposing players, and makes final decisions on disputable matters according to established regulations. Consults with opposing teams or players when required. Assesses penalties to player or team for infractions of rules. Starts and stops game, as required, using hand or arm signals or by blowing whistle.

May be concerned only with determining validity of goals, or out-of-bound plays, and be designated accordingly; for example,
Goal Judge
Linesman

3711-118 RACING SECRETARY AND HANDICAPPER(amuse. & rec.) DPT:288
GED: 4 SVP: 7 EC: I PA: S 7

Analyzes past performances of horses to assign handicap allowances and to arrange races among horses of comparative speed and ability:

Analyzes records, class (breeding), and past performances of horses to determine which horses will participate during racing meet. Prepares list of horses eligible for each race. Handicaps each horse in every race by assigning weight each horse should carry, basing decision on amount of money and number of races won, age and sex of animal, distance of race, and on personal judgment acquired through experience. Registers names of persons having financial interest in horses entered in meet. Observes races to study ability and form of horses and to verify selection of entries and assignments of handicap weights.

May receive applications from owners for stabling for race meets and winter quarters, and allots stalls and tack rooms accordingly.

3711-122 PATROL JUDGE(amuse. & rec.) DPT:268
GED: 3 SVP: 6 EC: O PA: L 2 5 7

Observes running of horse races at racetrack to detect infractions of racing rules, and reports claims of fouls committed:

Observes running of race from elevated stand to detect interference between horses or actions of rider that cause his or other horses to lose chance of winning. Records name of jockey, number of horse and type of infraction. Discusses race with other judges to determine if race was run in accordance with rules. Observes motion pictures of race to determine if infraction cited or claim of foul lodged is valid. Participates as one of several judges, each of whom observes race from different locations around track. Observes horses in stretch and posts finish of first four horses crossing finish line.

3711-126 CLERK-OF-THE-COURSE(amuse. & rec.) DPT:368
GED: 3 SVP: 6 EC: B 5 PA: L 7

Compiles details of events at harness race meeting:
Records necessary entries in official records book, such as names of horses and their eligibility, certificate numbers, names of owners, names of sulky drivers and their licence numbers, charted lines at parimutuel meetings, amount of money won by each horse, and names of withdrawn or ruled out horses. Records time of race in minutes, seconds and fifths of seconds. Notifies owners and drivers of penalties assessed. Verifies correctness of entries in official records book.

3711-130 STARTER, HARNESS RACING(amuse. & rec.) DPT:664
GED: 3 SVP: 6 EC: O PA: L 4 5 7

Starts harness races by directing drivers to line horses up behind mobile starting-gate, and controls speed of vehicle and folding of gate:
Takes position, in rear of mobile starting-gate facing horses. Directs drivers to bring horses up behind starting-gate in proper post position, using microphone. Signals drivers to control horses as vehicle proceeds along racetrack. Gradually increases speed of vehicle by depressing accelerator, using foot. Presses button to fold gate to sides of vehicle and gives word to start race as vehicle crosses starting line. Assesses fines or issues suspensions to drivers for infractions of rules or misdemeanors while behind starting-gate. Notifies officials of misdemeanors and penalties assessed.

3711-134 PLATING INSPECTOR(amuse. & rec.) DPT:367
paddock plater.
GED: 3 SVP: 6 EC: O 6 PA: M 3 4 7

Inspects horse's hooves and plates to ensure their satisfactory condition for racing:
Inspects hooves and plates of horses at paddock prior to race to determine that hooves have been trimmed to prevent stumbling during race and to detect loose or broken plates. Records name of horse, owner and trainer, and condition of horse's hooves and plates. Reports unsatisfactory conditions to track officials for further action.

3711-138 STARTER, HORSE RACING(amuse. & rec.) DPT:268
GED: 3 SVP: 5 EC: O PA: L 5 7

Determines sequence of entry of horses into starting gate at racetrack and gives directions to jockeys and track personnel who assist in positioning horses:
Observes temperament of horses to determine sequence of entry into starting gate. Informs jockeys as to order of entry. Gives directions to track personnel to assist in positioning horses into starting gate when horses are reluctant to enter. Recommends removal of a horse from the race if it refuses to enter gate or if horse or rider is injured while entering or in starting gate. Signals riders and other track officials when ready to start race, and presses starter button that opens gate to release horses.

3711-142 PADDOCK JUDGE(amuse. & rec.) DPT:668
GED: 3 SVP: 5 EC: O PA: L 5 6 7

Inspects equipment of horses and jockeys in paddock at race track before each race to determine that equipment meets specifications printed on program:
Examines jockey's equipment and harness of racehorse and orders jockey or trainer to make changes, if needed, to meet specifications. Refers requests for changes of equipment to other track officials for approval. Orders jockeys to mount for race.
May register time of claim for horse prior to race, using registering-time clock.

3711-146 IDENTIFIER, HORSE(amuse. & rec.) DPT:688
GED: 3 SVP: 4 EC: O 6 PA: L 4 7

Verifies identification data of horses at paddock to ensure that only those horses scheduled to race are permitted to be saddled:
Examines horse for colour and markings, size, and identification number tattooed on upper lip, and compares identifying marks with

pictures and other official records. Records physical changes in horse, such as scars.

3711-150 SCOREBOARD OPERATOR(amuse. & rec.) DPT:564
GED: 3 SVP: 3 EC: B PA: S 4 5 7

Operates control panel of scoreboard to inform spectators of progress of sports event:
Observes players and officials at sports event. Manipulates indicators and pushes buttons on control panel of scoreboard to inform spectators of the progress and statistics of event, such as time, scores and penalties. Confers directly with officials to verify scores, penalties and other data as they occur.

3711-154 HORSE-RACE TIMER(amuse. & rec.) DPT:368
GED: 3 SVP: 3 EC: I PA: S 5 7

Clocks and records time required for horse leading in race to run specified distances:
Starts stopwatch as race begins, clocks (times) leading horse as it runs various fractions of race, and stops watch when leading horse crosses finish line. Records fractions and total time required to run race, number of horse crossing finish line first, number of race, and date. Compares stopwatch readings with reading of electronic timer and reports significant differences to race track officials.
May clock running times of horses during morning workouts.

3711-158 CLOCKER(amuse. & rec.) DPT:388
GED: 3 SVP: 3 EC: O PA: L 4 7

Clocks (times) racehorses at racetrack during workouts to obtain speed information:
Records each horse on track by its particular identifying marks and colour. Observes horses during workout and assigns speed rating according to distance run, time required as determined by stopwatch, and effort extended by horse and rider. Records information and submits it to track management.

3711-162 RECEIVING-BARN CUSTODIAN(amuse. & rec.) DPT:668
GED: 3 SVP: 3 EC: B PA: L 5 6 7

Verifies credentials of persons at receiving barn of racetrack, and orders horses, scheduled to race, to be brought to barn for examination:
Compares credentials of persons requesting admittance with list of names authorized. Orders handlers to bring horses to receiving barn for inspection by appropriate track officials. Notifies racing officials of horses not meeting racing requirements or not present for inspection. Issues instructions to workers cleaning stable and barn area.

3711-166 CLERK-OF-SCALES(amuse. & rec.) DPT:688
GED: 3 SVP: 3 EC: O PA: L

Weights jockeys and equipment before and after each race at racetrack to ensure that each horse carries assigned handicapped weight during running of race:
Compares scale readings against predetermined weight assignment in agreement. Computes amount of shortage, and issues additional lead-filled pads to comply with poundage requirements. Records amount of overweight for track officials' use. Reweighs jockeys and equipment after each race to ascertain if any lead from pads was lost during running of race.

3713-ATHLETES

This unit group includes occupations concerned with active participation for monetary gain, in games or sports as competitor or player. Players who are engaged mainly in giving instruction in their sport are classified in Unit Group 3710, COACHES, TRAINERS, INSTRUCTORS AND MANAGERS, SPORT AND RECREATION.

3713-110 ATHLETE(amuse. & rec.) DPT:241
professional athlete,
 GED: 3 SVP: 7 EC: B 5 6 PA: L 2 3 4 5 6 7

Participates in competitive athletic events; such as, basketball, baseball, boxing, football and hockey, for monetary gain:
 Learns rules and regulations as they apply to individual or team sport.
 Trains to develop ability in specific sport, by physical exercise and regular practice, under the direction of coach and trainer.
 May specialize in playing a particular sport and be designated accordingly; for example,
 Football Player
 Hockey Player
 Wrestler

3713-114 SULKY DRIVER(amuse. & rec.) DPT:243
 GED: 3 SVP: 6 EC: O 6 PA: L 4 5 7

Rides in horse-drawn two-wheeled sulky in competitive races:
 Participates in harness race by riding in horse-drawn sulky. Guides horse, using reins. Tightens or slackens reins to control speed of horse.
 Adheres to established rules and regulations governing harness racing.
 Exercises horse in warm-up heats prior to race.

3713-118 JOCKEY(amuse. & rec.) DPT:243
 GED: 2 SVP: 6 EC: O 6 PA: M 2 3 4 5 7

Rides horse in competitive horse-race at racetrack:
 Receives riding instructions from horse's trainer, before race. Rides horse from starting gate to finish line during race. Rides horse during morning workout to analyze ability and peculiarities of his horse to determine how he should ride in race. Discusses horse's performance with trainer, after race.

3713-122 AUTOMOBILE RACER(amuse. & rec.) DPT:243
race-car driver.
 GED: 3 SVP: 4 EC: O 5 6 7 PA: M 4 7

Operates automobile-racing car in competition races:
 Operates car over track where race is to be run to familiarize self with course. Participates in speed and elimination trial races to qualify car for race. Drives car in race. Analyzes speed and position of other cars to determine when and where to drive car to be in favourable position to win. Observes fuel, oil, and compression gauges on dashboard of car to ensure that car is operating efficiently. Watches for warning signs, such as flags or flares, that indicate an accident has occurred and drives car accordingly.
 May perform maintenance work on car. May test fuel, oil and tires under racing conditions for oil and tire companies. May perform promotional activities on radio, television and through the press for sponsors. May drive car in a particular type of race and be designated accordingly; for example,
 Demolition Driver
 Stock-Car Racer

3715-ATTENDANTS, SPORT AND RECREATION

This unit group includes occupations concerned with attending to the needs of persons engaged in sports and recreational activities, and providing facilities to patrons at amusement parks, carnivals and other amusement centres. Activities include: allocating equipment to participants of sporting events or recreational pursuits; collecting fees; providing caddying and other services to golfers; attending to the needs of prize fighters; and operating carnival rides and amusement concessions. Occupations concerned with providing personal services in service establishments are classified in Major Group 61, SERVICE OCCUPATIONS.

3715-110 PONY-RIDE OPERATOR(amuse. & rec.) DPT:323
 GED: 3 SVP: 5 EC: B 6 PA: M 3 4 5 7

Trains ponies to be ridden, sells pony rides to children, and maintains stable of ponies:
 Trains ponies to take bit, bridle and saddle, and to walk, trot, or gallop on command. Sells tickets and accepts money for rides. Explains different types of rides to parents and recommends suitable ride on basis of size and age of child. Lifts children onto ponies and fastens them to saddle, using straps, to keep them from falling. Leads pony to riding course and commands pony to walk, trot or gallop, or drives pony-drawn wagon to give children rides. Purchases ponies, feed and supplies to maintain stable of ponies. Feeds, waters and grooms ponies, or supervises workers engaged in feeding and attending ponies.

3715-114 ICEMAN, RINK(amuse. & rec.) DPT:684
ice maker.
 GED: 3 SVP: 5 EC: B PA: M 4 7

Prepares surface of rink for activities, such as ice-skating, hockey or curling:
 Sprays surface of rink, using water hose, to obtain ice layer of specified thickness. Cleans and smooths ice surface by operating machine equipped with scraper blades and water-spraying device. Maintains curling rink surface by sweeping ice surface, using brush, and pebbles ice surface by spraying fine mist of water over surface from water container carried on back.
 May paint surface of ice and appropriate lines and insignia on ice surface, using brush and sprayer. May turn valves to admit steam through floor pipes to melt ice. May clean and smooth ice surface of outdoor rink by using shovel, hand scraper and water hose. May position wood panels over ice surface to cover ice for shows, sports events or exhibits not requiring ice surface.

3715-118 ATHLETIC-EQUIPMENT CUSTODIAN(amuse. & rec.) DPT:377
 GED: 3 SVP: 4 EC: B PA: L 4 5 7

Keeps stock of new and used athletic supplies, such as balls, gloves, bats, shoes and uniforms, and issues supplies to players:
 Keeps record of supplies in stock and those issued to players. Requests additional supplies as needed. Inspects supplies in stock to detect those requiring repair or cleaning. Repairs torn or damaged supplies or sends them out to be repaired. Issues new and clean supplies to players in exchange for those that are worn or dirty. Packs and unpacks supplies for road trips and ensures that arrangements are made for their transportation. Accompanies players on trips. Modifies protective supplies, for instance, by adding additional arch supports to shoes, padding uniforms and helmets. Assists in caring for injured players as directed.
 May prepare budget estimate for supplies, and purchase supplies. May wash soiled uniforms and other supplies in automatic washer or may arrange to have them laundered.

3715-122 AMUSEMENT-CONCESSION OPERATOR(amuse. & rec.) DPT:454
 GED: 3 SVP: 3 EC: B PA: L 4 5 7

Operates an amusement concession at carnivals, amusement parks or other places of recreation:
 Attracts attention of customers by calling out type of games and entertainment available. Provides customers with game equipment, such as toss-rings, balls, darts, firearms and ammunition. Demonstrates use of game equipment. Collects money and makes change. Cleans and repairs concession booth and maintains equipment. Arranges prizes on shelves of booth.
 May assemble and dismantle booth, and store prizes and equipment. May operate a particular type of concession booth and be designated accordingly; for example,
 Games-Booth Operator
 Shooting-Gallery Operator

3715-126 BILLIARD-PARLOUR ATTENDANT(amuse. & rec.)
DPT:367

pool-parlour attendant; racker.

GED: 3 SVP: 3 EC: 1 PA: L 4 5 7

Assigns tables to patrons in billiard parlour and collects fees:
Positions pool balls on table, using triangular rack. Supplies chalk to patrons. Cleans tables, using brush. Observes patrons to safe-guard against misuse of equipment. Places cues in cue rack, after game. Collects fees from players or writes fees on slips for collection at business desk. Keeps daily balance sheet of cash received.
May inspect cue tips and replace them, using knife and glue.

3715-130 ATTENDANT, RECREATIONAL FACILITY(amuse. & rec.)
DPT:368
GED: 3 SVP: 3 EC: B PA: L 5 6 7

Schedules use of golf courses, tennis courts, playgrounds and other recreational facilities in accordance with private or public-park rules:
Makes reservations for use of facilities by players. Schedules use of facilities to prevent players from interfering with one another. Settles disputes between groups or individual players regarding use of facilities. Enforces rules concerning dress, conduct and use of equipment.
May collect fees from players. May sell golf and tennis balls, golf clubs, tennis racquets and other sports equipment. May be designated according to particular sports activity; for example,
Golf-Course Starter
Playground Attendant
Tennis-Court Attendant

3715-134 BOWLING-ALLEY ATTENDANT(amuse. & rec.)
DPT:368
deskman, bowling alley.
GED: 3 SVP: 3 EC: 1 PA: L 4 5 6 7

Attends to desk at bowling alley to receive payment for games played, and issues scoresheets, rents bowling shoes and observes players to detect misuse of equipment:
Assigns bowling alleys to patrons and collects fees. Issues scoresheets and rents bowling shoes. Reserves alleys for bowling leagues or individuals. Inspects alleys and equipment to detect damage and to ensure that equipment is available. Observes patrons to ensure proper use of alleys and equipment. Records number of games played and fees collected, and keeps daily balance sheet of cash received.
May assign pin setters to work station, in non-automated alley, and record their worktime.

3715-138 SKI-LIFT ATTENDANT(amuse. & rec.)
DPT:465
ski-tow operator.
GED: 3 SVP: 3 EC: O PA: L 4 5 7

Tends gasoline, diesel or electrically powered ski-lift to transport skiers up slope or mountainside:
Pulls levers to start, stop, and adjust speed of lifts, such as rope-tow, chair-lift, T-bar, J-bar, or cage. Collects fares or punches daily or seasonal tickets of customers. Assists passengers on and off lift. Inspects lifts and ropes or cables to detect wear or damage.
May repair and maintain equipment and clear departure and arrival platforms of ice and snow.

3715-142 SECOND(amuse. & rec.)
DPT:674
GED: 3 SVP: 3 EC: 1 PA: L 3 4

Attends to needs of boxer or wrestler before, during and after match:
Sponges contestant's body with water. Gives him water to drink at proper time. Applies medications to cuts, bruises and other minor injuries. Applies and removes protective bandages to boxer's hands before and after match. Positions stool for boxer to sit on between rounds. Adjusts contestant's clothing as necessary. Gives massage to contestant after match.

3715-146 RIDE OPERATOR(amuse. & rec.)
DPT:664
GED: 2 SVP: 3 EC: O PA: L 4 5

Operates or informs patrons how to operate mechanical-ride devices at amusement park or similar place of amusement, by any one of the following methods:

1. Manipulates controls by moving levers and pressing buttons to start and stop equipment, such as roller coaster, merry-go-round, or ferris wheel. 2. Gives directions to patrons, usually over microphone, regarding safety and operation of conveyance, such as midget autos and speed boats. Turns on current to permit operation of conveyance by patron, and turns off current after allotted time. 3. Drives vehicle, such as miniature train on which persons ride, by controlling its speed. May direct or assist patrons on and off vehicle and ensure that belts, bars, or other safety devices are secure. May oil, refuel, adjust and repair equipment, using hand tools and test equipment, before opening riding equipment to patrons. May collect cash fares or tickets from patrons.

3715-150 FLOORMAN, BINGO(amuse. & rec.)
DPT:467
GED: 2 SVP: 2 EC: 1 PA: L 4 5 6 7

Verifies winning bingo cards to award prize or pay prize money to players holding winning cards:
Collects fee for participation in game and issues game cards to players. Listens for shouts or looks for waving arms of players who have winning cards. Compares numbers on card with numbers called, to verify winning cards. Gives prize or pays money to players holding winning cards.

3715-154 CADDIE(amuse. & rec.)
DPT:667
GED: 2 SVP: 2 EC: O PA: H 4 5 7

Carries golf bag and clubs around golf course for player, and hands club to player as requested:
Locates driven balls. Holds marker in or out of cup, as requested, while players putt. Replaces torn divot from fairway, tamping it in place with foot. Rakes sand in bunkers to smooth surface. Cleans clubs with cloth after each shot. Cleans balls, using ball cleaner or cloth.
May advise on selection of appropriate club for stroke, or concerning peculiarities of course.

3715-158 DRIVE-IN THEATRE ATTENDANT(amuse. & rec.)
DPT:667
GED: 2 SVP: 2 EC: O PA: L 4 5 7

Assists patrons at drive-in theatre by performing any combination of the following duties:
Stands at entrance of drive-in theatre to collect admission fees and purchases tickets for patrons. Directs patron to parking space. Patrols theatre on foot to prevent disorderly conduct, rowdiness or other infractions of rules.
May watch over children in playground during intermission.

3715-162 JOCKEY VALET(amuse. & rec.)
DPT:677
GED: 2 SVP: 2 EC: B PA: L 4 7

Assists jockey to prepare for race at racetrack:
Inserts lead bars into saddle to ensure that rider and equipment fulfill weight requirements. Carries saddle from equipment room to paddock. Places saddle, and saddle number on horse. Assists rider to mount horse. Returns equipment to equipment room after race, and cleans room.

3715-166 RIDE ATTENDANT(amuse. & rec.)
DPT:677
GED: 2 SVP: 2 EC: O PA: L 4 5 7

Assists patrons at amusement parks, carnivals and fairs to get on and off riding devices:
Erects barriers in front of rides, and admits specific number of patrons. Keeps order among patrons waiting to ride device. Fastens patrons' safety belts or bars to prevent injuries during ride. Assists children and elderly patrons on and off rides. Directs patrons from unloading platform to park grounds.
May collect tickets or cash fares. May clean and polish equipment and perform minor maintenance work, such as replacing light bulbs.

3715-170 GOLF-RANGE ATTENDANT(amuse. & rec.) DPT:684
GED: 2 SVP: 2 EC: B PA: L 3 4 7

Retrieves golf balls and cleans and washes golf balls and clubs at driving range:
Picks up golf balls from fairway by hand, or drives vehicle equipped with trailer that automatically picks up balls as it moves over fairway. Cleans golf balls by immersing them in revolving tumbler filled with soapy water to remove dirt, grass stains, and club marks. Removes and rinses washed balls. Applies cleaner, and buffs heads and shafts of golf clubs, using cloth or buffing wheel. Replaces golf balls in buckets and golf clubs in racks for use by driving range patrons.

3715-199 OTHER ATTENDANTS, SPORT AND RECREATION

This group includes sport and recreation attendants, not elsewhere classified; for example, those who set up pins in a bowling alley and store and issue items, such as baseballs and bats, and riding silks and saddles. Typical examples of occupational titles covered by this residual group definition are:

Bat Boy(amuse. & rec.)
Coloursman(amuse. & rec.)
Pin Setter(amuse. & rec.)

3719-OCCUPATIONS IN SPORT AND RECREATION, N.E.C.

This unit group includes occupations, not elsewhere classified, in the fields of athletics, sports and recreation. Hunting, fishing and mountaineering guides are classified in this unit group. Travel and museum guides are classified in Unit Group 6144, GUIDES.

3719-110 MOUNTAIN GUIDE(amuse. & rec.) DPT:167
alpine guide.
GED: 4 SVP: 7 EC: O 6 7 PA: VH 2 3 4 5 6 7

Organizes and conducts mountain-climbing expeditions for adventurers or tourists:
Assembles camping and climbing equipment, and arranges for transportation to site of ascent, and services of medical or other personnel as required. Selects area of ascent consistent with experience and endurance of members of climbing party. Leads party to site of ascent and during climb. Gives advice and instruction to climbing novices in accepted techniques and use of equipment.
May render first-aid to injured members of party as required.

3719-114 HUNTING AND FISHING GUIDE(amuse. & rec.) DPT:364
guide.
GED: 3 SVP: 6 EC: O PA: H 2 4 5 6 7

Plans itinerary for hunting and fishing trips, and guides and transports sportsmen to hunting and fishing areas:
Plans route that will afford best camping sites and hunting and fishing areas, utilizing knowledge of countryside and habits of game sought. Explains hunting and fishing laws, and ensures that laws are obeyed. Recommends to sportsmen suitable firearms or tackle for hunting and fishing. Drives motorboat or land vehicle to transport sportsmen to hunting and fishing areas. Paddles, poles, or rows water craft to transport sportsmen up and down fishing streams or through waterfowl habitats. Rides lead pony and guides members of group on

horseback to hunting and fishing areas. Gives first-aid to members of group in emergency. Provides or arranges for use of cabins and supplies needed by sportsmen. Prepares meals for members of group. Dresses or assists in dressing game killed by sportsmen and assists in carrying game out of woods.

May feed, water and care for animals. May be designated according to type of game sought; for example,
Fishing Guide
Hunting Guide

3719-118 DUDE WRANGLER(amuse. & rec.) DPT:667
GED: 3 SVP: 5 EC: O PA: H 2 4 5

Serves patrons of dude ranch to add to their enjoyment by performing any combination of the following duties:
Saddles and unsaddles horses adjusting equipment, as required for each guest. Assists guests to mount and dismount. Plans itinerary of trips, considering wishes and preferences of guests, knowledge of terrain, and location of suitable campsites. Packs supplies and provisions for extended overnight trips. Drives or leads pack-horses. Pitches camp, prepares fire, and aids in preparing meals. Advises guests concerning suitable hunting and fishing sites. Explains applicable hunting and fishing regulations.
May entertain guests by singing, telling stories, or playing guitar or other instrument. May participate in rodeos provided by ranch management for entertainment of guests.

3719-122 JOCKEY-ROOM CUSTODIAN(amuse. & rec.) DPT:668
GED: 2 SVP: 3 EC: I PA: L 5 6 7

Ensures that jockeys scheduled to ride are present in jockey room at racetrack, and that their dress and riding equipment meet track specifications:
Notifies jockeys when to dress. Inspects dress to ensure that they have correct colours, saddle numbers, and riding equipment. Informs track officials of riders who fail to appear for race. Maintains order in jockey room. Gives directions to workers to clean jockey room.

3719-126 GOLF-COURSE RANGER(amuse. & rec.) DPT:667
GED: 2 SVP: 2 EC: O PA: L 4 5 7

Patrols golf-course to prevent unauthorized persons from using facilities and to keep play running smoothly, either walking or using golf car:
Ensures that player's registration or green-fee ticket is valid. Prevents players from entering course beyond starting tee. Advises players to speed up or slow down to alleviate crowding. Marks damaged or hazardous areas for repair, using lime marker or stake. Cautions players against tearing up turf or abusing course. Returns lost equipment to owners or to clubhouse.
May administer first-aid or summon doctor to attend injured or ill players. May keep log of daily activities. May deliver urgent message to players on course.

3719-199 OTHER OCCUPATIONS IN SPORT AND RECREATION

This group includes sports and recreation workers, not elsewhere classified; for example, those who exhort the public to attend shows; guess the weight of patrons, at amusement parks, carnivals or similar places of entertainment; and patrol horse-race track on horseback during race to add colour to event and to assist in capturing runaway horses. Typical examples of occupational titles covered by this residual group definition are:
Barker(amuse. & rec.)
Outrider(amuse. & rec.)
Weight Guesser(amuse. & rec.)

CLERICAL AND RELATED OCCUPATIONS

This major group includes occupations concerned with recording, transcribing and typing data; composing correspondence; classifying and filing publications, correspondence and similar material; organizing and recording financial and other data into accounts and quantitative records; paying and receiving money; operating office machines and electronic data-processing equipment; storing, distributing and accounting for stores of materials; receiving clients and providing information; operating telephone switchboards; distributing mail and delivering messages; and performing other clerical duties. These occupations are classified in the following minor groups:

- 411 Stenographic and Typing Occupations
- 413 Bookkeeping, Account-Recording and Related Occupations
- 414 Office Machine and Electronic Data-Processing Equipment Operators
- 415 Material Recording, Scheduling and Distributing Occupations
- 416 Library, File and Correspondence Clerks and Related Occupations
- 417 Reception, Information, Mail and Message Distribution Occupations
- 419 Other Clerical and Related Occupations

411-STENOGRAPHIC AND TYPING OCCUPATIONS

This minor group includes occupations concerned with taking dictation, recording, transcribing and typing dictated or prepared material, and performing related clerical duties. These occupations are classified in the following unit groups:

- 4110** Supervisors, Stenographic and Typing Occupations
- 4111** Secretaries and Stenographers
- 4113** Typists and Clerk-Typists

4110-SUPERVISORS, STENOGRAPHIC AND TYPING OCCUPATIONS

This unit group includes occupations, as described under the master title, 01-250 SUPERVISOR/FOREMAN (any ind.), concerned with supervising and co-ordinating the activities of workers engaged in recording, transcribing and typing dictated or prepared material.

4110-110 SUPERVISOR, STENOGRAPHERS AND TYPISTS (clerical) DPT:138

Supervises and co-ordinates activities of workers engaged in recording, transcribing and typing dictated or prepared material, and other minor clerical duties, (Unit Groups 4111 and 4113); Performs duties as described under master title, 01-250

SUPERVISOR/FOREMAN (any ind.). Assigns secretaries and stenographers to executives, department heads and other officials, to take dictation and transcribe correspondence and memoranda. May keep a line count and analyze production records of completed work. May take dictation and type letters and reports of a confidential nature. May interview and test job applicants for stenographic and typing jobs and recommend on hiring.

4110-114 SUPERVISOR, TELETYPEISTS (clerical) DPT:138

Supervises and co-ordinates activities of workers engaged in transmitting or receiving messages by telex, teletype and telegraphic typewriter, (Unit Group 4113); Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

4111-SECRETARIES AND STENOGRAPHERS

This unit group includes occupations concerned with taking dictation by shorthand writing, transcribing data by typewriter from shorthand notes or dictating machine, making appointments, answering telephone calls, and performing general office duties. Corporate or executive secretaries are classified in Unit Group 1179, OCCUPATIONS RELATED TO MANAGEMENT AND ADMINISTRATION, N.E.C.

4111-110 SECRETARY(clerical) **DPT:364**
secretarial stenographer.
 GED: 4 SVP: 6 EC: I PA: S 4 5 6 7

Schedules appointments, gives information to callers, takes dictation and relieves employer of clerical work and minor administrative and business details, performing any of the following duties: Reads and routes incoming mail. Locates and attaches appropriate file to correspondence to be answered by employer. Takes dictation in shorthand or on stenotype machine, and transcribes on typewriter from notes or voice recordings. Composes and types correspondence. Files correspondence and other records. Answers telephone and gives information to caller, or routes call to appropriate official, and places outgoing calls. Schedules appointments for employer and reminds him when they are due. Greets visitors, ascertains nature of business and conducts visitors to employer or to appropriate person. Compiles and types statistical reports. Records minutes of meetings. May keep confidential personnel records. May arrange travel schedules and reservations. May be designated according to type of work performed; for example, Appointments Secretary, Legal Secretary, Medical Secretary, Social Secretary.

4111-114 COURT REPORTER(clerical) **DPT:364**
law reporter.
 GED: 3 SVP: 6 EC: I PA: S 4 5 6 7

Makes verbatim records of proceedings by shorthand writing or using shorthand-writing machine: Attends meetings, lectures, courts of law, parliamentary sittings and other proceedings, and makes verbatim records in rapid shorthand or using shorthand-writing machine. Reads portion of transcript during trial or other proceedings on request of judge or other official. Dictates shorthand notes to typist or into dictating machine or passes notes to stenographer for transcription. May perform typing duties. May attend a specific type of proceeding and be designated accordingly, Hansard Reporter.

4111-118 STENOGRAPHER(clerical) **DPT:384**
 GED: 3 SVP: 5 EC: I PA: S 4 6 7

Records various kinds of dictated or other matter in shorthand and makes a transcription in typewritten form: Records in shorthand by hand or shorthand-writing machine, dictated letters or other material. Types data from shorthand notes, written drafts, recording on dictating machine or other sources, and cuts stencils. Proofreads work for typographical and grammatical errors. Assembles and files correspondence. May perform a variety of clerical duties. May be designated by type of work performed; for example, Legal Stenographer, Medical Stenographer, Public Stenographer.

4113-TYPISTS AND CLERK-TYPISTS

This unit group includes occupations concerned with recording data by typewriter; transmitting or receiving messages by teletype; and performing general office duties most of which involve typing. Occupations concerned with transmitting and receiving messages by telegraph are classified in Unit Group 9553, TELEGRAPH OPERATORS.

4113-110 AUTOMATIC-TYPEWRITER OPERATOR (clerical) **DPT:584**

GED: 3 SVP: 4 EC: I PA: S 4 6 7

Operates one or more automatic typewriters that reproduce letters, reports and other typewritten material: Places perforated paper roll or tape that contains message to be reproduced on machine. Inserts stationery into carriage of typewriter and starts machine. Types manually such additional information as name, address, and date on letters. May reproduce letters composed of predesignated standard paragraphs by pushing button for each paragraph in sequence. May operate a perforating typewriter.

4113-114 TELETYPIST(clerical) **DPT:584**
telegraphic-typewriter operator; teletype operator; telex operator.
 GED: 3 SVP: 4 EC: I PA: S 4 6 7

Sends and receives messages, using telegraphic-typewriter: Turns on machine and types identifying code for station called, or acknowledges calls from other stations. Types outgoing messages when stations are connected. Reads incoming messages to detect errors, presses lever to stop transmission when messages are not clear or overlined, and types requests for clarification. Codes and decodes incoming messages, and enters date, time, and serial number on messages sent and received. Pastes message received on tape on paper forms. Keeps record of funds transferred and their disposition. Prepares entries to correspondent or branch accounts, to record transactions. May perform other typing and clerical duties. May be designated according to trade name of equipment used.

4113-118 TRANSCRIBING-MACHINE OPERATOR (clerical) **DPT:584**
dictating-machine transcriber.
 GED: 3 SVP: 4 EC: I PA: S 4 5 6 7

Transcribes letters, reports or other recorded data, using transcribing (voice reproducing) machine and typewriter: Positions record or tape on machine spindle and sets needle on record or threads tape through machine. Depresses pedal to rotate record or tape. Turns dial to control volume, tone and speed of voice reproduction. Types message heard through earphones. Reads chart prepared by dictator to determine length of message and corrections to be made. May tape unrecorded information such as name, address, and date. May keep file of records. May be designated according to type of machine operated.

4113-122 VARI-TYPE OPERATOR(clerical) **DPT:584**
 GED: 3 SVP: 4 EC: I PA: S 4 7

Types master copies, such as stencils, tracings, direct plates and photo-offsets on machine similar to typewriter with removable font (type) of various sizes and styles: Determines size of type, horizontal and vertical spacing and margins based on rough draft or specific instructions. Attaches fonts to type holder and attaches gear to platen to control spacing between lines. Moves lever to control spacing between characters. Sets stops to control right margin. May draw decorative or illustrative designs on copy. May cut out misspelled words, using razor, fasten corrected words to tape and insert them in cut out area.

4113-124 CLERK-TYPIST(clerical) **DPT:364**
 GED: 3 SVP: 3 EC: I PA: S 4 7

Performs general clerical work where majority of duties require use of typewriter: Compiles and types reports, bills, application forms, shipping tickets and other data from clerical records. Files records and reports, posts information to records, sorts and distributes mail, answers telephone and performs similar duties. May compute amounts of bills and accounts, using adding machine. May type on or from specialized forms.

4113-126 TYPIST(clerical) DPT:584
GED: 3 SVP: 3 EC: 1 PA: S 4 7

Types letters, reports, statements, stencils, forms, addresses or other straight copy material from handwritten manuscript, rough draft or corrected copy:
Assembles material and proofreads for typographical and grammatical errors.

May operate transcribing machine 4113-118 TRANSCRIBING-MACHINE OPERATOR (clerical). May perform clerical work; such as, verifying titles on report forms, indexing and filing correspondence, reports and other data. May be designated according to material typed,
Statistical Typist

413-BOOKKEEPING, ACCOUNT-RECORDING AND RELATED OCCUPATIONS

This minor group includes occupations concerned with classifying and recording information about monetary transactions or activities and transferring this data into accounts and quantitative records; paying and receiving money; performing duties of a clerical nature concerning insurance, banking, finance and real estate, and keeping statistical records. Accountants are classified in Unit Group 1171, ACCOUNTANTS AND AUDITORS AND OTHER FINANCIAL OFFICERS. BOOKKEEPING, ACCOUNT-RECORDING AND RELATED OCCUPATIONS are classified in the following unit groups:

- 4130 Supervisors, Bookkeeping, Account-Recording and Related Occupations**
- 4131 Bookkeepers and Accounting Clerks**
- 4133 Tellers and Cashiers**
- 4135 Insurance, Bank and Other Finance Clerks**
- 4137 Statistical Clerks**
- 4139 Bookkeeping, Accounting-Recording and Related Occupations, n.e.c.**

4130-SUPERVISORS, BOOKKEEPING, ACCOUNT-RECORDING AND RELATED OCCUPATIONS

This unit group includes occupations, as described under the master title, 01-250 SUPERVISOR/FOREMAN (any ind.), concerned with supervising and co-ordinating the activities of workers engaged in classifying and recording information about transactions or activities, interpreting this data into accounts and quantitative records, and paying and receiving money.

4130-110 SUPERVISOR, BOOKKEEPERS AND ACCOUNTING CLERKS(clerical) DPT:138

Supervises and co-ordinates activities of workers engaged in computing, classifying, posting and recording data to keep sets of accounts and other financial records, (Unit Group 4131):
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).
May be concerned with a particular bookkeeping or accounting activity and be designated accordingly; for example,
Supervisor, Billing
Supervisor, Budget
Supervisor, Cost
Supervisor, Payroll

4130-114 SUPERVISOR, CASHIERS(clerical) DPT:138

Supervises and co-ordinates activities of workers engaged in receiving and disbursing money, (Unit Group 4133):
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.). Records daily overage or shortage in cash receipts. Requisitions additional cash as required for daily operations.

4130-118 SUPERVISOR, INSURANCE, BANK AND OTHER FINANCE CLERKS(bank. & finance; insur. & real estate) DPT:138

Supervises and co-ordinates activities of workers engaged in occupations of a clerical nature concerned with insurance, banking, finance and real estate (Unit Group 4135):
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

4130-122 SUPERVISOR, STATISTICAL CLERKS (clerical) DPT:138

Supervises and co-ordinates activities of statistical clerks engaged in compiling and tabulating statistics to assist in the interpretation of statistical studies, (Unit Group 4137):
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

4130-126 HEAD TELLER(bank. & finance) DPT:138
GED: 4 SVP: 8 EC: 1 PA: L 4 5 6 7

Supervises and co-ordinates activities of workers engaged in receiving and paying out money, maintaining bank and customers' records, and preparing and distributing customers' bank statements, (Unit Group 4133):
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.). Explains banking services available to prospective customers and assists them in preparing application forms and establishing depository arrangements. Answers telephone, correspondence and counter enquiries and adjusts customers complaints. Reviews charges to be made against accounts for bank services and ensures these charges are correctly posted. Supervises the preparation and distribution of customers' bank statements, reconciliation of account differences and reports on status, value and cost of handling individual accounts. Approves cheques for encashment. Accepts stop payment orders and flags accounts to prevent withdrawals and payment of cheques. Ensures that an adequate supply of cash is held by 4133-110 TELLER (bank. & finance) based on legal requirements and business demands.
May consolidate and balance reports, using adding machine. May be

designated by work performed or by type of account maintained and classified accordingly; for example,
Supervisor, Current Accounts
Supervisor, Customer Accounts
Supervisor, Savings Accounts

4130-130 ASSISTANT ACCOUNTANT, BANK(bank. & finance) DPT:168
GED: 4 SVP: 5 EC: 1 PA: S 4 5 6 7

Co-ordinates activities of personnel in one or more departments of a bank, such as savings, current account, foreign exchange, cash clearing, credit or proof, performing any combination of the following duties:

Directs workers in the compilation of bank records, such as ledgers, diaries, registers and journals. Initiates or replies to department correspondence on matters, such as credit, business development and loans. Reviews and signs correspondence originated by sub-ordinates and prepares correspondence for signature by senior staff. Attends to customers telephone and counter enquiries on services provided by bank. Transacts business with customers at counter, such as authorization of cheques for encashment, opening new accounts and sale of money orders. Audits and spot checks 4133-110 TELLER (bank. & finance) holdings and other work by department personnel to ensure defalcations are prevented. Trains new employees and rotates personnel within the department.

May authorize loans up to established limit set by management. May lock up 4133-110 TELLER (bank. & finance) holdings nightly. May be designated according to department supervised; for example,
Assistant Accountant, Credit
Assistant Accountant, Current Accounts
Assistant Accountant, Foreign Exchange
Assistant Accountant, Proof-Clearing
Assistant Accountant, Savings

4130-199 OTHER SUPERVISORS, BOOKKEEPING, ACCOUNT-RECORDING AND RELATED OCCUPATIONS

This group includes bookkeepers and account-recording supervisors, not elsewhere classified; for example, those who supervise and co-ordinate activities of workers engaged in measuring land acreage; checking attendance at amusement and sporting events; compiling demurrage, freight and wharf charges; selling and cashing winning parimutuel tickets for patrons at race tracks; and collect tolls at toll bridges. Typical examples of occupational titles covered by this residual group definition are:

Supervisor, Credit Clerks(clerical)
Supervisor, Merchandising Clerks(clerical)
Supervisor, Parimutuel-Ticket Sellers and Cashiers(amuse. & rec.)
Supervisor, Toll-Bridge Attendants(clerical)
Supervisor, Wharf Clerks(clerical)
Toll Captain(clerical)

4131-BOOKKEEPERS AND ACCOUNTING CLERKS

This unit group includes occupations concerned with computing, classifying and recording data to keep sets of financial records; verifying accuracy of records related to payments, receipts and other transactions; posting entries in ledgers; balancing books, and compiling reports. Occupations concerned primarily with operating bookkeeping machines, computing machines and account-recording machines are classified in Unit Group 4141, OFFICE MACHINE OPERATORS.

4131-110 ACCOUNT-INFORMATION CLERK(elec. power) DPT:367
GED: 4 SVP: 6 EC: 1 PA: S 4 5 6 7

Keeps accounting records and compiles information requested by customers and others, relating to customer accounts:
Keeps records or corrects and completes computer records, and prepares report of meters registering use of gas or electric power. Prepares lists and enters charges and payments to customers' accounts

for additional deposits, special and irregular charges, or prepares records of corrections for computer processing. Reviews accounts not billed and prepares bills from available information. Enters, in meter books, information such as meter test reports and missed meter readings, received too late for billing. Processes final bills that exceed amount of deposit to enter amount of net bill. Interviews public to answer inquiries and complaints pertaining to bills, customer deposits and accounts. Answers inquiries by mail and investigates accounts rejected by computer to locate errors.

4131-114 BOOKKEEPER(clerical) DPT:384
GED: 4 SVP: 6 EC: 1 PA: S 4 7

Keeps complete records of financial transactions of establishment or undertaking:

Verifies accuracy of documents and records relating to payments, receipts and other financial transactions, and makes necessary calculations. Makes and checks entries from items, such as sales slips, invoices and cheque stubs, and totals ledgers at regular intervals. Compiles reports at specified intervals to show items; such as, receipts, payments, balances of accounts owing to or by the establishment or undertaking, and other financial information.

May prepare financial statements and accounts for the year or other specified period, calculate and arrange payment of wages, prepare and mail statements of accounts to customers, and perform various tasks related to bookkeeping.

4131-118 PAYROLL CLERK(clerical) DPT:464
GED: 4 SVP: 5 EC: 1 PA: L 4 7

Computes wages and posts wage data to payroll records:

Computes earnings from time sheets and work tickets, using calculator, or comptometer. Operates posting machine to compute and subtract deductions; such as, income tax, unemployment and other insurance, union payments and bond purchases. Enters net wages on earnings- record card, cheque stub and payroll sheet. Computes wages for employees working on bonus, commission, or piecework systems.

May keep records of sick leave, pay and non-taxable wages. May distribute pay cheques to employees or to department heads, settle payroll disputes and be designated accordingly,
Paymaster

4131-122 BILLING CLERK, UTILITIES(elec. power) DPT:468
GED: 3 SVP: 6 EC: 1 PA: S 4 7

Computes power factor and net amount of electric power or gas consumed by customers, performing any combination of the following duties:

Enters information on record forms for billing purposes. Maintains files on accounts, such as street lights, school boards, irrigation and various non-taxable provincial and federal offices, which require special attention for control and billing. Determines peak-load demand to verify application of appropriate rates. Notifies accounting section of variations from normal consumption for large electric and gas consumers which may affect revenue and consumption forecasts. Answers inquiries from customers, explaining such matters as rates, computation of bills, methods of metering, power factors and surcharges. Reads and resets certain meters in emergency or to settle disputes over meter readings.

May compile data for statistical reports. May analyze rates for large consumers of gas and electric-power.

4131-126 COST CLERK(clerical) DPT:388
cost-accounting clerk; cost-estimating clerk.
GED: 4 SVP: 5 EC: 1 PA: S 5 7

Calculates wage, material, overhead and other operating costs of an establishment:

Confers with plant production or other supervisory personnel to select machines or material for possible use in constructing and installing equipment or in manufacturing product. Reads tables to estimate cost of each production operation. Calculates individual items, such as labour, material and time costs, using calculating machines. Compares physical inventories with unit costs. Adjusts ledger entries to bring records up to date. Examines records, such as time and production sheets, payrolls, operations, charts and schedules to obtain data for calculations. Computes depreciation costs, using standard rates and

assigns costs to appropriate accounts. Maintains ledgers and records to account for inventories and assignment of plant expenditures. May be concerned with a specific type of costing and be designated accordingly.

4131-130 FOOD CONTROLLER(cater. & lodg.) DPT:468
GED: 4 SVP: 5 EC: I PA: S 4 7

Computes amounts and costs of food bought and sold from cashier's records and other summaries:
Calculates profit or loss on each item of food sold in restaurant and in each department of restaurant, using calculating machine. Compiles reports of food and beverages sold.
May compute amount and cost of liquor and other beverages bought and sold and be designated accordingly,
Food-and-Beverage-Control Clerk

4131-134 ACCOUNTING CLERK(clerical) DPT:484
GED: 4 SVP: 5 EC: I PA: S 4 7

Performs variety of routine calculating, posting and typing duties to accomplish accounting:
Posts details of business transactions; such as, allotments, disbursements, remittances paid and due, cheques and claims. Totals accounts, using adding machine.
May compute, using calculating machine, and record interest charges, refunds, cost of lost or damaged goods, and similar items. May type vouchers, invoices, account statements, payrolls, periodic reports and other records. May verify accuracy of invoices and notify those responsible for discrepancies. May prepare debit and credit adjustment to correct erroneous invoices.

4131-138 AUDIT CLERK(bank. & finance; clerical) DPT:384
GED: 3 SVP: 5 EC: I PA: S 4 7

Verifies accuracy of figures, calculations and postings pertaining to business transactions recorded by other workers and compiles reports:
Examines items, such as interest and accounts payable to verify accuracy of recorded data. Compiles and checks daily journal sheets from various departments to recapitulation sheet and posts information to general ledger. Corrects errors or lists discrepancies for adjustment. Computes percentages and totals and compares results of computation with recorded entries, using adding machine or calculator. Compiles reports for auditors to expedite auditing of accounts.
May perform a particular audit function and be designated accordingly; for example,
Charge-Account-Audit Clerk
Journal-Entry-Audit Clerk

4131-142 BOOKKEEPING CLERK(clerical) DPT:388
GED: 4 SVP: 4 EC: I PA: S 4 7

Maintains records of one phase of an undertaking's or establishment's financial transactions, or performs limited bookkeeping functions:
Verifies accuracy of relevant documents and makes necessary calculations. Makes and checks entries and totals ledgers, balancing them at regular intervals. Classifies items on invoices and indicates accounts to which they should be charged. Examines and approves items for payment.
May compile statistical reports. May keep a particular section of bookkeeping records and be designated accordingly; for example,
Accounts-Payable Clerk
Accounts-Receiveable Clerk

4131-146 BUDGET CLERK(clerical) DPT:384
GED: 3 SVP: 5 EC: I PA: S 4 7

Prepares budgets based on previous budget figures or estimated revenue and expenses:
Reviews records of sales and actual operating expenses; such as, payrolls and material costs. Compiles tables of revenues and expenses to show current budget status. Examines and stamps approval on buying requisitions, for federal and provincial taxes. Checks requisitions for proper cost-coding information, and checks invoices to ensure proper stamping. Prepares charts and graphs and tabulates statistical data for presentation in miscellaneous budget reports.
May prepare financial statement showing profit and loss.

4131-150 BALANCE CLERK(clerical) DPT:384
GED: 3 SVP: 4 EC: I PA: S 4 7

Calculates, verifies and compares balances of one record book with prior balances of same or other record books:
Adds debit and credit items on ledger and journal sheets, using adding machine. Compares totals and subtracts to obtain balance. Examines individual items for errors in computation or transposition of numerals. Corrects errors or lists those to be corrected. Operates key-punch machine to post entries on tabulating cards.
May balance daily computer run to control sheet and check errors. May balance a particular type of account and be designated accordingly,
Accounts-Receiveable-Balancing Clerk

4131-154 BILLING CLERK(clerical) DPT:384
invoice clerk.
GED: 3 SVP: 4 EC: I PA: S 4 7

Prepares invoices and bills of lading:
Computes amounts due from records; such as, purchase orders, sales tickets and charge slips, using adding or calculating machine. Types invoices, listing items sold, amounts due, credit terms and date of shipment. Types bills of lading and lists weight and lot number of items sold, using specifications book.
May type credit memoranda to indicate returned or incorrectly billed merchandise. May check and mail invoices and accounts for collection. May interview credit account applicants. May telegraph shipping information to buyers. May file bills of lading, invoices and other shipping data to maintain records.

4131-158 TIMEKEEPER(clerical) DPT:388
time clerk.
GED: 3 SVP: 3 EC: I PA: S 4 7

Keeps daily record of arrival and departure of employees:
Reviews time sheets and time cards for completeness. Computes total time worked by employees, and posts to master time sheet. Transcribes hours worked by employees to appropriate job orders to facilitate pricing.
May locate workers on job at various times to verify attendance of workers on time sheet. May pay employees.

4131-162 POSTING CLERK(clerical) DPT:588
entry clerk; transfer clerk.
GED: 3 SVP: 3 EC: I PA: S 4 7

Records and examines business transactions in journals, ledgers, and on special forms, and transfers entries from one accounting record to another:
Records information, such as name, date, address, identification number, loan number, interest payments, price, errors in items charged, delinquent accounts, disposition of correspondence, purchase orders, and warrants or cheques, to provide current information.
May answer correspondence, and file certificates, file cards or other records. May operate calculating and adding machines.

4133-TELLERS AND CASHIERS

This unit group includes occupations concerned with receiving and disbursing money in industrial establishments, stores, banks, trust companies, credit unions and other financial institutions. Most of these occupations involve the use of adding machines, cash registers or change makers.

4133-110 TELLER(bank. & finance) DPT:367
GED: 4 SVP: 5 EC: I PA: L 4 5 6 7

Receives and pays out money, keeps records of money and negotiable instruments involved in various bank transactions, prepares bank statements and reconciles errors or discrepancies in bank records and accounts, performing any combination of the following tasks:
Receives cheques and cash for deposit, verifies amounts and examines cheques for endorsement. Enters deposits in customer's pass book or issues receipts. Draws ledger cards and attaches items, such as

cheques, deposit and withdrawal slips so daily entries may be posted to customer's account. Files ledger cards after entries have been processed and checked. Cashes cheques and pays out money after verifying signature, authorization and customer's balance. Places holds on accounts for uncollected funds and posts stop payment notices. Orders supply of cash to meet daily requirements and counts incoming cash. Prepares customer's bank statements. Mails statement together with cancelled cheques to customer or hands it to customer personally and obtains receipt. Cancels cheques, using stamp or perforating machine, and files cancelled cheques. Maintains customer's signature files. Takes orders for imprinted cheques. Computes service charges on customer's account and accepts payments for utility bills and other accounts. Answers customer's enquiries in person or by telephone and reconciles discrepancies in records and accounts.

May operate various types of office machines; such as, adding machines, posting machines and typewriters. May sell domestic exchange, travellers' cheques, cashiers' cheques, drafts, money orders and buy and sell foreign currency. May explain banking services available to prospective customers and assist them in preparing application forms. May type and file list of new accounts. May be concerned with a specific activity or area of work and be designated accordingly; for example,

Teller, Current Account
Teller, Paying and Receiving
Teller, Savings Account

4133-114 FOREIGN-EXCHANGE TELLER(bank. & finance) DPT:367

GED: 4 SVP: 5 EC: I PA: L 4 5 6 7

Opens and services foreign-deposit accounts:

Determines service charges for cashing or handling cheques and makes entries on customers statements, account cards or deposit books. Sells drafts, transfers, travellers cheques and certificates of deposit drawn on foreign banks and mails confirmation of orders. Buys and sells foreign currency based on current rate of exchange. Counts and bundles foreign currency parcels for delivery to other banks. Maintains records and files on data, such as foreign items bought and sold, foreign draft advices and specimen signature cards of personnel in foreign correspondent banks with signing authority. Answers telephone and counter enquiries regarding foreign-exchange rates.

4133-118 CASHIER(clerical) DPT:464

GED: 3 SVP: 4 EC: I PA: S 4 5 7

Receives and records cash from customers in establishments, such as stores, restaurants and theatres:

Scans purchases; such as, groceries in retail store or tray of food in cafeteria. Tabulates bill using cash register and presents bill to customer for payment, or states amount of bill, and accepts payment. Gives change and issues receipts or tickets as required. Keeps records of amounts received and paid and reconciles cash balance with records. Wraps or places merchandise in bags or boxes.

May be concerned with a particular activity and be designated accordingly; for example,

Cashier, Cafeteria
Cashier, Dining Room
Cashier, Groceteria
Cashier-Wrapper

4133-122 CASHIER, OFFICE(clerical) DPT:464

GED: 3 SVP: 4 EC: I PA: S 4 5 6 7

Receives money from customers or employees in payment for goods and services, disburses funds and records amounts received:

Computes bill using adding machine or cash register. Receives money from customers or through mail. Makes change, counts money and issues receipts for funds received. Endorse cheques, lists and totals cash and cheques, and prepares bank slips for deposit. Withdraws cash from bank and keeps custody of cash fund. Disburses cash and writes vouchers and cheques in payment of company expenditures. Posts data to accounts, and balances receipts and disbursements. Compiles collection, disbursements and bank reconciliation reports.

May be concerned with a specific activity or work location and be designated accordingly.

4133-126 MONEY COUNTER(clerical) DPT:487

GED: 3 SVP: 4 EC: I PA: L 4 7

Counts and issues money for use in sales department, at race track or other place of amusement:

Makes change and cashes cheques for patrons from sales floor or place of amusement. Counts and issues money to ticket sellers and cashiers ensuring that there is sufficient supply to make change or pay patrons. Counts money in cash registers and balances cash against total sales. Keeps record of cash sales and accrued taxes. Verifies records of workers accepting or paying out cash on wagers by counting and recording number of parimutuel tickets cashed.

4133-130 CASHIER, BOX OFFICE(clerical) DPT:467

GED: 3 SVP: 3 EC: I PA: S 4 5 6 7

Sells tickets for admission to places of entertainment, such as skating rinks, ball parks, stadiums, race-tracks and motion-picture theatres:

Depresses key on ticket-dispensing machine that automatically ejects number of tickets requested by patron, or tears tickets from roll and hands to patron. Accepts money and makes change. Answers questions concerning admission prices, picture and game schedules, and gives information concerning coming attractions. Keeps daily-balance sheet of cash received and tickets sold. Fills reservations for seats by telephone or mail.

May be concerned with a particular activity and be designated accordingly,
Ticket Seller

4133-134 CASHIER, CUSTOMER SERVICE(ret. trade)

DPT:467

GED: 3 SVP: 3 EC: I PA: L 4 5 6 7

Cashes cheques for customers and monitors check-out stands in self-service store:

Cashes personal and payroll cheques. Provides information to customers. Receives customers' complaints and resolves complaints when possible. Monitors check-out stand to reduce customer delay. Calls additional workers to stands when situation warrants. Issues cash to stands and removes excess cash. Audits cash register tapes.

May compile reports, verify employee time records and prepare payrolls.

4133-199 OTHER TELLERS AND CASHIERS

This group includes tellers and cashiers, not elsewhere classified; for example, those who collect tolls at toll-bridges, and sell and cash winning parimutuel tickets for patrons at race tracks. Typical examples of occupational titles covered by this residual group are:

Parimutuel-Ticket Cashier(amuse. & rec.)
Parimutuel-Ticket Seller(amuse. & rec.)
Toll Collector(clerical)

4135-INSURANCE, BANK AND OTHER FINANCE CLERKS

This unit group includes occupations, of a clerical nature, concerned with insurance, banking, finance and real estate. Activities include: reviewing insurance applications; calculating premiums, dividends and cash-surrender values; making insurance policy changes; processing applications for loans and mortgages; checking ledgers, renting safety-deposit boxes, and recording security deposits; and compiling rental, sale or management data related to real estate.

Insurance Clerks

4135-110 through 4135-162

4135-110 GENERAL CLERK, INSURANCE(insur. & real estate) DPT:264
GED: 4 SVP: 6 EC: 1 PA: S 4 7

Carries out clerical functions incidental to the transaction of life, fire, marine, automobile or other type of insurance, by performing any combination of the following duties:

Issues, receives and checks insurance application forms. Arranges for medical examinations of applicants for life insurance and for surveys of property to be insured, or obtains necessary documentary evidence. Calculates premiums, surrender or loan value of policies, using calculator and rate book, and commissions payable, and makes written requests for outstanding premiums. Changes insurance coverage as requested and calculates revised premium. Analyzes claims, computes amounts due or proposes settlement terms.

4135-114 POLICY-CHANGE CLERK(insur. & rel. estate) DPT:268
GED: 4 SVP: 6 EC: 1 PA: S 4 5 6 7

Changes insurance policies as requested by policyholder or his agent and provides information concerning policies:

Performs duties similar to those of 4135-110 GENERAL CLERK, INSURANCE (insur. & real estate). Specializes in effecting policy changes. Reviews original application and company documents, and complies with company or government regulations to effect proposed changes in beneficiary or methods of premium payment, increases in principal sum or changes in type of insurance. Compiles data on lapsed insurance policies to determine if they can be automatically reinstated according to company policies. Calculates commission adjustments, new reserve requirements, and premium revisions, using rate books, statistical tables and knowledge of specific types of policies. Sends out notice of reinstatement approval or denial, and amount of payment due. Corrects company records to adjust errors. May compute loan surrender value of life insurance policies, cancel insurance policies or prepare answers to requests for information and be designated accordingly.
Policyholders'-Information Clerk

4135-118 PROPERTY AND EQUIPMENT INSURANCE CLERK (clerical) DPT:387
GED: 4 SVP: 6 EC: 1 PA: S 4 7

Compiles insurance records and collates premium payments in an industrial or other organization:
Keeps calendar of premiums due and expiration date of policies. Prepares vouchers for payment of premiums, and verifies that payments have been made. Fills in data on renewal-policy applications and forwards them to insurance company. Compiles statistical data for reports to insurance company and departments in organization. Notifies insurance company of changes in property or equipment affecting insurance coverage. Writes amortization schedules. May dictate letters to insurance companies and other establishments, using dictating machine.

4135-122 SPECIAL-ENDORSEMENT CLERK(insur. & real estate) DPT:388
GED: 4 SVP: 6 EC: 1 PA: S 4 7

Drafts election to basic life insurance agreement consistent with company and legal requirements to denote method of payment to beneficiary:

Reviews insured's request and examines basic policy to determine modifications required in basic agreement. Dictates text of modifying agreement to be appended to basic policy. Approves payments of insurance, annuities and pensions to retired personnel. Prepares supplementary contracts covering payments. Prepares and dictates correspondence.

4135-126 ACTUARIAL CLERK(insur. & real. estate) DPT:384
GED: 4 SVP: 5 EC: 1 PA: S 4 7

Performs actuarial computations, using algebra and trigonometry and compiles charts and graphs for use in actuarial studies:

Computes actuarial data, such as annuity payments, amount of risk, profit margins, premium rates and employee contributions to retirement plans, using calculating and adding machines, actuarial formulas, statistical tables, insurance-rate books and previous

calculations. Compiles results of calculations into charts and graphs to be used in actuarial studies.

May index and file records of rates, formulas and tables used. May keep work journal. May perform other non-actuarial statistical studies.

4135-130 REINSURANCE CLERK(insur. & real estate) DPT:484
GED: 4 SVP: 5 EC: 1 PA: S 4 7

Calculates reinsurance liability, and types reinsurance applications and contracts performing any of the following duties:

Calculates reinsurance required on each risk covering limit of liability. Selects reinsurers who may accept part of ceded liability. Types applications and computes amount of each premium due, using calculating machine. Accepts reinsurers and their liability for cash values and dividends. Receives insurance application from prime insurer. Types notice of acceptance or rejection based on limit of liability, and action of insurance underwriters. Updates reinsurance file cards to maintain company records. Types statements of reinsurance ceded, and reinsurance payments and receipts for policyholders.

4135-134 INSURANCE CLERK, BANK(bank. & finance) DPT:268
GED: 3 SVP: 5 EC: 1 PA: S 4 7

Places and renews insurance on bank's property or premises, keeps records of bank-owned insurance and fire insurance, and analyzes adequacy of insurance coverage:

Examines contract purchases and leases to determine insurance requirements. Orders public liability and property damage policies on all property from which bank's liability might result. Evaluates risks involved in moving bank valuables to determine insurance coverage required. Approves shipment of valuables in excess of branch bank's standing instructions and adjusts insurance coverage accordingly. Reviews policies to ensure bank's interests are guaranteed and adequate. Arranges transfer or cancellation of coverage upon disposal of property. Records accident reports and notifies insurance company. Reviews policies for cancellation or expiration dates, and recommends raising or lowering coverage according to present or anticipated requirements. Keeps records of bank owned insurance. Files claims against insurance companies for various types of losses. Initiates and replies to correspondence pertaining to routine insurance matters.

4135-138 WORKSHEET CLERK(insur. & real estate) DPT:387
GED: 3 SVP: 5 EC: 1 PA: S 4 7

Compiles abstract sheet (worksheet) used in preparing insurance documents, such as record files and insurance policies:

Compiles insurance data, such as age, occupation and address of applicant and spouse, type of policy, billing instructions and effective dates, from application, inspection reports and correspondence. Calculates premium rates, using rate book. Codes and records information on abstract sheet or master cards to guide other workers in preparing documents.

May type abstract sheet, master cards, policies, contracts for policy changes, lost policies and agreements, and specimen policies. May send and receive messages, using teletype machine.

4135-142 INSURANCE CHECKER(insur. & real estate) DPT:484
GED: 3 SVP: 5 EC: 1 PA: S 4 7

Verifies accuracy of applications for insurance and company records by performing any combination of the following duties:

Performs duties similar to those of 4135-110 GENERAL CLERK, INSURANCE (insur. & real estate). Specializes in checking insurance application and company records. Checks applications for completeness, compares computations on premiums paid, interest and dividends due with same data on other records. Proofreads printed material concerning insurance programs. Verifies computations on interest accrued, premiums due, and settlement surrender or loan values, using calculating machine.

May verify policyholder's name and age from birth certificate or from previous insurance policies with company. May train new employees. May check a specific type of work and be designated accordingly; for example,

Abstract Checker
Application Reviewer
Policy Checker

4135-146 EMPLOYEE-INSURANCE CLERK(clerical)

DPT:568

group-insurance clerk.

GED: 3 SVP: 5 EC: 1 PA: S 5 6 7

Keeps records of company group insurance policies; such as, life, hospitalization and workmen's compensation, and interviews employees regarding claims:

Interviews employees to obtain information concerning claims and explains benefits available, using insurance company literature and experience gained in processing past claims. Assists employees in completing claim questionnaires by reviewing them and pointing out omissions or inaccuracies. Explains insurance plan to new employees, writes date on application forms and forwards them to insurance company. Corresponds with physicians, hospitals and employees regarding claims. Files records of claims and fills out cancellation forms when employees leave company service.

4135-150 INSURANCE CLERK, HOSPITAL(medical)

DPT:364

GED: 3 SVP: 4 EC: 1 PA: S 4 5 7

Verifies hospitalization insurance coverage and computes benefits for patients in hospital:

Types on insurance assignment form data; such as, name of insurance company and policyholder, policy number and doctor's diagnosis. Telephones, writes, or wires insurance company to verify patient's coverage and to obtain information concerning extent of benefits. Computes total hospital bill showing amounts to be paid by insurance company and by patient. Answers patient's questions regarding statements accounts and insurance coverage.

4135-154 RATER, PREMIUM(insur. & real estate) DPT:388 premium and commission calculator.

GED: 3 SVP: 4 EC: 1 PA: S 4 7

Calculates amount of premium to be charged for various types of insurance, using rate book:

Selects premium rate based on information in case-record folder relating to type and amount of policy, and to risk factors, such as use and age of automobile, location and value of property or age of applicant. Adds premium rates of basic policy and endorsements to compute total annual premium. Records rates on worksheet from which policies will be typed.

May calculate commissions and sales credits. May operate calculating machine. May prepare government registration forms for new group policies. May maintain new group policy files and record cards.

4135-158 CLAIM CLERK(insur. & real estate) DPT:268

GED: 3 SVP: 3 EC: 1 PA: S 4 5 6 7

Analyzes insurance claims to determine extent of company's liability and settles claims with claimants according to policy provisions:

Performs duties similar to those of 4135-110 GENERAL CLERK, INSURANCE (insur. & real estate). Specializes in processing insurance claims. Compares data on claim application, death certificate or physician's statement with policy file and with other company records to ascertain completeness and validity of claim. Corresponds with agents and claimants or interviews them in person to correct errors or omissions on claim forms, and to investigate questionable facts. Pays claimant amount due.

May specialize in particular type of claim and be designated accordingly; for example,

Accident-and-Sickness Clerk
Death-Claim Clerk
Medical-and-Surgical-Claim Clerk
Total-Disability-Claim Clerk

4135-162 DIVIDEND CLERK(insur. & real estate) DPT:484 dividend-deposit-voucher quoter.

GED: 3 SVP: 3 EC: 1 PA: S 4 5 7

Keeps record of accruing dividends on insurance policies and calculates and records interest due on them:

Computes, balances and records credit dividends, interest on deposits,

and daily payments of interest to policyholders, using calculating machine. Records and files policyholders' payments, interest paid to policyholders and interest held in policyholders' accounts. Types annuity letters and paid-up certificates for forwarding to policyholders.

Bank Clerks

4135-182 through 4135-210

4135-182 UTILITY CLERK, BANK(bank. & finance) DPT:367

GED: 4 SVP: 6 EC: 1 PA: S 4 5 6 7

Performs any combination of the following duties in a bank while supplementing or replacing regular staff:

Receives cheques and cash for deposit, cashes and cancels cheques, pays out money to customers and keeps records of money and negotiable instruments. Sorts deposit slips and cheques, totals cheques and redirects them to proper accounts. Prepares clearing lists for distribution to drawee banks by listing, endorsing by machine and recapitulating totals. Prepares and distributes bank-account statements with cancelled cheques to customers and reconciles discrepancies in accounts. Types ledger cards, debit and credit forms. Updates signature cards. Posts debit and credit entries to customers' ledger cards, verifies all balances brought forward and records charges to customers' accounts for NSF cheques, over-drafts, and service charges. Buys and sells foreign currencies based on current rates of exchange and sells foreign drafts, transfers and travellers' cheques. Records balances and proves bank financial transactions. Accepts negotiable items, such as cheques, drafts, coupons and bonds for collection, keeps file on due dates, routes items for collection and records payments. Sorts, counts and wraps paper money and coin by denomination. Rents safety-deposit boxes and keeps relevant records, such as signature cards, rental files and vault access slips. Reproduces copies of, transit letters, outgoing cheques and machine tapes, using reproduction machine. Prepares listing of transit items, using adding machine. Proves daily transactions by comparing total on list with total on proof machine. Promotes sale of bank services and transacts business with customers at counter. Answers telephone, counter and mail enquiries. Assists customers in completing various bank forms.

May operate proof machine to sort, record and prove bank transactions. May assist in training new employees. May perform a specific type of activity or work in a specific area and be designated accordingly; for example,

Branch-Clearing Clerk
Discount Clerk
Ledger Clerk
Proof Clerk
Relief Clerk
Savings Checker
Sorting Clerk

4135-186 FOREIGN-REMITTANCE CLERK(bank. & finance)

DPT:368

GED: 4 SVP: 6 EC: 1 PA: S 4 7

Collects and settles foreign bills of exchange between branch bank and foreign correspondent banks:

Receives bills of exchange from branches to be endorsed and sent to correspondent bank. Prepares entries to foreign currency accounts to effect refunds to branches requesting them. Reconciles debits attached to incoming cash lists with duplicates of trading advices and journal slips. Records pertinent data and prepares batch sheet. Remits drafts to depositors on credit accounts. Verifies maturity dates of bills, dispatches them for collection and receives payment. Checks daily summary of transactions for outward foreign remittance. Corresponds with foreign depositors, checks and co-signs outgoing drafts and credit advices for accuracy and correct authorization. Audits entries to foreign bank accounts and daily entries to clearing-recapitulation sheets. Investigates outstanding items presented for payment for which settlement had not been received. Prepares commercial letters-of-credit and verifies accompanying documents before mailing to correspondent.

May adjust foreign funds accounts and be designated accordingly, Foreign-Currency-Accounts Adjuster

4135-190 RESERVES CLERK(bank. & finance) DPT:388
GED: 4 SVP: 6 EC: I PA: S 4 7

Compiles records of deposits, withdrawals, clearings and bank reserves:

Compiles running record of entries and checks balance with Bank of Canada daily statements. Charges or credits accounts following bank regulations. Keeps record of bank's balance with Bank of Canada by checking currency balance. Compiles and completes daily-reserve-comparative statement for bank executives showing factors, such as reserve ratios, and credit and debit of large customers. Prepares journal sheet showing gains and losses for clearing-house points or withdrawals from Bank of Canada. Classifies branch loans according to specified code, for listing on proof machine. Consolidates totals and number of loans under separate classifications. Posts specified accounts to General Ledgers. Compiles net reserve report for Inspector-General of Banks by applying reserve ratio to large loans.

4135-194 SECURITIES CLERK(bank. & finance) DPT:364
GED: 4 SVP: 5 EC: I PA: S 4 5 7

Records transactions of securities and attends to customers at the counter performing any combination of the following duties in a bank or trust company:

Fills out purchase applications, receives payments for securities purchased and issues receipts. Prepares transmittal papers or endorsements for securities sold to ensure payment, transfer and delivery. Records securities transactions including sales, purchases, exchanges and stock splits to maintain control of customers' accounts. Verifies data, such as description, signature, date of issue, accrued interest, payment date and amount due on securities received from other banks, trust companies or customers. Proves daily transactions, using calculating or adding machine. Sorts stocks, bonds, coupons and ownership certificates for distribution to other departments. Balances inventory of securities held by bank or trust company. Prepares cheques to pay bills in settlement of securities transactions and records cheques drawn and paid. Drafts replies to answer correspondence inquiries on security transactions from bank or trust company officials and customers. Prepares records and inventory sheets of securities held as collateral. Examines government bonds for negotiability and arranges for the cancellation of their registration at Bank of Canada, if necessary. Removes and delivers securities to and from vault and prepares vault-withdrawal orders at customers' request. Cancels coupons or bonds for which payment has been made, using cancelling machine. Acts as bank or trust company agent when auditors are examining securities held in vault. Collects, records and transmits incoming and outgoing registered mail. Ensures that securities are filed in security trucks and placed in vault at the close of each business day. May be in charge of securities in a small branch. May perform a specific task in a Head Office and be designated accordingly.

4135-198 CREDIT CLERK, BANK(bank. & finance) DPT:368
GED: 4 SVP: 5 EC: I PA: S 4 7

Keeps records of securities held by bank as collateral and receives and processes payments on loans granted by bank's credit or loan officers: Keeps records of customer's negotiable securities; such as, bonds, debentures and stocks held by bank as collateral. Keeps and reviews records of customer's non-negotiable securities, such as fire and life insurance policies, lien notes and contracts to ensure that bank's interest is guaranteed. Keeps records in diaries and ledgers of bank credit transactions, such as discount, home improvement, student and farm loans. Keeps daily liability register to record discounted notes and balance customers' overdrawn accounts. Receives cash payments at counter. Processes cheques or money orders received by mail and sends receipts to customers on request. Computes interest and payments, using adding machine or calculator. Compiles reports on status of bank loans over a fixed amount and on delinquent accounts. Adjusts incorrect credit charges billed to customers accounts. Initiates or replies to correspondence and answers telephone or counter inquiries relating to credit matters. May review personal or company requests for additional credit and advise management on desirability of granting credit. May supervise work of other credit department clerks. May be designated according to type of activity and classified accordingly; for example, Credit-Records Clerk Liability Clerk

4135-202 COLLECTION CLERK, BANKING(bank. & finance) DPT:368
GED: 3 SVP: 5 EC: I PA: S 4 5 6 7

Accepts cheques, drafts, coupons, notes, bonds and other negotiable instruments from other banks for collection, exchange and distribution of payments:

Prepares or reviews collection forms, such as transmittal letter and advice records. Maintains file on items with due dates. Routes collection items, record payments and issue receipts. Computes and deducts or adds new principal, interest, collection or discount charges, using calculating machine. Credits or remits proceeds and releases documents and instruments upon full payment. Processes foreign collections and bills of exchange. Writes letters to accompany collections sent by mail. Prepares commercial letters-of-credit and verifies all documents accompanying them to ensure they are in order before mailing to correspondent banks. Processes utility bills and mails receipts to applicable establishments.

4135-206 BANK-RECONCILIATION CLERK(bank. & finance) DPT:384
GED: 3 SVP: 5 EC: I PA: S 4 7

Reconciles total shown on company's bank ledger with total shown on company's bank statement:

Lists outstanding cheques, deposits not yet posted by bank, and service charges not yet posted on company records. Computes adjusted totals, using adding machine. Types vouchers, account statements, payrolls and periodic reports. Converts foreign currency figures into Canadian monetary equivalents, or domestic currency into foreign equivalents.

4135-210 SAFETY-DEPOSIT-BOX CUSTODIAN(bank. & finance) DPT:668
safety deposit-box clerk; vault attendant.
GED: 3 SVP: 4 EC: I PA: L 4 5 6 7

Rents safety-deposit boxes to bank customers and admits accredited persons to vault:

Interviews customer to obtain data for completion of rental contract and obtains customer's signature. Collects rental fee and writes receipt, or originates form to debit customer's account. Admits customer to vault, obtains signature and notes entry and exit times on access slip. Inspects customer's booth after customer is finished to ensure nothing has been left behind. Maintains safety-deposit records, such as signature cards, rental files and vault access slips. Orders replacements for lost keys, and repairs for safety-deposit-box locks. May read obituary columns in newspapers, and seal boxes of deceased customers until federal and provincial clearance has been obtained. May answer telephone inquiries and correspondence concerning safety-deposit boxes.

Other Finance Clerks
4135-230 through 4135-246

4135-230 PENSION-PLAN CLERK(clerical) DPT:268
superannuation clerk.
GED: 4 SVP: 5 EC: I PA: S 4 5 6 7

Analyzes, compiles and records pension-plan data, performing any combination of the following clerical duties:

Determines when employee should become a contributor to pension plan and specifies rate of contributions, by analyzing documents which outline nature of appointment and terms and conditions of employment. Provides estimate of cost of election for prior pensionable employment from service records or other documents. Processes cases involving transfer of funds and service credits under reciprocal agreements, and revocation of election at contributor's request. Notifies accounting department when employee deductions are to be discontinued. Communicates with interested parties, when verifying details, by writing, telephone or in person. Examines documents, writes summaries and recommends solutions of complex cases to supervisor. Prepares prescribed documents for payment of benefits to pensioner or beneficiary.

4135-234 REAL-ESTATE CLERK(insur. & real estate)

DPT:384

GED: 4 SVP: 5 EC: I PA: S 4 7

Compiles data concerned with rental, sale or management of real estate, performing any combination of the following duties:

Types copies of listings of real estate rentals and sales for distribution to trade publications and for use as reference data by other departments. Computes interest owed, penalty payment, amount of principal and taxes due on mortgage loans, using calculating machine. Holds in escrow collateral posted to ensure fulfilment of contracts in transferring real estate and property titles. Checks due notices on taxes and renewal dates of insurance and mortgage loans to take follow-up action. Sends out rent-due notices to tenants. Writes cheques in payment of bills due, keeps record of disbursements, and examines cancelled returned cheques for endorsement.

May compile list of prospects from leads in newspapers and trade periodicals to locate prospective purchasers of real estate.

4135-238 MORTGAGE CLERK(bank. & finance)

DPT:364

GED: 3 SVP: 5 EC: I PA: S 4 7

Performs any combination of the following duties to process loan applications for purchasers wishing to obtain building loans:

Interviews applicants for loans to obtain information for bank or loan company officials. Assembles, examines and processes applications for loans, appraiser's reports, construction plans, surveyor's certificates, credit ratings, realty tax data and fire insurance, for approval of bank or loan company officers. Records loan data on file cards and keeps files to guard against tax delinquencies and expiration of insurance policies. Types legal papers and other documents affecting title to real estate. Prepares and mails tax and insurance premium notices to remind customers of payments due. Draws up notes on conditions of agreements for inclusion by solicitor in mortgage papers, and obtains signatures on loan application forms.

4135-242 BROKERAGE CLERK(bank. & finance)

DPT:368

GED: 3 SVP: 5 EC: I PA: L 5 6 7

Processes securities and cheques in and out of brokerage or in investment-dealer's establishment, performing any combination of the following duties:

Gives information to customer by telephone regarding price of stock or market fluctuations. Receives telephoned or telexed buy or sell orders from broker and passes them to supervisor for required action. Reports details of executed order to designated employee. Totals daily transactions and summarizes effects on broker's holdings on journal sheets.

May make deliveries to and from banks and trust companies.

4135-246 MARGIN CLERK(bank. & finance)

DPT:388

GED: 3 SVP: 5 EC: I PA: S 4 7

Calculates margin requirements in broker's office:

Computes customer's equity (margin) in stocks purchased from original cost of stock and its present market value. Notifies supervisor if this equity is less than that required by the provincial Securities Commission or individual brokerage house. Records customer's transactions to show amount due for brokerage interest charges.

4137-STATISTICAL CLERKS

This unit group includes occupations concerned with compiling and tabulating statistics based on routine or special information, preparing reports on source material, and supplying factual information to assist in the interpretation of statistical studies.

4137-110 STATISTICAL CLERK(clerical)

DPT:384

GED: 4 SVP: 5 EC: I PA: L 4 7

Compiles and tabulates statistics for use in statistical studies:

Compiles statistics from source materials, such as production, sales, advertising, quality-control and test records, expense invoices, debit notes, merchandise budgets, bank records, time sheets and survey sheets and charts. Assembles and classifies statistics, following

prescribed procedures. Operates adding machine and calculator to complete statistical formulas. Verifies authenticity of source material. Maintains current account of hours worked by tradesmen on each project, checks manpower reports against manpower forecasts, and prepares analysis of manhours on completed projects showing original estimate and actual hours expended.

May maintain productivity and efficiency charts. May be designated according to type of statistics compiled; for example, Statistical Clerk, Advertising Statistical Clerk, Production

4139-BOOKKEEPING, ACCOUNT-RECORDING AND RELATED OCCUPATIONS, N.E.C.

This unit group includes occupations, not elsewhere classified, concerned with classifying, compiling and recording information, and transferring this data into accounts and quantitative records. Activities include: measuring advertising space and land acreage, checking attendance at amusement centres, preparing contracts and compiling demurrage, freight tonnage, and wharf charges.

4139-110 CONTRACT CLERK(clerical)

DPT:264

GED: 4 SVP: 7 EC: I PA: S 7

Examines contract documentation and processes its execution, performing any combination of the following clerical duties concerned with awarding or receiving contracts:

Receives tenders and security deposits from contractors, and provides them with plans and specifications. Ensures that documentation and contract files are available for processing. Routes contract documents to contractors and other interested parties, checking them at each stage to ensure that they have been correctly completed. Maintains diary of individual contracts to record progress, adherence to time schedules, and other information; such as, completion dates, renewals and changes in insurance coverage or bonding, consultants' and other agreements, and labour and material payments. Drafts correspondence for signature and types contract documents. Returns security deposits to contractors. Answers inquiries in person or by telephone from contractors and others concerning progress of contract.

4139-114 RATE REVIEWER(elec. power; utilities, n.e.c.)

DPT:388

GED: 4 SVP: 6 EC: I PA: S 4 7

Reviews electric, gas and transit rates, and compiles data pertaining to operating cost and revenues, performing any combination of the following duties:

Reviews rate investigation reports, analyses of billings and rate assignments for completeness and conformity to regulations. Proposes new rates and reviews and revises existing rates by observing those charged by other utility companies. Develops charges for individual customers or classes of customers, and calculates revenue to be obtained from new rates, using calculator. Draws graphs and charts using draughting instruments to illustrate changing trends, and keeps records of changes. Summarizes computer runs to answer requests for specific statistical information. Compiles data for reports pertaining to costs, revenues and volumes of gas and electricity consumed. May act as member of company rates committee as required.

4139-118 UTILITIES CLERK(elec. power; telecom.; utilities, n.e.c.)

DPT:367

GED: 4 SVP: 5 EC: I PA: S 4 5 6 7

Interviews prospective customers for gas, electric or telephone service and makes required reports, performing any combination of the following duties:

Interviews customer to explain plans available. Assists customer in filling out application or completes it for him. Reviews applications received by mail. Checks applicant's references by letter or telephone, and notifies customer of acceptance or rejection of credit. Determines charges, collects deposits, prepares changes of address records for electric power and telephone service, and files credit applications. Adjusts complaints concerning billing or service rendered. Checks

account-information registers to verify closed account data, and compares these with premises' records to locate discrepancies and ensure proper billing of customers. Communicates with agents or owners to ensure responsibility for payment of utility consumption between tenancies. Issues discontinuance of service orders when responsibility is refused. Forwards change of tenant applications to meter-recording section of office.

4139-122 CREDIT CLERK(clerical) DPT:368
GED: 4 SVP: 5 EC: I PA: S 4 5 6 7

Examines and processes application of individual applying for loan or credit:

Interviews customer and verifies credit references and other information, such as name, address and where individual is employed. Determines credit limit based on applicant's assets, credit experience and personal references. Summarizes, in prescribed form, information concerning loan or credit application and extracts pertinent data. Passes this information to approving authority. Monitors flow of credit applications to ensure adherence to lines of credit authorized by approving officer. Keeps record of credit transactions and payments and accepts payment of accounts. Computes interest and payments, using adding and calculating machine. Issues credit card to customer for use as identification when purchasing articles to be charged to his account. Keeps record of cards reported lost, checking off number on customer's account, and reissues new cards.

4139-126 TONNAGE-COMPILATION CLERK(water trans.) DPT:384
GED: 4 SVP: 5 EC: I PA: S 4 7

Calculates tonnage and prepares report of ship's cargo loaded or unloaded in port, for assessment of tariff for use of port or harbour facilities:

Reads register of merchant vessels compiled from master's inward and outward reports to verify tonnage, registry and ship's owner. Converts measurements of volume into tonnage. Calculates tonnage of each commodity from ship's manifest into revenue tons, calculates charges and types tariff form for service furnished such as pier and shed accommodation. Verifies conversions from one weight system to another. Prepares tonnage list for each commodity and submits list to accounting department. Prepares and sends billing request accompanied by revision sheet to district accounting department. Codes each item according to Dominion Bureau of Statistics classification system for statistical purposes. Verifies claims and makes adjustments of errors on customer's complaints. Keeps records of ships entering port, and tonnage of cargo loaded or unloaded. Submits reports to accounting department for billing purposes.

4139-130 INTERLINE-ACCOUNTS CLERK(air trans.; motor trans.; rail trans.) DPT:484
GED: 4 SVP: 5 EC: I PA: S 4 7

Computes freight charges payable to other railroads on interline business:

Examines waybills, to compute number of miles freight is transported by air, rail or road. Computes and records freight charges payable to each carrier, using basic rates from rate table and calculating machine. Reviews statements submitted by other companies to determine accuracy of amounts charged and to correct errors. Types and issues forms to trace missing waybills or revenues. Compiles monthly total of tonnage moved over various lines.

4139-134 FOREIGN-INVOICE CLERK(clerical) DPT:484
GED: 4 SVP: 4 EC: I PA: S 4 7

Computes duties, tariffs, weight, volume and price conversions of merchandise exported to or imported from foreign countries: Examines documents; such as, invoices, bills of lading and shipping statements to verify conversion of merchandise, weight or volumes into the system used by the other country. Converts foreign currency figures into Canadian money equivalents. Calculates duties or tariffs to be paid on merchandise, using comptometer. Classifies goods for duty purposes. Assists in making up customs entries. Allocates foreign exchange and duty charges among merchandise departments. May visit Customs Department to arrange clearance of transport vehicles and deliver necessary papers to customs personnel. May correspond with foreign companies regarding shipments.

4139-138 FREIGHT-RATE CLERK(clerical) DPT:368
traffic-rate clerk.
GED: 3 SVP: 5 EC: I PA: S 4 5 7

Determines rates and charges applicable to freight shipments: Examines shipping bills to obtain description of freight and classifies freight according to rate-book description. Consults rate schedule to obtain specific rate for each item classified depending on distance shipped. Computes total freight charges and records charges on shipping order. Calculates and records storage, redelivery and reconsignment charges when applicable. Answers inquiries from shippers regarding rates, routing and interline transportation procedures. Verifies and revises freight and tariff charges on bills for freight shipments, using freight and tariff rate schedules. Examines bills of lading and files claims with transportation companies for overcharges. Contacts transportation companies, using telephone or mail service to obtain supplements or amendments to tariff schedules. Compiles statistical reports; such as, rate quotations and instructions concerning division of business between companies. May keep record of freight movements.

4139-142 DEMURRAGE CLERK(rail trans.; water trans.) DPT:384
GED: 3 SVP: 5 EC: I PA: S 4 7

Compiles demurrage charges, using basic rates from rate tables: Reviews bills of lading to ascertain number of carloads or shipments, and computes demurrage charges, using basic rates from rate table, and adding machine. Checks demurrage charges on cars or ships that have overstayed their time. Prepares and types demurrage bill and forwards it to consignee or shipper. Prepares daily list of outgoing traffic, and sends it to Head Office. Sends in weekly report to Canadian Car Demurrage Bureau. Types and files correspondence and files duplicate bills for demurrage charges.

4139-146 WHARF CLERK(water trans.) DPT:384
GED: 3 SVP: 5 EC: I PA: S 4 7

Compiles reports, such as dockage, demurrage, wharfage and storage to ensure that shipping companies are assessed specified harbour fees: Compares ship's manifest with information on statements, records and reports to determine that weight, measurement and classification of commodities meet tariff regulations. Calculates tariff assessment from ship's manifest to ensure that charges are correct, using calculating machine. Prepares and submits reports to supervisor, using typewriter.

4139-150 RATE-REVISION CLERK, FREIGHT(motor trans.; rail trans.) DPT:388
GED: 3 SVP: 5 EC: I PA: S 4 7

Revises and compiles rate tables according to current tariff regulations by reviewing existing rates and making required changes: Reviews regulations governing established rates to determine required changes in freight rate charts. Computes and compiles rate manual sections according to rate revisions based on handling costs, merchandise transported, refrigeration required, load volume, business volume and potential return trip loads. May propose rates for activities not rated.

4139-154 CHART CLERK(clerical) DPT:484
GED: 3 SVP: 5 EC: I PA: S 4 7

Computes flow of oil or gas by means of charts taken from flowmeters and other recording instruments, using planimeter, and prepares statistical reports: Fastens chart to base of planimeter. Guides tracing point of planimeter around periphery of area on chart to be measured. Observes readings and calculates flow or quantity, using prescribed formula. Compiles statistical reports by filling in data on prepared forms.

MAJOR GROUP 41

4139-158-4140-114

4139-158 PLANIMETER OPERATOR(clerical) DPT:484
GED: 3 SVP: 5 EC: 1 PA: S 4 7

Traces boundary lines of land plots on aerial photographs to determine acreage, using planimeter:
Centers tracer point of planimeter arm on plot to be measured and places pivot arm at right angle to tracer point. Moves tracer point to starting point on photograph according to shape of area to be measured, and traces boundary until point of beginning is reached. Records figures shown on dial and measuring wheels of planimeter at beginning and end of tracing and subtracts figures from each other to determine quantities.

4139-162 ADVERTISING-SPACE MEASURER(print. & pub.) DPT:384
GED: 3 SVP: 4 EC: 1 PA: S 4 7

Measures amount of advertising space used in publications; such as, newspapers and magazines to determine advertising cost per item and prepares statement of customer's account:
Receives log, detailing account, name and location of advertisement in newspaper, from Advertising Display Section. Measures advertising space in newspaper by placingagate ruler over printed material. Refers to customer's contract to determine cost per line and computes total charges by extending number of lines by unit cost. Prepares statements, using billing machine. Files new or revised customer contracts.

4139-166 LAND MEASURER(clerical) DPT:487
GED: 3 SVP: 4 EC: 0 PA: L 4 7

Measures land, used for growing crops, to calculate acreage worked and to compute wages of workers or payments to contractors:
Visually divides irregularly shaped fields into geometrical sections. Calculates mean distances by measuring maximum and minimum

distances. Measures length and width of each section, using measuring sticks or tape. Computes land area to ascertain payment.
May sketch diagram of measured piece of land, indicate measurements and give to supervisor for calculation of exact acreages.

4139-170 CODING CLERK(clerical) DPT:388
GED: 3 SVP: 3 EC: 1 PA: S 4 7

Converts items of information, obtained from records and reports, into codes for processing by data typing or key-punch units, using predetermined coding systems:
Manually records alphabetic, alphanumeric or numeric codes for data; such as, debit notes, cheque issues and invoices in prescribed sequence on worksheet or margin of source document for transfer to punchcards or machine tape.
May prepare report of purchases from suppliers.

4139-174 CHECKER, ATTENDANCE(amuse. & rec.) DPT:387
GED: 2 SVP: 2 EC: B 2 4 PA: L 4 7

Records attendance at theatrical performances, motion picture shows or athletic events:
Tallies and records number of patrons entering entertainment establishment, using hand counter, to obtain information on which payment for services is based. Stands outside theatre entrance to record attendance at theatrical performances, motion picture shows or athletic events. Forwards tally sheet of patrons entering establishment to manager for verification against number of tickets sold.
May enter establishment as patron to assess attitude and performance of personnel, cleanliness and functioning of establishment, and report findings to manager.

414-OFFICE MACHINE AND ELECTRONIC DATA-PROCESSING EQUIPMENT OPERATORS

This minor group includes occupations primarily concerned with operating office machines and electronic data-processing equipment. These occupations are classified in the following unit groups:

- 4140 Supervisors, Office Machine and Electronic
Data-Processing Equipment Operators**
- 4141 Office Machine Operators**
- 4143 Electronic Data-Processing Equipment
Operators**

4140-SUPERVISORS, OFFICE MACHINE AND ELECTRONIC DATA-PROCESSING EQUIPMENT OPERATORS

This unit group includes occupations, as described under the master title, 01-250 SUPERVISOR/FOREMAN (any ind.), concerned with supervising and co-ordinating the activities of workers primarily engaged in operating office machines and electronic data-processing equipment for classifying, posting, computing, and transferring data; recording, extracting, comparing and reporting information; reproducing copies; preparing mail for distribution; and counting, wrapping and sorting coins. Supervisors of stenographic and typing occupations are classified in Unit Group 4110, SUPERVISORS, STENOGRAPHIC AND TYPING OCCUPATIONS.

**4140-110 SUPERVISOR, ELECTRONIC DATA-
PROCESSING EQUIPMENT
OPERATORS**(clerical) DPT:138

Supervises and co-ordinates activities of workers engaged in operating electronic and electro-mechanical machines that record, store, process and transcribe data from punch cards, paper and magnetic tape or

other sources, solve mathematical, engineering or technical problems, and keep records and supply data (Unit Group 4143):
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

**4140-114 SUPERVISOR, OFFICE-MACHINE
OPERATORS**(clerical) DPT:138

Supervises and co-ordinates activities of personnel engaged in operating, bookkeeping, billing, calculating, accounting, coding, duplicating, photocopying, embossing, addressing, folding and inserting, coin sorting, counting and wrapping, and other office machines, for recording, computing and classifying data about business transactions or activities; reproducing copies; preparing mail for distribution and performing other general office duties, (Unit Group 4141):
Performs duties as described under master title 01-250 SUPERVISOR/FOREMAN (any ind.).
May supervise workers engaged in operating a particular type of office machine, and be designated accordingly; for example,
Supervisor, Billing-Machine Operators
Supervisor, Blueprinting-Machine Operators
Supervisor, Bookkeeping-Machine Operators
Supervisor, Duplicating-Machine Operators

4141-OFFICE MACHINE OPERATORS

This unit group includes occupations primarily concerned with operating bookkeeping, billing, adding, calculating, accounting, coding, duplicating, photocopying, embossing, addressing, folding and inserting, coin sorting, counting and wrapping and other office machines, for recording, computing and classifying data about business transactions or activities; reproducing copies; preparing mail for distribution; and performing other general office duties. Occupations concerned with operating electronic data-processing equipment are classified in Unit Group 4143, **ELECTRONIC DATA-PROCESSING EQUIPMENT OPERATORS**, and typing occupations are classified in Unit Group 4113, **TYPISTS AND CLERK-TYPISTS**.

4141-110 BOOKKEEPING-MACHINE OPERATOR(clerical) DPT:384
accounting-machine operator.
 GED: 4 SVP: 5 EC: 1 PA: S 4 7

Records financial transactions of establishment, using bookkeeping machine:

Sorts documents to be posted; such as, cheques and debit and credit items. Selects and places bookkeeping form on writing surface of machine, and sets carriage. Depresses keys of machine keyboard to record identifying headings and data, and to calculate and post totals, net amounts, and other computations. Verifies entries, and summarizes and balances totals to ensure accuracy. Prepares periodic trial balances and other statistical information as required. Operates other office machines, such as adding and calculating machines.

May keep one phase or section of complete set of records pertaining to business transactions of establishment and be designated accordingly.

4141-114 CRYPTOGRAPHIC-MACHINE OPERATOR(clerical) DPT:584
 GED: 4 SVP: 5 EC: 1 PA: S 4 7

Operates cryptographic equipment to code, transmit and decode classified messages for law-enforcement agencies, diplomatic missions or other government services, and business organizations:

Types plain-text data on keyboard of manual or automatic machine which encrypts and transmits message, or on semi-automatic machine which converts plain text into taped code for transmission via teletype machine or other electronic device. Feeds incoming tape into decoding device on semi-automatic machine and distributes coded messages. Resolves garbled or undecipherable messages, using specified procedures and equipment or requests retransmission of messages.

May operate teletype or teleprinter equipment to transmit messages.

4141-118 PHOTOCOMPOSING-MACHINE-PERFORATOR OPERATOR(print. & pub.) DPT:584
 GED: 3 SVP: 5 EC: 1 PA: S 4 7

Operates keyboard of photocomposing-machine perforator that transcribes data onto tape by perforating it to permit composition of text by automatic-composing machine:

Inserts roll of tape in perforator magazine, clips copy in holder and pushes starter switch. Codes tape for photocomposing machine by turning indicator knobs to control counting mechanism, select line length, type font and film feed as specified on copy. Depresses keys on keyboard to spell out data in the form of perforations. Removes perforated tape from take-up spool of perforator.

4141-122 PROOF-MACHINE OPERATOR(clerical) DPT:384
clearing clerk.
 GED: 3 SVP: 4 EC: 1 PA: L 4 7

Sorts, records and proves records of bank transactions, such as cheques, deposit slips and withdrawal slips, using proof machine:

Examines items and depresses appropriate machine keys to sort items into various categories and simultaneously list amount of transaction on batch and master control tapes. Positions items in machine to be endorsed and grouped automatically. Totals tapes and locates, corrects and records errors. Operates equipment which photographs cheques and deposit slips. Examines film to assist in tracing lost items, using projector. Attaches tapes to sorted batches of cheques and prepares

recapitulation sheet. Proves deposits, cheques, debits and credits listed on batch sheet. Takes cheques, drafts and other items to clearing house for exchange or settlement.

May be designated according to trade name of machine used.

4141-126 AUDIT-MACHINE OPERATOR(clerical) DPT:484
 GED: 3 SVP: 4 EC: 1 PA: S 4 7

Adds sales slips, using electrically-powered auditing machine:

Computes subtotals for individual sales departments, and types of sales; such as, cash, charge, installment, and lay-away. Totals sales slips of returned items and subtracts from gross sales to determine net sales returns. Verifies daily or periodic balances against predetermined figures.

4141-130 BILLING-MACHINE OPERATOR(clerical) DPT:484
 GED: 3 SVP: 4 EC: 1 PA: S 4 7

Prepares statements, bills, and invoices to be sent to customers, itemizing amount customers owe, using billing machines with or without computing devices:

Inserts blank billing sheets in machine and sets carriage. Transcribes data from office records; such as, customer's name, address, and items purchased or services rendered. Calculates totals, net amounts, and discounts by addition, subtraction, and multiplication, and records computations.

May make computations on separate adding and calculating machines. May be designated according to type of bill prepared.

4141-134 CALCULATING-MACHINE OPERATOR(clerical) DPT:484
calculator operator.
 GED: 3 SVP: 4 EC: 1 PA: S 4 7

Computes and records statistical, accounting and other numerical data, using a machine that automatically performs mathematical calculations:

Presses keys of machine keyboard and manipulates levers to add, subtract, multiply, divide, or to obtain square roots. Posts results of calculations to forms or documents; such as, inventories, payrolls, invoices, test reports and statistical summaries.

May verify computations made by other workers. May be designated according to trade name of machine, type of computations made or subject matter.

4141-138 TYPESETTER-PERFORATOR OPERATOR(print. & pub.) DPT:584
perforator operator.
 GED: 3 SVP: 4 EC: 1 PA: S 4 7

Operates keyboard of typesetter-perforator machine to copy data from manuscript onto tape used for producing automatic type composition:

Secures roll of tape in machine magazine. Turns adjustment screws to set indicator scale that controls counting mechanism according to type size and width of line to be composed. Positions copy in copyholder and depresses specified keys on keyboard to punch tape. Observes justification pointers on indicator scale to determine when to end line. Removes completed roll of tape for delivery to teletype-setting machines. Transcribes editorial corrections, splices correction tape and feeds tape into computer that produces master control tape.

4141-142 CURRENCY SORTER(clerical) DPT:584
cash-clearing teller; silver teller.
 GED: 3 SVP: 4 EC: 1 PA: S 4 7

Sorts and counts paper currency, wraps and bags coins by hand or machine:

Verifies totals of cash parcels received from other banks, tellers and customers by sorting bills and coins by denomination. Inserts them in machine to be automatically counted, bagged or wrapped. Examines currency to detect counterfeit, mutilated or worn bills and coins. Prepares parcels of currency or coins together with accompanying documents for distribution to banks, tellers, customers or vault storage. Prepares large payrolls by sorting currency into required amounts. Operates adding machine to verify totals. Sorts bonds and bond coupons received from other banks, tellers and customers. Assists in preparing daily balances.

4141-146 DUPLICATING-MACHINE OPERATOR(clerical)
DPT:682
GED: 3 SVP: 4 EC: I PA: L 3 4 7

Operates machine that reproduces data from embossed plates on revolving cylinder or from original copy by one of the following methods:

1. Adjusts feeder and delivery side and bottom guides according to width and length of stock, slackening, moving and tightening guides in position, using wrench. Selects embossed plate or printing chase and sets it up on cylinder of machine. Loads paper in feed tray and adjusts parts; such as, inking rolls or ribbon and feeding mechanism. Starts machine that automatically pushes sheets under revolving cylinder or against flat impression bed of type where paper is printed. 2. Places master copy on end of machine and blank paper in feed tray. Adjusts machine for speed, size of paper and flow of process liquid to moistening pad. Starts machine that pulls blank sheets across moistening pad and transfers image from master copy onto copy sheet.

May type or draw diagram to prepare original copy. May keep record of number of copies made. May be designated according to type of machine operated.

4141-148 BLUEPRINTING-MACHINE OPERATOR(bus. serv.)
DPT:684
GED: 3 SVP: 4 EC: I PA: L 4 7

Operates machine to make copies (blueprints) of material; such as, documents or drawings:

Examines original copies for translucency. Selects sensitized paper according to colour of line specified in work order and positions original over paper. Moves controls to regulate light intensity and exposure time according to translucency of original and type of sensitized paper. Slides original and sensitized paper into machine to expose and develop print. Examines finished print for specified colour, intensity and sharpness of line. Pushes button to supply machine with potash or ammonia, or manually pours chemical into machine. Turns dial to adjust feed rate.

May make autopositive (negative) of original material by covering original with translucent-sensitized paper and coloured filter, and inserting it into machine. May keep record of prints made and issued to departments. May clean machine. May be designated according to trade name of machine operated; for example, Copyflex-Machine Operator Ozalid Operator

4141-150 MICROFILM-RECORDS SEARCHER(clerical)
DPT:684
microfilm operator.
GED: 3 SVP: 4 EC: I PA: S 4 7

Searches for and retrieves information from microfilm records: Finds film cartridge on roll by consulting alphabetical, numerical or some other form of index. Loads either cartridge or roll film manually into microfilm reader or reader-printer. Turns knob to feed film automatically into microfilm reader. Scans film to retrieve information. Records information from film or presses button to have copy made by machine.

4141-154 ADDING-MACHINE OPERATOR(clerical) DPT:484
GED: 3 SVP: 3 EC: I PA: S 4 7

Operates adding machine: Adds and subtracts figures, using electrically-driven or lever-operated machine that automatically computes and records results, usually on paper tape. Copies figures onto records or reports.

4141-158 ADDRESSING-MACHINE OPERATOR(clerical)
DPT:582
GED: 3 SVP: 3 EC: I PA: L 4

Operates machine that prints addresses, code numbers and similar information on items; such as, envelopes, accounting forms and advertising literature:

Positions plates in machine magazine and places articles; such as, envelopes, billings and lists to be addressed, into loading rack or tray. Sets flow of ink and adjusts guides to fit size of paper and sets stops and selectors so that only certain plates will be printed, using wrench

and pliers. Starts machine that automatically feeds plates through mechanism. Maintains plate file and operates typewriter or embossing machine to make corrections, additions, or changes on plates. May type statistical lists of plate files and correspondence concerning addressing jobs. May operate other office machines. May be designated according to trade name of machine operated.

4141-162 INTEGRATOR OPERATOR(clerical) DPT:584
GED: 3 SVP: 3 EC: I PA: S 4 7

Operates computing machine that integrates temperature, pressure and specific gravity readings to determine volume of gas flow through meters and pipelines of gas company, using meter charts:

Positions chart on chart plate. Starts machine to revolve chart and actuate computing mechanism. Pulls levers and presses pedal to guide pens along static pressure and volume curve lines. Removes chart and records computation on back of chart. Maintains file of integrator reading check sheets.

4141-166 EMBOSSING-MACHINE OPERATOR(clerical)
DPT:584
plate embosser.
GED: 2 SVP: 3 EC: I PA: S 4 7

Operates electrically powered or manual machine to emboss names and addresses on metallic and nonmetallic plates for use in duplicating or addressing-machines or for identification tags:

Refers to work order or sketch supplied and withdraws appropriate sample from file. Clamps sized blank plate or strip in holder. Turns handwheel to set character or letter die in embossing position and pulls lever to lower die and emboss character on plate or strip. Trips levers or presets automatic controls to space letters, words and lines. Wires tags together and delivers to appropriate work station. Inserts sample plate in frame binder and files alphabetically to maintain record of each plate type.

May operate pantograph type engraving machine to engrave plates. May operate a particular type of embossing machine and be designated accordingly.

4141-170 COIN-MACHINE TENDER(clerical) DPT:585
GED: 2 SVP: 2 EC: I PA: L 4 7

Tends machine that counts, sorts and wraps coins of various denominations:

Lifts bags of coins and dumps them in hopper of machine. Places rolls of counted coins into bags for bank deposit. Keeps record of total money processed.

May insert fittings on coin channels of machine to sort coins according to denominations. May move money to and from cages and vaults, using hand truck.

4141-174 MIMEOGRAPH OPERATOR(clerical) DPT:684
GED: 2 SVP: 2 EC: I PA: L 4 7

Operates machine to reproduce handwritten or typewritten matter from stencil:

Pours ink into cylinder reservoir and turns cylinder lever to distribute ink on ink pad. Attaches stencil to cylinder of machine. Selects paper according to colour, size, weight and quality specified, and loads paper onto feed tray. Sets gauges and dial controls to adjust paper feed and cylinder speed, and starts machine. Assembles and staples printed copies. Removes stencil from machine and cleans and files stencil for reuse. Cleans and oils machine and replaces ink pads.

May record number and kind of copies made. May operate machine by turning cylinder manually.

4141-178 ADDRESS-LABELLING-MACHINE TENDER(clerical) DPT:685
GED: 2 SVP: 2 EC: I PA: L 4 7

Tends machine that applies pre-addressed labels to printed material, envelopes or other containers preparatory to mailing:

Adjusts wing (feed guides) to accommodate size of article to be labelled, and places stack of unlabelled articles between guides. Mounts roll of pre-addressed labels on machine spindle. Fills reservoir with water. Operates switch that turns rubber wheel to feed label over roller that applies water, and under blade that automatically cuts

labels from roll and applies label to mailing piece. Removes labelled article from machine and stacks on table.

4141-182 BURSTING-MACHINE TENDER(clerical) DPT:685
GED: 2 SVP: 2 EC: 1 PA: L 4 7

Tends machine that separates, trims and addresses accounting notices and receipt forms:

Turns knobs to adjust machine to address and separate forms. Turns roller to position pins that grip continuous forms. Starts machine and examines emerging forms for correct imprinting, trimming and separation. Packs stacked forms into boxes.
May label boxes for mailing. May change machine ribbon. May tend machine that inserts printed matter into envelopes.

4141-184 ENVELOPE-SEALING AND IMPRINTING MACHINE TENDER(clerical) DPT:885
GED: 2 SVP: 2 EC: 1 PA: L 4 7

Tends machine that automatically imprints postmark on, and seals envelopes:

Arranges envelopes so that flaps are open and upturned. Inserts material for mailing into envelopes by hand. Adjusts machine to thickness of material in envelope. Turns indicator dial to specified letters and date numbers to be imprinted. Starts machine and positions envelopes on feed tray for imprinting and sealing. Removes postmarked sealed envelopes.

4141-186 EXCISE-STAMP CANCELLING MACHINE TENDER(clerical) DPT:685
GED: 2 SVP: 2 EC: 1 PA: M 4 7

Tends stamp-cancelling machine to cancel excise stamps:
Writes requisition for supplies; such as, stamps, ink, and letters, and selects type required for stamp-cancelling machine. Prepares machine for use, making adjustments to automatic feeding-tray and manually turns set screws. Fills reservoir of machine with ink, using funnel and ink container. Puts excise stamp sheets in automatic feeding-tray, manually. Starts and observes machine to detect blockage at feeding and delivery ends. Sets cutter to required size, by turning adjustment screws. Lowers blade of cutter, to cut stamps to size. Delivers cancelled stamps to packing department.

4141-190 INSERTING-MACHINE TENDER(clerical) DPT:685
GED: 2 SVP: 2 EC: 1 PA: L 4 7

Tends machine that inserts printed matter; such as, letters or booklets into folders or envelopes:

Stacks quantities of materials to be inserted in feedboxes of machine and sets feeders with hand screws to accommodate thickness of material. Stacks covers in feedbox and sets feeder to thickness. Starts machine and replenishes feedboxes with inserts and covers.
May perform duties of 4173-126 MAIL CLERK (clerical)

4141-194 PHOTOCOPYING-MACHINE TENDER(clerical) DPT:685
GED: 2 SVP: 2 EC: 1 PA: L 4 7

Tends machine to reproduce typewritten or handwritten matter, or prints, from original copy or aperture card:
Places original copy or card on glass plate in machine or viewer, and places blank paper on loading tray. Sets control switch for number of copies. Pushes button which starts machine that transfers image of original to blank paper by photographic and static electricity process.
May clean machine. May be designated according to machine operated,
Photographic-Machine Tender

4141-198 STENCIL-CUTTER TENDER(clerical) DPT:685
GED: 2 SVP: 2 EC: 1 PA: L 4 7

Tends machine that automatically cuts stencils for mimeograph-copy duplicating of printed material, graphs and tables:
Places original copy and blank stencil around separate cylinders. Sets controls and turns on machine that scans original copy and cuts blank stencil. Removes stencil after machine completes operation.

4141-202 MICROFILM MOUNTER(bus. serv.) DPT:684
GED: 2 SVP: 2 EC: 1 PA: L 4 7

Mounts microfilm into Electronic Data Processing cards (data cards) by one of the following methods:

1. Tends machine that automatically mounts developed microfilm into cards. Inserts roll of microfilm into machine. Fills hopper with presorted cards. Starts machine that cuts roll of microfilm into sections and mounts microfilm into hole on card. 2. Mounts roll of microfilm manually into Electronic Data Processing cards. Aligns visually, inspects and verifies microfilm and index card to ensure that they are matched before actual mounting takes place. Inserts microfilm into hole on card. Checks finally to make certain that cards are in sequence.

4141-206 ADDRESS-PLATE INSERTER(clerical) DPT:687
GED: 2 SVP: 1 EC: 1 PA: L 4 7

Removes and inserts embossed addressing plates which are linked together in a chain and wound on a reel:

Places reel of plates to be examined and an empty reel on spindle at opposite ends of rewinding device. Manually winds linked-embossed plates from loaded reel, stopping when necessary to unhook connecting links, and insert additional plates or remove incorrect or out-of-date plates, according to instructions on worksheet.
May operate addressing-machines to address cards, envelopes or related materials.

4143-ELECTRONIC DATA-PROCESSING EQUIPMENT OPERATORS

This unit group includes occupations concerned with operating electronic and electromechanical machines that record, store, process, and transcribe data to and from punch cards, paper tape, magnetic tape or other sources, or are used to solve mathematical, engineering or technical problems, and to print and supply data. Occupations concerned with operating bookkeeping and similar machines are classified in Unit Group 4141, OFFICE MACHINE OPERATORS.

4143-110 COMPUTER OPERATOR(clerical) DPT:682
console operator; digital-computer operator.
GED: 4 SVP: 6 EC: 1 PA: L 4 7

Operates and controls electronic digital computer to process business, scientific, engineering, or other data:

Sets control switches on computer and peripheral equipment; such as, external memory, data communicating, synchronizing, input and output recording, or display devices, to integrate and operate equipment according to program and data requirements specified in written operating instructions. Selects and loads input and output units with materials; such as, disks, tapes or punch cards and printout forms, for operating runs, or oversees operators of peripheral equipment who perform these functions. Sets switches to clear system and start operation of equipment. Observes equipment and control panel on computer console for error lights, verification printouts, error messages, stoppages and faulty output. Stores commands into computer console, according to predetermined instructions, to correct error or failure and resume operations. Notifies supervisor of errors or equipment stoppage. Clears unit at end of operating run and reviews schedule to determine next assignment. Records operating data such as in-use and down time.

May type alternate commands into central control unit of computer. May wire control panels of peripheral equipment or insert program cards. May control computer to provide input and output service for another computer.

4143-114 COMPUTER-PERIPHERAL EQUIPMENT OPERATOR(clerical) DPT:382
unit record equipment operator.
GED: 4 SVP: 5 EC: 1 PA: L 4 6 7

Operates a variety of computer-peripheral (ancillary) equipment that converts data from one form to another, and sorts, tabulates, reads and prints data, by performing any combination of the following duties:

Mounts and positions materials; such as, reels of magnetic tape and disks onto spindles, decks of cards into hoppers, bank cheques into magnetic ink reader sorter, notices in optical scanner and carriage tape or output forms into printing devices. Sets guides, keys and switches according to oral and written instructions, to prepare equipment for operation. Selects specified wired control panels or printed circuit boards, or wires panel according to diagrams, and inserts them into machines. Presses switches to start off-line machines such as card tape converters, or to interconnect on-line equipment, such as tape or card computer input and output devices, and high-speed printer or other output recorder. Watches machines and error lights to detect machine malfunction. Notifies supervisor of malfunctioning or stoppage of machines or faulty output of data. Unloads cards, disks or reels of tape from machine and identifies and routes them to library or storage. Separates and sorts printed output forms, using sorting machine, to prepare them for distribution. May confine activities to one type of machine and be designated accordingly. May operate computer console in absence of computer operator.

4143-118 MAGNETIC INK CHARACTER RECOGNITION CLERK(clerical) DPT:384
GED: 3 SVP: 5 EC: I 5 PA: S 4 7

Operates accounting machines and keeps related clerical records in connection with magnetic ink character recognition (MICR) cheques and vouchers: Operates machine to balance listings of incoming bank transactions such as cheques and vouchers and encode with MICR common machine language. Sorts MICR encoded cheques and vouchers using electronic sorting machine. Operates electric adding machine to verify total and record figures on documents such as cheques and deposit slips. Photographs cheques and vouchers being sent outside bank's record control system using copying machine. Keeps daily statistics on computer time used in bank computer centre. Computes handling charges on cheques drawn on foreign banks using data captured and recorded during MICR sorting. May supervise a group of MICR clerks.

4143-122 VERIFIER OPERATOR(clerical) DPT:684
GED: 3 SVP: 5 EC: I PA: S 4 7

Verifies accuracy of data punched on tabulating cards (punch cards), using keyboard type machine that rejects incorrectly punched cards: Places punched cards in machine. Depresses keys in sequence originally used when cards were punched on key punch machine. Removes incorrectly punched cards as indicated by light, or key that will not depress. May punch corrected card using key punch machine.

4143-126 CARD-TAPE-CONVERTER OPERATOR(clerical) DPT:384
GED: 3 SVP: 4 EC: I PA: S 4 7

Operates machines that automatically transcribe data from punch cards to reels of tape, or from tape to punch cards for use in automatic data-processing equipment: Wires plugboard, to make circuit connections according to prepared diagrams, to print data in desired format. Mounts reels of tape on spindles or tape drives, places stacks of punch cards in hopper, and starts reading and recording machines. Observes machines in operation to ensure that there is no malfunctioning. Marks identification on reels of tape or drawers of punch cards at end of run, and keeps control sheet. May operate other electronic data-processing machines such as, high-speed printer.

4143-130 HIGH-SPEED-PRINTER OPERATOR(clerical) DPT:384
GED: 3 SVP: 4 EC: I PA: L 4 7

Operates high-speed printing machine to convert into printed records, scientific, engineering or business information previously recorded on tape: Wires plugboard, making circuit connections according to prepared

diagram or inserts program card to obtain specified data in desired format. Mounts tape reels on spindles and positions in printer, paper stock on which data are to be recorded. Starts machine and observes printing for format and legibility, and panel lights for indications of computational errors. Verifies plugboard wiring or reviews program card to correct printing errors. Removes printed sheets from machine and stores reels of tape. May transfer data from punch cards to reels of magnetic tape or from reels of magnetic tape to punch cards.

4143-134 KEY-PUNCH OPERATOR(clerical) DPT:584
card-punch operator.
GED: 3 SVP: 4 EC: I PA: S 4 7

Operates alphabetic and numeric key-punch machine, similar in operation to that of electric typewriter, to transcribe data from source material onto punch cards: Attaches punched program card around machine drum to control duplication and spacing of constant data. Loads machine with decks of punch cards. Moves switches and depresses keys to select automatic or manual duplication and spacing, to select alphabetic or numeric punching and transfer cards through machine stations. Depresses keys to transcribe data in prescribed sequence from source material into perforations on cards. Inserts previously punched card into card gauge to verify registration of punches. Observes machine to detect faulty feeding, positioning, ejecting, duplicating, skipping, punching, or other mechanical malfunctions, and notifies supervisor of defects. Removes jammed cards by pressing pressure release lever. May tend machines that automatically sort, merge or match punch cards into specified groups. May convert alphabetic, numeric and symbolic data into coded form on punch cards or tapes, using special purpose electric typewriter. May perform verifying duties and be designated accordingly; for example, Typist, Data Processing Verifier Operator

4143-138 TABULATING-MACHINE OPERATOR(clerical) DPT:684
GED: 3 SVP: 4 EC: I PA: L 4 7

Processes data from punched cards into printed records by operating tabulating machines: Wires and installs tabulating-machine plugboard (control panel), using wrenches and screwdriver. Places cards in hoppers in proper sequence and starts machine. Checks operation of machine to ensure that it is running smoothly and removes jammed cards. Passes processed cards to next step of operation. May tend machines that perform individual function, such as sorting, interpreting, reproducing and collecting. May maintain files of punched cards.

4143-142 REMOTE COMPUTER TERMINAL OPERATOR(clerical) DPT:684
GED: 3 SVP: 3 EC: I PA: S 4 7

Operates electric typewriter to transmit data to computer: Depresses special key to signal computer at beginning of transmission. Types data according to copy, using series of code numbers for storage purposes. Corrects errors and makes changes according to predetermined procedures. Keeps record of data transmitted from terminal. Signals computer by code to retrieve data. Obtains daily storage report from computer to confirm accuracy of data stored. Keeps log composed of messages sent to and received from computer.

4143-146 SORTING-MACHINE TENDER(clerical) DPT:685
GED: 3 SVP: 3 EC: I PA: L 4 7

Tends machine that automatically sorts perforated tabulating cards into specified groups: Collects cards to be sorted, from storage area and places them in feed box. Pushes buttons on sorting control panel to regulate sorting process. Starts machine and looks through holes to verify sorting. Removes sorted cards from bins and returns them to storage area. Removes jammed cards to clear machine. May operate tabulating or verifying machine.

415-MATERIAL RECORDING, SCHEDULING AND DISTRIBUTING OCCUPATIONS

This minor group includes occupations concerned with examining orders for goods and services; receiving, storing, scheduling, issuing, shipping, requisitioning and accounting for material in store or in use. Activities include: assigning locations and space to items; verifying quantity, identity, condition and value; binning, picking, stacking and counting; preparing or committing stocks for shipment; taking inventory of stock; replenishing depleted items; filling orders; and issuing tools, equipment or material to workers. These occupations are classified in the following unit groups:

- 4150 Supervisors: Material Recording, Scheduling and Distributing Occupations**
- 4151 Production Clerks**
- 4153 Shipping and Receiving Clerks**
- 4155 Stock Clerks and Related Occupations**
- 4157 Weighers**
- 4159 Material Recording, Scheduling and Distributing Occupations, n.e.c.**

4150-SUPERVISORS: MATERIAL RECORDING, SCHEDULING AND DISTRIBUTING OCCUPATIONS

This unit group includes occupations, as described under the master title, 01-250 SUPERVISOR/FOREMAN (any ind.), concerned with supervising and co-ordinating the activities of workers engaged in receiving, storing, issuing, shipping, requisitioning and accounting for materials; expediting flow of materials and preparing work and production schedules.

4150-110 SUPERVISOR, PRODUCTION CLERKS(clerical) DPT:138

Supervises and co-ordinates activities of workers engaged in expediting flow of work and materials, examining orders for goods and services; preparing work or production schedules; routing parts for fabrication or repair and compiling records and reports, (Unit Group 4141):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

May supervise workers engaged in a particular activity and be designated accordingly; for example,

Job-Order Clerks Supervisor
Material Clerks Supervisor
Schedule Clerks Supervisor

4150-114 SUPERVISOR, SHIPPING AND RECEIVING CLERKS(clerical) DPT:138

Supervises and co-ordinates activities of workers engaged in assembling, packing, addressing, stamping, loading and shipping merchandise or material, and receiving, unpacking, sorting, verifying and recording incoming merchandise or materials, (Unit Group 4153):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

May supervise workers engaged in a particular activity and be designated accordingly; for example,

Receiving Clerks Supervisor

Shipping Clerks Supervisor

4150-118 SUPERVISOR, STOCK CLERKS(clerical) DPT:138

Supervises and co-ordinates activities of workers engaged in receiving, storing and distributing supplies, material and equipment; taking inventories, estimating future requirements, keeping records and pricing and requisitioning stock, (Unit Group 4155):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

May supervise workers engaged in a particular activity and be designated accordingly; for example,
Inventory Control Supervisor
Linen Room Supervisor(laund., clean. & press.)
Tool-Crib Supervisor

4150-199 OTHER SUPERVISORS, MATERIAL RECORDING, SCHEDULING AND DISTRIBUTING OCCUPATIONS

This group includes material recording, scheduling and distributing supervisors, not elsewhere classified; for example, those who supervise and co-ordinate activities of workers engaged in marking prices on goods and checking tickets. Typical examples of occupational titles covered by this residual group definition are:

Supervisor, Price Markers(ret. trade; whole. trade)
Supervisor, Ticket Checkers(tobacco)

4151-PRODUCTION CLERKS

This unit group includes occupations concerned with co-ordinating and expediting the flow of work and materials; examining orders for goods and services; preparing work or production schedules to ensure time limits are met; routing and delivering parts for fabricating or repair operations to ensure production quotas are maintained; and compiling records and reports.

4151-110 PRODUCTION CO-ORDINATOR(clerical) DPT:168 production expediter; production scheduler. GED: 4 SVP: 7 EC: 1 PA: S 4 5 6 7

Co-ordinates and expedites flow of work within or between departments of manufacturing plant according to production schedule:

Reviews production schedule and work orders and reschedules processes to eliminate duplicate machine setups. Distributes work orders to departments denoting number, type and proposed completion date of units to be produced. Confers with department supervisors to determine progress of work and completion and delivery dates. Suggests assembly and disassembly of stock parts or assemblies to provide spare parts during component shortages or production delays. Compiles reports on progress of work and machine, tool and equipment failures, using typewriter, to inform production planning department of production delays. Informs department supervisor of changes in processing methods received from engineering departments.

4151-114 MATERIAL CO-ORDINATOR(clerical) DPT:168
material checker; stock chaser.
GED: 4 SVP: 6 EC: I 5 PA: L 5 6 7

Co-ordinates and expedites flow of materials, parts and assemblies within or between departments according to production and shipping schedules or departmental priorities:

Reviews production schedules and confers with supervisors to determine if more material is required, to arrange for repair and assembly of material and its transportation to various departments, and to establish completion date for production of material. Notifies production or manufacturing departments of anticipated workload and sequence in which material will be processed. Observes progress of work flow and anticipates any disruptions on production line which might be caused by machine speed, excessive scrap or incorrect scheduling. Informs production control department of flow disruptions and requests direction.

4151-118 MOTOR VEHICLE REPAIR CO-ORDINATOR
(motor vehicle) DPT:168
GED: 4 SVP: 6 EC: I PA: S 4 5 6 7

Co-ordinates activities of workers engaged in repairing and servicing automobiles:

Receives work order and routes automobiles to motor department, body and fender shop, paint shop, lubrication shop or specialist worker, using public address or intercom system or telephone. Controls and expedites work in various parts of establishment to ensure that all work proceeds according to schedule. Verifies that repair and service work is completed, and determines cost. Informs customer when vehicle is ready.

4151-122 CONTROL CLERK, ADVERTISING(bus. serv.) DPT:367
GED: 4 SVP: 6 EC: I PA: S 5 6 7

Compiles and examines work records on production in advertising agency, to control completion of art work, copy and layouts:

Records date sent and date expected for printing and art work. Advises agency personnel to speed production when there are changes in scheduling. Keeps contract file of work in progress, and ensures completion of work according to contract specifications. Examines current work-flow control procedures and formulates new systems for completing work prior to deadline.

4151-126 PROGRAM SCHEDULER(broadcast., motion pic. & stage) DPT:364
GED: 4 SVP: 5 EC: I PA: S 4 7

Compiles daily operations' schedules for radio or television programming:

Telephones distributors to get information and fits this information into schedule to fill hours of day and night with programming. Compiles information locally and from network to get complete program schedule. Notes any deviations from schedule in book, for future insertion in newspapers and magazines. Prepares and types program schedule and distributes it to newspapers, magazines and others on circulation list.

4151-130 CONTROL CLERK, DATA-PROCESSING (clerical) DPT:367
GED: 4 SVP: 5 EC: I PA: S 4 7

Prepares and assembles complete input to electronic-data-processing systems and performs control duties to route assignments through datacentre:

Assigns production codes, and schedules due dates for material going to datacentre. Reviews instructions to determine unique features or special work required by customer. Reads routing cards to determine scheduling, priority and sequence for processing data. Ensures presence of all documents by referring to accompanying transit slip. Assembles complete set of source material to be card-punched, such as control totals, tapes, drums and disks, and routes them through appropriate departments for data processing. Records all incoming and outgoing material processed in datacentre. Checks progress of project by conferring with machine operators, and by using control sheets showing locations, priority and scheduling to ensure that material is ready on time. Provides input such as machine times to

determine amount of customer's bill. Sends completed project to quality control section and assists in checking, editing, balancing and binding reports for shipment to customer. May operate various unit-record and computing systems as part of job preparation and data-balancing operation.

4151-134 PRODUCTION CLERK(clerical) DPT:368
GED: 4 SVP: 5 EC: I PA: L 5 7

Compiles data for production operations' schedules from customers' orders, production estimates and perpetual inventory:

Examines customer's order and inventory records to determine production needs to fill order. Prepares order-completion schedules in advance for each department. Keeps records of all material shipped to destination. Surveys progress of production by examining work tickets or other progress control data, and issues production runs. Proposes amendment of production operation schedules in the light of actual production performance. Keeps records of machine performance, production rates and outputs. Prepares reports on progress for information of management.

4151-138 MATERIAL ESTIMATOR, CONSTRUCTION (clerical) DPT:388
GED: 4 SVP: 5 EC: I PA: S 4 7

Prepares estimates of amount of materials and labour required for construction and repair projects:

Reads technical drawings and other plans and records kind, size, amount, grade and place of delivery of needed materials for building construction projects. Lists suppliers and quoted prices for each type of material used. Prepares schedules showing promised delivery date for each type of material. Records data on materials received and used on project.

4151-142 OVERHAUL PLANNER(air & space-craft) DPT:388
GED: 4 SVP: 5 EC: I PA: S 4 7

Compiles record of aircraft assemblies and components returned for repairs, modification, or overhaul, and schedules work on units to meet production dates:

Keeps status records on all units within the department as work progresses. Prepares forms to initiate repair work. Keeps records of units sent to other departments for further work on overhaul.

4151-146 RECORDER, STEEL MILL(clerical) DPT:367
GED: 3 SVP: 5 EC: I 3 5 6 PA: L 4 5 6 7

Records and collates operational data concerning steel production to ensure that processing procedures are carried out according to specifications:

Reads production, heating, or rolling schedule to determine processing specifications. Distributes copies of orders to operating personnel and notifies them of order changes by telephone. Observes processing of material and reads gauges, clocks, and automatic recorders. Records and compares information with schedules to determine variations from processing specifications. Communicates with supervisory personnel using intercom, or telephone, to report deviations from processing instructions. Prepares periodic statistical reports on operations indicating data; such as, processing delays and deviations, and production figures.

May record data concerning a particular aspect of production in steel mill and be designated accordingly; for example,

Blooming-Mill Recorder
Open-Hearth-Pit Recorder
Oxygen-Furnace-Pit Recorder
Slabbing-Mill Recorder
Soaking-Pit Recorder
Structural-Mill Recorder

4151-150 JOB ORDER CLERK, MANUFACTURING (clerical) DPT:368
GED: 3 SVP: 5 EC: I PA: S 4 7

Compiles detailed worksheets from customer's order and other specifications, for use as guides in assembly or manufacture of products in plant or factory:

Compares customer's purchase order with specifications. Enters data; such as, quality, quantity, type, colour, size of material, machines to be

used in production, sequence of operations and expected completion date, on worksheet. Attaches drawings, tracings, other specifications and priority for delivery to worksheet and forwards to department concerned for processing. Initiates purchase requisitions to obtain required material for production. Contacts plant or factory to determine progress on work order and revises schedules. Computes production totals according to machine or shift, manually or using calculating machine.

May keep inventory records, file correspondence, type reports and notify purchasing department of depleted material and supplies.

4151-154 CLERK, CABLE TRANSFER(telecom.) DPT:388
GED: 3 SVP: 5 EC: 1 PA: S 4 7

Prepares authorizations and maintains records related to rewiring of telephone lines, and compiles data for statistical reports:

Prepares work orders from engineering plans for use by construction department. Prepares statistical reports and assembles data from records for subscriber-analysis studies and for engineering department. Brings records up-to-date, noting subscriber's address or other changes in service, to facilitate rewiring of telephone lines.

4151-158 INDUSTRIAL-ORDER-COMPLETION CLERK
(clerical) DPT:368
GED: 4 SVP: 4 EC: 1 PA: L 4 5 6 7

Verifies completion of industrial orders received and conformance of product to specifications:

Compares technical drawings and instructions with contract or order to ascertain that product meets specifications. Communicates with plant installation and delivery personnel to verify delivery of product. Prepares completion slip after order is filled. Compiles records of outstanding items not received or delivered.

4151-162 PROGRESS CLERK, CONSTRUCTION(clerical) DPT:364
GED: 3 SVP: 4 EC: 1 PA: L 4 7

Records and reports progress of construction work:

Reviews such information as daily record of activities, records of quantities of material received and used and data from various workers. Prepares and types reports. Examines and measures work completed and records progress to aid in scheduling work and material requirements. Accepts delivery slips and verifies material received from suppliers.

May collect employees' time cards and take them to office for processing.

4151-166 AIRCRAFT-RECORDS CLERK(air & space-craft;
air trans.) DPT:368
technical-records clerk.
GED: 3 SVP: 4 EC: 1 PA: S 4 7

Keeps up-to-date records showing amount of time aircraft is in use, and indicates remaining life of component parts:

Computes and posts amount of time-aircraft and their individual parts are in use and transcribes information from periodic reports to permanent records. Maintains wallchart showing remaining life of aircraft components. Ensures that new or overhauled components will be available when replacements are needed. Notifies inspection department and prepares work orders for overhaul or repair of aircraft or components, using printed forms and information from permanent records. Checks entries in log books to ensure accuracy. Accounts for labour charges for each job by transcribing information from time cards to work orders.

4151-170 ASSIGNMENT CLERK(telecom.) DPT:368
GED: 3 SVP: 4 EC: 1 PA: S 4 7

Assigns telephone lines and numbers and maintains records for control purposes:

Assigns line, cable and central-office facilities to be used in providing and maintaining telephone or telegraph services. Keeps record of line, cable and central-office facilities. Initiates changes in assignment and arrangement of facilities, working from records, to secure maximum usage and efficiency of equipment. Requests field investigation where office records do not indicate available facilities for subscriber service.

Sends list of new numbers to service department, information operators and directory- compilation personnel for action.

4151-174 EXPEDITER, PURCHASING(clerical) DPT:368
GED: 3 SVP: 4 EC: 1 PA: S 4 5 6

Ensures that merchandise, supplies or equipment are shipped by vendor on designated shipping date:

Contacts vendor by mail or phone to verify shipment of goods on promised date, or to ensure that goods will be shipped when promised. Arranges for distribution of materials upon arrival. Contacts vendor to requisition materials. Indicates date and time of shipment or delivery on work orders.

May weigh and record weight and pack or unpack material. May inspect products for quality and quantity to assure adherence to specifications.

4151-178 SERVICE-WORK-ORDER CLERK(clerical; elec.
power; utilities, n.e.c.) DPT:368
service clerk.
GED: 3 SVP: 4 EC: 1 PA: S 4 5 6 7

Prepares and controls work orders for purposes; such as, provision of gas or electric services, or installation and repair of customers' appliances:

Records information; such as, name and address of customer, type and size of meter or appliance to be installed or repaired, and dates of servicing, inspection or disconnection. Sorts and routes work orders and dispatches service crew. Prepares list of each type of order for use as control record. Calls customer to arrange time for installing or repairing utility or appliance, or to ensure satisfactory performance of repaired item. Checks order to ensure correct charge to customer, and writes or types bill or statement. Maintains map showing service availability. Answers inquiries about work progress from customer or other company department.

May be designated according to type of work order prepared; for example, Appliance-Repair Clerk
Meter-Records Clerk

4151-182 VEHICLE-SERVICE SCHEDULER(clerical) DPT:368
dispatcher maintenance.
GED: 3 SVP: 4 EC: 1 PA: S 4 7

Schedules lubrication, inspection and running repairs to vehicles such as buses, cars, street cars and trucks in garage or repair shop:

Schedules vehicles for lubrication, inspection or repairs based on date of last lubrication, mileage travelled, estimate of future daily mileage, or urgency of repairs. Verifies availability of garage facilities from repair shop personnel. Positions marker pins under appropriate dates on schedule display board, opposite vehicle numbers, to indicate to equipment department when vehicles are due for servicing.

4151-186 RECORDING CLERK, CASTINGS(iron & steel) DPT:487
GED: 3 SVP: 4 EC: 1 3 5 6 7 PA: L 4 7

Registers heat (crucible) numbers, composition of alloys and identification of castings poured from each heat, and maintains production records:

Calculates percentage of each metal contained in alloys and makes entry on production sheet according to standard formula and weight of alloy poured. Stamps heat number on metal tags, consulting heat charts and using hand-operated press or hand punch and hammer. Sticks end of tag wire into metal before it solidifies to identify each casting, using metal tongs.

4151-190 SCHEDULE CLERK(print. & pub.) DPT:588
GED: 3 SVP: 4 EC: 1 PA: S 4 7

Prepares production schedules for advertising or printing orders:

Prepares schedule showing information; such as, advertiser's name, size of advertisement, date and number of times to be published, page and position specified. Compares new-printing order with former order, if applicable, and records changes in format; such as, size or colour of sheet and contents of material. Attaches prepared form to assembled material and sends material for printing and publishing.

4151-192 ORDER CLERK, PRINTING PLATES (print. & pub.) DPT:367
GED: 3 SVP: 3 EC: 1 PA: S 4 5 6 7

Reads and reviews incoming orders for new or duplicate printing plates to ensure they are complete, according to customers' instructions, and discusses orders with customers:

Writes orders received from customers in person or by telephone, for duplicate or new printing plates. Discusses problems; such as, variations in materials supplied, and delays that arise during production. Ensures that plates held in stock are in satisfactory condition for making proofs. Compares proofs with customers' copies of orders and instructions, and inspects outgoing work for compliance with specifications.

4151-194 ESTIMATOR, FABRIC(garment & fabric) DPT:484
GED: 3 SVP: 3 EC: 1 PA: S 7

Computes amount of fabric required and determines number and type of accessories such as belts, linings, buttons and labels needed in manufacture of garments:

Reads job orders or cutting tickets to determine quantity of garments, sizes, styles and trimming. Computes number of yards of fabric to produce specified style of garment in various sizes, using size chart. Types or writes copies of cutting tickets and orders for various supplies of fabric.

4151-198 TALLYMAN(clerical) DPT:567
GED: 2 SVP: 2 EC: B PA: L 4 7

Records number of units of material, products or other articles received, transferred or produced, performing any combination of the following duties:

Observes and counts material or records information called out by other worker. Records number and kind of defects on unsatisfactory units, for quality control purposes. Prepares, signs and attaches tally sheets to items checked. Piles predetermined number of boxes on skid for closing. Examines containers to ensure that workers fill them to specified level and records number filled. Marks containers to identify type, quality and quantity.

May be concerned with tallying a specific item, and be designated accordingly; for example,

Checker, Agricultural Produce
Tallyman, Lumber

4151-202 TICKET PREPARER, MANUFACTURING (clerical) DPT:587
GED: 2 SVP: 2 EC: 1 PA: L 4 7

Prepares tickets or work cards for production department, according to schedules or worksheets:

Copies specifications, onto work tickets or cards, from master schedule which lists parts to be used in manufacturing product, or outlines instructions such as type, length and width of material required. Batches tickets manually and delivers them to other workers or gives them to service man for delivery. Records production data on work ticket or cards. Stamps identifying information, such as lot, number, size and date, on parts manufactured or material used.

May keep record of work tickets for computation of workers' earnings.

4153-SHIPPING AND RECEIVING CLERKS

This unit group includes occupations concerned with assembling, packing, addressing, stamping, loading and shipping goods; and receiving, unpacking, sorting, verifying and recording incoming goods. Occupations primarily concerned with storing, distributing, issuing, taking inventory and requisitioning stock are classified in Unit Group 4155, STOCK CLERKS AND RELATED OCCUPATIONS.

4153-110 IMPORT-FREIGHT CLERK(water trans.) DPT:364
GED: 3 SVP: 5 EC: 1 PA: S 4 7

Compiles documents on incoming cargo shipments to facilitate removal of cargo from dock, and prepares bill for shipping charges:

Examines ship's manifest (list of cargo) and bills of lading to determine work procedures for releasing cargo. Contacts terminal employees by telephone to determine when cargo will be available for removal from dock. Notifies consignee or his agent, by letter or other means, of arrival dates of shipment, customs clearance requirements and tonnage of shipment. Stamps bill of lading in order that cargo may be removed from dock. Computes from bills of lading, shipping, storage and demurrage charges, using calculator. Prepares bill for charges and submits it to accounting department for collection. Checks bill of lading against enclosure slip, and converts rates from foreign exchange into dollars. Prepares photocopies of bills of lading, advice notes, customs and other documents on duplicating machine to mail out to customers.

4153-114 EXPORT-BOOKING CLERK(water trans.) DPT:367
GED: 3 SVP: 5 EC: 1 PA: S 4 7

Books outbound freight shipments on company's ships to ensure capacity cargo for each ship:

Ascertains from shipper, type, tonnage, destination and shipping date to determine ship in which to book cargo. Consults booking sheet to ascertain if space is available for shipment. Informs shipper, by letter or other means, of name of ship on which cargo is booked, date of sailing and time to deliver shipment to dock. Records booking of cargo on control sheet, listing tonnage and type of cargo, and shipper's name and destination.

4153-118 SHIPPING AND RECEIVING CLERK (clerical) DPT:367
GED: 3 SVP: 5 EC: 1 PA: M 4 7

Ships and receives goods and keeps pertinent records:

Determines method of shipment, utilizing knowledge of shipping procedures, routes, and rates 4153-126 SHIPPING CLERK (clerical). Compares quantity and identification numbers of goods against orders to ensure accuracy. Assembles wooden and cardboard containers or selects preassembled containers to ship goods. Affixes identifying information and shipping instruction on containers, using staplers, string, or stencils. Arranges for shipment of goods by contacting company or outside carriers, using telephone. Prepares bills of lading by hand or using typewriter. Keeps files of shipping records. Verifies receipt of shipments against bills of lading, invoices, or other records 4153-122 RECEIVING CLERK (clerical). Records shortages and rejects damaged goods. Routes goods to stockroom or department concerned.

May direct others in the packing and unpacking of goods. May oversee the loading and unloading of goods onto or from vehicles and railroad cars. May take or assist in taking inventories of goods in storage. May operate equipment, such as handtruck, fork-lift, elevator, or conveyor to transport goods.

4153-122 RECEIVING CLERK(clerical) DPT:367
receiving checker; receiving-room clerk.
GED: 3 SVP: 4 EC: 1 PA: M 4 7

Receives, unpacks and examines goods and verifies shipments received against bills of lading, invoices and other records:

Examines incoming shipments to detect defects and sorts items according to extent of defect. Contacts sender to rectify damages or shortages and keeps record of factors causing goods to be returned. Attaches identification data to article. Issues receipts and keeps records of goods received. Routes goods received to various departments.

May direct material handlers and other workers in receiving department. May be designated according to one aspect of receiving; for example,

Freight-Receiving Clerk
Invoice-Control Clerk
Returned-Goods-Receiving Clerk

4153-126 SHIPPING CLERK(clerical) DPT:367
shipper.
 GED: 3 SVP: 4 EC: 1 PA: M 4 7

Arranges and prepares for dispatch of goods and keeps pertinent records:

Determines method of shipment, utilizing knowledge of shipping procedures, routes and rates. Counts and compares quantity and identification numbers of units against shipping order or invoice. Seals loaded freight cars or transport trucks prior to shipping. Prepares containers or selects prefabricated containers and places items into them, using spacers, fillers and protective padding. Prepares orders and invoices for shipping by writing on them identifying information; such as, customer's name and address, date, name and price of goods, goods not available or substituted, and shipping clerk's signature.

May weigh articles and attach postage or bill of lading. May perform duties in particular area and be designated accordingly. May remove sales-slip stubs from packages at loading dock. May be concerned with assembling and checking shipments and be designated accordingly; for example, Shipment Assembler, Aircraft Shipping Checker

4153-130 CARGO-LOCATION MAN(water trans.) DPT:468
 GED: 3 SVP: 4 EC: B 5 PA: L 4 7

Determines location and dock or shed space required for ship's cargo and records cargo particulars:

Inspects bills of lading and shipping manifests, or measures dimensions of cargo and calculates stowage space required in ship's hold, on dock, or in freight shed. Records details of cargo being handled, such as kind of cargo, quantities received or delivered, and extent of damage. Tells workers to stow cargo in location allocated according to destination, and marks containers to indicate destination using chalk, paper tags, and stapling machine.

May sketch plan showing location of cargo stowed aboard ship.

4153-134 CLAIM CLERK, LOST OR DAMAGED GOODS
 (clerical) DPT:468
 GED: 3 SVP: 4 EC: 1 PA: S 7

Traces and expedites delayed shipments and settles claims for lost, surplus, short, or damaged goods:

Receives claims for lost, delayed or damaged goods, filed by shipper or consignee. Reviews shipping records to verify route, expected time and date of arrival and kind and amount of material shipped, to determine if consignee or shipper is in error. Communicates with consignee or shipper to explain causes of delay in shipment. Verifies records to substantiate claim of shipper and to ascertain names of carriers involved. Requests investigation or estimate of lost or damaged goods. Prorates and computes cost to each carrier according to comparative mileage. Completes required records. Disposes of refused or unclaimed shipments.

4153-138 BAGGAGEMAN(motor trans.; rail trans.; water trans.) DPT:467
 GED: 3 SVP: 3 EC: 1 5 PA: H 3 4 5 6 7

Ships baggage and express from train, bus or ship terminal:

Examines tags or prepares and attaches claim checks to baggage and collects excess weight charge. Sorts baggage for loading on train, bus or ship. Ensures that customs declarations are properly filled out and attached to express items. Prepares bills to transfer baggage or express from one carrier to another. Provides rate and schedule information to customers. Traces lost or missing express or baggage.

May be concerned with handling a particular type of baggage according to transportation facility.

4153-142 ROUTE SUPPLY AND RETURN MAN(clerical) DPT:487
 GED: 3 SVP: 3 EC: 1 PA: L 4 7

Allocates products to driver-salesmen, checks and records unsold products:

Allocates products to driver-salesmen according to order slips and records any adjustments on route slips. Counts, checks and records unsold items returned by driver-salesmen. Examines products to determine condition, and removes damaged or unfit items.

May assist in loading or unloading delivery trucks.

4153-146 VAULTMAN(bus. serv.) DPT:567
 GED: 2 SVP: 2 EC: 1 PA: M 3 4 7

Routes sealed money bags, gathered by armoured-truck drivers, for delivery to establishments; such as banks, stores and industrial establishments:

Signs routing slip to acknowledge receipt of bags. Sorts bags according to delivery routes. Records data, such as origin, routing and destination of bags. Delivers bags to guard for loading into truck, and checks that guard has signed routing slip. Submits records to supervisor for review. Dispatches armoured trucks to specified areas for pick-up. Obtains cash and silver from banks to fill change orders for retail stores.

4153-150 SORTING AND ROUTING CLERK(clerical) DPT:587
 GED: 2 SVP: 2 EC: 1 PA: M 4 7

Prepares delivery sheet and sorts items for delivery in or outside establishment:

Copies information; such as, name and address of consignee, type of goods and number of pieces, from records onto delivery sheet. Locates goods, such as boxes, bundles, packages or lots of articles, and verifies them against delivery sheet. Sorts and groups goods according to instructions.

May place or stack items in bins, on trucks or conveyors.

4155-STOCK CLERKS AND RELATED OCCUPATIONS

This unit group includes occupations concerned with receiving, storing and distributing supplies, material and equipment; and taking inventories, estimating future requirements, keeping records, pricing and requisitioning stock.

4155-110 PRODUCTION-SUPPLY CLERK(clerical) DPT:387
 GED: 4 SVP: 6 EC: 1 PA: S 4 7

Compiles quantity and delivery schedules of materials and parts required for manufacturing, and prepares list of obsolete and excess items:

Examines production schedules, inventory records and bills of material to determine quantities of parts and materials required. Allocates parts and materials to specific departments. Prepares delivery schedules based on production requirements and taking into account availability, storage facilities, economical quantity purchasing and avoidance of excess inventories. Initiates requisitions to purchasing department for parts and materials, indicating specifications, departmental allotment and delivery schedule. Prepares lists of parts and materials considered obsolete or surplus and recommends their disposition.

May be concerned with a particular industry and be designated accordingly; for example, Production-Supply Clerk, Aircraft Production-Supply Clerk, Automobile

4155-114 PARTS LISTER(clerical) DPT:367
 GED: 3 SVP: 5 EC: 1 PA: L 4 7

Prepares list of replaceable parts used in product fabrication and repair:

Reads master bill of parts to identify each item by part number, manufacturer and description. Contacts purchasing, engineering and other departments for information on specially-designed components. Compiles list of parts for distribution. Collects and compiles data relating to product design changes or modifications. Maintains record system for list of parts and specifications.

4155-118 PROPERTIES CUSTODIAN(broadcast., motion pic. & stage) DPT:367
 GED: 3 SVP: 5 EC: B PA: M 2 3 4 7

Receives, stores and issues properties in motion picture or television studio prop room:

Counts, and sorts incoming articles, with assistance of stagehands, to

verify return of props from filming location. Stores articles in bins on floor or on shelves according to identifying information such as, style, size, or type of material. Prepares perpetual inventory of stock. May arrange and advise on setting-up of props and special effects. May purchase or rent props.

4155-122 PURCHASING CLERK(clerical) DPT:367
procurement clerk.

GED: 4 SVP: 4 EC: I PA: L 4 5 6 7

Compiles information and records to prepare purchase orders for procurement of material for industrial, government, or other establishments:

Verifies nomenclature and specifications of purchase requests. Searches inventory records or warehouse to determine if material on hand is in sufficient quantity. Consults catalogues to obtain prices and specifications. Writes or types purchase order and sends copies to supplier and originating department. Compiles records of items purchased or transferred between departments, prices, deliveries, and inventories. Confers with suppliers to determine reasons for late deliveries.

May compare prices, specifications, and delivery dates and award contract to bidders or place orders with salesmen or mail-order firm. May compute total cost of items purchased, using calculating machine. May classify priorities according to regulations. May verify bills from suppliers with bids or purchase orders.

4155-126 STOREMAN(clerical) DPT:367
stock checker; stock clerk.

GED: 3 SVP: 5 EC: I PA: M 4 7

Receives, stores, orders and issues supplies and merchandise and keeps records:

Counts and sorts incoming articles to verify receipt of items on requisitions or invoices, and examines them for conformance to specifications. Stores articles in containers or bins or on shelves, according to identifying information such as style, size or type. Fills orders or issues supplies from stock. Prepares inventories and requisitions material to fill incoming orders. Compiles reports of use of stock-handling equipment, adjustment of inventory counts and stock records, spoilage or damage to stock, location changes and refusal of shipments.

May be designated according to type of stock handled or location; for example,

Stock Clerk, Narcotics
Storeman, Ship
Stores Clerk, Machine Shop
Warehouseman

4155-130 STOCK-RECORDS CLERK(clerical) DPT:387
stock-control clerk.

GED: 3 SVP: 5 EC: I PA: L 4 7

Compiles stock records concerned with quantity, cost and type of material received, stored and issued in department, estimates needs and requisitions new stocks:

Verifies material received or issued against requisitions, shipping notices or invoices to ensure that there are no irregularities in order. Compiles stock control records, consumption rates and other data. Calculates stocks held in various departments, examines production, sales or other records and estimates future needs. Requisitions required stock. Makes periodic checks of records against stocks held. May be responsible for safe custody of stock. May operate typewriter or calculating machines.

4155-134 MAGAZINE KEEPER(clerical) DPT:367
powderman.

GED: 3 SVP: 4 EC: I 6 PA: M 3 4 7

Stores and issues explosive materials; such as, blasting powder, ammonium nitrate, dynamite, fireworks, and munitions, in magazine of explosives or munitions factory, mine or construction project and keeps required records:

Records nature and quantity of materials received, shipped, or issued. Keeps charts of floor plan of magazines indicating utilization of space and type of explosives stored. Cuts fuses to specified lengths. Ties together specified numbers of fuses for issue. Enforces observance of safety regulations by persons entering magazine.

May direct workers engaged in moving and loading explosives into trucks or box cars.

4155-138 PRESCRIPTION CLERK, OPTICAL GOODS
(scient. & ind. equip., n.e.c.) DPT:367

GED: 3 SVP: 4 EC: I PA: L 4 7

Selects lens blanks and frames for production of eyeglasses according to prescription specifications, and keeps stock inventory at specified level:

Reads prescription to determine specifications; such as, lens power, base curve, frame style and colour. Selects lens blanks or ground lenses and frames from stock, and routes them with prescription to production section. Requisitions lens blanks and eyeglass frames and communicates with suppliers by letter and telephone to keep stock at specified level. Keeps stock of ground and bifocal lenses. Keeps inventory of stock and prepares reports of damage to stock and refusal of shipments.

4155-142 TOOL-CRIB ATTENDANT(clerical) DPT:367
tool clerk; tool-room storeman.

GED: 3 SVP: 4 EC: I PA: M 3 4 7

Requisitions, receives, stores, and issues hand tools, dies, and equipment, such as measuring devices and materials in industrial and other establishments:

Records stock on hand and tools loaned. Searches for lost or misplaced tools. Conducts periodic inventory and requisitions stock as required. Unpacks and verifies supplies received against invoices. Stores items in an orderly and accessible arrangement. Examines and reports damaged and worn-out equipment to superiors. Coats tools with preservative using brush or spray gun. Itemizes and prices lost tools or equipment chargeable to specific workers.

May mark tools and equipment to identify ownership, using electric pencil. May inspect safety equipment, such as belts and ropes, and recommend replacement as required. May be designated according to item stored; for example,

Die-Storage Man

4155-146 INVENTORY CLERK(clerical) DPT:387
physical-inventory clerk.

GED: 3 SVP: 4 EC: I PA: L 4 7

Compiles records of amount, kind and value of merchandise, material, equipment or stock on hand in establishment or department of establishment:

Counts stock, material, merchandise or equipment and posts totals to inventory records. Compares inventories taken by other workers with office records, or computes figures from sales, purchase, shipping, production, stock or equipment records to obtain current theoretical inventory. Verifies clerical computations against physical count of stock and adjusts errors in computation or count, or investigates and reports reasons for discrepancies. Computes inventory balance, price and costs. Prepares reports of inventory balance, prices and shortages. Assists in preparing statistical reports.

May route merchandise from one area to another. May operate adding and calculating machines. May be designated according to type of inventory; for example,
Equipment-Inventory Clerk
Inventory Clerk, Perpetual

4155-150 SALVAGE CLERK(clerical) DPT:387
GED: 3 SVP: 4 EC: I PA: L 4 7

Receives and sorts unserviceable equipment and supplies for sale, disposal or reclamation:

Sorts and stores items according to type, size or condition. Places sorted items into containers for movement to storage, disposal, re-assembly or reclamation areas. Prepares records indicating number of items rejected and the reasons for rejection.

May dismantle items to recover salvageable parts, using hand tools. May tag items, indicating specifications and condition.

4155-154 LABORATORY CLERK(clerical) DPT:584
GED: 3 SVP: 4 EC: 1 PA: L 4 7

Keeps records of chemical and other supplies in laboratory:
Keeps records of chemicals, apparatus and samples; such as, coal, oil, sugar, beet pulp, liquor sugar crystals and molasses received for testing in control laboratory. Weighs, prepares and records shipment of chemical supplies furnished by laboratory. Cleans glassware and other laboratory apparatus and salvages sample bottles or containers for reuse.
May keep production records for quality control purposes. May calculate production data according to formulas, using calculating machine. May type production data onto production records.

4155-158 KITCHEN-STOCK CLERK(clerical) DPT:587
GED: 3 SVP: 4 EC: 1 PA: M 3 4 7

Verifies quantity and quality of foodstuffs received, and issued to kitchen from storeroom:
Weighs, observes and measures foodstuffs to verify quantity and quality. Oversees distribution of all foodstuffs. Keeps inventory of stock on hand in kitchen.
May store usable foods returned from dining-rooms.

4155-162 CHECKER, INVOICE AND ORDER(clerical) DPT:687
GED: 3 SVP: 3 EC: 1 PA: L 4 7

Verifies quantity, quality, condition, type, value and other related factors of articles purchased, sold or produced, against invoices, orders, records and reports:
Checks incoming and outgoing articles against invoices and orders by examining them to ensure that they are in good condition and according to specifications. Sorts items in predetermined sequence groups. Ensures that all goods ordered are received or dispatched.
May be designated according to area of work; for example, Warehouse Checker

4155-166 MAIL-ORDER FILLER(ret. trade; whole. trade) DPT:687
order filler.
GED: 3 SVP: 3 EC: 1 PA: L 4 7

Fills customers' orders and marks price of merchandise on order forms:
Reads order to ascertain catalogue number, size, colour, and quantity of merchandise requested. Obtains merchandise from bins or shelves. Places merchandise on conveyance for transfer to wrapping area. Pushes hand truck to convey merchandise between work areas. Restocks shelves and bins with commodities.

4155-170 TOOTH CLERK(medical) DPT:687
GED: 3 SVP: 3 EC: 1 PA: S 4 7

Selects false teeth used to make dental plates according to order specifications:
Selects teeth specified according to colour, shape of jaw and physical description of patient; such as, sex, facial characteristics, age, and physical type. Matches teeth with those of mould made by dentist. Places order in tray for shipping room.

4155-174 TRANSFORMER-STOCKROOM MAN(elec. power) DPT:687
GED: 3 SVP: 3 EC: 1 PA: M 4 7

Stores, issues, drains and fills with oil, transformers used in electric-power system:
Moves new transformers to storage space, using hoist. Opens valve using hand tools to drain oil from used transformers. Depresses button to start motor-driven pump which forces used oil through filtering machine and into storage tank. Selects type and size of transformer to fill requisition. Fills oil container of transformers to be issued with new or reclaimed oil. Loads transformers onto truck for delivery, using electric hoist. Keeps record of stock available.
May keep work area clean, using rags and floor broom.

4155-178 LINEN-ROOM ATTENDANT(clerical) DPT:487
linen-supply clerk.
GED: 2 SVP: 3 EC: 1 PA: M 4 7

Stores, issues, and inventories linen for beds, tables and uniforms, in hotels, hospitals, laundries and other establishments:
Examines laundered items to ensure cleanliness and serviceability. Stores laundered linen on shelves, after verifying numbers and types of items. Counts, and records linen to fill requisitions. Conducts monthly and yearly inventories to identify items for replacement.
May sort, count and record number of items of soiled linen, and place linen in containers for transmittal to laundry. May stamp linen with identification mark. May mend torn articles by hand or machine or send them for repair.

4155-182 CAR SUPPLIER(rail trans.) DPT:687
GED: 2 SVP: 3 EC: B PA: M 3 4 7

Stocks railway passenger coaches and dining cars with supplies; such as, non-perishable food, soap, crockery, linens, paper cups and towels:
Obtains supplies from storeroom, using stock list as guide. Requisitions additional supplies to replenish stock. Keeps record of materials supplied to cars. Drives gasoline-powered tractor to deliver supplies to each car. Loads supplies onto cars, placing them as designated.

4155-199 OTHER STOCK CLERKS AND RELATED OCCUPATIONS

This group includes stock clerks, not elsewhere classified; for example, those who receive, store and issue moulds used in casting, and print rollers used for producing wallpaper patterns; assemble, clean and pack hospital supplies; and supply stocks of parts for appliances. Typical examples of occupational titles covered by this residual group definition are:
Medical-Supply Attendant(medical)
Mould Supplier, Rubber(clerical)
Parts Supplier(clerical)
Print-Rollerkeeper, Wallpaper(clerical)

4157-WEIGHERS

This unit group includes occupations primarily concerned with weighing materials, products, railway cars and other vehicles; and keeping relevant records.

4157-110 HIGHWAY-SCALE OPERATOR(gov. serv.) DPT:364
weighing-station operator.
GED: 3 SVP: 4 EC: 1 PA: L 4 7

Weights and inspects motor trucks at highway weighing station to determine compliance with statutory weight limits and other provisions of provincial law:
Moves levers and weights on scale-bar and reads indicators to determine gross weight of vehicle. Subtracts tare from gross weight to obtain net weight of vehicle load. Inspects vehicles for axle weight distribution, legality of cargo and display of valid licences and permits, according to published regulations and standards. Observes and records gross and axle weight registered by automatic scales built into road siding. Compiles and submits reports describing specified violations of Motor Vehicle Traffic Laws. Notifies driver of defects in his vehicle. Orders driver to unload excess cargo to meet weight limitation, or to redistribute axle weight of cargo more equally in truck. Reports to police serious violations and failure to stop for weighing, or intercepts offending vehicle, using departmental car. Attends provincial court hearings to offer evidence for prosecution authorities.

4157-114 WEIGHER, TRUCK(clerical) DPT:464
GED: 3 SVP: 3 EC: 1 PA: L 4 7

Weighs truckloads of material; such as, gravel, cinder blocks and fill to determine weight of load contents:
Moves levers and weights on scale-bar of platform scale, and reads indicators to determine gross weight of vehicle and load. Subtracts weight of vehicle from gross weight to obtain net weight of vehicle load. Records weight and nature of contents to compute payments to driver or owner. Advises driver concerning overloading and uneven distribution of load.

4157-118 WEIGHER, DRUG AND TOILET GOODS(clerical) DPT:484
GED: 3 SVP: 3 EC: 1 PA: L 4 7

Weighs ingredients or packaged products for use in manufacturing drug and toilet goods, using fine scales and analytical and torsion balances:

Weighs empty container or scale pan and adjusts scales and balances to compensate for tare. Examines ingredients to detect impurities, lumps, discoloration or evidence of spoilage. Scoops or dumps ingredients into container or scale pan until specified weight is attained. Records items weighed, and weight or volume discrepancies. Pours liquids into graduates to compare volume with formula specifications.

4157-122 WEIGHER, RAILWAY CAR(rail trans.) DPT:464
GED: 2 SVP: 3 EC: 1 PA: S 4 7

Weighs freight cars containing incoming or outgoing products electronically or on beam scale, by one of the following methods:

1. Pushes button on console and records scale readings of gross weight of specified car indicated on display panel, as cars roll down the hump over electronic scale. Subtracts tare to ascertain net weight of products in car. 2. Signals engineman to move cars on and off scale. Moves levers and weights on scale bar and reads gross weight from indicators. Records scale readings of gross weight of loaded car, and subtracts tare to ascertain net weight of goods in car.

May weigh newly constructed freight, tank and hopper cars after assembly, to determine tare weight for registration on car.

4157-126 WEIGHER-COUNTER(clerical) DPT:484
GED: 2 SVP: 3 EC: 1 PA: M 4 7

Computes number of small parts such as typewriter parts and semiconductor pellets in container, using balance scale and calculating machine for stock or production records:

Sets container of parts on platform of ratio-balance scale. Slides balance weight on beam to correspond with weight stamped on container to compensate for tare. Removes quantity of parts from container, and places them in scale pans used to counterbalance and weigh parts in container. Adds or removes parts to bring scale indicator to zero position. Counts parts in each pan and multiplies them by thousands, hundreds and tens to determine number of parts in container. Records number of parts in container on stock or production records.

May transport weighed containers to designated areas, using handtruck.

4157-130 WEIGHER, PRODUCTION(clerical) DPT:584
GED: 2 SVP: 3 EC: 1 PA: L 5 6 7

Weighs products or quantities of material for production processes according to specifications, using balance, platform or floor scales, by performing any combination of the following duties:

Selects materials from storage area or receives them on a conveyance. Weighs products or materials, using balance, platform or floor scales to establish or confirm weight. Dumps, feeds or otherwise moves materials for next stage of production. Weighs ladles and other containers full of raw materials such as scrap and metal, limestone or iron ore. Records factors such as weight, grade and price of material. Verifies accuracy of scales and makes required adjustments.

4157-134 WEIGHER(clerical) DPT:484
weighing clerk.
GED: 2 SVP: 2 EC: B PA: M 4 7

Weighs goods received, issued, produced or shipped and maintains relevant clerical records:

Places or directs placing of goods on weighing machine. Reads indicator to determine gross weight, subtracts weight of container to obtain net weight, and records it on ticket or product. Records details of goods weighed and submits returns and reports as required.

May examine, inspect and classify goods weighed. May be designated according to materials weighed; for example,
Carcass Weigher
Garment Weigher
Tobacco Weigher

4157-138 TARE MAN(sugar) DPT:584
GED: 2 SVP: 2 EC: 1 6 PA: M 3 4

Weighs samples of sugar beets to determine amount of tare (waste) for computation of payment to growers:

Samples beets from each delivery and tags sample with grower's identification code. Weighs sample and records weight. Washes dirt from beets, using water and pan and removes tops, using knife. Reweighs beets and records weight on grower's tag. Sends sample to laboratory for analysis.

4157-142 WEIGHER, LIVESTOCK(clerical) DPT:584
GED: 2 SVP: 2 EC: 1 7 PA: L 4

Weighs livestock in stockyard by lots, or individually:

Records name of livestock owner and commission agency on scale ticket. Moves levers, dials, and weights on scale bar, reads indicators and records weight on scale ticket by inserting ticket in scale and moving lever to punch weight. Records number of head of livestock, identification marks (brands), and price on ticket.

May call weights to clerk for recording in ledger. May assist in driving livestock in and out of weighing pen. May segregate livestock according to weight, age, and sex, for sale by lots.

4159-MATERIAL RECORDING, SCHEDULING AND DISTRIBUTING OCCUPATIONS, N.E.C.

This unit group includes occupations, not elsewhere classified, concerned with examining orders for goods and services, preparing schedules, receiving, counting, sorting, shipping and distributing goods and accounting for stock. Activities include: appraising, classifying, and reviewing warranty claims for faulty equipment; estimating requirements; recording equipment and labour used and work progress; identifying and classifying materials; and attaching price tickets to merchandise.

4159-110 ESTIMATOR, JEWELLERY(jewellery & precious metal prod.) DPT:467
GED: 4 SVP: 6 EC: 1 PA: S 4 5 7

Estimates cost and discusses production requirements for custom-made jewellery production with clients and staff:

Estimates amount of material and labour required to produce or alter particular items or types of jewellery, utilizing knowledge gained from experience of designs, orders, and current prices and demand. Keeps record of estimates. Discusses alternate possibilities with clients concerning design, cost, or other details to assure customer satisfaction.

4159-114 TELEPHONE-EQUIPMENT APPRAISER(telecom.) DPT:384
GED: 4 SVP: 4 EC: 1 PA: L 4 7

Appraises and classifies returned telephone equipment to determine disposition and price:

Dismantles and examines returned equipment; such as, telephone hand sets, private branch exchange switchboards and teletype

machines to identify and classify them according to price lists and catalogues. Determines condition and adaptability for current use. Records classification, salvage value, price and disposition. Writes identifying information on tags regarding disposition of components, and attaches tags to apparatus. Evaluates claims for material incorrectly supplied or damaged in transit, and writes claim approval or rejection slips.

4159-118 WARRANTY CLERK(clerical) DPT:367
GED: 3 SVP: 5 EC: 1 PA: S 4 7

Reviews claims and examines parts received from dealers or individuals, requesting reimbursement for defective items under warranty:
Reads claim forms to ascertain that adequate information is given, and that amount of labour claimed for changing or repairing parts is reasonable. Completes reports, telephones dealer for additional information or returns forms to dealer for completion. Prepares reports to summarize number and types of defects as shown on claims. Inspects parts to determine whether or not claim should be allowed. Prepares reimbursement documents for payment of claims and submits them for approval.

4159-122 TANK CALIBRATOR(metal stamp., press. & coat.) DPT:584
calibration man.
GED: 3 SVP: 4 EC: B 4 PA: M 2 3 4 7

Calibrates tanks of varying sizes and shapes to measure incremental and total capacities for certification, using liquid calibration methods: Inserts feed hose from storage container into tank and turns valves to admit measured quantities of liquid from container through meter of known accuracy into tank being calibrated. Marks level of fluid attained in tank on tank scale or dipstick. Repeats process to obtain measurements at specified levels. Calibrates small tanks by admitting liquid to tank to be calibrated, through certified flow-meter and observing level of liquid through sight glass. Records calibration data, such as fluids used, temperatures, serial numbers, correction factors and capacities.

4159-126 ROAD CLERK(rail trans.) DPT:384
GED: 3 SVP: 4 EC: 1 PA: L 4 7

Records material and machinery used by section crews, geographical location of work, personnel and other information:
Records nomenclature and quantity of material and machinery used to repair and maintain railroad tracks and right-of-way within division of railroad system. Records geographical location, type of repairs and time required to complete work. Types requisitions for additional materials. Keeps time and personnel records.
May consolidate reports submitted by other road clerks and be designated accordingly,
Roadmaster Clerk

4159-134 WATER-METER READER(water works) DPT:584
GED: 3 SVP: 3 EC: B PA: L 4 7

Reads water consumption meters and measures amount drawn from reservoir through sluice gates in customer's power plant:
Reads water meters and records number of gallons used by customer. Examines visually meters and connections for defects or unauthorized connections. Makes minor adjustments to meter to correct inaccuracies, using hand tools. Reads indicator on sluice gate to determine width of gate and verify meter readings. Measures distance from watermark on retaining wall outside gate to water level, using ruler, and records distance and time of measurement. Submits reports showing meter readings, gallons used, and irregularities found.

4159-138 SAMPLE-CONTROL CLERK(clerical) DPT:587
GED: 3 SVP: 3 EC: 1 PA: L 4 7

Stores test samples of food and drug materials and records results for product study program:
Files and tags containers of raw materials used in pharmaceutical compounding, and samples of milk, cream, cheese and preserved meats, or other products to be tested in health standards laboratory. Stores samples of finished products in refrigerators, in labelled containers and records identifying data in alphabetical index listing.

Keeps tickler file for withdrawal of samples for testing. Withdraws samples on dates indicated or when requested, and takes them to laboratory for testing. Charts experimental results data, such as appearance, butter-fat content and bacteria count. Files product study control charts.

4159-142 WRAPPER-COUNTER(tobacco) DPT:587
GED: 3 SVP: 3 EC: 1 PA: L 4 7

Counts and records number of tobacco-wrapper leaves produced by other workers tending wrapping machines:
Counts and ties specified number of tobacco-wrapper leaves, writes number on ticket and attaches ticket to bundle. Initials number of wrapper-leaves shown on diary sheets which are used to calculate employees' pay. Sends report to pay office at end of shift, showing number of machine, name of operator, and number of wrapper-leaves produced.

4159-146 DRESS CHECKER(ret. trade) DPT:567
GED: 2 SVP: 2 EC: 1 PA: L 4 7

Records number of dresses, coats and suits carried in and out of dressing rooms by customers who wish to try them on before buying:
Assigns dressing room to customer and enters number of room on record sheet. Permits customer to take designated number of dresses into room. Records number of dresses carried in by customer. Receives unwanted garments from customer and returns them to sales personnel.

4159-150 TICKET CHECKER(tobacco) DPT:567
GED: 2 SVP: 2 EC: 1 7 PA: L 4 7

Checks and verifies grade of tobacco to ensure that blending will conform to formula:
Removes warehouse ticket from opened hogshead and compares grade, recorded with processing grade, to prevent processing of mixed grade,s or to blend grades according to formula. Removes and tags tobacco of questionable grade from processing line. Files tickets according to grade, and indicates on each ticket, purpose for which tobacco is to be used. Removes processor's grade ticket, and files with warehouse ticket for production records. Enters ticket number, grade, code number, date and time in office control log.

4159-154 PRICE MARKER(ret. trade; whole. trade) DPT:587
GED: 2 SVP: 2 EC: 1 PA: L 4 7

Prints and attaches price tickets to articles of merchandise, using one of the following methods:
1. Marks selling price by hand on articles or price tickets, and ties, glues or staples price ticket to each article. 2. Inserts type in printing frame or turns knob to set type. Presses button or turns handle to print selling price and identifying information on rolls of tickets. Presses lever or plunger of mechanism that pastes, ties, or staples ticket to article.
May record number and type of articles marked, and pack them in boxes. May pile merchandise on dolly, and fill shelves with prepared merchandise. May be concerned with marking particular articles and be designated accordingly,
Garment-Price Marker

4159-158 SORTER, UPHOLSTERY PARTS(furn.) DPT:587
GED: 2 SVP: 2 EC: 1 PA: L 4 7

Sorts, counts and bundles upholstery parts or covers in furniture sewing department:
Collects parts and carries them to work table. Sorts, counts and stacks parts according to colour, quantity, size, material and part- number specifications on work ticket. Staples identification tag to first part on stack. Records colour, quantity, material and part number from work ticket onto production report form. Ties stacked parts into bundles, using string or scrap fabric strip. Moves bundles to storage area on pallets or by hand and places in bins or on shelves, according to part number.

4159-162 SORTER, DEFECTIVE GARMENTS(garment & fabric) DPT:687
GED: 2 SVP: 2 EC: 1 PA: L 4 7

Sorts damaged or rejected garments, and delivers garments to sewing or cutting department for repairs:
Transports rejected garments to work table, using hand cart. Sorts and

stacks garments on hand cart according to information on repair tag. Delivers damaged garments to sewer or cutter for repair. May sort and match garments or parts according to size and pattern. May mark and cut out piece to replace damaged part of garment, using hand shears.

416-LIBRARY, FILE, CORRESPONDENCE CLERKS AND RELATED OCCUPATIONS

This minor group includes clerical occupations concerned with classifying and filing publications, correspondence and other related data in libraries and offices; composing correspondence and related material to obtain or provide information; and making records. These occupations are classified in the following unit groups:

4160 Supervisors: Library, File, Correspondence Clerks and Related Occupations

4161 Library and File Clerks

4169 Library, File, Correspondence Clerks and Related Occupations, n.e.c.

4160-SUPERVISORS: LIBRARY, FILE, CORRESPONDENCE CLERKS AND RELATED OCCUPATIONS

This unit group includes occupations, as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.), concerned with supervising and co-ordinating the activities of workers engaged in issuing and lending books; classifying and filing publications, correspondence and other material in offices and libraries; and composing correspondence reports and similar data to obtain or provide information.

4160-110 SUPERVISOR, LIBRARY AND FILE CLERKS(clerical) DPT:138

Supervises and co-ordinates activities of workers engaged in recording, classifying and filing publications, correspondence and other related data in libraries and offices, (Unit Group 4161): Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.). May supervise workers in a particular activity and be designated accordingly; for example, Supervisor, File Clerks Supervisor, Library Clerks

4160-199 OTHER SUPERVISORS, LIBRARY, FILE AND CORRESPONDENCE CLERKS

This group includes supervisors of library, file and correspondence clerks and related workers, not elsewhere classified; for example, those who supervise and co-ordinate activities of workers engaged in classifying and comparing fingerprints, and preparing correspondence and reports relating to customs laws, and correspondence in general. Typical examples of occupational titles covered by this residual group definition are:

Supervisor, Correspondence Clerks(clerical)
Supervisor, Customs Clerks(gov. serv.)
Supervisor, Fingerprint Classifiers(gov. serv.)

4161-LIBRARY AND FILE CLERKS

This unit group includes clerical occupations concerned with recording, classifying and filing publications, correspondence and other material in offices and libraries. Activities include: lending or issuing books, films and recordings; searching for and compiling information; issuing files; updating library catalogues, file indexes and records, and

examining, sorting and filing correspondence and other data. Library Technical Assistants are in Unit Group 2353, TECHNICIANS IN LIBRARY, MUSEUM AND ARCHIVAL SCIENCES.

4161-110 MEDICAL-RECORD LIBRARIAN(medical) DPT:367
hospital-record clerk.
GED: 4 SVP: 5 EC: 1 PA: L 4 5 6 7

Compiles and maintains medical records and statistics of hospital and clinic patients:

Reviews clinical records for completeness and contacts medical personnel to obtain missing data. Codes, indexes and files records of diagnoses, diseases and treatments. Compiles statistics; such as, reports on admissions, births, deaths, transfers and discharges. Releases medical information to staff and authorized government agencies, insurance companies, physicians, hospitals, and medical information and research centres. May brief and transcribe records. May testify in court to authenticate medical records.

4161-114 BRAND RECORDER(gov. serv.) DPT:367
GED: 3 SVP: 5 EC: 1 PA: S 5 6 7

Approves and records brand marks used to identify animals, such as horses, cattle or sheep, and produce or other commodities, to facilitate identification:

Receives application for new brand, discusses brand with applicant and verifies design against official brand records to prevent duplication. Records assignment, reassignment or cancellation of brand to appropriate organization or individual. Receives brand recording fee and submits brand certificate for approval. Keeps files or reports compiled by field inspectors to prevent fraud or unauthorized use of brands. Compiles statistics for publication of brand book and monthly supplementary lists.

4161-118 LIBRARY CLERK(educ.) DPT:367
library attendant.
GED: 4 SVP: 4 EC: 1 PA: L 3 4 5 6 7

Compiles records, sorts and shelves books, and issues and receives library materials; such as, books, films, and phonograph records, performing any combination of the following duties:
Issues books to patrons, writes identification data and due-in-date on

cards, or uses photographic record-keeping device. Inspects returned books for damage, verifies due-date, and computes and receives overdue fines. Reviews records to compile list of overdue books and sends overdue notices to borrowers. Sorts books, publications, and other items; such as, phonograph records and films, according to classification code. Returns them to shelves, files, or other designated storage areas. Examines material on shelves to verify accuracy of placement. Locates books and publications for patrons. Issues borrower's identification card according to established procedures. Files cards in catalogue drawers according to system. Answers telephone inquiries and queries from patrons in library, referring persons requiring professional assistance to 2351-114 LIBRARIAN (educ.). Types material cards or issue cards and duty schedules. Makes minor repairs to books, using mending tape, paste and brush. May be designated according to type of library or department, or task performed; for example,

Bookmobile Clerk
Branch-Library Clerk
Library Clerk, Art Department
Library Clerk, Book Return
Library Clerk, Braille and Talking Books

4161-122 FILE AND CLASSIFICATION CLERK(clerical) DPT:387
GED: 3 SVP: 5 EC: 1 PA: L 3 4 7

Classifies, files and records papers, and searches documents and other data to supply written information from files:
Classifies material and assigns code when classification is not readily discernible. Labels jackets or other file containers by hand, or using typewriter. Disposes of obsolete files according to established policies. Keeps diary of material to be withdrawn, distributed, or sent to document destruction centre. Records serially-numbered documents; such as, important agreements and sensitive documents of limited circulation to maintain custody and control. Reviews files to insert additional data, or to locate and supply written and oral information.

4161-126 TAPE LIBRARIAN(clerical) DPT:387
computer-tape librarian.
GED: 4 SVP: 4 EC: 1 PA: L 4 7

Classifies, catalogues, and maintains library of reels of magnetic or punched paper tape, or decks of punch cards used for electronic data-processing:
Classifies and catalogues material according to content, purpose of program, routine, and date on which generated. Assigns code conforming to standardized system. Prepares index cards for file references. Stores materials and records according to classification and catalogue number. Issues materials and keeps charge-out records. Inspects returned tapes or cards and notifies supervisor if worn or damaged.
May keep files of program developmental records and operating instructions.

4161-130 CUT MAN(clerical) DPT:387
GED: 3 SVP: 4 EC: 1 PA: L 2 4 7

Files advertising and layout cuts (patterns), mats, electrotypes, or films and offset plates used in printing:
Tags or marks cuts, mats or plates with identifying information and places them in filing cabinets, cases, or on shelves. Prepares card index for each item filed. Removes requested items from file and records date of removal on file card.
May wash plates to remove dirt, ink and oxides, and apply gum solution to plate surface to protect plate during storage. May hang or retrieve films or offset printing plates from racks.

4161-134 FILE CLERK(clerical) DPT:387
GED: 3 SVP: 3 EC: 1 PA: L 3 4 7

Files papers, documents and other data according to subject matter or other filing system:
Sorts cards, correspondence, invoices, receipts, photographs and other material according to filing system. Places material in specified filing cabinets, drawers or cases. Locates and removes material from files when requested. Keeps records of material removed. Stamps material received, traces missing file folders and writes or types indexing information on folders. Enters data on records.
May be designated according to subject matter filed; for example,
Change-of-Address Clerk
File Clerk, Correspondence
File Clerk, Drawings

4161-138 LIBRARY CLERK, FILMS AND RECORDINGS(clerical) DPT:387
film-vault clerk.
GED: 3 SVP: 3 EC: 1 PA: L 4

Stores, issues and lends motion-picture films, slides or recordings used for training, entertainment or educational purposes:
Compiles and keeps catalogue of films. Stores, issues and lends films, slides, scripts and records or other material used for film, slide or broadcast shows. Examines returned material for completeness or defects and prepares report.
May prepare monthly statistics on number of films distributed and attendance at film showings. May store films or recordings for radio and television broadcasting and be designated accordingly; for example,
Library Clerk, Films
Library Clerk, Recordings

4169-LIBRARY, FILE, CORRESPONDENCE CLERKS AND RELATED OCCUPATIONS, N.E.C.

This unit group includes occupations, not elsewhere classified, concerned with preparing and composing correspondence; making records; examining documents to obtain, verify and record information; and recording, classifying and filing correspondence, publications and other data in libraries and offices; and doing related work.

4169-110 FINGERPRINT CLASSIFIER(gov. serv.) DPT:267
fingerprint examiner.
GED: 4 SVP: 7 EC: 1 7 PA: S 4 5 7

Analyzes, classifies and compares fingerprints for positive identification of persons:
Analyzes and classifies each fingerprint impression according to specified grouping, using magnifying glass. Searches master file and compares fingerprints being studied with others, using microscope or magnifying glass, to determine if suspect has criminal record or is wanted for other crimes, or to identify missing or deceased persons and persons using aliases. Fingerprints police recruits, private investigators, and visa applicants for record purposes. Records fingerprints received by name, date and fingerprint number. Examines fingerprint evidence left at scene of crime, classifies prints and endeavours to identify person. Transfers latent fingerprints from objects, such as weapons or drinking glasses to record cards, using standard techniques. Prepares illustrative charts, sketches and photographic enlargements and instructs police in the use of exhibits in court.
May appear in court to explain fingerprint identification. May develop, print and enlarge negatives.

4169-114 CREDITS-ASSESSMENT CLERK(educ.) DPT:368 assessor.

GED: 5 SVP: 6 EC: I PA: S 5 6 7

Reviews educational records and evaluates transfer credits to ascertain student's eligibility for admission to specified college or university: Writes replies to inquiries from prospective students concerning admission and transfer of credits. Examines and compiles information obtained from official transcripts, correspondence, telephone and personal interview to establish file on academic status of transfer students, and to correlate courses already taken with those offered at school to which student seeks admission. Keeps records on non-degree or special students. Prepares information guides and other aids to compile reports concerning admission standards and accreditation.

4169-118 CUSTOMS CLERK(gov. serv.) DPT:367

GED: 4 SVP: 6 EC: I PA: L 4 5 6 7

Prepares correspondence and reports, completes forms and disseminates information relating to import or export of goods, according to applicable customs laws and regulations of government departments:

Examines entry, transportation, and other documents to ensure compliance with specified regulations. Calculates and enters duty charges and excise taxes where applicable. Answers inquiries from shipping representatives and the public. Makes preliminary, routine decisions and issues documents in compliance with specified laws.

May perform clerical tasks; such as, typing, filing and posting. May perform special duties and be designated accordingly, Customs-Excise Clerk

4169-122 CORRESPONDENCE CLERK(clerical) DPT:284 correspondence-review clerk.

GED: 4 SVP: 4 EC: I PA: S 4 7

Composes letters in reply to correspondence concerning items; such as, requests for information and merchandise, damage claims, credit information, delinquent accounts, incorrect billing and unsatisfactory service:

Reads incoming correspondence and gathers data to formulate reply or routes correspondence to individual or department concerned for investigation or reply. Types letters, dictates replies or selects and completes form letters.

May keep files of correspondence sent, received or requiring further action.

4169-126 CIRCULATION CLERK, NEWSPAPER(print. & pub.) DPT:368

GED: 3 SVP: 5 EC: I PA: S 4 7

Compiles records concerned with city or mail-order distribution of newspapers to subscribers, carriers or dealers, and adjusts complaints: Examines delivery tickets and records number of newspapers delivered to each area of circulation. Corrects errors in circulation records. Receives telephoned and written complaints from subscribers, and requests distributors to take corrective action.

4169-130 READER(bus. serv.; clerical) DPT:387

GED: 3 SVP: 4 EC: I PA: S 4 7

Reads newspapers, magazines, press reports and other periodicals for articles of value and interest:

Clips articles of interest using scissors, or marks items to be clipped, using coloured pencils and an established code system. Circulates articles to interested persons or posts them on bulletin board.

May file clipped articles. May prepare cross-indexes of important articles for future reference.

4169-134 METER-RECORDS CLERK(elec. power; utilities, n.e.c.) DPT:564

GED: 3 SVP: 4 EC: I PA: S 4 7

Keeps records concerning servicing, inspecting, and installing of electric or gas meters:

Enters on history cards, data, such as; name and address of customer, size and type of meter, and dates of servicing, inspecting, installing or disconnecting meters. Supplies meter repair and maintenance workers, accounting departments and customers with information from files as

requested. Receives orders for meter servicing, and prepares and types work orders. Receives cash for reconnection services.

May match permits with appropriate work orders and verify completeness of information. May make periodic reports of meters set, removed or changed.

4169-138 CHECKER, RECORDED DATA(clerical) DPT:687

GED: 3 SVP: 4 EC: I PA: S 4 7

Reviews recorded data to ensure accuracy:

Compares information, lists or figures on one record against the same data on other records. Corrects or makes note of omissions, errors or inconsistencies found.

May check specific types of recorded data and be designated accordingly; for example,

Billing Checker

Price Checker

Typing Checker

4169-142 SALES-PROMOTION CLERK(clerical) DPT:567

GED: 3 SVP: 2 EC: I PA: S 4 5 6 7

Reviews records of accounts to determine which customers should be sent follow-up or advertising literature:

Telephones customers or types form letters to solicit new business.

Checks inactive accounts and investigates reasons for inactivity. Keeps records of customers' purchases, entering type and amount of sale on card index or other form.

4169-146 SORTER(clerical) DPT:687

GED 2 SVP: 3 EC: I PA: S 4 7

Sorts printed material into specified sequence or groups for filing, mailing, copying data and preparing reports:

Sorts items such as forms, cheques, receipts, bills, sales tickets, and correspondence according to addresses, codes, quantity, class or other prescribed methods.

May keep record of number of items filed, mailed or sorted. May be designated according to items sorted; for example,

Bill Sorter

Sales-Slip Sorter

Ticket Sorter

4169-150 FINGERPRINT CLERK(gov. serv.) DPT:567

GED: 2 SVP: 2 EC: I PA: L 4 5 7

Transfers fingerprints of individuals onto cards or forms:

Presses fingers of individual on ink pad or glass plate, and rolls them in specified spaces on card. Writes or types identifying information; such as, name, address and occupation on card. Files fingerprint cards or forms.

4169-154 SAMPLEMAN, PAPER(pulp & paper) DPT:587

GED: 2 SVP: 2 EC: I PA: L 4 7

Prepares samples of paper and paper products for filing and mailing, by performing any combination of the following duties:

Collects samples from paper, coating, and cutting machines. Cuts samples to specified dimensions to facilitate filing and mailing, using paper cutter. Marks samples with identifying information; such as, customer's order number, batch or reel number, grade and colour of paper. Files samples for use in tracing technical defects. Mails samples to customers and sales personnel, or distributes them to plant officials for examination. May collect and send samples of pulp and paper to laboratory for testing and compare test reports with specifications.

4169-158 PAGE, LIBRARY(educ.) DPT:687

library-shelving clerk; runner; stack clerk.

GED: 2 SVP: 2 EC: I PA: L 2 3 4 7

Fetches library materials and returns them to shelving area:

Trucks or carries books, periodicals, audio-visual and other library materials between issue desk and shelving area. Stacks items on shelves according to classification and code number. Verifies correct stacking sequence by reading code numbers. Performs other clerical duties; such as, clipping premarked items from publications.

4169-162 TOLL-RATING CLERK(telecom.) DPT:687
telephone-toll-timing clerk.
 GED: 2 SVP: 2 EC: 1 PA: S 4 7

Classifies telephone-toll tickets to compute charges for long- distance calls requiring assistance of operator:
 Sorts toll tickets according to mileage zones, distance between telephone stations, and area where call is to be billed. Reads date-time stamp on toll-ticket to determine length of call. Assembles minute-lead cards, traffic-transmittal cards and toll tickets into modules for computation of charges.

**4169-199 OTHER LIBRARY, FILE AND
 CORRESPONDENCE CLERKS, AND RELATED
 OCCUPATIONS**

This group includes other library, file and correspondence clerks, not elsewhere classified, for example those who prepare and compose correspondence, make records, examine books, newspapers and documents to obtain, verify and record information, and to classify and file correspondence, publications and other data. Typical examples of occupational titles covered by this residual group definition are:
 Card Filer(clerical)
 Morgue Keeper(print. & pub.)

417-RECEPTION, INFORMATION, MAIL AND MESSAGE DISTRIBUTION OCCUPATIONS

This minor group includes occupations concerned with receiving clients and customers, making appointments, giving information in person and by telephone, distributing mail, delivering messages and operating telephone switchboards. These occupations are classified in the following unit groups:

**4170 Supervisors: Reception, Information, Mail
 and Message Distribution Occupations**

4171 Receptionists and Information Clerks

4172 Mail Carriers

4173 Mail and Postal Clerks

4175 Telephone Operators

4177 Messengers

**4179 Reception, Information, Mail and Message
 Distribution Occupations, n.e.c.**

4170-SUPERVISORS: RECEPTION, INFORMATION, MAIL AND MESSAGE DISTRIBUTION OCCUPATIONS

This unit group includes occupations, as described under the master title, 01-250 SUPERVISOR/FOREMAN (any ind.), concerned with supervising and co-ordinating the activities of workers engaged in receiving clients and customers, making appointments, giving information in person and by telephone, distributing mail, delivering messages and operating telephone switchboards.

**4170-110 SUPERVISOR, MAIL AND POSTAL
 CLERKS**(clerical) DPT:138

Supervises and co-ordinates activities of workers, in government and private industry, engaged in sorting, processing and bagging mail, computing postal costs, recording daily transactions, selling postage stamps and money orders, and registering and insuring mail, (Unit Group 4173):
 Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

4170-114 SUPERVISOR, MAIL CARRIERS(gov. serv.) DPT:138
supervisor, letter carriers.

Supervises and co-ordinates activities of government workers engaged in arranging and delivering mail according to specified route, recording delivery of registered mail and collecting money for cash-on-delivery packages, (Unit Group 4172):
 Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

4170-118 SUPERVISOR, MESSENGERS(clerical) DPT:138

Supervises and co-ordinates activities of workers engaged in running errands; sorting, delivering and collecting letters, packages and messages; distributing office supplies and performing similar routine duties, (Unit Group 4177):
 Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

**4170-122 SUPERVISOR, RECEPTIONISTS AND
 INFORMATION CLERKS** (clerical) DPT:138

Supervises and co-ordinates activities of workers engaged in receiving clients and customers in establishments, making appointments, providing information and answering inquiries by telephone or in person, (Unit Group 4171):
 Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).
 May supervise workers engaged in a particular activity and be designated accordingly; for example,
 Supervisor, Hospital-Admitting Clerks
 Supervisor, Price-Information Clerks

**4170-126 SUPERVISOR, TELEPHONE
 OPERATORS**(telecom.) DPT:138
telephone operator, chief.

Supervises and co-ordinates activities of workers engaged in operating public and private telephone switchboards to relay incoming, inter-office and outgoing calls in computing toll charges, supplying information, and keeping related records, (Unit Group 4175):
 Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

4170-130 SUPERVISOR, POSTAL STATION(gov. serv.)
DPT:138
GED: 4 SVP: 7 EC: 1 PA: S 5 6 7

Supervises and co-ordinates activities of workers engaged in providing postal services in a postal station area:
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.). Establishes work schedule for wicket and letter-carrier staff. Oversees postal services of sub-post offices and reports on need for opening, transferring and closing sub-post offices. Safeguards and accounts for postal values and post office revenues. Recommends changes in letter-carrier walk routes.

4171-RECEPTIONISTS AND INFORMATION CLERKS

This unit group includes occupations concerned with receiving clients, customers and others in offices and establishments, making appointments, providing information and answering enquiries by telephone or in person.

4171-110 HOSPITAL-ADMITTING CLERK(medical)
DPT:364
GED: 3 SVP: 5 EC: 1 PA: S 4 5 6 7

Interviews incoming patient or representative, records information required for admission, and assigns patient to room:
Records patient's name, address, age, religion, persons to notify in case of emergency, or insurance company responsible for payment of bill, and ascertains information regarding illness or accident. Gives brochures to patient or representative explaining hospital regulations, such as visiting hours, payment of accounts and schedule of charges. Types admitting record and routes it to designated department. Obtains signed statement from patient to give consent for treatment. Schedules appointments for examinations in hospital clinic according to nature of illness. Answers telephone to give out general information concerning patient care.
May receive payment on accounts. May work in emergency section of hospital and be designated accordingly.
Emergency-Admitting Clerk

4171-114 PRICE-INFORMATION CLERK(clerical) DPT:368
GED: 3 SVP: 5 EC: 1 PA: S 4 5 6 7

Provides prices and data regarding items for sale:
Furnishes prices on items of merchandise by telephone or mail, requested by customers and others. Marks price of item on order sheet or other purchase form. Compiles data from various departments or sources and prepares quotation for customer. Lists selling prices to be charged for various items sent to distributing agents or stores. Performs general office duties, such as typing and filing.

4171-118 RECEPTIONIST(clerical) DPT:367
appointment clerk; reception clerk.
GED: 3 SVP: 3 EC: 1 PA: S 4 5 6 7

Greets people coming into office or establishment, ascertains their wants, directs them to appropriate person or places and schedules appointments for employer:
Obtains name of caller coming into office and arranges for interview. Answers inquiries and provides information regarding activities carried on inside or outside of establishment. Records name, time of call, nature of business and person called upon. Schedules appointments with employer for clients, customers or patients, by mail, telephone or in person, and records time and date of appointment in appointment book. Indicates when appointments have been filled or cancelled. Telephones clients to remind them of appointments.
May prepare and dispatch accounts, and receive and record payments in ledger. May perform a variety of clerical duties, such as typing, filing, collecting and distributing mail and messages. May perform receptionist duties in a variety of offices and be designated accordingly; for example,
Receptionist, Business
Receptionist, Doctor's Office

4171-122 INFORMATION CLERK(clerical) DPT:368
GED: 3 SVP: 4 EC: 1 PA: L 4 5 6

Provides a variety of information to customers and the public, by performing one or any combination of the following duties:
Informs persons regarding activities carried on in office or organization. Tells customer where merchandise is located in retail establishment, and advises hotel guests concerning services, such as laundry and valet services. Answers requests for information from company officials and employees. Calls officials or employees to information desk, if required, or obtains answers to specific requests for information and provides it for inquirers. Answers inquiries regarding departures, arrivals, stops and destination of scheduled vehicles.
May keep record of questions asked. May operate public address system and answer telephones to provide information. May provide information in a particular establishment and be designated accordingly; for example,
Information Clerk, Department Store
Information Clerk, Hospital
Information Clerk, Hotel

4172-MAIL CARRIERS

This unit group includes occupations concerned with arranging and delivering mail according to specified routes, recording delivery of registered mail and collecting money for cash-on-delivery packages.

4172-110 LETTER CARRIER(gov. serv.) DPT:377
mail carrier; postman.
GED: 3 SVP: 3 EC: 0 6 PA: M 2 4 7

Delivers mail on established route after sorting it according to streets and numbers:
Inserts mail into compartments of mail rack to sort for delivery. Delivers letters, small packages and printed matter sent through the mail service. Collects money for cash-on-delivery packages. Records deliveries of registered mail. Leaves cards to inform patrons where to call for mail which could not be delivered, and returns undelivered mail to postal station or sub post office. Keeps records of and distributes cards for changes of addresses, and completes forms to notify publishers of changes.
May deliver telegrams or special types of mail. May drive motor vehicle to deliver mail along route outside corporate limits of town or city and be designated accordingly,
Rural-Mail Carrier

4173-MAIL AND POSTAL CLERKS

This unit group includes occupations in government or private business concerned with preparing, sorting and bagging mail, computing postal costs, recording daily transactions, selling postage stamps and money orders, and registering and insuring mail.

4173-110 GOVERNMENT-POSTAL CLERK, WICKET(gov. serv.) DPT:367
GED: 4 SVP: 4 EC: 1 PA: M 4 5 6 7

Conducts and records postal transactions at wicket of post office:
Sells postage and unemployment insurance stamps, postal cards and stamped envelopes. Fills out and sells money orders. Registers and insures mail and computes mailing costs of letters and parcels. Sorts mail according to province or route, address, name of person, organization or other scheme. Examines mail for correct postage. Cancels postage, using rubber stamp or cancelling machine. Records daily transactions on printed forms. Receives inquiries concerning mail delivery, theft and loss, completes appropriate forms and routes them for investigation. Posts circulars on bulletin board for public information. Issues hunting permits to shoot migratory birds. Accepts and records payments of government annuities and post office box rentals. Balances all transactions daily.

4173-114 EXPRESS CLERK(rail trans.) DPT:387

GED: 3 SVP: 4 EC: 1 5 PA: H 2 3 4 7

Sorts mail or packages enroute in express car:

Receives parcels and valuables for express shipment. Sorts mail or packages in express car. Places valuables in express-car safe, and guards safe throughout journey. Loads and unloads express shipments to and from express car at train stops. Prepares waybills and reports on express shipments.

4173-118 REVENUE-POSTAL CLERK, WICKET(clerical) DPT:367

GED: 3 SVP: 3 EC: 1 PA: L 4 5 6 7

Receives letters and parcels and sells postage stamps, postal cards, money orders and stamped envelopes in contract post-office station; Weighs parcels on scale and computes mailing cost based on weight and destination. Verifies weight of letters and computes cost of registering and insuring letters and parcels. Answers questions pertaining to mail regulations or procedures, in person and by telephone. Cancels postage on parcels, using rubber stamp. Balances all transactions daily.

4173-122 PARCEL-POST CLERK(clerical) DPT:387

mail-order sorter.
GED: 3 SVP: 3 EC: 1 PA: M 4 7

Sorts, weighs, wraps, examines and affixes postage to parcel-post, express and air-freight packages and records collect-on-delivery (C.O.D.) and insurance information; Examines wrapping and, if necessary, rewraps packages for conformance to company standards and postal regulations. Weighs packages, and determines postage, using rate book, and affixes postage stamps to packages, using damp sponge, or uses postage meter. Records information; such as, value, charges and destination of C.O.D. packages in record book. Copies and attaches C.O.D. card to packages, to indicate amount to be collected. Addresses packages or compares with records to verify accuracy. Sorts parcels for shipment according to destination or other classification and places parcels in mail bags or bins.

4173-126 MAIL CLERK(clerical) DPT:587

GED: 3 SVP: 3 EC: 1 PA: L 4 7

Sorts incoming mail for distribution and dispatches outgoing mail; Opens envelopes by hand or with letter-opening machine. Stamps date and time of receipt on incoming mail. Sorts mail according to destination and type; such as, returned letters, adjustments, bills, orders and payments. Readdresses undelivered mail bearing insufficient or incorrect address. Collects, records and forwards incoming and outgoing registered mail. Examines outgoing mail for appearance and seals envelopes by hand or with envelope-sealing machine. Stamps outgoing mail with postage meter. Folds letters or circulars and inserts into envelopes. Mails letters, products, samples and promotional material to prospective customers. Keeps record of registered mail. May address mail, using addressing machine. May perform duties in a specific location and be designated accordingly; for example, Registered-Mail Clerk
Trust-Mail Clerk

4173-130 MAIL SORTER(gov. serv.) DPT:687

mail clerk.
GED: 3 SVP: 3 EC: 1 PA: M 3 4 7

Sorts and processes mail in post office; Picks up and scrutinizes incoming mail to ensure that address is legible and correct, sufficient postage has been paid, parcels are in condition for delivery and postal regulations have not been contravened. Sorts incoming and outgoing mail into mail racks, pigeon-holes or lock bags (mail sacks with locks) according to destination. Segregates items requiring special handling owing to damage, insufficient postage, illegible and incorrect address or suspected contravention of postage regulations. Transfers mail from primary to final sorting areas, using wheeled equipment. Ties incoming sorted mail in bundles, indicating letter carrier's route number on each bundle and tosses tied bundles into lock bags. Counts and records number of bags dispatched.

May search directories to find addresses for incorrectly addressed mail. May transfer C.O.D., registered, special delivery, and short-paid mail to contract mail workers and letter carriers, maintain records for payment of services provided by contract workers, weigh and record mail and relieve other post office clerks. May perform duties in a railway station post office and be designated accordingly, Railway-Mail Clerk

4173-134 MAILER(clerical) DPT:584

GED: 2 SVP: 3 EC: 1 PA: M 4 7

Mails and delivers newspapers, periodicals, envelopes, cartons and other printed material; Wraps or bundles printed matter by hand or automatic bundler. Addresses bundles or wrapped printed matter by hand or using tying machine. Stamps, tags or labels material according to mailing lists and delivery orders, using stencils or stamping machine. Sorts bundles according to destination and places bundles to be mailed in specified mail bags. Stacks loads, and unloads bundles onto and from trucks and conveyors. Counts and keeps daily record of bundles and copies handled. May keep files of back-dated newspapers to provide research material. May keep card-record-distribution file of units mailed or delivered to subscribers and dealers. May drive truck to deliver bundles of newspapers, magazines and other printed material.

4173-199 OTHER MAIL AND POSTAL CLERKS

This group includes mail and postal clerks, not elsewhere classified; for example, those who handle and bag mail. A typical example of an occupational title covered by this residual group definition is: Mail Handler(clerical)

4175-TELEPHONE OPERATORS

This unit group includes occupations concerned with operating public and private telephone switchboards to relay incoming, inter-office and outgoing calls; computing toll charges; supplying information; and keeping related records.

4175-110 TELEPHONE OPERATOR(telecom.) DPT:464

GED: 3 SVP: 3 EC: 1 PA: S 4 5 6 7

Operates telephone switchboard to assist customers in establishing long-distance or local telephone connections; Observes signal light on switchboard, plugs cords into trunk-jack, and dials or presses button on key punchboard to make connections. Inserts ticket in time-stamping device to record time of toll calls. Consults chart to determine charges for pay-telephone calls and requests coin deposits for long-distance calls. Gives assistance to customers who have difficulty with local calls, by dialing numbers and informing them of area code numbers. Takes special action in cases of emergency; such as, fire, crime or accident. May make long-distance connections only and be designated accordingly, Long-Distance Operator

4175-114 TELEPHONE OPERATOR(clerical) DPT:564

switchboard operator.
GED: 3 SVP: 3 EC: 1 PA: S 4 5 6 7

Operates a telephone switchboard to relay incoming, outgoing and inter-office calls; Observes switchboard for incoming calls and moves cords, switches or other devices to contact person called. Makes connections for outgoing calls by plugging cords in jacks or operating switches. Makes long-distance calls or gives necessary instructions to other telephone operators. Ascertains and records charges for long-distance or other calls. Supplies information to callers and takes messages. Operates a system of bells or buzzers to call individuals to telephone. May keep record of calls placed and toll charges. May perform clerical duties such as typing and filing.

4175-118 TELEPHONE-ANSWERING-SERVICE
OPERATOR(bus. serv.) DPT:564
 telephone secretary.
 GED: 3 SVP: 3 EC: 1 PA: S 4 5 6 7

Provides telephone-answering service for clients; such as, doctors, lawyers, executives, salesmen, tradesmen and others:
 Operates telephone switchboard to provide answering service for clients. Greets caller and announces name or phone number of client's office or establishment. Records and delivers messages, furnishes information, accepts orders and relays calls. Places telephone calls at request of client. Locates client in emergencies. Date stamps and files messages.

4175-122 DIRECTORY-ASSISTANCE OPERATOR(telecom.) DPT:664
 information operator.
 GED: 3 SVP: 3 EC: 1 PA: S 4 5 6 7

Provides telephone information from central office switchboard:
 Plugs in headphones and accepts calls continually. Consults card reels or directories to answer questions or refers clients to sources of desired information.

4177-MESSENGERS

This unit group includes occupations concerned with running errands; sorting, delivering and collecting letters, packages and messages; distributing office supplies; and performing similar routine duties.

4177-110 MESSENGER, BANK(bank. & finance) DPT:367
 bank runner.
 GED: 3 SVP: 4 EC: B PA: L 4 7

Collects and delivers cheques, securities, mail and other items, performing any combination of the following duties:
 Gathers items; such as, cheques, drafts and notes from various bank sections or departments, and prepares listing of items prior to delivering them to local clearing house, or to drawee bank for payment or acceptance. Delivers and picks up mail inside bank. Picks up incoming mail at post office and opens and sorts for internal distribution. Seals and stamps mail, using sealing machine and postage meter and delivers to post office. Collects data on daily transactions from branch banks at close of business hours and delivers to centralized data center for processing. Returns processed data to branch banks prior to commencement of next day's business to provide banks with up-dated accounts. Stores boxes of bank records on shelves in vault according to designated plan. Oversees destruction of bank records at expiration of legal retention date.
 May specialize in a particular activity and be designated accordingly, Records Custodian

4177-114 TELEPHONE MESSENGER, TELEGRAMS
 (telecom.) DPT:564
 message relay, telegrams.
 GED: 3 SVP: 3 EC: 1 PA: S 4 5 6 7

Receives and relays messages by telephone:
 Calls addressee, using telephone directories and card indexes to locate telephone number. Reads message and spells misunderstood words, using phonetic alphabet. Solicits reply to promote sale of services. Records message to be sent, in writing or using typewriter. Suggests rewording, if necessary, for clarity and conciseness. Quotes rates, explains classification, such as night letters, and reads sample messages to aid customer in preparing message. Counts words and figures and reads rate in rate book to bill customer. Ensures prompt handling of all wires received, and ensures delivery of confirmation of incoming wires.

4177-118 MESSENGER(clerical) DPT:673
 GED: 2 SVP: 3 EC: B 2 3 4 PA: M 4 7

Delivers messages and other items; such as, bonds, securities, mail, documents, packages, advertising copy, proofs or tear sheets to various departments within establishment or to other locations:
 Collects messages or other items and delivers them to offices or departments within establishment, or to other business concerns, by walking, using car, bicycle, motorcycle or riding public conveyance. Distributes office supplies to staff.
 May keep record of items received and delivered. May be concerned with special activity of messenger work and be designated accordingly; for example, Confidential Messenger
 Copy Boy
 Courier
 Runner

4177-122 DELIVERY BOY(ret. trade) DPT:674
 GED: 2 SVP: 3 EC: B 2 3 4 PA: M 2 3 4 7

Delivers orders to customers and unpacks merchandise in store:
 Walks, rides bicycle, or uses public conveyance to deliver merchandise to customers' homes. Collects money from customers for cash-on-delivery orders. Unpacks merchandise, marks prices on articles and stacks them on counters or shelves.
 May drive light delivery truck to transport merchandise. May sweep floors, run errands and wait on customers.

4177-126 TELEGRAPH MESSENGER(telecom.) DPT:674
 GED: 2 SVP: 2 EC: B 2 3 4 PA: L 4 5 6 7

Delivers telegrams and packages to consignees, and collects payment for messages delivered:
 Delivers telegrams and packages by walking, riding bicycle or using public conveyance. Collects payment for messages delivered.
 May drive automobile to deliver telegrams. May be designated according to method of delivery; for example, Telegraph Messenger, Automobile
 Telegraph Messenger, Bicycle

4177-199 OTHER MESSENGERS

This group includes messengers not elsewhere classified; for example, those who pass out handbills, samples and telephone directories. Typical examples of occupational titles covered by this residual group definition are:
 Handbill Passer(bus. serv.)
 Sample Distributor(bus. serv.)
 Telephone-Directory Deliveryman(bus. serv.)

4179-RECEPTION, INFORMATION, MAIL AND MESSAGE DISTRIBUTION OCCUPATIONS, N.E.C.

This unit group includes occupations, not elsewhere classified, concerned with activities, such as receiving clients and customers; distributing information, mail and messages; providing customers with information concerning freight rates and shipping schedules; marking quotations on boards in grain brokers' offices; and preparing, sorting and routing telegrams.

4179-110 COUNTER CLERK(telecom.) DPT:367
 GED: 4 SVP: 5 EC: 1 PA: L 4 5 6 7

Prepares telegrams and telegraph money-orders and cashes money-order warrants at telecommunications office public reception counter:
 Quotes rates to customer wishing to transmit message or money, and collects amount due. Routes message written by customer to teletype operator for transmission. Pays amount due on money-order warrant to customer awaiting money at designated terminal point. Keeps records of receipts and disbursements and balances cash on hand at end of day.
 May be concerned with processing telegraph money orders only and be designated accordingly, Money-Order Clerk

4179-114 EXPRESS AND FREIGHT INFORMATION
CLERK(motor trans.; rail trans.) DPT:368
 GED: 3 SVP: 5 EC: 1 PA: S 4 5 6 7

Provides information concerning express and freight rates and shipping schedules:
 Quotes express and freight rates by referring to rate book. Gives information to customer concerning shipping schedules and arrivals at express and freight terminals. Redirects telephone inquiries not concerned with general express and freight shipping to specific departments concerned.

4179-118 SERVICE MONITOR(telecom.) DPT:387
service observer.
 GED: 3 SVP: 5 EC: 1 PA: S 4 6

Monitors calls between telephone company employees and subscribers to assess quality of service to subscribers:
 Plugs headphones into special intercept equipment and listens to telephone conversations. Records, on standard report form, such matters as technical errors, improper demeanour of employees or departures from company policy, and forwards reports to supervisor for further action.
 May observe single groups of employees, such as service representatives.

4179-122 ROUTING CLERK(telecom.) DPT:567
 GED: 3 SVP: 4 EC: 1 PA: S 4 7

Sorts and routes telegrams or messages received by pick-up and delivery section of telecommunications office:
 Places folded messages into envelopes for delivery. Accepts requests for message pick-ups within area served by office. Sends messages to customers within city via telephone, and to customers in distant cities through teletype service. Reads map to sort messages and pick-up requests into routes. Dispatches messengers to deliver messages. Accepts and records remittances returned for messages which have been picked up.

4179-126 BOARD MARKER, GRAIN QUOTATION(bank. & finance) DPT:587
 GED: 2 SVP: 2 EC: 1 PA: L 4 7

Marks grain quotations on board in grain broker's office:
 Marks grain sales and price quotations opposite grain type and grade, on board, from information recorded on telex and transmitted from floor of grain exchange. Replenishes telex with tape.
 May perform office duties such as handling mail, issuing office supplies and filing.

4179-130 OFFICE BOY(clerical) DPT:677
 GED: 2 SVP: 2 EC: 1 PA: L 4 5 6 7

Performs any combination of the following duties in government office or business office of commercial or industrial establishment:
 Furnishes workers with clerical supplies such as paper, pencils and pens. Opens and sorts incoming mail for distribution and dispatches outgoing mail. Delivers oral or written messages. Collects, and distributes paperwork such as typed material, records or timecards among offices or departments.
 May file material such as correspondence, reports and invoices. May operate office machines. May be concerned with a specific task and be designated accordingly,
 Mail Boy

4179-134 TUBE OPERATOR(clerical) DPT:687
 GED: 2 SVP: 2 EC: 1 PA: S 4 7

Receives and routes messages through pneumatic-tube system:
 Routes carriers containing items, such as mail, messages, orders, and accounting or shipping documents to destination, by placing them in pneumatic-tube system. Empties incoming pneumatic-tube carriers, and examines and sorts items. Inserts items in carriers and reroutes them to department indicated on carrier dial.

4179-199 OTHER RECEPTION, INFORMATION, MAIL AND MESSAGE-DISTRIBUTION OCCUPATIONS

This group includes reception, information, mail and message-distribution workers, not elsewhere classified; for example, those concerned with providing information on flight and train arrivals and departures. A typical example of an occupational title covered by this residual group definition is:
 Caller(air trans.; rail trans.)

419-OTHER CLERICAL AND RELATED OCCUPATIONS

This minor group includes occupations, not elsewhere classified, concerned with collecting payments on accounts, adjusting and settling claims, arranging itineraries, providing tickets and reserving accommodation for travellers, registering guests in hotels and similar establishments, compiling and maintaining personnel records, dispatching men and equipment, collecting money from meters, reading water, gas and other meters, and performing other clerical duties of a general nature. These occupations are classified in the following unit groups:

4190 Supervisors, Other Clerical and Related

Occupations, n.e.c.

4191 Collectors

4192 Adjusters, Claim

4193 Travel Clerks, Ticket, Station and Freight

Agents

4194 Hotel Clerks

4195 Personnel Clerks

4197 General Office Clerks

4199 Other Clerical and Related Occupations, n.e.c.

4190-SUPERVISORS, OTHER CLERICAL AND RELATED OCCUPATIONS, N.E.C.

This unit group includes occupations, as described under the master title, 01-250 SUPERVISOR/FOREMAN (any ind.), concerned with supervising and co-ordinating the activities of

workers engaged in collecting payments on accounts, adjusting claims, making travel arrangements, maintaining personnel records, and performing general office clerical duties.

4190-110 SUPERVISOR, CLAIMS ADJUSTERS(clerical) DPT:138

Supervises and co-ordinates activities of workers engaged in investigating, validating and settling claims due to loss, accident and disaster, or other cause, and adjusting customers' complaints regarding merchandise or services, (Unit Group 4192):
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.). Refers claims to company's lawyers when unable to reach settlement. Attends court hearings to present evidence.

4190-114 SUPERVISOR, COLLECTION CLERKS(clerical) DPT:138

Supervises and co-ordinates activities of workers engaged in collecting payments on instalments or overdue accounts, and tracing whereabouts of customers whose addresses are unknown, (Unit Group 4191):
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.). Reviews investigation reports prepared by collectors before forwarding to creditors. Handles difficult cases where collectors have been unable to obtain payment. Reviews and approves or decides against cases recommended for legal action by collectors.

4190-118 SUPERVISOR, GENERAL OFFICE CLERKS(clerical) DPT:138

Supervises and co-ordinates activities of workers performing any combination of clerical activities which are of a general nature, (Unit Group 4197):
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

4190-122 SUPERVISOR, HOTEL CLERKS(cater. & lodg.) DPT:138

chief clerk, hotel.

Supervises and co-ordinates activities of workers engaged in registering and assigning rooms to guests, issuing room keys, stamping and sorting incoming mail, transmitting and taking messages, answering inquiries pertaining to hotel services and registration of guests, and presenting statements and collecting payment from departing guests, (Unit Group 4194):
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

4190-126 SUPERVISOR, PERSONNEL CLERKS(clerical) DPT:138

Supervises and co-ordinates activities of Personnel Clerks engaged in work related to hiring personnel, providing information to job seekers, investigating applicants' work history, compiling and keeping personnel information relevant to activities, such as recruitment, training, promotion, attendance, retirement and discharge of employees, (Unit Group 4195):
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).
May be concerned with a particular personnel activity and be designated accordingly; for example,
Supervisor, Attendance Records
Supervisor, Promotions
Supervisor, Recruitment
Supervisor, Retirement

4190-130 SUPERVISOR, TRAVEL CLERKS(clerical) DPT:138

Supervises and co-ordinates activities of workers engaged in clerical duties related to travel and transportation, such as arranging itineraries; providing tickets and reserving accommodation for travellers; selling airline, bus, railroad and steamship tickets, and arranging movement of passengers and goods, (Unit Group 4193):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).
May be concerned with a particular travel activity and be designated accordingly,
Supervisor, Ticket Clerks

4190-134 SUPERVISOR, COPYRIGHT CLEARANCE(broadcast., motion pic. & stage) DPT:138

GED: 5 SVP: 7 EC: I PA: S 5 6 7

Supervises and co-ordinates activities of workers engaged in examining copyrights of musical and literary material for radio and television programs:
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.). Ascertains that permission has been granted, or confers with owners for use of copyrighted material. Supervises personnel in examination of material to detect libelous and slanderous statements, and notifies requisite authorities for necessary action.
May supervise the operation of music library, and the purchase of music arrangements within approved budgetary controls. May be responsible for determining that all material for radio and television programs complies with government regulations and be designated accordingly,
Supervisor, Commercial Acceptance

4190-138 SUPERVISOR, NURSING REGISTRY(medical) DPT:138

GED: 5 SVP: 7 EC: I PA: S 5 6 7

Supervises activities of nursing registry, providing nurses for private duty according to regulations established by provincial professional nurses' association:
Maintains roster of nurses available for duty. Refers nurses as requested by clientele. Records number and type of calls received. Analyzes problems of registry to provide more efficient service and operations. Informs registering nurses of new and revised requirements and regulations. Assists in recruiting nurses for emergencies.
May be responsible for financial administration of registry.

4190-199 MISCELLANEOUS SUPERVISORS, CLERICAL AND RELATED OCCUPATIONS

This group includes clerical supervisors, not elsewhere classified; for example, those who supervise and co-ordinate activities of workers engaged in soliciting and receiving newspaper advertisements, collecting coins from coin-machine boxes, completing forms and reports and disseminating information relating to customs laws, and interviewing the public and compiling information on various topics and public issues. Typical examples of occupations covered by this residual group definition are:
Supervisor, Advertising Clerks(clerical)
Supervisor, Coin-Machine Collectors(clerical)
Supervisor, Customs Brokerage Clerks(bus. serv.)
Supervisor, Public-Opinion Interviewers(clerical)

4191-COLLECTORS

This unit group includes occupations concerned with collecting payments on instalments or overdue accounts, and tracing whereabouts of customers whose addresses are unknown.

4191-110 BILL COLLECTOR(bus. serv.) DPT:368

collection agent.

GED: 3 SVP: 4 EC: B PA: L 5 6 7

Collects overdue accounts, instalments, damage claims or cheques issued with insufficient funds, for collection agency:
Visits or telephones customer to collect amount due or arranges for payment at a later date. Traces addresses of customers who have moved by inquiring at post office or by questioning neighbours. Keeps records of accounts collected and those which require further action. Recommends legal action when it is impossible to collect payment of accounts by other means.

4191-114 LOCATOR(bus. serv.) DPT:368
skip tracer; tracer.
 GED: 3 SVP: 4 EC: B PA: L 5 6 7

Traces skips (debtors who change residence without notifying creditors, to evade payment of bills) for creditors or other concerned parties:
 Searches city and telephone directories, and street listings, and inquires at post office in attempt to locate skip. Interviews, telephones or writes former neighbours, friends, relatives and former employers to elicit information pertaining to whereabouts of skips. Follows up leads and prepares investigation report to creditor.

4191-118 COLLECTION CLERK(clerical) DPT:367
 GED: 3 SVP: 3 EC: I PA: S 5 6 7

Notifies customers of delinquent accounts and attempts to secure payment, using postal services or telephone:
 Removes delinquent account from file. Selects prescribed form letter and mails it to customer. Repeats process, using different forms if reply is not received within specified time. Calls customer on telephone in attempt to secure payment. Prepares statements by hand or using typewriter and forwards to supervisor or credit department for action if customer fails to respond. Sorts, reads, answers, and files correspondence relating to collection work. Receives payments and posts amount paid to customer's account.
 May obtain information on persons requesting credit. May prepare and type reports on cheques written off as losses. May personally interview customers regarding delinquent accounts and be designated accordingly,
 Past-Due-Accounts Clerk

4191-122 CLERK, CUSTOMER SERVICE(ret. trade) DPT:467
lay-away clerk.
 GED: 2 SVP: 2 EC: I PA: L 5 6 7

Receives payment on merchandise stored in lay-away department until customer calls for it, or ensures delivery after final payment:
 Places merchandise on shelves in storeroom. Keeps records showing amount of each payment, and balance due on account. Contacts customer when specified period of time has passed without payment, to determine if customer still desires merchandise. Gives merchandise to customer, or ensures delivery after customer has made final payment.

4191-199 OTHER COLLECTORS

This group includes other collectors, not elsewhere classified; for example, those who interview customers regarding delinquent accounts, and disconnect meters when customers vacate premises without notice, or refuse to make payment. A typical example of an occupational title covered by this residual group definition is:
 Collector, Special-Meter Reader(elec. power)

4192-ADJUSTERS, CLAIM

This unit group includes occupations concerned with appraising, investigating, validating and settling claims due to loss, accident and disaster, or other cause. Properties claim agents are classified in Unit Group 1179, OCCUPATIONS RELATED TO MANAGEMENT AND ADMINISTRATION, N.E.C.

4192-110 CLAIM ADJUSTER(insur. & real estate) DPT:118
public adjuster
 GED: 4 SVP: 7 EC: B PA: L 5 6 7

Investigates and adjusts claim for loss or damages filed under an insurance policy, or determines company's liability in claim or other action:
 Recommends legal action when it is impossible to collect payment of accounts by other means.

Reviews claim form and insurance policy to determine insurance coverage, or examines claim to determine items to be investigated. Interviews or corresponds with claimant, witnesses, doctors and other hospital personnel, examines police and hospital records, and inspects property damage to determine amount of company's liability. Prepares report of findings and negotiates settlement with claimant, or other adjusting agency, when there is division of responsibility. Recommends litigation when settlement cannot be negotiated, and attends litigation hearings.
 May investigate claims or adjust claims of a specific nature and be designated accordingly; for example,
 Adjuster, Casualty Insurance
 Adjuster, Fire Insurance
 Adjuster, Marine Insurance
 Claim Adjuster, Motor Vehicle
 Claim Adjuster, Railroad
 Claim Investigator

4192-114 SERVICE REPRESENTATIVE(bus. serv.) DPT:168
 GED: 4 SVP: 7 EC: I PA: S 5 6 7

Investigates dealers' claims for reimbursement of defective motor-vehicle parts:
 Examines parts claimed to be defective and approves or disapproves automobile dealer's claim. Assists dealer in handling unsettled claims by consulting with service personnel or customers. Reviews claim with dealer for labour or material adjustments. Prepares reports showing volume and types of claims handled and settlement allowed. Advises dealer and service personnel regarding service operations or construction of products. Studies dealer's organizational needs and advises him on matters; such as, parts, tools and equipment, to handle service volume.

4192-118 CLAIM EXAMINER(insur. & real estate) DPT:268
 GED: 4 SVP: 7 EC: I PA: S 5 6 7

Reviews settled insurance claims to ensure that payments and settlements have been made according to company practices and procedures:
 Analyzes data used in settling claim to ensure that the claim was valid. Reports overpayments, underpayments and other irregularities to management. Monitors claim costs including cost of claim administration.
 May confer with legal counsel on claims requiring litigation.

4192-122 ADJUSTMENT CLERK(clerical) DPT:368
complaint clerk
 GED: 4 SVP: 4 EC: I PA: L 4 5 6 7

Investigates customers' complaints about unsatisfactory service, damaged or incorrect merchandise or incorrect billing of accounts, performing any combination of the following duties:
 Reads written complaints or discusses difficulties with customers, and records information. Examines files or confers with other personnel to gather facts. Estimates value of lost or damaged articles. Reads meters or examines reports for weather conditions during billing period to determine cause of high bills. Traces and notifies laundry and dry-cleaning customers of unclaimed articles held in storage. Accepts payments for balance due, or issues vouchers for reimbursement. Orders exchange of merchandise, or repair or adjustment of meters and equipment.
 May be designated according to type of complaint adjusted; for example,
 Investigator, Bill Complaints
 Laundry-Adjustment Clerk

4192-126 TIRE-ALLOWANCE CLERK(ret. trade; whole. trade) DPT:367
 GED: 3 SVP: 4 EC: I PA: M 4 5 7

Determines allowance due on replacement of defective tires and tubes returned by customers:
 Examines tire or tube visually and tactually, to determine if defect resulted from faulty construction or road hazards. Ascertains degree of tread wear to prorate allowance on replacement by measuring tread depth with gauge, and taking into account size, type and quality of tires. Explains basis for allowance to customers, sales representatives or distributors.
 May remove serial numbers from still-usable tires and cut them with knife to prevent reuse. Completes claim form indicating percentage of tread wear and replacement price, according to adjustment manual.

4193-TRAVEL CLERKS, TICKET, STATION AND FREIGHT AGENTS

This unit group includes occupations concerned with clerical duties related to travel and transportation, such as arranging itineraries, providing tickets and reserving accommodation for travellers, selling airline, bus, railroad and steamship tickets, and arranging the movement of passengers and goods.

4193-110 TRAVEL AGENT(clerical) DPT:168 travel consultant.

GED: 4 SVP: 5 EC: 1 PA: S 5 6 7

Plans itinerary and schedules travel accommodations for customers, individually or by groups:

Ascertains customer's requirements, studies travel routes and considers cost, availability and convenience of different types of transportation, to select that most suitable to customer. Makes and confirms travel and hotel reservations and informs customer of bus, plane, ship and train connections. Marks suitable roads and possible detours on road map showing route from point of origin to destination and indicates points of interest such as restaurants, hotels and emergency repair services available during trip. Calculates mileage of marked route. Notifies customer of travel dates, baggage limits and medical and visa requirements. Ensures that all travel clearances have been obtained. Aids customer to complete travel forms. Gives customer tickets for confirmed transportation and hotel reservations and collects required amount of money.

May calculate fares for taxi or nonscheduled or chartered bus trips from rate tables, at customer's request.

4193-114 RESERVATION CLERK(clerical) DPT:368

GED: 4 SVP: 4 EC: 1 PA: S 5 6 7

Obtains travel and hotel accommodations for employees and guests of business concern, issues tickets, types itineraries, and compiles reports of transactions:

Ascertains rates and obtains confirmation of travel and lodging space. Issues and validates airline, rail, and bus tickets. Prepares travel booklet for passenger, containing tickets, copy of itinerary, written lodging confirmations, pertinent credit cards, and travel suggestions. Keeps current directory of hotels, motels, and timetables, and answers inquiries concerning routes, fares, accommodation, and passport requirements. Reviews routine invoices of transportation charges, and types and submits reports to company and to transportation agencies. Prepares and types claim forms for refunds and adjustments and reports of transactions processed.

May escort travellers to or from transportation terminals.

4193-118 TICKET CLERK(air trans.; motor trans.; rail trans.; water trans.) DPT:368

GED: 4 SVP: 4 EC: 1 PA: L 4 5 6 7

Makes and confirms reservations and sells tickets for passengers travelling by air, motor, railway or water transportation:

Describes routes, services and accommodation, and arranges reservations, using timetables, manuals, reference guides and tariff books. Answers inquiries regarding departures, arrivals, destinations and other pertinent information. Telephones customer to inform him of changes in travelling arrangements, or to cancel or confirm reservation. Keeps inventory of available passenger space. Informs load control personnel, at various arrival and departure points of changes in passenger itinerary, to control space and ensure utilization of seating capacity. Computes cost of tickets and issues baggage receipts.

May check baggage and direct passenger to designated area for loading. May announce arrival and departures of buses, planes and trains.

4193-122 TRAVEL CLERK(clerical) DPT:368 travel-information clerk.

GED: 4 SVP: 4 EC: 1 PA: S 5 6 7

Provides travel information and arranges accommodations for tourists:

Answers inquiries, offers suggestions, and provides descriptive literature pertaining to trips, excursions, and entertainment features, such as sports events, concerts, and plays. Discusses routes, time schedules, rates, and types of accommodations with patrons to determine their preferences, and makes reservations. Verifies arrival and departure times, traces routes on maps, and arranges for baggage handling and other services requested by patrons.

May purchase, resell, and deliver tickets. May arrange for visas and other documents required by foreign travellers. May contact individuals and groups to sell package tours on own initiative.

4193-126 CARGO AGENT(air trans.) DPT:368 transportation agent.

GED: 3 SVP: 4 EC: 1 PA: M 4 5 6 7

Routes inbound and outbound air freight shipments to their destinations:

Takes telephone orders from customers and arranges for pick-up and delivery of freight to loading platform. Determines and arranges special handling requirements. Assembles cargo for export and prepares customs documents. Weighs items to be shipped and determines cost, using rate book. Itemizes charges of shipment and makes up bill for customer. Prepares manifest (list of cargo) to accompany shipment. Telephones shippers and consignees to notify them of delay or arrival of shipment, and to arrange for delivery. Maintains and updates tariff and company regulations relating to cargo service function. Provides information on rate, routing, acceptance requirements, import and export regulations and documentation requirements.

4193-130 RAIL-EXPRESS CLERK(rail. trans.) DPT:367

GED: 3 SVP: 3 EC: 1 PA: M 4 5 6 7

Accepts and releases express consignments, and computes and receives payments on account:

Weights parcels received from customer, and refers to rate chart to compute charges. Writes receipts and bill of charges. Accepts payment or routes parcels collect-on-delivery. Sorts parcels and places them in baskets or on racks according to destination. Releases parcels to consignee upon presentation of written notice or other identification, and accepts payment where applicable. Answers inquiries regarding shipping procedures. Prepares lists to account for payments received, and balances cash on hand.

May route items, such as money and other valuables, firearms, radioactive materials or explosives and be designated accordingly, Money Clerk

4193-199 OTHER TRAVEL CLERKS, TICKET, STATION AND FREIGHT AGENTS

This group includes occupations, not elsewhere classified; for example, those who sell tickets, check baggage and maintain building and grounds of small railroad station. A typical example of an occupational title covered by this residual group definition is: Station Agent(rail. trans.)

4194-HOTEL CLERKS

This unit group includes occupations in hotels and related establishments concerned with registering guests, renting rooms, checking keys and valuables and supplying information.

4194-110 HOTEL CLERK(cater. & lodg.) **DPT:364**
desk clerk; front clerk.
GED: 3 SVP: 4 EC: I PA: L 4 5 6

Accommodates hotel patrons by performing any combination of the following duties:

Registers guests and assigns rooms to them. Issues room key and instructions to bellboy. Date stamps, sorts and racks incoming mail and messages. Sends and receives messages by telephone and teletype. Receives, delivers or forwards packages, baggage, freight and other items for hotel guests. Answers enquiries regarding hotel services and registration of guests by letter, telephone or in person. Settles guests' complaints in the absence of the manager or assistant manager. Makes and confirms reservations by letter or telephone. Presents statements to departing guests and collects payment.

May work in a particular section or at a specific duty and be designated accordingly; for example,

Day Clerk
 Key Clerk
 Reservations Clerk
 Room Clerk

4195-PERSONNEL CLERKS

This unit group includes clerical occupations concerned with compiling and maintaining personnel information relevant to activities such as recruitment, training, promotion, attendance, retirement and discharge of employees.

4195-110 PERSONNEL CLERK(clerical) **DPT:367**
employment clerk.
GED: 4 SVP: 4 EC: I PA: S 4 5 6 7

Interviews applicants for employment, processes application forms and compiles and keeps personnel records:

Interviews applicants to obtain information; such as age, marital status, work experience, education, training and occupational interest. Informs applicants of company employment policies. Refers qualified applicants to employing officials. Writes letters to references indicated on application or telephones agencies; such as, credit bureaus and finance companies. Prepares documents relating to employees showing name, address, qualifications, rates of pay and other details and amends records as required. Keeps sickness record and registers leave absences, bonuses earned, pay and other information. Searches personnel records and forwards information to authorized persons.

May administer and score aptitude, personality and interest tests. May fill out and explain bonding application required by company. May telephone or write applicant to inform him of acceptance or rejection for employment. May issue badges, passes and identification cards and be designated accordingly,

Identification Clerk

4197-GENERAL OFFICE CLERKS

This unit group includes occupations concerned with performing any combination of clerical duties of a general nature; such as, copying, computing, compiling, filing and recording information.

4197-110 MANIFEST CLERK(motor trans.; water trans.) **DPT:384**
GED: 4 SVP: 5 EC: I PA: L 4 7

Compiles and types manifest showing freight shipped by land or water transport, for use at customhouse or terminals:

Types information on manifest; such as, name of shipper, tonnage and destination from bills of lading and shipper's declaration. Computes payments, and compares figures and totals on manifest with statement of accounts submitted by accounting department, to verify accuracy of manifest. Resolves discrepancies on accounting records or manifest. Prepares, issues and sends out bills. Compiles

records and reports. Tabulates and posts data in record books, and answers correspondence. Prepares medical, customs and immigration documents required to permit ship to enter and leave port.

4197-114 CLERK, GENERAL OFFICE(clerical) **DPT:367**
GED: 4 SVP: 4 EC: I PA: S 4 5 6 7

Performs clerical duties; such as, copying, compiling, recording and otherwise processing information, requiring knowledge of office systems and procedures:

Copies and compares data and compiles records and reports. Tabulates and posts data in record books. Opens, sorts and distributes mail. Answers correspondence. Sends out and receives payment of bills and accounts, and issues receipts. Makes entries in books showing receipts, payments and other transactions. Takes orders and calculates buying or selling price of merchandise. Completes official forms relating to licences, sales taxes or other matters. Compiles summaries of transactions and other reports for information of management. Receives and interviews callers, arranges appointments, directs inquiries to appropriate person or department, and adjusts complaints. May operate office machines; such as, typewriter, adding, calculating and duplicating machines. May prepare payrolls and purchase supplies. May answer telephone requests from private wire or tie-line patrons regarding handling of messages and repair services.

4197-118 CONTRACT CLERK, MOTOR VEHICLE(ret. trade) **DPT:464**
GED: 3 SVP: 5 EC: I PA: S 4 5 6 7

Verifies accuracy of, and completes motor vehicle sales' contracts:

Verifies initial computation of total sales price made by salesman, calculates sales tax, transfer and licence fees, insurance premiums and interest, using rate tables, schedules and calculating machine. Verifies amounts and number of payments, trade-in allowance and total price of vehicle. Interviews customer to obtain additional information and explains terms of contract, particularly loan contracts. Corresponds with motor vehicle agencies to clear automobile titles. Obtains licence, signs registration documents on vehicle traded in and transfers titles on those sold. Contacts finance company to ascertain approval of loan. Communicates with customer or salesman to arrange for vehicle delivery. Keeps file of sales contracts, and records particulars of motor vehicles sold.

4197-122 WARD CLERK(medical) **DPT:367**
GED: 3 SVP: 3 EC: I PA: L 4 5 6 7

Prepares and compiles records in hospital nursing-unit; such as, obstetrics, pediatrics and surgery:

Copies information such as patient's temperature, pulse rate and blood pressure, from nurse's records onto patient's medical file. Records diet instructions. Keeps file of medical data on patients in hospital unit. Prepares notices of patients' discharges to inform business office. Keeps record of absences and hours worked by unit personnel. Requisitions supplies designated by nursing staff. Answers telephone, relays messages to patients, and directs visitors to patients' rooms. May operate office machines, such as typewriter, adding, calculating and duplicating machines. May compile census of patients.

4197-126 PROPERTY CLERK(gov. serv.) **DPT:567**
GED: 3 SVP: 3 EC: I PA: L 4 7

Receives, stores and releases prisoner's personal effects and recovered or stolen property:

Prepares record of articles and valuables received. Describes article, writes name of owner if known, name of person on police force from whom received, and reason for retention. Issues property to officer to be used as evidence at trial. Releases lost or stolen property to owners upon proof of ownership. Returns property of prisoner when released from custody.

4197-130 OFFICE CLERK(clerical) **DPT:567**
GED: 3 SVP: 3 EC: I PA: L 4 7

Performs routine clerical duties; such as, copying and recording and otherwise processing information, not requiring knowledge of systems or procedures:

Writes and proofreads bills, statements or other documents, copying information from one record to another. Sorts and files records. Addresses envelopes or packages by hand, typewriter or

addressograph machine. Stuffs envelopes by hand or machine. Stamps or numbers forms. Counts, weighs or measures material or merchandise, and receives money from customers. Answers telephone, conveys messages and runs errands. May stamp, sort and distribute mail. May file bills, statements or other documents and records. May record information; such as, name, address, article to be repaired, service to be rendered, and may prepare work order.

4197-134 POLICE-STATION CLERK(gov. serv.) DPT:584
GED: 3 SVP: 3 EC: 1 PA: L 4 7

Records activities of police personnel and information concerning arrests made by policemen of district:
Keeps records, books, and files pertaining to activities of police personnel. Types prisoner's identification on arrest sheet or booking slip and forwards it to record division. Wraps and tags prisoner's money and valuables.
May receive calls by radio for police aid, and record them in station-house blotter.

4197-138 TAX CLERK(clerical) DPT:484
GED: 3 SVP: 2 EC: 1 PA: S 4 7

Computes provincial taxes on sales transactions:
Computes, manually or using calculating machine, provincial tax on sales transactions according to various rates in effect in provinces serviced. Keeps record of amount due and paid. Prepares total of tax payable to various provinces and submits totals to accounting department.

4199-OTHER CLERICAL AND RELATED OCCUPATIONS, N.E.C.

This unit group includes clerical occupations, not elsewhere classified, concerned with dispatching men and equipment, receiving and relaying messages, monitoring protective alarm systems, reading meters, issuing licences, proof-reading, monitoring and marking written tests, searching property titles, serving court orders, checking traffic patterns, processing mail or telephone orders, accepting classified advertising for publication, checking credit applications, collecting coins from meters, investigating customer complaints, changing charts on recording instruments, handling lost and found articles and performing other clerical functions involving activities, such as compiling, computing, copying and recording.

Dispatching Occupations 4199-110 through 4199-130

4199-110 DISPATCHER, OIL WELL SERVICES(oil & nat. gas) DPT:364
GED: 3 SVP: 5 EC: 1 PA: S 5 6

Dispatches oil-well-service crews to designated areas requiring service and maintenance:
Receives telephone requests for services from customers. Relays information to crews and field personnel, using telephone or radio. Dispatches crews to oil well servicing assignments. Prepares requisitions for supplies. Keeps time reports and other records. Confers with customer regarding drilling or production problems and outlines types of services available. Computes quantities of materials required and quotes prices for services.

4199-114 DISPATCHER(gov. serv.) DPT:364
GED: 3 SVP: 4 EC: 1 PA: S 4 5 6

Operates radio and telephone in forest-ranger office:
Operates radio and telephone equipment in ranger office to receive, transmit, and relay reports and requests between firefighting crews, fire-lookout stations, district office, and mobile units, and relays information or orders to and from officials concerned. Maintains

communications log, and maps location of fires, men, and equipment from field reports. Requisitions new equipment and office supplies and orders repairs to be made to equipment as required. Summons and dispatches firefighting crews in cases of emergency, using radio or telephone.

4199-118 DISPATCHER, RADIO(gov. serv.; water trans.) DPT:364
GED: 3 SVP: 4 EC: 1 PA: S 5 6

Receives complaints from public concerning crimes or emergencies, dispatches police, fire or ambulance cars and relays messages to remote units, using radio:
Records complaints received and radio calls relayed and received, in log book. Co-ordinates all police, fire, ambulance and other emergency requests in small municipalities, relaying instructions to radio unit concerned. Monitors broadcasting activities of mobile units and fixed stations and reports rule infractions or crew absence to supervisor. Prepares monthly report of radio traffic handled by station.
May operate teletype machine to send and receive messages. May direct activities of fire-alarm and signal operators engaged in receiving complaints from public. May dispatch tugboats, using landline and radio-telephone, or may dispatch ship pilot to ships entering or leaving port and be designated accordingly; for example,
Dispatcher, Ship Pilot(water trans.)
Dispatcher, Tugboat(water trans.)

4199-122 FIRE-ALARM OPERATOR(gov. serv.) DPT:364
dispatcher, fire department.
GED: 3 SVP: 4 EC: 1 PA: S 4 5 6

Operates municipal fire alarm system and notifies firemen of location of fire:
Receives incoming fire calls by telephone, through alarm system or radio transmitter and receiver. Questions caller, observes alarm register that codes location of fire, and scans running cards to determine whether fire is located within area served by fire department. Notifies fire stations, using radio, and starts alarm system that automatically contacts all fire stations and indicates location of fire. Relays messages received from scene of fire, such as requests for additional help and medical assistance. Records date, time, type of call and destination of messages received or transmitted. Tests alarm system periodically by contacting fire stations.

4199-126 PROTECTIVE-SIGNAL OPERATOR(bus. serv.) DPT:364
GED: 3 SVP: 4 EC: 1 PA: L 4 5 6 7

Monitors electrical protective alarm system in central station to detect disturbances, such as fire, burglary or other irregularities and notifies alarm investigators for appropriate action:
Interprets coded audible or visible signals received on alarm signal console panel, by direct wire or register tape from subscriber's premises, that indicate opening and closing of protected premises, progress of watchmen, unlawful intrusions or fire. Notifies investigators of location of alarm and relays messages to patrol cars, using two-way radio communication equipment. Records changes in subscriber opening and closing schedules. Prepares daily alarm activity and subscriber service reports. Adjusts alarm equipment in central station to ensure efficient operation, using hand tools. Reports irregularities of incoming signals to supervisor for corrective action.

4199-130 RADIO-TELEPHONE OPERATOR, HIGHWAYS(gov. serv.) DPT:364
GED: 3 SVP: 4 EC: 1 PA: S 4 5 6

Operates two-way radio and teletype system to relay messages and reports between personnel in radio-equipped vehicles or other district offices of provincial highway maintenance department:
Receives reports and requests from subsidiary yards and mobile staff, and transmits information to persons concerned, using two-way radio, telephone or teletype equipment. Prepares summary reports of road construction and maintenance operations, and transmits data to headquarters or other districts. Transmits road condition and weather reports to headquarters at specified intervals. Records all messages received or transmitted in communications log.

Other Clerical Occupations

4199-150 through 4199-299

4199-150 COPY CUTTER(print. & pub.) DPT:167
GED: 4 SVP: 8 EC: 1 PA: L 4 7

Examines, apportions and distributes editorial and classified advertising copy to typesetting-machine operators:
Examines copy to determine date of publication and type faces specified for headings and body. Cuts copy into sections requiring different type faces and marks section with type face required. Distributes sections of copy to type-casters. Cuts body of copy into sections and distributes sections to linotype operators to expedite casting and subsequent proof-reading. Marks sections to aid in assembling type at galley bank.

4199-154 BUS-TRANSPORTATION-SERVICE CO-ORDINATOR(motor trans.) DPT:118
district-sales representative.
GED: 4 SVP: 6 EC: 1 PA: L 4 5 6

Co-ordinates passenger bus agency activities along routes, to provide improved service to patrons:

Selects passenger bus depot sites along routes and sets up agreement between company and agent. Inspects bus depots to ensure conformance to company standards regarding food and passenger comfort facilities. Collects and audits ticket sales records and computes agent's commission. Advises agent of bus schedule changes. Investigates bus accidents and disruptions to service, and reports findings to manager.

4199-158 MUNICIPAL OFFICE CLERK DPT: 368
(gov. serv.)
GED: 4 SVP: 6 EC: 1 PA: S 4 5 6

Performs administrative and clerical duties required by municipal government unit:

Drafts agenda and by-laws, organizes and attends meetings for city or town council. Collects information, answers and keeps files of official correspondence and maintains records of contracts and other official documents.

May develop systematic collection of books and periodicals and co-ordinate activities of personnel employed in municipal libraries.

4199-162 SUGGESTION-PROGRAM CLERK(clerical) DPT:368.
GED: 4 SVP: 6 EC: 1 PA: S 5 6

Compiles, records, reviews and processes suggestions submitted to Suggestion Award Committee:

Records suggestions in incoming register, and stamps time and date of receipt. Prepares data card for computer records and assigns subject code. Reads suggestions submitted by employees to become familiar with proposals and records them on follow-up cards. Detaches acknowledgement copy and returns to sender. Reviews suggestions for clarity, readability and completeness before presenting copies to Suggestion Award Committee. Requests investigation and report on feasibility from department concerned with subject. Requisitions cash awards recommended for accepted suggestions. Schedules distribution of awards to winners and arranges for publicity. Writes letters to originators of rejected suggestions explaining reasons for non-acceptance. Explains suggestions program to meetings of firms, executives and others.

May attend meetings of domestic and foreign Suggestions Award Associations to exchange ideas.

4199-164 ENGINEERING CLERK(clerical) DPT:387
GED: 4 SVP: 6 EC: 1 PA: S 4 7

Prepares service manuals and relevant parts references, following specified standards in manufacturing plant:

Examines parts records to verify that detail drawings have been made for part to be described. Writes description of parts and assigns code numbers, titles and drawing references. Compiles servicing manuals describing operation of systems and components, and routine servicing procedures; such as, lubrication of parts and charging of batteries. Transcribes blueprint data into compact paragraphs. Maintains record of engineering modifications to keep parts records up-to-date.

4199-166 INVESTIGATOR(bus. serv.) DPT:368
GED: 4 SVP: 5 EC: 1 PA: S 4 5 6

Investigates background and personal characteristics of persons applying for credit, employment or insurance and prepares report for client:

Interviews applicant or customer to obtain information; such as, financial standing, credit, work and accident history and moral and social behaviour. Contacts neighbours, employers or former employers, bank and credit agencies, and check personal references, to verify data. Consults city directories to verify residence history, and examines public or court records to determine if applicant has history of bankruptcies, liens or other court actions. Evaluates results of investigation, and compiles report of credit information or risk-rating assigned by sources contacted.

May assign credit rating to individual or business establishment. May recommend approval or rejection of applicant as insurance or security risk. May be designated according to purpose of investigation; for example,

Credit Investigator

Insurance Investigator

4199-170 TEST CLERK(clerical) DPT:368
GED: 4 SVP: 5 EC: 1 PA: S 4

Monitors and scores psychological, vocational and educational tests, or scores objective-type examination papers, and records grades of those trying tests:

Verifies admissions' credentials of individuals and distributes test blanks or apparatus to them. Reads instructions and demonstrates use of apparatus or discusses practice exercise to familiarize individuals with testing material. Monitors test group to ensure compliance with directions, and times test with stop watch. Scores test with key or electric-marking machine, and records results on test paper, work application or profile form. Totals errors, and computes and records percentage grade on card of testee.

May average test grades to compute standing. May use weighted factors in computing test grades and arriving at final averages.

4199-174 PROOF-READER(clerical) DPT:668
GED: 4 SVP: 5 EC: 1 PA: S 4 5 6 7

Reads typescript or proof of typed material to detect and mark for corrections, any grammatical, typographical or compositional errors:

Places proof and copy side by side on desk and reads one sentence or paragraph at a time alternating between copy and proof, or follows original copy word for word as another person reads aloud or copy is played back from a tape recorder. Marks proofs with pencils, using codes to indicate deviations from copy or to instruct printing machine operators to alter typographical details, such as indentation, margin, letter type size and case. Discusses grammatical or compositional discrepancies in copy with initiator and obtains signature on copy to authorize change. Places marked proof in tray for corrections, and later checks proof of corrected type. Writes initials, time and date on proof to indicate approval of corrections, and authorize assembly of set type into final form for printing.

4199-178 BUS-AND-TAXI-TERMINAL CLERK(motor trans.) DPT:364
GED: 3 SVP: 5 EC: 1 PA: L 4 5 6 7

Receives and counts cash and tickets, and records information submitted by drivers, for bus or taxi shift runs:

Receives fares, ticket register readings, tickets and waybills from drivers reporting in from runs. Counts cash or tickets by hand or using coin-counting machines and records amounts. Copies or types data; such as, driver identification, route number, hours, gas consumption, mileage, ticket sales and accident information, on specified report or accounting forms. Corrects and records errors made on drivers' reports. Issues ticket books, instruction cards and petty cash to drivers. Records lost-and-found articles turned in by drivers.

May answer telephone inquiries regarding bus and taxi schedules and fares.

4199-182 LICENCE CLERK(gov. serv.) DPT:368
GED: 3 SVP: 5 EC: I PA: S 4 5 6

Issues licences or permits to applicants according to government regulations:

Questions persons and checks application forms to obtain information; such as, name, address, age and occupation, and records data on prescribed form. Ascertains that persons are eligible for licence or permit by examining documents and results of specified written or oral tests. Issues licences and permits; such as, driver's, automobile, dog and bicycle licences, and building and business permits.

4199-186 ORDER CLERK(clerical) DPT:368
GED: 3 SVP: 5 EC: I PA: S 4 5 6

Processes merchandise orders received from customers by mail, telephone, or in person:

Writes details of customer's order, such as size, type, and date merchandise desired, or takes order over telephone or intercommunication system for food and beverages. Informs customer of receipt of order, price, shipping date, and possible delay, or requests additional information required to complete order. Passes orders to appropriate department for processing or records and files them according to expected delivery date. Checks merchandise to ensure that filling of order is correct and complete and approves delivery. Sorts cash-on-delivery tickets according to type of delivery, and computes charges on bills and amounts collected. May contact customer to verify delivery of order.

4199-190 TITLE SEARCHER(insur. & real estate) DPT:388
GED: 3 SVP: 5 EC: I PA: L 4 7

Compiles abstract of mortgages, deeds, contracts, judgments and other documents pertaining to property title:

Visits registry office, real estate or title-insurance company office to search records for appropriate property lot number and plan. Examines documents to trace property title. Follows title chain through to present owner, to verify clear title and ensure that there are no encumbrances, such as liens, unpaid tax assessments or mortgages, assigned rights-of-way or mining rights. Records data on abstract form and delivers it to law office or to client.

4199-194 CLASSIFIED-ADVERTISING CLERK(clerical) DPT:368
GED: 3 SVP: 4 EC: I PA: S 4 5 6 7

Receives customers' orders for classified advertising, by mail, in person or by telephone, at reception counter of newspaper:

Writes or edits copy, and determines charges from rate schedules. Advises customers regarding matters, such as rates, advertising space and cancellation privileges. Maintains file of orders taken. Corresponds with advertisers to answer inquiries and to request payment of accounts. Assigns box numbers to anonymous advertisements.

May set up display advertisements, using knowledge of formats, size of type and rates. May record payments due and amounts received. May examine and mark newspaper to provide information to composing room.

4199-198 CREDIT-AUTHORIZATION CLERK(clerical) DPT:368
GED: 3 SVP: 4 EC: I PA: L 4 5 6

Checks customer's credit limit and standing, and authorizes charges against customer's account:

Receives charge slip or credit request by mail, or receives information over telephone from sales clerk. Verifies credit standing of customer from computer or other records, and approves charges up to customer's credit limit. Refers credit charges in excess of limit to supervisor for approval.

May file sales slips in customer's ledger for billing purposes. May prepare credit cards or charge account plates.

4199-202 COMPILER(clerical) DPT:388
GED: 3 SVP: 4 EC: I PA: S 4 7

Compiles and classifies directories, survey findings, opinion polls, census reports and lists of names and addresses from data obtained from surveys or census taking:

Compiles names, addresses, vital statistics and other facts or opinions obtained from business subscribers or persons in rural communities or cities. Checks information for completeness and accuracy. Arranges information in specified order or grouping; such as, by name, location, sex, occupation or affiliation.

May be designated according to type of information compiled; for example, Directory Compiler, Mailing-List Compiler, Survey Compiler

4199-206 STOWAGE CLERK(water trans.) DPT:388
GED: 3 SVP: 4 EC: I PA: L 4

Prepares daily control form of space available for loading cargo in company's ships:

Records on control sheet, previous day's bookings by ship and type of cargo. Calculates from ship's plan, remaining space available in various areas; such as, refrigeration, container and general cargo areas. Prepares loading and stowage plan, in co-operation with ship's agent, to ensure that weight of cargo is equally distributed in holds.

4199-210 SURVEY NOTE-KEEPER(prof. & tech., n.e.c.) DPT:568
GED: 3 SVP: 4 EC: I PA: S 4 5 6

Keeps detailed notes, descriptions, records and sketches of data procured by survey party:

Records information; such as, sketches of measurements, angles and elevations received from members of survey party for future use. Gives required information from notes to instrument man, surveyor or other member of survey party.

May calculate specific information from field notes.

4199-214 PUBLIC-OPINION COLLECTOR(clerical) DPT:368
public interviewer.
GED: 3 SVP: 3 EC: B PA: L 4 5 6

Interviews public and compiles statistical information on topics, such as public issues or consumer buying habits:

Contacts people at their homes or places of business, approaches them at random on street, or contacts them by telephone following specified sampling procedures. Asks questions following outline on questionnaire, and records answers. Reviews, classifies and sorts questionnaires following specified procedures and criteria.

May tally and prepare statistical reports on answers to questions. May participate in federal, provincial or local population surveys and be designated accordingly. Census Taker(gov. serv.)

4199-218 CLERK, MAINTENANCE SERVICE(clerical) DPT:368
GED: 3 SVP: 3 EC: I PA: S 4 5 6

Receives requests for maintenance services and relays them to appropriate section for required action:

Receives telephone and written requests from other departments for maintenance services, such as repair work to buildings or facilities, machine adjustments, and renewals or installation of other plant property. Relays requests to appropriate maintenance section for action. Keeps record of requests, materials used, and services rendered. Requisitions maintenance supplies.

May review routine inspection reports and issue work orders to correct irregularities. May dispatch crew to carry out repairs.

4199-222 DIET CLERK(clerical) DPT:368
GED: 3 SVP: 3 EC: I PA: S 4

Compiles dietary information for use by kitchen personnel in preparation of foods for hospital patients:

Examines diet order received from wards and lists portions and foods for each type of diet. Consolidates amounts on master menu to inform

kitchen personnel of food requirements. Lists quantities of specific foods, such as vegetables and meats to be prepared in kitchen. Informs kitchen staff of new diets or changes. Makes necessary changes on list.

May type menus, discharge diets and diet-tray cards. May keep records of and prepare reports on perpetual inventory, food purchases, total meals served and food costs.

4199-226 TRACING CLERK(clerical) DPT:368
GED: 3 SVP: 3 EC: 1 PA: L 5 6

Investigates customers' complaints and traces lost, misplaced or delayed items; such as, bills, invoices, merchandise and correspondence.

Traces items within various departments of company, and determines cause of mistakes. Corresponds with customers, manufacturers, shippers and other sources to trace items. Prepares report to make necessary adjustments.

4199-230 CHART CHANGER(clerical) DPT:684
GED: 3 SVP: 3 EC: B PA: L 4 7

Changes charts on recording instruments:

Checks and corrects calibration of recording instrument. Removes and replaces charts, cleans recording pen and refills it with ink. Repairs instruments by replacing whole mechanisms. Adjusts instrument by turning screw to correct reading as tested by voltmeter.

May wind clock springs on mechanically operated instruments. May compute average recordings for each chart. May drive automobile over established route to change charts in unattended stations.

4199-234 METER READER(elec. power; utilities, n.e.c.; water works) DPT:568
GED: 3 SVP: 3 EC: B PA: L 2

Reads electric, gas or water-consumption meters, and records volume used by residential and commercial consumers:

Walks over established route, and takes readings of meter dials. Checks meters and connections for defects, damage, and unauthorized connections. Reports irregularities on forms, for necessary action by servicing department. Checks readings to locate abnormal consumption, and records reasons for fluctuations if meter is changed. Returns route book to business office for billing purposes. Checks constants (average individual customer consumption) on meter cards. Reads, resets and reseals meters. Records changes when customers have moved without notification.

May drive a motor vehicle. May take applications for new service. May be concerned with reading a particular type of service meter and be designated accordingly; for example,
Electric-Meter Reader(elec. power)
Gas-Meter Reader(utilities, n.e.c.)
Water-Meter Reader(water works)

4199-238 COPY HOLDER(clerical) DPT:668
GED: 3 SVP: 3 EC: 1 PA: S 5 6 7

Reads copy to a proof-reader to correct proofsheets of printed matter: Reads original copy aloud, calling out punctuation marks, and spelling unusual words and proper names. Follows original copy word for word as proof-reader reads proofsheets aloud. Calls attention to discrepancies between copy and proof.

May read original copy into tape recorder to be re-run by proof-reader.

4199-242 BROADCAST CLERK(broadcast., motion pic. & stage) DPT:588
GED: 3 SVP: 3 EC: 1 PA: S 4 6

Examines scripts and monitors radio and television programs to detect and report on contractual and copyright conditions:

Records names and time used by local firms in advertising, obtaining information from daily program log. Ensures that production is according to conditions of contract, and prepares written report on volume and quality of reproduction. Submits written report of findings to advertisers.

May examine script of radio and television programs to ensure that permission has been granted for use of copyrighted materials, and be designated accordingly,
Copyright Clerk

4199-246 TRAFFIC CHECKER(gov. serv.; motor trans.) DPT:367

GED: 3 SVP: 2 EC: O PA: S 4 5 6

Secures information for use in highway planning by interviewing motor vehicle drivers at specified road intersection or highway:

Places equipment, such as barriers, signs and automatic vehicle counting devices on roads or highways. Signals driver to stop, presents identification credentials, and explains reason for stopping vehicle. Questions automobile, bus or truck driver to obtain data, such as itinerary and purpose of trip. Records results of interview and permits driver to continue journey. Secures information on load carried, whether passenger or cargo, and type and weight of vehicle.

May obtain information by observing traffic along bus, streetcar or subway routes and record information for analysis and planning of transit services. May count traffic only at a specified spot and be designated accordingly,
Traffic Counter

4199-250 POLL CLERK(gov. serv.) DPT:568
GED: 3 SVP: 2 EC: 1 PA: S 5 6

Performs clerical duties at polling station during elections:

Inserts check mark opposite name of elector on official voting list and records elector's name, address, and occupation in poll book. Tabulates votes cast in favour of each candidate as called out by designated official after poll has closed.

4199-254 PARKING-METER COLLECTOR(gov. serv.) DPT:684
GED: 2 SVP: 2 EC: O PA: M 4

Collects money from coin boxes of parking meters, following established route:

Pushes or pulls two-wheeled cart, with money container attached, to meters. Opens meter, using key. Removes coin box and empties coins into money container. Replaces coin box, winds meter mechanism and locks meter, using key. Examines parking meter to determine if repairs or adjustments are required.

May adjust and repair spring mechanism or timing device, using hand tools. May install parking meters on stands. May paint parking meters and stands.

4199-258 LOST-AND-FOUND CLERK(clerical) DPT:567
GED: 2 SVP: 2 EC: 1 PA: L 4 5 6

Receives, returns, and maintains records on articles that have been lost or found in places, such as stores and public conveyances:

Inspects articles and sends letters to owners when identification is known. Tags and places articles in drawers, shelves, racks or safe. Secures data from customer, on telephone or in person, regarding lost articles, and returns found articles to owner. Obtains owner's signature on form before releasing article. Returns valuables to finders if not claimed within a stated period and donates less valuable articles to charitable organizations.

4199-262 COLLECTOR, COIN BOX(clerical) DPT:667
GED: 2 SVP: 2 EC: O PA: M 4

Collects coin boxes from telephone pay stations:

Unlocks telephone faceplate and removes box containing money. Inserts empty box and locks faceplate. Replaces telephone books and reports malfunctioning telephones to repair department. Delivers coin boxes to central depot for machine counting, tabulating and customer payment. Pays subscriber a percentage of collection when it is above amount guaranteed. Keeps records of collections, balances due and refunds.

4199-266 PROCESS SERVER(bus. serv.) DPT:668
GED: 2 SVP: 2 EC: B PA: L 5 6

Serves court orders and processes, such as writs, subpoenas, summonses, and divorce papers:

Receives documents to be served from magistrate or lawyer, locates person to be served through personal inquiries and delivers document. Records time and place of delivery for future reference.

**4199-299 MISCELLANEOUS CLERICAL AND RELATED
OCCUPATIONS**

This group includes miscellaneous clerical and related workers, not elsewhere classified; for example, those who classify stamps, examine and verify photoprint numbers to ensure delivery of correct prints to customer, collect fare-box tills from transit buses and subway stations,

and perform clerical tasks in a railroad classification yard. Typical examples of occupational titles covered by this residual group definition are:
Fare-Box Collector(motor trans.)
Photoprint Checker(clerical)
Stamp Classifier(ret. trade)
Yard Clerk-Chauffeur(rail trans.)

SALES OCCUPATIONS

This major group includes occupations concerned with selling commodities and services, buying commodities for resale, and with conducting wholesale and retail businesses, on their own or owners' behalf or in partnership. Managing supervisors of individual chain stores and of departments in stores are in this Major Group. Sales managers are in Unit Group 1137, **SALES AND ADVERTISING MANAGEMENT OCCUPATIONS**. **SALES OCCUPATIONS** are classified in the following minor groups:

- 513/514 Sales Occupations, Commodities
- 517 Sales Occupations, Services
- 519 Other Sales Occupations

513/514-SALES OCCUPATIONS, COMMODITIES

This minor group includes occupations concerned with conducting wholesale or retail businesses which sell commodities, on own or owners' behalf or in partnership; supervising and co-ordinating activities of workers directly and indirectly engaged in selling commodities; selling equipment and providing technical information about its composition, utilization and maintenance; selling commodities on a wholesale basis in an allotted geographical area; and selling and demonstrating commodities in wholesale and retail trade establishments and homes, on the street, and from door to door. Sales managers are in Unit Group 1137, **SALES AND ADVERTISING MANAGEMENT OCCUPATIONS**. **SALES OCCUPATIONS, COMMODITIES** are classified in the following unit groups:

- 5130** Supervisors: Sales Occupations,
Commodities
- 5131** Technical Salesmen and Related Advisers
- 5133** Commercial Travellers
- 5135** Salesmen and Salespersons, Commodities,
n.e.c.
- 5137** Sales Clerks, Commodities
- 5141** Street Vendors and Door-to-Door Salesmen
- 5143** Newsboys
- 5145** Service Station Attendants
- 5149** Sales Occupations, Commodities, n.e.c.

5130-SUPERVISORS: SALES OCCUPATIONS, COMMODITIES

This unit group includes occupations, as described under the master titles, 01-180 **MANAGING SUPERVISOR** (any ind.) and 01-250 **SUPERVISOR/FOREMAN** (any ind.), concerned with conducting wholesale or retail businesses, on own or owners' behalf or in partnership; or supervising and co-ordinating the activities of workers engaged in selling commodities.

- 5130-110** **DEPARTMENT SUPERVISOR,
SUPERMARKET** (ret. trade) **DPT:138**
department manager, food store.

Supervises and co-ordinates activities of workers engaged in stocking shelves and displays with merchandise, and assisting customers in department of self-service supermarket (Unit Group 5137):

Performs duties as described under master title, 01-250 **SUPERVISOR/FOREMAN** (any ind.). Orders merchandise, supplies and equipment. Plans department layout, shelf arrangement, signs and displays.

May perform duties of workers supervised. May be designated according to department supervised; for example,
Grocery-Department Supervisor Produce-Department Supervisor
Meat-Department Supervisor

- 5130-114** **MANAGING SUPERVISOR, RETAIL
STORE** (ret. trade) **DPT:138**
department manager; store manager.

Plans, organizes, directs and controls the operations of a retail- trade establishment or unit of an establishment concerned with buying goods and reselling them to the public on own or owners' behalf or in partnership, and supervises and co-ordinates activities of sales personnel (Unit Groups 5135 and 5137):

Performs duties as described under master title, 01-180 MANAGING SUPERVISOR (any ind.).

May be designated according to type of merchandise sold in retail store or department; for example,
Department Manager, Men's Wear Florist
Drug-Store Manager Manager, Shoe Department

5130-118 MANAGING SUPERVISOR, SERVICE STATION (motor vehicle; ret. trade) DPT:138
gas-station manager; service-station manager.

Plans, organizes, supervises and co-ordinates the operation of a retail automobile-service-station engaged in fueling, lubricating and servicing motor vehicles (Unit Group 5145):

Performs duties as described under master title, 01-180 MANAGING SUPERVISOR (any ind.). Specializes in operating a retail service-station.

May perform duties of workers engaged in service or repair of motor vehicles.

5130-122 MANAGING SUPERVISOR, WHOLESALE ESTABLISHMENT (whole. trade) DPT:138
wholesaler.

Plans, organizes, directs and controls the operations of a wholesale establishment, or department of the establishment, engaged in buying and warehousing merchandise and selling it to retail, industrial, commercial and institutional consumers on own or owners behalf or in partnership, and supervises and co-ordinates activities of establishment personnel (Unit Group 5135):

Performs duties as described under master title, 01-180 MANAGING SUPERVISOR (any ind.). Supervises and co-ordinates activities of workers assembling goods in large lots and redistributing goods in smaller quantities. Advises retail clientele on present and future market conditions.

May import and export merchandise and be designated accordingly; for example,

Importer-Exporter

5130-126 SUPERVISOR, DOOR-TO-DOOR SALESMEN (ret. trade) DPT:138

Supervises and co-ordinates activities of workers engaged in door-to-door sales (Unit Group 5141):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.). Reviews orders received by workers and compiles sales records.

May be designated according to product sold; for example,
Magazine-Subscription-Crew Leader

5130-130 SUPERVISOR, NEWSPAPER SALES (print. & pub.) DPT:138
district circulator; district manager.

Supervises and co-ordinates activities of workers engaged in selling newspapers to residential customers on established routes or to passers-by on streets.(Unit Group 5143):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.). Compiles records of papers delivered and sold. Investigates customer complaints and collects delinquent accounts.

May drive truck to deliver papers to street stands or residential route drops.

5130-199 OTHER SUPERVISORS, COMMODITY SALES OCCUPATIONS

This group includes commodity sales supervisors, not elsewhere classified; for example, those who supervise and co-ordinate activities of workers engaged in selling commodities in commissaries or company stores. Typical examples of occupational titles covered by this residual group definition are:

Supervisor, Commissary (ret. trade)

Supervisor, Company Stores (ret. trade)

5131-TECHNICAL SALESMEN AND RELATED ADVISERS

This unit group includes occupations concerned with selling scientific and technical commodities of a chemical, mechanical, electrical or electronic nature, light, heat and power and associated services. Duties include: providing specialized information to architects, engineers or other potential customers about the composition, installation, utilization, and maintenance of their product; preparing or arranging for preparation of financial and operational estimates to show cost reduction or efficiency increase resulting from proposed changes in materials, machines or methods; and drawing up or arranging for the preparation of plans and operating specifications. These occupations require a scientific or technical knowledge normally obtained from at least two or three years of post- secondary-school education or its equivalent.

5131-110 SALES ENGINEER, LIGHT, HEAT AND POWER (elec. power; utilities, n.e.c.) DPT:158
industrial representative.

GED: 5 SVP: 8 EC: 1 PA: L 5 6

Provides technical advice and engineering assistance to prospective and existing large industrial, commercial and institutional consumers of electric power, natural gas or steam to promote increased use of power or fuel:

Performs duties described in the definition for Unit Group 5131, TECHNICAL SALESMEN AND RELATED ADVISERS. Specializes in promoting sale of electricity, gas, or steam to large consumers. Studies plans and existing installations to determine customer's lighting, heating or power requirements. Calculates billing rates to be applied according to amounts of power or fuel consumed.

May sell power distribution or heating equipment to customers. May be designated according to type of power or fuel sold.

5131-114 TECHNICAL SALESMAN, ELECTRONIC-DATA-PROCESSING (bus. serv.) DPT:158
data-processing-sales representative.

GED: 5 SVP: 8 EC: 1 PA: L 5 6

Sells electronic computer equipment and services to process payroll, bank account, inventory, and engineering, scientific, and other data:

Performs duties described in the definition for Unit Group 5131, TECHNICAL SALESMEN AND RELATED ADVISERS. Specializes in selling electronic-data-processing equipment and services to meet the requirements of customers.

5131-118 TECHNICAL SALESMAN, AIRCRAFT (whole. trade) DPT:153

GED: 5 SVP: 7 EC: 1 PA: L 4 5 6 7

Sells aircraft and aircraft parts and equipment to dealers and commercial users:

Performs duties described in the definition for Unit Group 5131, TECHNICAL SALESMEN AND RELATED ADVISERS. Specializes in selling aircraft and aircraft parts and equipment. Demonstrates aircraft in flight. Prepares contracts for aircraft storage and maintenance services.

May appraise aircraft for trade-in value.

5131-122 TECHNICAL SALESMAN, AGRICULTURAL EQUIPMENT AND SUPPLIES (whole. trade) DPT:158
GED: 5 SVP: 7 EC: B PA: L 5 6

Sells agricultural machinery, equipment and supplies; such as, tractors, combines, milking machines, tools, fertilizers and feeds:

Performs duties described in the definition for Unit Group 5131, TECHNICAL SALESMEN AND RELATED ADVISERS. Specializes in selling agricultural machinery, equipment and supplies. Provides technical advice on crop-raising, animal and poultry care, disease prevention and treatment and similar agricultural problems.

May be designated according to type of products sold; for example,

Salesman, Farm Machinery

Salesman, Milking Machines

Salesman, Feed Products
Salesman, Poultry Equipment and Supplies

5131-126 TECHNICAL SALESMAN, CONSTRUCTION EQUIPMENT AND SUPPLIES (whole. trade)
DPT:158

GED: 5 SVP: 7 EC: I PA: L 5 6

Sells building and construction equipment and supplies; such as, concrete, lumber and metal products, roofing material, plumbing fixtures, and heating and air-conditioning equipment to industrial, commercial and residential contractors and construction firms:
Performs duties described in the definition for Unit Group 5131, TECHNICAL SALESMEN AND RELATED ADVISERS. Specializes in selling building and construction equipment and supplies.

May be designated according to product sold; for example,
Salesman, Concrete Products Salesman, Lumber
Salesman, Insulation Salesman, Metal Culverts

5131-130 TECHNICAL SALESMAN, ELECTRONIC EQUIPMENT (whole. trade) DPT:158
GED: 5 SVP: 7 EC: I PA: L 5 6

Sells electronic communication, navigation, inspection and production control equipment and parts to industrial, commercial and institutional users:

Performs duties described in the definition for Unit Group 5131, TECHNICAL SALESMEN AND RELATED ADVISERS. Specializes in selling electronic equipment.

May lease equipment or sell electronic equipment services. May be designated according to type of equipment sold; for example,
Salesman, Broadcasting Equipment
Salesman, Communication Equipment
Salesman, Radar
Salesman, Ultrasonic Equipment
Salesman, X-Ray Equipment

5131-134 TECHNICAL SALESMAN, INDUSTRIAL MACHINERY AND EQUIPMENT (whole. trade)
DPT:158

GED: 5 SVP: 7 EC: I PA: L 5 6

Sells industrial machinery and equipment to processing, fabricating, repairing and other industrial and commercial firms:

Performs duties described in the definition for Unit Group 5131, TECHNICAL SALESMEN AND RELATED ADVISERS. Specializes in selling industrial machinery and equipment.

May be designated according to industry in which products are used or according to purpose of equipment; for example,
Salesman, Lubricating Equipment
Salesman, Material-Handling Equipment
Salesman, Textile Machinery
Salesman, Welding Equipment

5131-138 TECHNICAL SALESMAN, MEDICAL-DENTAL EQUIPMENT AND SUPPLIES (whole. trade)
DPT:158

GED: 5 SVP: 7 EC: I PA: L 5 6

Sells medical, dental and veterinary equipment and supplies to doctors, dentists, veterinarians and representatives of hospitals, medical schools and similar institutions:

Performs duties described in the definition for Unit Group 5131, TECHNICAL SALESMEN AND RELATED ADVISERS. Specializes in selling medical, dental and veterinary equipment and supplies.

May be designated according to type of products sold; for example,
Salesman, Dental Equipment and Supplies
Salesman, Medical Equipment and Supplies
Salesman, Veterinary Equipment and Supplies

5131-142 TECHNICAL SALESMAN, RAILROAD EQUIPMENT AND SUPPLIES (whole. trade)
DPT:158

GED: 5 SVP: 7 EC: I PA: L 5 6

Sells railroad equipment and supplies, such as rolling stock, vehicle components and track and maintenance-of-way machinery and equipment:

Performs duties described in the definition for Unit Group 5131, TECHNICAL SALESMAN AND RELATED ADVISERS. Specializes in selling railroad equipment and supplies.

May be designated according to type of equipment sold; for example, Salesman, Rolling Stock

5131-146 SALES REPRESENTATIVE, LIGHT, HEAT AND POWER (elec. power; utilities, n.e.c.) DPT:258
GED: 4 SVP: 6 EC: I PA: L 5 6

Advises existing and prospective commercial and residential clients on use of electricity, natural gas, or steam and related lighting, heating and power equipment to promote increased use of power or fuel:

Studies plans of new construction and inspects existing installations to determine requirements of initial service or extension of present service. Quotes approximate rates, installation charges and operating costs, and explains services offered by company. Writes installation requisitions and service applications and forwards them to other departments for action. Provides advice on safe, efficient and economic use of lighting, heating and power equipment for commercial or residential consumers. Investigates customer complaints concerning abnormal bills, property damage or faulty service.

May solicit consumers in areas of prospective development. May inspect installations for conformance to industry safety standards. May be designated according to type of utility or customer; for example,

Commercial-Sales Representative
Electric-Service Adviser (elec. power)
Heating Adviser
Residential-Service Representative

5131-150 TECHNICAL SALESMAN, CHEMICALS (whole. trade) DPT:358
GED: 4 SVP: 6 EC: I PA: L 5 6

Sells explosives, acids, and industrial and agricultural chemicals and chemical products:

Performs duties described in the definition for Unit Group 5131, TECHNICAL SALESMEN AND RELATED ADVISERS. Specializes in selling chemicals and chemical products.

May sell particular type of chemical or chemical product and be designated accordingly.

5131-154 TECHNICAL SALESMAN, METALS (whole. trade) DPT:358
GED: 4 SVP: 6 EC: I PA: L 5 6

Sells non-fabricated metals; such as, brass, copper, iron and steel, utilizing knowledge of metallurgy and applications of various metals:

Performs duties described in the definition for Unit Group 5131, TECHNICAL SALESMEN AND RELATED ADVISERS. Specializes in selling non-fabricated metals.

5131-199 OTHER TECHNICAL SALESMEN AND RELATED ADVISERS

This group includes salesmen of commodities, not elsewhere classified; for example, those who sell structures, such as buildings, bridges or pipelines.

5133-COMMERCIAL TRAVELLERS

This unit group includes occupations concerned with selling commodities on a wholesale basis in an allotted geographical area to wholesale, retail, industrial, professional

or other establishments. Duties include: soliciting orders from established clientele and attempting to secure new customers; showing samples or catalogue illustrations of products to prospective buyers, and explaining their merit; quoting prices, and credit and discount terms; arranging delivery schedules; processing orders to office or warehouse; resolving customer complaints; and keeping abreast of the latest market conditions, product innovations and price changes.

5133-110 MANUFACTURERS' AGENT (whole. trade) DPT:158
manufacturers' representative.
 GED: 4 SVP: 7 EC: I PA: L 5 6

Sells single, allied, diversified or multi-line products, on commission basis, to wholesale, retail and other establishments for one or more foreign or domestic manufacturers;
 Performs duties described in the definition for Unit Group 5133, COMMERCIAL TRAVELLERS. Specializes in selling products as agent for manufacturing companies. Visits manufacturers to persuade them to sell their products through his services. Co-ordinates sales program for products handled.
 May prepare advertising brochures and other literature. May be designated according to type of products sold; for example, Food Broker

5133-114 PHARMACEUTICAL REPRESENTATIVE (whole. trade) DPT:358
pharmaceutical-detail man; salesman, drug supplies.
 GED: 4 SVP: 7 EC: I PA: L 5 6

Promotes and sells drugs and other pharmaceutical products to physicians, dentists, hospitals and wholesale and retail drug establishments;
 Performs duties described in the definition for Unit Group 5133, COMMERCIAL TRAVELLERS. Specializes in selling pharmaceutical products. Informs customers of new drugs and explains characteristics and clinical studies conducted with drug. Discusses dosage, use and effects of new drugs and medical preparations. Distributes samples to customers.

5133-118 SALES REPRESENTATIVE, TEXTBOOKS (print. & pub.; whole. trade) DPT:358
publisher's representative.
 GED: 4 SVP: 6 EC: I PA: L 5 6

Promotes sale of textbooks to educational institutions, such as elementary and secondary schools, technical institutes, and universities;
 Performs duties described in the definition for Unit Group 5133, COMMERCIAL TRAVELLERS. Specializes in selling textbooks. Reviews courses of study approved by educational institutions to determine textbook requirements. Consults with educational authorities on content of courses and provides advice on publications available to meet their needs. Presents sample textbooks to educational authorities for approval and explains their features and advantages. Confers with publishing department to plan and co-ordinate publication of textbooks.
 May investigate possibilities of sources of publication of new textbooks.

5133-122 SALES REPRESENTATIVE, CANVAS PRODUCTS (whole. trade) DPT:358
 GED: 4 SVP: 6 EC: B PA: L 5 6

Sells canvas products; such as, awnings, tents, tarpaulins, covers and bags;
 Performs duties described in the definition for Unit Group 5133, COMMERCIAL TRAVELLERS. Specializes in selling canvas products.
 May rent tents or awnings for outdoor events. May deliver and install awnings.

5133-126 SALES REPRESENTATIVE, COMMERCIAL AND INDUSTRIAL EQUIPMENT AND SUPPLIES (whole. trade) DPT:358
 GED: 4 SVP: 6 EC: I PA: L 5 6

Sells small machines, tools, precision instruments, parts, furniture and other commercial and industrial equipment and supplies used in production of goods or services;
 Performs duties described in the definition for Unit Group 5133, COMMERCIAL TRAVELLERS. Specializes in selling commercial and industrial equipment and supplies.
 May deliver items sold. May be designated according to type of products sold; for example,
 Salesman, Engineering Supplies Salesman, Office Machines
 Salesman, Hotel and Restaurant Equipment Salesman, Printing Supplies
 Salesman, Office Furniture Salesman, Safety Equipment

5133-130 SALES REPRESENTATIVE, FOOD PRODUCTS (whole. trade) DPT:358
 GED: 4 SVP: 6 EC: I PA: L 5 6

Sells food products, such as produce, canned goods and meats, to retail and wholesale food stores, restaurants and institutions;
 Performs duties described in the definition for Unit Group 5133, COMMERCIAL TRAVELLERS. Specializes in selling food products. Advises customers on product usage, pricing and display.
 May also sell sundry items such as smoking supplies, toiletries and household goods. May be designated according to kind of food product sold; for example,
 Salesman, Groceries Salesman, Meats

5133-134 SALES REPRESENTATIVE, GARMENTS AND OTHER TEXTILE PRODUCTS (whole. trade) DPT:358
 GED: 4 SVP: 6 EC: I PA: L 5 6

Sells garments, yard goods and other textile products to wholesale and retail outlets, applying knowledge of garment construction, fabrics, styles and prices;
 Performs duties described in the definition for Unit Group 5133, COMMERCIAL TRAVELLERS. Specializes in selling garments and other textile products.

5133-138 SALES REPRESENTATIVE, MOTOR VEHICLES AND EQUIPMENT (whole. trade) DPT:358
 GED: 4 SVP: 6 EC: I PA: L 5 6

Sells motor vehicles, parts and accessories to dealers, garages and other sales outlets;
 Performs duties described in the definition for Unit Group 5133, COMMERCIAL TRAVELLERS. Specializes in selling motor vehicles and equipment. Advises dealers in sales promotion techniques. Confers with dealer and reviews sales records to determine number of motor vehicles to order.
 May sell motor vehicle parts and accessories only and be designated accordingly; for example,
 Salesman, Automobile Parts

5133-142 SALES REPRESENTATIVE, PETROLEUM PRODUCTS (whole. trade) DPT:358
 GED: 4 SVP: 6 EC: I PA: L 5 6

Sells gasoline, oil, grease, lubricants and other petroleum products to retail dealers and distributors and to industrial and commercial consumers;
 Performs duties described in the definition for Unit Group 5133, COMMERCIAL TRAVELLERS. Specializes in selling petroleum products. Recruits retail dealers, agents and distributors to market company's products and completes leasing arrangements for sales outlets.

5133-146 SALES REPRESENTATIVE, PLASTIC PRODUCTS (whole. trade) DPT:358
GED: 4 SVP: 6 EC: 1 PA: L 5 6

Sells plastic products and plastic construction materials, such as boxes, sheets, tubes and rods:
Performs duties described in the definition for Unit Group 5133, **COMMERCIAL TRAVELLERS**. Specializes in selling plastic products and materials.
May assist in preparation of designs and specifications for construction materials. May sell materials used in manufacture of fiberglass products.

5133-150 SALES REPRESENTATIVE, PULP AND PAPER PRODUCTS (whole. trade) DPT:358
GED: 4 SVP: 6 EC: 1 PA: L 5 6

Sells pulp, paper and paper products; such as, bags, containers, stationery and wrapping paper:
Performs duties described in the definition for Unit Group 5133, **COMMERCIAL TRAVELLERS**. Specializes in selling pulp, paper and paper products.
May be designated according to product sold; for example,
Salesman, Corrugated Containers Salesman, Paper Bags
Salesman, Newsprint Salesman, Pulp

5133-154 SALES REPRESENTATIVE, RUBBER PRODUCTS (whole. trade) DPT:358
GED: 4 SVP: 6 EC: 1 PA: L 5 6

Sells rubber products; such as, gaskets, hoses, belts and clothing:
Performs duties described in the definition for Unit Group 5133, **COMMERCIAL TRAVELLERS**. Specializes in selling rubber products.

5133-158 CONTACT MAN, RECORDINGS (whole. trade) DPT:358
record pusher.
GED: 4 SVP: 5 EC: 1 PA: L 5 6

Promotes and sells phonograph records and tapes:
Performs duties described in the definition for Unit Group 5133, **COMMERCIAL TRAVELLERS**. Specializes in selling records and tapes to wholesale and retail dealers. Contacts radio and TV broadcasting stations by telephone, letter and in person to persuade them to play records of artists and groups under contract to record company.

5133-162 SALES REPRESENTATIVE, PUBLICATIONS (whole. trade) DPT: 358
distributor, publications.
GED: 4 SVP: 5 EC: 1 PA: L 5 6

Sells publications; such as, hard- and soft- cover books, magazines, comics and other periodicals to newsstands, hotels, motels and retail stores:
Performs duties described in the definition for Unit Group 5133, **COMMERCIAL TRAVELLERS**. Specializes in selling publications.
May deliver publications to purchaser. May collect excess copies for redistribution to other retail outlets.

5133-166 SALES REPRESENTATIVE, TOBACCO PRODUCTS AND SMOKING SUPPLIES (whole. trade) DPT:358
GED: 4 SVP: 5 EC: 1 PA: L 4 5 6

Sells tobacco products; such as, cigars, cigarettes and pipe tobacco, and smoking supplies; such as, pipes, tobacco pouches, and lighters:
Performs duties described in the definition for Unit Group 5133, **COMMERCIAL TRAVELLERS**. Specializes in selling tobacco products and smoking supplies.
May deliver products to replenish dealers' stocks.

5133-199 OTHER COMMERCIAL TRAVELLERS

This group includes commercial travellers, not elsewhere classified; for example, those who sell agricultural produce, novelties, toiletries, fuels, and vending machines on a wholesale basis. Typical examples of occupational titles covered by this residual group definition are:
Salesman, Novelties (whole. trade)
Salesman, Vending Machines (whole. trade)

5135-SALESMEN AND SALESPERSONS, COMMODITIES, N.E.C.

This unit group includes occupations, not elsewhere classified, concerned with selling commodities in wholesale and retail trade establishments by performing duties as described under the master title, 01-230 **SALESMAN** (ret. trade; whole. trade), or under the master title, 01-240 **SALESPERSON** (ret. trade; whole. trade).

5135-110 SALESMAN, MOTOR VEHICLES (ret. trade) DPT:353
GED: 4 SVP: 6 EC: B PA: L 4 5 6

Sells new or used motor vehicles, such as automobiles, trucks or motorcycles:
Performs duties as described under master title, 01-230 **SALESMAN** (ret. trade; whole. trade). Specializes in selling motor vehicles.
May be designated according to type of motor vehicle sold; for example,
New-Car Salesman Truck Salesman
Salesman, Motorcycle Used-Car Salesman

5135-114 SALESMAN, SEWING MACHINES (ret. trade; whole. trade) DPT:354
serviceman-salesman, sewing machines.
GED: 4 SVP: 6 EC: 1 PA: M 4 5 6

Demonstrates, sells and services household and commercial sewing machines:
Performs duties as described under master title, 01-230 **SALESMAN** (ret. trade; whole. trade). Specializes in selling and servicing domestic and commercial sewing machines. Delivers sewing machine to customer. Lubricates, adjusts and repairs machines in home or business establishment, using hand tools.

5135-118 SALESMAN, HEARING AIDS (ret. trade) DPT:354
hearing-aid consultant.
GED: 4 SVP: 6 EC: 1 PA: L 4 5 6 7

Sells and fits hearing aids:
Performs duties as described under master title, 01-230 **SALESMAN** (ret. trade; whole. trade). Specializes in selling hearing aids. Measures customer's hearing ability with audiometer when customer has not been referred by doctor. Inserts impression material in customer's ear to form mould for earpiece. Fits hearing aid on customer and gives instructions regarding its use. Replaces defective parts and makes minor adjustments to faulty equipment.

5135-120 SALESMAN, LIVESTOCK (whole. trade) DPT:357
commission agent, livestock
GED: 4 SVP: 6 EC: B PA: L 5 6 7

Sells livestock at stockyards, as agent for owner, to packing houses, farmers or other purchasers:
Receives and classifies livestock according to factors; such as, weight, sex, age and appearance, to facilitate sale. Contacts purchasing agents and informs them of livestock available for sale, quality of livestock and market conditions. Shows livestock to buyers and points out good features to persuade them to make purchases. Sells livestock to highest bidder. Classifies livestock according to owner, size and quality, using coloured markings and brands as identification. Staples serial-numbered tag to ear of animal. Records sale price and name of buyer

of each animal on alley card to facilitate accounting. Attends livestock meetings and exhibitions to keep informed of livestock trends and market conditions.

May weigh livestock and record weight on alley card to provide data for accounting and payment purposes. May specialize in selling one species of livestock and be designated accordingly; for example,

Salesman, Cattle

Salesman, Hogs

Salesman, Sheep

5135-122 SALESMAN, MUSICAL INSTRUMENTS AND SUPPLIES (ret. trade; whole. trade) DPT:357
GED: 4 SVP: 6 EC: I PA: L 4 5 6

Sells pianos, organs, brass, stringed, woodwind and percussion instruments and supplies, such as parts, accessories and sheet music:

Performs duties as described under master title, 01-230 SALESMAN (ret. trade; whole. trade). Specializes in selling musical instruments and supplies, utilizing musical skills and knowledge.

May appraise used instruments for trade-in value. May sell related musical commodities, such as radios, hi-fi equipment and recordings.

5135-126 SALESPERSON, PARTS (ret. trade; whole. trade) DPT:357

counterman, parts; parts clerk.

GED: 4 SVP: 6 EC: I PA: L 4 5 6

Sells spare and replacement parts for motor vehicles, appliances, machinery and equipment, from behind counter in agency, repair shop or parts store:

Performs duties as described under master title, 01-240 SALESPERSON (ret. trade; whole. trade). Specializes in selling parts. Orders, receives and stores parts in stockroom according to prearranged system. Reads catalogue to determine stock number and price of part sold.

May examine article to determine parts required. May accept used parts as exchange for new ones. May be designated according to type of parts sold; for example,

Counterman, Automotive Parts

5135-130 SALESMAN, BOATS AND MARINE EQUIPMENT (ret. trade; whole. trade) DPT:357
GED: 4 SVP: 5 EC: B PA: L 4 5 6

Sells boats and marine equipment and supplies; such as, motors, running lights, rope and boat accessories:

Performs duties as described under master title, 01-230 SALESMAN (ret. trade; whole. trade). Specializes in selling boats and marine equipment.

May demonstrate boat in water. May attend to delivery, registration and inspection of boat. May act as broker to sell boats for customers.

5135-134 SALESMAN, DRAPERY AND UPHOLSTERY (ret. trade; whole. trade) DPT:357
GED: 4 SVP: 5 EC: I PA: L 4 5 6

Sells custom- or ready-made draperies, slipcovers and furniture upholstery:

Performs duties as described under master title, 01-230 SALESMAN (ret. trade; whole. trade). Specializes in selling draperies and upholstery. Estimates amount of fabric required by measuring area or studying plans, and computes cost of material and labour.

May draw sketches of proposed work. May estimate costs of repairing and upholstering furniture. May be designated according to type of item sold; for example,

Salesman, Custom Drapery

Salesman, Upholstery and Furniture Repair

5135-138 SALESMAN, FLOOR COVERINGS (ret. trade; whole. trade) DPT:357
GED: 4 SVP: 5 EC: I PA: L 4 5 6

Sells rugs, carpets, linoleum and other floor coverings to homes and business establishments:

Performs duties as described under master title, 01-230 SALESMAN (ret. trade; whole. trade). Specializes in selling floor coverings. Estimates amount of covering needed from floor plans, or measures customer's floor area, using tape measure. Cuts carpet or sheet floor-covering with knife or shears to fill customer's order.

5135-142 SALESMAN, FURNITURE AND APPLIANCES (ret. trade; whole. trade) DPT:357
GED: 4 SVP: 5 EC: I PA: L 4 5 6

Sells household furniture and appliances; such as, sofas, tables, beds, refrigerators, ranges, clothes driers and vacuum cleaners:

Performs duties as described under master title, 01-230 SALESMAN (ret. trade; whole. trade). Specializes in selling household furniture and appliances. Dusts or vacuums furniture as required.

May uncrate material, using hand tools, and arrange items on sales floor. May be designated according to type of commodities sold; for example,

Salesman, Appliances

Salesman, Audio Equipment

Salesman, Furniture

Salesman, Television

5135-146 SALESMAN, HOUSE TRAILERS (ret. trade; whole. trade) DPT:357
GED: 4 SVP: 5 EC: I PA: L 5 6

Sells mobile homes, travel trailers, truck campers and related accessories and equipment:

Performs duties as described under master title, 01-230 SALESMAN (ret. trade; whole. trade). Specializes in selling house trailers and campers. Arranges transportation of mobile home to customer's lot or trailer park and connection of utilities.

May arrange financing and insurance. May be designated according to type of trailer sold; for example,

Salesman, Mobile Homes

5135-150 SALESPERSON, BOOKS (ret. trade) DPT:357
GED: 4 SVP: 5 EC: I PA: L 4 5 6

Sells hard-and soft-cover books and magazines in book or department store:

Performs duties as described under master title, 01-240 SALESPERSON (ret. trade; whole. trade). Specializes in selling books. Suggests selection of books to customer, based on knowledge of current literature and familiarity with publishers' catalogues and book reviews. Orders out-of-stock books at customer's request.

May sell related articles, such as stationery and art supplies.

5135-154 SALESPERSON, HARDWARE (ret. trade; whole. trade) DPT:357
GED: 4 SVP: 5 EC: I PA: L 4 5 6

Sells hardware; such as, power tools, hand tools, electrical and plumbing supplies, paints, and lawn and gardening equipment and supplies:

Performs duties as described under master title, 01-240 SALESPERSON (ret. trade; whole. trade). Specializes in selling hardware. Estimates amounts of material required by customer, mixes paints, and cuts wire, screen and glass to size. Advises customer on building, gardening and home repair problems.

May be designated according to type of hardware sold; for example,

Salesperson, Lawn and Garden Supplies

Salesperson, Paints

5135-158 SALESPERSON, JEWELLERY AND RELATED PRODUCTS (ret. trade; whole. trade) DPT:357
GED: 4 SVP: 5 EC: I PA: L 4 5 6

Sells jewellery and related products, such as watches, silverware and china:

Performs duties as described under master title, 01-240 SALESPERSON (ret. trade; whole. trade). Specializes in selling jewellery and related products.

May suggest designs for custom-made jewellery. May receive watches

for repair or make minor repairs to watches. May be designated according to commodity sold; for example,
Salesperson, China and Glassware
Salesperson, Watches
Salesperson, Silverware

5135-162 SALESPERSON, PETS AND PET SUPPLIES (ret. trade; whole. trade) DPT:357
GED: 4 SVP: 5 EC: 1 PA: L 4 5 6

Sells pets; such as, animals, birds and fish, and pet supplies; such as, tanks, cages and feeds:
Performs duties as described under master title, 01-240
SALESPERSON (ret. trade; whole. trade). Specializes in selling pets and pet supplies. Feeds, waters and provides care for pets prior to sale. Suggests remedies for animal diseases or recommends veterinary attention.

5135-166 SALESPERSON, PHOTOGRAPHIC EQUIPMENT AND SUPPLIES (ret. trade; whole. trade) DPT:357
salesperson, camera equipment.
GED: 4 SVP: 5 EC: 1 PA: L 4 5 6

Sells photographic and optical equipment and supplies; such as, cameras, projectors, film and binoculars:
Performs duties as described under master title, 01-240
SALESPERSON (ret. trade; whole. trade). Specializes in selling photographic equipment and supplies. Receives film for developing and printing and returns processed film. Makes minor repairs and adjustments to equipment.

5135-170 SALESPERSON, SPORTING GOODS (ret. trade; whole. trade) DPT:357
GED: 4 SVP: 5 EC: 1 PA: L 4 5 6

Sells sporting goods used for hunting, fishing, camping, skiing, golfing and other athletic activities:
Performs duties as described under master title, 01-240
SALESPERSON (ret. trade; whole. trade). Specializes in selling sporting goods. Registers sales of handguns. Explains local fish and game laws and informs customer of hunting, fishing and skiing areas.

5135-174 SALESPERSON, SURGICAL APPLIANCES (ret. trade; whole. trade) DPT:357
fitter, surgical appliances.
GED: 4 SVP: 5 EC: 1 PA: L 3 4 5 6

Fits and sells surgical and orthopedic appliances; such as, trusses, abdominal supports, custom shoes, braces, and artificial limbs:
Performs duties as described under master title, 01-240
SALESPERSON (ret. trade; whole. trade). Specializes in examining malformed or injured joints and bone structure, and measuring, selecting and fitting appliance on customer. Writes specifications or follows prescription of physician to order custom-made appliances. Examines appliance on customer's body to verify corrective support. May design and fabricate or direct fabrication of custom-made appliances. May fit appliance in customer's home or in hospital.

5135-178 SALESPERSON, WEARING APPAREL (ret. trade; whole. trade) DPT:357
GED: 4 SVP: 5 EC: 1 PA: L 4 5 6

Sells clothing, such as suits, dresses and shirts, and accessories, such as hats, belts, ties, and scarves:
Performs duties as described under master title, 01-240
SALESPERSON (ret. trade; whole. trade). Specializes in selling wearing apparel. Advises customer on fashions and suitable styles. Measures customer, with tape measure, and selects appropriate size of garment. Fits garment on customer and marks alterations with chalk or pins, or calls tailor to fit garment.
May take and record customer's measurements to order made-to-measure garments. May be designated according to type of wearing apparel sold; for example,

Salesperson, Children's Wear Salesperson, Men's and Boy's Clothing
Salesperson, Foundation Garments Salesperson, Millinery
Salesperson, Furs Salesperson, Women's Apparel

5135-182 SALESPERSON, FOOTWEAR (ret. trade) DPT:357

salesperson, shoes.
GED: 3 SVP: 5 EC: 1 PA: L 3 4 5 6

Sells shoes, boots and other footwear:
Performs duties as described under master title, 01-240
SALESPERSON (ret. trade; whole. trade). Specializes in selling footwear. Measures customer's foot on special device or asks customer to determine shoe size. Obtains footwear of specified style, colour and size from stock and fits onto customer's foot.
May stretch shoes, using stretching device. May insert pads in heel or instep of shoe.

5135-186 SALESPERSON, AUTOMOBILE ACCESSORIES (ret. trade; whole. trade) DPT:357
GED: 3 SVP: 4 EC: 1 PA: L 4 5 6

Sells automobile accessories; such as, tires, batteries, seat covers, headlights and racing equipment, in auto supply, hardware or department store:
Performs duties as described under master title, 01-240
SALESPERSON (ret. trade; whole. trade). Specializes in selling automobile accessories.
May install accessories sold.

5135-190 SALESPERSON, HOUSEWARES (ret. trade) DPT:357
GED: 3 SVP: 4 EC: 1 PA: L 4 5 6

Sells housewares; such as, china, glassware, flatware, kitchen utensils, brooms, mops and small appliances:
Performs duties as described under master title, 01-240
SALESPERSON (ret. trade; whole. trade). Specializes in selling housewares.

5137-SALES CLERKS, COMMODITIES

This unit group includes occupations concerned with selling commodities, usually in retail trade establishments, for which a knowledge of the item sold is not a primary requirement; stocking shelves with merchandise; wrapping and packing customer's purchases; receiving payment for goods and making change; and keeping records of sales.

5137-110 COUPON-REDEMPTION CLERK (ret. trade) DPT:477

GED: 2 SVP: 2 EC: 1 PA: M 4 5 6 7

Redeems books of trading stamps or coupons in exchange for merchandise and vacation trips:
Shows customer selection of merchandise in display catalogue and aids customer to make selection of merchandise. Counts coupon books and verifies number of coupons or trading stamps required for requested articles. Orders or obtains merchandise from stockroom. Answers inquiries over telephone regarding merchandise, and arranges for shipment to homes or stores.
May exchange coupon books for cash. May keep record of books redeemed and merchandise distributed. May take inventory of stock. May arrange displays of merchandise on counters, racks, shelves or stands, and wrap items.

5137-114 SALES CLERK (ret. trade) DPT:477
store clerk.
GED: 2 SVP: 2 EC: 1 PA: L 4 5 6

Performs any combination of the following duties in retail sales establishment:
Obtains articles for customer from counter, shelf or stockroom; or directs customer to location of article sought, to fitting rooms or to cashier. Writes sales check for items purchased, receives payment or prepares charge slips. Bags or wraps merchandise and hands package to customer or routes it to delivery department. Keeps record of items sold. Stocks shelves, counters and display areas with merchandise and keeps stock in order. Maintains inventory of merchandise and orders stock from warehouse or stockroom. Prices articles, using stamp, stickers and price list. Prepares and distributes samples of merchandise.
May be designated according to duties performed, area of work, or merchandise sold; for example,
Bakery Girl Meat Counterman
Clerk, Tobacco Products Newsstand Clerk
Drug-Store Clerk Produce-Department Clerk
Grocery-Store Clerk

5141-STREET VENDORS and DOOR-TO-DOOR SALESMEN

This unit group includes occupations concerned with selling products, such as fruit and vegetables, or soliciting orders on street or from door to door.

5141-110 DOOR-TO-DOOR SALESMAN (ret. trade) DPT:358
canvasser; solicitor.
GED: 3 SVP: 2 EC: B PA: L 5 6

Sells books, magazines, notions and other merchandise, going from door to door:
Displays sample products or catalogue and explains desirable qualities of product. Writes orders, delivers goods and receives payment, or passes orders to other department for processing.
May develop lists of prospective customers or follow leads supplied by management. May distribute advertising literature and leave samples. May be designated according to product sold; for example,
Magazine-Subscription Solicitor Representative, Household Products Representative, Beauty Products Salesman, Encyclopedia

5141-114 STREET VENDOR (ret. trade) DPT:457
pedlar; street hawker.
GED: 2 SVP: 2 EC: O PA: M 4 5 6

Peddles goods, such as fruit, vegetables, or ice cream, on street:
Loads goods into basket, push-cart or truck and transports them to street location or from house to house. Hands goods to customer, receives payment and makes change as necessary.
May attract customers by ringing bell, playing recorded music,

chanting song or calling out information. May be designated according to product sold; for example,
Fish Monger Ice-Cream Vendor
Fruit Pedlar Popcorn Vendor

5143-NEWSBOYS

This unit group includes occupations concerned with delivering newspapers to regular subscribers and collecting money, or selling newspapers on streets or from newspaper stands.

5143-110 NEWSPAPER CARRIER (ret. trade) DPT:457
carrier; paper boy.
GED: 1 SVP: 2 EC: O PA: M 4 5 6

Delivers newspapers to subscribers on established route:
Obtains newspapers from circulation department or at drop point and counts them to ensure that correct number has been supplied. Walks or rides bicycle to deliver newspapers to subscribers on assigned route. Collects payment, makes change and issues receipts for subscription on weekly, bi-weekly or monthly basis. Visits prospective customers on route to solicit new subscriptions. Maintains record of deliveries made and payments collected.

5143-114 NEWSVENDOR (ret. trade) DPT:457
newsboy, street sales; newspaper vendor.
GED: 1 SVP: 1 EC: O PA: L 4 5

Sells newspapers to customers at street location:
Obtains newspapers from circulation department or drop point and carries to sales location. Displays newspapers and calls out to attract passers-by. Receives payment for newspaper sold and makes change. Returns unsold newspapers to supplier and pays for newspapers sold. May sell newspapers from street stand.

5145-SERVICE STATION ATTENDANTS

This unit group includes occupations concerned with selling fuel, lubricants, and miscellaneous automotive products to customers of a gasoline service station, and performing such services as cleaning, lubricating and minor repairs to motor vehicles.

5145-110 SERVICE-STATION ATTENDANT (motor vehicle; ret. trade) DPT:677
filling-station attendant; pumpman.
GED: 2 SVP: 3 EC: B 7 PA: M 3 4 5 6

Sells fuel, lubricants and miscellaneous automotive accessories, and services motor vehicles at retail gasoline service station:
Fills vehicle fuel tank with gasoline or diesel fuel to level specified by customer. Measures level of oil in crankcase, using dipstick, checks level of water in radiator and battery, and measures air pressure in tires, using gauge. Adds required amounts of oil, water and air. Washes windshield and other windows of vehicle. Lubricates vehicle and changes motor oil, installs antifreeze and replaces parts; such as, lights, oil filter, windshield-wiper blades and fan belt. Repairs or replaces tires. Sells batteries, tires, car washing materials and other automotive supplies. Collects cash payment for services and supplies, or completes credit card sales form.
May work at gasoline bar, selling fuel, lubricants, and accessories, without performing service duties, and be designated accordingly; for example,
Gas-Bar Attendant (ret. trade)

5149-SALES OCCUPATIONS, COMMODITIES, N.E.C.

This unit group includes occupations, not elsewhere classified, concerned with selling commodities, such as those who sell cigarettes and novelties in night clubs, and programs and refreshments at fairs, or sports and other recreational events. Auctioneers and related workers are in this unit group.

5149-110 AUCTIONEER (ret. trade; whole. trade) DPT:258
GED: 3 SVP: 6 EC: 1 PA: L 5 6 7

Sells property or merchandise; such as, real estate, furniture, livestock, machinery and art objects, at auction:

Appraises merchandise before sale and assembles merchandise in lots according to estimated value of individual pieces. Selects articles to be auctioned at suggestion of bidders or by own choice. Describes item and asks for or states starting price. Requests bids, observes buyers' signals, stimulates competitive bidding and repeats bids offered. Closes sale to highest bidder.

May maintain record of bids received, name of buyer, and selling price. May make inventories of goods for sale and issue catalogues. May specialize in selling particular kinds of goods or property and be designated accordingly.

5149-114 VENDOR (ret. trade) DPT:457
GED: 2 SVP: 2 EC: B PA: M 4 5 6

Sells refreshments, programs, cushions or novelties at places of entertainment:

Circulates among patrons, carrying items for sale, and calls out articles. Hands, passes or throws article to purchaser. Receives payment and makes change as necessary.

May be designated according to article sold; for example,
Hot-Dog Vendor

Program Seller

5149-118 TOBACCO-AUCTION-ROOM ATTENDANT (whole. trade) DPT:567
clock operator, tobacco auction; dutch-clock operator.

GED: 2 SVP: 1 EC: 1 PA: S 4 5

Starts clock that registers bid prices for each lot of tobacco sold at tobacco auction:

Calls out number and grade of lot of tobacco offered for sale. Pushes buttons on console to show on clock starting price specified by auction officials. Moves lever to start sweep hand of clock rotating. Repeats actions for each lot of tobacco to be sold. Records bid prices, grade, weight and bidder's name for each lot of tobacco sold.

May announce bid prices, using public address system.

5149-199 OTHER SALES OCCUPATIONS, COMMODITIES

This group includes sales workers, commodities, not elsewhere classified; for example, those who sell cigarettes and other items to patrons in a night club. A typical example of an occupational title covered by this residual group definition is:

Cigarette Girl (cater. & lodg.)

GED: 4 SVP: 6 EC: I PA: L 5 6

Sells radio or television time for broadcasting stations or networks:

Visits business and advertising firms and presents outlines of programs or commercial announcements. Discusses popularity of news, sports, variety, dramatic and personality programs, according to audience composition studies. Arranges for and accompanies prospective customer to auditions. Prepares sales contracts.

May write advertising copy. May distribute promotional literature and act as public relations man for station.

5177-BUSINESS SERVICES SALESMEN

This unit group includes occupations concerned with selling services; such as, building maintenance, credit reporting, bookkeeping, security, printing and telecommunications to industrial, commercial, institutional, professional and other enterprises.

5177-110 SALES ENGINEER, OIL-WELL SERVICES (oil & nat. gas) DPT:158
GED: 5 SVP: 8 EC: I PA: S 5 6

Solicits business for firm providing electrical well logging, directional drilling, side-wall sample taking and other oil-well drilling and production services:

Visits owners and managers of crude oil and natural-gas wells to provide technical advice and explain services offered by firm. Confers with engineering and production personnel to analyze well conditions, evaluate and interpret test and survey results, and determine and recommend type of service required. Reports special problems to research staff for development or modification of tools, instruments and methods.

5177-114 SALES REPRESENTATIVE, HOTEL SERVICES
(cater. & lodg.) DPT:258
salesman, hotel services.
GED: 4 SVP: 7 EC: 1 PA: S 5 6

Contacts representatives of government, business, and social groups to solicit business for hotel or resort:
Selects prospective customers by reviewing information concerning functions; such as, sales meetings, conventions, training classes, and routine travel by organization members. Calls on prospects, analyzes requirements of occasion, outlines types of service offered, and quotes prices. Verifies reservations in person. Confers with customer and hotel-department heads to plan function details; such as, space requirements, publicity, time schedule, food service, and decorations. Serves as convention adviser or hotel agent during function to resolve problems, such as space adjustment and need for additional equipment.

5177-118 SALES REPRESENTATIVE, TELECOMMUNICATIONS (telecom.) DPT:258
GED: 4 SVP: 6 EC: 1 PA: L 5 6

Sells telecommunications services, such as telephone, teletypewriter and telegraph, to industrial, commercial and institutional customers: Consults with customer and company personnel, reviews plans and inspects existing installations to determine communication needs of establishment, utilizing knowledge of type of business, communication traffic patterns and services and equipment available. Recommends installation or expansion of equipment, such as switchboards, telephones, or teletypewriters. Quotes rates, installation charges and operating costs. Prepares and issues service orders for installation of equipment. Investigates customer complaints concerning billing errors or faulty service. Compiles data to evaluate utilization of service and propose areas of expansion.
May train customers in use of telecommunication equipment. May be designated according to type of telecommunication service sold; for example,
Sales Representative, Telephone Service

5177-122 SALESMAN, FREIGHT SERVICE (motor trans.; rail trans.; storage, n.e.c.) DPT:357
crating-and-moving estimator.
GED: 4 SVP: 6 EC: 1 PA: L 4 5 6

Solicits freight and storage business for railroad or trucking firm:
Visits homes and business establishments to persuade prospective customers to use company's service. Estimates cost of packing, crating, shipping and storing household goods, machinery, manufactured products and other material. Estimates cubic feet of shipping or storage space required, using comparison chart or electronic measuring device. Advises customers on insurance coverage and arranges pick-up and delivery times.
May compute liability and insurance costs.

5177-126 MEMBERSHIP PROMOTION OFFICER (misc. serv.) DPT:358
sales representative, trade association.
GED: 4 SVP: 6 EC: 1 PA: L 5 6

Solicits memberships in trade association:
Visits prospective members to explain benefits of membership and to describe organization and objectives of association. Quotes costs and collects payment for publications, administration and other services.
May conduct membership meetings.

5177-130 SALESMAN, FINANCIAL SERVICES (bus. serv.) DPT:358
GED: 4 SVP: 6 EC: 1 PA: L 5 6

Sells financial and related services such as credit information, debt collection, auditing and accounting to commercial, industrial and other business establishments:
Compiles and maintains lists of prospects through social and business contacts, from telephone, business and professional directories, and through observation of business developments. Reviews contracts to seek opportunities for expansion of present business. Visits prospective customers to explain features, benefits and costs of service. Prepares

contracts and schedules initiation of service. Confers with customer and company personnel to resolve complaints.
May collect payments on accounts. May be designated according to type of financial service sold; for example,
Salesman, Collection Agency Sales Representative, Credit Bureau

5177-134 SALESMAN, PRINTING (print. & pub.) DPT:358
GED: 4 SVP: 6 EC: 1 PA: L 5 6

Solicits business for printing firm:
Prepares sales promotion letters for prospective customers, following leads from management, established customers and other sources. Visits business establishments and confers with purchasing personnel to describe service, quote prices and explain technical features, such as type size and style, paper stock and reproduction methods. Expedites customer's order through printing processes to resolve delays and other problems.
May submit formal bids on large orders of printed matter.

5177-138 SALESMAN, MACHINE-VENDING SERVICE (whole. trade) DPT:358
GED: 4 SVP: 5 EC: 1 PA: L 5 6

Sells machine-vending service for items such as soft drinks, sandwiches, candy, cigarettes or flight insurance to business firms and institutions:
Visits prospective customer to explain services offered. Compiles market demand data, prepares installation proposals and completes service contract.

5177-142 SALESMAN, ARMoured-CAR SERVICE (bus. serv.) DPT:358
GED: 3 SVP: 3 EC: 1 PA: L 5 6

Sells armoured-car service to protect business funds and valuables in transit and sells cheque-cashing installations.
Develops lists of prospective customers from directories and observation of business expansion. Visits business firms to explain types, advantages and costs of armoured-car and cheque-cashing services available. Calculates charges for contracted service based on such factors as amount of liability, frequency of service, truck mileage and number of cheques cashed. Schedules time and place of service. Investigates customer complaints and recommends solutions.

5177-199 OTHER BUSINESS SERVICES SALESMEN

This group includes business services salesmen, not elsewhere classified; for example, those who sell trading stamps, building maintenance or security services. Typical examples of occupational titles covered by this residual group definition are:
Salesman, Building Maintenance (bus. serv.)
Salesman, Security Services (bus. serv.)

5179-SALES OCCUPATIONS: SERVICES, N.E.C.

This unit group includes occupations, not elsewhere classified, concerned with selling services, such as dance instruction and television cable service.

5179-110 SALESMAN, EDUCATION COURSES (educ.) DPT:358
GED: 4 SVP: 5 EC: 1 PA: L 5 6

Solicits applications for enrolment in technical, commercial and industrial schools or correspondence courses:
Advises customers in selecting courses of study based on their educational and vocational objectives. Explains courses offered by school, quotes fees and compiles registration information. Receives registration fees or tuition payments and issues receipts.
May visit industrial firms to promote sale of training courses for employees.

5179-114 SALESMAN, DANCING INSTRUCTIONS
(educ.) DPT:358
GED: 3 SVP: 5 EC: 1 PA: L 5 6

Sells social and ballroom dancing instructions to customers at dance studio;
Interviews and dances with prospect to ascertain dancing background and ability. Devises plan of instructions and attempts to sell it to customer. Prepares sales contracts and receives payments.
May prepare advertising programs to promote dancing classes.

5179-118 SERVICE REPRESENTATIVE, BUSINESS OFFICE (telecom.) DPT:358
business-office representative.
GED: 3 SVP: 5 EC: 1 PA: S 4 5 6

Performs a variety of duties in business office of telephone company:
Answers customer inquiries and complaints concerning accounts, service or other matters, using telephone or in person. Takes orders for telephone service, recommends types of equipment and services, such as coloured telephones, extensions or unlisted numbers, and quotes installation costs and rental rates. Routes orders to other departments for processing. Arranges for sales representatives to visit customers requiring special or complex communications services. Examines block of customer accounts to detect delinquent payment and mails overdue notices or telephones customers to arrange payment. Maintains records of complaints, inquiries, orders and accounts handled.

5179-122 SALESMAN, TELEVISION-CABLE SERVICE
(telecom.) DPT:358
GED: 3 SVP: 4 EC: 1 PA: L 5 6

Sells community television antenna service or service from cable:
Visits homeowners, apartment owners and building contractors to persuade them to purchase service.
May sell related commodities, such as television sets or apartment intercommunication-security-door systems.

5179-126 COUNTER CLERK (ret. trade) DPT:468
GED: 2 SVP: 3 EC: 1 PA: L 5 6

Receives articles, such as watches, shoes, or clothing to be repaired or cleaned, in retail sales or service establishment:
Quotes price and estimates completion date. Prepares work ticket and sends article to work department. Returns finished articles to customer and receives payment due.
May keep records of cash receipts and articles received and delivered.
May sell items; such as, cleaner, polish, shoelaces and accessories.

5179-199 OTHER SALES OCCUPATIONS, SERVICES

This group includes sales workers in services, not elsewhere classified; for example those concerned with estimating costs of repairs to watches and clocks.

519-OTHER SALES OCCUPATIONS

This minor group includes occupations, not elsewhere classified, concerned with conducting wholesale or retail trade businesses, on own or owners' behalf or in partnership; supervising and co-ordinating activities of workers directly or indirectly engaged in other sales occupations; buying commodities for resale in the wholesale and retail trade; driving vehicles over established routes to deliver and sell bakery and dairy products and to collect and deliver laundry and dry cleaning; selling, renting, and demonstrating goods and services; and appraising commodities. Sales managers are in Unit Group 1137, **SALES AND ADVERTISING MANAGEMENT OCCUPATIONS. OTHER SALES OCCUPATIONS** are classified in the following unit groups:

- 5190** Supervisors, Other Sales Occupations
- 5191** Buyers, Wholesale and Retail Trade
- 5193** Driver-Salesmen
- 5199** Other Sales Occupations, n.e.c.

5190-SUPERVISORS, OTHER SALES OCCUPATIONS

This unit group includes occupations, not elsewhere classified, as described under the master titles, 01-180 **MANAGING SUPERVISOR** (any ind.) and 01-250 **SUPERVISOR/FOREMAN** (any ind.), concerned with conducting businesses on own or owners' behalf or in partnership; or supervising and co-ordinating workers directly and indirectly engaged in buying commodities for resale in wholesale and retail trade; driving vehicles to deliver and sell commodities and services; selling, renting and demonstrating goods and services; and appraising commodities.

5190-110 SUPERVISOR, DRIVER-SALESMEN (any ind.) DPT:138
route supervisor.

Supervises and co-ordinates activities of workers engaged in driving vehicles over established routes to sell products or to pick up and deliver laundry and dry cleaning (Unit Group 5193):
Performs duties as described under master title, 01-250 **SUPERVISOR/FOREMAN** (any ind.). Investigates customer complaints and collects overdue accounts.
May perform duties of absent route personnel.

5190-199 MISCELLANEOUS SUPERVISORS, OTHER SALES OCCUPATIONS

This group includes sales supervisors, not elsewhere classified; for example, those who supervise and co-ordinate the activities of workers engaged in selling, renting, and demonstrating goods and services, and appraising commodities. Typical examples of occupational titles covered by this residual group definition are:
Supervisor, Locker Plant (ret. trade)
Supervisor, Rental Service (any ind.)

5191-BUYERS, WHOLESALE AND RETAIL TRADE

This unit group includes occupations concerned with buying commodities for resale in wholesale and retail trade. Purchasing agents and officers and buyers who buy for internal use or for processing, rather than resale, are classified in Unit Group 1175, **PURCHASING OFFICERS AND BUYERS, EXCEPT WHOLESALE AND RETAIL TRADE.**

5191-110 BUYER (ret. trade; whole. trade) DPT:118
GED: 5 SVP: 7 EC: 1 PA: L 5 6

Buys goods for resale by wholesale or retail trade establishment, according to instructions, experience and knowledge of market trends: Reviews requirements of establishment to determine quantity and type of goods to purchase. Studies trade periodicals, sales promotion material and other market information on varieties, qualities and prices of goods available. Interviews salesmen, manufacturers and other suppliers, visits showrooms, factories and markets, and undertakes special buying missions. Negotiates prices, credit terms, discounts and delivery arrangements with suppliers. Authorizes payments of invoices or return of unsatisfactory merchandise. May inspect, sample, grade or weigh goods prior to purchase or on delivery. May price items for resale. May be designated according to type of establishment or kind of goods purchased; for example, Buyer, Chain Store (ret. trade) Wholesale Buyer (whole. trade) Meat Buyer

5191-114 BUYER, ASSISTANT (ret. trade) DPT:368
GED: 4 SVP: 5 EC: 1 PA: L 4 5 6

Assists in buying merchandise for resale in a retail store: Examines merchandise and invoices to verify quantity and quality of goods received from manufacturer or wholesaler. Advises 5191-110 BUYER (ret. trade; whole. trade) and writes or telephones suppliers to correct discrepancies between goods ordered and goods received. Informs markers of prices and code numbers to print on price tickets and reduced prices to be used for marked-down merchandise. Inspects exchanged or refunded merchandise. See also definition for term title, 02-040 ASSISTANT (any ind.). May authorize payment of invoices or return of shipment. May approve advertising copy for newspaper.

5191-118 BUYER, SALVAGE (whole. trade) DPT:353
junkman; scrap buyer.
GED: 3 SVP: 5 EC: 1 PA: H 3 4 5 6 7

Buys scrap materials; such as, metal, rags, paper, bottles and rubber, from industrial, commercial and institutional establishments, construction projects and individuals for resale: Appraises, grades and weighs material to determine price to be paid. Purchases goods according to authorization or prospect for resale. Drives car or truck to collect or deliver material. Sells purchased material to foundries, mills and other industrial, commercial and private customers. May use cart or wagon to transport materials.

5193-DRIVER-SALESMEN

This unit group includes occupations concerned with driving trucks or other vehicles over an established route to deliver and sell goods, such as dairy and bakery products; collect and deliver items, such as laundry and dry-cleaned garments; or collect coins, refill vending machines, and service amusement machines. Deliverymen who do not sell but who may collect payment for goods delivered are in Unit Group 9175 - TRUCK DRIVERS.

5193-110 AMUSEMENT-MACHINE ROUTEMAN (amuse. & rec.) DPT:363
GED: 3 SVP: 4 EC: 1 PA: M 3 4 5 6

Collects money from, and services coin-operated amusement machines, such as juke-boxes and pin-ball machines, along established route: Selects records of popular music to be used in juke-boxes based on familiarity with current popularity. Gives directions to workers engaged in typing or printing music titles and names of entertainers on selection cards to be used in machines. Drives service truck to carry supplies and repair equipment. Changes records in machines. Records amount of money taken from machine coin boxes and pays establishment owner his share of profits. Makes minor repairs to amusement machines, using hand tools. May install amusement machines in newly contracted establishments. May be designated according to machine serviced; for example,

Juke-Box Routeman
Shuffleboard Routeman

Pin-Ball-Machine Serviceman

5193-114 VENDING-MACHINE ROUTEMAN (bus. serv.) DPT:453
GED: 3 SVP: 3 EC: 1 PA: H 3 4 5 6

Collects coins and refills vending machines that dispense items, such as cigarettes, food and beverages: Loads truck or car with supplies, according to written or verbal instructions. Drives vehicle to establishment, collects coins, refills machines, and records amount of money collected. Turns in money to cashiering department at completion of route. Repairs malfunctioning machines, using hand tools, or reports malfunction to supervisor. Converses with prospective customers to persuade them to install vending machines in their establishment. May keep stock records of merchandise drawn from warehouse. May make refunds to customers, using refund slips. May report customer complaints to supervisor.

5193-118 DRIVER-SALESMAN (any ind.) DPT:353
routeman.
GED: 3 SVP: 2 EC: B PA: H 4 5 6 7

Drives truck over established route to deliver and sell merchandise, such as bakery or dairy products, on retail or wholesale basis, or services, such as laundering and dry cleaning: Loads truck with items, such as laundry and dry cleaning, bakery products or dairy products, and delivers items to customer's home or place of business. Writes delivery orders and collects payment for deliveries. Picks up empty containers, unsold merchandise, or articles to be cleaned, for return to plant. Calls on prospective customers to solicit new business and informs regular customers of new products or services. May place stock on shelves or in refrigerators. May set up displays and posters. May be designated according to product or service sold; for example, Breadman (ret. trade; whole. trade) Laundry Routeman (laund., clean. & press.) Milkman (ret. trade; whole. trade)

5193-122 MOBILE-CANTEEN DRIVER (ret. trade) DPT:473
GED: 3 SVP: 2 EC: B PA: L 4 5 6 7

Drives mobile-canteen truck on scheduled route to sell food and beverages to industrial and office workers, students and other customers at business or recreational locations: Loads and unloads truck with food items, such as sandwiches, cakes, and candy; and beverages, such as coffee, milk and soft drinks. Hands items to customers, fills beverage cups, receives payment and makes change. Maintains truck and food-dispensing equipment in clean sanitary condition and in good working order. May prepare sandwiches and brew coffee.

5193-126 DRIVER-SALESMAN HELPER (any ind.) DPT:667
GED: 2 SVP: 2 EC: B PA: M 3 4 5 6

Helps 5193-118 DRIVER-SALESMAN (any ind.) in providing sales, services or deliveries of goods to customers on an established route: Loads and unloads truck at beginning and end of trip. Carries goods from truck to customer's home or business. Collects payments or obtains receipts. May drive truck. May help solicit new business.

5199-OTHER SALES OCCUPATIONS, N.E.C.

This unit group includes occupations, not elsewhere classified, concerned with activities; such as, selling, renting, and demonstrating goods and services and with appraising commodities.

5199-110 APPRAISER (bus. serv.) DPT:287
GED: 5 SVP: 7 EC: B PA: L 4

Assesses value of property, buildings, industrial and commercial machines and equipment, personal and household effects, merchandise and other articles for such purposes as loan financing, insurance, taxation, disposition of estates, liquidation of assets of bankrupt firms or resale:

Examines condition of items, computes depreciation, repair and replacement costs, and estimates wholesale or resale values according to experience and knowledge of original costs, current market values, and market trends. Submits appraisal reports to lending agencies, insurance companies, government offices, courts, attorneys, creditors, buyers, auctioneers or other clients.

May be designated according to type of item appraised or purpose of appraisal; for example,

Appraiser, Furniture Insurance Appraiser

5199-114 PAWNBROKER (ret. trade) DPT:257
GED: 4 SVP: 6 EC: I PA: L 4 5 6 7

Estimates pawn or pledge value of jewellery, cameras, musical instruments and other items and lends money to customer:

Examines pledged items to determine condition and value. Weighs precious metals on coin balance and applies acid test to determine purity. Inspects gems with loupe to detect flaws and judge colour. Assigns pledge value to article, based on experience or wholesale price listing. Lends money to customer, issues pawn ticket and records loan. Computes interest and receives payment when pledges are redeemed. Sells unredeemed pledged items.

May perform duties as described under master title, 01-180 MANAGING SUPERVISOR (any ind.).

5199-118 APPRAISER, AUTOMOBILE (ret. trade) DPT:268
GED: 4 SVP: 6 EC: B PA: L 5 6 7

Appraises automobiles to determine cash value or trade-in allowance on purchase of new or used car:

Observes condition of car, listens to engine and determines repairs required. Estimates resale value according to prevailing-price guide-books. Quotes trade-in allowance to customer or salesman.

May test drive car to assess running condition.

5199-122 FILM-RENTAL CLERK (ret. trade) DPT:367
GED: 4 SVP: 4 EC: I PA: S 5

Views, recommends and rents films to individuals and organizations, using knowledge of film content, availability of film and rental charges:

Views incoming films to familiarize self with content. Recommends films on specific subjects to show to designated group, such as school, church, club or business firm. Determines and quotes rental charges for film, depending on purpose for showing film, number of times to be shown, and size of audience. Writes orders, lists shipping and show-dates and method of shipping film. Posts film rental dates on office records to complete reservation.

May publish catalogue and write letters to customers to promote sales.

5199-126 MODEL (ret. trade; whole. trade) DPT:664
fashion model.
GED: 3 SVP: 5 EC: I PA: L 4 5 6

Models garments; such as, dresses, coats, underclothing, swimwear and suits for photographers, designers, buyers, sales personnel and customers:

Dresses in sample or completed garments, applies cosmetics, arranges hair and dons accessories, such as gloves, hat and purse. Stands, turns and walks to demonstrate garment features, such as quality, style and design, to observers at fashion shows, private showings and retail establishments.

May inform prospective purchasers of model, number and price of garments and location where garment can be purchased. May select own accessories. May perform social functions, such as greeting and introducing guests at banquets, luncheons, and tea parties.

5199-130 LINEN-RENTAL-CONTROL MAN (laund., clean. & press.) DPT:368
GED: 3 SVP: 4 EC: I PA: L 4 5 6

Contacts customers of linen-rental service to discuss inventory control and usage of rented articles:

Discusses inventory control and stock turnover with customers. Checks customers' stock, verifies inventory records and reviews customers' orders to determine stock levels and turnovers. Charges customer for loss of or damage to stock, and recalls stock overages. Investigates and resolves complaints of large depositors.

5199-134 SALES CLOSER (any ind.) DPT:358
GED: 3 SVP: 3 EC: I PA: L 5 6

Calls on individuals previously solicited in person, by telephone, or by mail to close sale on merchandise or service:

Displays, demonstrates or explains features of merchandise or service. Prepares sales order, collects deposit and gives receipt.

May deliver merchandise.

5199-138 COMPARISON SHOPPER (ret. trade) DPT:368
GED: 3 SVP: 3 EC: I PA: L 7

Shops at designated competing stores to verify prices, quality and style of merchandise:

Visits stores to observe details of merchandise that will be valuable to employer in setting prices and determining buying policies. Verifies complaints of customers on price of merchandise by shopping at designated store to ascertain same quality and style for specified price. Prepares reports of findings.

5199-142 PERSONAL SHOPPER (ret. trade) DPT:378
GED: 3 SVP: 3 EC: I PA: L 4 5 6

Selects and purchases merchandise for department store customers, according to mail or telephone requests:

Speaks to customer on telephone or reads mail order to determine customer's wishes. Selects merchandise to meet requirements. Prepares order and delivery forms and forwards to other departments for processing. Keeps records of transactions.

May process merchandise returned for exchange. May escort customer through store.

5199-146 TOOL-AND-EQUIPMENT-RENTAL CLERK (misc. serv.) DPT:467
GED: 3 SVP: 3 EC: I PA: M 4 5 6

Rents tools and equipment to customers:

Suggests tools or equipment required, based on work to be done. Prepares rental form and quotes rental rates to customer. Starts power equipment to insure performance before issuing to customer and on return. Computes rental fee based on hourly, daily, weekly or monthly rates when equipment is returned. Receives and deals with customer complaints concerning tools or service. Performs minor repairs and maintains power tools and equipment.

May drive truck to deliver tools or equipment to customer.

5199-150 CAR-RENTAL CLERK (motor trans.) DPT:468
counter representative, car rental.
GED: 3 SVP: 3 EC: I PA: S 5 6

Rents motor vehicles to customers at company office, hotel or transportation terminal:

Examines customer's driver's licence to ascertain legal driving status of customer. Estimates cost of rental, writes rental contract and collects deposit. Escorts customer to vehicle or arranges for vehicle to be delivered to customer. Computes rental charges on return of vehicle, based on time, miles travelled and other charges, and collects payment. Maintains records of vehicles rented and monies handled. Provides information concerning tourist attractions, local events and accommodations.

5199-154 DEMONSTRATOR (ret. trade; whole. trade) DPT:657

GED: 3 SVP: 3 EC: 1 PA: L 4 5 6

Demonstrates articles for sale in wholesale, retail and industrial establishments, at exhibitions, or in private homes:
Arranges displays in establishments, at exhibitions and in homes, or organizes demonstration parties in private homes. Demonstrates and explains functions of items. Describes qualities and merits of items to potential customers to stimulate buying interest.
May sell or take orders for merchandise demonstrated.

5199-156 WELCOME HOSTESS (bus. serv.) DPT:358
welcome-wagon hostess.

GED: 3 SVP: 2 EC: 1 PA: S 5 6

Promotes goodwill and solicits trade for local business firms who are members of parent organization:
Develops lists of prospective clients from such sources as newspaper items, utility or transport company records and local merchants. Visits homes of new residents, recently married couples and other prospects to explain and promote services available from local merchants. Presents token gifts and gift certificates to induce clients to use local services and purchase local merchandise. Informs clients of recreation activities, transportation facilities and other community services available. Receives complaints and submits them to member firms. Prepares reports of services rendered and receptions encountered for parent organization and member firms.
May solicit new organization memberships. May organize clubs and plan parties for new residents.

5199-158 TELEPHONE SOLICITOR (any ind.) DPT:357
GED: 2 SVP: 2 EC: 1 PA: S 4 5 6

Solicits orders for merchandise or services over telephone:
Calls prospective customers to explain type of service or merchandise offered. Quotes prices and tries to persuade customer to buy, following prepared sales talk. Records names, addresses, purchases and reactions of prospects solicited. Refers orders to other workers for filling.
May develop lists of prospects from city and telephone directories.

5199-162 RENTAL-SHOP ATTENDANT, RECREATIONAL EQUIPMENT (ret. trade) DPT:477
GED: 2 SVP: 2 EC: B PA: L 4 5 6

Rents skates, bicycles, row boats or other recreational equipment at arena, park, beach or similar recreational facility, by performing any combination of the following duties:
Issues article to customer, collects payment or deposit, and records time of transaction. Receives returned article and examines it for damage. Records time of return and computes fee based on elapsed time. Sharpens ice skates, lubricates bicycles and performs similar maintenance duties.
May repair damaged equipment. May be designated according to type of equipment rented; for example,
Bicycle-Stand Attendant Skate-Shop Man

5199-199 MISCELLANEOUS SALES OCCUPATIONS

This group includes other sales workers, not elsewhere classified; for example, those concerned with providing bridal consultant services. A typical example of an occupational title covered by this residual group definition is:
Bridal Consultant (ret. trade)

PROCESSING OCCUPATIONS

This major group includes occupations concerned with refining, mixing, compounding, chemically treating, conditioning or otherwise treating materials such as ores, metals, clay, glass, stone, chemicals, petroleum, rubber, plastic, foods, beverages, paper, wood, textile fibres, hides, pelts and tobacco for direct use; or to produce semi-finished materials for further machining or fabricating; or to produce finished products, such as bricks, tiles, processed food, newsprint, lumber, plywood and cloth. These occupations are classified in the following minor groups:

- 811 Mineral Ore Treating Occupations
- 813/814 Metal Processing and Related Occupations
- 815 Clay, Glass and Stone Processing,
Forming and Related Occupations
- 816/817 Chemicals, Petroleum, Rubber, Plastic and
Related Materials Processing Occupations
- 821/822 Food, Beverage and Related Processing Occupations
- 823 Wood Processing Occupations, Except Paper Pulp
- 825 Pulp and Papermaking and Related Occupations
- 826/827 Textile Processing Occupations
- 829 Other Processing Occupations

811-MINERAL ORE TREATING OCCUPATIONS

This minor group includes occupations concerned with preparing crude mineral ores for direct use or further processing, into the finished state or any intermediate state in refining, by such means as crushing, grinding, mixing, filtering or melting. These occupations are classified in the following unit groups:

- 8110 Foremen, Mineral Ore Treating
Occupations
- 8111 Crushing and Grinding Occupations,
Mineral Ores
- 8113 Mixing, Separating, Filtering and Related
Occupations, Mineral Ores
- 8115 Melting and Roasting Occupations, Mineral
Ores
- 8116 Inspecting, Testing, Grading and Sampling
Occupations, Mineral Ore Treating
- 8118 Occupations in Labouring and Other
Elemental Work, Mineral Ore Treating
- 8119 Mineral Ore Treating Occupations, n.e.c.

**8110-FOREMEN, MINERAL ORE TREATING
OCCUPATIONS**

This unit group includes occupations as described under the master title, 01-250 SUPERVISOR/FOREMAN (any

ind.), concerned with supervising and co-ordinating activities of workers engaged in preparing crude mineral ores for direct use or further processing.

**8110-110 FOREMAN, CRUSHING AND GRINDING
OCCUPATIONS, MINERAL ORES (iron & steel;
non-ferrous metal) DPT:138**

Supervises and co-ordinates activities of workers engaged in reducing minerals and ores to a smaller state by crushing, grinding and related methods. (Unit Group 8111):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

May supervise workers engaged in a particular crushing or grinding process and be designated accordingly; for example,

Mill Foreman

Preparation-Plant Foreman

**8110-114 FOREMAN, INSPECTING, TESTING AND
GRADING OCCUPATIONS, MINERAL
ORES(iron & steel; non-ferrous metal) DPT:138**

Supervises and co-ordinates activities of workers engaged in inspecting, testing and grading as described under term titles, 02-170 INSPECTOR (any ind.), 02-430 TESTER (any ind.) and 02-150 GRADER (any ind.), concerned with quality control activities in mineral ore processing. (Unit Group 8116):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

**8110-118 FOREMAN, LABOURERS AND OTHER
ELEMENTAL WORKERS, MINERAL ORES(iron
& steel; non-ferrous metal) DPT:138**

Supervises and co-ordinates activities of workers engaged in labouring or other elemental work, as described under term title, 02-190 LABOURER/ELEMENTAL WORKER (any ind.), concerned with preparing crude mineral ores for direct use or further processing. (Unit Group 8118):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

**8110-122 FOREMAN, MELTING AND ROASTING
OCCUPATIONS, MINERAL ORES(iron & steel;
non-ferrous metal) DPT:138**

Supervises and co-ordinates activities of workers engaged in heating mineral ores or concentrates to change them from solid to liquid state for compounding with other materials, or roasting ores and concentrates to eliminate impurities or to change state. (Unit Group 8115):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

May supervise workers engaged in a particular heating or roasting process and be designated accordingly; for example,

Converter Foreman

Foreman, Sintering Plant

Reclamation Foreman

Tapper Foreman.

**8110-126 FOREMAN, MIXING, SEPARATING, FILTERING
AND RELATED OCCUPATIONS, MINERAL
ORES(iron & steel; non-ferrous metal) DPT:138**

Supervises and co-ordinates activities of workers engaged in combining mineral ores with solvents or amalgams to produce a single mass or compound, or separate desirable materials in ore or concentrate by such means as forcing it through filtering devices or screens by pressure, sifting or straining, or by centrifugal force, gravity, flotation, leaching, amalgamation, electrolysis, precipitation or agitating devices. (Unit Group 8113):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

May supervise workers engaged in a particular process and be designated accordingly; for example,

Filter-Plant Foreman

Foreman, Cell Operations(non-ferrous metal)

Foreman, Lead Refining(non-ferrous metal)

Foreman, Uranium Processing(non-ferrous metal)

**8110-199 OTHER FOREMEN, MINERAL ORE TREATING
OCCUPATIONS**

This group includes mineral ore treating foremen, not elsewhere classified; for example, those who supervise and co-ordinate activities of workers engaged in operating and maintaining aluminum- reduction pots, and splitting, trimming, grading and sizing mica. Typical examples of occupational titles covered by this residual group definition are:

Mica-Processing Foreman(non-ferrous metal)

Reduction-Plant Foreman(non-ferrous metal)

**8111-CRUSHING AND GRINDING OCCUPATIONS,
MINERAL ORES**

This unit group includes occupations primarily concerned with operating and tending equipment that reduces minerals and ores to a smaller state by crushing, grinding and related methods.

**8111-110 PANELBOARD OPERATOR(iron & steel; non-
ferrous metal) DPT:262**

central-control room operator; process operator.

GED: 4 SVP: 6 EC: I 5 7 PA: L 4 5 6 7 Operates

panelboard in central control room to mill ore for industrial use or further processing, performing any combination of following duties:

Operates push button, switch, lever, and rheostat controls on panelboard to start plant equipment; such as, crushers, feeders, grinding mills, screens, conveyors, separators, filters, scrubbers, compressors, dust collectors and pumps. Studies production schedules and adjusts controls to draw specified amounts and proportions of different grades of materials from storage bins onto conveyors and into processing system. Observes flow of material and equipment operation on closed circuit television screens. Monitors annunciator alarms and lights on panelboard to detect equipment overloading and malfunctions. Notifies mill attendants, or maintenance personnel using public address system or telephone, to check on irregularities in system, or personally examines faulty equipment to determine nature of trouble. Shuts down plant, alters rate of feed, or reroutes materials until malfunctions have been corrected. Reads ammeters to determine load on conveyors and regulates loads to adjust blends. Compiles shift operating reports.

May process materials other than ore, such as coal and rock. May be designated according to equipment operated; for example,

Crusher-Control-Room Operator

**8111-114 GRINDING-MILL OPERATOR(iron & steel; non-
ferrous metal) DPT:582**

GED: 3 SVP: 5 EC: I 5 7 PA: L 4

Operates panelboard to control machinery and equipment, such as conveyor belts, vibrating feeders, rod and ball mills, distributors, centrifugal and magnetic separators, and pumps to grind ore and to separate iron particles from gangue:

Sets and adjusts automatic controls on panel, to regulate feed flow of conveyors, flow of lubricant to rod and ball mill bearings, and flow of water to mills and separators. Starts grinding and separating machinery and equipment. Observes indicator lights and gauges, and turns levers or pushes buttons on panel to adjust operating conditions, such as temperature of mill bearings, amount of electric current flowing through mill drive motors, and rate of ore flowing from feeder conveyors. Records number of machinery breakdowns and repairs, number of rods and balls charged into mills, and amount of ore processed. Cleans elevator buckets and transfer chutes, using shovel, broom and brushes.

May carry out routine maintenance on equipment, using hand tools. May pass hand magnet over sludge to determine extent of separation of iron particles from gangue.

8111-118 SLURRY-CONTROL MAN(non-ferrous metal) DPT:485
GED: 3 SVP: 5 EC: B 5 7 PA: M 2 4

Tends ball mill and auxiliary equipment that grinds and mixes bauxite with materials to form slurry for subsequent refining:
Computes amounts of bauxite, starch and liquor in specified proportion, using weightometer. Turns valves and starts ball mill to grind bauxite. Turns valves on pumps to release liquor and starch from storage bins and to mix solution with ground bauxite in ball mill to form slurry. Starts pumps to transfer slurry to digester feed tanks. Opens and closes valves to pump sodium sulphide solution into slurry to control alkalinity and acidity content. Lubricates valves, with grease gun, and adjusts packing glands to prevent leaks.

8111-122 GRINDING AND CLASSIFIER TENDER(non-ferrous metal) DPT:685
GED: 3 SVP: 4 EC: I 5 7 PA: L 2 4

Tends ball or rod mill that grinds and mixes ore with chemicals to form slurry, and classifier that separates coarse from fine particles:
Starts mill and feed conveyors. Turns pump valves to feed soda ash, starch, lime, water, ore and other materials into mill to make slurry. Pushes button to start screw conveyor that separates coarse particles from slurry and returns them to mill for re-grinding and turns valve to add chemical reagent to slurry that causes fine particles to float. Obtains sample of slurry in bucket from mill and classifier for laboratory analysis. Weighs sample on scale and calculates density of mixture, or reads density, using hydrometer. Turns valves to feed water into mill to obtain specified slurry density.
May titrate sample to measure alkalinity. May set automatic device to regulate amount of ore passing on conveyor belt to ball or rod mill. May be designated according to equipment operated; for example, Ball-Mill Operator
Rod-Mill Operator

8111-126 MILL TENDER(iron & steel; non-ferrous metal) DPT:665
GED: 2 SVP: 4 EC: I 5 6 7 PA: M 4 7

Tends milling equipment that grinds, pulverizes and screens ore-bearing rocks for further processing:
Adds or removes steel balls from mill, according to type of ore being processed. Starts conveyors, turns valves, dumps material or opens flow gate to load mill. Secures cover plate on mill. Starts and runs mill for specified time depending on size of load, grindability of material and required fineness. Removes cover plate, attaches grid, and starts mill to discharge pulverized ore. Regulates flow of materials into and out of mill when operating continuous process. Collects samples for laboratory analysis. Inspects and patrols area to adjust equipment and detect malfunctions.
May tend mill utilizing vacuum or air suction. May tend steam-jacketed mill that heats materials during processing. May keep production records.

8111-130 CRUSHER TENDER(any ind.) DPT:685
crusher man.
GED: 2 SVP: 4 EC: I 5 6 7 PA: M 4 7

Tends crusher that sizes materials, such as ore, rock, coal and salt for industrial use or further processing:
Starts crusher and auxiliary equipment in proper sequence. Moves levers to regulate flow of materials into crusher from conveyors, chutes or bins. Maintains uniform flow of crushed materials to screens or secondary crushers for further sizing, by controlling movement of conveyor belt or feeder. Stops crusher to break oversize lumps, using tools, such as bar, sledge hammer, and jackhammer, to prevent plugging. Cleans, lubricates and makes minor adjustments to crusher. May operate vibrating screens to separate materials within size ranges. May sample materials using shovel, scoop or mechanical sampler. May be designated according to type of equipment tended or material processed; for example,
Cone Tender
Jaw-Crusher Operator
Ore Crusher
Rock Crusher
Salt Crusher
Stone Crusher

8111-132 CRUSHER SETTER(mining & quarrying) DPT:664
GED: 2 SVP: 3 EC: I 5 7 PA: M 4

Adjusts gaps of cone crushers used to reduce ores to specified size:
Lowers lead cone into operating crusher that compresses cone to size of crusher gap. Measures compressed cone to determine amount of adjustment of crusher opening, using rule. Signals crane operator to turn threaded crusher bowl to set gap at specified opening. Drives wedges and bolts locking links to secure bowl, using sledges, pliers and bars.

8111-134 HYDRATE-SCALE-RECLAMATION MAN(non-ferrous metal) DPT:685
GED: 2 SVP: 3 EC: I 7 PA: M 4

Tends conveying and grinding equipment that reclaims aluminum hydrate scale:
Moves controls to regulate conveyor flow of hydrate scale to hammer mill and rod mill. Turns valves to add liquor to rod mill to maintain specified slurry density. Clears hoppers, pan feeders, and conveying equipment of accumulated materials, using bar, hammer or shovel. Turns valves and starts pumps to switch product flow through auxiliary units. Cleans conveyors, idlers and pulleys, using scrapers and cleaning tools. Obtains samples for laboratory analysis. Lubricates valves and adjusts packing glands to prevent leaks.

8111-138 MILL-TENDER HELPER(iron & steel; non-ferrous metal) DPT:686
GED: 2 SVP: 2 EC: I 4 5 6 7 PA: M 3 4

Helps to tend milling equipment that grinds, pulverizes and screens ore-bearing rocks for further processing:
Pulls lever to start and stop conveyor that feeds materials into mill. Shovels spillage back onto conveyor belt. Breaks large pieces of ore to facilitate passage of ore through grizzly into crusher, using bar, pick or hammer. Opens hatch and drains slurry from mill into trays. Sifts slurry to remove foreign particles, using screen or electric vibrator. Places trays in drying ovens for specified time. Lubricates mill and auxiliary equipment. Washes ball or rod mills, and cleans work area. See also definition for term title, 02-160 HELPER (any ind.).
May dump trays of dried slurry into drums. May move drums to storage area, using handtruck.

8111-142 CRUSHER HELPER(iron & steel; non-ferrous metal) DPT:687
GED: 2 SVP: 2 EC: I 5 7 PA: M 2 6

Helps to tend crushing equipment that sizes materials such as ore and rock for further processing:
Patrols area where equipment, such as crushers, conveyors and chutes are located to detect malfunctions. Reports equipment or processing abnormalities to plant operator, using telephone or intercom. Removes pieces of wood or steel from conveyor belt to prevent contamination of ore or damage to equipment. Inspects drilled holes in ore pieces passing on conveyor belt for unexploded dynamite. Inspects equipment to determine cause of trouble, estimates repairs required and notifies plant operator or maintenance crew of malfunction. Assists in repair or overhaul of equipment, working as member of crew. Performs routine maintenance, such as greasing, oiling, tightening nuts and bolts and adjusting belt tension. See also definition for term title, 02-160 HELPER (any ind.).
May clean work area, scraping and shovelling spill back on conveyor. May break, pry and force oversized rock through grizzly rails, using bar and sledge hammer. May be designated according to worker helped; for example,
Ore-Crusher Helper
Rock-Crusher Helper

8113-MIXING, SEPARATING, FILTERING AND RELATED OCCUPATIONS, MINERAL ORES

This unit group includes occupations concerned with operating and tending equipment which combine mineral ores with solvents or amalgams to produce a single mass or compound; or which separate desirable materials present in ore or concentrates, by filtering or screening. Methods

employed include: pressure, sifting, straining, centrifugal force, gravity, flotation, leaching, amalgamation, electrolysis, precipitation or agitation.

8113-110 ELECTROLYTIC REFINER(non-ferrous metal)
DPT:362

refinery operator.

GED: 3 SVP: 6 EC: I 4 6 7 PA: M 3 4 5 6 7

Controls equipment to refine non-ferrous metals by electrorefining: Straightens starter sheets used in electrorefining cell to prevent pointing, using sheet-rolling machine or mallet. Immerses and hangs starter sheets (cathodes) in tank, manually. Places impure anodes in filter bags, and positions them on bus bar (suspension bar) manually, or signals crane operator to lower and position anodes in cell filled with electrolyte solution. Passes steel rod between electrodes (anodes) to break off lumps which might cause short circuit and to verify specified clearance between electrodes. Examines, cleans and tightens electrical connections, using steel wool and hand tools. Turns electric current on and verifies voltage, using voltmeter. Opens and closes valves to control temperature, acidity, circulation and level of electrolyte in cells. Measures specific gravity of electrolyte, using hydrometer. Observes cropping (deposition of metal on cathode) process and signals crane operator to remove coated cathodes and depleted anodes from tank, or removes them manually. Sprays cathodes and anodes with water to remove slime and mud. Adds wash water to recovered slime and mud to remove other soluble minerals. Weighs anodes and cathodes before and after refining to calculate weight changes. Inspects cells for defects, such as loose connections, leaks, deteriorated bus bars and fittings, clogged floats and drainage connections. Repairs or replaces parts, using hand tools.

May place wood insulation chips under bus bar to control current flow through electrodes. May operate stripping equipment to recover semi-precious metals from spent electrolyte. May melt cropped semi-precious metals in furnace, and cast into bars. May remelt casted bars to further purify semi-precious metals. May be designated according to metal refined; for example,

Indium Refiner

Lead-and-Copper Refiner

8113-114 GRINDING-AND-FLOTATION OPERATOR(non-ferrous metal)
DPT:482

GED: 3 SVP: 6 EC: I 4 5 7 PA: M 4 7

Operates equipment, such as ball-mill, classifier, conditioner, reagent feeders and flotation cells to grind ores and refine minerals:

Moves lever to adjust belt feeder controlling flow of ore to ball-mill. Adds or removes number of balls in mill to maintain proper grinding load. Turns valves to regulate classifier underflow to obtain maximum grinding efficiency. Sets conditioner temperature to prepare pulp for flotation. Adjusts water feed valve of ball-mill discharge to maintain required pulp density. Measures pulp density and gauges alkalinity content, using pH meter. Verifies tailings density of flotation cells and removes froth accumulation, using shovel. Transfers aerofroth to feeder pan to maintain supply of frother in flotation cell, using can. Maintains supply of depressant in flotation cells, transferring oleic acid or quebracho depressant solution to holding pan, using pump or pail. Adds quantity of chemical reagents to obtain required concentrate recovery. Turns water valves to convey froth to discharge troughs. Obtains concentrate, raw mineral and classifier samples for laboratory analysis.

May be designated according to mineral processed; for example, Fluorspar-Recovery Operator

8113-118 SLIME-RECOVERY OPERATOR(non-ferrous metal)
DPT:662

slime-plant operator.

GED: 3 SVP: 5 EC: I 4 5 7 PA: M 2 3 4 5 6

Operates mineral ore treating equipment; such as, grinders, leachers, filters, presses and evaporators to recover gold, silver, selenium, and other mineral concentrates from impurities:

Grinds slag or ore impurities in ball mill and mixes product with water to form slurry. Turns valves and starts pumps to force mixture into leaching tanks. Starts agitators and adds chemicals to leach slurry solutions. Starts pumps to force leached solution through filters into settling tanks and installs orifices to control rate of flow of sediment and liquids to and from settling tanks. Feeds settled solution through

rotary drum filters, and presses filtered slime in press to form cake. Scrapes cake from filter and shovels into container for further processing. Obtains and weighs samples of slime during process for laboratory analysis. Drains and cleans tanks, wire screens, inflow pipes, and equipment with water hose.

May be designated according to mineral concentrate recovered; for example, Selenium-Plant Operator

8113-122 CLASSIFIER OPERATOR(non-ferrous metal)
DPT:682

tray-thickener operator.

GED: 3 SVP: 5 EC: I 4 5 PA: L 4 7

Operates classifier units to separate coarse and fine precipitated metallic particles from liquor or slurry:

Regulates valves on settling trays of separators to draw fine particles from top and coarse particles from bottom of tray. Adjusts valves to wash liquor from coarse particles in classifier unit. Pumps slurry from underflow of tray thickeners to surge or storage tanks, for immediate or subsequent processing, such as leaching or precipitating. Lubricates valves and adjusts packing glands to prevent leaks. Takes samples for laboratory analysis. Takes pH and density readings, and checks slime level that indicates settling. Opens and closes valves, and starts and stops pumps to circulate cleaning solutions through process lines.

May keep log of operations. May be designated according to mineral processed; for example, Aluminum Classifier Uranium Classifier

8113-126 LEACHING OPERATOR(non-ferrous metal)
DPT:682

GED: 3 SVP: 5 EC: I 5 7 PA: L 4 7

Controls equipment to leach metal from ore in solution:

Weights sample of solution and evaporates moisture, using heater. Reweighs sample to determine percentage of solid material in solution. Siphons water from solution to obtain specified concentration, according to chart. Adjusts controls to feed chemicals, such as cyanide or acid into tank of ground ore or filtered slime. Starts mechanical or pneumatic agitators, regulates flow of air and observes agitation of solution to ascertain dissolution of ore. Tests solution to determine degree of ore concentration, using hydrometer or by titration. Forwards sample of solution to laboratory for further analysis.

May tend filtering machine to separate fluids from metal. May tend pumps to force ground ore and solution into or from tanks. May lubricate equipment and clean tanks. May turn steam valves to regulate temperature in tank. May filter samples to determine percent extraction of mineral from ore, using press. May be designated according to ore leached; for example, Cadmium-Zinc Leacher

Molybdenum-Leaching-Plant Operator

8113-130 RESIDUAL-METAL RECOVERER(non-ferrous metal)
DPT:682

GED: 3 SVP: 5 EC: I 6 7 PA: M 2 3 4

Recovers precious or semi-precious metals from residues, performing any combination of following duties:

Shovels specified amount of metallic compound into weighing bucket and dumps into tank to leach minerals. Turns valves to raise temperature and add pulp liquor into tank. Adds coagulant into tank to settle solids and pumps wash water to storage tank. Presses buttons to pump slurry from leaching to filter tank and through filter press. Scrapes filtered cake from press and transfers to container for further processing. Pumps wash liquor from storage to electrolysis tank, and adds repulp water to provide specified degree of dilution. Positions electrode on bus bar of cell and switches on electric current to separate metals by electrolysis. Removes built up cathode. Scrapes or scoops crystals from cell. Adds chemicals to filtered or precipitated mixture to strip solution of precious metals.

May melt recovered crystals in furnace and cast in bars, or compress precipitated sponges into briquettes, using hydraulic press. May take samples for laboratory analysis. May weigh, tag and transport briquettes to storage room. May be designated according to metal recovered; for example,

Gold Recoverer
Indium Recoverer

Silver Parter

8113-134 DEWATERER TENDER(non-ferrous metal) DPT:585
dewaterer operator.
 GED: 3 SVP: 5 EC: I 4 7 PA: L 4 7

Tends dewatering equipment that filters minerals from slurry:
 Turns valve to regulate flow of slurry to dewaterers. Observes gauges and adjusts valves to maintain pressure and vacuum on dewaterers. Adjusts variable speed drive on feeder to supply uniform feed rate from dewaterers to kilns. Adjusts valves to maintain supply of wash water and to furnish water to vacuum pumps and water-cooled bearings. Lubricates valves and adjusts packing glands to prevent leaks. Changes charts on automatic recording equipment. Records tank levels and other operating data in log. Takes samples for laboratory analysis.
 May operate kilns in conjunction with dewatering equipment.

8113-138 COTTRELL TENDER(non-ferrous metal) DPT:665
dust operator; treater, cottrell.
 GED: 3 SVP: 5 EC: I 7 PA: M 2 3 4

Tends battery of electrical precipitators to collect metallic or calcine dust particles from fumes of smelting ore:
 Observes ammeters and voltmeters and moves panel controls to regulate flow of electric current to precipitators depending on type of metal being smelted. Switches off electric current and pulls levers to actuate air hammers or uses bar and sledge hammer to knock dust from electrodes. Replaces broken wires in precipitators, using pliers. Checks draft and temperature recording instruments on flue stack to ensure that they are operating. Closes and opens dampers for each treater compartment. Cleans treater compartments and equipment, using air and water hoses. Changes charts on recording instruments.
 May turn valves to spray acid and water into chambers to oxidize dust particles or separate soluble components. May operate gas heaters to maintain stack temperature at specified level.

8113-142 PRECIPITATOR(non-ferrous metal) DPT:665
 GED: 3 SVP: 5 EC: I 4 6 7 PA: L 2 4 5 6 7

Tends tanks and pumps to precipitate minerals; such as nickel, copper, gold, aluminum or uranium from slurry:
 Observes indicators and adjusts valves to regulate flow of slurry into precipitators and maintain level of liquor in tanks within specified limits. Starts tank agitator and turns valves to inject specified amount of reagents or anti-foaming agents into tank. Stops agitator after specified period of time to allow minerals to settle. Pumps slurry from precipitating to thickening tanks or filter presses. Takes sample of solution and slurry at specified intervals. Keeps pipe lines clear, using metal rod or compressed airhose. Directs other workers to lubricate and perform routine maintenance on equipment.
 May turn valve to circulate caustic solution in tank to break scale forming on walls. May pack zinc powder into compartments of mechanical vibrator and regulate flow of zinc that serves as precipitating agent for gold or silver.

8113-146 HEAVY-MEDIA TENDER(mining & quarrying) DPT:685
 GED: 3 SVP: 5 EC: I 5 7 PA: M 3 4

Tends gravity device to separate iron ore, coal or gravel from waste:
 Tests solution or reads gauge to determine specific gravity of solution in tanks. Adds heavy media, such as pulverized magnetite or ferro-silicon, using shovel and wheelbarrow. Starts oscillating rake to maintain correct density. Opens chute gate or starts conveyor to admit mixture into tank. Observes waste, such as dust, organic material or sand, float over weir or screen onto conveyor. Opens gate to draw off heavier materials such as coal, iron particles or gravel that was raked into discharge chute. Removes ferro-silicon or magnetite drawn off with coal, gravel, iron and waste from filtering device using electromagnet, shovel and wheelbarrow.

8113-150 WATER-TREATMENT-PLANT OPERATOR(non-ferrous metal) DPT:482
fume-scrubber operator.
 GED: 3 SVP: 4 EC: I 6 PA: L 2 4 7

Controls water plant equipment that scrubs and purifies gases from smelting furnaces:
 Starts pumps and fans in scrubber towers and turns valves to regulate flow of water through nozzles. Dumps specified number of sacks of sulphate or soda ash into mixing tank. Starts pump or conveyor to transport mixed solution to storage tanks. Observes control panel, records readings, and calculates solution temperatures, scrubber fan loads, and flow of treatment solutions, using charts and graphs. Takes sample of treatment solutions and sludge for laboratory analysis. Measures acidity or alkalinity of clarifier overflow to determine efficiency of impurity recovery, using pH meter.
 May change basket screens in reactor tanks, using chain hoist, and clean screens with water or steam.

8113-152 COAL-WASH-PLANT TENDER(mining & quarrying) DPT:685
coal washer; wet-coal-cleaning operator.
 GED: 3 SVP: 4 EC: I 5 7 PA: L 4 7

Tends equipment to size and wash coal for shipment or further processing:
 Starts equipment such as launderers, driers, vibrating tables, sizing screens, shakers and conveyors. Regulates flow of coal and water to separate coal from waste such as slate, rocks and other foreign material by flotation process. Transfers cleaned, dried and sized coal to loading chutes or storage. Observes gauges and indicator lights, and adjusts equipment to ensure maximum cleanliness of coal. Lubricates and performs minor maintenance on equipment.

8113-154 FLOTATION-CELL TENDER(non-ferrous metal) DPT:565
 GED: 3 SVP: 4 EC: I 4 7 PA: L 4 5 6 7

Tends ore treating equipment to separate metal particles from gangue by flotation:
 Patrols ore treating equipment and observes operation of flotation cells, pumps, frothers and agitators to detect malfunctions. Turns valves to regulate flow of pulp and reagents into cells. Observes froth level in cells and turns valves to increase or decrease flow of compressed air into cells to agitate mixture and promote froth. Adjusts reciprocating paddle to sweep frothed metallic bubbles into launders. Removes caked concentrate from side of flotation cells, using scraper and water hose. Takes samples of pulp and concentrate for laboratory analysis. Maintains daily production records in log.
 May clean, lubricate, and assist with repairs to equipment. May tend flotation cells that are agitated mechanically. May be designated according to metal separated; for example, Copper-Flotation Operator, Molybdenum-Flotation Operator

8113-158 ALUMINA-CLARIFIER TENDER(non-ferrous metal) DPT:665
 GED: 3 SVP: 4 EC: I 7 PA: L 2 4 5 6

Tends equipment that separates mud from alumina liquor and recovers soda from mud:
 Pumps thickened mud to washers and turns valves to regulate flow of water into washers. Turns valves to release specified amount of mud into washers to maintain sludge balance. Turns valves to pump sediments from washer into earthen thickeners. Opens valves to introduce starch into mud settlement and to regulate flow of milk of lime at specified rate. Directs helper to read gauges, record readings and take samples. Cleans working area, using water or air hose, broom and shovel.
 May keep log of operations.

8113-162 THICKENER TENDER(iron & steel; non-ferrous metal) DPT:585
solution tender.
 GED: 3 SVP: 4 EC: B 4 PA: L 4 7

Tends thickeners that separate waste solids from ore solutions preparatory to recovery of ore or disposal of waste:

Turns valves to regulate flow of mixture into thickeners. Inserts indicator into mixture to measure sludge level. Patrols work area to observe operation of equipment, overflow of concentrated ore solution, and flow of sludge from tank. Breaks up sedimentation in troughs, using wooden paddle. Takes samples of sludge and ore solutions and carries out routine tests, such as specific gravity, acidity, and titration. Prepares daily operating report indicating data, such as test results, equipment malfunctions, and operating times.

May tend filters that separate ore solution into liquid and filter cake. May control processing of ore in grinding and thickening areas of plant by monitoring and making adjustments on control panel. May be designated according to materials separated; for example, Red-Mud-Thickener Tender
Tailings-Thickener Tender

8113-164 CADMIUM RECOVERER(non-ferrous metal) DPT:685

cementation tender.

GED: 3 SVP: 4 EC: I 3 4 6 7 PA: L 4 7

Tends equipment such as tanks, pumps, cones, mixers, furnaces, filters, classifiers and conveyors to recover metallic cadmium from leaching, and prepare metal for casting:

Pumps solution from storage to treatment tanks and turns valves to raise temperature of solution to required level. Tests solution for copper content, using tables and formulas. Adds reagents to solution until copper content drops below specified level. Turns valves to pump treated solution through filters to remove copper precipitate. Pumps cleared solution to treatment tank and tests solution for acidity. Adds reagents to remove precipitate impurities and pumps treated solution to sponging cones. Turns steam valves to raise temperature of solution and adds zinc dust and other reagents to precipitate cadmium into granular form. Opens valves at bottom of cone to permit sludge to pour into filter where granules are retained. Discharges cadmium granules into hopper of briquetting machine, pulling lever. Starts machine to compress granules into briquettes. Melts briquettes in furnace, adds caustic soda to prevent oxidation and removes impurities from surface of melted metal.

8113-166 COPPER-DUST COLLECTOR(non-ferrous metal) DPT:685

GED: 3 SVP: 4 EC: I 4 7 PA: L 4 7

Tends dust collecting equipment in crushing department of copper refinery to recover ore from dust:

Starts feed conveyors, suction fans, impellers and electrodes. Moves controls to regulate dampers, equalizing ports and water eliminators. Turns valves to fill and maintain level of water in tanks. Observes operation of equipment and filling of collected dust in hoppers to ensure efficient operation. Cleans water eliminators, impellers, hopper walls, air chambers, fan housings and wheels, safety switches and water-level-control devices, using water or air hoses. Removes and cleans strainers in water lines. Adjusts and tightens belts on motors or pulley wheels to maintain tension, using hand tools. Lubricates motors and exhaust bearings.

8113-168 FILTERING ATTENDANT(mining & quarrying) DPT:685

GED: 3 SVP: 4 EC: I 5 PA: M 4

Tends horizontal, single-leaf-rotary filters and associated equipment, such as pulp boxes, feeders and conveyors to separate slurry into water and iron concentrate:

Turns rheostats to adjust speed of rotating filters to maintain specified cake thickness and moisture content of slurry. Turns valves to control flow of slurry to filters. Observes gauges and adjusts valves to control vacuum pressure in filters. Adjusts height of filter scrapers to avoid damaging filter cloths. Patrols work area to detect operating and mechanical irregularities such as plugging, leaking, stalling, overheating and vibrating. Cleans equipment and performs minor adjustments, using broom, shovel, water hose and hand tools. Cleans work area.

8113-170 ORE SEPARATOR(non-ferrous metal) DPT:685

GED: 3 SVP: 4 EC: I 4 5 7 PA: L 4

Tends equipment that separates crushed ore into sands (coarse particles) and slimes (fine particles), preparatory to concentration of metal:

Starts equipment, and regulates flow of crushed ore, water and

flotation reagent into classifiers that separate coarse particles by a raking mechanism or swirling action of water, while fine particles are carried off in overflow. Observes meter indicating alkalinity of slime, and adds chemicals, as necessary. Removes sand to prevent clogging by flushing with water or by pulling lever on classifier.

May lubricate machines. May replace defective parts, using hand tools. May be designated according to type of classifier used; for example,

Cone Man

8113-172 SINK-FLOAT OPERATOR(non-ferrous metal) DPT:662

GED: 3 SVP: 4 EC: I 4 5 6 PA: M 2 4 7

Operates sink-float (gravity)equipment to separate gypsum from anhydrite by density process:

Presses buttons to start fresh water and tailings pumps, demagnetizer and magnetizer. Starts conveyor, or separator and densifier (reserve tank holding magnetite and ferro-silicon), and signals other workers to start main ore feeder belt. Observes mixture of ore on conveyor and establishes density of media in separator, using balance scale. Manipulates valves and moves lever to regulate flow of water and quantity of densifier agents to adjust media to desired density. Regulates speed of rock mixture conveyor to keep density of media constant. Performs minor repairs to equipment and machinery, using hand tools.

8113-174 TABLEMAN(non-ferrous metal) DPT:685

jig tender.

GED: 3 SVP: 4 EC: I 4 PA: M 4

Tends reciprocating tables that separate minerals from gangue of ore:

Turns valves to regulate flow of concentrate and water onto tables. Regulates speed of reciprocating tables to permit settling of minerals in riffles (rows of parallel wooden slats covering tables) to effect maximum separation and recovery of metals. Adjusts slope of tables to establish line of separation between ore and gangue. Repairs tables, and adjusts and lubricates driving mechanism, using hand tools.

May be designated according to ore or material processed; for example,

Gold Jigger

Sludge Man

8113-178 ZINC-CHLORIDE TENDER(non-ferrous metal) DPT:685

GED: 3 SVP: 4 EC: I 4 7 PA: M 4 7

Tends equipment that separates zinc chloride from slag:

Loads slag into water-filled tank, using hoist, and dumps specified amount of ammonium chloride over slag. Agitates solution to dissolve zinc chloride from slag, using airhose. Determines specific gravity and acidity of solution, using hydrometer and standard test equipment. Pumps solution through filters to separate impurities. Takes samples of solution and observes colour to determine need for additional reagents and agitation. Pumps treated solution to storage tanks. Cleans sediment from equipment, using shovel and water hose.

May break up slag before loading it into tank, using sledge hammer. May replace filter cloth, using hand tools.

8113-182 REAGENT TENDER(non-ferrous metal) DPT:665

GED: 2 SVP: 4 EC: I 5 6 7 PA: L 4 5 6

Tends mechanical agitator that mixes chemicals with gangue of ore to separate and recover metallic particles:

Turns valves, or fills and dumps containers to add specified amounts of chemical, such as lime, copper and zinc sulphates, cyanide, chlorine, fuel oils, water or caustic soda from storage to mixing tanks. Starts agitator to blend mixture. Turns valves to transfer mixture to storage tank.

May tend ball-mills to produce slaked lime. May perform daily screen analysis on grinding operation to ascertain fineness of material.

8113-186 DIGESTER TENDER(non-ferrous metal) DPT:685
GED: 2 SVP: 4 EC: I 6 7 PA: M 4 7

Tends battery of digester units that dissolve bauxite ore in plant liquor to extract alumina hydrate:

Adjusts pumps and valves to circulate cleaning solution through process lines and to detect leaks in system. Turns valves to pump liquor and bauxite slurry through heaters into digester vessels. Injects milk of lime into vessels by turning valves. Minimizes presence of gases in low pressure heaters by maximizing retention time of solution in digester. Observes indicators and adjusts valves to maintain level of condensate and pond water (washing-circuit fluid) in storage tank. Collects slurry and alumina solution samples for laboratory analysis.

8113-190 MAGNETIC-SEPARATOR TENDER(iron & steel) DPT:685

GED: 2 SVP: 4 EC: I 4 PA: M 2 4

Tends magnetic separators and auxiliary equipment to recover iron concentrate from slurry:

Starts feed and discharge pumps, magnetic separators and water sprays. Patrols areas and observes operation to detect malfunctions. Cleans plugged water sprays, screens, and feed boxes, using air or water hose. Adjusts valves to control water spray on magnets. Replaces worn filters, using hand tools. Cleans work area, using broom and shovel.

8113-194 SPIRAL ATTENDANT(mining & quarrying) DPT:685

GED: 2 SVP: 4 EC: I 4 5 PA: M 2 4

Tends battery of spirals (mechanical devices) that separate slate or minerals from lighter waste rock by centrifugal force:

Starts equipment and opens feed lines to admit materials through head tanks and collection boxes into spirals. Patrols area to detect equipment malfunctions and operating irregularities. Examines samples and regulates spirals to prevent loss of fine concentrate. Observes flow of water and slurry to spiral, launders and head tanks, and adjusts flows to maintain required operating condition. Removes foreign objects from equipment, changes screen sections, and cleans blockages from feed line distributors, spirals and collection boxes, using pick, wrenches and bar.

8113-198 AMALGAMATOR TENDER(non-ferrous metal) DPT:685

GED: 2 SVP: 3 EC: I 5 6 PA: M 4

Tends equipment that separates finely ground gold and silver particles from gangue, using mercury amalgamation process:

Turns valves or opens gates to charge ore concentrate and mercury into rotating-type barrels. Starts equipment and observes accumulation of amalgam. Discharges or drains barrel to recover gold and silver amalgam. Collects corduroy blankets from frames at various outflow points of refining mill, such as filter presses, jigs or traps. Washes blankets in pans of weak cyanide solution to dislodge gold and silver particles. Replaces blankets on frames after washing.

May turn valves or open gates to regulate flow of ore and water over mercury-coated plates, adjust angle of plates to facilitate collection of amalgam, scrape accumulated amalgam from plates, and coat plates with mercury.

8113-202 BRINE MAKER(mining & quarrying) DPT:685
GED: 2 SVP: 3 EC: I 6 PA: M 2 4 7

Tends equipment, such as dissolvers and settling tanks to make brine from rock salt and fresh water, for processing into salt:

Starts feed conveyor that moves rock salt to dissolvers. Opens valves to start water flow and chemical solutions to dissolvers, and flow of affluent to settling tanks. Monitors console gauges and recorders to detect equipment malfunction. Tests density of brine, using hydrometer, and forwards samples to laboratory for analysis. Cleans residue from settling tanks periodically, using water hose. Weighs out chemical additives, such as lime and soda ash, and pours them into storage tanks. Replaces recording charts and refills inkwells on console.

8113-204 COAL SEPARATOR(mining & quarrying) DPT:685
jigman.

GED: 2 SVP: 3 EC: I 5 7 PA: L 4

Tends battery of jigs (specific gravity devices) used to separate slate from coal:

Starts and stops conveyor to regulate flow of coal into jigs. Turns valves to control pulsating flow of water through screens in bottom of jigs or regulates speed of reciprocation of screens or plunger to separate slate from coal. Lubricates jigs using oil can and grease gun.

8113-205 CONE TENDER(mining & quarrying) DPT:685
GED: 2 SVP: 3 EC: I 5 7 PA: L 2 4 7

Tends cone (free-settling classifier of conical shape) that separates slate and rock from coal:

Presses buttons to start conveyor and regulate flow of material into cone. Turns valves to regulate flow of water into bottom of cone and maintain specified pressure to carry coal off with overflow while rock and slate fall to bottom. Lubricates equipment, using oil can and grease gun.

May pull lever to open slate gate and draw impurities from semiautomatic cone.

8113-206 ELECTROLYTIC-REFINER HELPER(non-ferrous metal) DPT:685

refinery-operator helper.

GED: 2 SVP: 3 EC: I 4 7 PA: M 2 4

Assists in preparing electrolytic refining tanks by performing any combination of following duties:

Cuts, strips and trims copper sheets from starting blanks, using knife, pincers, and power shear. Places sheets in machine to clean and coat them with oil solution. Cinches or rivets loop strips to sheets, using looping machine. Straightens starter sheet blanks, using paddle, sledge hammer or sheet-rolling machine. Removes, washes, and replaces copper bar (bus bars) in baths of water, acid, steam and oil. Lifts and hangs starter sheets on bus bars in tanks. Guides crane crew in positioning or removing anodes and coated starting plates. Drains, cleans, scrapes and flushes tanks, using scraping tools and water hose. See also definition for term title, 02-160 HELPER (any ind.).

May tend gas-fired burners to keep molten lead, used as starting sheets, from cooling, prior to casting. May be designated according to specific function performed; for example,

Sheet Hanger
Starting-Sheet Heater
Stripper

8113-210 SCREENMAN(mining & quarrying) DPT:685
GED: 2 SVP: 3 EC: I 5 6 7 PA: H 3 4

Tends vibrating or reciprocating screen that sizes crushed material, such as ore, coal and rock for industrial use or for further processing:

Activates controls to open and close hydraulic or pneumatic gates which regulate flow of material onto screen. Picks out refuse and impurities, such as gangue, wood and scrap metal. Unclogs conveyors and screens, using tools, such as shovel, bar and hammer. Shovels spillage onto conveyor or screen. Replaces worn or damaged screens, using hand tools.

8113-214 SLIME TREATER(non-ferrous metal) DPT:685
GED: 2 SVP: 3 EC: I 6 7 PA: M 4 7

Tends equipment, such as agitators and mixers to treat mineral-bearing slimes with acid, preparatory to precipitating or leaching minerals:

Pumps slime from storage into agitation tanks, by turning valves, or weighs and dumps specified quantity of slime into mixer, using pails and scale. Turns valves to regulate flow of sulphuric acid into agitator or mixer. Lights burner to heat mix, and starts machine. Tests samples of solution for alkalinity or acidity. Combines samples of solution from various stages of process for laboratory analysis. Pumps treated slime into storage tanks, by turning valves or dumps mixture on screen over drum to remove oversize pieces, manually.

May tag and place drums on pallet. May dry, grind or screen combined samples. May remove excess moisture from slime before treating, using drying tray. May be designated according to process or mineral treated; for example,
Copper-Ore-Slime Treater
Indium-Sulphation Man

8113-218 WET-PLANT TENDER(non-ferrous metal) DPT:685
GED: 2 SVP: 3 EC: I 5 PA: L 4 7

Tends equipment that recovers non-ferrous metals, such as zinc, cadmium or lead from dust collected in precipitators:

Dumps dust into tank from which it is processed through a series of sulphating tanks to precipitate and wash lead sulphate, zinc oxide or cadmium from dust. Pumps wash-liquor to separate tank for treatment prior to recovery of zinc oxide, or pumps batch to filters. Titrates samples or tests solution for acidity and specific gravity, using pH meter and hydrometer.

May distill cadmium in retort furnace. May prepare lime solution and mix it with zinc-oxide liquor.

8113-222 ZINC-VAPOR CONDENSER(non-ferrous metal)
DPT:687

condenser setter.

GED: 2 SVP: 3 EC: I 5 6 7 PA: M 4

Places condenser on plate supports in front of zinc furnace retort to collect and condense zinc vapor created by heating ore:

Charges retort with mixture of ore and coal, using skip-loader, or piles zinc bars in furnace and opens gas valve. Lifts and positions condenser in front of retort, using tongs. Seals joint between retort and condenser by spreading finely ground and dampened mixture of coal, clay, and loom to prevent escape of zinc vapor. Banks mouth of condenser with mixture of coal and ore or waste material to prevent zinc from overflowing but allowing combustion gases to escape.

8113-226 ASBESTOS SCREENMAN(mining & quarrying)
DPT:685

GED: 2 SVP: 2 EC: O 5 7 PA: L 4

Tends mechanically vibrated screens that separate sand and rock from asbestos fibre:

Presses buttons to start screen vibrating and control speed of conveyor and flow of ore falling on vibrating screen. Inspects screens to ensure adequate separation of fibre from sand and rock. Shovels fallen ore back on conveyor. Clears equipment blockages, using bar.

8113-230 BAGHOUSE MAN(non-ferrous metal) DPT:685
GED: 2 SVP: 2 EC: B 5 7 PA: M 4

Tends baghouse containing floor-to-ceiling length filter bags, and related fans and conveying equipment used to recover dust, and fibres, such as asbestos, or other solids from gases or crushed ore:

Cleans embedded dust from bags, using air hose and vacuum equipment, or shakes collected fibres down chute for further processing. Removes and replaces torn bags, using stepladder and hand tools. Replaces bag shakers, air vents, exhaust systems and collapsing dampers. Clears accumulated dust and solids from flues, hoppers and conveyors. Inspects fans and gas-cooling water sprays for faulty operation. Changes air flow and temperature recording charts. Collects and tags samples of recovered materials for analysis, using cups and sample bags.

May test baghouse for carbon-monoxide or other harmful gases before entering room.

8113-234 PRECIPITATOR HELPER(non-ferrous metal)
DPT:686

GED: 2 SVP: 2 EC: I 4 7 PA: M 2 4

Helps in tending equipment that precipitates minerals; such as, nickel, copper, gold, aluminum or uranium from slurry:

Opens valves and starts pumps to fill precipitators according to schedule. Pumps specified feed charges to tanks using levelmeter to determine amount added. Drops metal weights into empty tanks to break scale and crust formations or turns valves to circulate caustic solution in tanks to break up scale forming on walls. Lubricates and performs routine maintenance on equipment as directed. Clears blockages in feed lines, using compressed air and hand tools. See also definition for term title, 02-160 HELPER (any ind.)

8113-238 REAGENT-TENDER HELPER(non-ferrous metal)
DPT:686

GED: 2 SVP: 2 EC: B 5 6 7 PA: M 2 3 4

Helps in separating and recovering metallic particles from gangue of ore:

Connects hoses to unload tank car, using hand tools. Turns valves to release air pressure into lines and observes connections for leaks. Turns valves to pump chemical solutions; such as, chlorine, caustic soda, fuel oils, lime, copper and zinc sulphates, and cyanide from tank cars into storage tanks. See also definition for term title, 02-160 HELPER (any ind.).

May clean containers, using water or steam hose. May weigh steel rods and balls, and transport them to mill using fork-lift truck.

8113-242 ALUMINA-CLARIFIER-TENDER HELPER(non-ferrous metal)
DPT:587

GED: 2 SVP: 2 EC: I 7 PA: M 2 4

Helps in separating mud from alumina liquor and in recovering soda from mud:

Turns valves to flush thickened mud from washer lines. Turns valves to divert flow of alumina liquor from washer to standby equipment to maintain sludge balance in washer. Reads gauges and records sludge levels of mud settling and washing tanks. Takes and weighs sample of mud sediment to determine density. Lubricates valves and adjusts packing glands to prevent leaks, using grease gun and hand tools. Cleans screen boxes. See also definition for term title, 02-160 HELPER (any ind.).

8113-244 COTTRELL-TENDER HELPER(non-ferrous metal)
DPT:687

dust operator helper; treaterman, cottrell.

GED: 2 SVP: 2 EC: I 6 7 PA: H 2 3 4

Helps to operate battery of electrical separators used in collecting metallic-dust particles from fumes of smelting ores, performing any combination of the following duties:

Pushes switches to shut off electric current to precipitators and observes amount of dust accumulated on electrode, pipes and plates. Pulls levers to start automatic hammers or uses bar and sledge hammer to knock dust from electrodes into collecting chambers. Opens chamber doors and blows dust remaining in chamber, using air hose. Replaces broken wires and insulator bushings in precipitators, using hand tools. Turns valves to add acid solution and water to chambers to cool and treat fumes. Samples and tests recovered dust for moisture content. Changes water spray charts. Cleans treater compartments and equipment using air and water hoses.

May be designated according to specific task performed, or metal fumes treated; for example,

Acid-Conditioning Man
Blower Man
Lead Dust Treater
Thallium Recoverer

8113-246 FLOTATION-CELL-TENDER HELPER(non-ferrous metal)
DPT:687

GED: 2 SVP: 2 EC: I 4 7 PA: M 3 4

Helps to tend flotation cells that separate minerals from gangue:

Scrapes caked waste material from sides of flotation cells, and washes cells with water. Turns valves to regulate flow of pulp and reagents into cells. Turns valves to introduce compressed air into cells to agitate mixture and promote froth. See also definition for term title, 02-160 HELPER (any ind.).

May ream out air passages of agitators, using steel rod. May collect samples of pulp and concentrate for laboratory analysis. May assist in dismantling and repairing equipment. May lubricate machine.

8113-250 SLIME-RECOVERY-OPERATOR HELPER(non-ferrous metal)
DPT:687

slime-plant-operator helper.

GED: 2 SVP: 2 EC: I 7 PA: L 2 3 4

Helps to recover gold, silver, selenium, and other mineral concentrates from impurities:

Turns valves to regulate flow of liquids into tank. Observes operation of filters, grinders, pressers, and evaporators to detect malfunctions.

Replaces worn filters, using hand tools. Lubricates valves and adjusts packing glands. See also definition for term title, 02-160 HELPER (any ind.).

May record operating data in log. May operate overhead crane to transport filters and equipment. May be designated according to mineral concentrate recovered; for example, Selenium-Recovery Helper

8113-299 OTHER MIXING, SEPARATING AND FILTERING OCCUPATIONS, MINERAL ORES

This group includes occupations, not elsewhere classified; for example, those who remove blankets from outflow points of mill and wash them in cyanide solution to dislodge and recover gold particles; operate air-powered dumping machine to charge kettle with spent lead or copper cathodes used in electrorefining process; tend battery of revolving drums and associated equipment to form green pellets of iron concentrate; strip starting sheets from cathodes; and control continuous-process equipment to remove impurities from zinc solution to produce pure electrolyte used for the electrolytic extraction of metallic zinc.

Typical examples of occupational titles covered by this residual group definition are:

Blanket Washer(non-ferrous metal)
Kettleman(non-ferrous metal)
Pelletizer(iron & steel)
Starting-Sheet Stripper(non-ferrous metal)
Zinc Purifier(non-ferrous metal)

8115-MELTING AND ROASTING OCCUPATIONS, MINERAL ORES

This unit group includes occupations primarily concerned with operating and tending furnaces and kilns that heat mineral ores or concentrates to change them from a solid to liquid state for compounding with other materials, or that roast ores and concentrates to eliminate impurities or to change their state.

8115-110 ROASTER OPERATOR(non-ferrous metal) DPT:462 GED: 3 SVP: 6 EC: I 3 6 7 PA: M 2 4 7

Operates roaster furnace to remove moisture, arsenic, or sulphur from ore in preparation for further processing:
Charges top hearth of roaster with ore, regulating rate of charge by means of chute door, pump, or automatic feed mechanism. Determines speed at which roaster is being charged by weighing sample of material obtained over measured interval of time. Starts automatic rakes that scrape hearth beds continually and move ore from one hearth to next lower one. Regulates draught and temperature of roaster by adjusting dampers and gas pressure or automatic temperature controller. Directs workers in removing incrustations from hearth beds. Removes and tests samples of material from furnace periodically, following standard procedures or sends sample to laboratory. Inspects and cleans equipment and replaces defective parts. May clean arms of rakes with scrapers and iron bars. May operate dust-collector system from panelboard. May be designated according to roaster operated or ore processed; for example, Dross-Furnace Operator
Molybdenum-Roaster Operator

8115-114 LIMESTONE BURNER(non-metal. min. prod., n.e.c.) DPT:662 lime-kiln operator. GED: 3 SVP: 5 EC: I 3 5 7 PA: M 4 5 6 7

Operates equipment that converts limestone into lime and carbon dioxide:
Charges kiln with limestone and coke, using hoist, or pushes controls on panelboard to convey materials to kilns. Turns controls to start fuel and air flow, and rotation of kiln. Regulates draught and vent mechanisms. Adjusts automatic scale that controls amount of limestone flowing into kiln, or weighs specified amount, using scale. Scoops samples of hot limestone from kiln for chemical analysis, using shovel, or draws burnt lime from bottom of kiln, using poke rod. Observes material flow, air, temperature, fuel charts and manometer

gauges, and makes adjustments to maintain kiln conditions within specified limits. Maintains production records.

May be designated according to type of kiln operated; for example, Rotary-Kiln Operator
Vertical-Kiln Operator

8115-118 SINTERING-MACHINE OPERATOR(iron & steel; non-ferrous metal) DPT:662 GED: 3 SVP: 5 EC: I 3 5 6 7 PA: L 4 7

Operates sintering-machine and auxiliary equipment, such as conveyors, pug mill, suction fan and mixing table to produce sinter cake from finely ground iron ore, coke, and flue dust, or non-ferrous metals, slag and other residues:

Turns gas valve of sintering-machine and ignites burner with torch or electric spark. Moves controls on panelboard to start equipment. Signals sintering crew to feed pug mill conveyor with specified amount of sinter material. Feels mixture processed by pug mill to determine moisture content. Adjusts controls to regulate water supply to attain specified moisture in mixture. Examines cake produced in sintering-machine and moves controls to distribute feed evenly across bed of machine and produce cake to specifications. Activates fans to draw and send sulphur gas to cleaning and precipitating treaters to recover metal-bearing dust. Changes grate and key bars of sintering-machine to permit even flow of material, using hand tools. Chips sinter material from chutes and spouts of machine, using bar and hammer. Prepares daily operating report.

8115-122 CALCINER(non-metal. min. prod., n.e.c.) DPT:682 GED: 3 SVP: 5 EC: I 3 5 7 PA: M 2 4 7

Controls grinding mills, kettles and conveyors to grind, dehydrate and transfer gypsum or other mineral to storage bins or pulverizing machine:

Opens storage bin gates to admit mineral into grinding mill, and starts mill. Feels ground mineral for consistency and adjusts mill to obtain specified grinding. Opens chute to allow ground mineral to flow into kettle. Lights fire under kettle. Reads temperature gauge and sets automatic controls to regulate fuel feed valve and maintain specified temperature inside kettle. Collects sample of calcined mineral for laboratory analysis. Opens chute after specified time and turns air valve to force calcined minerals into hot-pits for cooling. Starts bucket elevators and conveyors to move product from pits to storage bins or to ball mill for pulverizing.

May operate rotary dryer to dry mineral before calcination. May be designated according to type of mineral processed; for example, Calciner, Gypsum

8115-126 KILN OPERATOR(non-ferrous metal) DPT:662 GED: 3 SVP: 4 EC: I 3 7 PA: M 4 5 6 7

Operates rotary kiln to calcine alumina hydrate or sinter non-ferrous metal:

Activates buttons, knobs, levers and switches to start kiln. Regulates speed, pressure, temperature, rate of oil flow, gas, air, flue gases and steam vapors to prevent overheating. Directs helpers to regulate flow of hydrated alumina or non-ferrous metal into kiln. Adjusts water supply to cooler coils, kiln trunnions and water-cooled bearings, by turning valves. Inspects kiln, carriages and drive mechanisms for malfunctioning or overheating. Maintains water and air flow through system and observes purifier that removes solids from exhaust gases. Cleans purifier, impingers and overflow tanks, using hand tools. Removes accretions from discharge end of kiln, and removes crust from interior, using pick, shovel and rod. Removes samples of calcine from bucket elevator for analysis, using spoon.

May tend bucket elevator that conveys alumina to storage bins. May direct or assist helpers in changing oil torch nozzles, lubricating valves, adjusting packing glands and cleaning pipes. May keep log of operational data.

8115-130 ORE ROASTER(non-ferrous metal) kilnman. DPT:682 GED: 3 SVP: 4 EC: I 3 5 PA: L 4 7

Operates roaster in which cinnabar (mercuric sulphide ore) is volatilized to obtain free mercury:

Ignites gas burner and turns fuel and air pressure valves to heat roaster to specified temperature. Sets controls to regulate conveyor speed and rotation of roaster. Observes temperature gauges on

condenser unit and flow of ore into roaster. Turns controls to maintain temperature and amount of ore in roaster. Lubricates and repairs roaster and equipment.

8115-134 ROTARY-KILN TENDER(iron & steel) DPT:665
GED: 2 SVP: 3 EC: 1 3 5 7 PA: M 4

Tends battery of rotary kilns that mix, heat and dry minerals; such as, lime, chrome ore and manganese to expel moisture preparatory to adding them to molten metal to form steel alloy. Signals crane operator to deliver specified type and amount of material to kiln feedbox. Pushes switches to start kiln rotating and conveyors feeding materials from feedbox to kiln. Ignites burners under kiln and moves controls to attain specified temperature. Pulls lever to dump heated material into steel box on platform scale. Weighs and records weight, type, and amount of material heated.

8115-138 LIMESTONE-BURNER HELPER(non-metal. min. prod., n.e.c.) DPT:686
lime-kiln-operator helper.
GED: 2 SVP: 2 EC: 1 3 5 6 7 PA: M 3 4

Helps to operate kiln used in converting limestone into lime and carbon dioxide. Opens and closes gates on kiln to adjust draft, and to permit flow of lime from kiln onto conveyor to slaker. Removes lumps blocking discharge end of kiln, using metal poker. Pushes buttons that activate lime slaker to hydrate hot lime. See also definition for term title, 02-160 HELPER (any ind.). May transport product to loading area of crusher, using front-end loader.

8116-INSPECTING, TESTING, GRADING AND SAMPLING OCCUPATIONS, MINERAL ORE TREATING

This unit group includes occupations in inspecting, testing, grading and sampling work, as described under the term titles, 02- 170 INSPECTOR (any ind.); 02-430 TESTER (any ind.); 02-150 GRADER (any ind.); and 02-330 SAMPLER (any ind.); concerned with performing routine evaluation tests and other quality control activities in mineral ore treating.

8116-110 RADIOMETRIC-COUNTER OPERATOR(mining & quarrying; non-ferrous metal) DPT:484
uranium-ore evaluator.
GED: 3 SVP: 5 EC: 1 PA: L 4 7

Operates radiometric counter to evaluate quantity of uranium in ore. Fills container with uranium ore, and ascertains weight of contents, using balance scale. Places container under radioactivity sensor that detects beta and gamma ray emissions from uranium ore. Turns switches and dials to set timer and start detector counter. Observes counter indicating lights to determine intensity of beta and gamma ray emissions, and records readings. Calculates quantity of uranium in ore by comparing reading with standard chart.

8116-114 ORE-SAMPLE TESTER(mining & quarrying) DPT:384
GED: 3 SVP: 4 EC: 1 5 PA: L 4 7

Crushes, grinds and separates mineral ore samples, and performs routine evaluation tests. Collects sample of ore from designated areas, using sampling spoons, pick and cans or bags. Starts crusher to pulverize ore. Removes ore from crusher, and places it in oven to dry. Weighs samples before and after drying, using balances, to determine moisture content. Sends portion of sample to laboratory for chemical analysis. Places sample in vibrator containing magnets and water. Starts vibrator to separate magnetic content of metallic ore from impurities. Drains water from vibrator and weighs magnetic remainder. Pours ore sample through series of vibrating screens of different size openings to separate ore samples. Weighs each size of ore, and records weights or percentages of each type. Records number and results of tests performed.

8116-116 MINERAL SAMPLER(mining & quarrying; non-metal. min. prod., n.e.c.) DPT:487
ore sampler.
GED: 3 SVP: 4 EC: B 5 6 7 PA: L 4 7

Collects, blends and grades mineral samples for laboratory analysis. Collects samples, such as coal, coke, sand, metal-bearing ores and concentrates from locations, such as railway cars, conveyors or various plant or mine locations at specified intervals. Dumps material into bottle or bag or into machines that grind or blend samples. Feeds material onto vibrating screens to segregate samples by particle size or remove oversized particles. Weighs segregated materials separately, using small scale, and computes proportion of each in total sample. Performs magnetic separation tests, calculating and recording proportion of magnetic material. Weighs and dries samples in oven, reweighs materials and computes moisture content. May record place of origin of samples and total weekly sample production. May label samples to indicate data such as type, origin, grit size, moisture and magnetic content and deliver to laboratory.

8116-118 IRON-PELLET-HARDNESS TESTER(iron & steel) DPT:385
sample tester.
GED: 3 SVP: 4 EC: I 5 PA: L 4

Tends tumbling drums, screens and balance scales to test hardness of baked iron-concentrate pellets. Reads schedule to obtain specifications, such as furnace from which pellets are to be drawn and time of withdrawal, and notifies sampling personnel to prepare sample pellets. Pours sample over screen and weighs screened pellets on balance scale. Dumps pellets into drum and starts drum to rotate specified number of turns. Screens tumbled pellets and weighs them to determine weight loss from tumbling. Reads conversion chart to obtain hardness number. Records hardness number of samples tested. Cleans work area. May test pellet-process materials, such as slurry, filter cake, bonding agents and system discharge, for compression and moisture, using riffles, screens, filters, dryers and scales.

8116-122 ELECTROLYTIC-CELL CONTROL MAN(non-ferrous metal) DPT:484
anode adjuster; cell-efficiency man; cell tester.
GED: 3 SVP: 4 EC: I 3 6 7 PA: M 4 7

Inspects, tests and adjusts anodes, cathodes and electric circuits of cells used in electro-refining of non-ferrous metals. Attaches voltmeter wires to cell and millivoltmeter wires to anode or cathode and observes readings to determine required adjustments. Loosens anode locknut and positions nut, using wrenches or adjustable key to lower anode until specified voltage reading is attained. Records cell voltage readings before and after adjustments and number of anodes adjusted. Measures height and temperature of anodes, bath level and anode immersion, to locate defects. Gauges angle of studs imbedded in anode to ascertain correct stud planting, using measuring device. Measures cathode busbar temperature to locate hot connection or pointing, using pyrometer. Obtains bath samples and screens solution to verify alumina distribution. May repair defective cells or notify maintenance personnel of repairs needed. May clean cells and clear clogged feed lines, using scrapers, brushes and rod. May seal cell leaks, using putty.

8116-126 COKE INSPECTOR(non-ferrous metal) DPT:667
GED: 3 SVP: 4 EC: I 3 6 7 PA: L 3 4 7

Inspects hot coke pushed from ovens and quenched coke passing on conveyor for colour, texture, quality and size. Notifies supervisor to adjust crusher for size of coke specified. Picks irregular sized, hot and poorly carbonized coke from belt and tosses pieces into hopper. Places samples in containers for laboratory testing. Records car number, carrier, tonnage and grade of coke of each shipment. Observes conveyor belts for breaks and pulled-out lacings, and notifies maintenance department.

8116-130 MICA CLASSIFIER(non-metal. min. prod., n.e.c.)
DPT:684
inspector, mica; mica gauger.
GED: 2 SVP: 3 EC: I 7 PA: L 4 7

Grades mica sheets and strips on illuminated table according to physical characteristics, such as colour, thickness and defects:

Places sheets or strips on glass-top table and presses button to illuminate mica from underneath. Scans mica for colour and defects such as scratches, spots, stains, holes and thin or rough spots. Measures thickness of mica sheets and built-up parts to verify conformance to standards, using micrometer. Classifies sheets or strips into grade according to colour and type and number of defects, and places them into containers or stacks on handtruck. Rejects mica that fails to meet standards.

May shave sheets and built-up parts to specified thickness, using knife or shaving device. May repair thin spots with mica splittings, sprinkling glue and pressing splittings in place. May place sheets or articles on bed of magnifying viewer, using tweezers or pneumatic lifting device to examine them for conformity to specifications.

8118-OCCUPATIONS IN LABOURING AND OTHER ELEMENTAL WORK, MINERAL ORE TREATING

This unit group includes occupations in labouring or elemental work, as described under the term title, 02-190 LABOURER/ELEMENTAL WORKER (any ind.), which are concerned with preparing crude mineral ores for direct use or further processing.

8118-110 TAILINGS LABOURER(iron & steel; non-ferrous metal)
DPT:687
tailings-dam labourer.
GED: 1 SVP: 2 EC: B 4 PA: H 3 4

Pumps tailings (waste ore materials) through pipelines into waste basin or underground reservoir:

Opens and closes valves to regulate flow of tailings from mill or smelter to waste basin for disposal or to underground reservoir for use as back fill. Connects hoses to spigots and adds or removes pipes to lengthen or shorten discharge lines, using hand tools. Examines and replaces damaged pipes or couplings, using wrenches and pipe tongs. Digs ditches to drain water from waste basin or reservoir, using pick and shovel. Lubricates pumps, using grease gun.

8118-114 LABOURER, ORE PROCESSING(iron & steel; non-ferrous metal)
DPT:687
floorman.
GED: 1 SVP: 1 EC: B 5 6 7 PA: H 2 3 4

Performs any combination of the following duties as directed by workers engaged in crushing, sampling, refining, loading, and moving ore and other materials:

Loads and unloads material onto or from freight cars or trucks, manually or using hoist, conveyor, vacuum line, or hand truck. Opens gates on railway hopper cars to discharge materials into bins. Fills sacks or barrels with materials, such as arsenic, nickel, and selenium. Breaks slag, using sledge hammer. Weighs material, such as ore and scrap. Shovels scrap into trucks and storage bins or sorts and stacks scrap. Segregates and stacks castings, using tongs or hoist, and marks or stamps identifying data on castings. Cleans filter press canvas screens used in filtering mineral concentrate. Flushes mud and sludge from cooling and circulating tanks, using water hose and scrapers. Cleans out drains and culverts, using bar, shovel, and wheelbarrow. Removes slag from slag pots and ladles, using hammer and broom. Hooks and unhooks charge boxes and scrap trucks, to and from overhead crane. Cleans work area, and delivers samples to laboratory for analysis.

May be designated according to work area; for example, Smelter Labourer

8118-118 SALT-SCREENING LABOURER(mining & quarrying)
DPT:687
footman.
GED: 1 SVP: 1 EC: I 5 PA: M 4

Regulates flow of salt to grading screens:

Moves levers to adjust chute gate and regulate flow of salt from crusher to vibrating screens that separate salt into various sizes preparatory to shipment or refining. Cleans clogged screens with rod, and shovels spills around chutes and screens.

8118-199 MISCELLANEOUS OCCUPATIONS IN LABOURING AND OTHER ELEMENTAL WORK, MINERAL ORE TREATING

This group includes mineral ore treating labourers and other elemental workers, not elsewhere classified; for example, those who remove primary impurities from materials floating on vibrating table, using dressing paddle; adjust specific gravity of iron solution by feeding ferro-silicon mixture to separate iron particles from waste; seal openings around refining anodes to prevent leakage of gas; prepare and clean containers to transport or ship partly refined matte; break and remove solidified slag from runners, troughs, tracks and cars; and oil and lubricate smelting or refining machinery. Typical examples of occupational titles covered by this residual group definition are:

Drossman(iron & steel; non-ferrous metal)

Heavy-Media Helper(iron & steel)

Supply Labourer(iron & steel; non-ferrous metal)

8119-MINERAL ORE TREATING OCCUPATIONS, N.E.C.

This unit group includes occupations, not elsewhere classified, concerned with treating mineral ores. Activities include: operating reduction cells to smelt aluminum oxide into alumina or aluminum; operating filters, dryers and briquetting equipment to form ores into briquettes; operating and tending equipment to recover ore particles or process materials; mixing and forming of catalysts to facilitate treating operations; splitting, laminating and crushing mica; treating salt with additives, such as potassium iodide or other fortifiers; pressing and regrinding salt to obtain various sizes of salt granules; compressing loose salt into blocks; and shredding, grinding and dehydrating peat moss.

Aluminum Ore Treating Occupations 8119-110 through 8119-154

8119-110 ALUMINUM-OXIDE CONTROL MAN(non-ferrous metal)
DPT:382
GED: 3 SVP: 5 EC: I 3 6 7 PA: L 4 7

Controls temperature, chemical composition and level of cryolite baths in reduction pots to smelt aluminum oxide into aluminum:

Breaks off sample piece of crust formed on bath surface and grinds it into powder, using roll crusher. Routes sample to laboratory for analysis. Dips out sample of solution and pours it into containers, using ladle. Drops chemicals into sample and notes resultant colour. Adds required amount of chemicals and alloys to bath, according to colour shade of sample to maintain solution at specified level and composition. Measures current flow and voltage between electrical connections on pots, using meters, and computes voltage drop between connections. Measures temperature of bath, heat exchangers, and heat control pipes, using pyrometer, and turns thermostat to regulate temperature. Verifies specified distance between electrodes to prevent pointing, using measuring rod. Measures depth of bath and computes amount of aluminum available for tapping. Records tests made, amount of chemicals and alloys added to bath and amount of aluminum tapped from pots.

8119-114 ALUMINUM-BRIQUETTING-EQUIPMENT

OPERATOR(non-ferrous metal) DPT:582

GED: 3 SVP: 5 EC: 1 5 7 PA: M 4 7

Operates filters, dryers, briquetting press, electric furnace and associated equipment, such as pumps and conveyors, to produce alumina-hydrate briquettes:

Turns valves to control feed of hydrate on filters. Adjusts vacuum and air-pressure valves to regulate filtering action and control release of cake from filter surface. Turns valves to control feed of cake to dryer, observes operation and adjusts thermostat to dry cake to specified moisture content. Pumps dried hydrate to kneading mixer, turns valve to heat caustic in conditioning tank and adjusts controls to regulate flow of caustic to mixer. Starts briquetting machine and conveyor systems and observes operation to detect equipment malfunctions. Starts furnace and conveyor that carries briquettes through furnace. Observes gauge and adjusts control to maintain temperature within prescribed limits and ensure proper hardening of briquettes. Starts conveyor system to transfer finished product from storage bin to railway cars. Changes defective canvas on filters, using hand tools. Maintains production records.

8119-118 ALUMINA-RECOVERY-EQUIPMENT

OPERATOR(non-ferrous metal) DPT:682

GED: 3 SVP: 5 EC: 1 3 6 7 PA: L 2 4 5 6

Operates rotary kiln, ball mill, and conveying equipment to recover soluble soda and alumina from waste materials:

Moves lever and switch controls to start and regulate rotation speed of kiln. Moves controls to maintain specified temperatures and feed rate to kiln. Collects samples of slurry clinker from kiln and observes discharge of slurry at sample points to ensure proper burning. Moves controls of cooling air fan, cooler exhaust fan and air dampers to adjust temperature of grate cooler and air flows to burners. Moves controls and adjusts feed valves to start conveyor and bucket-elevator system, and to transport calcined clinker, bauxite and soda ash into ball mill. Regulates valves and pumps to transfer slurry from ball mill into digestion tanks and to supply water to kiln trunnions and water-cooled bearings. Replaces charts in automatic recording devices. Keeps operating log.

May direct activities of other workers engaged in tending kilns.

8119-122 CRYOLITE-RECOVERY-EQUIPMENT

OPERATOR(non-ferrous metal) DPT:682

GED: 3 SVP: 5 EC: 1 4 5 6 7 PA: M 4

Operates machines to recover aluminum and cryolite from waste and scrap pot-lining:

Sets mill gauges to specified grind and feed rate and adjusts air volume to obtain proper slurry-leaching density. Sets hearth thermostat to specified temperature, and turns valves to adjust rate of flow of steam and oil to burners. Sets timer and scale beams for precalculated mix of calcine and aluminum fluoride. Starts conveyors, grinders, roaster, mixing equipment, cooling and exhaust fans, and burners by pressing buttons and turning valves. Moves levers to regulate flow of materials and adjusts valve to control volume of dissolvent. Measures density of slurry to obtain maximum recovery, using scale and solids determination chart. Dumps bags of flour into ball mill to eliminate foaming. Carries out titration test, to determine amount of metals left in waste, records results and sends samples to laboratory for further testing. Observes recording instruments to ensure conformity of recuperation process to specifications. Unblocks outlets and feeder chute, using electric vibrator, sledge hammer and air lance.

8119-124 ALUMINUM-CELL TENDER(non-ferrous metal)

DPT:685

potman.

GED: 3 SVP: 4 EC: 1 3 6 7 PA: L 4 7

Tends battery of reduction pots that smelt aluminum oxide into aluminum:

Sounds cell bottom to determine presence and amount of sludge and freeze, using steel bar. Breaks cell crust and adds specified amount of oxide to solution from overhead hoppers, using pneumatic crust breaking machine. Blows dust from surface of anode to receive added oxide, according to colour of solution, using air hose. Observes gas flames breaking through crust and rakes oxide over flames to prevent damage to anode. Stirs bath to eliminate gas. Observes instruments and adjusts controls to regulate temperature of solution. Adds paste to

pot and closes compartment doors to prevent gas escape and dust infiltration. Perforates holes in crust to install siphon and remove mud from pot bottom. Skims metal into crucible to remove oxidation, using ladle. Determines amount of metal to be siphoned and amount of bath to be added to solution. Siphons metal from cell into crucible, observing scale and adjusting voltage. Removes solidified bath from crust breaking machine, crucible and siphon, using bar and pneumatic hammer. Adjusts cell voltage after crust breaking and siphoning operations. Breaks off lumps formed at end of anode to prevent pointing, using bar and hammer. Repairs or changes packing on crucibles. Cleans pot room floor and equipment.

8119-126 ALUMINUM-CELL RECONDITIONER(non-ferrous metal)

DPT:664

pot liner; pot-shell repairman.

GED: 2 SVP: 4 EC: 1 3 5 6 7 PA: M 2 3 4

Relines and rebuilds pots used in reduction of aluminum, performing any combination of the following duties:

Replaces spacers, shunts, risers, brackets, straps, supports and collector bars in pots, using wrenches. Attaches cables to pot superstructure and signals crane operator to lift superstructure from pot. Straightens bent or damaged supports, using oxy-acetylene torch and hammer. Blows dust from top of anode, using air hose. Cuts metal sheet to size, using shears of pneumatic cutter, bends it around stub of anode, and rivets or welds it to casing to facilitate rebuilding of anode. Pours water into pot to loosen material. Digs and removes burned-out lining, insulation ore, brick and adhering aluminum from interior of pot, using picks and pneumatic hammer. Measures and cuts steel sheets, using measuring instruments and oxy-acetylene torch to patch pots. Bores holes in shell sides to position connecting bars. Cleans and buffs bus bar and stud connectors to obtain proper electrical contacts, using hand-sanding pad or pneumatic-disk sander. Lays brick base on pot floor and signals crane operator to dump carbon mix into pot. Lines walls and floor with mix to specified depth, and tamps mix into cracks, using pneumatic hammer. Re-forms shell cavity with insulating board, masonite, plywood or sheet metal. Removes steel shell for repair, using hoist. Bolts flexible rod units to bus bar, using wrench. Dampens floor to reduce dust formation, using water hose. Records serial number and number of pots repaired.

May roughen top of stub, using fork, and pour carbon paste into form to build up anode to specified height.

8119-130 CARTRIDGE-FLUX MAKER(non-ferrous metal)

DPT:684

GED: 3 SVP: 3 EC: 1 3 6 7 PA: H 3 4

Mixes flux, used in refining aluminum, according to specifications, fabricates flux cartridges and prepares cartridges for graphite-carbon tubes:

Starts mixer and dumps prescribed amounts of flux materials; such as potash, carbon, grease, water, salt and aluminum into mixer. Presses aluminum foil in forming dies, and cuts excess foil with knife to form cartridges. Starts machine that fills cartridges with flux. Cleans graphite-carbon tubes, preparatory to installing them in furnaces, with caustic solution and wire brush. Mixes silicon-aluminum paint, using paddle, and dips tubes in paint to provide protective coating. Shuts off furnace and installs tube, using wrench. Turns on chlorine system, observes gauge and regulates valves to nitrogen tank to obtain specified pressure.

May clean tools used to stir flux or skim molten metal in furnace.

8119-134 FLUX-MIXING-MACHINE TENDER(non-ferrous metal)

DPT:685

fluorspar-flux maker.

GED: 2 SVP: 4 EC: 1 5 PA: M 4

Mixes fluorspar with lime and water, and filters and dries mixture to compound flux used in refining non-ferrous metals:

Moves controls to activate crushed fluorspar from reserve tank into scale decanter. Dumps specified quantity of lime over fluorspar. Adjusts air pressure and water volume in mixture to required density to obtain a flux of appropriate moisture content. Pumps mixture into filters to reduce volume of liquid in solution. Turns valves and presses buttons to convey filtered cake through drier to ensure required moisture in concentrate. Changes segments of defective canvas in filters to restore proper filtration, using hand tools. Keeps operating log.

8119-138 SMELT-HOUSE-MIXER TENDER(non-ferrous metal) DPT:685
mixing-station attendant.
GED: 2 SVP: 4 EC: I 4 5 7 PA: L 4 7

Tends machine that mixes sintered-lead or -zinc ore with materials, such as pulverized coal and coke, salt, water, skimmings and chemical solutions, preparatory to smelting:

Starts rotary drum or paddle-type mixer. Squeezes handful of mixture into lump and crumbles it to determine consistency and moisture content. Turns valves to add water, fuel oil or chemical solution into mixture. Removes mixture from mixing drum and conveyors, using bar, shovel and broom.

May weigh ingredients to be dumped into mixer. May remove foreign materials, such as wood and metal scrap passing on conveyor. May be designated according to type of mixer tended; for example, Mixing-Pan Tender

8119-146 ALUMINA-RECOVERY-EQUIPMENT-OPERATOR HELPER (non-ferrous metal) DPT:685
GED: 2 SVP: 3 EC: I 5 6 7 PA: M 2 3 4 5 6

Helps in operating rotary kiln, ball mill and conveyor system to recover soluble soda and alumina from waste materials:

Moves controls to adjust feeds to rotary kiln and ball mill, and to regulate operation of dust-collecting equipment. Reads and records tank levels and slurry and soda ash temperature. Collects and weighs batches of slurry to determine density, using scale and conversion table. Measures oxygen content of flue gases to ensure proper burning and compliance with pollution control standards, using gas analyzer. Turns valves to apply water to kiln trunnions and water-cooled bearings. Lubricates valves and adjusts packing glands to prevent leaks. Cleans cooler gates, using hand tools. Keeps operating log. See also definition for term title, 02-160 HELPER (any ind.).

May take samples of slurry clinker for laboratory analysis. May move controls of cooling-air fan, cooler-exhaust fan and air dampers to adjust temperature of grate cooler and air flows to burners. May replace charts in automatic recording devices.

8119-150 ALUMINUM-SLURRY-PUMP TENDER(non-ferrous metal) DPT:685
GED: 2 SVP: 3 EC: I PA: M 2 4

Tends equipment that pumps aluminum slurry from secondary thickeners through wash tanks to storage tanks:

Turns valves to regulate amount of hydrate slurry or alumina flowing into thickeners and washing tanks to maintain specified density of hydrate. Adjusts valves and pumps to transfer fluid from secondary thickeners through wash tanks and into seed-storage tanks. Tests sample of hydrate to determine density, using hydrometer. Lubricates valves and adjusts packing glands to prevent leaks. Keeps operating log.

8119-154 POTLINING-MIXER TENDER(non-ferrous metal) DPT:685
GED: 2 SVP: 3 EC: I 5 7 PA: M 4

Tends mixer to blend ingredients used in relining aluminum- reduction pots with carbon paste to form cathode:

Tends feeders, conveyors and scales to charge transfer car with specified quantities of aggregates to form potlining mix. Dumps contents of transfer car into mixer by moving levers controlling dumping mechanism. Shovels materials and turns valves to add and mix binding and hardening substances, such as coal tar and hard pitch. Starts mixer and sets timer. Forwards sample of mix to laboratory for screen and density analysis. Clears rotary feeders and screw conveyors, using sledge hammer and shovel. Maintains supply of coal tar in storage tank by starting and stopping pumps. Cleans spills, using broom and shovel.

8119-174 MICA SPLITTER(non-metal. min. prod., n.e.c.) DPT:684

mica rifter.
GED: 3 SVP: 3 EC: I 6 7 PA: L 4

Peels splittings from rough blocks or defective sheets of mica for further processing:

Examines mica blocks or defective sheets to locate cleavage along which mica may be split to peel off or produce splittings of specified thickness. Inserts and twists knife or spatula into cleavage or between layers to separate splittings or layers from blocks or sheets. Gauges mica sheets with micrometer or fixed gauge to determine amount of mica to remove and to verify thickness of split sheets. Deposits salvage sheets into containers according to thickness, and rejects sheets that fail to meet specifications.

May measure length of sheets with rule and trim excess mica from sheets, using scissors or knife.

8119-178 MICA TRIMMER(non-metal. min. prod., n.e.c.) DPT:684

GED: 3 SVP: 3 EC: I 6 7 PA: L 4 7

Trims defective portions from laminated-mica sheets, using guillotine knife:

Positions edge of sheet or strip against guide and presses pedal that activates blade to cut off defective portion. Classifies sheets or strips according to colour of mica, size, type and number of stains or spots. Places graded mica into containers according to size. Discards scrap into refuse container.

8119-182 MICA-SHEET LAMINATOR(non-metal. min. prod., n.e.c.) DPT:684
GED: 2 SVP: 3 EC: I 7 PA: L 4

Builds sheets of mica by manually gluing splittings on mylar- or polyethylene-backing sheet:

Mounts roll of plastic on conveyor spindle and unrolls and secures end. Fills glue reservoir. Starts and stops conveyor and spreads glue on unrolling backing sheet, using brush. Places and presses mica splittings on glued area. Sets thermostats on series of drying ovens at specified temperatures. Presses button to start conveyor that carries laminated sheet through ovens. Stops conveyor, releases end of laminated sheet and laps end around take-up roll.

8119-186 MICA-LAMINATING-MACHINE TENDER(non-metal. min. prod., n.e.c.) DPT:685
mica-plate layer.
GED: 2 SVP: 3 EC: I 7 PA: L 4 7

Tends machine that forms mica plates from splittings:

Turns knobs on control panel to set temperatures on series of ovens, according to specifications. Dumps mica splittings into machine hopper and opens valve to fill supply tank with binding solution. Installs roll of plastic on pay-off mandrel, manually. Threads end of plastic sheet under mica-depositing cylinder and secures end on conveyor. Sets automatic controls of shearing-knife to cut sheets of required length, using hand tools. Presses control buttons on panel to start machine that automatically sprays binding solution on vacuum sheet, deposits layer of mica splittings over binding solution, moves lay-out through series of drying ovens and cuts built-up mica into plates of specified length. Examines mica plates at discharge end of machine for variations in thickness, undulations, cracks, splits and holes. Moves controls on hopper to regulate flow of splittings and speed of depositing drum according to thickness of mica plates required. Adjusts oven controls to regulate temperature.

8119-190 MICA-SHEET SALVAGER(non-metal. min. prod., n.e.c.) DPT:687
GED: 2 SVP: 3 EC: I 6 7 PA: L 4 7

Coats laminated sheets of mica with solution of binding agent, ground mica and silicon, and presses splittings in place to increase thickness of sheets or to fill in thin spots and cover holes:

Pours solution into trough and dips mica sheets into solution, or brushes coating solution on spots and presses splittings in place. Lays sheets on conveyor or hangs coated sheets on clips of conveyor that moves sheets through drying chamber of ovens. Removes dried sheets of mica from conveyor as they emerge from drying chamber. Trims

sheets to specified lengths and width, using paper-cutter or guillotine knife.

8119-194 MICA-PRESS TENDER(non-metal. min. prod., n.e.c.) **DPT:685**
GED: 2 SVP: 2 EC: 1 7 PA: L 4

Tends machine that compresses one or more mica sheets into single plate of specified thickness.
Slides and inserts specified number of mica sheets onto machine bed. Moves lever to close and seal door of press. Turns valve and presses buttons to circulate steam through machine to make sheets pliable, to activate ram that compresses and binds sheets together, and to circulate water through press to cool and harden plates. Removes and stacks compressed plates from machine, manually.

8119-198 MICA-PULVERIZER TENDER(non-metal. min. prod., n.e.c.) **DPT:685**
mica crusher.
GED: 2 SVP: 2 EC: 1 7 PA: M 3 4

Tends grinding mill to pulverize scrap mica for use as insulating agent: Fills mill hopper with scrap mica, using tractor equipped with scoop, or shovels mica into hopper. Lifts handle to open hopper gate to start flow of mica into mill and turns valve to admit specified amount of water. Starts mill to grind mica for specified length of time. Examines sample of mixture and adds water to mill to maintain slurry-like consistency. Opens gate on side of mill to empty mica slurry. Circulates water through mill, at end of grinding cycle, to flush grounded mica from mill, through intermediate tanks and into settling tank. Shovels oversize mica from bottom of intermediate tank back into mill for reprocessing.

Salt Treating Occupations
8119-218 through 8119-230

8119-218 SALT-FORTIFYING-EQUIPMENT OPERATOR(mining & quarrying) **DPT:482**
GED: 2 SVP: 3 EC: 1 PA: M 2 4 7

Operates equipment to mix specified amounts of additives with raw or refined salt to fortify, stabilize or colour salt products, such as table salt, salt tablets and salt blocks:
Reviews production schedules to ascertain type and quantity of additives required, such as calcium iodate, potassium iodide, red oxide, cobalt and ultra-marine blue colouring. Opens valves on hopper to start salt flow from bins into drum of mixer. Weighs prescribed amount of salt by observing level of salt in drum. Weighs specified amounts of additives, using scale, and dumps them into drum of mixer, or fills hoppers of in-line feeders and adjusts feed controls. Starts mixer and allows salt and additives to mix for specified time. Stops mixer and pulls lever to open bottom of mixer and discharge mixed product into packing bins. Makes minor repairs to equipment, using hand tools. Records amounts of additives used.
May tend briquetting and crushing machines to produce coarse grades of refined salt. May tend vibrating screens to separate salt crystals according to size. May be designated according to type of product treated; for example,
Mixer Operator, Raw Salt
Mixer Operator, Tablets

8119-222 COARSE-SALT-EQUIPMENT OPERATOR(mining & quarrying) **DPT:682**
GED: 2 SVP: 3 EC: 1 5 7 PA: M 4

Operates equipment, such as briquette press, roll crusher, vibrating screens and associated conveying systems to convert fine salt into coarse salt of specified grade:
Activates switches on control panel to start briquette press, roll crusher and conveyors. Patrols area to detect equipment malfunctions. Observes ammeter to detect overloading of screw conveyor feeding fine salt into compacting press. Feels briquettes emerging from press to ensure that briquettes are sufficiently hard to avoid crumbling during crushing process. Turns valve to spray water on briquettes to harden them. Examines vibrating screens for tears, and clears jams. Maintains operating log. Makes minor repairs to equipment, such as replacing damaged screens.

8119-226 SALT-COMPRESSOR TENDER(mining & quarrying) **DPT:685**
GED: 2 SVP: 2 EC: 1 PA: H 3 4

Tends machine that compresses loose salt into blocks, for use as cattle-feeding supplement:
Adjusts scale for required weight of salt, and opens gate to start flow of salt from bin to machine. Starts press that automatically admits measured amount of salt into compressing chamber, compresses salt into blocks and ejects formed block. Stacks blocks on pallet. Cleans and lubricates machine, using air hose, oil can and grease gun.
May mix and add specified amounts of potassium iodide or other fortifiers to salt before compressing into blocks. May carry out strength and weight tests on formed blocks, using pressure punch and scale, and record results. May mix colours, such as ultramarine blue, red oxide calcium iodate or cobalt carbonate to refined salt to be compressed into blocks or licks.

8119-230 SALT-SLAB-FORMING-MACHINE TENDER(mining & quarrying) **DPT:685**
salt-compact operator.
GED: 2 SVP: 2 EC: 1 5 7 PA: L 4 7

Tends machine that rolls and forms salt fines into sheets of rock salt to be reground into coarse produce:
Moves controls to start pressure rollers rotating and to convey salt fines to roll feeders. Turns dials and handwheels to adjust pressure of rollers to maintain specified thickness and consistency of formed product, as indicated by feel and visual inspection, and to control feed rate of fines through rollers. Replaces worn knives, that scrape formed sheet from roller surface, using hand tools. Moves controls to convey formed sheet to crusher bin.

Peat Moss Treating Occupations
8119-250 through 8119-254

8119-250 DEHYDRATOR TENDER, PEAT MOSS(mining & quarrying) **DPT:685**
GED: 3 SVP: 3 EC: 1 5 PA: M 4

Tends machines and conveyors that shred, grind and dehydrate peat moss:
Starts conveyors to move continuous flow of peat moss through shredders, grinders and ovens. Sets thermostat on oven to maintain specified temperature. Observes flow of peat moss and operation of conveyors and machines to detect malfunctions. Stops equipment to clear blockages and make minor adjustments. Feels ground peat moss to determine efficiency of drying operation.
May attach empty bag to machine for automatic filling. May staple and place filled bags on handtruck for transfer to storage.

8119-254 WATER EXTRACTOR, PEAT MOSS(mining & quarrying) **DPT:685**
GED: 2 SVP: 2 EC: 1 5 PA: M 2 4

Tends mechanical pressure rollers and associated equipment to remove water and foreign material from peat moss:
Activates controls on console board, to start vibrating screens, pressure rollers and associated conveying systems. Observes operation to detect equipment malfunctions and material blockages. Feels peat moss emerging from rollers to determine moisture content and turns handwheel to adjust roller pressure. Removes foreign material from screens. Cleans spillage, using shovel.

Other Mineral Ore Treating Occupations
8119-268 through 8119-310

8119-268 PERLITE-EXPANDER OPERATOR(non-ferrous metal) **DPT:282**
perlite burner.
GED: 4 SVP: 7 EC: 1 3 5 6 7 PA: L 4 7

Heats perlite rock in verticle kiln to expand into light, fluffy and porous substance for use as insulating material:
Turns panel controls to start flow of materials, fuel and air, rotation of

kiln and speed of conveyors and to regulate draft and vent mechanisms. Adjusts automatic scale that controls amount of perlite rock flowing into kiln. Scoops samples of hot perlite from kiln for chemical analysis, using shovel. Performs quality control test, using screens, scales, stopwatch, riffle sampler and gauges. Records test results. Observes material flow, air, temperature, fuel charts and oxygen gauges, and makes adjustments to maintain kiln conditions within specified limits. Keeps production records.

8119-274 BRIQUETTING-MACHINE OPERATOR(iron & steel; non-ferrous metal) DPT:582
briquetter operator.

GED: 3 SVP: 5 EC: I 5 7 PA: M 4

Operates equipment that dries, mixes and compresses metal dust or ore into briquettes:

Starts belt conveyors that draw mixture from wet-bin hopper to heated rotary dryer, or shovels mix into feed hopper. Cleans blocked chutes, using rod. Turns valves to set dryer at specified temperature. Feels mixture to determine moisture content and consistency. Pulls lever to open discharge gate of heating chamber to transfer mixture to mill. Opens valves to add binding solution. Opens chute to feed mixture into press to form briquettes. Adjusts die cavity of press to produce uniform briquettes, using hand tools. Starts conveyor to transfer formed product to drums or bins for shipment or storage. Monitors dryer-control panel and reports equipment malfunctions to maintenance personnel. Checks air lines to detect leaks. Lubricates equipment, using oil can and grease gun.

May fill storage hopper with pre-mixed materials, using crane or hand truck. May tend tunnel-type furnace to case-harden briquettes. May be designated according to type of mineral processed; for example, Copper-Briquetting-Machine Operator(non-ferrous metal)

8119-278 DRIER OPERATOR(mining & quarrying) DPT:682
ore-drier operator.
GED: 3 SVP: 4 EC: I 5 6 7 PA: M 4 7

Controls one or more of several types of furnaces, or kilns, driers and conveyors that dry coal or ore after washing and before milling or pelletizing:

Fires furnace, kiln or drier. Observes gauges, control panel lights, meters and recording charts to detect malfunction in equipment, or variances in drying procedures. Adjusts controls to maintain specified temperature and correct air, gas and oil flow and specified dryness. Starts conveyor and opens or closes gates of storage bins to control flow of materials into drying equipment. Observes operation to detect plugging of equipment and dislodges material, using crowbar or air hose. Observes colour of materials to determine moisture content or determines degree of dryness by observing gauges. Keeps production records.

May take samples of materials for laboratory. May control operation of scrubber that collects dust, and pump sludge from scrubber to catch basin. May position belt conveyor to unload hoppers, railway gondolas or trucks.

8119-282 ORE-PROCESSING-PIPE TURNER(iron & steel; non-ferrous metal) DPT:584
GED: 2 SVP: 3 EC: B 4 5 7 PA: H 3 4

Changes, rotates and cleans pipes that carry materials, such as concentrate slurry and tailings at smelting or refining plant:

Checks pipe lines for plugging or wear. Removes bolted couplings or flanges and changes pre-cut-pipe sections or replaces hoses on cyclone-feed and discharge lines, concentrate and tailings lines, using wrenches, chain hoist, slings and impact wrench. Loosens bolted couplings and rotates pipe, using chain wrench, so that inner pipe surfaces are worn evenly by abrasive action of slurry. Stencils and records direction and date of pipe rotation. Unplugs lines, using bar and water hose, or inserts pipe cleaner (cylindrical go-devel with scraper and leather fins) into trap of pipe and notifies pumping section to start material flow to force cleaner through pipe. Removes cleaner at end of pipe.

May extend tailing-pipe lines to distribute flow over dam area. May shovel materials from drainage ditches.

8119-284 CARNALITE-FLUX MAKER(non-ferrous metal) DPT:684

GED: 2 SVP: 3 EC: I 6 PA: M 4

Mixes, melts and pulverizes ingredients to produce carnalite flux used in refining magnesium:

Weighs carnalite and other ingredients, according to formula, using beam scale. Dumps materials into power mixer. Starts machine to mix ingredients for prescribed time. Melts flux mixture in furnace crucible. Presses switch to pump molten flux into cooling pans. Pulverizes solidified-carnalite flux in grinding mill and shovels powder into metal drums.

8119-286 FILTER-LEAVES CLEANER(iron & steel; non-ferrous metal) DPT:684
leaf coverer.

GED: 2 SVP: 3 EC: I 6 PA: M 4

Cleans and re-covers leaves of ore filtering units:

Opens filter units and removes filter leaves, using crane. Strips worn covers from leaves, using knife and wire cutters. Immerses filter leaves into cleaning vats containing caustic solution for specified interval. Brushes graphite paste on neck of leaves to provide tight seal, inserts leaves in new filter covers and closes openings of covers around necks of leaves, using twine and hand stapler. Replaces leaves in filter units, using crane. Records number of cleaned and re-covered filters. May repair small holes in leaves, using thread and needle.

8119-290 DUST-COLLECTOR TENDER(iron & steel) DPT:685
GED: 2 SVP: 3 EC: I 5 7 PA: M 4

Tends equipment that moistens iron ore dust collected from atmosphere to facilitate recovery:

Starts dust-collection equipment and turns valves to adjust pressure to required level as indicated by manometer. Examines parts of dust-collector; such as pipes, nozzles, strainers and collection surfaces for pluggings, breaks, leaks and residue. Closes water valves and stops pumps to permit cleaning and repairing of equipment. Washes residue from collection surfaces, pumps, hoppers and fans, using water or steam hose. Removes mesh strainers or filter bags and cleans filtering media, using air hose. Replaces defective water nozzles and tightens glands on pumps and valves, using wrenches. May record gauge readings.

8119-294 SINTER-FEEDING-MACHINE TENDER(iron & steel) DPT:685
GED: 2 SVP: 3 EC: I 6 7 PA: M 4

Tends table-feeding equipment that regulates flow of finely ground iron ore and coke from storage bins to sinter machine:

Moves controls to start feeder and conveyor belt. Opens bin gates to release specified amount of sinter material onto conveyor belt. Observes equipment to detect malfunctioning. May record periodic weightometer readings in operating log.

8119-298 SLAG-PELLETIZER TENDER(iron & steel) DPT:685
slag-granulator man.
GED: 2 SVP: 3 EC: I 3 5 6 7 PA: M 4

Tends machine that pelletizes blast furnace slag for use in building or insulating material:

Opens gate of furnace, using control button, or tips ladle, using tipping device to allow slag to flow into stationary runners leading to pelletizer (revolving drum). Turns water, air and steam valves to spray and cool slag in pelletizer and form pellets. Positions container under discharge chute of pelletizer and starts conveyor to discharge formed pellets. Stops equipment and clears slag from runners, granulator and conveyor, using iron bar. Lubricates equipment, using grease gun and oil can.

May signal crane operator to position movable runners that carry slag from furnace or ladle to pelletizer.

8119-302 SLUG-PRESS TENDER(chem., n.e.c.; non-ferrous metal) DPT:685
pellet-press tender.
 GED: 2 SVP: 3 EC: 1 5 6 7 PA: M 4

Tends hydraulic press and auxiliary equipment that forms, pulverizes and sizes materials, such as calcium chloride or tungsten, into granular products for further processing:

Scoops and dumps metallic powder from drum into press hopper. Starts automatic feed and ram that compresses and forms powder into pellets or slugs. Examines pellets ejected from press, and moves wheels that regulate length of ram stroke and control cooling of press, according to specifications. Tends automatic jaw crusher, oscillating granulator and tumbling barrel that crushes, granulates and rounds off sharp corners of granules. Transfers granulated product to vibrating screens to size pellets, manually. Clears plugged feed lines, using bar. Lubricates equipment, using oil and grease gun. Shovels screened product into drums for storage or further processing.

8119-306 DUST REMOVER(iron & steel; non-ferrous metal) DPT:685
flue-dust labourer.
 GED: 2 SVP: 2 EC: 1 7 PA: M 4

Removes flue dust from converters, precipitators or hoppers, using vacuum or screw conveyors:

Connects pipe from dust hopper to intake of vacuum system to draw dust into collecting apparatus. Starts electric pumps to create vacuum in pipe-conveyor system. Breaks up lodged dust with bar or pole and hammers sides of hopper with mallet or bar to dislodge contents. Observes dust-bagging process and replaces defective bags, using

hand tools. Starts screw conveyor that transports dust from baghouse or hoppers to furnaces or presses. Shovels spillage onto screw conveyor. Flushes pipes and vacuum pumps with water hose.

8119-310 FLUE-DUST SETTLER(iron & steel; non-ferrous metal) DPT:685
 GED: 2 SVP: 2 EC: 1 4 5 7 PA: M 4

Tends mill that mixes flue dust with water to settle it for further processing:

Opens bin outlet allowing dust to fall into mixing mill. Dislodges dust adhering to bin by hammering sides, using mallet. Starts mill and opens valve of water spray. Opens door of mill allowing moistened dust to fall onto conveyor leading to storage bin, railroad car or briquetting press.

May distribute mixture evenly in bin or car, using shovel.

8119-399 OTHER MINERAL ORE TREATING OCCUPATIONS

This group includes mineral ore treaters, not elsewhere classified; for example, those who tend aluminum reduction cells to produce refined aluminum, install conducting bars in electrolytic-cell cathode blocks to ensure electrical contact, collect and dilute refinery gases to recover usable products and prevent undue pollution, and observe operations of zinc refining electrolytic-cells to ensure efficient operations. Typical examples of occupational titles covered by this residual group definition are:

Aluminum-Cell Tender(non-ferrous metal)
 Cathode-Block Rodder(non-ferrous metal)
 Scrubber Operator(non-ferrous metal)
 Zinc-Cell Operator(non-ferrous metal)

813/814-METAL PROCESSING AND RELATED OCCUPATIONS

This minor group includes occupations concerned with processing partially or fully-refined metals to make semi-finished or finished metal stock and products by such means as melting, heat-treating, rolling, moulding, casting, drawing, extruding, plating and metal coating. These occupations are classified in the following unit groups:

- 8130 Foreman, Metal Processing and Related Occupations**
- 8131 Metal Smelting, Converting and Refining Furnacemen**
- 8133 Metal Heat-Treating Occupations**
- 8135 Metal Rolling Occupations**
- 8137 Moulding, Coremaking and Metal Casting Occupations**
- 8141 Metal Extruding and Drawing Occupations**
- 8143 Plating, Metal Spraying and Related Occupations**
- 8146 Inspecting, Testing, Grading and Sampling Occupations, Metal Processing**
- 8148 Occupations in Labouring and Other Elemental Work, Metal Processing**
- 8149 Metal Processing and Related Occupations, n.e.c.**

8130-FOREMAN, METAL PROCESSING AND RELATED OCCUPATIONS

This unit group includes occupations, as described under the master title, 01-250 SUPERVISOR/FOREMAN (any

ind.), concerned with supervising and co-ordinating activities of workers engaged in processing metal to make semi-finished or finished metal stock and products.

MAJOR GROUP 81/82

8130-110-8130-199

8130-110 FOREMAN, FURNACEMEN, METAL(iron & steel; non-ferrous metal) **DPT:138**

Supervises and co-ordinates activities of furnacemen engaged in melting and refining ferrous and non-ferrous metals, charging furnace with specified raw material, adjusting temperature and tapping and pouring molten metal into ladles or moulds to form pigs or ingots, (Unit Group 8131):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

May be concerned with a particular type of furnace or activity and be designated accordingly; for example,

Foreman, Bessemer Furnace

Foreman, Blast Furnace(iron & steel)

Foreman, Open-Hearth Furnace(iron & steel)

Foreman, Oxygen Furnace(iron & steel)

8130-114 FOREMAN, HEAT-TREATING OCCUPATIONS, METAL(metal fab., n.e.c.) **DPT:138**

Supervises and co-ordinates activities of workers engaged in altering the physical properties of metal objects, by heating, cooling or chemical treating, (Unit Group 8133):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

May supervise one or more heat-treating processes such as annealing, hardening, tempering or quenching, and be designated accordingly; for example,

Foreman, Annealing

Foreman, Quenching

Foreman, Tempering

8130-118 FOREMAN, INSPECTING, TESTING, GRADING AND SAMPLING OCCUPATIONS, METAL PROCESSING(iron & steel; non-ferrous metal) **DPT:138**

Supervises and co-ordinates activities of workers engaged in quality control of metal processing occupations, (Unit Group 8146):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

May supervise workers engaged in either inspecting, testing, grading or sampling materials or products, and be designated accordingly, Inspector, Chief

8130-122 FOREMAN, LABOURING AND OTHER ELEMENTAL OCCUPATIONS, METAL PROCESSING(iron & steel; non-ferrous metal) **DPT:138**

Supervises and co-ordinates activities of workers engaged in labouring and other elemental work, concerned with processing partially or fully refined metals to make semi-finished or finished metal stock and product, (Unit Group 8148):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

May supervise workers in one or more occupations such as loading and unloading scrap metal; sorting, handling and storing ingots; stacking and weighing pigs and scrap; receiving, checking, storing and distributing raw materials; and be designated accordingly; for example,

Foreman, Scrap Preparation(iron & steel)

General-Handling Foreman

8130-126 FOREMAN, METAL EXTRUDING AND DRAWING OCCUPATIONS(iron & steel; non-ferrous metal) **DPT:138**

Supervises and co-ordinates activities of metal forming workers engaged in extruding ferrous or non-ferrous metal into primary shapes such as pipes, tubes, bars and wire from billets, blooms or slabs, and reducing diameter of these shapes into specified dimensions, (Unit Group 8141):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

May be concerned with a particular activity and be designated accordingly; for example,

Foreman, Extruding

8130-134 FOREMAN, METAL ROLLING OCCUPATIONS(iron & steel; non-ferrous metal) **DPT:138**

Supervises and co-ordinates activities of workers engaged in heating, straightening, sawing, cleaning, scalping and surfacing metal stock, and rolling blooms, billets or slabs into plates, bars or skelps, (Unit Group 8135):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

8130-138 FOREMAN, MOULDING, COREMAKING AND METAL CASTING OCCUPATIONS(iron & steel; non-ferrous metal) **DPT:138**

Supervises and co-ordinates activities of workers engaged in making moulds and cores, and pouring molten metal or pressing powdered metal into moulds, to form ingots or castings, (Unit Group 8137):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

May be concerned with a particular activity and be designated accordingly; for example,

Foreman, Coremaking

Foreman, Die Casting(non-ferrous metal)

Foreman, Moulding

8130-142 FOREMAN, PLATING, METAL SPRAYING AND RELATED OCCUPATIONS(metal stamp., press. & coat.) **DPT:138**

Supervises and co-ordinates activities of workers engaged in applying decorative, protective or other coating to metal objects, (Unit Group 8143):

Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).

May supervise one or more metal-treating processes such as electroplating, dipping, pickling, spraying, anodizing, bluing, tinning, plating, galvanizing or metallizing and be designated accordingly; for example,

Foreman, Anodizing

Foreman, Electroplating

Foreman, Galvanizing

Foreman, Hot-Dip Plating

Foreman, Metalizing

Foreman, Tinning

8130-199 OTHER FOREMEN, METAL PROCESSING AND RELATED OCCUPATIONS

This group includes metal processing foremen, not elsewhere classified; for example, those who supervise and co-ordinate activities of workers engaged in extruding lead ingots into wire and swaging the wire into cartridge components; stocking raw materials and scrap used for open-hearth-furnace charging; refining scrap solder and tin and lead alloy to make solder; heating, forming and welding flat steel strips (skelps) to produce butt-welded pipes; sandblasting metal articles; wrapping reels of wire, tubes or rods for shipment; covering electric wire and cable with protective or insulating material; flattening and straightening surfaces of drawn or extruded metals; and making refractory plugs. Typical examples of occupational titles covered by this residual group definition are:

Foreman, Lead-Section(ammunition)

Foreman, Open-Hearth Stockyard(iron & steel)

Foreman, Solder Making(non-ferrous metal)

8131-METAL SMELTING, CONVERTING AND REFINING FURNACEMEN

This unit group includes occupations concerned with operating and tending furnaces used in the process of converting and refining metal, melting metal for casting, and in heating metal for rolling, forging and pressing as a stage in production of semi-finished or finished metal stock or products.

8131-110 BESSEMER-CONVERTER OPERATOR(iron & steel; non-ferrous metal) DPT:462

bessemer-converter blower.

GED: 4 SVP: 7 EC: I 3 5 6 7 PA: L 4 7

Operates Bessemer converter from control board to oxidize elements such as carbon, manganese and silicon from molten pig iron or non-ferrous metal matte:

Directs workers to charge converter with molten pig iron or non-ferrous matte. Moves controls to raise converter to blowing position and to start blower that blasts air through tuyeres in bottom of converter. Observes colour and intensity of flame at mouth of converter to determine progress of oxidation. Moves controls to regulate volume and pressure of air blast or in the conversion of pig iron to dump cold pig iron or matte into converter to control temperature and rate of oxidation. Moves controls to lower converter and shut off air that terminates blow when metal has oxidized to specified composition, as indicated by characteristics of flame. Adds specified amount of element; such as carbon, manganese, silicon, gravel and limestone to recarbonize and deoxidize metal to form steel or matte of known composition. Moves controls to tilt or rotate converter to pour molten metal into ladles for further processing.

May take sample with steel ladle and forward to laboratory for X-ray spectrometer analysis.

8131-114 BLAST-FURNACE OPERATOR(iron & steel) DPT:462

blast-furnace blower.

GED: 4 SVP: 7 EC: I 3 5 6 7 PA: M 2 4 5 6 7

Controls the operation of blast furnace to produce molten pig iron or alloys:

Directs workers in charging furnace with specified amounts of raw materials, such as iron ore, coke and limestone in alternate layers. Operates battery of stoves to supply heated airblast to furnace. Observes colour of molten metal through tuyeres, or reads pyrometer, and orders changes in furnace temperature and pressure or adjusts temperature and pressure controls. Estimates amounts of ferrosilicon, manganese, and phosphorous to add to molten metal to obtain specified type and grade of pig iron. Directs workers in flushing and tapping furnace and in positioning ladles to receive molten metal. Observes colour of molten metal flowing in runners during casting operations to determine quality of iron or alloy. Plugs taphole after ladles are filled, using mud gun, and relines runners with refractory material. Obtains sample of molten metal for laboratory analysis.

May estimate and record percentage of sulphur and silicon in iron by observing sample of cooling iron and slag formation.

8131-118 OPEN-HEARTH-FURNACE OPERATOR(iron & steel) DPT:462

first helper.

GED: 3 SVP: 7 EC: I 3 5 6 7 PA: M 4 5 6 7

Operates open hearth furnaces to produce specified types of steel:

Examines raw materials for conformance to specifications. Signals furnace-charging workers to place materials in furnace. Turns fuel, air and steam controls to adjust fuel mixtures and draft. Moves levers to circulate gas throughout furnace to distribute heat and prevent burning out of furnace walls. Signals crane operator to pour molten metal in furnace. Obtains samples of metal, using long-handled spoon and pours samples in moulds for testing. Moves controls to open furnace doors and directs assistant to shovel alloy additives into furnace to obtain specified type of steel. Observes pyrometer to determine temperature of metal. Observes colour of molten metal through cobalt-blue glasses to determine tapping time and notifies superior. Directs crew in tapping furnace and adding specified additives to molten metal in ladle. Records operational data on forms. Examines furnace to determine repairs needed and directs crew in repairing furnace walls and flooring.

8131-122 OXYGEN-FURNACE OPERATOR(iron & steel) DPT:462

GED: 3 SVP: 7 EC: I 5 7 PA: L 4 5 6 7

Operates oxygen furnace and auxiliary equipment from raised platform to produce specified types of steel:

Moves controls to position furnace for charging operations. Observes temperature gauges and recorders to maintain heat at specified level. Moves controls to position oxygen lance and regulate flow of oxygen through lance onto charge, or adjusts hood draft when sparking or slopping of charge occurs or furnace overheats. Moves controls to position transfer car carrying ladle and slag pots under taphole and to tilt furnace for tapping operations. Calculates amount of hot metal, scrap, sinter and additives required for charge and directs other workers to charge furnace. Records operation data for office control purposes.

May set weight indicator gauge according to specified amount of additives to be added to charge. May start automatic weighing machine that releases additives, such as fluorspar, lime, and alloys from bins onto conveyor leading to chute over furnace. May move lever to release additives from chute into furnace.

8131-126 FURNACE OPERATOR(iron & steel; non-ferrous metal) DPT:462

GED: 3 SVP: 6 EC: I 3 5 6 7 PA: M 4 7

Controls gas, oil, and coal, vacuum, electric arc, or induction furnace to melt metal prior to casting:

Weighs and charges specified amounts of metal ingots and scrap metal into furnace by hand, using hoist, or by directing crane operator. Loads molten metal into furnace, using transfer ladle. Turns valves to regulate injection of fuel and air into furnace, or moves controls to regulate flow of electricity and water coolant through electrodes to heat furnace to specified temperature. Observes colour of metal and instruments, such as voltmeter, ammeter, wattmeter and pyrometer, and adjusts controls to maintain specified temperature. Sprinkles fluxing agent over surface of molten metal to bring impurities to surface forming layer of slag. Skims off slag, using strainer. Removes crucible containing molten metal from furnace, using hoist. Moves levers to tilt crucible or open crucible door, or breaks clay plug to pour metal into ladle for transportation to moulds. Removes test sample of molten metal from crucible, using hand ladle and pours sample into mould. Records test data from each melt. Positions new electrodes over worn electrodes in electric arc furnace, using overhead crane, and screws or welds electrodes together.

May place and bolt crucible into water-filled cylinder of furnace, using hoist and power wrench. May repair furnace linings. May open slag tapping hole. May be designated according to type of furnace operated; for example,

Crucible-Furnace Operator
Electric-Arc Furnace Operator(iron & steel)
Induction-Furnace Operator
Vacuum-Furnace Operator(iron & steel)

8131-130 SMELTING FURNACE OPERATOR(non-ferrous metal) DPT:462

GED: 3 SVP: 6 EC: I 3 5 6 7 PA: M 4 7

Operates furnace to refine, melt, alloy and cast non-ferrous ore or metal to specifications:

Calculates required amount of metal, scrap and ingots needed to charge and alloy batch, according to specifications, using alloy conversion chart. Assists furnace crew in weighing metals and charging furnace. Sets furnace controls to regulate flow of air, gas, oil or current to heat metal to specified temperature. Adjusts water sprays, fan speeds and dampers to control flow of flue gas and draft temperature. Observes colour, fluidity of molten bath and appearance of metal to estimate temperature, or measures temperature, using pyrometer. Inserts end of green pole into furnace to prevent oxidation. Adds reagents to remove impurities according to type of metal. Skims slag using rabble, dross hoe or ladle. Opens blowers to force air through tuyeres to agitate bath, and stirs with iron rod to release oxygen. Seals tap holes with fire clay and bricks. Instructs crew in fluxing and maintaining required temperature during melting process and in syphoning and dumping metal. Regulates controls to tilt or turn furnace and tap metal into moulds. Lifts and transfers ladles of melt, using hoist. Prepares samples of furnace feed for laboratory analysis and forwards boxes of slag, speiss and recovered dusts to other parts of plant for further processing. Sprays moulds with bone ash or lampblack to prevent metal from adhering to moulds.

May replace defective parts and clean equipment. May be designated according to type of furnace operated or product processed; for example,
Copper Melter
Electric-Furnace Operator
Reverberatory-Furnace Operator

8131-134 BLAST-FURNACE TAPPER(iron & steel) DPT:664
blast-furnace keeper.
GED: 3 SVP: 6 EC: I 3 5 6 7 PA: H 4 5 6 7

Taps blast furnace to pour molten metal into ladles:
Drills or blasts taphole preparatory to tapping furnace, using power hand drill or blasting powder. Positions splasher plate in front of taphole to prevent metal splashing. Taps furnace to fill ladle, guiding point of oxygen lance into taphole or placing and setting powder charge. Opens gates and shutters to direct flow of molten iron onto runners and into ladles, using steel bar. Plugs taphole after ladles are filled to stop flow of molten metal, using mud gun. Assists other workers in breaking up and removing solidified slag from runners to permit free flow of metal, using chisel-edged bar, hammer or oxygen lance. Assists in relining runners with sand, clay and refractory mixture, and drying relined runners using gas burner. Repairs or requests repairs on defective tuyeres, blowpipes and boshplates in furnace, using hand tools.

8131-138 MIXER OPERATOR, MOLTEN METAL(iron & steel; non-ferrous metal) DPT:562
GED: 3 SVP: 5 EC: I 3 5 6 7 PA: L 4 5 7

Operates machine to mix various charges of molten metal and maintain metal at specified temperature for use in converters and furnaces:

Moves controls to raise lid of mixer and operates crane, or signals crane operator to pour metal from transfer ladle into mixer. Turns controls to adjust fuel and air mixture to mixer burners to maintain specified temperature in mixer, and to rotate arm that mixes molten metal. Operates crane, or signals crane operator to position ladle for receiving molten metal from mixer for delivery to converters or furnaces. Moves controls to tilt mixer and fill ladle. Samples molten metal in ladle, using long-handled spoon, and forwards sample to laboratory for analysis. Observes condition of ladles and removes those showing defects or excessive wear for repair.

8131-142 HEATER, METAL(any ind.) DPT:662
GED: 3 SVP: 5 EC: I 3 5 6 PA: H 3 4 5 6

Controls oil, gas, or electric furnace to heat stock, such as billets, bars, plates and rods in preparation for further processing:
Ignites furnace burners with torch, and turns valves to regulate flow of fuel and air to burners. Reads dials and gauges and turns knobs to maintain specified temperature. Positions stock in furnace, using conveyor, hoist or tongs or signals 8131-162 FURNACE CHARGER (non-ferrous metal) to load stock. Observes colour of metal or reads gauges to determine when stock reaches specified temperature. Observes passage of steel for stickers, and buckling, and clears blockages using bar, pusher, wrench or hook. Removes stock from furnace.

May work as member of crew. May shape heated metal stock, using template or mould, and power hammer. May place heated workpiece on conveyor for transporting to work area. May turn knobs to synchronize speed of feed and takeoff conveyors of automatic furnace. May record kind and number of metal pieces heated.

8131-146 CUPOLA TENDER(iron & steel) DPT:665
cupola furnaceman; cupola melter.
GED: 3 SVP: 5 EC: I 3 5 6 7 PA: M 3 4

Tends cupola furnace to melt and refine iron, scrap metal and other additives to produce iron castings:
Closes and props door in bottom of cupola. Shovels sand into cupola and tamps sand to form wedge-shaped layer on cupola bottom sloping toward tap hole. Kindles fire in coke bed of cupola. Adjusts speed of blowers that supply air to cupola. Signals other worker to begin charging (loading) metal, coke and limestone into cupola. Reads gauges indicating data such as temperature of molten metal in cupola and amount of air flowing into and out of cupola and adjusts controls accordingly. Taps molten metal from cupola. Estimates physical properties of metal being melted by checking colour of slag draining

from surface of molten metal. Pulls prop from bottom doors of cupola when shutting down furnace to allow residual materials to drop out.

May chip slag, ash or other foreign materials from interior walls of cupola, using pneumatic chipper or hammer and chisel. May patch and reline cupolas or receiving ladles with refractory materials. May direct other workers who prepare cupola for charging or who load charge into cupola.

8131-150 ALUMINUM-POWDER MAKER(non-ferrous metal) DPT:682
GED: 3 SVP: 5 EC: I 5 6 PA: L 4 7

Operates electric furnaces to atomize aluminum ingots into powder of specified fineness:

Connects atomizing nozzle assembly to hot air line, using clamps. Moves controls to switch on air booster compressor to obtain required air pressure. Pre-heats nozzle assembly, placing it in close proximity to molten metal to prevent freezing of metal in nozzle and possibility of explosion. Adjusts controls, observes and regulates temperature and air intake. Opens hot air valve, manually to siphon metal from furnace through nozzle jets. Observes vaporization appearance of molten metal blown from jets into powder collection duct to detect malfunctioning. Listens to sound of jets to detect proper operation and makes adjustments to obtain powder of specified fineness. Changes obstructed jets and ducts, using hand tools. Cleans plugged jets, using scrapers, brushes and wires. Replenishes metal supply in furnaces manually by dumping in ingots without causing undue temperature fluctuations, or transfers pre-heated ingots from crucible using hoist. Pulls plugs from tap holes to empty furnace, using chain block.

8131-154 CHARGING-MACHINE OPERATOR(iron & steel) DPT:633

charging-car operator; furnace charging-machine operator.

GED: 3 SVP: 5 EC: I 3 5 6 7 PA: L 4 7

Operates charging machine, in a steel producing plant, to charge (load) open-hearth furnaces with materials such as limestone, pig iron and steel scrap:

Moves controls to engage arm of charging machine in slot of charging box located on charging buggy (railcar). Operates lever controls to position charging machine at door of furnace, to thrust box through door and rotate arm to dump contents of box on furnace floor. Withdraws empty box, deposits it on charging buggy and moves charging machine to next furnace to repeat process.

May operate arm on charging machine for other tasks such as positioning hot metal pouring spouts at furnace doors.

8131-158 KETTLEMAN, LEAD(non-ferrous metal) DPT:485
GED: 3 SVP: 4 EC: I 3 6 7 PA: H 4 7

Tends oil or gas-fired kettles to melt and refine lead:

Fires kettles and turns valves to regulate fuel flow. Loads kettle with lead in molten, pig, scrap or button form, using crane, pails or shovels. Adds specified type and amount of reagents, such as caustic, to settle lead. Agitates mixture to cause impurities such as antimony, arsenic, bismuth and tin to float to surface and form into dross. Skims dross into buckets, using ladle, shovel or dipper. Weighs dross in buckets to calculate percentage of impurities in batch, using floor scale. Throws zinc bricks into kettle and agitates mixture to de-silverize lead, skims crust of silver and gold content into basket of press, and compresses dross with air-driven ram to remove foreign matters from non-electrolyte refined lead. Pumps lead into moulds or through reaction cylinder while chlorine is admitted to form zinc chloride slag. Skims slag into buckets after completion of reaction as indicated by colour of slag and molten metal, and weighs slag, using floor scale. Pours reacted metal into moulds. Removes and dips samples into cold water to prepare samples for laboratory analysis. Hooks pot or lead button to crane and transfers to de-arsenizing kettle.

May crystallize zinc in water-cooled vacuum tank to remove zinc from de-silverized lead. May produce antimony crystals from antimonial lead by mixing prescribed reagents with molten metal in kettle, skimming dross and cooling bath to specified temperature. May be designated according to task performed; for example,

De-Arsenizing Kettleman

De-Silverizer

8131-162 FURNACE CHARGER(non-ferrous metal) DPT:684
GED: 3 SVP: 4 EC: I 3 5 6 7 PA: M 4 7

Charges smelting furnaces with ore, coke, flux or other materials, by performing any combination of the following duties:
Weighs metals and hardening agents to produce specified alloys, using scale. Moves levers to open hopper or chute gate to pour materials into barrows, cars or directly into furnace, or uses car-dumping machine or power shovel to lift and dump materials into furnace. Drives industrial truck or pushes buggy to furnace area, dumps material on floor and shovels or pushes it into furnace with powered scraper. Spreads and stirs molten batch to alloy metals according to specifications, using industrial trucks equipped with rake, or using bar and rabble. Skims slag from top of molten metal. Controls furnace heat by regulating fuel flow. Operates siphon equipment to draw molten metal from melting hearths to holding hearth. Removes samples for laboratory tests. Examines melting operations to determine volume of air required, and adjusts blower speed or taps furnace tuyeres. Cleans and washes tools.

May spray inner surface with clay wash to prevent adherence of metal to walls. May pierce condenser seal with rod to free carbon monoxide gas and allow zinc vapors to flow from retort. May position moulds with chain hoist and pour metal to form ingots.

8131-166 FURNACE TAPPER(iron & steel; non-ferrous metal) DPT:664

crucible man; settler slagman.

GED: 2 SVP: 4 EC: I 3 5 6 7 PA: H 4 5

Taps refining furnaces or reduction pots to pour molten slag, steel or non-ferrous metal into moulds, crucibles or ladles:

Punches clay plug from taphole, using steel rod, to allow molten metal to flow into moulds, ladles or slag pots. Moulds clay plugs and inserts them into taphole to stop flow of metal, using rod. Chips solidified slag and metal from taphole and spout, using chisel edged bar. Signals crane operator to place pouring crucible near pot or replace full pots. Lines trough between furnace and ladle with asbestos, firebrick, clay or ceramic foam block. Turns spout stopper to regulate flow of molten metal into ladle or mould.

May place metal splash plates over trough and in front of tapping hole, to prevent molten metal from splashing.

8131-170 OPEN-HEARTH-FURNACE HELPER(iron & steel) DPT:684

second helper.

GED: 2 SVP: 4 EC: I 3 5 6 7 PA: H 4

Assists open hearth furnace operator to melt and cast iron and steel in open hearth furnaces:

Opens furnace tap holes, using bar, oxygen lance and torpedo gun (explosive device). Closes furnace tap holes with pipe, dolomite or magnesite to stop flow of molten metal, and relines steel runners. Weighs additives such as fluorspar, ferro-manganese, ferro-silicon, limestone and steel scrap, and wheels or conveys them in charging boxes to furnace areas, using electric crane. Repairs walls and bottom of furnaces, using dolomite gun. Assembles tapping bar prior to tapping furnace. Shovels refractory materials into furnace. Assists crew in slagging or flushing furnace. Starts furnace by igniting gas with torch. See also definition for term title, 02- 160, HELPER (any ind.).

May assist maintenance personnel in replacing burner tips, using hand tools.

8131-174 PRECIOUS METAL MELTER(non-ferrous metal) DPT:684

melter, jewellery.

GED: 2 SVP: 3 EC: I 3 6 7 PA: L 4 7

Melts gold or gold and silver alloys, or other precious metals, using furnace or torch, and pours molten metal into ingot moulds to prepare metal for use in making jewellery:

Places cold metal in clay crucible. Heats crucible with torch to melt metal, or places loaded crucible in preheated oven. Observes colour changes in metals to insure proper temperature is attained. Pours molten metal into ingot mould. Opens mould, lifts out ingot with tongs, and quenches ingot in water. Delivers cooled ingots to vault. Keeps work areas clean to minimize losses of precious metals, using broom, brushes and scrapers.

8131-178 METAL RECLAIMER(explosives) DPT:685

burning-plant operator; salvager.

GED: 2 SVP: 3 EC: B 3 5 6 PA: H 4

Tends furnace that heats scrapped small arms ammunition to explode powder and reclaim lead and brass:

Pulls trucks of tote boxes of scrapped ammunition from storage area to furnace hoppers. Scoops or dumps tote boxes of primers or loaded cartridges into hopper. Shovels exploded primers from furnace floor or skims cartridge and bullet cases from surface of molten lead, using skimming tool, and deposits them in containers according to type of metal. Ladles molten lead from furnace pot into pig moulds. Carries cooled pigs to storage area, using handtruck, and stacks them on skids. May burn defective ammunition such as scrapped caps, detonating relays and fuses in open pit to reclaim metal and dispose of explosive, using remote-control equipment.

8131-182 SCRAP REMELTER(non-ferrous metal) DPT:685

furnace tender; salvage man.

GED: 2 SVP: 3 EC: I 3 6 7 PA: H 4

Tends furnace that remelts non-ferrous scrap metal and casts it into ingots or pigs for reuse:

Shovels or throws specified portions of scrap metal and ingots into furnace. Regulates furnace controls to attain required temperature. Skims dross (scum) from surface of molten metal, using hand strainer, scoop or ladle. Adds flux to molten mass to force impurities to surface. Turns valve and allows molten metal to run into moulds to form pigs. Removes cooled pigs from moulds and stacks them in storage area.

May convey ingots to die-casting machines to replenish supply, using overhead monorail or cart. May clean furnace and equipment. May be designated according to metal re-melted or machine tended; for example,

Reduction-Kettle Tender
Scrap Die-Casting Smelter

8131-186 FURNACE-OPERATOR HELPER(iron & steel; non-ferrous metal) DPT:666

GED: 2 SVP: 3 EC: I 3 5 6 7 PA: H 3 4

Assists 8131-126 FURNACE OPERATOR (iron & steel; non-ferrous metal) by performing any combination of following duties:

Seals furnace opening with fire clay and brick, using paddle and shovel. Charges furnace with materials, such as scrap, ore, flux reagents, slimes, oxides, pellets or coke by moving levers to open bin or hopper gates, by shovelling or by signalling crane loading crew. Turns valves to force air through tuyeres into molten metal to oxidize impurities. Stirs molten metal with green poles to prevent copper from oxidizing. Skims slag from molten metal, using bar, rabble or ladle. Cleans slag from tuyeres to let air flow, using bar, hammer or pneumatic drill. Removes and inserts tapping plug, using sledge. Signals crane crew or uses electric hoist to position ladles or buckets near furnace, and moves levers to tilt furnace into pouring position. Assists in installing electrodes and furnace water cooling system. Taps furnace by punching hole in crust at furnace opening with bar and sledge hammer or air cylinder operated bar. Scrapes and chips slag, solidified metal, furnace lining and residue from furnace, using scraper, hammer and chisel or inserts pipe loaded with explosives inside furnace and sets off charge, using electric connection. Breaks condensers and defective retorts with sledge hammer for removal to crusher. Raps flues and dust catchers with bar to remove dust. See also definition for term title, 02- 160 HELPER (any ind.).

May open chute to fill car with dust removed from furnace. May be designated according to task performed; for example,
Furnace Puncher

8131-190 MIXER OPERATOR HELPER, MOLTEN METAL(iron & steel) DPT:666

mixer spotter.

GED: 2 SVP: 3 EC: I 3 5 6 7 PA: M 4 5

Assists in transferring molten metal from ladle car to mixer or open-hearth furnace for further processing:

Attaches electrical connections to ladle car and pushes controls to tilt car, or attaches hooks of crane to lugs on ladle and signals crane operator or mixer operator to tilt car and transfer molten metal from ladle car to mixer or open-hearth furnace. Chips off solidified slag from pouring spout and rim of ladle, using hammer and bar. Replaces ganister (refractory material used for protecting metal spout from

molten metal) on mixer or open-hearth furnace, using bar, hammer, shovel and gas torch. See also definition for term title, 02-160 HELPER (any ind.).

8131-194 BLAST-FURNACE-TAPPER HELPER(iron & steel; non-ferrous metal) DPT:687
blast-furnace-keeper helper; cinder snapper; clayman.
 GED: 2 SVP: 3 EC: 1 3 5 6 7 PA: H 3 4

Assists in tapping blast furnace:

Breaks slag from casting equipment, such as slag runners, iron troughs, gates and dams, using bar, hammer and shovel. Relines runners, troughs, gates and dams with refractory materials, such as fireclay, sand and coal dust. Cleans and loads clay gun for plugging taphole. Removes obstructions in runners during casting operations, using tong bar. Obtains sample of molten iron during cast, using spoon, and pours sample into test mould. Assists in changing tuyeres, cooler, cinder notches and blowpipes on blast furnace, using hand tools. Cleans dust, debris and solidified metal from blast furnace and casting area. Drills tapholes in furnace to draw molten metal, using pneumatic or electric drill. Assists in positioning splash plate in front of taphole. See also definition for term title, 02-160 HELPER (any ind.).

8131-198 HEATER, METAL, HELPER(any ind.) DPT:687
 GED: 2 SVP: 3 EC: 1 3 5 6 7 PA: M 4 7

Assists 8131-142 HEATER METAL (any ind.) in heating steel to specified rolling temperature in soaking-pit furnaces:

Ignites furnace burners, using torch. Turns valves and dampers of furnace to regulate heat. Assists in straightening and lancing buckles and pile ups in furnace, using bars and oxygen lance. Inspects dampers and sump pumps of furnace to ensure satisfactory operation. Reports operating mechanical or electrical malfunctions encountered in charging or reheating operations. Assists in general clean up. Observes condition and progress of slabs, billets or blooms in furnace. See also definition for term title, 02-160, HELPER (any ind.).

May perform miscellaneous duties such as, bending liners, sharpening bars, offsetting rams, raising and lowering charging doors and spraying refractory clay onto pit linings.

8131-202 OPEN-HEARTH-FURNACE WORKER(iron & steel) DPT:687
third helper.
 GED: 2 SVP: 3 EC: 1 3 5 6 7 PA: H 4

Performs any combination of the following tasks involved in operation of open-hearth furnaces:

Mixes and shovels refractory materials onto furnace bottom. Transports additives from bins to furnace, using wheelbarrow. Shovels additives into furnace and ladle. Cleans and reams furnace taphole and removes cold steel from pouring spout, using reaming tools and bar. Sprays slag with water hose. Moves controls to open and close furnace doors. Maintains tools and equipment used for furnace operations. Cleans floor and furnace areas. Operates hoist to position charging chute in front of furnace door. Delivers test samples of molten metal to laboratory.

8131-206 CUPOLA CHARGER(iron & steel) DPT:486
 GED: 2 SVP: 2 EC: 1 3 6 7 PA: M 4 6

Charges scrap or pig iron, coke, and limestone (flux) into cupola to melt metal for making iron castings:

Proportions materials following definite formula, varying materials according to orders of 8131-146 CUPOLA TENDER (iron & steel). Shovels materials into charging or weighing buckets. Weighs and wheels materials in buckets to door of cupola. Dumps iron, coke and limestone through charging door so that charge in cupola is in alternate layers. Cleans up spilled materials using broom and shovel.

May operate power-driven hopper, conveyor or crane to transfer materials from storage bins to weigh scale and cupola. May make minor repairs and adjustments to charging machine, using hand tools.

8131-210 FURNACE CHARGER(iron & steel) DPT:665
charger.
 GED: 2 SVP: 2 EC: 1 3 5 6 7 PA: M 4 5

Tends charging mechanism that moves steel shapes, such as blooms, billets or ingots in specified sequence through soaking pit furnace:

Signals crane operator to position steel on furnace skids or conveyor rollers. Moves control levers on panel to advance steel to furnace and to align and load steel into furnace. Observes inside of furnace as projected on television screen or through observation port and moves controls to spot steel in specified locations. Moves controls to discharge steel onto mill rollers. Assists other workers to free blooms and billets stuck on roller line or in furnace and in cleaning furnace bottoms and repairing or replacing defective equipment, using bars, and other hand tools.

8131-299 OTHER METAL SMELTING, CONVERTING AND REFINING FURNACEMEN

This group includes occupations, not elsewhere classified; for example, those who tend charging and discharging mechanisms to move ingots, billets or blooms into and out of heating furnace, preparatory to rolling, drawing or extruding process; smelt Indium concentrate and cast purified metal into anodes to recover Indium by electrolysis; test temperature of molten iron in furnaces to determine pouring time, using optical or thermocouple pyrometers; skim slag from surface of copper in reverberatory furnaces to burn oxygen and prevent oxidation; and heat steel rods preparatory to forging boat or track spikes. Typical examples of occupational titles covered by this residual group definition are:

Billet Pusher(iron & steel; non-ferrous metal)
 Indium Recovery Operator(non-ferrous metal)
 Pyrometer Man(iron & steel)
 Reverberatory-Furnace Skimmer(non-ferrous metal)
 Spike-Machine Heater(iron & steel)

8133-METAL HEAT-TREATING OCCUPATIONS

This unit group includes occupations concerned with altering the physical properties of metals or metal objects by heating, cooling or chemically treating, to anneal, harden, temper or relieve internal stresses. Occupations concerned with annealing, hardening or tempering, as incidental tasks, are classified in more appropriate unit groups where their primary functions are emphasized.

8133-110 FLAME-HARDENING-MACHINE SET-UP MAN(mach., weld. & forg.) DPT:480
 GED: 4 SVP: 6 EC: 1 3 5 7 PA: M 3 4 7

Sets up battery of machines which harden or anneal metal objects, by conveying them between rows of gas flames:

Mounts workpiece in fixture, or on arbor, or between centers of machine. Determines flame temperature and heating time cycle according to degree of hardness or annealing required, and metal to be treated. Moves controls to light burners and adjust flame of oxyacetylene, propane, or other gas to prescribed temperature, judging temperature by flame colour. Turns valves to regulate flow of coolant water. Turns setscrews in nozzles to direct flames against specific area of object. Starts automatic feeding or rotating mechanism which moves part through flame. Tests hardness of sample part. Adjusts automatic feeding or rotating mechanism and flame temperature until sample parts meet specifications.

May examine objects under microscope to determine grain size of annealed object. May position and fasten fixture for holding work-piece in machine, using wrenches. May operate flame-hardening or flame-annealing machines as part of regular duties and be designated accordingly; for example,

Flame-Annealing-Machine Set-Up Man

8133-114 HEAT TREATER, ALL ROUND(mach., weld. & forg.) DPT:662
heat-treat operator.
GED: 3 SVP: 6 EC: I 3 5 6 7 PA: M 4 7

Controls one or more heat-treating furnaces and quenching equipment to alter physical and chemical properties of different types of metal objects or parts by methods of controlled heating and cooling, such as hardening, tempering, annealing, case hardening and normalizing:

Determines temperature and time of heating cycle and type and temperature of quenching medium to attain specified hardness, toughness and ductility of metal, using standard heat-treating charts, knowledge of heat-treating methods, equipment and properties of metals. Operates oil, electric, electronic induction, or gas furnaces to heat-treat metal objects, using any of the following methods. 1. Relieves internal stresses, softens and refines grain structure in metals [8133-126 ANNEALER (mach., weld. & forg.)]. 2. Hardens surface of steel objects by carbonizing or immersing in chemicals during heat process and then quenching. [8133-134 CASE HARDENER (mach., weld. & forg.)]. 3. Hardens metal objects by heating and quenching methods, [8133-138 HARDENER (mach., weld. & forg.)]. 4. Imparts toughness and removes strains and brittleness by heating previously hardened metal and by controlled quenching sequence, [8133-142 TEMPERER (mach., weld. & forg.)]. Adjusts furnace controls, observing pyrometer, to bring metal to prescribed temperature. Places items to be heat-treated in racks, trays or baskets and places them on conveyor or loads them directly into furnace. Observes dials and checks controls to ascertain correct functioning of heat-treat equipment during operation. Removes items after prescribed time and quenches in water, oil, brine or other bath, or allows metal to cool slowly. Maintains temperature and strength of quenching media. May test hardness of metal objects treated. May set up and operate die-quenching machine to prevent metal objects from warping during quenching. May direct other workers in slinging loads, loading and unloading metal parts or products and in maintaining heat-treating equipment and work area.

8133-118 INDUCTION-MACHINE SET-UP MAN(mach., weld. & forg.) DPT:480
GED: 3 SVP: 5 EC: I 6 7 PA: M 4 7

Sets up variety of induction machines to harden, braze, anneal or sinter metal objects according to specifications:

Determines frequency of current, time cycle, and induction heating coil required for each job according to work order specifications, knowledge of heat-treating methods and properties of metals. Fastens induction coil and fixture on machine, using wrenches. Positions or fastens part in fixture, and starts machine to harden, braze, anneal or sinter sample part. Tests hardness of sample using hardness tester. Adjusts controls to set frequency of current and automatic timer, judging from colour whether part is heated to specified temperature.

May operate induction machine as part of regular duties, such as vacuum induction or hydrogen atmosphere electric furnaces to pre-sinter or sinter carbide blanks.

8133-122 QUENCHING-UNIT OPERATOR(mach., weld. & forg.) DPT:482
GED: 3 SVP: 5 EC: I 3 4 5 6 PA: M 4

Operates cooling equipment to quench hot metal parts, such as pipes, rods or bars, with water;

Sets stops and guides of quenching unit according to length of parts to be soaked, using wrenches. Adjusts eject'arms and pump orifice according to diameter of material, using wrenches and pliers. Sets electric controls of conveyors, eject arms, pumping unit and drainage lift to synchronize transfer and quenching of hot metal. Pushes buttons on control panel to start or stop automatic quenching operation. Observes operation to detect malfunctions, and operates controls manually to quench metal in event of failure of automatic system. Records information such as quantity, grade, size, wall thickness, time and amount of scrap.

8133-126 ANNEALER(mach., weld. & forg.) DPT:582
annealing-furnace operator; conditioning-furnace operator; normalizer.
GED: 3 SVP: 5 EC: I 3 5 6 PA: M 4 7

Controls furnace to heat metal objects to relieve stresses and to soften and refine grain structure:

Charges metal objects directly onto furnace bed or places them on trays, pallets, conveyor or furnace-charger mounted on steel wheels and tracks. Regulates gas and air flow to furnace and ignites burners in specified sequence. Adjusts furnace temperature, observing pyrometer, to heat metal to specified temperature. Sets speed of conveyor for prescribed time cycle or records time that metal is to be removed from furnace. Reduces heat and allows objects to cool slowly in furnace or removes objects from furnace and allows them to cool in open air. Maintains production records of materials treated.

May use specific quenching procedure for cooling when annealing non-ferrous metals. May operate continuous furnace through which objects are passed by means of reels and conveyors and be designated accordingly,
Continuous-Annealing Furnace Operator

8133-130 SOAKING-PIT-FURNACE OPERATOR(mach., weld. & forg.) DPT:562
GED: 3 SVP: 4 EC: I 3 5 6 7 PA: S 4 7

Operates furnace that treats ferrous and non-ferrous metals to specified temperature for rolling, processing or stress relieving:

Sets furnace controls to regulate and maintain temperature between specified limits, manually turning rheostat control knobs. Starts conveyors and opens furnace doors to admit materials, pressing buttons, or signals crane operator to uncover soaking pits and lower materials into them. Measures temperature of product to determine necessity for adjusting furnace temperature or timing cycle, using thermal measuring instruments and charts. Observes pyrometer and adjusts controls to maintain temperature at required level. Removes treated parts from furnace, using crane, or signals crane operator to transfer material to next station. Records time and production data for office control purposes.

May operate roll traverse wheel to process hot slabs, plates or ingots.

8133-134 CASE HARDENER(mach., weld. & forg.) DPT:682
GED: 3 SVP: 4 EC: I 3 5 6 7 PA: M 3 4 7

Controls furnace to impart hard skin and tough, ductile core to steel parts, using one of the following methods:

1. Places parts in wire baskets and immerses them in heated chemical bath such as sodium or potassium cyanide (cyaniding). 2. Packs parts in metal boxes filled with carbonaceous material such as, coke, coal, bone, charcoal, or barium carbonate and charges boxes into furnace (carbonizing). 3. Places parts in racks or trays, charges them into furnace and opens valves to circulate carbon rich gas, such as methane, around parts during heating process (nitriding). Adjusts furnace temperature, observing pyrometer, to heat metal to prescribed temperature. Removes steel parts from furnace after prescribed time cycle and quenches them in oil, water or brine, or allows them to cool to predetermined temperature before quenching, depending on metal properties specified.

May test hardness of parts. May degrease or remove scale from treated parts. May be designated according to process used; for example,
Carbonizer
Cyanider
Nitrider

8133-138 HARDENER(mach., weld. & forg.) DPT:682
GED: 3 SVP: 4 EC: I 3 5 6 7 PA: M 3 4 7

Operates furnace to harden metals and alloys throughout:

Places parts in racks, trays, or baskets and places them on conveyor or loads them directly into furnace. Controls furnace to harden metal objects such as axheads, knife blades, springs, tools and dies. Heats the objects to specified temperature, and quenches them in oil, water, brine or blast of cold air, depending on the limit of hardness of the metal or alloy, to attain certain hardness throughout.

May harden rail ends, using portable electric heater and air quencher. May test hardness of metal objects by means of special instruments. May be designated according to object hardened.

8133-142 TEMPERER(mach., weld. & forg.) DPT:682
GED: 3 SVP: 4 EC: I 3 6 7 PA: M 4 7

Controls furnace to temper metal articles to specifications:

Places previously quenched and hardened metal articles in racks, trays or baskets or loads them directly into furnace. Adjusts furnace temperature, observing pyrometer, to heat metal to specified temperature. Removes metal articles after prescribed time and tempers them by controlled quenching, using brine, water, oil, molten lead, or blast of cold air, as media to remove previously imparted quenching strains and brittleness and to impart toughness to metal.

May temper coil springs by heating, quenching and shot-peening (bombarding surface with steel shots). May retemper automobile springs and apply wax coating for rust proofing.

8133-146 METAL BLUER(mach., weld. & forg.) DPT:685
GED: 3 SVP: 3 EC: I 3 5 6 7 PA: M 4 7

Tends gas furnace that heats metal parts or products to impart blue surface to rust proof and give decorative non-reflecting finish:

Places parts on conveyor or loads them directly into furnace, and covers them with bone chips or chemicals. Closes furnace door and regulates gas valve to adjust furnace temperature. Observes gauge on control panel to ensure prescribed temperature is obtained to heat metal. Sets conveyor speed for prescribed time cycle or removes parts from furnace after specified time. Cools parts in bin or on cooling table. Examines blued metal to determine if shade and colour conform to specifications. Sorts products by type and size and packs them in containers. Cleans blued parts in tumbler machine, using sawdust and cleaning compound, or blows oil and chips from blued parts, using air hose.

May weigh packaged products.

8133-150 FLAME-HARDENING-MACHINE TENDER(mach., weld. & forg.) DPT:685
GED: 2 SVP: 3 EC: I 5 6 7 PA: M 4

Tends flame-hardening machine to case-harden metal objects:

Positions and fastens part in fixture, on arbor, or between centers of machine. Presses button on control panel to light burners which direct flames against part, or lights burners manually, and starts automatic feeding or spinning mechanism. Observes machine operation and removes finished part.

May be designated according to part annealed; for example, Flame-Annealing-Machine Tender

8133-154 INDUCTION-MACHINE TENDER(mach., weld. & forg.) DPT:685
GED: 2 SVP: 3 EC: I 5 6 7 PA: M 4

Tends electronic induction machine, according to set procedures, to harden, braze or anneal metal objects:

Positions and fastens part in fixture of machine to ensure it is clamped firmly. Presses button on control panel to start current flowing through induction coil to heat part for prescribed time. Tests parts for hardness using pre-set hardness testing equipment.

May load automatic machine by dumping parts into hopper. May change induction coils in machine according to size and shape of workpiece, using hand tools. May adjust dial on variable transformer to compensate for variations in line voltage.

8133-158 JEWELLERY ANNEALER(jewellery & precious metal prod.) DPT:685
GED: 2 SVP: 3 EC: I 3 6 7 PA: L 4 7

Softens jewellery parts for further processing by heat-treating in electric or gas furnace:

Sets automatic controls to specified temperature. Fills steel tray with fittings and places tray in oven, using tongs, or loads belt with fittings and starts oven conveyor. Removes tray or unloads belt after specified time and immerses fittings in water. Pickles, rinses and scrubs fittings to remove oxide and scale by immersing them in chemical and water baths.

May restore malleability to ingots of gold, silver and other metals by heating ingots with bunsen burner or torch and immersing them in alcohol.

8133-162 HEAT-TREATER HELPER(mach., weld. & forg.) DPT:666

furnace feeder; furnace loader.

GED: 2 SVP: 2 EC: I 3 5 6 7 PA: M 4

Helps, 8133-114 HEAT TREATER, ALL ROUND (mach., weld. & forg.) in annealing, hardening, or tempering metal objects, by performing any combination of the following duties:

Cleans foreign matter such as scale, rust, or grease, from metal objects, using solvents and wire scrapers. Hangs parts on racks, hooks, or fixture, or places them on handtrucks or conveyors, and charges them into furnace manually or using hoist. Adjusts controls as directed by, 8133-114 HEAT TREATER, ALL ROUND (mach., weld. & forg.) to maintain specified temperature in furnace. Assists in filling, draining and cleaning quenching tanks. Marks or tags parts for identification. See also definition for term title, 02-160 HELPER (any ind.).

May be designated according to heat-treat process performed; for example, Annealer Helper

8133-166 RIVET HEATER(any ind.) DPT:685
GED: 2 SVP: 2 EC: I 3 5 6 7 PA: L 4 7

Tends furnace that heats rivets to specified temperature:

Places specified rivets in gas, oil or coke furnace, or between electrodes in electric furnace. Turns knobs to regulate heat or current of furnace. Removes rivets from furnace when colour indicates they are heated to specified temperature, and throws them to another worker or places them in receptacle, using tongs.

May tend portable coke or electric heating equipment to heat rivets in field. May be designated according to type of furnace tended; for example, Rivet Heater, Electric Rivet Heater, Gas

8133-199 OTHER METAL HEAT-TREATING OCCUPATIONS

This group includes METAL HEAT-TREATERS not elsewhere classified; for example, those who operate furnaces to evenly heat and cool non-ferrous metal ingots to produce homogenized metal; operate furnaces that blacken aperture masks and rings used in colour picture tubes; set up and operate portable heat-treating equipment to relieve stress in fabricated metal components of boilers; and submit bars used in large electrical coils to a vacuum heat-treating process. Typical examples of occupational titles covered by this residual group definition are:

Homogenizing-Furnace Operator(non-ferrous metal)
Steam-Blackening-Furnace Operator(electronic equip.)
Stress Reliever(struct., plate & ornam. metal)
Vacuum Heat Treater(electric. equip.)

8135-METAL ROLLING OCCUPATIONS

This unit group includes occupations concerned with shaping, reducing the cross-sectional area, and elongating metal pieces by passing them between smooth-surfaced or grooved rotating rolls which exert a continuous compressive force. Includes direct metal rolling support activities and occupations concerned with rolling wire from billets and rods.

8135-110 ROLLING ATTENDANT(iron & steel) DPT:362
GED: 4 SVP: 6 EC: I PA: L 4 5 6 7

Operates electronic devices and equipment (console), to control rolling operations of rolling mill, which reduces steel billets, ingots or slabs into products of specified size, shape and gauge:

Selects prepunched schedule cards for section to be rolled and feeds into card reader. Activates card reader memory bank which interprets schedule card information and stores data in storage unit for response to electronic signal in rolling cycle. Sets selector switches of console for automatic operation of electronic equipment, roll stands, and auxiliary equipment. Moves console controls to advance steel from approach table to mill entry table and through complete rolling cycle automatically, to reduce steel products to specified shape, size, and gauge. Observes from control pulpit rolling irregularities in ingot, such as

pipe, split end, or heat loss, and notifies other worker through intercom system to shear defective parts. Observes rolling operations, dial and coloured light indicators, and other gauges, and manipulates control levers and switches to adjust roll draft, alignment, or mill speed, to correct rolling and tolerance deviations or drift. Stops automated mill and changes to manual control operations on breakdown or failure of electronic or mill equipment. Assists or directs mill crew in setup, roll change, maintenance, and adjustment of mill and auxiliary equipment.

May make adjustments or minor repairs to electronic control equipment or devices.

8135-114 HOT-STEEL ROLLER(iron & steel) DPT:462
hot-mill roller.

GED: 3 SVP: 7 EC: I 5 PA: L 4 5 6 7

Operates primary mill to roll hot steel ingots into blooms, slabs, billets, or beam blanks, following rolling orders and using knowledge of steel properties and rolling practices:

Reads rolling order to determine setup, rolling sequences, number of passes required, and draft (space between rolls) for each pass. Sets clearances on guides and rolls, using wrenches and measuring instruments, and starts mill to roll sample ingot. Measures sample for dimensional conformance to specifications, using calipers, tape, and level. Moves levers to regulate draft, as shown by dial indicator, and to control movement of conveyors, water sprays, and mill tables for each pass. Signals soaking pit personnel for ingots as needed. Observes colour of ingot to determine if specified rolling temperature has been attained. Gives directions to workers in duties, such as changing rolls, regulating speed of conveyors, and turning ingots, to obtain product of specified size, shape and quality.

May direct shearing and rolling of blooms into billets and cooling of billets. May be designated according to type of mill operated; for example, Roller, Billet Mill
Roller, Blooming Mill
Roller, Slabbing Mill

8135-118 ROLL SETTER(iron & steel) DPT:460
roll-pipe setter; roll-tube setter.

GED: 3 SVP: 6 EC: I 3 5 6 7 PA: H 3 4 5 7

Installs and adjusts rolls on sizing, forming, and welding mill to produce pipe or tube of specified outside diameter:

Reads mill schedule to determine size of product to be produced. Selects and installs rolls on mill, using hand tools. Signals crane operator or uses hoist, to remove previous sizing mill from rolling line, and positions replacement mill on line. Sets and adjusts bolts and stops to position rolls on mill, using wrenches and bars. Sets controls to regulate speed of mill. Starts machine and runs mill to produce sample of tube or pipe. Measures outside diameter of rolled product to determine conformance to specifications, using calipers. Inspects product for defects such as scratches, cracks and pits. Adjusts rolls to obtain product of specified dimensions, using hand tools. Disassembles sizing mills removed from rolling line, and stores parts.

8135-122 ROLLING-MILL OPERATOR(non-ferrous metal) DPT:462

GED: 3 SVP: 6 EC: I 5 6 7 PA: M 4 5 7

Operates rolling mill to shape or reduce non-ferrous metal billets, slabs or blooms into plates, sheets, foil, flatwire, and rods of specified dimensions:

Reads rolling order to determine setup and work sequence. Calculates draft (space between rolls) and roll speed to flatten metal to specified dimensions. Adjusts rollers, buffs, and guides, according to size and dimension of workpiece, using screwdriver, micrometer, steel tape and hand tools. Turns valves and observes gauges to regulate flow, temperature, and solution of roll lubricants and metal coolants. Starts entry or roll off tables that feed metal to and from rolls. Starts mill to roll test piece, and adjusts roll tension screws, hydraulic sprays and mill speed to equalize load and obtain product of specified dimensions and finish. Threads sheet on rod through rolls for further reduction, or signals assistant to feed separate sheets or rods through rolls. Inspects first piece for variation from rolling or length specifications. Starts mill for automatic operation, and moves controls to synchronize flow of metal with tandem operations. Examines metal for surface defects; such as, cracks, scratches, curling, splitting or buckling. Measures width and gauge of rolled metal using linear tape and depth gauge.

May set trigger mechanism that activates cut-off die to specified length, by setting and tightening setscrews. May direct other workers in changing rolls, loading and unloading operations. May be designated according to type of machine operated; for example, Reversing-Mill Roller
Tandem-Mill Roller

8135-126 ROUGHING-MILL OPERATOR(iron & steel; non-ferrous metal) DPT:462
bulldogger; rougher.

GED: 3 SVP: 6 EC: I 3 5 7 PA: M 4 5 7

Operates roughing mill roll stands to reduce billets, blooms and slabs to specified dimensions, using knowledge of rolling practices and metal properties:

Reads rolling order to determine setup specifications. Installs rolling equipment; such as, roll stands, guides, bar turners and repeaters on rolling line to obtain appropriate alignment and specified thickness, using hand tools, bars, levers, gauges and sledges. Moves controls to maintain rigidity, and set specified draft between rolls at each stand and pass. Regulates coolant flow, and repairs or adjusts thickness guides, using keys, hammer and calipers. Examines product passing through mill for surface defects, such as scratches and cracks. Verifies gauge of product after each pass, using calipers. Lubricates repeaters and washes screens and filters to remove oxidation and impurities, using oil can and water hose. Gives directives to mill crew in readjusting roll draft and relining guides.

May observe colour of heated metal to determine rolling temperature and start roughing stands. May be designated according to type of mill operated; for example, Rougher, Bar Mill
Rougher, Hot-Strip Mill

8135-130 COLD-STEEL ROLLER(iron & steel) DPT:482
cold-mill operator.

GED: 3 SVP: 6 EC: I 5 6 PA: M 4 5 6

Operates rolling mill to flatten and reduce gauge of cold steel strip and sheet, according to rolling orders and using measuring instruments:

Reads rolling order to determine setup and work sequence. Turns controls to adjust roll speed, draft, and tension of strip between reels of coiling mechanism. Installs guides, guards and cooling equipment in stands, using hand tools. Starts mill to roll test piece and adjusts roll screws, hydraulic sprays and mill speeds. Moves controls to start production rolling of steel strip. Examines steel for surface defects, such as cracks, scratches and pits. Verifies dimensions of metal for conformance to specifications, using micrometers, thickness gauges, and measuring tape.

May observe flattening process and press buttons to roll metal sheet back after each pass and close pressure rollers accordingly. May calculate space between rolls and roll speed for each mill stand to roll strip to specified dimensions. May direct and signal operator of crane to load rolled sheet on machine apron. May operate mill to temper steel strip and be designated accordingly; for example, Temper-Mill Roller

8135-134 FINISHER(iron & steel) DPT:482

GED: 3 SVP: 6 EC: I 3 5 6 7 PA: M 4 7

Operates roll stands in finishing mill to roll steel objects, such as strips, bars and flats to specified gauge, shape and finish:

Reads rolling order to determine setup specifications. Installs guides on stands, using wrenches, bars and sledges. Grinds guides to obtain specified fit, using portable power grinder. Moves controls and observes dial-indicators and gauges to set roll draft, adjust guides and align material with mill rolls. Observes material leaving leading stand and adjusts controls to obtain specified flatness and straightness, and to eliminate defects, such as cracks and scratches. Measures strip or bar being produced to ensure conformance to specifications, using fixed gauges. Adjusts roll draft when bell signal or fixed gauge indicate material is being rolled off gauge. Assists and directs crew in roll changes and removing or cutting jams from mill.

May catch steel as it leaves lead rolls, using tongs, and feed it into finishing stand, or start carriage that automatically feeds steel into finish rollers. May be designated according to type of product processed; for example, Finisher, Bar
Finisher, Hot Strip

8135-138 SPEED OPERATOR(iron & steel) DPT:462
speed regulator.
 GED: 3 SVP: 5 EC: I 5 PA: L 4 5 7

Operates equipment from raised platform of rolling mill to start, stop, and regulate speed of rolls, rollers, conveyors, and edgers to reduce gauge of steel slabs and billets:

Turns master switch and motor-breaker switches to build up voltage of mill motors. Moves levers and switches to set specified roll speeds at each roll stand and signals furnace crew to release slab or billet onto entry conveyor. Observes gauges, tachometers, and products being rolled to determine if specified roll speed, motor load, and tension on product are being maintained. Adjusts controls to regulate rolling speed to prevent looping, warping, or over stretching of product as gauge and temperature of product are reduced and roll draft is changed. Stops motors to shut down mill for repairs or roll changes.

8135-142 PIERCING-MILL OPERATOR(iron & steel; non-ferrous metal) DPT:482
 GED: 3 SVP: 5 EC: I 3 5 7 PA: M 4 7

Operates equipment to pierce billets lengthwise, or shape and enlarge inside diameter of metal tubes:

Selects, positions and adjusts piercing rolls which rotate and shape outside of tube and force center of billet into piercing mandrel, using hoists, wrenches, and measuring instruments. Attaches specified piercing point to arbor to form and control size of internal diameter of tube. Adjusts feed guides, stops, tailstock, and arbor rings, according to size of workpiece, using hand tools. Moves levers and presses buttons to drop hot billet from conveyor into trough and ram it along trough into rollers and into piercing point. Moves controls to withdraw piercing mandrel from billet, and to activate kick-out that drops billet or shells on conveyor for further processing. Measures finished workpiece to verify conformance to specifications, using calipers, fixed gauges and micrometers.

May be designated according to material worked on, or machine operated; for example,

Copper-Billet Piercer(non-ferrous metal)

Seamless-Steel Billet Piercer(iron & steel)

8135-146 ROLLER, SEAMLESS TUBE(iron & steel) DPT:482
plug-mill operator; tube roller.
 GED: 3 SVP: 5 EC: I 5 7 PA: M 4 7

Sets up and operates machine to form seamless tubing from pierced steel billets:

Installs series of rollers to form specified outside diameter of tubing. Installs plug onto mandrel to form specified inside diameter of tubing. Starts machine and moves levers to push billet into first set of rollers that force billet over plug and into following series of rollers to reduce or expand billet to tubing of required dimensions. Inspects product to ensure conformance to specifications, using micrometers and fixed gauges.

8135-150 SCREWDOWN OPERATOR(iron & steel; non-ferrous metal) DPT:482
roll spacer.
 GED: 3 SVP: 5 EC: I 3 5 7 PA: M 4 7

Operates electric-screwdown mechanism on reversing rolling mill to set draft (space between rolls) for reducing slabs, ingots or billets to specified thickness, using knowledge of rolling practices and metal properties:

Reads rolling order for dimensions, properties and temperature of product to be rolled. Determines, from experience, and size and grade of product, number of passes and amount of reduction on each pass required to reduce product to specifications. Moves controls to set rolls for each pass according to draft reading on dial indicator. Activates sprays with foot pedal. Inspects, gauges and adjusts rolls to ensure conformance to specifications and to eliminate defects, such as cracks and scratches. Performs other duties, such as assisting in or directing roll changes and repairing or adjusting mill equipment.

8135-154 STRAIGHTENING-ROLL OPERATOR(any ind.) DPT:482
mangle-roll operator.
 GED: 3 SVP: 5 EC: I 5 PA: M 4 7

Operates rolling machines to straighten warped or bent metal tubes, plates, bars, rods or sheets:

Places workpiece on reel or loading-platform of machine, and threads end between rolls, manually or with crane. Removes, replaces and adjusts guides and adjusts angle of feed rollers, using hand tools. Sets rheostat to desired roller speed. Turns handwheels or nuts to adjust tension between one or more sets of aligned drive and adjustment rolls. Coats workpiece with light oil to prevent scratching of surface. Pushes button or pulls lever to move workpiece through rolls of machine. Hammers or pries workpiece into alignment, using hammer or pry bar. Inspects workpiece for straightness and handling marks, visually, and using straightedge, micrometer, vernier, feeler gauge and angle gauge. Inserts shims under bulges and repeats process to straighten workpiece to specifications.

May operate automatic clipper or shear to cut workpieces into specified lengths. May be designated according to product straightened; for example,

Bar-Straightening-Machine Operator

Plate Roller

Tube Straightener

Wire-Straightening-Machine Operator

8135-158 GUIDE SETTER(iron & steel) DPT:484
 GED: 3 SVP: 5 EC: I 3 5 6 7 PA: M 2 4 7

Installs and adjusts guides, rolls, and passes on stands of rolling mill, according to job specifications, using hand tools:

Determines installation procedure from rolling specifications, product dimensions, and section of mill to be used for rolling product. Assembles or assists other workers to assemble roll stands, using hammers, wedges, wrenches, and pry bars. Installs and adjusts guides on stands to control passage of product through roll passes, using hand tools. Disassembles previously installed roll stands on mill and installs and aligns new roll stands, using blocks and wedges. Sorts and stores rollers and guides from disassembled stands. Observes guides during rolling to determine if they are functioning according to specifications and adjusts guides to obtain specified performance.

May assist in removing cobbles, blisters or puffiness during rolling operation. May perform final grinding on guides used on rolling stand, to ensure adherence to specifications, using portable grinders.

8135-160 SCALPING OPERATOR(non-ferrous metal) DPT:662
 GED: 3 SVP: 5 EC: I 5 7 PA: M 4 5 6 7

Operates scalping mill to remove oxidation and defects from surface of billets or ingots, preparatory to rolling:

Adjusts scalper blades to depth of cut required and positions holding jaws to width of ingot or billet, using handwheel, setscrews and hand tools. Turns valve to pressurize miller oil cooling system. Lifts metal from skid to entry table, using hoist. Starts lifting table that positions billet or ingot in jaws of machine carriage. Starts machine to make first cut. Releases billet or ingot from carriage and reverses it, using roller manipulators. Repositions metal in carriage for second cut, using button controls. Observes scalped surface to ascertain whether further scalping is required. Stacks scalped metal on skid, using hoist.

8135-162 STEAM-CONTROL OPERATOR(iron & steel; non-ferrous metal) DPT:682
reversing-mill operator.
 GED: 3 SVP: 5 EC: I 5 PA: L 4 7

Operates steam engine to control single-stand reversing mill and auxiliary equipment to roll heated ingots into blooms, slabs, and billets:

Moves controls, hydraulic levers and switches, to regulate speed, forward and reverse motion of horizontal and vertical rolls, air compressor, water and oil pumps. Observes meters and gauges to determine proper functioning of engine. Adjusts valves, throttles, and switches to ensure specified performance of engine.

May perform repairs; such as, changing cylinders, piston rods, rings and bearings, using mechanic's hand tools.

**8135-164 UTILITY MAN, ROLLING MILL(iron & steel;
non-ferrous metal; wire prod.) DPT:684**
GED: 3 SVP: 5 EC: I 5 6 PA: M 3 4 7

Prepares rolling mill for rolling rods, bars, rounds, flats and wire, performing any combination of the following duties:

Assembles stands, rolls, guides and rest bars of rolling mill, using hammers and wrenches. Installs repeaters or tables on rolling line, using hand tools. Grinds surface of repeater guides to ensure smooth passage of steel or drawn wire through mill, using portable grinder. Sorts and stores guides, tools and other mill equipment. Assists machine operators to set up spooling or recoiling equipment for complex or special products.

May cut scrap to charging box size, using scrap shear or torch. May hook crane slings to rolls, mill equipment, scrap or charging boxes, and signal crane operator to position load in specified areas. May remove billets, slabs or ingots piled up in furnace, using rake or tongs and chain.

8135-166 REELING-MACHINE OPERATOR(iron & steel) DPT:482
GED: 3 SVP: 4 EC: I 5 7 PA: M 4

Operates reeling machine to round out and burnish inside and outside surfaces of seamless steel tubes:

Sets distance between rolls according to size of pipe shell, and positions mandrel support bar between rolls. Installs specified plug on mandrel. Moves controls to push tube along conveyor, through stationary guides, and into rotating rolls that force tube over mandrel. Turns handwheel or moves lever to maintain roll pressure on pipe shell, to smooth surfaces and to round out tube to specified diameter and gauge. Checks dimensions of plug to ensure correct size of pipe, using calipers and rule. Pushes button to activate knockout mechanism to position reeled pipe for next operation.

8135-170 COILER OPERATOR(iron and steel) DPT:682
GED: 3 SVP: 4 EC: I 3 5 PA: M 4

Operates high speed equipment to wind steel strip into coils as strip emerges from rolling mill or continuous annealing, pickling, or tempering lines:

Moves controls or levers to synchronize coiling machine speed and action of machine guides, gates and rolls with feed tables and conveyors, or rolling mills. Examines strip surface for scale, weld defects, and specified oil coating. Moves controls to transfer coils onto conveyor for automatic bundling and piling.

May cut strip into specified lengths. May cut defects from strip, and cut excess metal from weld, using power shear and weld notcher.

**8135-174 JEWELLERY STRIP ROLLER(jewellery & precious
metal prod.) DPT:682**
GED: 3 SVP: 4 EC: I 6 PA: L 4 7

Operates rolling machine to roll ingots into metal strips for use in stamping out jewellery blanks:

Positions ingot between pressure rollers. Observes calibrated scale indicator and turns handwheel to set distance between rollers. Moves lever to start machine, and readjusts pressure rollers as needed to reduce ingots to strips of specified thickness. Verifies thickness of strips, using micrometer. Cleans rolls as required.

May anneal ingot to soften metal for further rolling. May set up and operate equipment to slit, flatten, coil, shear or trim strips of metal.

8135-178 MANIPULATOR(iron & steel) DPT:684
GED: 3 SVP: 4 EC: I PA: L 4 7

Operates manipulator and entry guide mechanism from raised platform of rolling mill to position ingots or blooms for entry into rolls of mill:

Moves levers to transfer ingot from entrance table onto entrance conveyor, and to align side guards that guide ingot into rolls. Observes rolling process and pushes controls that cause fingers of manipulator to turn ingot after each pass. Assists rolling mill crew in roll changes and repairs, using hand tools.

May assist in making adjustments and in setting-up slabbing mill.

8135-182 ROUGHING-TABLE TENDER(iron & steel) DPT:685
GED: 3 SVP: 4 EC: I 3 5 6 7 PA: M 4 7

Tends conveyor and stationary table to feed steel blooms, billets, and slabs to rolls for successive passes through roll stands:

Moves levers to position tilting tables in front and rear of roll stand and align steel with roll guides preparatory to feeding steel into rolls, or operates control buttons and pneumatic valve to start and stop drive mechanisms and to open and close guides that feed and guide billets into roughing mill. Starts table rollers that feed steel into rolls for specified number of passes. Aids other workers in making roll changes and adjusting equipment.

May be designated according to type of table operated; for example, Delivery-Table Tender
Tilting-Table Tender

8135-186 TUBING-MACHINE TENDER(iron & steel; non-ferrous metal) DPT:685
GED: 3 SVP: 4 EC: I 5 PA: M 4 7

Tends machine that rolls metal ribbon into coils and solders seams of coils to form conduit tubing:

Mounts reel of brass, copper, or steel ribbon and reel of soldering wire on machine. Changes dies according to size of tubing required, using hand tools. Feeds metal ribbon and soldering wire into machine. Starts machine that pulls metal ribbon through series of dies to form coil, joins flanged edges of coil, and solders seams of tubing. Measures diameter of tube, using fixed gauge. Removes empty reels from machine.

8135-188 INGOT-BUGGY DRIVER(iron & steel) DPT:683
ingot-buggy-and-cover operator; rail-tractor operator.
GED: 2 SVP: 4 EC: I 3 5 7 PA: L 4 7

Drives electric car mounted on rails to transport ingots and slabs from soaking pits to rolling mill:

Moves lever controls, in response to arm or buzzer signals, to open and close pit covers and to position car for receiving material from soaking pit. Moves lever to start and drive car to mill approach- conveyor-table. Pulls lever to raise tilting cradle of car and deposit material on table.

May keep records of ingots charged and withdrawn. May operate car by remote control from pulpit.

8135-190 ROLLING-MILL OPERATOR HELPER(iron & steel; non-ferrous metal) DPT:685
GED: 2 SVP: 4 EC: I 3 5 7 PA: M 3 4 7

Performs the following duties in rolling metal ingots, billets and bars into plates, tubes, sheets and rods:

Guides, pulls or turns metal rods, ingots or billets on conveyor or tables to, from and through rolls of tube or rod rolling machines, using tongs, overhead cranes, or automatic handling devices. Feeds sheets or plates into carriage or table of rolling machines. Cuts off jagged edges of sheet, using hand or machine shears, and flattens leading edge of sheet with mallet or machine flattener. Tends equipment to return metal to entry side of mill for rerolling, to feed or offbear coils of metal, and extend coils into rollers of mill. Cleans jams, using pry bar, and adjusts guides, using hand tools. Observes rolled metal for defects, such as tears and cracks. Measures dimensions of rolled stock using linear rule and micrometer. See also definition for term title, 02-160 HELPER (any ind.).

May check temperature of heated ingots or billets, using pyrometer. May transfer empty furnace cars to the loading end of furnace, manually. May remove dummy blocks from extruded billet or ingot butts, hammering blocks out, using sledge hammer and dumping recovered block onto table conveyor. May be designated according to product rolled; for example,

Foil Roller Helper(non-ferrous metal)
Sheet Roller Helper(non-ferrous metal)
Tube Roller Helper

8135-194 CATCHER(iron & steel) DPT:684
bar catcher; tongman.
 GED: 2 SVP: 3 EC: I 3 5 6 PA: M 4 7

Guides hot steel shapes, such as bars, rods, and sheets, from one set of rolls to another:

Catches end of hot steel with tongs as it comes through first set of rolls and feeds end into next set. Assists in setting and adjusting repeaters, guides and rollers, using hand tools.

May measure length of bars and plates, using scale, and notify 8135-114 HOT-STEEL ROLLER (iron & steel) of deviations from specifications and of defects in material.

8135-198 PLUGGER(iron & steel) DPT:684
piercer plugger.
 GED: 2 SVP: 3 EC: I 3 5 6 7 PA: VH 4

Replaces plugs used to form inside diameter of seamless tubing in rolling mill machines:

Positions plug in trough of rolling mill, or screws specified plug on end of rolling-mill mandrel, preparatory to forming tube, using tongs or hoist. Removes hot plug with tongs, after tube has been rolled. Immerses hot plug in bosh tank for cooling. Inspects plugs for wear or defects, and determines need for replacement, using fixed gauges.

May move controls to charge and discharge pipe shells from reheating furnace. May throw sand or scale on mill rolls to prevent slippage, using scoop. May assist other workers installing rolls and making adjustments to mill, using wrenches.

8135-202 BED TENDER(iron & steel) DPT:685
hotbed leverman; hotbed tender.
 GED: 2 SVP: 3 EC: I 3 5 PA: L 4

Tends equipment that transfers rolled steel shapes; such as, blooms, billets, rails, and pipe from processing line to cooling beds:

Presses controls to raise roll stop, start conveyor, and position material opposite specified cooling bed. Pulls lever to start pusher straightedge and dog-chain (series of projections) that shove material off conveyor line onto cooling bed. Moves controls of dog-chain to pull cooled material from bed onto cradle or transfer table.

8135-206 COILER, METAL ROLLING(non-ferrous metal) DPT:685
 GED: 2 SVP: 3 EC: I 6 PA: M 4 7

Tends coiler that winds metal strips, sheets, or wire into coils as they emerge from rolling mills, slitters, or other machines:

Adjusts coiler guides and rollers according to size of workpiece, using hand tools. Starts machine that automatically winds metal onto reels and observes operation to prevent jams, uneven winding, or wrinkles. Regulates tension of coiler to prevent tearing or stretching of metal. Inspects surface of metal for defects. Binds or straps finished coils to prevent uncoiling using crimping tools. Moves controls to activate hydraulic pusher arm and tilts table to transfer coil onto skid or conveyor.

May be designated by employer according to experience with particular type or trade name of machine, or product coiled.

8135-210 SCALPING HELPER(non-ferrous metal) DPT:686
 GED: 2 SVP: 3 EC: I 5 7 PA: M 3 4 7

Helps to scalp surface of ingots or billets to remove oxidation and defects preparatory to rolling:

Lifts ingot from skid to entry table of milling machine, using hoist. Stacks scalped ingot or billet on skid. Places wooden or cardboard liners between ingots as they are stacked. Changes scrap boxes. Maintains records of ingots or billets scalped. Examines scalped metal for defects. Performs minor maintenance and cleans work area. See also definition for term title, 02-160 HELPER (any ind.).

8135-214 INGOT CLADDER(non-ferrous metal) DPT:687
cladding assembler; liner assembler.
 GED: 2 SVP: 3 EC: I 5 7 PA: H 3 4 7

Attaches metal liners to scalped ingots preparatory to rolling into clad sheet or plate:

Positions ingot on cladding conveyor, using hoist. Cleans and scrubs ingot with solvent, rags and stiff brush. Immerses cleaned ingot into

hot water tank to rinse and dissolve detergents, using hoist. Inspects ingot for imperfections, such as pits, cracks, inclusions or rough edges. Removes defects using pneumatic chisel, squeegees or wipers. Selects specified liners from stack and straps them to both sides of ingot, using wire and banding machine. Tack-welds liners to ingot, using electric or gas welder, or binds clad ingot, using steel-strapping machine. Removes and stacks processed ingots, using hoist. May cut wire straps of tack-welded clad ingots, using wire-cutter.

8135-299 OTHER METAL ROLLING OCCUPATIONS

This group includes other metal-rolling workers, not elsewhere classified; for example, those who tend crossing rolling mills to flatten and stretch articles of flatware; tend foil doubling machines that wind two strips of metal on single reel to form one sheet; verify width of first plate rolled on roughing mill to ensure conformance to specifications; and roll aluminum wire from bar stock. Typical examples of occupational titles covered by this residual group definition are:

Flatware Roller(iron & steel; non-ferrous metal)

Foil Winder(non-ferrous metal)

Mill Hand, Plate Mill(iron & steel)

Wire Roller(non-ferrous metal)

8137-MOULDING, COREMAKING AND METAL CASTING

This unit group includes occupations concerned with moulding, coremaking and pouring or pressing molten or powdered metal into moulds to form metal ingots, castings, or die-castings of various shapes and sizes. Activities include: making moulds and cores by hand and machine methods; setting up moulding, coremaking and die-casting machines; operating equipment to melt and cast metal to make ammunition; and assembling and preparing moulds and cores for moulding operations. Occupations concerned with operating furnaces, kettles or other equipment to melt metal for casting, when the melting of metal is an integral part of the casting operation, are classified in this unit group. Other furnace operators are classified in Unit Group 8131, METAL SMELTING, CONVERTING AND REFINING FURNACEMEN.

8137-110 PATTERN MOULDER(non-ferrous metal) DPT:381
 GED: 4 SVP: 7 EC: I 3 6 7 PA: M 4 7

Casts patterns in non-ferrous metals for use in high production duplicate castings, applying knowledge of metal characteristics, sand moulding, contours of patterns and pouring procedures:

Mixes sand, clay, water and coal to make sand moulds, using wood pattern to form mould impression of metal pattern to be cast. Pours molten aluminum, bronze, or other non-ferrous metal into mould until molten metal reaches predetermined line, using hand ladle. Machines metal patterns to exact dimensions.

May make wood patterns used to form sand moulds in which metal patterns are cast.

8137-114 SAND MOULDER(iron & steel; non-ferrous metal) DPT:381
 GED: 4 SVP: 7 EC: I 3 6 7 PA: H 3 4 7

Forms sand moulds and cores for production of metal castings, using hand and power tools, patterns and flasks and applying knowledge of variables, such as contours of patterns, moulding and core sands, metal characteristics and pouring procedures:

Positions drag half of pattern and flask on follow board. Sprinkles or sprays parting agent on pattern and flask and positions reinforcing wire in flask. Sifts sand around contours of pattern. Shovels sand into flask and packs in place, using hand ramming tools or pneumatic hammer. Turns drag over and positions cope half of pattern and flask on drag. Repeats moulding operation to make cope. Lifts cope from drag and removes pattern. Wipes edges of pattern and mould with solution to prevent crumbling. Cuts runner or gates and sprue hole into mould and repairs damaged impressions, using hand tools, such as slick, trowel, spoon and sprue cutter. Positions specified cores in drag, and reassembles cope and drag. Moves and positions large flasks,

patterns and bottom board, using hoist or crane. Pours molten metal into mould, using ladle, or signals others to fill mould.

May form and assemble slab cores around pattern to reinforce mould, using hand tools and glue. May form sand cores used in moulds to form hollows in metal castings. May attach sweep and rotate it about spindle until mould impression is swept or scraped to desired shape, or scrape out desired impressions by drawing sweep back and forth along guides of large rectangular floor or pit moulds. May be designated according to type of moulding done; for example, Moulder, Bench Moulder, Floor Moulder, Sweep

8137-118 DIE-CASTING-MACHINE SET-UP MAN(non-ferrous metal) DPT:380
GED: 4 SVP: 6 EC: 1 5 6 7 PA: M 4 7

Sets up die-casting machines to cast metal parts, such as automobile trim, carburetor and power mower housings, and electrical and household appliance parts, from non-ferrous metals, such as zinc, aluminum or magnesium:

Lifts and positions die sections into machine, manually or using chain fall, hoist or lift trucks. Secures die sections in place, and adjusts stroke of ram, using hand tools. Connects water hoses to cooling system of die. Preheats die sections with torch or electric heater. Turns valves and sets dials to regulate flow of air or water circulating through die, timing cycle, and operating speed of machine. Starts machine to produce sample casting, and examines casting to verify setup.

May perform maintenance on machine or dies, such as replacing pipelines or hoses, lubricating machine or replacing ejector pins in dies. May dismantle dies for repair by toolroom personnel.

8137-122 MOULDING-AND-COREMAKING-MACHINES SET-UP MAN(iron & steel; non-ferrous metal) DPT:380
pattern setter; set-up man, core room.
GED: 4 SVP: 6 EC: 1 5 6 7 PA: M 4 7

Sets up machines that make sand moulds, cores, or cast patterns:

Obtains specified patterns from storage and moves them to work station, manually or using hoist or handtruck. Bolts patterns to bed of moulding or forming machine, using wrenches. Adjusts stops, height of squeeze or roll-over mechanism, and height of sand hopper according to size of pattern or core, using hand tools. Starts machine to produce sample, and examines and gauges casting to verify set up and adherence to specifications, using scales and calipers. Replaces worn parts, such as air lines, gas lines and core box vents, using hand tools.

May modify draft angles, fillers and radii to correct errors in piece, using files, electric grinders and abrasive paper. May make templates from blueprints.

8137-126 COREMAKER(iron & steel; non-ferrous metal) DPT:381
GED: 3 SVP: 6 EC: 1 7 PA: M 3 4 7

Makes sand cores used in moulds to form holes or void spaces in hollow castings:

Cleans core box with blast of compressed air. Dusts parting sand over inside of core box to facilitate removal of finished core. Partially fills core box with sand, using shovel and by hand. Compacts sand in core box, using hands, hand rammer or pneumatic rammer. Cuts reinforcing wires with shears, bends them by hand and inserts in sand. Fills core box and compacts sand. Inverts core box onto metal plate and lifts box from sand core. Patches cracked or chipped areas on core and smooths core surface, using spoon or trowel. Bakes cores in oven to harden. Assembles core sections by pasting together to form completed cores.

May make cores with special sand and harden cores by blowing carbon dioxide gases onto core or by injecting gas into core.

8137-130 MOULDER, BENCH(jewellery & precious metal prod.) DPT:381
metal moulder.
GED: 3 SVP: 6 EC: 1 6 PA: L 4

Casts metal moulds to form jewellery and silverware articles:
Forms plaster model, or receives model from stock. Builds sand mould

in flask, using plaster model as pattern. Places flask in furnace, or heats with blowtorch to dry and harden sand mould. Removes plaster model from flask. Melts metal in crucible or furnace and pours molten metal into channel of sand mould to cast metal mould. Opens flask and removes metal mould when metal has hardened, using pliers or tongs.

8137-134 SHOT DROPPER(explosives) DPT:462
pellet maker; shot maker.
GED: 3 SVP: 5 EC: 1 3 6 7 PA: L 2 4 5 7

Controls kettles at top of shot tower to melt scrap shot, lead, and lead alloys, and drops mixture through perforated pans down tower to form shot for shotgun shells:

Calculates weights of pure lead and lead alloys to produce mixture of specified antimony content, according to formula. Notifies shot making crew of type and quantity of pigs to load into conveyor. Starts conveyor and moves controls to regulate feed rate of lead and scrap into kettle. Observes pyrometers and adjusts thermostat to maintain kettle heat to bring lead to specified pouring temperature. Positions shot pan of designated size and spreader pan and cup in fixture beneath kettle spout to receive molten metal. Turns crank to regulate molten metal flow from kettle into cup. Observes falling pellets for irregularities, such as incorrect size or shape, indicating clogged holes in shot pan and impurities in lead. Adjusts flow of lead to vary size of pellets, and raises kettle temperature to burn out impurities. Cleans pans by dipping them in kettle to melt lead clogging holes. Shakes sampling of dropped shot through gauging sieve, and estimates production of shot of specified size from percentage of pellets passing through sieve. Dumps cooled pellets into tote boxes. Records production, stating weight of cast pellets and type of alloy.

May dress molten lead in kettle, to remove floating impurities, using ladle.

8137-138 CASTING OPERATOR(non-ferrous metal) DPT:662
GED: 3 SVP: 5 EC: 1 3 5 6 7 PA: M 4 5 6 7

Controls pouring station to cast metal into pigs, ingots, bars or billets for further processing:

Turns handwheels, moves levers, aligns delivery pipe or starts pumps to regulate flow of metal from furnace, crucible or ladle into casting trough. Adjusts screw valves at bottom of trough to regulate flow of metal from trough into moulds. Skims slag from surface of cast metal, using hoe. Verifies temperature of metal in trough with pyrometer. Raises siphon or replaces tapping pins to stop flow of metal into trough. Removes sample of molten metal for control analysis, using spoon. Controls cooling conditions of casting by maintaining constant level of metal in moulds and regulating series of valves to spray water against moulds, to produce castings of uniform crystalline structure. Signals crane crew or operates hoist to remove casting from mould. Transports and stocks castings in storage area. Stamps or stencils castings with identifying information, using rubber stamp or hammer and die. Shovels scrap metal into buggy for return to furnace.

May cast lead slugs used to protect rubber or plastic hose during curing process. May trim or buff castings to remove handling marks, using chisel, bar, hammer, band saw or electric buffer. May insert fire clay on end of rod into tap hole to seal furnace. May line trough with asbestos paper when casting aluminum to prevent damage to trough. May be designated according to type of metal cast; for example, Aluminum Caster

Antimonial-Lead Caster

8137-142 CONTINUOUS-CASTING-MACHINE OPERATOR(iron & steel; non-ferrous metal) DPT:662
GED: 3 SVP: 5 EC: 1 3 5 6 7 PA: M 4 5 7

Operates equipment to cast continuous metal slabs, rods, tubes or billets for further processing:

Prepares pouring operations by scraping slag from reservoir and aligning reservoir over mould. Preheats reservoir to specified temperature. Cleans mould (trough) using scraper and hose, and sprays or brushes lubricant to facilitate flow of hardening metal. Adjusts propane burners under trough to protect molten metal from oxidation during cooling process. Adjusts oxygen lances to cut cast metal to specified length. Threads graphite die into bottom of crucible that holds molten metal when casting tubes or rods. Places water jacket around die and connects water line. Inserts starting bar into bottom of mould or through die into crucible to provide weld with molten metal.

Inserts metal extension rod through driving rollers and threads it to starting tip. Regulates speed of rollers in trough to draw extension rod, starting tip and molten metal through die in continuous casting process. Signals metal pourer to open ladle to pour molten metal into reservoir. Opens valve on tap hole of reservoir to allow molten metal to flow into trough. Operates control panel to monitor flow of metal into trough, through cooling process and to cutting lances.

8137-146 MACHINE MOULDER(iron & steel; non-ferrous metal) DPT:682
machine-line moulder.
GED: 3 SVP: 5 EC: I 5 7 PA: M 4

Operates machine to form sand moulds used in production of metal castings:

Assembles flask, pattern and follow board on moulding table of machine. Sifts sand over pattern using sieve, and fills flask with sand by opening hopper or using shovel or scoop. Packs sand around pattern contours, using hand tool or pneumatic hammer. Starts machine that compacts sand in flask to form mould, or pushes lever to actuate compacting vibrator. Cuts pouring spout and vents in mould, using sprue cutter and wire, or pushes lever to actuate vibrator to loosen cope half of flask from moulded sand. Cleans pattern during cycle, using air hose. Sprays pattern with parting agent, to facilitate removal, using hand spray. Lifts cope of flask off drag and removes pattern. Cleans cavity of mould, using air hose. Positions cores in drag and assembles cope and drag.

May repair defects such as cracks and broken edges, using hand tools. May pour molten metal into moulds. May operate automatic machine to make sand moulds. May be designated according to type of machine operated; for example,

Automatic-Moulding-Machine Operator
Machine Moulder, Squeeze

8137-150 CASTER(non-ferrous metal) DPT:662
metal caster.
GED: 3 SVP: 4 EC: I 3 6 PA: M 4 5 6 7

Operates gas-fired furnace to melt non-ferrous metal, and pours molten metal into moulds to form castings:

Weights specified amounts of ingots or scrap and loads them into furnace by hand or using power hoist. Turns valve to regulate temperature in furnace according to metal being melted. Verifies specified pouring temperature of molten metal, using gauge. Positions and clamps specified mould in holding device. Lubricates sides of mould to prevent adhesion of metal. Dips hand ladle into furnace to obtain sample and forwards sample to laboratory for testing. Removes dross from top of molten metal, using skimmer. Pours molten metal into mould. Removes casting from mould using hand tools, or power hoist, and examines for defects.

May transport metal casting to weigh area, or storage, using fork lift. May be designated according to type of metal cast; for example,

Lead Caster
Needle and Thread Guide Caster

8137-154 CASTING-MACHINE OPERATOR,
AUTOMATIC(electric. equip.) DPT:682
grid caster.
GED: 3 SVP: 4 EC: I 3 5 6 PA: H 4 5 7

Operates one or more single- or multiple-mould casting machines to mould lead-acid-battery grids:

Loads lead-alloy bars into melting kettle, and lights burners, or switches on electrical heater, to melt alloy and heat moulds to specified temperature. Coats mould with compound, using spray gun, to prevent adherence of alloy. Turns valves, to control flow of alloy to mould and flow of water to mould-cooling sprayers. Starts machine that automatically pours specified amount of alloy into mould, and cools and ejects grids. Inspects parts to detect defects, and adjusts temperature of alloy or moulds when indicated. Skims dross from molten alloy, using hand ladle. Directs workers to scrape off metal adhering to mould to prepare mould for further casting, and to stack moulded grids on pallets.

May operate single-mould machine equipped with press that automatically trims grids. May repair pipe connections.

8137-158 CASTING-WHEEL OPERATOR(non-ferrous metal) DPT:662
GED: 3 SVP: 4 EC: I 3 5 6 7 PA: M 4 7

Operates rotating casting wheel to pour molten copper, lead, aluminum or other non-ferrous metals into moulds to form ingots, pigs or anodes:

Moves control lever to rotate wheel and position mould under pouring spout of kettle or furnace. Pulls lever to move slide and start pump, to remove stopper from bottom of kettle or furnace, or to tilt ladle to allow metal to flow into mould. Rotates wheel to position successive moulds under spout and sets rheostat to control pouring speed. Adjusts gas and air flow to maintain temperature of furnace, kettle or melting pot. Turns valves to adjust water and air flow used for cooling and drying cast ingots or anodes. Observes process to ensure that castings are dumped, and that moulds are returned to starting position.

May spray empty moulds with coating to prevent metal from sticking. May skim slag or dross from metal in furnace, using hoe or rabble. May divert stream of metal into bucket, using hose to obtain samples for laboratory. May regulate flow of water in water-cooled mould to solidify molten metal. May stamp and mark ingots or anodes with identifying data, using hammer, punch or automatic stamper. May be designated according to item cast or metal used; for example,
Automatic-Anode Caster
Lead-Wheel Operator

8137-160 STARTING-SHEET MAKER(non-ferrous metal) DPT:662
GED: 3 SVP: 4 EC: I 3 6 7 PA: H 4

Operates melting pot and forming press to produce starting sheets used as cathodes in electrorefining of non-ferrous metals:

Signals operator of crane to charge pot with pigs, or loads pigs into pot, using hoist. Unhooks crane or hoist from pigs, using bar. Adjusts gas burner valves to melt and regulate temperature of metal. Skims dross from pot. Turns wheel to lower drum of sheet-forming machine into molten metal. Adjusts depth of drum to control thickness of sheet, speed of machine and flow of cooling water to control formation of sheet. Feeds beginning end of sheet to shears to be automatically cut to length. Hangs and fastens sheets on metal bar. Clears blockages, using bars and hooks.

May straighten bar on which sheets are hung, using hammer.

8137-162 AMMUNITION CASTER(non-ferrous metal) DPT:682
GED: 3 SVP: 4 EC: I 3 5 6 7 PA: M 4 7

Controls automatic equipment to melt and cast lead and lead alloy into cylindrical billets, and extrude billets into wire, or tubes for making bullets, cores or shell detonators:

Starts electric furnace, and adjusts controls to maintain specified temperature and pressure. Charges furnace with lead pigs and scrap of specified alloy, using hoist, or conveyor and elevating platform. Skims dross from molten lead with ladle. Turns wheel to adjust flow of molten lead into mould. Adjusts stroke of billet extractor mechanism, installs extruding dies, and regulates ram speed and flow of water coolant, using hand tools. Threads extruded metal over pulleys into slug-forming machines, or through guide pipes to be coiled in drums. Verifies wire, or tube size with snap gauges and calipers to ensure conformity to specifications.

8137-166 ANODE-PRESS OPERATOR(non-ferrous metal) DPT:682
operator, carbon press.
GED: 3 SVP: 4 EC: I 5 PA: M 4 7

Operates press that forms carbon into anodes used in metal- reduction pots:

Pushes panel buttons to activate hopper, chain conveyor, cooling chamber belt, and power rolls. Turns valve to regulate flow of water to carbon cooling chamber. Regulates heat in mould to operating temperature, observing pressure gauge and turning valves. Observes signal light on hopper which indicates hopper is filled and carbon mix is discharged into mould. Starts mechanical vibrator or jolting mechanism that packs mix into mould to obtain blocks of required density. Moves levers to synchronize rotation of index table with dropping of ram to press mix into blocks. Takes temperature of compacted mix, using thermometer. Adjusts ram stroke to press block to specified size, using wrench, or compacts mix in mould by placing

weights on top, using crane. Stops press when warning light indicates malfunction or when mould is overheated. Removes rejects from conveyor, using pneumatic ram. Stencils or stamps identifying number on cast anodes.

May fill and level mix in mould manually, using shovel and scraper.

8137-170 BULLET-SLUG-CASTING-MACHINE OPERATOR
(non-ferrous metal) DPT:682
GED: 3 SVP: 4 EC: I 3 5 6 7 PA: H 4 7

Operates machine to cast slugs for subsequent swaging into small-arms ammunition bullets:

Drops lead pigs, bars or scrap into melting kettle, manually or using hoist. Moves levers to control fuel-air mixture to furnace and coolant water flow to moulds. Starts pump that forces molten metal through pipes to casting wheels. Observes when moulds are at correct temperature for production casting, and starts machine. Measures slugs, using micrometer, and examines them for defects. Adjusts machine to correct malformation of slugs by adjusting spring tension and shims in mechanisms that close and open moulds, and changing stroke of hammer that knocks slug from moulds. Examines moulds, using straightedge and light, to detect incomplete closure and warpage. Straightens warped moulds, using hand-powered press, or sends moulds to tool shop for correction.

8137-174 DIE-CASTING-MACHINE OPERATOR(non-ferrous metal) DPT:682
GED: 3 SVP: 4 EC: I 3 5 6 7 PA: M 4 7

Operates die-casting machine to build up and cast parts for automobiles, motors, and electrical and household appliances, from zinc, aluminum, magnesium, and other non-ferrous metals:

Lifts specified die sections onto machine, manually or using chain hoist. Bolts or clamps die sections in position and adjusts stroke of ram, using hand tools. Connects water hose to cooling system of die. Preheats die sections with torch or electric heater. Turns valves to regulate flow of water circulating through die and to control speed of machine. Blows metal fragments from die surface, using air hose, and brushes lubricant into die cavity and onto plunger. Loads metal bar into pot-type furnace or machine reservoir. Hand ladles molten metal into chamber of machine when operating cold chamber machine. Pushes button and moves levers to close and lock dies and to activate plunger that forces molten metal into die. Removes casting after die opens automatically, using pliers or tongs. Observes gauges such as water-pressure, pyrometer, thermocouple-dial and hydraulic-pressure, and makes adjustments. Inspects castings, using fixed gauges.

May line cylinder pot with asbestos to prevent chilling. May dip castings in water to cool them. May remove and stamp cast parts with identifying data.

8137-178 MOULDING-SAND MIXER(iron & steel; non-ferrous metal) DPT:682
moulding-sand conditioner.
GED: 3 SVP: 4 EC: I 5 7 PA: M 4

Operates machine to mix or recondition moulding sands:

Weights or measures specified amount of ingredients, such as used sand, powdered coal, and bonding agents. Shovels sand into hopper of machine, and dumps pails of powdered coal and bonding agents over sand. Sets dials for specified amounts of water, core oil, and other ingredients, such as blackening powder, that are automatically measured and fed into machine. Starts machine and agitators, opens air valves, and turns dials to time mixing cycle. Positions wheelbarrow or bin under discharge end of machine. Removes sample of sand and feels it for moisture and consistency. Adjusts controls and adds ingredients, such as water and binder, to vary mixture according to sampling.

May operate sand cutter to condition sand. May be designated according to purpose for which sand is to be used; for example,

Core-Sand Man

Facing-Sand Man

8137-182 METAL POURER(iron & steel; non-ferrous metal) DPT:664

bull runner; ladle man.

GED: 3 SVP: 4 EC: I 3 5 6 7 PA: M 4 5 6

Pours molten metal from ladle into moulds to produce castings or ingots:

Preheats ladles, using torches. Examines moulds to see that they are clean, smooth and coated. Signals operator of crane to position pouring nozzle of ladle over moulds, or turns hand wheel to tilt ladle. Moves lever to lift ladle stopper and allow molten metal to flow into moulds to specified height. Skims slag off molten metal, using strainer device, or tilts ladle to dump slag. Replaces defective stoppers and nozzles, using hand tools. Signals workers during pouring operation to obtain sample of metal for analysis. Sprays water on filled moulds and caps moulds. Removes solidified slag from pouring nozzle using bar or oxygen burner.

May direct other workers to shovel additives into ladle or mould to obtain specified type of casting or ingot. May lift crucible out of furnace or cupola, using tongs and hoist, move it to pouring station, and tilt crucible manually in mould. May be designated according to type of ladle used or metal poured; for example,
Pourer, Crane Ladle
Pourer, Crucible
Pourer, Pig Iron(iron & steel)
Steel Pourer(iron & steel)

8137-186 LOST-WAX CASTER(iron & steel; non-ferrous metal) DPT:684
investment caster.
GED: 3 SVP: 4 EC: I 3 6 PA: L 4 7

Cast intricate precision components or jewellery from molten metal, using lost-wax method:

Inserts one or more wax patterns into steel cylinder and packs plaster or ceramic investment around pattern to form mould. Removes air from cylinders, using vacuum hose, to ensure that investment is evenly packed around patterns. Places cylinder in oven for specified time to burn off wax patterns and harden investment. Melts required amount of metal in crucible or furnace. Pours molten metal into cylinder which spins to distribute metal evenly. Breaks or dissolves mould and removes casting. Cleans finished casting by dipping it in acid and water solution or by using shotblast equipment.

8137-190 MOULD SETTER(electric. equip.) DPT:684
casting-machine adjuster.
GED: 3 SVP: 4 EC: I 6 7 PA: M 4 7

Positions moulds used for casting lead for lead-acid-battery parts, such as grids, posts and straps, either for hand casting or machine casting:

Positions and secures mould on bed of machine, using hand tools. Adjusts timing mechanism to co-ordinate flow of lead and coolant to moulds.

8137-194 CENTRIFUGAL-CASTING-MACHINE TENDER(iron & steel) DPT:665
blow-spin operator.
GED: 3 SVP: 4 EC: I 3 5 6 7 PA: M 4 5 7

Tends centrifugal-casting machine that casts tubular metal products, such as pipes, brake drums, bushings, or jewellery parts:

Places specified mould on spinning mechanism. Cleans dirt and metal fragments from inside of mould, using brush, water or air hose. Positions and fastens cover on ends of mould. Preheats mould with torch. Starts machine and sprays insulation on inside of rotating mould. Observes molten metal pouring into mould automatically and stops pour when casting is formed by tilting pouring spout, or pours molten metal into mould, using hand or crane ladle. Allows mould to spin for specified time to solidify metal against mould walls. Unfastens mould cover and removes casting, using tongs or hydraulic ram. Signals operator of crane to reload and fill furnace with metal. Assists maintenance crew in repairing machine.

May set machine controls to rotate mould at specified speed. May work at one station on multi-station (indexing-type) centrifugal-casting machine, performing any combination of duties. May operate machine to clean outside and ream inside of pipes. May grind rough areas of pipe, using portable grinder.

8137-198 METAL-FRAME MOULDER(non-ferrous metal)
DPT:664
GED: 2 SVP: 4 EC: I 3 5 6 7 PA: M 3 4 5 6

Assembles and fills metal frames to form moulds used in casting copper:

Assembles metal casting frame on flat car, using bolts and wrenches. Seals frame with fire clay, using trowel. Signals helper to push flat car under pouring spout of ladle. Moves lever to tilt ladle of molten copper, or removes block plugging spout of ladle, and fills frame to indicated level. Pulls lever to lower core attached to hydraulic press ram, to imbed core in molten copper. Turns valve to circulate water through core to cool and solidify copper. Moves lever to raise hydraulic ram and withdraw attached core when mould cools. Dismantles frame, using wrenches. Removes mould, and stacks for further processing, using hoist.

8137-202 METAL-POURER HELPER(iron & steel; non-ferrous metal)
DPT:664
second-pourer; third-pourer.
GED: 2 SVP: 4 EC: I 3 6 7 PA: M 4 5 6

Helps pourer to prepare equipment and pour molten metal into moulds:

Places equipment, such as shovels, plugs, and boards, on pouring platform. Prepares ladles with correct nozzle, using hand tools. Counts moulds and caps to ensure correct number specified for pouring operation. Measures and marks moulds to indicate specified filling heights, using tape and chalk. Weighs specified additives, and transports them to pouring platform, using wheelbarrow. Shovels additives into moulds to produce specified type of metal and to prevent metal from boiling and forming air bubbles inside ingot. Signals crane operator to position hot-tops (covers) or steel places on filled moulds to retard cooling of metal. Pours sample of molten metal into test mould for laboratory analysis. Signals crane operator to remove covers from moulds after metal has solidified. Removes bricks from ladles that require relining, and sets stopper assemblies and nozzles in relined ladles, using bars, sledge, and hand tools. See also definition for term title, 02-160, HELPER (any ind.).

May operate powered capping machine to position and remove mould covers.

8137-206 COREMAKER, PIPE(iron & steel; non-ferrous metal)
DPT:684
GED: 2 SVP: 4 EC: I 3 7 PA: M 4

Makes clay cores around which ferrous or non-ferrous pipes are cast:

Clamps metal rod in bench vises so that it can be rotated. Wraps paper, straw or jute around rod, and secures with twine. Mixes clay with sand, loam and adhesives to form correct consistency. Spreads mixture over wrapping, using trowel. Rotates clay-wrapped rod slowly, and smooths clay manually. Spreads graphite over core and places it in drying oven for specified time to bake clay. Removes dried core from oven and applies alcohol coating to harden core surface.

8137-210 MOULD CLOSER(iron & steel; non-ferrous metal)
DPT:684
GED: 2 SVP: 4 EC: I 5 7 PA: H 4

Cleans and assembles foundry moulds to prepare them for pouring:

Cleans inside surface of sand moulds with air hose. Positions cores in drags, manually or using hoist or crane. Thrusts rod into vent holes to remove obstructions. Fits and secures cope and drag together to form flask, using clamps, wedges, bolts and washers. Applies fire clay to seal joints in flask, using trowel. Places runner cup over pouring hole.

May patch and smooth damaged portions of mould, using spoon or trowel. May assist in pouring metal into moulds. May remove castings from moulds. May repair damaged flask and bottom boards, using saw and rule. May remove damaged crossbars from flasks, using hammer, chisel and hacksaw, and weld replacement, using oxy-acetylene torch.

8137-214 SAND-SLINGER OPERATOR(iron & steel; non-ferrous metal)
DPT:683
slinger operator.
GED: 2 SVP: 3 EC: I 5 7 PA: L 4

Controls sand-slinging machine to pack sand in mould flask (container) by either of the following methods:

1. Engages controls to move machine along tracks and position impeller head over mould flask. Starts machine and moves controls to guide impeller head back and forth to direct flow of sand into container. 2. Starts machine and moves controls to direct flow of sand into flask which rotates on turntable while filling.

May clean and oil machine. May replace worn parts on machine, using hand tools.

8137-218 LEAD CASTER, MANUAL(electric. equip.) DPT:684
GED: 2 SVP: 3 EC: I 3 6 7 PA: H 4 7

Cast lead-acid-battery parts, such as connectors, posts and straps:

Installs mould of specified type on stand, using hand tools. Loads bars, pig or scrap lead into melting kettle. Ignites burner or actuates electrical control to melt lead to casting temperature. Coats mould surfaces to prevent adherence of metal, using spray gun. Ladles molten metal into moulds. Moves lever or removes knock-out pins with mallet, to open moulds and release parts. Inspects parts for defects, and adjusts equipment or alters procedures to correct faulty moulding. Cleans metal from moulds, using brush.

May change mould inserts and adjust knock-out pins, using hand tools and depth gauge. May pour lead into moulds held on radial arms of machine that conveys moulds to worker and discharges castings. May sort, weigh and pile parts in stock.

8137-220 NOZZLE-AND-SLEEVE MAN(non-ferrous metal)
DPT:684
GED: 2 SVP: 3 EC: I 5 6 PA: M 4

Installs, replaces and adjusts nozzles and cylinders (sleeves) of die-casting machines:

Inspects nozzle and sleeve setups along machine line. Disconnects and removes faulty gooseneck (spout) from die-casting machine, using wrenches, chain falls and hoist. Knocks nozzle loose with bar and hammer. Removes plunger from sleeve of cold-shot machine, using wrenches, and pushes defective sleeve from machine. Installs new sleeve by inserting holding pin, setting screw adjustments and taking scale measurements. Drives replacement nozzle into gooseneck. Reinstalls gooseneck in metal pot, aligning nozzle with gate according to scale measurements. Assists other workers adjusting, installing and setting-up die-casting machines. Keeps record of sleeve and nozzle adjustments and replacements.

8137-222 COREMAKER, MACHINE(iron & steel; non-ferrous metal)
DPT:685
GED: 2 SVP: 3 EC: I 7 PA: M 4

Tends machine that makes sand cores for use in casting metal:

Cleans patterns, using air hose or brush. Fills overhead hopper with specified sand mixture, using hoist. Places core box over pattern or die on machine bed or table. Fills and compacts sand in box, using either of the following methods. 1. Pulls lever to blow and compact sand in core box. 2. Fills core box with sand from overhead chute or by using hands or shovel. Starts mechanism that causes table to reciprocate and to compress sand. Tamps sand in core box with hand or pneumatic tool. Removes excess sand from top of core box with straightedge, clamps plate to top of box and moves lever to turn box over. Withdraws core from core box and lifts core from machine.

May position reinforcing wires in core box before filling with sand. May perform one or more of above duties on revolving, multiple station, blower-type or jolting-type coremaking machine. May be designated according to type of core produced, or type of machine used; for example,

Coremaker, Blower Machine
Coremaker, Turn-Over-Draw-Type Machine
Crankcase Coremaker
Jacket Coremaker

8137-224 LIME MAN(iron & steel) DPT:685
lime man, pig-casting machine.
GED: 2 SVP: 3 EC: I 5 6 7 PA: M 4

Tends mixing machine to mix lime and water, and sprays mixture on interior of moulds to prevent cast iron from sticking to pig- moulds:

Shovels lime into mixing machine, starts machine, and opens water valve to obtain mixture of specified consistency. Cleans moulds, using air hose. Starts pump of spray gun and sprays moulds with lime mixture. Observes coating on moulds and adjusts spray gun and consistency of mixture to obtain specified coating. Cools hot pigs by opening valve to spray water on pigs. Removes stuck pigs from moulds, using bar.

May assist in removing slag and metal buildup from lips of ladles, using sledge hammer and bar.

8137-226 MOULDER, LEAD INGOT(non-ferrous metal) DPT:685
lead caster.
GED: 2 SVP: 3 EC: I 3 5 6 7 PA: H 2 3 4

Melts lead-antimony pigs and scrap in oil furnace, and casts lead into ingots:

Lights oil burner, using oil-soaked torch, and adjusts oil and air controls to heat furnace to required temperature. Hangs pigs, ingots or scrap over furnace pot, to heat them prior to melting, using hoist. Slides heated pigs into furnace pot, allowing oil to burn off, to avoid accumulation of explosive oil-vapour-air mixture. Stirs molten metal, and skims dross from surface to remove impurities, using ladle. Positions swinging trough over moulds, and opens spout to permit free flow of molten metal into moulds, or ladles metal manually. Turns valves to control flow of coolant water to moulds. Inverts mould when metal is solidified, and knocks ingot loose, using hammer, or releases catch on side of mould that springs ingot loose. Rolls cast ingot to storage, using truck, stands ingot on end, and stamps on identifying information, using hammer and punch.

8137-230 RECLAMATION MAN, METAL(non-ferrous metal) DPT:685
GED: 2 SVP: 3 EC: I 3 6 7 PA: M 4

Tends equipment to remelt and cast non-ferrous metal scrap, dross and skimmings, to form ingots for further processing:

Charges kettle, using shovel or hoist. Observes colour of molten metal and adjusts temperature controls, or turns valve to regulate fuel supply. Stirs and skims molten metal to expel fumes and remove slag, using bar and rabble. Drains ladles or pumps metal into moulds. Dumps castings from moulds and transports products to storage.

May pour molten metal from furnace into vacuum retorts to fume off impurities. May tag or stamp identifying numbers on castings. May weigh castings, dross and slag, and pack castings in containers. May be designated according to metal reclaimed, or item cast; for example, Lead-Reclamation Man

8137-234 SINTERING-PRESS TENDER(iron & steel; non-ferrous metal) DPT:685
GED: 2 SVP: 3 EC: I 7 PA: L 4

Tends mechanical or hydraulic sintering machine that compresses metallic powders into parts; such as, wheels, bearings, gears, filters and rings:

Selects appropriate moulds required to make parts, according to work order card. Adjusts ram stroke and hopper feed valves, using hand tools. Pours metal powder into hopper. Starts press and observes operation. Removes and inspects parts for burrs, nicks and cracks. Weighs parts on scale and measures dimensions to ensure conformance to specifications, using micrometers or fixed gauges. Places compressed parts on tray, stock pan or hand truck, for baking and further processing.

May adjust shuttle mechanism to regulate amount of powder in part. May write identifying information on tag, such as mix or order number, number of parts, and date, and attach tag to tray or pan. May feed parts into coining press to correct distortions created in sinking process.

8137-236 CORE-PIPE EXTRACTOR(iron & steel) DPT:686
GED: 2 SVP: 3 EC: I 5 6 7 PA: M 4

Extracts core pipe from interior of tubular castings:

Strikes end of core pipe with sledge to loosen baked sand between casting and core pipe. Inserts end of core pipe through holding block, and secures pipe between jaws set on dolly. Starts machine that pushes dolly along tracks, pulling out core pipe while casting strikes against holding block. Cleans casting, using air hose and wire brush.

8137-238 SOLDER MAKER(non-ferrous metal) DPT:687
GED: 2 SVP: 3 EC: I 3 6 7 PA: M 4

Melts, mixes and refines solder, and pours it into bars:

Mixes tin, lead and refined scrap, and forks, hoists or shovels alloy into furnace melting pot. Sets thermostatic controls or adjusts fuel valves to regulate melting. Skims off dross with ladle. Plunges potato-filled sieve box or treated wooden blocks strung on wire to bottom of molten metal so that steam from charring potatoes, or blocks agitate metal, to bring additional dross to surface. Skims off remaining dross. Ladles or pours new solder into pig moulds or into troughs of solder-making table. Removes cooled metal from moulds and places it on handtruck or conveyor. Cuts bars into required sizes and weights, using power saw.

May tie bars into bundles and pack bundles into metal boxes for shipping or storage.

8137-240 ABRASIVE-WHEEL BUSER(non-ferrous metal) DPT:684
buser.
GED: 2 SVP: 2 EC: I 3 6 PA: H 4 7

Pours molten lead into center of grinding wheels to form bushing:

Selects specified center locator, chamber cutter and arbor according to inside diameter bushing required, or selects and mounts specified sized shaft in lead-casting unit. Screws arbor or shaft into table plate. Switches electric heater or lights blowtorch under pot to melt lead. Positions grinding wheel on table, with shaft, arbor or spindle protruding through center of wheel, and screws top locator to secure in place. Fills area around shaft with molten lead to form bushing, using ladle. Cuts excess lead from around edges of bushing, using mallet, chisel, and hand or power reamer or rotating cutter. Unscrews top locator and lifts finished wheel onto rack or skid.

May insert and position preformed steel, rubber or plastic bushings on arbor or shaft. May coat inside of wheel hub with adhesive and wipe off excess adhesive, using brush or cloth.

8137-242 CASTER HELPER(non-ferrous metal) DPT:684
alloy mixer; mill helper.
GED: 2 SVP: 2 EC: I 3 6 7 PA: H 4

Helps caster to cast and cut pigs to specified dimensions:

Charges kettle containing molten metal with specified alloy ingredients, using shovel. Guides crane-supported mixer into kettle, and mixes contents in kettle. Opens valve permitting molten metal to flow into mould to form pig. Skims slag from surface into dross buggy to remove impurities, using hoe, metal rake, carbon stick or skimming board. Removes pigs from moulds, using crowbar, or sets pins and hooks chain for crane to lift pigs from moulds. Shovels scrap metal into buggy for return to furnace. Moves pigs to storage area, using forklift truck. Cuts pigs to size, using portable electric saw or slitting machine. See also definition for term title, 02-160 HELPER (any ind.). May mark cutting lines on sheet, using chalk, steel square, and tape measure. May melt solidified metal in outlet pipes, using gas torch. May clean equipment, using air-hammer or reamers.

8137-246 CORE SETTER(iron & steel; non-ferrous metal) DPT:684
GED: 2 SVP: 2 EC: I 5 7 PA: M 4

Positions cores in sand mould in preparation for casting metal:

Examines mould and cores for defects, such as cracks and broken surfaces. Places core in mould and closes mould. Verifies spacing between mould and cores, using gauges, and positions metal supports in sand of mould, if required, to prevent core from moving or floating on molten metal.

May roll mould or operate hoist to move mould to casting station.

8137-250 METAL-FRAME-MOULDER HELPER(non-ferrous metal) DPT:684
GED: 2 SVP: 2 EC: I 3 5 6 7 PA: M 3 4

Helps moulder to assemble and fill metal frames to form moulds used in casting copper:

Assembles metal casting frame on flat car, using wrenches. Measures and marks pouring level on inside of frame to obtain castings of specified weights, using rules, gauges and chalk. Sprays or sprinkles frame and core with bone ash or lampblack to prevent adherence of molten metal. Sprays moulds with steam or hot water to obtain specified temperature. Cleans splashed and partially solidified copper from mould car, using hammer and chisel. Pushes flat car containing assembled frame under spout of ladle, manually. Dismantles frames, using wrenches, removes and stacks moulds, using hoist. See also definition for term title, 02-160 HELPER (any ind.). May fasten plug in bottom of mould with locking pin.

8137-254 CORE EXTRUDER(iron & steel; non-ferrous metal) DPT:685
sand-core extruder; tube coremaker.
GED: 2 SVP: 2 EC: I 5 PA: M 4

Tends screw coremaking machine that extrudes sand cores:

Installs specified core tube and conveyor screw in machine, using hand tools. Shovels sand into hopper and tamps by hand. Positions core plate at opening of core tube and starts motor-driven conveyor or manually operates conveyor screw which forces sand through core tube and onto core plate. Breaks or cuts core at core tube opening when core fills plate. Tends oven to bake cores, and removes cores from oven after specified time. Saws cores to specified lengths.

8137-258 CORE-OVEN TENDER(iron & steel; non-ferrous metal) DPT:685
core baker; core ovenman.
GED: 2 SVP: 2 EC: I 3 5 6 7 PA: M 4

Tends baking oven that hardens and strengthens sand cores used in casting metal:

Loads cores on racks or carts and pushes them into oven. Lights gas or oil fired furnace and turns valves to obtain specified temperature, or sets thermostat and closes switch to heat element in electric furnace. Bakes cores for specified time, and removes from oven. Delivers cores to storage area, or next processing stage, using hand cart or industrial truck.

May clean, spray, or paint cores. May adjust baffle plates that direct flow of heat in oven.

8137-262 DIE-CASTING-MACHINE TENDER(non-ferrous metal) DPT:685
GED: 2 SVP: 2 EC: I 3 5 6 7 PA: M 4 7

Tends die-casting machine that casts items, such as metal toys and automobile and household appliance parts, from non-ferrous metals:

Loads ingots and scrap into heated reservoir of machine, manually, or ladles molten metal from furnace to machine pot. Turns valves to regulate flow of water or compressed air circulating through dies. Observes pyrometer and turns valve to regulate heat of molten metal in holding furnace or pot. Blows metal fragments from die surfaces, using air hose. Brushes, swabs or sprays refractory compound over die cavities and plunger. Pushes button to close and lock dies and activates plunger that forces molten metal into die cavities. Removes casting after dies open automatically, using tongs, pliers or leather-gloved hand. Inspects casting for defects; such as, pinholes, irregular shape, cracks, bubbles or warpage.

May turn valve to let metal flow into trough from furnace to pot of machine. May measure casting, using fixed gauge. May dip castings in water to cool.

8137-266 SHELL-MOULD BONDER(iron & steel; non-ferrous metal) DPT:685
bonding-machine tender.
GED: 2 SVP: 2 EC: I 3 5 6 7 PA: M 4

Tends machine that bonds cope and drag together to form completed shell mould:

Turns dials of shell-mould-bonding machine to heat upper pressure plate and set pressure stroke of ram. Positions drag onto lower

pressure plate of machine, using hoist. Fills vibrator pan with bonding agent, using scoop, and pushes button to sift bonding agent onto edge of drag. Positions cope on drag and guides bars into cope and drag holes to determine if cope and drag are properly aligned. Pushes button or pulls lever to push hot plate onto cope to heat and compress cope to drag.

May knock out sprue holes with iron rod. May direct air hose onto mould to blow out loose sand. May tend machine that automatically releases pressure after specified period of time. May assemble cores to drag and cope.

8137-270 SHELL MOULDER(iron & steel) DPT:685
blow operator.
GED: 2 SVP: 2 EC: I 5 7 PA: H 4

Tends machine that makes shell moulds used to produce metal castings:

Starts machine that automatically forms and cures shell. Rolls mould from top rail onto elevator that lowers mould into shell unit and causes blower to impel metered amount of sand into mould. Pulls lever to move oil-heated arbor into mould, and cause rollers to rotate and spin mould until sand mould is cured. Strips cured shell halves from machine and positions on fixture of mould-closing machine. Brushes glue around edges of shell half. Positions remaining shell half on top of lower half and activates ram that exerts pressure on shell until glue has set.

May glue and assemble shell halves by hand. May clamp, wire, or bolt shell halves together. May fill machine hopper with resin-sand mixture, using shovel. May produce cores on shell making machine and be designated accordingly; for example, Shell Coremaker

8137-272 METAL-CHARGE WEIGHER(iron & steel; non-ferrous metal) DPT:587
metal-control man.
GED: 2 SVP: 2 EC: I 3 5 7 PA: M 3 4

Controls type and quantity of metal delivered to furnace room for specified castings:

Places metal shot or strips on scale to weigh specified amount of metal for casting. Cuts bar stock to required lengths, using power saw. Stamps code on bar to indicate alloy and heat number. Delivers metal to furnace room, using handtruck. Keeps work area clean.

May separate returned scrap metal according to alloy and heat number.

8137-274 MOULDMAN(iron & steel) DPT:667
GED: 2 SVP: 2 EC: O 3 6 PA: M 2 3 4 5

Removes steel ingots from moulds after casting and prepares moulds for further castings:

Signals crane operator to lift mould, and knocks out ingot, using hand tools and sledge hammer. Marks casting code on ingot with paint. Examines moulds for cracks and removes dirt and metal particles, using scraper, wire brush and air hose, or oxy-acetylene torch. Mixes mould wash, according to formula and coats moulds, using spray gun. Assists crane operator to hoist and convey hot taps, moulds or ingots by giving signals and by attaching slings or hooks to item to be moved.

8137-278 CASTING-OPERATOR HELPER(non-ferrous metal) DPT:687
billet-man helper; casting-machine helper.
GED: 2 SVP: 2 EC: I 3 5 6 7 PA: H 3 4

Helps in casting metal into pigs, ingots, or billets for further processing:

Pulls mould table over moulding pit, using chain hoist. Lifts moulding heads onto mould table, places distributing basin over moulds and distributing trough between furnace taphole and mould, to prepare pouring station for casting. Positions baffle plates, screens and control pins in trough, using hand tools. Takes sample of molten metal for subsequent analysis. Lines trough with asbestos sheet. Inserts thermocouple into mould, and records temperature of ingot. Skims ingot surface to remove oxide formation, using scoop or ladle. Regulates series of valves to spray water against moulds to produce ingots of uniform crystalline structure. Stencils or stamps identification numbers on ingots. Hooks cable to ingot for removal by crane crew. Removes,

cleans and treats distribution trays and troughs. Cleans working area, using broom and shovel. See also definition for term title, 02-160 HELPER (any ind.).
May buff ingots to remove handling marks, using electric buffer.

8137-282 CASTING-WHEEL-OPERATOR HELPER(non-ferrous metal) DPT:687
GED: 2 SVP: 2 EC: I 3 4 6 7 PA: M 3 4

Helps operator of rotating casting wheel to cast product, performing any combination of following duties:
Brushes and sprays empty moulds with water and bone ash to prevent castings from sticking to moulds. Chips and removes surplus bone ash, using chipping hammer, bar and vacuum hose. Turns valves to adjust water sprays to cool moulds or to loosen and drop castings from inverted moulds. Pries castings from moulds, using bar. Attaches crane hooks to lugs and signals operator of crane to lift casting from mould. Mixes water and bone ash to specified consistency for coating moulds. Skims slag or dross from furnace, using rake, hoe or rabble. Stamps and marks ingots or anodes with identifying data, using hammer, punch or automatic stamper. See also definition for term title, 02-160 HELPER (any ind.).

8137-299 OTHER MOULDING, COREMAKING AND METAL CASTING OCCUPATIONS

This group includes moulders, coremakers and metal casters, not elsewhere classified; for example, those who melt, skim and cast aluminum scrap for salvaging; melt and force molten metal through perforated steel plates to produce granular aluminum; pour molten metals into solidifying ingots to compensate for shrinkage; fabricate moulds and cast jewellery, ornamental or ecclesiastical figures and trophies; and install centers and secure mould in pipe machines to prepare machines for operators. Typical examples of occupational titles covered by this residual group definition are:
Billet Man(non-ferrous metal)
Granular-Aluminum Caster(non-ferrous metal)
Ingot Header(non-ferrous metal)
Ornamental Caster(iron & steel; non-ferrous metal)
Pipe-Machine-Mould Installer(iron & steel)

8141-METAL EXTRUDING AND DRAWING OCCUPATIONS

This unit group includes occupations primarily concerned with operating, tending, feeding, or offbearing from machines that draw and extrude metal into primary shapes; such as, wire, pipe, tube, bar and various hollow or solid sections. Occupations concerned with applying insulation to wire or tube, when it is an integral part of the primary shaping process, are classified in this unit group.

8141-110 METAL-EXTRUDER OPERATOR(explosives; non-ferrous metal) DPT:362
extrusion-press operator.
GED: 3 SVP: 6 EC: I 5 6 PA: M 4 5 6 7

Operates extrusion press to shape hot billets into products, such as bars, tubing, structural shapes, wire and rods:
Arranges work according to type and size of metal, auxiliary equipment and availability of tooling. Installs dies, mandrels, containers, heating coils, press tools, extrusion heads and run-out bridging, using hand tools and hoist. Adjusts controls and gauges, according to size of die, pressure and extrusion speed required. Turns valve to fill hydraulic system storage tanks. Inspects water lines to ensure flow from high pressure pumps to extrusion press. Sets furnace controls to heat billet to specified temperature, and sets shears to cut extrusion to desired length, using hand tools. Rolls cool billet from pallet to hydraulic charger of induction furnace, using tongs. Removes billet from furnace when colour indicates specified temperature, and guides it along extrusion press conveyor onto press bed, and into billet container. Moves controls to start ram that positions billet into press container, and squeezes it through die. Regulates rate of extrusion to prevent metal rupture and adherence of metal to container walls. Starts press run-out table and butt shears to guide extrusion from

press, and to trim flash. Pulls extrusion along conveyor to racking table or runs wire over guide pulleys to take-up reel on winder. Sprays or swabs die with lubricant and caustic, and oils blocks of mandrels. Records data, such as crew time, number of billets used, extrusion defects and items processed.
May be designated according to product extruded or metal processed; for example,
Lead Extruder(explosives)
Wire Extruder(non-ferrous metal)

8141-114 ROD DRAWER(iron & steel; non-ferrous metal) DPT:662

draw-bench operator.

GED: 3 SVP: 5 EC: I 5 PA: M 4 5 6 7

Sets up and operates draw-bench machine to draw metal rods into specified shape and diameter:
Determines size of mandrel and die required from work ticket, and requisitions specified tools. Positions and secures die on diehead, using hoist and hand tools. Moves levers to set drawing speed according to type and size of material drawn. Inserts pointed end of rod through die and pushes end into holding jaws on dolly. Sets automatic lubricating mechanism to facilitate drawing or swabs rod, using oil-soaked brush. Moves control that automatically forces and pulls rod through die. Examines surface of finished workpiece for defects, such as pits and scratches. Measures rod to verify conformance to specifications, using template, rule, calipers and micrometers. Replaces worn dies when rod deviates from specifications, using hand tools.
May actuate shearing mechanism to cut rods to specified length.

8141-118 TUBE DRAWER(iron & steel; non-ferrous metal) DPT:662

tube-reducer operator.

GED: 3 SVP: 5 EC: I 5 PA: M 2 4 5 6 7

Operates tube drawing-machine to reduce extruded tubing to specified diameters:
Positions and secures specified drawing die in diehead, and plug die on plug rod, using hand tools. Centers plug die in opening or exit of drawing die. Loads tube over plug manually or activates automatic loading mechanism. Presses switch to advance mandrel in position or fastens tube in cross head chuck. Sets stopper on carriage at specified distance to allow tube to trip and fall onto conveyor. Pushes tapered end of tube through drawing die. Adjusts lubricant flow in jaws of die to prevent breaks and scratches. Moves controls to start carriage that grips and pulls tube through die. Examines finished tubing for defects, such as scratches, pits, cracks, die marks and dents. Measures cross-sectional dimensions with fixed gauges and micrometers to verify conformance to specifications. Adjusts wall thickness by altering position of mandrel, using hand tools. Places fibre rings at intervals on tube to prevent damage when falling in run-out conveyor. Cleans die and mandrel using oil, rags and brushes. Keeps record of work performed.
May cut tube to specified length, using power table saw. May chamfer ends of tube, using file. May apply colour code, stamp and tag drawn tubes.

8141-122 WELDING-ROD-EXTRUDER OPERATOR(wire prod.) DPT:662
GED: 3 SVP: 5 EC: I 7 PA: M 4 5 6 7

Operates extrusion press to extrude, coat with flux or metallic paste, bake, mark, and cut welding rods:
Selects, positions, aligns, and bolts specified coating (extruding) nozzle, spacers, wire guides, abrasive brushes, cutters, and marking wheels to set up machine to form rods of specified diameter and length, using hand tools. Places slugs of compressed flux into feeding chamber on welding rod extrusion head. Places boxes of specified wire core on tilter, and pulls lever to dump cores into wire feeder. Pulls lever or presses button to set conveyor speed and extruding pressure. Starts machine that automatically coats and extrudes wire to form rod of specified diameter, and cuts it to length. Observes cores conveyed through wire feeder, past coating nozzle in extrusion head, past abrasive brushes and cutters, and into ovens to detect malfunctions. Examines welding rods for defects. Measures diameter of rod and concentricity of coating with fixed gauges. Presses buttons to alter pressure of ram in feeding cylinder or speed of wire feeder, and turns screws to adjust coating nozzle, or position wire guides, spacers, and brushes to eliminate splits, scores and burrs on cut ends. Varies

extrusion pressure or speed of conveyor, or repositions coating nozzle to vary diameter of rod.

May adjust controls to maintain specified temperature in ovens. May assist in machine repair.

8141-126 WIRE DRAWER(jewellery & precious metal prod.; wire prod.) DPT:662
wire-drawing-machine operator.
GED: 3 SVP: 5 EC: I 6 PA: L 4 5 6 7

Operates machine to draw wire or rod through one or series of dies to reduce their cross-sectional dimension:

Determines set-up procedures from specifications supplied, such as size of wire, number of passes, and amount of reduction required. Lifts coil of wire onto feed reel, using hoist, tapers end, and threads wire through die and straightening rolls. Attaches end to winding reel. Coats wire with lubricant to facilitate drawing. Starts machine and observes operation. Inspects and measures drawn wire to verify dimensions, tensile strength and electrical resistance, using wire gauges, micrometers and resistance testers. Cuts defective sections, using wirecutters. Places full reel at feeding position, and bare reel at winding end, adjusts or changes die for next pass, and repeats operation until wire is drawn to size specified. Replaces worn dies, using hand tools.

May weld end of coils, using butt welder. May be designated according to size or shape of wire drawn, or material processed; for example,

Fine-Wire Drawer

Tungsten-Wire Drawer(wire prod.)

8141-130 SHEATHING EXTRUDER(wire prod.) DPT:662
GED: 3 SVP: 4 EC: I 5 6 7 PA: M 4 5 6 7

Operates extrusion press to encase electric wire, cord or cable in rubber, plastic or lead sheath:

Bolts specified dies, guides, and guide holders in extrusion head of press, using hand tools. Clamps roll of rubber strip on spindle of machine, and threads strip into hopper-feeder, or fills hopper with plastic chips, or fills melting pot with lead billets. Sets temperature control of press according to type of material to be extruded. Loads spool of wire on reel of machine spindle or payout stand, using hoist. Threads wire or cable through machine and around take-up reel, or threads cable through die and cooling chamber, and fastens end to take-up reel. Starts machine and adjusts controls to regulate speed of wire travel, pressure of hydraulic ram, temperature of extrusion die, flow of metal, and pressure of water spray in cooling chamber to ensure sheath of uniform thickness. Guides lead-sheathed or rubber-covered wire through trough of water to cool coating slowly and evenly, or through trough of powdered talc or soapstone to prevent wire from sticking together when spooled. Clamps wire ends in electrodes of electric welder, turns on current, and holds brazing rod against heated wire tips to form continuous wire lengths. Measures diameter of product with micrometers and calipers to ensure conformance to specifications.

May be designated according to machine operated or material sheathed; for example,

Continuous-Vulcanizing-Machine Operator

Wire Sheather

8141-134 METAL POINTER(iron & steel; non-ferrous metal) DPT:682
GED: 3 SVP: 3 EC: I 5 PA: M 4

Operates machine that points or tapers end of tubes or rods to allow insertion in drawing die:

Changes squeezing die according to size of tube or rod to be drawn, using hand tools. Fills oil reservoirs, and opens valves to lubricate stock and die. Loads feeder, using hoist. Inserts end of tube or rod into die and starts machine to taper or reduce diameter of stock. Removes processed material, manually. Inspects and measures shaped ends to ensure conformance to specifications, using fixed gauges. Keeps record of type, number, and size of shaped material.

8141-138 DRAWER HELPER(non-ferrous metal) DPT:684
GED: 2 SVP: 4 EC: I 5 PA: M 4

Helps drawing-machine crew to set up, operate and maintain machines that draw metal tubes, rods or wire, by performing any combination of the following duties:

Obtains tools and dies from tool room, using handtrucks. Lifts, positions, secures and adjusts die, dieheads and plug onto machine, using hoist and hand tools. Places workpieces onto machine table, manually or using hoist. Moves lever to activate die carrier. Lubricates workpieces to facilitate drawing, using oil-impregnated cloth or brush. Cleans die after each pass, using air hose. Removes ejector block, and puts on table, using tongs. Moves draw-bench in position, using hand crank. Stacks drawn workpieces, according to specified procedure, and attaches tubes to crane, using straps and hooks. Makes metal, wood or fibre shims for use around draw-benches, using hand and power tools. Reconditions heads of metal stamps, using wire brush, grinder and files. Cleans and rustproofs tools used at draw-bench, using vapour blasting cabinet. See also definition for term title, 02-160 HELPER (any ind.).

May weld broken mandrel rods and ends, using butt welder. May be designated according to product drawn; for example,

Rod-Drawer Helper

Tube-Drawer Helper

Wire-Drawer Helper

8141-142 CABLE INSULATOR(wire prod.) DPT:685
GED: 3 SVP: 3 EC: I 5 PA: M 4 7

Tends machine to wind insulating material, such as tape, yarn, paper, asbestos or cloth around electric wire and cable:

Loads reel of wire or cable onto machine spindle, manually or using hoist. Threads wire or cable between metal and felt cleaning strips, through tank of liquid adhesive and through taping mechanism. Fastens wire or cable to take-up reel. Winds end or ends of insulating material around wire or cable, and starts machine. Observes automatic wrapping of material around wire or cable to detect broken or loose wrapping, bulging, uneven winding of wire or cable on reel, and to ensure proper tension on tape. Stops machine to repair breaks, adjust guides, and replenish supply of insulating material and liquid adhesive. Forms continuous wire or cable by clamping ends to be joined in electrodes of brazing torch, turns on current, and holds filler rod to heated ends or butt welds ends together. Measures wire or cable, to determine if insulation meets specifications, using micrometer. Wraps paper around full wire or cable reels, attaches identification tag, and lifts reel from machine, using hoist.

May operate machine equipped with winding device to wrap protective metal strip over insulation. May thread insulated wire through melted paraffin and polishing wipers to make insulation waterproof. May be designated according to insulating material applied, or type of machine operated; for example,

Laminating-Machine Operator

Paper-Wrapping-Machine Operator

8141-146 WELDING-ROD-EXTRUDER TENDER(wire prod.) DPT:685
GED: 3 SVP: 3 EC: I 7 PA: M 4 7

Tends machine that simultaneously extrudes carbon rods or forms welding rods coats core (wire) with flux or metallic paste, and , marks and cuts them into specified lengths:

Positions feeding cylinder containing metallic paste or flux over extrusion head of machine, and fills pot of marking device with paint. Starts and observes machine as cores are automatically conveyed through wire feeder, coating nozzle in extrusion head, and past abrasive brushes, cutters, and marking wheels. Examines welding rods for defects. Presses button to alter pressure of ram in feeding cylinder or speed of wire feeder to correct defects in formation of rods.

May measure welding rods with fixed gauge, and turn screws to adjust coating nozzle to obtain specified diameter and concentricity of rod. May adjust abrasive brushes that remove flux from ends and center of coated rod at cutting point. May adjust controls to maintain specified temperature when extruding carbon rods.

8141-150 WIRE-DRAWER HELPER(jewellery & precious metal prod.; wire prod.) DPT:684
GED: 2 SVP: 3 EC: I 7 PA: M 4 7

Helps operator of wire drawing-machine that reduces the cross-sectional dimensions of wire, and welds ends of wire to form a continuous coil:

Assembles dies on machine, using hand tools. Lifts reel of specified wire or bundle of rods onto spindle of floor stand, using hoist, and cuts tie bands, using shears. Straightens and squares ends with hand or foot cutter, and secures ends in welder. Welds ends of wire to form continuous roll, using butt-welding machine. Smooths weld to diameter of wire, using grinder or abrasive cloth. Threads wire around tension roller and through reducing dies. Fastens end of threaded wire to spindle of take-up reel. Unloads reel of processed wire from machine, using hoist. Inspects wire for defects, such as uneven spots, pits and broken welds. See also definition for term title, 02-160 HELPER (any ind.).

May verify size of wire drawn, using micrometers or fixed gauges.

8141-154 METAL-EXTRUDER-OPERATOR HELPER(non-ferrous metal) DPT:686
GED: 2 SVP: 2 EC: I 5 6 7 PA: M 4 7

Performs any combination of the following duties to help in the extruding of non-ferrous metals:

Sets marker on delivery table to stop extrusions at specified length, using hand tools. Pulls cable to activate saw that cuts extrusion when marker is reached. Separates billet stub from dummy block (steel cylinder positioned between press stem and billet to prevent stem entering billet) to complete extrusion cycle, using air hammer. Immerses dummy block in water and places in press chute for re-use, using tongs. Throws billet stub in metal container for return to furnace, using tongs. Sprays front face of die with graphite solution to prevent adherence of extrusion in die, using air spray gun. Inspects extrusions to insure conformance to standards. Keeps work area clean. See also definition for term title, 02-160 HELPER (any ind.).

8141-158 SHEATHING-EXTRUDER HELPER(wire prod.) DPT:686
GED: 2 SVP: 2 EC: I 3 6 7 PA: M 4

Helps to extrude lead sheath around rubber hose to promote uniform curing of hose:

Locks lead billet into clamp of press-loading arm. Swings loading arm into position over chamber of press, and releases clamp. Depresses pedal to start windup mechanism and guides lead-covered hose onto stock drum. See also definition for term title, 02-160 HELPER (any ind.).

May push lead billet, suspended from overhead monorail, into clamp of press-loading arm, and remove conveyor hook from billet after clamp has been closed. May roll filled stock drum to curing area.

8141-162 WELDING-ROD-EXTRUDER HELPER(wire prod.) DPT:686
wire charger.
GED: 2 SVP: 2 EC: I 5 PA: H 4

Helps in operation of welding-rod extrusion machines, performing any combination of the following duties:

Observes boxes of wire cores for specified size, places on tilter, and pulls lever to dump cores into wire feeder hopper. Places slugs of compressed flux into feeding chamber on welding rod extrusion head. Trims slugs, using knife to remove crust, and fits them into extrusion cylinder. Assists other workers to clear oven of jammed rods. Records data, such as temperature and mix for each batch of rods. Cleans machine. See also definition for term title, 02-160 HELPER (any ind.).

8141-166 CABLE-INSULATOR HELPER(wire prod.) DPT:687
GED: 2 SVP: 2 EC: I 5 6 PA: H 4 7

Helps in operation of extrusion press to insulate electric cable, performing any combination of following duties:

Moves rubber strips from rubber mill to extruder machine, using hand truck. Feeds plastic pellets or rubber strips into hopper of extruder machine that sheathes cable with insulation. Winds adhesive tape around cable ends to waterproof it during insulation. Guides sheathed

cable onto take-up reel as it emerges from extruder. Clamps fittings onto cable ends, and lowers reel into autoclave, using hoist. Connects air hoses and clamps autoclave cover in place. Turns valves to equalize autoclave pressure to prevent distortion of rubber sheath during curing period. Removes reel from autoclave onto payoff spindle of stripping machine. Adjusts slitting knife of stripping machine according to thickness of lead-sheathed cable, and threads cable beneath knife and spreader attachment. Feels stripped cable for lumps as it emerges from stripping machine and removes lumps with sandpaper. Keeps log of cable stripped. Transports reel of cable to continuous vulcanizing machine. Cleans and stores printing wheels, changes ink and refills supply tank. See also definition for term title, 02-160 HELPER (any ind.).

May be designated according to task performed; for example,

Reel Tender

Spooler and Coiler

8143-PLATING, METAL SPRAYING AND RELATED OCCUPATIONS

This unit group includes occupations concerned with treating the surface of metal stock materials or products by such processes as electrolysis, dipping in molten metal, chemical baths, spraying (metal on metal), anodizing, bluing, tinning, plating, galvanizing or metallizing, to apply decorative, protective or other coatings.

8143-110 JEWELLERY COVERER(jewellery & precious metal prod.) DPT:381
GED: 3 SVP: 6 EC: I 6 7 PA: L 4 7

Covers metals, such as tin, zinc, brass and nickel with strips of gold or silver preparatory to making jewellery articles:

Cuts strips of precious metals, such as gold or silver, to size of base metal to be covered, using hand shears. Cleans and smooths surfaces to be joined, using emery wheel, borax or flux solution. Places solder on each side of base metal and positions precious metal on solder. Positions assembled unit in screw press, and squeezes metals together to exclude air. Brushes borax paste on joints to prevent oxidation. Places unit in gas furnace and regulates temperature to solder precious metal covering on base metal. Observes heating to determine when metals have been soldered. Removes soldered unit from furnace to cool. Pickles, rinses, sands or brushes cooled article to wipe off impurities and impart partial lustre.

May be designated according to covering metal used; for example,

Gold Coverer

Silver Coverer

8143-114 ELECTROPLATER, METAL(metal stamp., press. & coat.) DPT:481
GED: 4 SVP: 5 EC: I 3 4 6 7 PA: M 4 7

Controls plating equipment that deposits metal covering on objects to provide protective or decorative surfaces, or to rebuild worn surfaces:

Fills plating tank with required acid and salt solution. Immerses and hangs anodes or bags of plating metal in tank on positive terminal. Lights burners or turns steam valve to heat solution to specified temperature. Scrapes and brushes articles to remove impurities and prevent flashes or burns. Paints or tapes areas of articles not requiring plating. Places components in fixture, jig, rack or barrel. Cleans objects by immersing in cleaning and rinsing baths. Dips or brushes non-metallic objects with metal solution to form an electrically conductive base coat. Lowers barrel or suspends rack or jig on bus-bar (negative terminal) of plating solution. Estimates amount of current needed and time required to plate object according to size, plating solution and thickness of deposit required. Controls flow of current from anode to cathode, causing metal to be deposited on object. Lifts objects at intervals to inspect progress of plating. Removes objects from plating tank, and tests thickness of plating deposit with micrometers, calipers or plug gauges. Dips and rinses objects in steam and clear water. Dries objects with cloth, tumbles them in rotating sawdust barrel, or hangs them to dry.

May strip paint from objects by immersing in acid. May burn chrome on metal parts, such as dies and tools, to maintain, protect or build them up. May direct other workers in racking, cleaning or dipping

objects in tank. May be designated according to objects plated or solution used; for example,
Filament Coater
Nickel Plater

8143-118 CYLINDER PLATER-GRINDER(mech. equip., n.e.c., metal stamp., press. & coat.) DPT:681
GED: 3 SVP: 5 EC: I 6 7 PA: L 3 4 7

Electroplates rotogravure printing cylinders and plates with coating of copper and chrome, and polishes them to specifications, using grinding machine:

Immerses cylinder in cleaning bath, using chain hoist. Removes cylinder and places it in copper sulphate plating solution for prescribed period of time to cover it with copper. Removes cylinder from plating vat, rinses in water, and fastens it between centers of grinding machine, using hand tools. Selects and fastens abrasive wheel onto spindle of machine. Starts machine and turns handwheels to bring abrasive wheel into contact with surface of cylinder, and to engage automatic feed. Measures dimension of cylinder surfaces during grinding and polishing operation, using micrometers to obtain required precision. Removes finished cylinder from machine and places it in rack.

8143-122 PICKLER OPERATOR(any ind.) DPT:662
electrolytic-cleaner operator.
GED: 3 SVP: 5 EC: I 6 7 PA: M 4 5 6 7

Operates controls of pickling or electrolytic-cleaning line to remove dirt and oil from coils of metal strip and wire, and shears coil to specified dimensions:

Turns valve to add acid or caustic solution to processing tanks and shovels or directs helper to shovel inhibitor into tanks to obtain baths of specified concentration. Installs and adjusts guides, pinch and leveler rolls, and side shears on processing line, according to specified dimensions of coils to be cleaned, using hand tools. Adjusts rheostat to synchronize speeds of rolls and reels. Moves controls to regulate speed of coil through line, to shear coil on each side of weld or stitch, and to remove coil from take-up reel. Threads strip of metal or wire through pinch and tension rolls, and loops end on take-up reel. Verifies dimensions of coils, using micrometer and measuring tapes. Examines surface of coils to verify removal of dirt, oil and scale, and cuts out defects, such as torn edges, holes and pinch marks, using shears. Tests concentration of solution in baths, using titration test equipment, and adjusts processing line controls to ensure conformance to specifications.

May be designated according to type of line operated or work performed; for example,
Electrolytic De-Scaler
Galvanizer Cleaner

8143-126 COATER OPERATOR(metal stamp., press. & coat.) DPT:682
GED: 3 SVP: 5 EC: I 3 5 7 PA: M 4 7

Controls automatic coating machines to deposit and bake protective or decorative coating of paint, vinyl, plastic, or metal on metal plates, sheets, strips, or coils:

Turns screwdown mechanism to set distance between coating brushes and rolls and to adjust transversal bar, to control thickness of coating, using hand tools. Measures and sets stops and guides on automatic feeder and conveying equipment according to dimensions of product to be coated, using rule and wrenches. Lights pilot light of gas oven and sets temperature of drying line. Turns controls to regulate speed of feeding metal and flow of chemicals that maintain specified viscosity of solution. Loads feeder with sheets, strips, or coils, manually, or using hoist. Fills degreasing reservoir with solvent to remove grease and other residue before coating. Observes gauges and moves controls to regulate brake tension. Turns valve to control spray of water in quenching process. Starts machine and examines product for defects such as air bubbles, uncoated surfaces, scratches, pit holes, and paint blisters, and adjusts setup.

May stitch and staple metal strips together to form continuous strip. May cut sections from coated metal and inspect coating thickness and gloss, using electronic gauges and meter. May perform impact test to evaluate coating properties, using impact tester and scribes. May be designated according to object coated for example,

Roll Coater
Sheet Dipper

Strip Coater

8143-130 ELECTROGALVANIZER(metal stamp., press. & coat.) DPT:382
electrogalvanizing-machine operator.
GED: 3 SVP: 5 EC: I 3 6 7 PA: H 4 7

Operates continuous multistrand electrogalvanizing and heat-treating machine to coat steel strip or wire with zinc or cadmium:

Mixes solutions according to specifications. Fills cleaning, pickling, galvanizing, and rinsing tanks. Charges furnace with gas or coal to melt zinc and prepare for galvanizing. Threads reels of wire into machine or suspends metal strips on tank bus-bar. Moves controls on rheostat and generators to regulate movement of strand between reels, plating tanks, and coils, to control thickness of coating, and to regulate temperature of leadpot, cleaners, picklers, and plating tanks. Performs such tests as titration of solution, Rockwell tests of hardness, dip coating tests, and tests of butt-weld, and adjusts equipment to attain production specifications. Records test results on daily inspection sheets. Inspects visually and with micrometers for specified coating, washing, and alignment of strands. Resets and changes combs when changing width and number of strands. Changes anodes and recharges leadpot at specified intervals.

May place galvanized steel strips or wires under salt-spraying machine to determine coating thickness by measuring length of time required for salt to break through coating. May be designated according to galvanizing metal used; for example,
Cadmium Galvanizer
Zinc Galvanizer

8143-134 CORROSION-RESISTANT-METAL SPRAYER(metal stamp., press. & coat.) DPT:482
GED: 3 SVP: 5 EC: B 5 6 7 PA: H 2 3 4 7

Controls portable flame spray equipment to spray corrosion-resistant coatings on objects such as plates, structural shapes, bridges, smoke stacks and water and storage tanks:

Mixes materials, such as aluminum or zinc metal paste, catalyst and compounds according to job specifications. Cleans and roughens surface of object to be coated, with blast of abrasive-laden compressed air. Selects nozzle to accommodate size of wire to be sprayed and screws it into place on metallizing gun. Inserts wire to be sprayed into rear of gun and through feed rollers and nozzle. Connects hoses from gun to air compressor, tanks of oxygen, and fuel gas, such as acetylene or propane. Turns knobs to synchronize speed of wire feed, air pressure, flow of oxygen and fuel to specifications computed from data charts. Ignites gases to melt wire, and activates control handle to release compressed air which atomizes and sprays melted metal onto workpiece. Directs spray over surface of workpiece in definite pattern, to obtain coating of specified thickness as indicated by electromagnetic or thickness gauges, or amount of wire used. Cleans metallizing equipment, using cleaning compounds.

May rig or erect scaffolding. May flame-spray non-metallic objects, such as glass or plastics.

8143-138 METAL-SPRAY OPERATOR(metal stamp., press. & coat.) DPT:682
flame-spraying-machine operator; metallizer operator.
GED: 3 SVP: 5 EC: I 5 6 7 PA: M 4 7

Operates spray equipment and machine tools to build up worn or damaged parts or to bond protective and decorative coatings on metal objects:

Washes surface of object to be metallized with solvent, or places article in furnace, or heats with torch to remove impurities, such as grease and paint. Sprays sizing material to facilitate adherence of metallizer. Positions workpiece into holding fixture of conveyor or into engine lathe to undercut and groove surface. Selects and screws nozzle on gun, and positions it at specified distance from workpiece, according to material size and contours. Connects hoses from gun to air compressor and tanks of fuel gases. Sprays metal or other material on object by one of following methods: 1. Positions and clamps metallizing gun to engine lathe. Threads wire into rear of gun and through feed rollers and nozzle. Turns knobs to synchronize speed of wire, air pressure and flow of fuel. Installs gears in lathe and turns knobs to synchronize rotating speed of chuck and movement of carriage with rate of spray. Ignites gases to melt emerging wire at nozzle and presses button or pulls trigger to release compressed air which atomizes and sprays molten metal onto workpiece. 2. Pours

specified powder of metal or other material, such as ceramic, into hopper mounted on metallizing gun. Synchronizes feeding rate of powder and flow of gases, according to type of powder. Sprays and fuses particular coatings by heating with torch or in heat-treating furnace, and cooling objects slowly to prevent cracking. Inspects and measures workpiece, before, during, and after metallizing to ensure exact thickness of metal applied, using caliper, rule, micrometers and gauges.

May roughen and clean surface of workpiece, using sand-blasting equipment and pneumatic hammer. May operate portable gun to fill cracks or holes, and apply coating to restore flat, or irregular, damaged or worn surfaces of objects. May be designated according to type of equipment used; for example, Thermospray Operator

8143-142 ELECTROLESS PLATER(metal stamp., press. & coat.) DPT:484

GED: 3 SVP: 4 EC: I 7 PA: M 4 7

Coats small steel valve parts with nickel plate, using non-electric dipping process:

Mixes solution and fills dip tank with nickel salt solution. Sets controls to keep tank at specified temperature. Fills basket with parts to be plated, and immerses first in cleaning bath and then in plating tank. Determines processing time according to thickness of plating required. Removes parts when process is completed. Gauges parts frequently with micrometers to ensure that specified tolerances are maintained. Adds plating solution or refills tanks, as necessary, to complete plating process.

May heat-treat plated articles to give them longer wear and corrosive resistance. May repair and replace liners of plating tanks.

8143-146 ELECTROPLATER, PHONOGRAPH MATRICES(metal stamp., press. & coat.) DPT:684 matrix plater.

GED: 3 SVP: 4 EC: I 4 5 PA: L 4 7

Electroplates lacquer disks (master) to produce matrices used as stampers on phonograph record press machines, and produces stampers from mould (sensitized metal record):

Places lacquer disk in automatic spray machine to sensitize (produce electrical conducting surface) by spraying with silver solution. Hangs sensitized disk in nickel or copper baths to form negative master matrix of lacquer disk. Adjusts controls and observes ammeter, dials and gauges to ensure that solutions and electric current flowing through solutions are maintained as specified. Removes plated disk from plating bath after specified time, and washes and dries it, using hot water. Removes metal disk (original or negative) from lacquer disk, using circular cutter. Polishes back surface of metal disk with hand sanding machine and centers and punches hole in matrix, using punch press. Shapes edges, using forming fixture, and cleans surface to prevent adhesion in subsequent plating processes, using steam jets. Produces stamper by sensitizing negative, plating negative to form mould (positive disk), sensitizing mould, and plating mould. Verifies plating accuracy by checking dimensions of original, moulds and stampers, using precision measuring instruments. Cleans anodes and hangers, and replaces spent anodes to maintain plating baths in efficient operating condition. Maintains record of stampers processed. May prepare plating solution by adding specified amounts of ingredients.

8143-150 GALVANIZER, HOT DIP(metal stamp., press. & coat.) DPT:685 dipper; galvanizer.

GED: 3 SVP: 4 EC: I 3 6 7 PA: M 4 7

Tends cleaning and galvanizing equipment to clean and coat iron and steel products with zinc for protection from corrosion:

Suspends metal objects such as pails, shelving, water boilers and tanks from conveyor hooks or hoist or places them in wire baskets. Immerses objects in pickling and washing solutions to clean surfaces of scale and foreign matter. Lowers objects into tank of ammonium chloride or other flux to protect surface from oxidation and facilitate coating. Dips metal objects into tank or kettle of molten zinc, by hand or using hoist or conveyor, to coat them with zinc. Removes objects from tanks after specified time. Places objects such as nuts and bolts in centrifuge, and starts machine to cool objects and remove excessive coating. Places objects such as shelving into water tank to cool. Inspects galvanized products for even and complete coating, and

returns defective items for reprocessing. Adjusts controls to maintain specified temperature in molten zinc and cleaning solutions. Adds coating metal and chemicals to maintain specified levels and mixtures in cleaning, dipping and fluxing tanks.

8143-154 SHERARDIZER(metal stamp., press & coat.)

DPT:685

GED: 3 SVP: 4 EC: I 3 5 PA: M 4 7

Tends sherardizing tumbler furnaces and related equipment to coat steel objects with protective coating of zinc:

Lights and adjusts gas burners of pot to melt zinc. Fills pot with slabs of zinc. Tips pot of molten zinc into vat of water to form zinc flakes. Retrieves zinc flakes from bottom of vat, using long-handled shovel. Weighs specified amount of flaked zinc and ammonium chloride (flux), using platform scale. Dumps flakes and flux into sherardizing hopper. Lights and adjusts gas burners of tumblers and drying drum. Adds specified amount of cob meal or sawdust to drying tumbler. Dumps boxes of unheated objects into tumbler, using electric hoist. Starts machine and sherardizes objects according to specifications. Inspects objects to ensure complete coating. Starts separator and conveyor, and regulates tumbler that dumps articles into separator to free parts stuck together, and drops others onto conveyor that passes through water-filled cooling pits and into drying drum.

8143-158 WIRE-COATING TENDER, METAL(metal stamp., press. & coat.) DPT:685

GED: 3 SVP: 4 EC: I 3 6 PA: M 4 7

Tends one or more machines equipped with series of tanks to coat wire with corrosion resistant material such as tin, zinc, or lead:

Lifts and mounts coils of wire on feed reels. Threads end of wire through series of guides, rollers, wipers, and tanks and secures end to rewind reel. Turns valves to heat coating material to molten consistency and set specified temperature of fluxing, cooling and cleaning baths. Moves controls to start machine, set tension on wire and adjust speed that wire feeds through tanks. Measures finished wire to ensure uniformity of coverage using micrometer or gauges. Adjusts machine settings to regulate thickness of coating. Adds coating metal and chemicals to maintain specific levels and mixtures in cleaning, dipping and fluxing tanks.

May weld ends of wire together, using butt-welder, to maintain continuous wire coating operation. May be designated according to type of coating material or type of wire coated; for example,

Lead Coater
Wire Tinner

8143-162 ANODIZER(metal stamp., press. & coat.) DPT:485 white-metal-corrosion proofer.

GED: 2 SVP: 4 EC: I 5 7 PA: L 4

Tends anodizing equipment to provide corrosion resistant surface to aluminum objects:

Selects holding racks according to size, shape and number of objects to be anodized. Wires, clips or bolts objects onto rack, to secure them, manually or using wrench. Immerses rack in series of cleaning, etching and rinsing baths to remove dust, grease and dirt. Positions objects in anodizing tank by suspending rack on tank bus-bar. Computes amperage and voltage required, using conversion chart. Adjusts rheostat to regulate flow of current. Removes objects from tank after specified time, rinses objects, and immerses them in bath of hot water or dichromate solution to seal oxide coating firmly on surface. Hangs objects on racks to dry.

May immerse objects in dye bath to colour them for decorative or identification purposes. May inspect objects for colour conformity, by moving reflection meter over surface and reading meter dial, or by comparing colour with sample of finished product. May be designated according to anodizing process used; for example,
Clear Anodizer
Colour Anodizer

8143-166 ELECTROLYTIC-STRIPPING-TANK TENDER(metal stamp., press. & coat.) DPT:685 stripper.

GED: 2 SVP: 3 EC: I 3 4 6 7 PA: M 4 7

Tends electrolytic stripping tank to remove metal coating from objects: Loads tumbling barrel or basket, or hooks objects on metal rack. Starts

tumbling barrel and sprays with steam and cold water, or immerses basket or rack in hot cleaning solution and rinsing baths to remove grease and dirt. Lowers rack, basket or tumbling barrel into electrolytic tank filled with sodium cyanide solution, manually or using chain hoist. Connects positive charge (anode) to rack, basket or barrel. Moves controls on rectifier to flow current from objects to positive charge, causing coating on objects to decompose into solution. Turns valves to regulate temperature and level of liquid in tank. Turns controls to set timing cycle and to regulate flow of current through solution. Dips rack, basket or barrel loaded with stripped objects, into rinsing tank, manually or using hoist. Tests strength of cleaning and stripping solutions, using hydrometer. Adds chemicals to solution to maintain specified concentrations.

May immerse stripped objects in oil bath to impart rustproof coating. May be designated according to type of stripping tank tended; for example,

Chromium Stripper
Nickel Stripper

8143-170 ELECTROPLATER, PRODUCTION(metal stamp., press. & coat.) DPT:685
GED: 2 SVP: 3 EC: I 4 5 6 7 PA: M 4 7

Tends plating equipment to coat metal objects electrolytically with copper, chromium, nickel or other metal to build up, protect or decorate surfaces:

Dips components in cleaning solutions, or brushes them with detergent and water, or places objects in mesh container and immerses them in cleaning solution. Places components in fixture, jig, rack or perforated barrel and immerses them in plating solution. Sets timer for specified plating time and turns on electric current, or starts rotation of barrel. Observes meter and turns dial to maintain specified current in plating solution. Removes plated components and immerses them in rinsing tank. Examines components for plating defects. Dries plated objects by methods, such as tumbling in sawdust-filled box or directing blast of air. Adds water or other materials according to specifications to maintain mixture and level of cleaning, rinsing and plating solutions. Cleans plating and cleaning tanks.

May immerse objects in non-electrolytic solution of gold or silver to plate them by flash-immersion method. May replace anodes and cathodes of plating equipment. May be designated according to plating method or metal used; for example,
Plater, Barrel
Plater, Chromium

8143-174 FIREARMS FINISHER(metal stamp., press. & coat.) DPT:685
browning processor.
GED: 2 SVP: 3 EC: I 3 4 7 PA: M 4 7

Tends equipment that imparts decorative brown-black colour, and hard, corrosion-resistant surface to gun barrels:

Mixes solution of acids and metallic salts, according to formula. Brushes or sponges solution onto exterior of barrels. Places barrels on conveyor that carries them through electrical drying and preheating oven into steam chamber where controlled temperature and humidity promote oxidation. Rinses barrels in boiling water, and holds them against wire or fibre brush wheel to remove loose rust particles and produce satin finish. Repeats rusting and brushing cycle until colour of barrel conforms to specified standards. Swabs browned barrels with rust-preventing oil, using rag or sponge.

8143-178 METAL DIPPER(metal stamp., press. & coat.) DPT:685
oxidized-finish plater.
GED: 2 SVP: 3 EC: I 4 6 7 PA: M 3 4 7

Immerses metal parts in tanks containing chemical solution to oxidize and impart a rustproof, lustreless, or decorative finish:

Moves controls to maintain temperature, flow and composition of liquid. Dips articles by one or more of the following methods: 1. Loads conveyor that automatically dips articles. 2. Loads wire basket and starts power hoist to lift and dip basket, or immerses basket in tank manually. 3. Hooks or bolts articles on taped or rubber-covered metal racks, and hangs racks on bus bar of tank for specified time. Removes racks from tank, and dips them in successive baths to clean articles and neutralize solution effects. Removes excess coating with rag or brush. Tests quality of solution, using chemically treated paper,

colour charts or other devices. Adds water or chemical to tank to bring solution to standard.

May tend centrifugal drier to dry and remove excess coating. May operate tumbling barrel to dry articles in sawdust. May sand or wet-buff dipped articles to impart smooth, satin finish, using revolving compound-impregnated cloth wheels. May be designated according to metal used in plating solution; for example,

Bright-Copper Coater
Chrome-Satin Finisher
Tin Coater

8143-182 TUMBLING-MACHINE TENDER(metal stamp., press. & coat.) DPT:685
lubricating-machine tender.
GED: 2 SVP: 3 EC: I 5 PA: M 4

Tends tumbling machine that sprays lubricating solution on parts, such as cartridge cases and detonators, and dries them preparatory to forming operations:

Trucks parts from forming operations. Empties containers of parts into hopper, or into tumbling barrel, manually or using hoist. Closes and clamps door of tumbler, and turns handwheel to regulate spray of lubricating solution. Reads gauges and adjusts steam valves or electrical controls to maintain specified drying temperature. Starts machine and lets drum turn for prescribed period, to lubricate and dry parts. Positions empty container at discharge chute or under opening of barrel, to receive dried parts. Removes filled containers, using handtruck.

May be designated according to parts processed; for example,
Case Oiler-and-Dryer

8143-184 ELECTRO-FORMER(metal stamp., press. & coat.) DPT:684
GED: 2 SVP: 3 EC: I PA: L 4 7

Mixes electrically-conductive solutions and sprays, brushes or smears solution on non-conductive objects for electroplating:

Measures and mixes quantities of silver solution, salt, sugar and nitric acid, according to formula, using scales and mixing glasses. Tests mixture, using laboratory equipment. Deposits mixture in containers or in spray tank. Positions objects, such as baby shoes or plastic moulds on work table, or positions lacquer disks on spindle of turntable in spraying booth. Sprays, brushes, or smears objects with cleaning and other solvents to prepare them for coating. Rinses objects in clear water. Sprays, smears or brushes electrically-conductive silver coating solution on objects.

May place objects, such as pre-recorded lacquer disks in spraying machine that automatically cleans and sprays surface with silver solution. May dip items, such as baby shoes or plastic moulds, in successive baths to clean and render them electrically conductive. May be designated according to method and conductive agent used; for example,

Silver-Spray Man.

8143-186 PICKLER-OPERATOR HELPER(any ind.) DPT:686
GED: 2 SVP: 3 EC: I 6 7 PA: M 4 7

Helps operator to clean coils of metal strips and wire by feeding metal through electrolytic cleaner:

Sets specified spacing between tension regulating rolls. Adjusts wipers, brushes, and feed guides, using hand tools. Places metal coil in feed-out reel, manually or using hoist, and feeds leading edge of coil into rollers. Moves controls on automatic arc or butt welding machine to lock and weld trailing edge of processed coil to leading edge of coil on feed-out reel to form continuous strip or wire. Stacks processed coils on skids. Assists in threading strip through cleaning tanks, manually. Cuts out defects or samples, using shears. Prepares and inserts markers in processed coils. See also definition for term title, 02-160 HELPER (any ind.).

May tend wiping station of galvanizing tank to wipe excess coat and smooth surface of wire, by feeding wire under pressure between two asbestos cloths.

8143-190 METAL-SPRAY TENDER(metal stamp., press. & coat.) DPT:685

GED: 2 SVP: 2 EC: I 3 5 6 7 PA: M 4 7

Tends spraying equipment that cleans, sprays, coats, and bonds protective or decorative coatings to metal objects:

Loads objects on conveyor, or fastens them in fixture. Places articles in sandblast or shotblast cabinet, or sets wheelabrator controls to regulate speed of conveyor and grit feed pressure to clean and roughen objects. Preheats objects for spraying, in furnace, or using oxyacetylene torch or metallizing gun. Sets controls on panel to regulate conveyor speed, rate of wire feed, powder or zinc spray, and flow of compressed air and fuel gases. Ignites gases to melt wire and presses button or pulls trigger to release compressed air which atomizes and sprays molten metal onto workpiece. Directs spray over object to apply coating of specified thickness.

May clamp soft-soldered-sprayed workpieces together, such as radiator fins and tubes, and place in heating furnace to melt solder coating and bond pieces together. May dip objects in acid bath to clean them. May be designated according to object sprayed, or type of metal used; for example,

Clutch-Plate Sprayer(mech. equip.; motor vehicle)

Conduit-Piping Sprayer(any ind.)

Solder Sprayer(any ind.)

8143-194 VACUUM-METALLIZER TENDER(metal stamp., press. & coat.) DPT:685

GED: 2 SVP: 2 EC: I 3 7 PA: L 4

Tends vacuum metallizing equipment that deposits decorative or protective coating of specified metal on metal, glass or plastic objects:

Hooks or clamps articles onto rack. Positions pieces of coating metal over heating filament on rack. Pushes or positions rack in vacuum chamber, manually or using hoist. Connects gear to motorized jig that rotates rack inside chamber. Closes door and turns handles to seal chamber. Starts booster and high vacuum pumps and observes dials to obtain specified state of vacuum in chamber. Pushes button to heat filament which vaporizes coating metal and deposits it as film on metal objects. Turns off electric current after specified time and turns handwheel to permit air to enter chamber. Opens door, removes rack, and lifts coated objects onto truck or dolly.

8143-198 PLATING-ROOM HELPER(metal stamp., press. & coat.) DPT:686

racker.
GED: 2 SVP: 2 EC: I 4 6 7 PA: M 3 4 7

Helps operator or tender involved in cleaning, coating, galvanizing, plating or sherardizing metals, performing any combination of the following duties:

Fastens metal objects to hooks or plating racks, or places objects in baskets or barrels for immersion in cleaning, plating or rinsing solutions. Carries articles between conveyors. Dips objects in cleaning solution. Immerses objects in plating or galvanizing solutions, and suspends them from cathode bar. Removes objects from hooks, baskets or racks and examines them for defects, such as rough spots, thin plating, flashes and dirt. Dries articles by methods such as, tumbling in sawdust-filled barrel or box, placing in oven or centrifugal drier, or hanging up to air-dry. Packs objects in boxes or cartons for shipping. Chips built-up plating metal from racks, using hammer or compressed-air vibrator. Coats racks with shellac, paint, or wraps them with rubber tape. Replaces damaged clips or hooks on racks. Skims oxide spelter ash and foreign materials from surface of molten metal in plating tanks. Adds water or chemicals, according to specifications, to maintain mixture and level of cleaning, rinsing and plating solutions. Adjusts temperature valves to maintain heat at required level. Changes, replenishes or replaces anodes in plating tank, or adds zinc slabs in melting pot for galvanizing or sherardizing. Cleans work area. See also definition for term title, 02-160 HELPER (any ind.).

May be designated according to worker helped; for example,

Galvanizer Helper

Sherardizer Helper

8143-299 OTHER PLATING, METAL SPRAYING AND RELATED OCCUPATIONS

This definition includes platers, metal sprayers and related workers, not elsewhere classified; for example, those who tend cataphoresis coating equipment to recoat heater wires in electron tubes, clean metal articles, prior to plating, using vapour degreaser, attach and detach aluminum extrusions from anode racks, tend grit-blast machines to clean and smooth surfaces of metal articles, preparatory to plating, spoon dross from galvanizing or tinning tanks, and spray heat-resistant material on inside of articles. Typical examples of occupational titles covered by this residual group definition are:

Metal Cleaner(metal stamp., press. & coat.)

Production Helper(metal stamp., press. & coat.)

Skimmer(metal stamp., press. & coat.)

Sprayer(metal stamp., press. & coat.)

8146-INSPECTING, TESTING, GRADING AND SAMPLING OCCUPATIONS, METAL PROCESSING

This unit group includes occupations in inspecting, testing, grading, and sampling work, as described under the term titles, 02-170 INSPECTOR (any ind.), 02-430 TESTER (any ind.), 02-150 GRADER (any ind.), and 02-330 SAMPLER (any ind.), concerned with quality-control activities in metal processing.

8146-110 HEAT-TREATING INSPECTOR(metal fab., n.e.c.)

DPT:281

GED: 4 SVP: 7 EC: I 3 5 6 7 PA: M 4 7

Inspects parts and assemblies before and after heat treating for conformance to specifications:

Examines parts for cleanliness and previous inspection clearances. Observes heat-treating processes, reading pyrometer and other control dials at specified intervals to determine that proper temperatures, and soaking and cooling times are maintained. Examines processed parts for conformance to specifications, using hand tools and precision measuring instruments. Stamps approved items and writes rejection notices and re-work orders on parts not meeting specifications. Enters inspections results in log book.

May operate equipment to determine hardness of parts and thermal treatment required to process parts as specified on work cards.

8146-118 TENSILE STRENGTH TESTER, METAL(iron & steel; non-ferrous metal)

DPT:381

metal tester, physical.

GED: 4 SVP: 6 EC: I PA: L 4 7

Measures tensile strength, ductility, or other physical properties of metal specimens, following a prescribed series of operations on various types of testing machines:

Determines tensile strength on tension-testing machines. Measures dimensions of specimen with scales and micrometers, and records measurements. Screws or clamps article in holders on machine. Clamps extensometer onto specimen and connects wire from extensometer to automatic stress-strain recorder. Turns handwheels or moves levers to apply tension to specimen at specified rate. Notes reading of indicator dial on control panel of machine, or observes stress-strain curve (curve obtained by plotting applied tension against resultant elongation) being drawn by recorder to determine yield point and tensile strength of article. Removes pieces of broken article from machine, fits them together, and measures amount of elongation. Makes simple calculations of values, such as unit tensile strength, and percentage of elongation, using tables. Records readings and calculations on special forms. Measures ductility of sheet-metal specimens in sheet-metal testing machine. Operates magnetic testing equipment to detect fractures and surface defects. Positions parts in dipping chamber of machine containing suspended iron oxide solution. Starts current inducing a magnetic field to attract and accumulate iron oxide particles at defective points. Determines weight and uniformity of metal coating on articles, using stripping solution, gas evolution apparatus, and analytical balance.

May test specimens for plasticity and compression. May measure hardness of specimens.

8146-122 COMBUSTION TESTER, FURNACE(iron & steel) DPT:381

combustion technician.

GED: 4 SVP: 5 EC: I 3 5 6 7 PA: L 4 7

Measures performance of open hearth furnaces and boilers to provide process control and efficiency analysis information, using testing instruments:

Performs air infiltration tests on open hearth furnaces to detect leakages, using gas analysis equipment. Takes combustion, moisture and pressure measurement tests at various stages of operation to provide process control information, using pyrometer, dew point apparatus and gas analysis equipment. Tests waste gas system of furnaces and blooming mills to detect leaks. Investigates utility losses, such as gas and water leaks. Performs minor repairs on test apparatus, using hand tools. Compares obtained readings with calibrated standards to test accuracy of recording devices. Assists in calibrating boiler control system, using gauges.

8146-126 METAL PROCESSING INSPECTOR(iron & steel; non-ferrous metal) DPT:381

GED: 3 SVP: 6 EC: I 3 5 6 7 PA: M 3 4 7

Inspects metal products, such as blooms, bars, ingots, rods, plates, extrusions, forgings, sheets and strips, for conformity to customer's specifications, using testing and measuring instruments:

Verifies dimensions and tolerances of metal products, using measuring instruments, such as ruler, micrometer, vernier, calipers and gauges. Examines product for flatness, straightness or roundness, and defects such as cracks, slivers, scars, wrinkles, inclusions and discolourations. Outlines defective areas, using chalk or paint. Conducts hardness, heat resistance, pickle, electrical, immersion and weight of coating tests, using upset hammers, hardness testing machines, heating furnaces, verniers, calipers and micrometers. Records variations from dimensional specifications, type of defect, test results, and materials scrapped or salvaged. Establishes porosity range of production sheet and intrusion ingots, and determines grain size on direct casting, to ensure conformity to customer's specifications, using ultrasonic testing equipment, scalping and dye-check method. Cuts test sample from products. Inspects printed stock and packaged materials and products for conformance to printing, packing, labelling and shipping procedures. Reports inspection results to machine operators or supervisor.

May obtain samples of metal for laboratory analysis. May be designated according to product inspected or stage of processing; for example,

Axle Inspector(iron & steel)

Cold-Mill Inspector

Finishing Inspector

8146-130 SAND TESTER, FOUNDRY(iron & steel) DPT:381

GED: 3 SVP: 5 EC: I PA: L 4 7

Tests foundry sand to determine its suitability for making sand moulds or cores:

Collects samples of sand mixes used for making moulds and cores in iron-casting foundry, and compresses sand into sample piece, using sand rammer. Determines properties of sand samples, such as moisture content, permeability, compression and shear strength, clay content, and sand-grain size and distribution, using sand-test equipment, such as moisture meter, permeability meter, sand-strength tester and sieve set. Records test results and rejects unusable sand mixes.

May perform similar tests on ladle lining refractories. May test quality of incoming materials, such as cereal or core oils to be used in sand mixes. May cut, grind and polish test plugs and sample castings for microscopic examination of metal structure by laboratory personnel.

8146-134 WIRE INSPECTOR(wire prod.) DPT:384

tester and inspector, wire.

GED: 3 SVP: 5 EC: I 5 PA: M 4 7

Inspects and tests coated or uncoated wire for such properties as hardness, size, cross sectional shape and tensile strength:

Reads written specifications, or receives oral instructions and determines work aids required and inspection procedures. Tests wire for elongation and tensile strength by inserting wire in various testing devices, such as compression, torsion, bending, and hardness testing machines, and noting instrument readings. Measures wire for size, using micrometers and fixed gauges. Calculates cross-sectional areas, using micrometers. Cuts wire sample from each order, using wire

cutters, and forwards sample to laboratory for analysis. Examines wire for defects, such as pits, scratches, burnt surfaces, slivers, irregularly shaped sections and chatter marks (vibrations emitted by wire drawn tight in draw die). Records test results and tags inspected wire. Informs foreman when wire varies from specifications.

May test wire for defective insulation and resistance to high temperature, using electrical testing equipment and electric heating furnace.

8146-138 CASTING INSPECTOR(iron & steel; non-ferrous metal) DPT:687

GED: 3 SVP: 5 EC: I 5 7 PA: M 4 7

Inspects metal castings for dimensional accuracy and surface defects: Measures dimensions of casting, using fixed gauges. Examines castings for defects, such as cracks and blowholes. Separates and marks defective castings, according to salvage operation required.

May chip surplus metal from casting, using hammer and chisel. May tap casting with hammer to determine from sound if casting has been heat treated or to detect defects, such as cracks or thin walls.

8146-142 HARDNESS TESTER, METAL(iron & steel; non-ferrous metal) DPT:384

GED: 3 SVP: 4 EC: I PA: M 4 7

Tests metal objects to determine their degree of hardness, using hardness testing equipment:

Positions workpiece on anvil or bed of testing machine and turns controls to press steel ball or diamond-point against surface of piece, or to let diamond-pointed hammer fall on surface to be tested. Measures diameter of indentation made by steel balls, using special microscope, or reads scale on test equipment which indicates depth of penetration of ball or diamond-point, or calibrated height of hammer rebound. Reads hardness number from calibrated scale on equipment, or converts scale reading to hardness number, using formula or conversion chart.

May measure hardness of abrasive crystals by shooting known grade of crystals through a small jet against an abrasive wheel at a pre-determined speed, and measuring resulting indentation, using micrometer. May cut off cross section of sample part, using band or hand saw, and examine it under microscope to determine hardness depth.

8146-146 METAL INSPECTOR(non-ferrous metal) DPT:587

metal checker.

GED: 3 SVP: 4 EC: I PA: L 4 7

Inspects cast aluminum alloy ingots to ensure conformance to specifications:

Reviews reports of chemical analysis of ingot batches and ensures that composition of alloy is within standard limits as determined by laboratory, using charts. Marks ingots by affixing tags on pallets to denote acceptance or rejection. Weighs ingots at random to ensure conformity to specifications.

8146-150 TINPLATE INSPECTOR AND GRADER(iron & steel; non-ferrous metal) DPT:687

assorter.

GED: 3 SVP: 4 EC: I PA: M 4 7

Inspects tinplate for defects and conformance to specified weight, size, and gauge, and classifies material according to quality:

Examines sheets for defects, such as insufficient coating, holes, waves, rough spots, bows, twists, or dirt. Wipes grease from sheets with cloth and straightens bent corners with hand tool. Measures gauge of sheets, using micrometers, and compares measurements with customer's specifications. Weighs sheets on scale. Sorts and piles sheets according to quality. Marks identifying information on piles with marker.

8146-154 MOLTEN METAL SAMPLER(iron & steel; non-ferrous metal) DPT:587

sampler; test boy.

GED: 2 SVP: 3 EC: I 3 5 6 7 PA: L 4 7

Obtains sample of molten metal from each furnace heat, using hand ladle or glass tube:

Skims slag from surface of melt in furnace, using raking pole. Adds chemical to melt and observes reaction of chemicals to determine

proper time to remove sample. Dips hand ladle or inserts glass tube into pouring ladle, before moulds are poured or filled. Pours molten metal from hand ladle in core sand mould to cast test bars and pin-samples, or allows melt to solidify in glass tube. Breaks or drills solidified metal to obtain test sample, using hammer or drill press. Marks sample according to heat from which sample was taken. Sends sample to laboratory for analysis, and records results. Cleans dust collectors and slag tank.

8146-199 OTHER INSPECTING, TESTING, GRADING AND SAMPLING OCCUPATIONS, METAL PROCESSING

This group includes inspectors testers, graders and samplers, in metal processing, not elsewhere classified; for example, those who drop specified weights on steel rail to measure strength and ductility of steel; fill pipes and tubes with water under pressure to test strength of articles; identify grades of steel products by visual observation of induced-friction sparks; collect, prepare and identify samples of iron and steel products, and inspect anodized aluminum extrusions for colour conformity. Typical examples of occupational titles covered by this residual group definition are:

Core Checker(iron & steel)
Drop-Test Inspector(iron & steel)
Hydrostatic Tester(iron & steel; non-ferrous metal)
Spark Tester(iron & steel)
Test Preparer(iron & steel)

8148-OCCUPATIONS IN LABOURING AND OTHER ELEMENTAL WORK, METAL PROCESSING

This unit group includes occupations in labouring or other elemental work, as described under the term title, 02-190 LABOURER/ELEMENTAL WORKER (any ind.), which are concerned with processing partially or fully-refined metals to make semi-finished or finished metal stock and products.

8148-110 LABOURER, ALL-ROUND(non-ferrous metal) DPT:686

GED: 2 SVP: 2 EC: I 5 6 7 PA: H 3 4 7

Assists other workers in the production of non-ferrous metal products, performing any combination of the following duties:
Dumps load of scrap metal into crusher, or shovels scrap into bailing machine. Shovels scrap metal onto dryer conveyor preparatory to melting. Dumps lubricant and materials, such as paste oil, grease, rolling and cleaning oils and water into drum, mixes solution and transfers mixture to feeder tanks for use in rolling or extruding mills. Dries finished metal tubes with air hose. Examines and sorts metal products for defects, such as dents, cracks and scratches. Taps dents from products, using mallet. Feeds automatic machines that ream, stamp and clean castings. Scrapes carbon, dirt, and metal particles from interiors of moulds. Transports scrap metal from work to storage areas, using fork-lift or handtruck. Records quantity and type of scrap. Cleans work area, using broom and shovel.
May assist loading and unloading trucks, and packing products for shipment. May clean rolling and extruding presses, using solvent, cloth, brush and air hose.

8148-114 LABOURER, STEEL PRODUCTION(iron & steel) DPT:686

GED: 2 SVP: 2 EC: B 3 4 5 6 7 PA: H 4 7

Assists workers engaged in production of iron and steel, performing any combination of the following duties:
Feeds and offbears equipment, such as conveyors, pilers and loaders, to charge furnaces, transport hot metal to rollers, and store finished products. Bundles and ties metal rods, sheets and wire, using banding machine and hand tools. Trims loops from reeled bundles of rods, using axe or hand cutters. Identifies metal products, using tags or coloured paints. Attaches cranehooks, slings, or cradles to material and equipment for moving by crane. Transports material to and from production stations and storage areas, using handtruck or wheelbarrow. Feeds material, such as ganister, magnesite and limestone into crushers or bins to prepare additives for molten metal. Grinds defects,

such as burrs, seams and scratches from rolled steel, using grinder. Sweeps work area and empties dust bins, using wheelbarrow, broom and shovel. Breaks up manganese and scrap metal to facilitate handling, using sledge and pneumatic hammer. Marks identification numbers on steel billets, using chalk. Verifies dimensions of products, using fixed gauge. Wipes grease and oil from machinery with rags and solvent.

May be designated according to specific duties performed; for example,
Conveyor Man
Crusher
Loading Checker
Marker

8148-118 FOUNDRY WORKER(iron & steel; non-ferrous metal) DPT:687

foundry helper.
GED: 2 SVP: 2 EC: I 3 5 6 7 PA: H 4 7

Performs any combination of the following duties in foundry, concerned with melting metal, moulding and casting:

Moves sand, castings, flasks, or other materials about foundry by hand, using wheelbarrow or cart, or loading them onto conveyor. Assembles flask, using wrench, bolts, and tap screws. Waters and mixes sand, shovels sand into flasks, and compacts sand in flasks, using ramming tool. Sprays binder on surface of sand moulds. Fits together, clamps, and unclamps cope and drag on production line. Weighs out specified amounts of materials for furnace charge and loads charge into melting furnace. Skims slag from surface of molten metal, using scoop. Carries or pushes ladles of molten metal on monorail and pours metal into moulds. Installs and removes steel jackets and bands used to hold snap moulds together during casting. Breaks sand moulds from finished castings, using bar or hammer. Sorts castings into pairs or groups for assembly. Pulls reinforcing wires from castings. Directs high pressure stream of water onto castings to clean castings and remove cores. Cleans castings, patterns, and flasks, using wire brush. Removes gates, sprues, and other projections from castings with sledge, pneumatic hammer, power shear, or power saw. Breaks up used sand moulds with bar, shovels sand into drying oven and sand mixing machine, and sifts sand through motor driven screen for reuse in new moulds. Breaks up slag, using hammer, and shovels it into buckets for removal. Chips out worn cupola and ladle linings, using bar. Prepares plaster and relines ladle. Sweeps and cleans work areas.

May be designated according to worker assisted or task performed; for example,
Cupola Helper
Ladle-Man Helper
Moulder Helper
Pot Carrier
Shake-Out Man

8148-122 BILLET PUSHER(iron & steel) DPT:686

GED: 1 SVP: 2 EC: I 3 5 6 7 PA: M 4 7

Activates mechanism that pushes heat-conditioned ingots, billets or blooms out of reheating furnace onto table conveyor preparatory to rolling.

Opens furnace door by pulling rope, activates movement of pusher bar by depressing hydraulic pedal, and repositions pusher bar and door when billet is clear. Observes condition and temperature of billets in furnace and reports irregularities. Assists other workers in scraping furnace bottom. Assists in changing rolls and guides on roughing or finishing stands, using hand tools.

8148-124 CASTING-MACHINE-OPERATOR HELPER(electric. equip.) DPT:686

GED: 1 SVP: 2 EC: I PA: M 4

Helps grid-casting-machine operators in moulding electrical parts:
Unloads casting machine by removing grids from machine rails, counting grids and stacking them aside. See also definition for term title, 02-160 HELPER (any ind.).

8148-126 POWDERED-METAL MIXER(iron & steel; non-ferrous metal) DPT:686
powdered-metal blender.
GED: 1 SVP: 2 EC: I PA: H 4 7

Feeds machines that blend batches of powdered metal to make metal alloys:

Weighs out specified amounts of materials, using scale or combines portions of material. Dumps powders into mixing machine, such as tumbling barrel or paddle-type mixer, and starts motor. Stops motor after specified time and dumps mixture into containers.

8148-130 CASTING-HOUSE LABOURER(non-ferrous metal) DPT:687
casting serviceman.
GED: 1 SVP: 2 EC: B 3 6 PA: H 4 7

Performs any combination of the following duties related to preparing castings in non-ferrous metal foundry:

Skims dross from furnaces, using rake, and dumps dross into carts or buckets. Adds flux to metal scrap to prepare making of refractory mixture. Loads handtrucks with ingots and sorts scrap. Weighs metal, charges furnaces, prepares casting equipment and transports metal. Marks identifying number on billets or ingots, using stencil, or punch and hammer. Unloads trucks of scrap and loads baled scrap into drums and pallets. Cuts metal billet, according to instructions, using pneumatic or electric saw. Removes moulds from turning table.

May be designated according to specific duty performed, Zinc Drosser

8148-134 FOUNDRY LABOURER, CORE ROOM(iron & steel) DPT:687
GED: 1 SVP: 2 EC: I 3 7 PA: M 3 4

Performs any combination of the following duties involved in coremaking:

Pastes core sections together to form completed core. Brushes, dips or sprays solution, such as graphite, on cores to produce smooth finish. Carries and loads cores into oven. Piles baked cores on racks for drying and cooling. Carries sand to core room. Pulls wires and rods from finished castings, using pliers, hammer, chisel and special hooks. Dresses cores, using hand or power tools, such as files, scrapers, torch and portable grinding wheel. Packs cores in containers for further processing.

May fill cracks in surface of core with putty or patching sand, using putty knife. May form core reinforcing rods and wires into specified shape by hand or by tending machines, such as power shear, automatic wire cutters, power presses or rod straightening machine. May be designated according to specific duty performed; for example, Core Assembler

Core Filer
Core Paster
Wire Bender

8148-138 FURNACE TAPPER LABOURER(non-ferrous metal) DPT:687
GED: 1 SVP: 2 EC: I 3 6 7 PA: H 3 4

Taps molten non-ferrous metals, such as copper or aluminum into moulds, crucibles or ladles by performing any combination of the following duties:

Chips and pries out old refractory lining, slag, or solidified metal from ladles, launders, and troughs, using crowbar or hammer and chisel. Mixes refractory material, such as clay, cement and water to specified consistency. Lines or plasters ladles, funnels, troughs, and pouring spouts with refractory clay and tamps it in place with trowel. Brushes bone ash or graphite on lined surfaces to prevent molten metal from sticking. Dries and bakes ladle lining, using blow torch, or by placing ladle over burner, or by shoveling live charcoal into ladle. Shovels live charcoal into spouts and funnels to preheat them for pouring, and over surface of molten metal in tilting ladle to prevent oxidation. Brushes sand on lip of ladle, using shovel, and lowers ladle during tapping to prevent molten stream from splashing.

May remove charcoal ashes, using ladle.

8148-140 INDUSTRIAL-FURNACE CLEANER(iron & steel; non-ferrous metal) DPT:687
furnace-maintenance man.
GED: 1 SVP: 2 EC: I 3 5 6 7 PA: M 2 3 4

Cleans smelting and refining furnaces by performing any combination of the following duties:

Sweeps, stacks and removes refuse to clean bottom of lime kilns and rubberized conveyors, using broom, brushes and shovels. Cleans ventilation pipes, flues and hoppers of electric furnaces, using mallet and air hose. Lowers and raises cleaning device on cable through pipes and chimney, using hand winch. Repairs lining and launders, using mortar and hand tools. Empties and cleans feed surge bins to prevent furnace blockages, using wheelbarrow, bars, scrapers, shovel and broom. Cleans checkers of open-hearth furnaces. Loosens bricks in bulkhead, using tongs and hammer, inserts air hose through orifice to blow out flue dust, and replaces bricks, to seal bulkhead, using refractory material and trowel. Cleans scrubber units to remove accumulated dusts from gases. Pries and scrapes solids from walls, ceiling, floor, intake ducts, eliminator plates, dampers and fan vanes. Checks suction power of screens, using manometer. Verifies pressure of water sprays, and replaces or cleans defective nozzles. Unfreezes header pipe to permit free circulation of plant liquor or slurry to risers and heating pipes, using kerosene flambeau.

May be designated according to type of furnace cleaned; for example, Kiln Cleaner(non-ferrous metal)
Soderberg Scrubber(non-ferrous metal)

8148-142 PRODUCTION HELPER(wire prod.) DPT:687
GED: 1 SVP: 2 EC: I 3 5 PA: M 4

Moves reels of wire and other materials by performing any combination of the following duties:

Ties pull ropes, attached to cables emerging from extruding clamps, onto take-off reels. Hoists full reels from braiding, winding and other fabricating machines, using power hoist. Rolls reels to other work areas or storeroom. Moves wire, rubber and other raw materials from storage to work area, using handtruck. See also definition for term title, 02-160 HELPER (any ind.).

8148-146 CHARGER HELPER(iron & steel) DPT:686
steel pusher helper.
GED: 1 SVP: 1 EC: I 3 5 7 PA: H 4

Helps in moving steel blooms, billets and slabs through soaking- pit furnaces:

Positions and straightens steel on furnace skids and roller conveyor, using bar. Places separators between steel shapes, and marks identifying information on shapes. Assists other workers in cleaning furnace bottoms, and repairing or replacing defective equipment, using hand tools. See also definition for term title, 02-160 HELPER (any ind.).

8148-150 PIG-MACHINE-OPERATOR HELPER(iron & steel) DPT:686
GED: 1 SVP: 1 EC: I 3 5 6 7 PA: H 4

Helps to cast pig iron:

Removes pigs stuck in moulds, using bar, hammer and hooks. Knocks pieces of iron and slag from ladles and runners, using pole or bar and sledge hammer. Shovels or throws braze on flowing iron to prevent freezing. Assists operator in maintenance and repair of equipment. Cleans work area and iron scrap from pig machine. See also definition for term title, 02-160 HELPER (any ind.).

May load and transport pigs to railway cars, using wheelbarrow.

8148-199 MISCELLANEOUS OCCUPATIONS IN LABOURING AND OTHER ELEMENTAL WORK, METAL PROCESSING

This group includes labourers and other elemental workers in metal processing, not elsewhere classified; for example, those who release molten non-ferrous metal that drips into a quenching medium to form pellets; observe and adjust parts of rolling mill before and during rolling operation, and operate conveyors to clear sinter-feeding system. Typical examples of occupational titles covered by this residual group definition are:

Pellet-Shot Maker(non-ferrous metal)
Roll Hand(iron & steel; non-ferrous metal)
Shut-Down Man(iron & steel)

**8149-METAL PROCESSING AND RELATED
OCCUPATIONS, N.E.C.**

This unit group includes occupations, not elsewhere classified, concerned with carrying out support activities in the processing of metals; such as, operating and tending furnaces that re-heat, degas or atomize metals to produce purified metal or metal powders; sorting, weighing and mixing various scrap metals and ingots for furnace charges, to produce specific alloys; operating and tending machines that draw, shape and emboss precious and base metals for jewellery products; operating and tending machines that cover wire with a variety of materials, and braid, stripe and wind wire on spools and reels; and tending equipment to salvage metal and oil.

**Converting and Re-Heating Furnace Occupations
8149-110 through 8149-130**

8149-110 STEEL-DEGASSER OPERATOR(iron & steel) DPT:582
vacuum degasser.
GED: 4 SVP: 7 EC: I 3 5 6 7 PA: H 2 4 7

Operates equipment that removes porosity-creating gases from molten steel to produce high quality product, using vacuum process: Inspects and tests equipment, such as valves, limit switches, control panel lights, heating elements, condition of vessel and nozzle lining to ensure proper operation. Preheats degassing vessel to specified temperature. Determines grade of steel, size of batch, time of pour and alloy additives required. Shovels specified kind and quantity of alloy, such as ferro-chrome, silicon, manganese and nickel into bin dispenser. Operates control panel to load additives into furnace. Presses buttons on control panel to move ladle of molten steel on transfer car under vacuum degassing vessel, lowers nozzle of vessel into molten vessel, and draws successive batches of steel from ladle into vessel where gases are drawn off by vacuum system. Drains degassed steel back into furnace. Obtains samples of steel for laboratory analysis. Maintains record of operations.

8149-114 STOVEMAN(iron & steel) DPT:682
hot-blast man; stove operator.
GED: 3 SVP: 5 EC: B 3 5 6 7 PA: M 4

Operates battery of gas-fired stoves to supply heated air to blast furnace:
Turns gas valves and ignites burners in combustion chamber of stove, using torch. Observes temperature recording devices. Moves controls to close gas and chimney valves when heat inside stove reaches specified temperature. Opens valves on stoves allowing air from blower to pass through hot-blast stove into furnace. Adjusts stove controls to maintain specified temperature of air blast. Alternates operation among stoves in battery to provide continuous blast of hot air. Cleans carbon and dirt from flues to prevent internal explosions. Inspects cooling and washing equipment for leaks. Assists furnace crew in casting hot metal and flushing slag from furnace.

8149-118 DEPILER TENDER(iron & steel; non-ferrous metal) DPT:685
table man.
GED: 3 SVP: 4 EC: I 3 5 6 7 PA: M 4

Tends equipment that transfers blooms, billets or slabs from conveyor onto charging table of reheating furnace:
Moves controls to transfer blooms, billets or slabs from conveyor onto depiler. Measures metal for conformance to specifications, using tape, and compares identifying marks with information on charging schedule. Pushes levers to lower depiler table and cause pushoff arm of depiler to push metal onto charging table. Assists furnace crew in cleaning bottom of furnace and hearth and in positioning blooms, billets or slabs in furnace.

8149-122 LEAD ATOMIZER(non-ferrous metal) DPT:685
lead blower; lead-furnace tender.
GED: 2 SVP: 3 EC: I 3 7 PA: M 4 7

Tends equipment that melts and atomizes lead for use in compounding paint pigments:

Starts motor to pump fuel oil to furnace burners. Ignites burners, reads temperature gauge, and adjusts controls to regulate flow of fuel oil to maintain specified furnace temperature. Starts conveyor leading to furnace and dumps lead pigs onto conveyor. Moves controls of air compressor that forces air into molten lead in furnace to vaporize lead for further processing.

8149-126 SCRAP-METAL PROCESSOR(non-ferrous metal) DPT:687
alloyman; charge-gang weigher.
GED: 2 SVP: 3 EC: I 5 6 PA: VH 3 4 7

Sorts, weighs and mixes non-ferrous scrap metal and ingots in required proportions for furnace charges:

Separates grades and types of alloys in scrap pile by colour and shape of castings, and shovels metal into hand truck, bin or boxes. Selects scrap and ingots for furnace charge according to specifications. Places empty box on scale, sets scale to zero and throws required amount of each metal in box according to alloy required. Takes samples of furnace melts for laboratory analysis. Observes metal in die-casting holding pots and finished castings, or reads label to verify use of specified alloys.

May unload box cars of scrap. May operate lift truck to transport materials. May charge furnaces with alloy.

8149-130 ZINC-DUST MAKER(non-ferrous metal) DPT:685
atomizer operator.
GED: 2 SVP: 2 EC: I 5 6 PA: M 4

Tends electric or gas furnace and air tunnel to produce zinc dust:

Charges furnace with bars or scraps of zinc. Moves controls to regulate automatic heat and air blast that melt and atomize zinc. Scrapes dross from surface of molten zinc, using skimming tool. Tilts furnace to pour molten zinc into launder leading to air tunnel, using hoist. Fits air nozzle in zinc atomizer to strike against metal flow, using hand tools. Rakes zinc dust onto conveyor and into barrels. Loads barrels on cars, using lift truck. Prepares new nozzles for atomizer by packing graphite or ceramic nipple in pot with asbestos and alloy.

**Wire Winding and Wire Covering Occupations
8149-150 through 8149-182**

8149-150 JEWELLERY-WIRE FINISHER(jewellery & precious metal prod.) DPT:682
fancy-wire drawer.
GED: 3 SVP: 5 EC: I 5 6 PA: M 4 7

Draws, shapes, engraves or embosses precious or base metal wire for use in fabricating precious or costume jewellery, such as chains, box links and bracelets:

Fits specified drawing die into machine, using hand tools. Inserts tapered end of metal wire, such as gold, platinum or silver through die hole, pulls wire through die and attaches end to take-up spool. Starts drawing press that forms round, half-round, square or rectangular jewellery wire. Engraves ornamental designs on surface of wire, using triangular and square-pointed tools, such as gravers and carvers, or selects shaping, reducing or embossing roller dies to emboss wire with decorative patterns. Positions roller die in machine, and turns setscrews to secure die in place. Places wire in feed mechanism and starts machine that shapes, reduces, draws and embosses wire. Verifies dimensions of rolled or drawn wire, using micrometers.

May operate extrusion press to reduce diameter of metal billets preparatory to drawing into wire.

8149-154 ASBESTOS-WIRE FINISHER(wire prod.) DPT:682 GED: 3 SVP: 4 EC: I 7 PA: M 4

Operates machine to card asbestos fibres, wrap them around electric wire and impregnate fibres with wax:
Loads reel of electric wire onto machine spindle, manually or using hoist. Threads wire between guides, through taping, carding, impregnating and cooling units, and fastens it to take-up reel. Places roll of tape on spindle and inserts end in taping device that folds tape around wire. Places lap of asbestos fibres on carding device that shreds asbestos and cards it onto wire in continuous layer. Starts machine and observes operation to ensure uniform coverage of wire. Adjusts controls for conformance to specifications, and replenishes tape supply and asbestos.

8149-158 WIRE-SAMPLE FORMER(wire prod.) DPT:682 GED: 3 SVP: 4 EC: I 3 5 PA: M 4 7

Operates machine to form wire samples from cut of copper ingot for metallurgical testing:
Places cut ingot on work bench, using hoist, and smooths lateral sides to remove saw marks, using emery wheel. Pushes smoothed ingot into furnace, and heats sample to light-red glow. Positions heated ingot on rolling stand, and rolls sample into flat sheet of required thickness by passing it through rolling machine. Pushes sheet into multiple lateral saws to cut it into narrow strips or rods. Coils strips manually, and immerses them in acid bath to remove scale and dirt, using hoist. Tapers end of roll, using hammer. Inserts tapered end through selected steel-wire die, and fastens end to powered clamp. Depresses pedal to draw rod through die, and secures end on automatic coiler, using wrenches. Operates drawing machine to draw rod to wire of specified size by passing rod through series of dies of decreasing diameters.
May butt-weld strip or rod ends to form one continuous coil before drawing process. May cut unused portions of wire used in metallurgical testing into bearings used for ball-pen points.

8149-162 ARMOURING-MACHINE TENDER(wire prod.) DPT:685 GED: 3 SVP: 3 EC: I 5 PA: M 4 7

Tends machine that winds protective wire or continuous interlocking metal strip into flexible conduit or over insulated wire, such as industrial and service entrance wire, submarine and underground cable:
Loads reels of insulated wire and metal strip on pay-out stand, manually or using hoist. Changes forming and crimping dies to meet order specifications, using hand tools. Threads protective wire, metal or strip through guides and dies of automatic winding machine. Starts machine and feeds insulated wire or wires into machine and onto take-up reel. Observes angle of spiral and adjusts guides, using wrench and screwdriver. Verifies diameter of cable or wire, using micrometer, and checks longitudinal distance between start and end of complete twist of wire, using tape rule. Removes and tags finished reels from take-up stand, using hoist.
May weld ends of metal strip to repair breaks or to make continuous lengths, using butt welder. May tend machine that twists wires into cable and applies insulating tape. May be designated according to type of product insulated; for example,
Cable Armourer
Flexible-Conduit Coiler

8149-166 BRAIDER TENDER(wire prod.) DPT:685 GED: 3 SVP: 3 EC: I 5 PA: L 4 7

Tends battery of automatic braiding machines that cover electric wire and cable with insulating material such as cotton yarn, rubber tape, fibreglass, or fine steel, copper and aluminum strands:
Places bobbins of insulating material on machine spindles and threads strands through braiding head according to pattern draft which specifies lay and sequence of braiding. Locks spool of wire to be insulated or covered on pay-off spindle. Threads wire through machine guides, footage counter and braiding head. Turns setscrews to control tension on wire. Adjusts traverse attachment to ensure even winding of wire or cable. Starts machine and winds braided wire around capstan and onto take-up spool. Replaces empty bobbins and ties broken threads.
May cover electric wire or cable with coloured insulating material to form colour-coded insulated product. May braid yarn or nylon on wire

or cable already covered with plastic or rubber insulation. May be designated according to product braided; for example,
Electric-Wire Braider

8149-170 STRIPING-MACHINE TENDER(wire prod.) DPT:685 GED: 2 SVP: 3 EC: I PA: M 4 7

Tends machine that prints multi-coloured identification stripes on insulated wire according to specifications:
Installs striping wheels in inking head and fills reservoirs with pre-mixed inks of specified colours. Adjusts footage counter and ink timer. Clamps cable spool on payout spindle and threads cable through capstan, through inking head and around take-up spindle. Starts machine and inspects striped cable for defects. Turns setscrews to adjust pressure of striping wheels.
May mix inks in power mixer, according to formula, to obtain specified colours or shades.

8149-174 WIRE-PAIRING-MACHINE TENDER(wire prod.) DPT:685 GED: 2 SVP: 3 EC: I 6 PA: M 4

Tends two semi-automatic pairing machines that twist two wires together to form a basic transmission circuit:
Twists ends of wire together, feeds paired wires through guides on bow, around capstan, over guide rollers, and attaches them to take-up reel. Sets counter and presses button to start take-up and pairing motors. Turns adjustment screws to maintain feed, and running, stopping and take-up tension. Stops machine to check for bare spots in insulation and breaks in wire. Tests paired wire for possible shorts. Replaces empty and filled reels.

8149-178 REEL WRAPPER(wire prod.) DPT:685 wrapping-machine tender. GED: 2 SVP: 2 EC: I PA: M 4

Tends machine that positions and fastens wooden slats (lagging) on reels of lead-covered cable:
Fills hopper of machine with lagging, manually or by opening chute. Positions roll of steel band on spindle of feeding reel, using hoist. Mounts reel of lead-covered cable on axle, using hoist. Starts machine that distributes lagging around edge of cable reel and binds lagging with steel banding.

8149-182 WIRE SPOOLER(wire prod.) DPT:686 coiler. GED: 2 SVP: 2 EC: I 5 PA: M 4

Winds bare or insulated wire onto spools preparatory to shipment or further processing, using winding machine:
Positions empty spool in machine, manually or using hoist. Threads wire from supply spool or coil through distributor (oscillating guide) and tension guides, and secures end to empty spool or bobbin. Starts machine and observes automatic winding of wire. Stops machine when specified amount of wire has been wound, and cuts wire, using wirecutters. Inserts tie-wire in filled spools, removes spools from machine, and bands and wraps wound wire. Packages finished spools in cartons, stencils required information, and places sealed carton on pallet or truck.
May locate and mark defective insulation during winding process, using spark tester.

Metal and Oil Salvaging Occupations 8149-202 through 8149-218

8149-202 DRIER TENDER(non-ferrous metal) DPT:665 drier man. GED: 2 SVP: 3 EC: I 5 PA: L 4 5 7

Tends oil-fired, rotary magnetic drier that removes oil and iron particles from aluminum scrap turnings:
Moves controls to start low pressure steam boiler, oil pumps, fans, conveyors and screens. Ignites burner and adjusts mixture of oil and air to obtain desired temperature. Starts drier and turns on current to remove iron particles electromagnetically. Signals workers to load scrap into drier or hopper. Regulates rate of feed in accordance with

oil and iron content in scrap. Pumps cleaned oil into reservoir. Changes drier chart recorders. May place wheelbarrow or tote box at discharge end of drier to receive processed turnings. May weigh filled wheelbarrow and record weight.

8149-206 ELECTROSTATIC-SEPARATOR TENDER(iron & steel) DPT:585
GED: 2 SVP: 3 EC: I 7 PA: M 4

Tends machine that separates steel particles from abrasive particles: Sets controls of machine, according to size of particles to be separated. Ignites burner in kiln to dry particles preparatory to separating. Moves controls of machine that feeds particles through kiln into separator where steel is removed by electrostatic action. Weighs and records weight of particles before and after separation.

8149-210 SCRAP-MACHINE TENDER(iron & steel; non-ferrous metal) DPT:685
GED: 2 SVP: 3 EC: I 5 7 PA: H 4

Tends machines, such as baling machine, centrifugal separator and oil purifier to salvage metal parts and cutting oil: Loads and moves barrels or crates of metal chips, shavings or chippings from machining operations, using hand truck. Dumps metal scrap into baling machine, and throws switch to compress scrap into bales. Binds bales of metal scrap with wire or other metal strapping. Shovels or dumps scrap in spinner bucket. Clamps cover, sets timer, adjusts sump pump and oil line valves, and starts automatic cycle of centrifugal machine that spins metal scrap and separates metal from cutting oil. Starts centrifugal oil purifier that filters foreign matter from used oil to make it reusable. Disassembles rejected devices and materials, such as thermostats, valves, conduits and connectors, using hand tools, arbor press, vises and power hacksaw. Sorts parts by type of metal. Weighs bales and barrels of scrap metal, and ties on identification tags.

8149-214 POWDERED-METAL SALVAGE MAN(iron & steel; non-ferrous metal) DPT:685
batch maker
GED: 2 SVP: 2 EC: I 5 PA: M 4 7

Tends equipment that mills and recovers powdered metal used in powder metallurgy: Sorts colour coded containers of scrap production material, according to metal or alloy. Pours specified amount of powder or metal scrap into ball-mill drum. Screws cover on drum and straps drum to ball-mill rack. Starts motor that rotates drum to grind powder or scrap by tumbling action of metal balls. Pours powder into containers for drying or further processing. Charges mill with additional balls as specified.

May insert filter bag and sieve in centrifuge drum and open water valve to flush milled powder from mill through sieve and filter bag into centrifuge. May tend centrifuge to separate water from powder.

8149-218 SCRAP MAN(iron & steel; non-ferrous metal) DPT:666
picker; salvage man.
GED: 2 SVP: 2 EC: I 5 6 PA: H 3 4 6 7

Sorts and bales metal scrap for salvage: Shovels or dumps containers of metal scrap onto conveyor leading to magnetic drum that removes iron and steel pieces from scrap, or dumps and spreads scrap on floor using hoist and shovel. Picks and removes contaminating and extraneous material, by hand, or guides lifting magnet over material to be sorted. Cuts long pieces of scrap metal into manageable sizes, using power shears or oxyacetylene torch. Places sorted pieces in different containers, or shovels metals into separate piles. Hooks end of scrap metal onto reel of machine and starts machine to wind metal into ball. Shovels and pushes scrap into compression chamber of machine and activates ram that compresses scrap into tight cubes. Turns lever to eject wound ball or block from machine, or pries bundle free, using bar. Signals operator of crane to lower sling and hooks sling to ball or cube, or pushes or rolls ball from work area, manually.

May sift scrap to remove excess dirt and rust, using wire sifting tray. May tie ball with wire or strap to prevent unravelling and facilitate transportation. May grade scrap according to alloy content. May turn

reel by hand to wind scrap. May be designated according to duties performed; for example, Scrap Baler Scrap Sorter

Other Metal Processing Occupations
8149-238 through 8149-399

8149-238 UTILITY OPERATOR(non-ferrous metal) DPT:662
rover.
GED: 4 SVP: 6 EC: I 3 5 6 7 PA: H 4 5 6 7

Operates aluminum foil processing machines, such as printing presses, furnaces, cranes, hoists and fork-lift trucks in the absence of regular operators to make aluminum products:

Sets up and operates laminating, separating and coating machines to process aluminum foils or sheets. Operates rotogravure or flexographic presses to print required information on aluminum foils. Cuts sheets to specified dimensions, operating rotary or power shears. Operates stretching or rolling machines to condition surface of sheets or to roll slabs to required thicknesses. Directs loading and unloading of furnaces to heat treat or anneal coiled sheets or extrusions. Transports products or machines within mill to assist other workers, using cranes, hoists and fork-lift trucks.

8149-242 DENTAL-AMALGAM PROCESSOR(non-ferrous metal) DPT:682
GED: 3 SVP: 6 EC: I 3 PA: M 4 7

Operates machines to alloy and dissolve tin, zinc, copper and silver in mercury to form dental-amalgam:

Melts required proportions of metals in furnace, and pours alloy into mould to form ingots. Cuts ingot into chips or granules of uniform size, using engine-lathe or milling machine. Pours chips or granules in hopper of grinding or tumbling machine, and starts machine to grind them into microgranules of specified size. Places granules in annealing oven for required period. Loads granules into elutriator and turns valve to regulate flow of water that forces granules through sieves to separate them, or dumps granules on vibrating screen. Collects granules left on screen and returns them to furnace for remelting. Loads moist granules in drying oven. Places granules in tumbling machine for final grinding. Dumps granules on shaker, and classifies them according to size. Mixes specimen quantity of alloy with mercury, using mortar and pestle, and packs mixture into mould. Removes amalgam from mould, and sends to laboratory for analysis. Pelletizes or packages amalgam in bottles for shipment.

8149-246 STRETCHER-LEVELLER OPERATOR(non-ferrous metal) DPT:462
extrusion-stretcher operator.
GED: 3 SVP: 4 EC: I 5 7 PA: M 4 5 6 7

Operates machine to stretch, flatten and straighten metal sheets, strips, rods and extruded forms:

Installs specified stretching jaws in machine, and adjusts stretcher blocks to size of metal, using hand tools. Lifts and positions material to be stretched in stationary vise, using hoist. Measures metal and compares dimensions with those specified to determine stretch required, using micrometer, tape rule and tolerance tables. Adjusts speed and tension of machine and take-up reel to obtain proper degree of levelling. Moves controls to clamp metal in stretcher jaws, and starts machine. Observes workpiece as tension increases and operates controls to place stress in proper area of metal to avoid distortion. Verifies amount of stretch by visual inspection, reading meter attached to vises, or by listening to sound made by striking metal with wooden mallet. Removes metal and places it on level table to test flatness. Checks dimensions of stretched or levelled material, using level, straight edge, feeler gauge, micrometer and tape. Records production.

May flatten and level coiled strips, using winding machine. May be designated according to metal processed; for example, Aluminum-Stretcher-Leveller

8149-250 PELLET SEGREGATOR(explosives) DPT:485
GED: 3 SVP: 4 EC: I 7 PA: L 4 7

Tends equipment in shot tower that segregates and polishes shot (lead pellets) used in shotgun shells:

Starts bucket elevator that conveys newly formed pellets up shot tower and into screening drums that remove oversize and undersize pellets. Turns crank to adjust angle of glass plates over which screened shot is rolled to remove out-of-round pellets, using measuring stick graduated in shot sizes to verify pitch, or size of pellets. Places pellets into sieves, polishing barrel, storage bins or scrap container for remelting. Starts polishing barrel rotating. Weighs sample of shot and counts total number of pellets in sample, using pellet counting plate. Measures size of pellets with measuring sticks, and counts number of each size to determine average size. Rolls pellets under dial micrometer to ascertain roundness and to detect defects such as out of shape and pits. Records results of tests.

8149-254 CARBIDE-TOOL-TIP MAKER(mach., weld. & forg.) DPT:685
GED: 3 SVP: 4 EC: I 3 5 6 PA: M 4 7

Fabricates tungsten-carbide cutting tips, performing any combination of the following duties:

Tends hydraulic press, granulator, tumbling barrel and agitating screens to convert fine tungsten-carbide powder to coarse powder for pressing. Weighs out powder according to specifications, using table scale. Pours powder from scale pan into mould in hydraulic press and activates press to compress mixture into blank. Removes blank from press. Sets automatic feed, time and temperature controls on presintering furnace. Feeds blanks into presintering furnace to remove binder and fuse powders. Removes blanks from furnace and cuts and grinds them into cutting tips, using cutting wheel and diamond grinding wheel. Sets pyrometer controls of sintering furnace and feeds in cutting tips for final sintering. Measures tips for conformance to specifications, using scales and gauges.

8149-258 DIAMOND-POWDER BLENDER(metal fab., n.e.c.) DPT:485
GED: 2 SVP: 4 EC: I 5 7 PA: M 4 7

Tends mixing machine and powered press to blend metal powders with diamond dust or chips, and passes mixture into mould for fusing or sintering:

Calculates weights of powdered metals required, according to formula and work order. Weighs and dumps ingredients into mixing machine. Starts machine that blends metal powder with diamond dust or chips. Removes mixture from machine. Selects steel moulds, slugs and punches. Pours mixture into mould cavity. Places mould on table of powered press, and moves controls to start machine that presses mixture into mould cavity, or compacts mixture in mould, using hammer and drift. Removes mould from press and carries to furnace for fusing or sintering. Glues mould parts together. Records number of moulds filled from each diamond batch. Removes excess particles from induction or graphite moulds.

8149-262 MATRIX FINISHER(metal stamp., press. & coat.) DPT:684
GED: 2 SVP: 3 EC: I 5 7 PA: L 4 7

Finishes and examines metal phonograph matrices after electroplating processes, performing any combination of the following duties:

Strips (separates) master, mother and stamper matrices, using hand tools, files and knife. Holds matrix against sanding belt or grinding wheel of bench grinder, or positions matrix on turntable and holds sandpaper against inside surface to remove burrs. Locates and punches center hole in stamper of mother matrices, using punch press or optical instrument and punching die. Fills offcenter holes with solder, using soldering iron. Cleans and polishes matrices, using hot water, steam, brushes, cloths, naphtha gas and polishing compounds. Examines stamper matrices for defects. Cuts and flares edge of stamper matrices, using press.

May mark identifying information on master matrices, using scribe. May weigh stamper matrices to determine plating thickness, using scale.

8149-266 STRETCHER-LEVELLER HELPER(non-ferrous metal) DPT:666
extrusion-stretcher-operator helper.
GED: 2 SVP: 3 EC: I 5 7 PA: M 4 6 7

Assists machine operators to stretch, flatten and straighten metal sheets, strips, rods and extruded forms:

Lifts and positions material in vises, and moves lever to close clamps, using hoist. Verifies amount of stretch by listening to sounds made by striking metal with wooden mallet. Removes finished product and loads articles on saw table, truck or pallets, using hoist. See also definition for term title, 02-160 HELPER (any ind.).

May flatten and level coiled strips, using winding machine. May install and adjust stretcher jaws according to size of metal, using wrench. May determine amount of stretch required, using micrometer and tolerance tables.

8149-270 METAL-FOIL SEPARATOR(non-ferrous metal) DPT:685
aluminum-sheet separator.
GED: 2 SVP: 3 EC: I PA: M 3 4

Tends machine that separates laminated strips of annealed or coated aluminum foil into single strips:

Pushes laminated roll onto scale to record weight. Inserts steel pipe through core of roll, attaches hoist, and positions roll onto machine. Parts end of laminated strip, manually, and threads separated strips on different rollers. Adjusts side-wheel-knives to trim and cut both sides of single strip, using hand tools. Starts machine and observes operation to ensure proper unrolling of laminated strip and rolling of single strip. Examines rolling of foil to detect defects, such as tears, holes and folds. Unloads roll of foil, using hoist, weighs on scale, and stacks roll into metal rack. Records production data, such as weight and number of laminated rolls processed, and footage and weight of single roll.

8149-274 METAL-TUBE MARKER(iron & steel; non-ferrous metal) DPT:685
GED: 2 SVP: 3 EC: I PA: M 4 7

Tends machine that marks identifying information on metal tubes and pipes prior to storage or shipping:

Selects and installs guide rolls in machine, using hand tools. Installs marking stamp or coloured printing belt. Fills reservoir with ink. Positions tube or pipe on machine table and feeds end into machine. Presses lever to lower stamp or belt and mark identifying information on tube or pipe. Cleans machine, using solvent, brush, rag and scraper.

8149-278 BUNDLING-MACHINE TENDER(mach., weld. & forg.) DPT:685
GED: 2 SVP: 2 EC: I 5 PA: M 4

Tends machine that winds chains into bundles preparatory for cleaning or tumbling:

Transports chain from heating furnace to machine, using lift truck. Lifts chain from truck box onto machine, using hoist. Attaches chain to rollers on machine. Starts machine that winds chain around rollers. Passes wire through opposite links and twists wires to tie bundle. Slides bundles from rollers and places them into cleaning tank, using hoist.

8149-282 EXTRUDED-METAL COILER(non-ferrous metal) DPT:685
rod-puller and coiler.
GED: 2 SVP: 2 EC: I 3 5 PA: M 4

Tends device that coils extrusions, such as hot rod, wire or tubing, or moves them along press run-out table for further processing:

Adjusts coiler reel according to specified size and coil, using hand tools. Inserts end of rod, tube, or wire in automatic coiling rack, and moves controls to start coiler. Guides straight lengths of rolled or extruded rod, wire or tube along table to avoid stretching or kinking, using tongs or powered trigger. Sets stops on table, using hand tools, and cuts workpiece to specified lengths, using power-driven saw. Rolls or transports finished lengths into trough for cooling, using hoist. Cleans run-out table and loads scrap into salvage containers.

May stamp grade, alloy mixture and batch number on each workpiece.

8149-286 METAL IMPREGNATOR(iron & steel; non-ferrous metal) DPT:685
GED: 2 SVP: 2 EC: I 5 PA: M 4

Tends vacuum or pressure tank in which powdered metal parts are impregnated with lubricating oil or molten plastic: Pours impregnating material into tank. Sets controls of heating unit to attain specified temperature of solution. Places containers of parts in tank and closes cover. Observes gauge and turns valves to attain specified pressure or vacuum in tank. Closes valves after specified time, and removes finished parts from tank.

8149-290 POWDER-LUBRICATOR FINISHER(iron & steel; non-ferrous metal) DPT:685
GED: 2 SVP: 2 EC: I PA: M 4

Tends machines that lubricate, granulate and screen metallic powder: Pours specified amount of powder and lubricants into mixing machine. Starts machine that mixes powder with lubricants for specified time. Pours mixture into trays and places them in drying ovens. Dumps lubricated and dried powder into hoppers of granulator-screener machine. Starts machine that granulates and screens powder. Pours screened powder into jars or containers.

May dump specified amount of lubricated and screened powder into glass jars, place jars on rack of rolling machine, and start machine that forms powder into pellets. May separate pellets according to size and place them in containers.

8149-294 BOTTOM MAKER(iron & steel) DPT:687
soaking-pit bottom cleaner.
GED: 2 SVP: 2 EC: I 3 5 6 PA: VH 3 4

Cleans bottom of ingot-soaking pits and relines them with coke dust to retard formation of oxide scale on hot ingots: Digs out molten metal, cinder and solidified scale from bottoms of pits, using shovel, flat-pointed bar and pneumatic gun. Scrapes debris

into ladle. Shovels coke dust into pits and levels dust, using bar and rake. May clean non-coked-bottom-soaking pits with water and prepare pit for ignition by closing sand seals.

8149-298 COIL BANDER(iron & steel; non-ferrous metal) DPT:687
GED: 2 SVP: 2 EC: I 5 6 PA: L 4

Bands metal coils from tandem or strip mill after rolling: Bands metal coils such as strip steel or sheet aluminum with steel bands, using banding machine or crimping tools. Pushes controls to tilt banded coils onto conveyor for removal from mill. May assist in threading metal into mill prior to coiling. May cut steel strapping to required lengths, using hand shears or powered cutting tool.

8149-399 MISCELLANEOUS METAL PROCESSING OCCUPATIONS

This group includes metal processors and related workers, not elsewhere classified; for example, those who stamp alloy content on semi-finished product; plug hollow billets with steel cores; clean adhering metal from extrusion dies; etch depressions in aluminum foil strip to increase surface area; inspect electrolyte pumps to detect leaks; operate mantling equipment to spray molten aluminum on carbon anode; prepare metal bars and samples for chemical and physical tests; repair and adjust electric blowers and gas burners; assemble torpedo jets and thermocouples used for tapping and measuring heat of open-hearth furnace; position and adjust end stops on hot-rail cutting bed to cut rails to length; prepare empty shells for filling; mix, mould, dry and package ferro-silicon briquettes; and cut blooms, shapes or ingots to specified dimensions. Typical examples of occupational titles covered by this residual group definition are: Billet Filler(iron & steel; non-ferrous metal) Carbon-Mantling Equipment Tender(non-ferrous metal) Gagger(iron & steel)

815-CLAY, GLASS AND STONE PROCESSING, FORMING AND RELATED OCCUPATIONS

This minor group includes occupations concerned with preparing raw materials, such as clay, glass, stone and miscellaneous non-metallic minerals, abrasives and asbestos for use in a semi-finished or finished state, by means, such as grinding, mixing, separating, melting, baking, drying, heating, impregnating, coating, glazing and forming or moulding materials into stock shapes, parts or products. Occupations concerned with grinding, polishing and finishing precious and semi-precious stones are classified in Unit Group 8591, JEWELLERY AND SILVERWARE FABRICATING, ASSEMBLING AND REPAIRING OCCUPATIONS. CLAY, GLASS AND STONE PROCESSING, FORMING AND RELATED OCCUPATIONS are classified in the following unit groups:

- 8150 Foremen: Clay, Glass and Stone**
Processing, Forming and Related Occupations
- 8151 Furnacemen and Kilnmen: Clay, Glass and Stone**
- 8153 Separating, Crushing, Grinding and Mixing Occupations: Clay, Glass and Stone**
- 8155 Forming Occupations: Clay, Glass and Stone**
- 8156 Inspecting, Testing and Grading Occupations: Clay, Glass and Stone**
Processing and Forming
- 8158 Occupations in Labouring and Other Elemental Work: Clay, Glass and Stone**
Processing and Forming

**8159 Clay, Glass and Stone Processing, Forming
and Related Occupations. n.e.c**

**8150-FOREMEN: CLAY, GLASS AND STONE
PROCESSING, FORMING AND RELATED
OCCUPATIONS**

This unit group includes occupations, as described under the master title, 01-250 SUPERVISOR/FOREMAN (any ind.), concerned with supervising and co-ordinating activities of workers engaged in preparing clay, glass, stone, abrasives, asbestos and related non-metallic minerals for use in semi-finished or finished state.

**8150-110 FOREMAN, CLAY, GLASS AND STONE
FORMING OCCUPATIONS (any ind.) DPT:138**

Supervises and co-ordinates activities of workers concerned with forming clay, glass, stone, abrasives, asbestos and related non-metallic minerals. (Unit Group 8155):
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).
May supervise workers engaged in a particular activity and be designated accordingly; for example,
Asbestos-Cement-Products Foreman(asbestos & min. wool; cement, stone & clay)
Brick-and-Tile Foreman(cement, stone & clay)
Clay-Shop Foreman(cement, stone & clay)
Concrete-Products Foreman(cement, stone & clay)
Glass-Forming Foreman(glass)
Moulding Foreman(cement, stone & clay; non-metal. min. prod., n.e.c.)
Plasterboard Foreman(cement, stone & clay)

**8150-114 FOREMAN, CLAY, GLASS AND STONE
FURNACEMEN AND KILNMEN (any ind.)
DPT:138**

Supervises and co-ordinates activities of workers concerned with operating and tending furnaces, kilns, ovens, curing chambers, lehrs and autoclaves to facilitate further processing of clay, glass, stone, abrasives, asbestos and related non-metallic minerals. (Unit Group 8151):
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).
May supervise workers engaged in a particular activity and be designated accordingly; for example,
Asbestos-Cement-Kilnmen Foreman(asbestos & min. wool; cement, stone & clay)
Burning Foreman(cement, stone & clay)
Glass-Furnace Foreman(glass)
Periodic-Kiln Foreman(cement, stone & clay; non-metal. min. prod., n.e.c.)
Tunnel-Kiln Foreman(cement, stone & clay; non-metal. min. prod., n.e.c.)

**8150-118 FOREMAN, CLAY, GLASS AND STONE
LABOURERS AND OTHER ELEMENTAL
WORKERS(any ind.) DPT:138**

Supervises and co-ordinates activities of labourers and other elemental workers engaged in processing and forming clay, glass, stone, abrasives, asbestos and related non-metallic minerals. (Unit Group 8158):
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).
May supervise workers engaged in a particular activity and be designated accordingly; for example,
Asbestos-Workers Foreman(asbestos & min. wool)
Glass-Workers Foreman(glass)
Kiln-Labourers Foreman(cement, stone & clay; non-metal. min. prod., n.e.c.)

**8150-122 FOREMAN, CLAY, GLASS AND STONE
SEPARATING, CRUSHING, GRINDING AND
MIXING OCCUPATIONS(any ind.) DPT:138**

Supervises and co-ordinates activities of workers who operate or tend machinery that separates, crushes, grinds or mixes clay, glass, stone, abrasives, asbestos and related non-metallic minerals. (Unit Group 8153):
Performs duties as described under master title, 01-250 SUPERVISOR/FOREMAN (any ind.).
May supervise workers engaged in a particular activity and be designated accordingly; for example,
Clay-Preparation Foreman(cement, stone & clay)
Lime-Preparation Foreman(cement, stone & clay)
Milling-Plant Foreman(cement, stone & clay)
Mixing-Plant Foreman(any ind.)

**8150-199 OTHER FOREMEN, CLAY, GLASS AND STONE
PROCESSING, FORMING AND RELATED
OCCUPATIONS**

This group includes clay, glass and stone processing and forming foremen, not elsewhere classified; for example, those who supervise and co-ordinate activities of workers engaged in laminating glass and vinyl sheets or tempering sheets of glass to produce safety glass, and preparing asbestos fibers for use in the manufacture of asbestos products. A typical example of an occupational title covered by this residual group definition is:
Safety-Glass Foreman(glass)

**8151-FURNACEMEN AND KILNMEN: CLAY, GLASS
AND STONE**

This unit group includes occupations concerned with operating and tending furnaces, kilns, ovens, curing chambers, lehrs and autoclaves to affect the physical composition and facilitate further processing of clay, glass, stone, abrasives, asbestos and related non-metallic minerals. Activities include: heating, curing and melting to dry materials and to relieve internal stresses or affect hardness; and firing and baking to produce products, such as pottery, glass, ceramics, bricks and tiles.

**Clay Furnacemen and Kilnmen
8151-110 through 8151-130**

**8151-110 PERIODIC-KILN OPERATOR(cement, stone &
clay; non-metal. min. prod., n.e.c.) DPT:362
kilnman, periodic.
GED 3 SVP: 7 EC: I 3 5 7 PA: M 4 5 6 7**

Operates periodic kiln to fire (bake) products, such as brick, tile, abrasives, porcelain and pottery ware to a specified hardness, by performing any combination of the following duties:
Reads work order to determine production requirements for periodic kiln operation. Directs activities of workers who stack greenware into kiln, seal kiln, open fuel valves and light gas or oil jets. Places pyrometric cones and electronic temperature probes at specified positions inside kiln before sealing. Observes, through peephole, pyrometric cones, saggars or product being fired to determine level and uniformity of temperature and humidity at various sections in the kiln. Records temperature readings observed on remote reading dials of electronic temperature probes. Adjusts fuel feed and air draught to regulate kiln temperature according to specifications, and determines when firing is completed. Closes fuel valves to stop firing. Opens kiln crown-holes and installs and starts fans to cool baked ware in kiln.

Directs activities of workers who unseal kiln on completion of cycle and remove cooled ware from kiln.

May operate semi-automatic electrically-heated periodic kiln. May operate periodic kiln fired with coal or wood and remove clinkers from firebox. May rebake products after glaze or decoration is applied to ware. May fire specific product, employ specific process, or operate periodic kilns or ovens of various size and be designated accordingly; for example,

Abrasive-Products Kilnman(non-metal. min. prod., n.e.c.)

Bisque Kilnman(cement, stone & clay)

Brick Kilnman(cement, stone & clay)

Decorating Kilnman(cement, stone & clay)

Glost Kilnman(cement, stone & clay)

8151-114 TUNNEL-KILN OPERATOR(cement, stone & clay; non-metal. min. prod., n.e.c.) DPT:362
kilnman, tunnel.

GED: 3 SVP: 7 EC: 1 3 5 7 PA: M 4 5 6 7

Operates tunnel kiln to fire (bake) products, such as brick, tile, abrasives, porcelain and pottery ware, to specified hardness:

Reads work order to determine production requirements for tunnel kiln that is fired for continuous operation. Directs activities of workers loading and unloading kiln cars. Operates transfer car to move loaded kiln cars from drying room or tunnel dryer to entrance of tunnel kiln. Opens door of tunnel kiln and attaches loaded kiln cars to mechanism that propels string of kiln cars through kiln at specified rate. Observes, through peepholes, pyrometric cones, saggars or products being fired to determine temperature and humidity levels at various sections of the kiln. Observes and records readings from kiln temperature meters. Adjusts air draught and fuel feed to regulate kiln temperature according to specifications, and decides when firing is completed. Opens kiln doors at end of firing cycle and moves loaded cars from tunnel kiln to sorting area, using transfer car. Reports information to foreman concerning breakdowns, malfunctions, work progress and firing schedule.

May operate drying tunnel to condition and preheat products preparatory to firing. May operate tunnel kiln heated by electricity. May rebake products after glaze is applied. May fire specific product, employ specific process, or operate tunnel kilns or ovens of various size.

8151-116 HYDROGEN-FURNACE TENDER(electronic equip.) DPT:685

GED: 3 SVP: 4 EC: 1 3 6 7 PA: L 4

Tends hydrogen furnace to remove moisture and impurities from ceramic, glass or metal parts used in manufacture of electronic components:

Adjusts furnace controls to regulate gas flow and temperature according to specifications. Loads parts on boats and places boats on conveyor that passes through furnace. Reads pyrometer and gauges to verify gas flow, furnace temperature and temperature of parts in furnace, and adjusts controls to maintain parts at specified temperature. Removes boats from furnace conveyor at end of heating cycle. May prepare coating solutions and operate equipment to coat parts.

8151-118 DRYING-MACHINE TENDER(cement, stone & clay) DPT:685

GED: 2 SVP: 2 EC: 1 3 PA: H 4

Tends machine that dries newly-formed ware in moulds:

Starts electric drier or adjusts valves to admit heat into drying machine. Starts conveyor that automatically carries ware through drying machine. Removes mould from conveyor and ware from mould and rubs excess clay from ware. Places dried ware on rack. Places empty mould on conveyor for transfer to filling station.

8151-122 PERIODIC-KILN-OPERATOR HELPER(cement, stone & clay; non-metal. min. prod., n.e.c.) DPT:686
GED: 2 SVP: 2 EC: 1 3 5 PA: M 2 3 4

Loads, seats, unseals and unloads periodic kiln, by performing any combination of the following duties:

Lifts and passes packed saggars to co-worker to load periodic kiln. Builds up kiln door with brick and mortar to seal kiln, using hand tools. Opens fuel valves when directed by kiln operator and lights gas or oil jets to fire kiln. Removes brick and mortar seals from kiln door on completion of burning cycle, using hammer and chisel. Climbs

ladder inside cooled kiln and hands down uppermost saggars to co-worker to unload ware from kiln. Unpacks ware from saggars for removal to cleaning and finishing area. Scrapes scrap clay from surface of saggars preparatory to sagger reuse, using knife. Replaces broken sagger pins that support ware in saggars during firing. Removes debris from interior of kiln, using broom, shovel and wheelbarrow. See also definition for term title, 02-160 HELPER (any ind.).

May perform specific activity and be designated accordingly; for example,

Periodic-Kiln Drawer

Periodic-Kiln Loader

8151-126 SAGGER PACKER(cement, stone & clay; non-metal. min. prod., n.e.c.) DPT:686

GED: 2 SVP: 2 EC: 1 3 5 PA: H 2 3 4

Places greenware or glazed ware in saggars preparatory to firing in periodic or tunnel kiln:

Places greenware or glazed ware on potter's pins in sagger according to specifications. Places clay-wad-covers on tops of saggars to prevent loaded saggars from tilting when stacked in periodic kiln or on kiln trucks. Transports loaded saggars into periodic kiln, manually or using handtruck, and stacks them around interior of kiln in prescribed manner with the aid of co-worker, using ladder. Stacks loaded saggars onto kiln trucks, manually or using hoist, and pushes kiln truck onto continuous conveyor to fire ware in tunnel kiln.

8151-130 KILN SETTER(cement, stone & clay; non-metal. min. prod., n.e.c.) DPT:687

GED: 2 SVP: 2 EC: 1 3 PA: VH 3 4

Positions setting rings or refractory batts on kilncar or in kiln to facilitate circulation of air around clay or abrasive products during firing:

Spaces and levels rings or batts on floor of kiln car or kiln, using hoist, and knowledge of kiln operation and firing process, to ensure that even temperature is maintained during firing. Spreads crushed quartz or sand on floor, rings and batts, to prevent cohesion of products during firing. Positions products, such as bricks, blocks and grinding wheels, on rings or batts, manually or using hoist, ensuring that components of furnace load are compatible. Pushes kiln car into and out of kiln manually, or positions car under moveable kiln and lowers or raises kiln, using hydraulic hoist.

May sort fired products into order lots according to size, shape, grain or colour.

Glass Furnacemen and Kilnmen

8151-150 through 8151-170

8151-150 GLASS-FURNACE OPERATOR(glass) DPT:382
tank-furnace operator.

GED: 3 SVP: 6 EC: 1 3 5 6 PA: L 4 7

Controls furnace to melt and fuse ingredients to make glass, by performing any combination of the following duties:

Observes gauges to determine level of molten glass in furnace. Adjusts controls to regulate flow of mixture of ingredients; such as, silica, sand, soda ash and cullet (waste glass) into furnace to maintain specified level. Observes meters, gauges and charts to determine air, fuel and water pressure, and air-fuel ratio. Determines furnace temperature, using pyrometer. Turns valves to control water, air and fuel feed to maintain specified pressures and furnace temperature. Ensures operation of automatic switch that reverses fire from one side of regenerative chamber to other side to equalize heat in furnace. Collects samples of molten glass for laboratory analysis. Examines glass for colour and texture defects indicating equipment malfunction. Examines furnace walls for worn spots and leaks. Records data; such as, water, air and fuel pressures, furnace temperature and equipment malfunctions.

May control furnace to melt ingredients used in manufacture of fibreglass yarn. May control automatic equipment to weigh and mix ingredients. May control combustion phase and be designated accordingly; for example,

Furnace-Combustion Analyst

8151-154 WINDSHIELD-AUTOCLAVE OPERATOR(glass)
DPT:384

GED: 3 SVP: 4 EC: I 3 6 PA: M 4 7

Operates autoclave to impart transparency to laminated automobile windshields:

Stacks and locks together tubs loaded with opaque, laminated windshields, using overhead crane and locking pins. Presses switch to open top of autoclave. Positions tubs of windshields into autoclave, using overhead crane. Presses switch to close autoclave. Operates switches and controls to start and regulate flow of steam under pressure through oil in autoclave. Monitors gauges and recorders during process to ensure operation and cycling are according to specifications, and records results. Presses switch to stop process after specified time. Opens autoclave and removes tubs of processed windshields, using overhead crane. Allows oil to drain from tubs into collection chamber. Lowers tubs to floor when draining is completed, and separates tubs from stack, using overhead crane. Records number of windshields processed.

8151-156 ENAMELLING-FURNACE OPERATOR(metal stamp., press. & coat.)
DPT:684

GED: 3 SVP: 4 EC: I 3 PA: M 4

Operates furnace and related equipment to preheat metal units, such as bathtubs, sinks and ovens, to coat units with vitreous enamel, and to bake units to fuse and glaze enamelled surface:

Adjusts controls to maintain furnace at specified temperature. Regulates speed of conveyor that carries units through furnace and coating equipment, to preheat units and coat them with enamel. Returns units to furnace to bake enamelled surface. Repeats coating and baking cycle until units are enamelled to specified thickness and hardness and are free from defects, such as blisters and discoloration.

8151-158 LEHR TENDER(glass)
DPT:685

GED: 3 SVP: 3 EC: I PA: L 4 7

Tends lehr to heat-condition and treat glass or glassware for purposes such as tempering, bending, removing stress and fusing designs or calibrations:

Loads glass articles onto conveyor. Starts conveyor and adjusts speed of conveyor through lehr to regulate time articles remain in lehr. Adjusts temperature controls according to specifications. Observes articles on conveyor when leaving lehr to detect defects, such as cracks, discoloration and warping. Discards defective articles.

May position glass on forms when bending windshields. May adjust gas flames and cooling jets when tempering specified areas on glassware, such as rims of drinking glasses.

8151-162 LENS HARDENER(scient. & ind. equip., n.e.c.)
DPT:685

GED: 2 SVP: 2 EC: I PA: L 4

Tends electric oven and ball-drop-test equipment to harden and test lenses used in safety glasses, by performing any combination of the following duties:

Measures lens thickness, using calipers, to ensure lens conforms to specifications for hardening. Soaks lens in water to loosen from mounting and places decal trademark on corner of lens to cement during hardening. Positions lens in holding fixture and inserts fixture into electric oven. Sets time and temperature controls according to specifications for prescribed hardness. Removes lens after specified time and places in tray to cool, or places lens in airflow to cool. Holds lens in polarized light to detect defects produced by hardening. Places lens on turntable of drop-test machine. Starts machine that automatically drops steel ball of specified weight from specified height onto lens, or places ball in release mechanism of specified height and activates release mechanism. Discards damaged lenses.

8151-166 OVEN TENDER, FIBREGLASS(syn. fibres)
DPT:685

GED: 2 SVP: 2 EC: I PA: L 4 7

Tends oven to bake fibreglass slivers or sheets:

Examines fibreglass articles visually for defects, such as grease spots and damaged edges, and loads articles on handtruck. Weighs truck, calculates weight of fibreglass, and pushes truck onto oven conveyor. Adjusts temperature and time controls according to specifications, and

starts conveyor to feed truck into oven. Records weight of fibreglass articles processed.

May align wooden forms in oven when baking corrugated fibreglass sheets.

8151-170 FUSING-FURNACE LOADER(glass; plastic prod.)
DPT:686

GED: 2 SVP: 2 EC: I PA: L 4

Loads and unloads conveyor of furnace that fuses multifocal lens blanks or moulds unground lens blanks:

Positions lens blanks on metal blocks or moulds. Places blocks or moulds on tray and loads tray on conveyor that passes through furnace to fuse or mould lens blanks according to specifications. Removes tray of blanks from conveyor and records number of lens blanks processed.

May stamp identification number on lens blanks.

Stone Furnacemen and Kilnmen
8151-190 through 8151-226

8151-190 CUPOLA OPERATOR(asbestos & min. wool)
DPT:362

GED: 3 SVP: 6 EC: I 3 5 6 PA: M 4 7

Operates water-cooled cupola furnace and related equipment that melts coke, slag, basalt, lime and silica and spins molten mass into mineral wool fibres:

Signals helper to charge furnace with ingredients. Lights fire in furnace to melt ingredients. Reads gauges and turns valves to regulate water and steam pressure. Observes melting of ingredients in furnace through porthole, and adjusts airstream on flaming coke bed to control intensity of heat and melting process. Activates spinning wheel. Removes taphole plug to allow molten stream to flow into water-cooled furnace trough, over high-pressure steam jet and into spinning wheel, to be spun into mineral wool fibres. Observes colour intensity and flow of molten stream to determine its suitability for spinning. Adjusts distance of steam ring and spinning wheel from end of trough to control length of spun fibres. Scrapes residual slag from trough and spinning wheel, using bar and scraper.

8151-194 ASBESTOS-CEMENT-PRODUCT-AUTOCLAVE OPERATOR(asbestos & min. wool; cement, stone & clay)
DPT:382

steam-tank operator.

GED: 3 SVP: 6 EC: I 3 5 6 PA: M 4 7

Operates autoclave to cure asbestos-cement products, such as pipes and corrugated asbestos board:

Reads work order and installs control cams in autoclave to provide and maintain temperature, pressure, humidity, and curing period automatically according to specifications. Ensures that autoclave recorders chart actual conditions. Removes protective end plugs from pipes. Operates lift truck to sort and stack trays of moulded products onto autoclave car according to compatibility of curing requirements. Connects cable to loaded car train. Operates cable reeler to pull car train into and out of autoclave. Monitors recording charts throughout automatic curing cycle. Operates lift truck to sort trays of products according to next operation required, and to transport products to appropriate area or machine. Performs maintenance duties, such as replacing door gaskets and greasing cars.

May direct activities of workers engaged in moving green asbestos-cement products through drying, air curing or autoclaving cycles within specified interval after forming. May adjust valves in drying room or air curing room to regulate temperature or humidity according to specifications.

8151-198 ROTARY-KILN OPERATOR(cement, stone & clay)
DPT:382

GED: 3 SVP: 5 EC: I 3 5 7 PA: L 4 7

Operates console panel to control rotary type kiln and auxiliary equipment to calcine materials, such as ground stone, gypsum and clay slurry:

Moves controls to light burners and start equipment; such as, conveyors, feeders, dust collectors, crushers and vibrating screens, to feed material into kiln. Starts rotary kiln and monitors panel lights,

gauges and dials and observes colour and shape of flame. Adjusts controls to regulate feed of material and fuel to maintain kiln at specified temperature and operating condition. Adjusts valves to regulate flow of material out of kiln after calcining and to control cooler to cool material. Records data, such as fuel, power and material consumption, and kiln temperature. Inspects kiln periodically for accumulation of clinkers and deterioration of lining. May supervise removal of clinker from kiln wall and relining of kiln with fire-brick.

8151-202 ABRASIVES-FURNACE PREPARER(non-metal, min. prod., n.e.c.) DPT:364
GED: 3 SVP: 5 EC: I 3 5 7 PA: H 4 7

Prepares electric-arc pot-furnace for operation and removes abrasive products from furnace, by performing any combination of the following duties:

Presses button to raise electrodes from furnace. Attaches hook and cable to furnace car and operates electric winch to remove furnace car from well. Attaches hose to furnace and adjusts rate of flow of water according to grade of abrasive required. Stops water flow after specified time. Attaches hook to furnace shell and signals crane driver to lift shell from abrasive ingot. Attaches hook to ingot and signals crane driver to transfer ingot to scales and storage area. Records weight of ingot. Examines condition of electrodes and replaces as required. Examines furnace car and shell for defects and notifies foreman of repairs required. Signals crane driver to reposition shell in furnace car. Operates winch to replace car in furnace well.

May remove abrasive coatings from pans or moulds when preparing tilt-furnaces.

8151-206 ASBESTOS BOARD CURER(asbestos & min. wool; cement, stone & clay) DPT:682
GED: 3 SVP: 5 EC: I 3 4 6 PA: L 4 7

Controls temperature and humidity in curing room to cure flat or corrugated asbestos board according to specifications:

Operates lift truck to position stacks of green asbestos board and separators into dehydrating press. Manipulates controls to operate press through squeezing cycle and expel superfluous water from flat boards. Operates lift truck to move stacks of flat boards from dehydrating press and stacks of corrugated boards from forming machine into curing room. Seals doors of curing room. Changes sealing gaskets when necessary, using hand tools. Opens and adjusts valves to maintain temperature and humidity at specified levels. Reads temperature and humidity dials and monitors curing process. Closes valves and opens room doors at end of specified curing cycle. Operates lift truck to move stacks of cured boards to stripping station. Manipulates controls of stripping machine to separate boards from spacers. Inspects each cured board for breaks, cracks and surface defects as it is stripped and stacked.

May direct activities of workers engaged in stacking cured asbestos board.

8151-210 ASBESTOS-CEMENT-PIPE CURER(asbestos & min. wool; cement, stone & clay) DPT:563
GED: 3 SVP: 5 EC: I 4 5 7 PA: M 4 5 6 7

Operates equipment to stack green asbestos-cement pipe in steam room, and controls conditions in steam room to cure pipe:

Directs activities of workers who prepare formed pipe for curing. Operates crane to position sand trays at end of pipe machine. Selects end blocks for insertion into green pipes to maintain roundness and for protection during curing. Operates hoist to lift prepared pipe onto sand bed. Inspects pipe, using straight edge and shims with sand as necessary to prevent deflection. Adjusts steam valves to regulate humidity in steam-curing room according to specifications. Operates monorail crane to transfer and stack trays of pipe in curing room. Monitors curing cycle. Maintains record of curing cycles and production.

8151-214 ASBESTOS-CEMENT-PRODUCTS-DRIER TENDER(asbestos & min. wool; cement, stone & clay) DPT:565
GED: 2 SVP: 3 EC: I 3 5 6 PA: M 3 4

Tends hot-air drier to cure asbestos-cement products:
Sorts and stacks moulded products onto trays on handtruck according

to compatibility of curing requirements. Opens door and pushes loaded hand truck into drying room. Records curing data; such as, drier number, truck number, product size, time in and specified time for removal. Opens door of drier at removal time. Carries cable into drier, hooks cable onto handtrucks and signals driver to pull cable, to remove trucks of cured products from drier. Pushes handtruck loaded with cured products to finishing or packing area. Returns empty trucks and trays to moulding area.

8151-218 RETORT TENDER(cement, stone & clay) DPT:685
cylinder man.
GED: 2 SVP: 2 EC: I PA: L 4

Tends steam-pressure cylinder (retort) that bakes lime bricks:
Shuts and bolts doors of loaded retort. Opens valve to admit steam into cylinder. Observes pressure gauge and adjusts steam pressure according to specifications. Shuts off steam after specified time and opens cylinder doors. Changes chart and stylus in pressure-recording gauge after each baking process.

May assist in moving kiln cars into and out of retort.

8151-222 CUPOLA CHARGER(asbestos & min. wool) DPT:686
GED: 2 SVP: 2 EC: I 7 PA: H 4

Charges cupola furnace with slag, lime, silica, basalt and coke to produce mineral wool fibres:

Pulls levers to dump ingredients onto weighing conveyor. Weighs and measures portions of coke, slag, basalt, lime and silica according to specifications. Charges furnace with material in alternate layers as directed. Levels layers in furnace, using rake. Records time of charge and weight of each ingredient.

8151-226 ASBESTOS-CEMENT-PIPE-CURER HELPER(asbestos & min. wool; cement, stone & clay) DPT:687
GED: 2 SVP: 2 EC: I 4 5 6 PA: M 2 3 4

Helps pack green asbestos-cement pipes in sand trays for curing:
Examines interior and exterior of pipe for damage caused by mandrel removal, using flood lamps. Rolls rejected pipes to scrap box and notifies curer of type of defect. Marks acceptable pipes with identifying code, using stencils. Inserts and secures end blocks into green pipes, using tape to maintain roundness and for protection during curing. Levels sand in curing tray, using rake. Guides hoisted pipes into position on sand tray. Repacks supporting sand as directed to prevent pipe deflection. Hooks and unhooks loads lifted by crane and hoist. See also definition for term title, 02- 160 HELPER (any ind.).
May wrap pipes in plastic sheets preparatory to curing.

8153-SEPARATING, CRUSHING, GRINDING AND MIXING OCCUPATIONS: CLAY, GLASS AND STONE

This unit group includes occupations primarily concerned with operating or tending machinery and equipment that separate clay, glass, stone, abrasives, asbestos and related non-metallic minerals by centrifuging, screening and agitating; reduce materials to smaller particles by crushing; and grind and mix materials to produce a blended mass. Occupations concerned with mixing concrete and asphalt on construction sites are classified in Unit Group 8799, OTHER CONSTRUCTION TRADES OCCUPATIONS, N.E.C.

Separating and Crushing Occupations 8153-110 through 8153-130

8153-110 EMERY-GRADING OPERATOR(non-metal. min. prod., n.e.c.) DPT:684
GED: 3 SVP: 3 EC: I 5 PA: M 4 7

Operates pebble mill and centrifuge to grind and grade emery according to required fineness:
Dumps bags of emery into mill and takes sample. Examines emery,

using microscope, to determine grinding time. Starts pebble mill to grind emery to required fineness. Turns valve to transfer ground emery particles to agitator tank. Opens valve to add water to agitator tank. Starts agitator to combine emery particles and water into slurry. Activates pump to transfer slurry to centrifuge. Starts centrifuge to grade emery by size. Stops centrifuge and activates pump to transfer graded emery to settling tanks. Drains water from settling tank to dry emery. Shovels dried emery from tank to storage container. Weighs and records weight of each batch.

8153-114 CRUSHER TENDER(cement, stone & clay) DPT:665
GED: 2 SVP: 2 EC: B 5 7 PA: M 2 4 5 6

Tends machine that crushes material; such as, rocks and cinders to specified size:

Signals driver of front-end loader to dump material into hopper above conveyor belt. Regulates flow of material from hopper onto conveyor and through crushing machine. Observes flow of material on conveyor and through crushing machine to locate blockages. Stops conveyor and crusher when mechanism is blocked with material and breaks large pieces, using crow bar and sledge hammer. Changes or adjusts screens to control size of crushed material, using hand tools. Repairs damaged screens, using wire and wire cutters.

8153-118 CULLET-CRUSHER TENDER(glass) DPT:685
batch-plant tender.
GED: 2 SVP: 2 EC: B 5 7 PA: M 4 7

Tends machine that crushes cullet (waste glass) used in production of molten glass:

Starts conveyor to transfer cullet from storage bin to crushing machine. Starts and observes crushing machine to grind cullet to specified fineness. Regulates water spray on conveyor screen to cool cullet as it leaves crushing machine. Starts conveyor to transfer cullet to storage bins.

May operate front-end loader to transfer raw materials, such as, silica sand and soda ash, from yard or freight cars to storage bins. May tend automatic scales to weigh specified amounts of raw materials.

8153-122 HAMMER-MILL TENDER(asbestos & min. wool; cement, stone & clay) DPT:685
GED: 2 SVP: 2 EC: I 5 7 PA: H 3 4

Loads and tends hammer mill that breaks and crushes pieces of material, such as slag, slate and asbestos-cement, into powder:

Sorts material into loads of similar size and breaks large lumps, using sledge hammer. Throws pieces into hopper and starts hammer mill. Observes electric load meter of mill and manipulates gate lever to control rate of feeding material into mill from hopper. Starts conveyor system to transfer pulverized material from mill to storage box and prepares tag to identify contents.

8153-126 SCRUBBER TENDER(cement, stone & clay) DPT:685
GED: 2 SVP: 2 EC: B 5 7 PA: L 4

Tends scrubbing machine that screens materials, such as gravel, gypsum and other anhydrites as they move along conveyor:

Turns valves to admit water into cylindrical screen of scrubber. Starts conveyor and scrubber. Opens gate to release materials from hopper onto conveyor for transfer to scrubber. Removes foreign material from mixture and screen. Observes mixture on discharge conveyor to ensure even flow.

8153-130 RECLAIMER, ABRASIVES(non-metal. min. prod., n.e.c.) DPT:686
GED: 2 SVP: 2 EC: I PA: M 4

Feeds agitator or rotating washer that separates abrasive particles from waste material:

Adds specified amounts of reagents and turns valve to fill vat with water. Dumps crushed abrasive reclaims into vat. Starts agitator or vat rotating which causes abrasive material to sink to bottom and lighter waste material to float to top. Drains vat and recovers abrasive.

8153-150 ASBESTOS-PIPE-INSULATION MIXER(cement, stone & clay) DPT:365
GED: 3 SVP: 6 EC: I 5 7 PA: H 4 7

Tends mixing machine to prepare gel (cement binder), and monitors moulding, drying and curing operations during preparation of asbestos-pipe insulation:

Weighs specified amounts of materials, such as asbestos, lime, diatomaceous earths and cement, and dumps materials into mixing tank. Opens valve to add specified amount of water and starts machine agitators. Stops machine and operates pump to transfer mixture to gel tank. Performs titration test for alkalinity and calculates volume of acid required to neutralize gel. Compresses sample of gel into cake and evaluates gelling process, texture and cohesive properties. Pumps calculated volume of acid into gel tank and starts agitators. Stops agitators and pumps neutralized gel to holding tank. Inspects moulding operation to evaluate gelling properties and directs moulders to adjust metering and vacuum action as necessary. Monitors drying time and temperatures and changes control cams during autoclaving period. Schedules drying and curing process to maintain work flow.

8153-154 SLURRY-EQUIPMENT OPERATOR(cement, stone & clay) DPT:682
auxiliary-equipment operator.
GED: 3 SVP: 6 EC: I 5 7 PA: L 4 7

Operates console panel to control auxiliary equipment, such as vibrating weighing feeders, conveyors, mills, mixers, pumps and tanks, to mix cement slurry and regulate flow of slurry to kiln:

Receives signal from kiln operator and starts vibrating weighing feeders and conveyor to transfer crushed limestone from storage pile to ball mill which grinds and discharges powdered limestone into storage tanks. Controls pumps to transfer material from sump tank to mixing tank. Opens valves to fill mixing tank with specified amounts of water and powdered limestone. Starts agitators to mix cement slurry. Controls pumps to transfer slurry from mixing tanks to surge tanks that automatically regulate flow of slurry to kiln.

8153-158 BULK-PLANT TENDER(cement, stone & clay) DPT:385
GED: 3 SVP: 5 EC: B 7 PA: M 2 4

Operates equipment to blend materials into a dry-cement mixture for use in cementing oil and gas wells:

Empties sacks of additive chemicals into hoppers of blending machine. Pulls lever to start pneumatic pumping system and regulate quantity of materials transferred to blending machine, following formulas. Presses switch to start blending machine and mix materials, according to specification. Stops pump and blending machine. Pulls levers to open gates and discharge mixture to storage bins. Requisitions materials to replenish stocks. Prepares delivery tickets and weighs mixture as loaded. Records quantities of materials received and issued, using inventory control records.

8153-162 GLASS MIXER(glass) DPT:385
GED: 3 SVP: 5 EC: I 5 6 7 PA: L 4 6 7

Tends automatic scales, batch-mixing machine and other equipment to weigh and mix materials used in making glass, by one of the following methods:

1. Performs applicable duties of 8153-202 MIXER (cement, stone & clay). Transfers mixture in bin to glass furnace, using chain hoist. Activates tilting mechanism to dump mixture into furnace. 2. Observes panel lights and audio signals, and pushes buttons of automatic machine that weighs ingredients, such as sand, clay, soda ash and cullet (waste glass) to regulate quantity released into mixing machine. Activates bypass mechanism when specified amounts of ingredients have entered weigh hopper and are automatically discharged into rotating mixing machine. Changes controls from automatic to manual operation when required. Opens chute to discharge bypassed ingredients onto scales and into mixer when specified weight is attained. Records weight of ingredients in each batch. Pulls lever to start bucket conveyor to replenish ingredients in bins. Weighs and adds specified quantities of additives, such as carbon, salt cake, pyrites and arsenic, using scale.

May tend crusher to fragment cullet. May weigh specified dye requirements, according to formula, to compensate for colour of cullet.

8153-166 MILL TENDER(cement, stone & clay) DPT:685
GED: 3 SVP: 4 EC: I 5 7 PA: M 2 4 7

Tends crushers and mixers to grind clay, and blend clay and shale for use in ceramic moulding:

Performs applicable duties of, 8153-202 MIXER (cement, stone & clay). Dumps clay on crusher-pit grates. Breaks lumps of clay, using iron bar or sledge hammer. Starts crusher to grind clay to specified size. Examines screens and clears blockages, using wire brush. Removes excess moisture from clay, preparatory to mixing, by regulating input and output rate of conveyors and rotating speed and heating cycle of rotary kiln.

May drive front-end loader to convey clay from storage piles to crusher.

8153-170 CEMENT MILLER(cement, stone & clay) DPT:685
GED: 3 SVP: 4 EC: I 5 7 PA: L 4

Tends machines that mix, grind or pulverize materials, such as coal, stone, shale, clay, oyster shells, gypsum and cement clinker, used in making dry cement:

Starts mill and conveyors. Observes conveyor system to ensure continuous flow of materials to or from mill. Stops conveyor to remove obstructions, using bar. Opens chute over conveyor, and adds materials, such as iron, silica or gypsum, according to specifications. Observes operation of auxiliary equipment, such as cement pumps, air or screen separators, air slides, cement coolers and dust collectors. Turns valves to regulate water, air and oil flow in machine to cool cement according to specifications. Adds water to materials to facilitate flow into machine.

8153-174 DIAMOND-POWDER MIXER(non-metal. min. prod., n.e.c.) DPT:484
GED: 2 SVP: 4 EC: I 7 PA: L 4 7

Mixes bort (industrial diamonds), resins and abrasive powders to produce mixtures used in moulding diamond-abrasive-grinding wheels:

Reads instructions from work order card. Computes quantities according to formula and weighs each ingredient, using gram weight balance. Transfers ingredients onto plate glass to prepare batch of specified size. Mixes powdered ingredients and pours mixture into jar, using scraper and spatula. Labels jar to identify mixture with type of wheel to be moulded.

8153-178 ABRASIVE MIXER(non-metal. min. prod., n.e.c.) DPT:685
GED: 2 SVP: 3 EC: I 7 PA: M 4 7

Tends machine that mixes abrasive compounds for use in making grinding wheels and other abrasive products:

Performs applicable duties of, 8153-202 MIXER (cement, stone & clay). Reads work order to determine amounts of ingredients. Pours mixture into oscillating sieve, using hand scoop, to screen out lumps and oversize granules.

8153-182 MIXING-MACHINE TENDER, PLASTERBOARD(cement, stone & clay) DPT:685
supply man.
GED: 2 SVP: 3 EC: I 5 7 PA: M 4

Tends conveyors and mixer to blend materials, such as gypsum, flour, potash and lime into slurry, used in production of plasterboards:

Performs applicable duties of, 8153-202 MIXER (cement, stone & clay). Observes flow meters and tends conveyors to regulate rate of flow of material into mixing machine. Observes dials to determine reserves of materials in supply tanks.

May operate hydropulper to grind and mix paper into pulp slurry. May use hand truck, or operate power truck or conveyors to transfer ingredients from storage area to supply tanks.

8153-186 REFRACTORY-MORTAR MIXER(cement, stone & clay) DPT:685
GED: 2 SVP: 3 EC: I 5 7 PA: H 4

Tends machines that grind and mix materials to form refractory mortar, used to seal, line or insulate equipment; such as, furnaces, pipes and boilers, performing any combination of the following duties:

Shovels specified amounts of materials; such as, brick, clay, asbestos and refractory mud into hopper of crushing machine. Starts and stops crushing machine. Regulates flow of materials from hopper into crushing machine, using hand controls. Shovels crushed materials into wheelbarrow and dumps them into hopper of mixing machine. Turns valve to admit water into mixing machine. Starts machine and regulates flow of crushed material from hopper into mixing machine. Feels consistency of mixture and adds water or crushed material to obtain specified consistency. Stops machine and opens valve to transfer mixture to storage tank or shovels mixture into container for transportation to work area.

May mix silica to form mixture for spraying interiors of furnaces or tend mud-mill to mix lute, used to seal oven doors and be designated accordingly; for example,

Mud-Mill Tender
Silica-Spray Mixer

8153-190 DRY-PRODUCTS MIXER(cement, stone & clay) DPT:685
GED: 2 SVP: 2 EC: I 5 7 PA: H 4

Tends mixing machine to mix dry products such as plaster, mortar and slate:

Performs applicable duties of 8153-202 MIXER (cement, stone & clay). Specializes in weighing and mixing materials such as gypsum fibre, retarder and other additives to make dry plaster or mixing lime, cement and other materials to make mortar.

May tend machine that mixes multicoloured granules of slate for use in surfacing asphalt-coated roofing felt. May be designated according to type of product mixed; for example,

Mixer, Dry Plaster
Mortar Mixer
Slate Mixer

8153-194 GLAZE MAKER(cement, stone & clay) DPT:685
GED: 2 SVP: 2 EC: I 5 PA: M 4 7

Tends ball mill that grinds and mixes materials to produce glaze, used for coating pottery and tiles:

Weights specified amounts of materials, such as calcium carbonate, clay, feldspar and flint, using scale. Pours material into mill, using handscoop. Pushes button to start mill and opens valve to admit specified amount of water. Stops mill and turns valve to transfer mixed glaze over screens from mill to portable storage containers. Transports containers of glaze, as required, to glazing department, using hand cart. Identifies glaze according to batch number and colour, using labels.

May tend kiln to calcine pigment for colouring glaze.

8153-198 LIME SLAKER(cement, stone & clay) DPT:685
GED: 2 SVP: 2 EC: I 5 7 PA: L 4

Tends open batch tank or rotary slaker that mixes lime and water to make slaked lime, using one of the following methods:

1. Dumps specified amounts of lime into mixing tank and turns valves to admit water. Starts agitators to dissolve lime. Tends automatic pump to drain mixture through mesh screens or settling tanks into storage tanks. 2. Pushes buttons to regulate automatic feed of lime and water into rotary slaker to obtain continuous production of slaked lime. Tests specific gravity, using hydrometer.

8153-202 MIXER(cement, stone & clay) DPT:685
GED: 2 SVP: 2 EC: I 5 7 PA: M 4 7

Tends mixing machines, agitator tanks and related equipment to mix and blend ingredients, such as cement, clay, gypsum, emery, glass and liquids, according to specifications or formulas, by performing any combination of the following duties:

Weights materials, using automatic or other scales. Dumps, pours, pumps or shovels ingredients onto conveyor or into hopper of mixing machine. Adjusts controls to admit specified amounts of ingredients

into mixing machine. Starts machine agitators to mix material for specified period. Adds ingredients during mixing period to attain required consistency of formula. Stops machine when mixing process is complete. Removes mixture from machine manually or by mechanical means, such as conveyors and pumps. Cleans machine preparatory to subsequent runs.

May test mixture for specific gravity, consistency or viscosity, using hydrometer and other testing devices, or submits sample to laboratory for testing. May be designated according to product mixed; for example,

Asbestos Mixer(asbestos & min. wool)

Clay-Slip Mixer

Emery Mixer(non-metal. min. prod., n.e.c.)

Mixer-Caster, Concrete

Rouge Mixer

8153-206 MIXER AND EXTRUDER, MODELLING

CLAY(cement, stone & clay)

DPT:685

GED: 2 SVP: 2 EC: I 5 7 PA: M 4

Tends machines that mix and extrude ingredients to produce modelling clay:

Performs applicable duties of, 8153-202 MIXER (cement, stone & clay). Removes clay from mixing machine and forms it into large balls, by hand. Transports balls of clay to hopper of extruding machine, using hand truck. Attaches specified shape of die to machine, using hand tools. Starts machine that extrudes clay through die to form shaped lengths of modelling clay. Cuts clay to specified size, using wooden knife.

8155-FORMING OCCUPATIONS: CLAY, GLASS AND STONE

This unit group includes occupations concerned with shaping clay, glass, stone, abrasives, asbestos and related non-metallic minerals by methods, such as moulding, spin-casting, blowing and extruding, either by hand or by machine. Activities include: setting-up and operating machines, mixing, smoothing and spreading, cutting, bending and forming, laminating and pressing. Occupations concerned with creating artistic objects in glass are classified in Unit Group 3311, PAINTERS, SCULPTORS AND RELATED ARTISTS.

Clay Forming Occupations

8155-110 through 8155-186

8155-110 BRICK-MACHINE-SET-UP OPERATOR(cement, stone & clay)

DPT:460

dinosaur operator.

GED: 4 SVP: 7 EC: I 3 5 PA: M 4 5 6 7

Sets up and operates automatic machine that cuts extruded clay column into grids of specified size of bricks and sets (loads) grids on kiln car:

Sets up vertical cutting wires to form cutting grid according to specifications and oral instructions, using machine-contained grid-forming adjusting device, hand tools, vernier gauge and calipers. Activates and adjusts automatic air pressure system to ensure plastic separative bags can be inflated to specified pressure and then be deflated. Replaces unserviceable cutting wires and plastic bags, using hand tools. Sets up and adjusts separative bags on lifting arm to ensure spacing conforms to cutting-wire grid, using machine-contained bag-spacing adjusting device, hand tools and calipers. Presses switch to activate automatic machine. Monitors operation of machine that picks extruded column of green-clay off conveyor, cuts column into grids of specified size of bricks, and sets grids on kiln cars. Sprinkles or directs helper to sprinkle sand manually on successive grids of brick set on kiln car to prevent cohesion during firing. Examines brick for conformance to specifications, using calipers. Stops and repairs machine if malfunction or blockage occurs, or adjusts machine if brick does not conform to specifications, using hand tools, machine-contained adjusting devices and calipers. Records production readings from control panel onto production control form.

8155-114 POTTER(cement, stone & clay)

DPT:681

GED: 3 SVP: 7 EC: I PA: M 4 7

Moulds plastic clay to form handcrafted pottery, using a potter's wheel:

Conceives style and shape into which pottery piece is to be formed. Positions ball of clay in center of plaster bat secured to potter's wheel. Starts motor or pumps treadle with foot to start wheel. Presses both thumbs down into center of revolving clay to form hollow. Presses on inside and outside of emerging clay cylinder with hands and fingers, gradually raising and shaping the piece to the desired form and size. Adjusts speed of wheel constantly to conform with changing firmness of clay as piece becomes larger and its walls thinner, judging degrees of change by feel. Trims and smooths surface of finished piece, using rubber scrapers and wet sponge. Pulls wire across top of bat to separate finished piece, using wire held taut between both hands. Places finished piece on rack to dry.

May conduct operation as an exhibition or tourist attraction.

8155-118 DRY-PRESS OPERATOR(cement, stone & clay)

DPT:662

GED: 3 SVP: 6 EC: I 5 7 PA: M 4 7

Operates automatic machine to press dry tempered clay or silica into products such as bricks and wall tiles:

Selects, installs and adjusts upper and lower pressing dies according to work order and specifications, using hoist, gauges and hand tools. Presses switch to start automatic machine. Monitors the flow of tempered clay from feed hopper into die cavities, the pressuring together of the upper and lower hydraulic press dies, the collapsing of the dies and the ejection of the press-formed product. Removes or directs helpers to remove products from press bed and to stack in specified pattern on kiln car or on conveyor. Signals workers to remove loaded kiln car and return empty car. Inspects production-run products periodically to ensure conformance to specifications, using calipers and scale and adjusts machine accordingly. Stops machine if blockage or malfunction occurs, and removes blockage or repairs malfunction.

May operate machine to press specific product or material and be designated accordingly; for example, Ceramic-Tile-Press Operator Clay-Dry-Press Operator

8155-122 JIGGERMAN(cement, stone & clay)

DPT:662

GED: 3 SVP: 6 EC: I 5 PA: M 4 5 6 7

Operates semi-automatic potter's wheel to form articles such as plates, bowls and vases, preparatory to drying:

Clamps or bolts mould-retaining ring into jigger or jolly head of potter's wheel, using hand tools. Places clay-covered mould into ring. Selects profile (shaping tool) according to size and shape of article being formed, and fastens to jigger or jolly arm of potter's wheel, using hand tools. Turns screw manually to adjust machine for specified thickness of article being formed. Depresses foot-switch to start potter's wheel revolving. Lowers jigger or jolly arm with profile attached, using an arm-hand movement, against clay in mould to jigger (pare and shape) clay into article. Verifies that article has been formed according to specifications, using template and calipers. Smooths and trims surface and edges of rotating article, using a wet sponge and hand-trimming tools. Places moulds containing formed article on conveyor to dryer. Assigns tasks and gives directions to helpers.

May fabricate and repair shaping tools and templates. May set up and operate automatic machine to shape greenware and be designated accordingly; for example, Jiggerman, Automatic

8155-126 BRICK-AND-TILE-MAKING-MACHINE

OPERATOR(cement, stone and clay)

DPT:682

GED: 3 SVP: 6 EC: I 5 PA: M 4 7

Operates automatic machines that mix ingredients, extrude tempered clay mixture and cut extruded clay into sections to make products such as bricks, drain tiles and porcelain insulators:

Installs and adjusts dies, cores and rings in extruding machine according to product specifications, using hand tools and measuring instruments. Selects and mounts cutter assembly according to type and size of product, using hoist and hand tools. Sets controls on automatic cut-off knives or wires to cut extruded clay to specified dimensions. Starts mixing machine and adjusts valves to feed and regulate flow of

ingredients into machine. Starts pug mill. Turns valves to add water and oil to mixture or to increase vacuum in pug mill. Starts automatic extruding and cutting machines. Examines product to detect deviations from specified consistency, size and shape, using fingers, measuring instruments and product sample. Adjusts valves and controls until product meets specifications.

May extrude specific product or operate individual machine and be designated accordingly; for example, Drain-Tile-Auger-Machine Operator
Pug-Mill Operator

8155-130 HOT-PRESS OPERATOR(cement, stone & clay) DPT:662
clay-press operator.
GED: 3 SVP: 5 EC: 1 3 5 7 PA: H 4 5 6 7

Operates mechanical or hydraulic press that hot presses pugged clay to form porcelain ware such as electrical insulators:

Reads work order and withdraws or directs withdrawal of specified moulds and die-plunger from storage. Inserts die-plunger into head of press, using hand tools. Directs worker to place pugged-clay hats of specified size in moulds and set moulds in automatic pressing machine. Adjusts gas or kerosene-oil jet to heat die-plunger to high temperature. Starts machine and monitors automatic sequential cycle of painting oil on clay bat to prevent adhesion of die-plunger, of ramming hot die-plunger into clay-filled mould to press clay into shape of mould and form core-cavity, and of pneumatically ejecting formed greenware from mould onto conveyor for transportation to dryer. Trims excess clay from formed greenware before ejection, using knife. Examines production-run pieces periodically to ensure conformance to specifications, using calipers and scale. Stops machine if blockage or malfunction occurs, and removes blockage or repairs malfunction.

May remove mould containing formed greenware from machine manually and place on conveyor for transportation to dryer. May write daily summary of production time versus down-time for production control purposes.

8155-134 INSULATOR BUILDER(cement, stone & clay) DPT:684
slip joiner.
GED: 3 SVP: 5 EC: 1 PA: M 2 3 4 7

Stacks, seats and bonds together preformed green (unfired) insulator sections to build large electrical insulators:

Reads work order and blueprint to determine product requirements and specifications. Selects preformed, green insulator sections according to specifications. Moves insulator sections from storage area to assembly area, using hand truck. Inspects sections for evidence of damage. Repairs damaged sections, using pugged clay, slip (liquid clay) and sponge. Rejects and replaces irreparable sections. Fills under-recess of first section to square off bottom, using pugged (plastic) clay and bonding slip. Smooths squared-off bottom of first section, using trowel and wet sponge, and places on assembly cart. Applies slip manually to upper surface of first section to act as bonding agent. Works slip into clay to increase effectiveness of bond, using fingers. Fits second section of insulator over first section and rotates manually to seat and bond sections and adjusts to specification, using template or square. Stacks, seats and bonds additional sections until insulator of specified requirements is assembled, using platform to reach upper sections. Manipulates and adjusts stacked sections manually to ensure sections have been seated according to specifications, using plumb line and scale. Wipes excess slip from assembled insulator, using wet sponge. Pulls cart holding assembled insulator to glaze-spraying area.

May position uncured circular insulator on turntable, using a hoist and apply various shaped scrapers, abrasive cloths and wet sponges over surface of revolving insulator to remove rough spots and mould marks.

8155-138 RAM-PRESS OPERATOR(cement, stone & clay) DPT:682
GED: 3 SVP: 4 EC: 1 5 PA: M 4 7

Operates hydraulic ram-press to form pottery ware:

Positions plaster die on bed of press, using hoist. Clamps upper and lower halves of die to ram and bed of press and connects air hose to die, using hand tools. Aligns die, using pins, jacks and measuring devices such as calipers and rule. Places pugged (plastic) clay of specified size on die face and presses control to lower ram to shape

ware and raise ram automatically. Holds hands under ram to receive ware as it is released from die. Inspects ware for specified thickness and adjusts position of die as required, using hand tools. Places ware on conveyor for further processing. Removes moisture from die, using sponge or air gun and removes scrap clay, using knife.

May operate small pug mill and extruder to produce pugged clay. May raise and lower ram manually.

8155-142 CLAY-STRUCTURE MOULDER AND INSTALLER(cement, stone & clay) DPT:684
GED: 3 SVP: 4 EC: 1 3 PA: M 3 4

Moulds floaters, shut-off bars and other clay structures and positions them in tank furnaces, drawing kilns and other glass forming equipment:

Shovels lump clay into pug mill and adds water. Starts pug mill that mixes materials to specified consistency. Pulls lever to dump clay mixture into wheelbarrow and pushes wheelbarrow to moulding area. Bolts wooden sections of specified mould together, using wrench, and lines mould with paper to prevent adherence of clay to mould. Dumps clay into mould and tamps with hand tool. Dismantles mould and covers clay structure with damp burlap to prevent rapid drying. Smooths and finishes structures to specifications, using hand tools, square and rule. Moves clay structures, using fork lift truck, and positions them in tank furnaces and drawing kilns, using chain hoist and hand tools. Inserts air hose into cleanout openings of tank furnaces and opens valve to blow foreign material from checkers (air baffles).

8155-144 STOPPER MAKER(cement, stone & clay) DPT:684
stopper-rod maker.
GED: 2 SVP: 4 EC: 1 3 4 7 PA: M 3 4

Assembles refractory stoppers used to plug pouring nozzles of steel ladles:

Mixes specified amount of refractory mortar powder with water, using trowel or hoe. Places steel rod in vice or hydraulic press and bends to specified shape, using sledge hammer or by operating press. Fastens stopper head to rod with metal pin. Spreads mortar on rod, using trowel, and slides brick sleeves over rod to form refractory jacket. Tightens locknuts holding assembly together, using wrench. Spreads mortar on jacket to seal sleeve joints. Hoists stopper and rod assembly on drying rack and pushes rack into oven to dry mortar. Pulls rack from oven and pushes to storage area.

8155-146 HAND MOULDER(asbestos & min. wool; cement, stone & clay; non-metal. min. prod., n.e.c.) DPT:684
GED: 2 SVP: 3 EC: 1 PA: M 4

Moulds abrasive and refractory products such as blocks, bricks, pipes and tiles, using hand-moulding equipment and hand tools:

Selects mould from storage according to work order. Brushes mould cavity with oil to prevent product from adhering to mould. Packs moulding mixture or lays soft strip of asbestos sheeting or abrasive into mould and tamps, using hand, mallet or pneumatic ramming tool. Removes excess mixture from top and sides of mould, using straight-edge or knife. Removes product from mould after designated period of time and smooths product, using hand tools. Throws crushed quartz or sand on casting or moulded abrasive to prevent bonding during subsequent drying operation. Stencils or uses chalk to mark identifying code on product. Cleans used moulds, using scraper and brush.

May transfer product to kilns, using handtruck. May operate extruding machine to form special products. May be designated according to product moulded or method used; for example,

Brick-Moulder, Hand
Pipe-Fittings Moulder
Tamp-Moulder, Refractory
Tile-Moulder, Hand

8155-150 HAND PRESSER(cement, stone & clay) DPT:684
GED: 2 SVP: 3 EC: 1 PA: L 4

Presses damp plastic clay by hand into shape of mould to form irregularly-shaped pottery and porcelain ware such as bowls, trays and novelty pieces:

Selects mould from storage according to work order. Places sheet of clay on mould, raising edge of clay to let air escape. Presses clay to conform to mould contours, using hands and fingers. Smooths and

trims outside of clay into specified form, using wet sponge, trimming knives and contour gauges. Sets formed piece aside to dry.

8155-154 SAGGER MOULDER(cement, stone & clay)

DPT:684

GED: 2 SVP: 3 EC: I PA: M 3 4

Grinds, combines and forms refractory clay material to make saggars, using grinding machine, vats and moulds:
Tends machine that grinds broken saggars into grog (small pieces). Shovels grog and refractory clay, in specified proportions, into combining vat. Turns valve manually to admit water into combining vat and permits mixture to soak for several days to homogenize into semi-liquid state. Stirs mixture, using hand paddle, and adds water or clay to obtain required specific gravity. Verifies consistency visually prior to mixture being pressed and extruded by other workers into rolls of pliable refractory clay. Cuts and weighs sufficient clay from roll for one sagger. Lays part of weighed clay into circular mould and remainder into rectangular mould and pounds into shape of moulds, using maul, to form sagger bottom and side. Peels sagger bottom and side from moulds. Fits bottom and side into shaping mould and crimps edge of side to bottom, using fingers and water, to form sagger. Trims and smooths surface of sagger, using hand knife, wooden paddle and wet sponge. Collapses shaping mould and strips sagger from mould, using spatula. Lifts sagger onto rack for subsequent drying and firing.

8155-158 ARTISTIC-OBJECTS CASTER(cement, stone & clay)

DPT:684

GED: 2 SVP: 3 EC: I PA: M 4

Casts plaster-of-Paris in moulds to form artistic objects such as religious statuary, figurines and novelties:

Mixes plaster and water manually in container according to formula to obtain required consistency, using a spatula. Assembles and secures together sections of mould, using cord or clamps. Inserts wires, tubing or tow into mould cavity to reinforce casting when necessary. Pours plaster mixture into mould. Shakes mould to distribute plaster layer on inside of mould and pours off excess mixture. Repeats process after each layer hardens until a specified casting thickness is attained. Disassembles mould and removes casting. Applies plaster paste to fill holes and defects in casting, using spatula. Smooths surface of casting, using scraping tool and sandpaper.

8155-162 GREENWARE FINISHER(cement, stone & clay)

DPT:684

GED: 2 SVP: 3 EC: I PA: L 4

Trims and smooths green (unfired) pottery and attaches handles preparatory to glazing or firing by performing any combination of the following duties:

Positions circular pieces such as plates, cups and bowls on revolving spindle. Manipulates hand trimming knives over contours of spinning ware surface to remove rough spots and mould marks. Presses moist sponge against contours of spinning ware to smooth surface. Positions irregularly shaped pieces, such as non-circular jugs, cups and bowls, on trimming table. Manipulates hand trimming knives and wet sponge over irregular surface of ware to remove rough spots and mould marks, and to smooth surface. Trims ends of handles or knobs to fit ware, using hand trimming knives. Dips end of handle or knob in slip (semi-liquid clay) and presses onto specified position on greenware. Trims and smooths handle or knob joint using hand knives and a wet sponge preparatory to glazing firing.

May be designated according to specific task performed; for example, Handle Sticker
Pottery Trimmer

8155-166 JUNCTION MAKER(asbestos & min. wool; cement, stone & clay)

DPT:684

pipe-fitting maker.

GED: 2 SVP: 3 EC: I 7 PA: M 3 4

Cuts and joins two sections of uncured pipe such as drain tile or sewer pipe at specified angles to form junctions and fittings:

Places template around end of first pipe section. Cuts along template to form specified angle, using knife, wire cutter or saw. Roughens cut edge of first pipe and side of second pipe where joint is to be made, to facilitate coupling, using tile-maker's comb. Fits cut edge of first pipe

to second pipe manually, using fitting fixture and end blocks. Moulds plastic clay, cement or epoxy resin manually around joint to fix and seal junction. Cuts hole in second pipe at inner junction, using knife. Smooths joint at inner and outer junction, using spatula, trowel and wet sponge. Places junction on curing rack.

May bend green pipe manually to form pipe fitting. May cut and join pipe made of specific material and be designated accordingly; for example,

Asbestos-Cement-Pipe Junction Maker

Clay-Drain-Tile Junction Maker(cement, stone & clay)

8155-170 MOULD FILLER(cement, stone & clay)

DPT:684

batter-out.

GED: 2 SVP: 3 EC: I 5 PA: M 4

Spreads pugged clay in moulds, preparatory to forming into pottery and semi-porcelain ware, using one of the following methods:

1. Centers machine-cut clay blank manually on rotating horizontal wheel of batting-out machine. Pulls lever to lower press that flattens clay blank into clay bat. Throws bat forcefully into jigger mould that forms flatware pieces such as plates and saucers. Pulls lever to lower tool that spreads clay firmly and free from folds and voids over jigger mould. 2. Shapes machine-cut clay blank manually into ball. Throws ball forcefully into jolly mould that forms hollow ware pieces such as cups and vases. 3. Throws machine-cut clay blank into press mould or spin mould. Spreads clay firmly and free from folds and voids manually in mould. Pushes filled moulds on roller conveyor to automatic or semi-automatic machines that form ware, either by press moulding or spin moulding.

8155-174 POTTERY-AND-PORCELAIN-WARE

CASTER(cement, stone & clay)

DPT:684

GED: 2 SVP: 3 EC: I PA: M 4

Casts pottery and porcelain ware such as jugs, cups and toilet bowls in moulds:

Fills moulds with slip (semi-liquid clay), using hose from supply tank or by inserting funnel into mould openings and pouring in slip from container. Trims excess clay from inside mould openings and separates mould sections, using hand tools. Removes the green (uncured) castings when observation indicates they are sufficiently firm to handle. Trims and smooths casting surfaces to remove excess clay and mould marks, using knives and wet sponge. Places castings on boards or skids to dry. Cleans used moulds, using air hose and wet sponge.

May prepare and mix ingredients to produce slip or liquid refractory clay solution according to specifications, using grinding and agitating machines. May cast slip or refractory clay solution to form specific products, such as handles and kiln-furniture (setters and pedestals) and be designated accordingly; for example,

Handle Caster
Kiln-Furniture Caster

8155-178 SLIP SEALER(cement, stone & clay)

DPT:684

joint-and-seal maker.

GED: 2 SVP: 2 EC: I 3 6 7 PA: H 4

Forms joint and seal on end of sewer pipe, using mould:

Removes dirt, dust or grease from length of green sewer pipe, using air hose, cleaning rags and kerosene. Examines pipes visually for straightness, chips or cracks and rejects those not meeting specifications. Loads pipe upright on pallet, using pneumatic hoist. Brushes adhesive compound onto one end of pipe. Affixes joint mould to adhesive on end of pipe. Lifts pot containing hot liquid tar and pours tar into mould to form combined pipe joint and seal on end of pipe into which another sewer pipe end can be fitted and sealed. Lifts loaded pallet onto handtruck, using pneumatic hoist. Pushes handtruck to curing oven. Removes mould from end of cured pipe, using hand tools. Trims excess tar from joint and seal, using a knife.

8155-182 FLOWERPOT PRESSMAN(cement, stone & clay)

DPT:685

GED: 2 SVP: 2 EC: I 5 PA: L 4

Tends automatic power press to form clay flowerpots:

Attaches specified shaping die to press and adjusts ram travel, using hand tools. Starts press which operates on cycle. Throws ball of clay into die. Lifts pot from die manually after press has automatically formed flowerpot. Places pot on ware board.

8155-186 JIGGERMAN HELPER(cement, stone & clay)

DPT:686

GED: 2 SVP: 2 EC: I 5 PA: H 3 4

Compacts clay into moulds preparatory to jiggering and removes residual clay from greenware during jiggering operation:

Conveys moulds to and from storage, and clay blanks from pugging machine, using handtruck. Compacts clay manually into moulds ensuring freedom from folds, cracks and trapped air. Places clay-filled mould in jiggering machine. Pulls residual clay, resulting from jiggering operation, away manually from greenware being formed. Sets mould containing formed greenware on conveyor to dryer or on rack to dry. See also definition for term title, 02-160 HELPER (any ind.). May help fabricate and repair shaping tools and templates.

Glass Forming Occupations
8155-210 through 8155-270
8155-210 MASTER-GLASS BLOWER(glass)

DPT:061

GED: 5 SVP: 8 EC: I 3 6 7 PA: L 4 5 6 7

Conceives style and form for desired artistic object, and blows and sculpts semi-finished free-form glass objects into final aesthetic form, using blowpipe and artisan's hand tools and equipment:

Conceives shape into which artistic object is to be formed. Observes batch of molten glass in melting furnace to determine readiness for use in production process, employing knowledge of glass characteristics. Gathers amount of molten glass on blowpipe and blows and shapes it into semi-finished, free-form, prototypic-glass object to demonstrate to underworkers and helpers the size of gather (gob of molten glass) required and the extent to which the object is to be semi-finished for further forming. Receives from underworker a semi-finished production-run glass object that has been reheated to a desired viscous condition on punty or blowpipe. Manipulates punty, or blows into and manipulates blowpipe, to prevent semi-finished object from sagging, to maintain density and colour blending of glass, and to shape object into desired finished proportions, employing traditional skills of the glass artisan. Reheats, shapes and forms individual parts of object to perceived extension and form, using specialized self-developed artisan's hand tools. Draws, shapes and shears extended sections of object to proportionate size and dimensions in relation to main body of object, using artisan's hand tools. Assigns tasks and gives direction to underworkers and helpers.

8155-212 SCIENTIFIC-GLASS-APPARATUS BLOWER(glass; scient. & ind. equip., n.e.c.)

DPT:261

GED: 4 SVP: 8 EC: I 3 6 PA: L 4 5 6 7

Develops specifications for scientific apparatus, and blows and shapes glass tubing to form apparatus and components, such as flasks, measuring instruments and vacuum pumps:

Examines sketches and drawings and develops scientific apparatus to meet requirements. Correlates specifications with knowledge of factors such as effects of heat, vacuum and corrosive chemicals, to determine type of glass to be used. Heats glass tubing to viscous condition, using gas flame. Blows and draws heated tubing into specified forms, using compressed air or own breath, and hand tools. Shapes, bends or joins sections of formed tubing, using glassworker's tools and continues blowing to ensure bends and joints have correct thickness and diameter and to obtain invisible joint. Measures product to verify dimensions, using micrometers, calipers and rule. Assigns tasks and gives direction to helper.

May insert metal flanges, tubes and wires into molten glass forms. May heat and shape glass around metal components to bond glass to metal, using glassworker's tools.

8155-214 GLASS-FORMING-MACHINE SET-UP MAN(glass)

DPT:360

GED: 4 SVP: 8 EC: I 5 6 PA: M 3 4 5 6 7

Sets up, adjusts and repairs automatic feeding, flowing and forming machines and equipment that form bottles and other glass products from molten glass:

Reads set-up instructions to determine machine parts and mechanical adjustments required. Installs moulds and mould components, such as plungers and bottom plates, and replaces cams on machines, using hand tools. Adjusts duct orifices to control size of molten glass gob fed to mould. Adjusts valve on furnace to regulate temperature of molten

glass according to specifications and production requirements. Changes Lehr conveyor gears and rheostats according to specifications to control annealing time of formed glassware. Sets cams and pusher bars that control ejection of sub-standard products. Measures glass products to verify that machines produce according to specifications, using calipers and gauges. Repairs and adjusts machines while in operation, using hand tools, calipers and gauges. Allocates assignments and directs activities of helpers. Prepares reports on set-up and repairs performed or contemplated.

8155-218 UNDERMASTER GLASS BLOWER(glass)

DPT:361

GED: 4 SVP: 8 EC: I 3 6 7 PA: L 4 5 6 7

Blows molten glass into shape or semi-finished free-form object, using a blowpipe:

Receives gather (gob of molten glass) on blowpipe from helper. Blows into pipe to inflate gather while rotating to form basically desired shape, thickness, colour, density, shading and size of object. Manipulates, rotates and positions pipe in relation to weight of gather to shape sides and bottom of object in accordance with prototype. Attaches appropriately shaped punty to end of semi-finished glass object for reheating and final shaping. Assigns tasks and gives direction to helper.

8155-222 SPIN-MOULD-MACHINE SET-UP
OPERATOR(glass)

DPT:380

GED: 4 SVP: 7 EC: I 3 5 6 PA: L 3 4 7

Sets up and operates automatic spin-mould machine to form glass articles such as television picture tubes:

Selects moulds according to product specifications. Installs moulds and mould rings in machine, using wrenches. Positions, connects and clamps air, gas and water hoses, and gas burners, using hand tools. Adjusts controls to regulate mould cycling and spin rates, and temperature. Adjusts flow valve and shear timer to regulate delivery rate, weight and shape of gob delivered from feeder into moulds, according to specifications. Sets lubrication valves to prevent adhesion of molten glass to feeder chutes and moulds. Presses switch to start machine. Monitors delivery of gobs through feeder chutes into spinning moulds, distribution of molten glass over mould surface by centrifugal force, and automatic cycling to ensure machine is operating according to set-up parameters. Reads gauges to verify coordination of machine functions. Weighs, measures and inspects production sample to assess conformity to specifications, using scales, gauges and visual verification. Adjusts valves and controls within close limits to correct deviations from specifications. Lubricates and cleans machine at specified intervals.

8155-226 GLASS-BLOWING-LATHE OPERATOR(glass;

scient. & ind. equip., n.e.c.)

DPT:684

GED: 3 SVP: 8 EC: I 3 6 PA: L 4 5 7

Joins and shapes glass tubing according to specifications, using glass-blowing lathe:

Reads work order to determine mandrels and glass parts required to meet specifications. Selects, inserts and clamps mandrels in head and tailstock of lathe, using wrenches. Selects, inserts and clamps glass parts to be joined or shaped in chucks, using mallet and wrenches. Turns controls to start lathe and adjust rotation speed. Lights fixed jets and hand torches and turns gas valves to adjust height and colour of flames and obtain specified temperature. Turns handwheels to move head and tailstock and bring workpiece in contact with flames. Blows through hose connected to center of chuck to maintain pressure within tube or to shape workpiece. Selects and manipulates spatula, hand torches and tips, and glass rods to shape, seal, splice, imbed and weld rotating parts according to specifications. Anneals joined or shaped areas, using hand torch and fixed jets. Turns handwheels to move head and tailstock and stretch or separate heated workpiece to specifications.

May move glass tube over flame manually and blow it into specified shape.

8155-230 GLASS BLOWER(glass)

DPT:684

GED: 3 SVP: 7 EC: I 3 6 PA: L 4 7

Blows molten glass into standard shaped glassware, performing any combination of the following duties:

Dips end of blowpipe into molten glass to gather amount required for object to be made. Blows through pipe to inflate gather while rotating

pipe manually to prevent sagging and to attain desired standard free-form shape and size. Inserts gather into hinged mould before blowing when specific mould-form shape and size is required. Strikes neck of blown article with metal bar to detach from blowpipe.

May work to drawings or other specifications. May specialize in making particular objects and be designated accordingly; for example, Bottle Blower

8155-234 GLASS-NOVELTY MAKER(glass) DPT:684
glass-art maker.
 GED: 3 SVP: 7 EC: I 6 PA: L 4 7

Shapes heated glass rods or tubes into ornamental objects and novelties, such as dishes, animals and flowers, performing any combination of the following duties:

Selects solid glass rod and holds over flame, using tongs, to heat to viscous condition. Pushes ends of rod towards center to enlarge middle and form principal part of object. Melts or cuts off one end of rod, using flame or hand tools. Holds other end of rod and draws, shapes and shears principal part to sculpture objects, using hand tools and employing knowledge of glass sculpturing. Selects suitable glass tube and heats one end over flame. Blows into tube to form desired shape employing knowledge of glass blowing. Allows tube and shape to cool. Heats opposite end and blows to complete principal part to desired design, body or shape. Heats end of suitable glass rod until bubble is formed. Places bubble on principal part at appropriate location to fuse as an appendage. Sculptures appendage to desired shape, using hand tools.

May use blowing lathe to blow large objects. May sculpture custom plaques and insignia. May blow custom tubular neon signs such as animals, product, or service depictions.

8155-238 GLASS-FORMING-MACHINE OPERATOR(glass) DPT:662
glass-press-and-blow-machine operator.
 GED: 3 SVP: 6 EC: I 3 5 6 7 PA: L 3 4 7

Operates and controls automatic machines that press or blow molten glass in moulds to form or shape containers such as bottles, jars and drinking glasses, performing any combination of the following duties: Positions and bolts cast-iron moulds to machine hanger arms as directed, using wrenches. Positions and clamps machine fixtures, such as plungers, plunger pins, neck rings, and air and gas hoses, to facilitate forming function of moulds, using fixed gauges and hand tools. Bolts specified delivery chutes and transfer arms in position on machine to guide and move gobs of molten glass from forehearth through machine processes. Adjusts set screws and air valves to control opening and closing of moulds. Adjusts thermostatic control to regulate temperature of molten glass in forehearth according to specifications. Adjusts valve to regulate feed of air pressure to moulds in glass-blowing machine. Adjusts control to regulate timing of plunger in glass-pressing machine. Adjusts controls to regulate mould temperatures and turntable rate. Adjusts flow valve and shear timer to regulate delivery rate, weight and shape of gob delivered from feeder into moulds, according to specifications. Adjusts dampers to control flow of air to cool mould equipment and glassware. Presses switch to start machine. Observes operation of machine to verify co-ordination of functions. Sprays or swabs moulds, feeder chutes and baffle plates periodically with oil solution to prevent adhesion of glass. Weighs, measures and inspects production sample to assess conformity to specifications, using scales, gauges and visual verification. Adjusts valves and controls to correct deviations from specifications. Lubricates and cleans machine at specified intervals. Gives assignments and directions to helper.

May operate machine that blows, presses or produces specific product and be designated accordingly; for example, Bottle-Machine Operator
 Glass-Blowing-Machine Operator
 Glass-Pressing-Machine Operator

8155-242 NEON-SIGN BENDER-PUMPMAN(misc. prod. fab., n.e.c.) DPT:681
 GED: 3 SVP: 6 EC: I 6 PA: L 4 7

Heats and bends glass tubing to form scroll of neon signs, pumps inert gas into tubing and fits electrodes to tubes, according to specifications: Secures asbestos pattern to workbench. Selects glass tubing of specified diameter and colour and cuts tubing to required length, using ruler and file. Places glass tube on pattern and marks bend locations,

using crayon. Places cork stop into one end of tubing and rubber hose over opposite end. Lights torch, adjusts flame for optimum temperature, applies flame to tubing and rotates tube to obtain uniform heating. Blows into hose to prevent collapse of tubing and applies pressure manually, to bend tubing. Superimposes bent tubing over asbestos pattern to verify accuracy. Fuses electrodes into ends of formed tubing, using torch. Fuses glass tube to admit inert gas onto scroll and glass traps to contain mercury. Consults specification to determine gas to be used and colour of tubing. Starts roughing pump (used for preliminary low vacuum pumping) to remove air and moisture from tube and adds mercury to glass traps when specified. Connects electrical supply to electrodes, switches on supply and increases voltage gradually, using control, to remove moisture and air. Connects high vacuum pump to tube, starts pump and shuts off when required vacuum is obtained. Connects gas cylinder to glass tube to admit specified gas and disconnects when designated pressure is reached. Tips mercury trap (used with certain gas) to release mercury into tube. Seals tubing, using torch, and connects to high voltage supply to age scroll.

May specialize in a specific activity and be designated accordingly; for example, Neon-Sign Pumpman
 Neon-Tube Bender

8155-246 GLASS-FORMING-MACHINE UPKEEP MAN(glass) DPT:684
 GED: 3 SVP: 6 EC: I 5 6 PA: M 3 4

Assists set-up man to set up, adjust and repair automatic feeding, flowing and forming machines and equipment that form bottles and other glass products from molten glass:

Removes and replaces glass-forming moulds and components and adjusts shears and furnace channel openings according to instructions, using hand tools. Swabs or brushes feeder chutes and moulds with oil or lubricating compound to prevent molten glass from adhering. Lubricates machines and equipment, using oil can. Transfers moulds to and from repair shop, using a handtruck.

8155-250 GLASS-DRAWING-MACHINE OPERATOR(glass) DPT:362
drawing-kiln operator.
 GED: 3 SVP: 5 EC: I 1 PA: L 4 5 7

Operates glass-drawing machine to draw molten glass into continuous flat sheet:

Reads work order to determine requirements and specifications. Sets rheostat to control speed of kiln rolls that draw glass sheet of specified thickness. Adjusts valves to regulate gas-firing of edges of glass sheet to prevent slippage of sheet from guide wheels. Receives and records thickness-gauge readings periodically. Adjusts speed controls on panel-control-board to correct deviations from thickness specifications. Positions asbestos pads on sides of cooling jacket in kiln to correct irregular thickness in glass sheet, using iron rod. Observes glass sheet through kiln peephole to detect defects such as stones and blisters. Opens or directs opening of kiln rolls to allow passage of defective area to prevent break in glass sheet. Closes lower roll of drawing kiln to prevent broken glass sheet from collapsing into kiln. Lights auxiliary gas jets in kiln to heat glass sheet below break and stop run of break.

8155-254 YARDAGE CONTROLMAN(syn. fibres) DPT:362
 GED: 3 SVP: 5 EC: I 4 5 PA: L 4 5 6

Regulates temperature of bushings on fibreglass forming machine to maintain specified yardage-per-pound and diameter of extruded fibreglass strand:

Reads work order to determine specifications for fibreglass strand being formed. Monitors bushing control panels, temperature charts and indicators to determine if temperatures of furnace bushings, molten glass over bushings, forehearths and canals meet specifications. Obtains test skein of sliver from production run. Dries skein for specified time in electric furnace. Weighs dried test skein and converts weight to yards-per-pound to determine deviations from specifications, using yardage conversion chart. Turns digital dials on bushing control panel to regulate temperatures of bushings and consequently vary diameter of strand to meet yardage-per-pound specifications. Reads winder tachometers to ensure specified pre-set speeds are maintained. Informs electro-mechanical repairman to adjust winders if deviations from pre-set speeds are observed. Records data in

yardage control log; such as date, crew, time of temperature readings and yardage calculations, adjustments made and type of sliver formed.

8155-258 GATHERER(glass) DPT:684
GED: 2 SVP: 4 EC: 1 3 6 PA: L 4 7

Dips punty or blowpipe head into tank furnace to gather gob of molten glass for processing by other workers: Immerses head of punty (iron rod) or blowpipe into molten glass in furnace. Rotates punty or blowpipe to gather gob of molten glass on head. Removes punty or blowpipe from furnace. Twirls gob in container of alkaline solution or in cavity of wet wooden block to form thin skin on gob to prevent punctures in glassware during subsequent blowing or pressing. Twirls punty of blowpipe and blows through blowpipe to maintain gob in globular form. Hands punty or blowpipe to other worker for further processing of molten glass.

8155-262 FIBREGLASS-MACHINE TENDER(syn. fibres) DPT:685
bushing tender.
GED: 2 SVP: 3 EC: 1 4 5 6 PA: L 4 7

Tends one or more machines that form fibreglass filaments from molten glass and combine filaments into sliver strands: Pulls fibreglass filaments extruded through bushing over sleeve and through binding solution. Turns valve to regulate flow of binding solution to sleeve. Pulls filament into groove of graphite shoe that binds filament into single strand of sliver. Passes strand through opening in floor to be wound on tubes. Monitors machines to detect malfunctions or defects, such as faulty binder applicators, clogged bushings, beads and bead straps. Stops machine when defects or malfunctions occur. Removes beads or bead straps from bushing tips to unclog bushing, using a wire pick. Reports defective product or malfunction of machine. May fill furnace hopper with glass marbles and adjust feed mechanism.

8155-266 GLASS-FORMING-MACHINE-OPERATOR DPT:685
HELPER(glass)
GED: 2 SVP: 2 EC: 1 3 5 6 7 PA: L 3 4

Helps machine operator to form glass containers and load them into lehr (furnace), performing any combination of the following duties: Lift containers from glass-forming machine for inspection as directed, using tongs. Tends feed conveyor that delivers production containers from glass-forming machine to lehr automatic-loading mechanism. Turns control dial as directed to synchronize action of loading mechanism with movement of feed and lehr conveyors. Observes operation of loading mechanism to detect malfunction. Removes container causing malfunction to prevent jamming. Lubricates and cleans machines. Cleans broken glass from work area, using broom and shovel. See also definition for term title, 02-160 HELPER (any ind.). May tend glass-forming machine for short periods during absence of operator.

8155-270 HOT-GLASS WORKER(glass) DPT:687
GED: 2 SVP: 2 EC: 1 3 6 PA: L 3 4 7

Helps glass formers in the production of glassware from molten glass, performing any combination of the following duties: Balances gather (gob of molten glass) on blowpipe. Blows through and simultaneously rotates blowpipe to maintain gather in globular form for blocking, redipping or final shaping. Manipulates controls to open hinged moulds that press gather into glassware. Attaches blower head to opening of blank-filled mould and turns valve to admit compressed air that shapes blank to mould contour. Removes glassware from mould, using pincers or fork. Catches ware from glass blowers and carries it to reheating furnace or glazing machine. Reheats blown or pressed glassware in furnace to fire-polish and make malleable for further processing. Adjusts fans as directed to control ventilation that blows fire blast back into furnace and cools snap handle. Strikes glassware at specified position to crack off (break) ware from blowpipe, using a metal bar. Inspects glassware for defects, such as cracks, chips and malformations. See also definition for term title, 02-160 HELPER (any ind.). May perform specific duty and be designated accordingly; for example,

Blow-Up Boy
Carrying-In Boy
Catching-Out Boy
Glass Blower Helper
Mould Holder
Turn-Out Boy
Warm-In Boy

Stone Forming Occupations
8155-310 through 8155-422

8155-310 DIAMOND-ABRASIVE-WHEEL MAKER(non-metal. DPT:381
min. prod., n.e.c.)
diamond-wheel moulder and finisher.
GED: 4 SVP: 7 EC: 1 PA: M 4 7

Operates machines to form wheel cores and to form, cure and finish diamond abrasive wheels: Reads work order and blueprint to determine production and setup requirements. Selects wheel core moulds according to specifications. Installs wheel core mould in sintering press (for sintered metal core) or hot press (for plastic core), using hand tools. Weighs out sinter material or plastic powder, using scales. Pours sinter or plastic compound into mould cavity and levels, using a spatula. Starts hydraulic pump and adjusts valves to obtain specified press temperature and pressure. Presses buttons to mould-press sintered metal core or plastic core. Removes core from press manually and inspects for defects. Installs core on lathe, using hand tools. Sets up and operates lathe to machine outside and inside diameters, slots and recesses, and to develop arcs and bevels according to specifications. Installs machined core in drill press and manipulates controls to drill or tap core according to specifications. Verifies dimensions of core, using micrometer and calipers. Selects specified abrasive wheel mould and installs in press. Positions and centers core in mould, using a centering scale. Pours specified amount of diamond abrasive compound into mould around the core and levels, using a spatula. Starts hydraulic pump and adjusts valves to obtain specified pressure. Closes press and monitors forming operation throughout automatic cycle. Removes abrasive wheel from press and places in curing oven. Sets curing oven dials to control temperature and time according to specifications and monitors automatic curing cycle. Examines wheel for cracks at end of curing cycle. Installs wheel on lathe or lapping table, depending on shape, to finish. Sets up and operates lathe or lapping table to abrade wheel to specified final dimension. Verifies dimensions of wheel, using micrometer. Writes identifying and operating data on core body, using an engraving tool. May mix and blend ingredients to produce homogeneous diamond abrasive compound. May attach mounting pads to wheel and pack for shipment.

8155-314 ASBESTOS-CEMENT-PIPE-MACHINE SET-UP DPT:330
MAN (asbestos & min. wool; cement, stone & clay)
asbestos-cement-pipe-machine lead hand.
GED: 3 SVP: 7 EC: 1 4 5 6 PA: M 4 5 6 7

Sets up and adjusts asbestos-cement-pipe forming machine according to specifications and supervises activities of crew engaged in operating machine: Reads work order to determine product specifications and machine setup requirements. Selects mandrel according to diameter specified for inside of pipe. Supervises activities of workers positioning and securing mandrel in machine. Adjusts valves to control the supply of dry mix and water into programmed blending unit to produce slurry of specified consistency. Adjusts valves to dehydrate slurry according to specifications as it passes through vacuum box. Sets dials according to specifications to control speed of felt conveyor that bears slurry. Adjusts pressure roller controls that position slurry-bearing felt conveyor against spinning mandrel to produce pipe walls of specified thickness. Adjusts ratio of water to dry mix, speed of agitators, speed of felt conveyor, roller pressure and action of vacuum box to maintain required cohesion of slurry on spinning mandrel. Slaps production-run samples with hand and listens to ring to gauge hardness, inspects for straightness and dimensions, using a straightedge and calipers, and adjusts machine controls accordingly. Selects stencils used to code various types of finished pipe. Trains new machine-crew. Participates in and directs crew in maintenance and cleaning duties. Writes

production records to show types and amounts of material used, operating times and production realized.

May adjust oven temperature controls in accordance with specifications for size of pipe being produced to facilitate core (mandrel) pulling.

8155-318 ASBESTOSBOARD-MACHINERY SET-UP

MAN(asbestos & min. wool; cement, stone & clay)

DPT:460

GED: 3 SVP: 7 EC: I 5 6 PA: M 4 5 6 7

Sets up and adjusts machinery to fabricate asbestos-cement wallboard: Reads work order to determine product specifications and set-up requirements. Sets up blending and mixing machines to dry-blend and wet-mix ingredients according to formula, using gauges and hand tools. Sets up forming-machine conveyors, rollers and cutters to form asbestosboard of specified thickness, length and width, using rulers, gauges and hand tools. Adjusts wheels to cut boards smoothly. Sets programmed controls to regulate flow of ingredients through blending and mixing machines into asbestosboard forming machine. Measures thickness of formed board, using a micrometer. Adjusts mixing-machine water valves to vary consistency of mixture, and forming-machine roller controls to vary line-speed of forming machine until thickness measurement meets specifications. Directs activities of workers feeding, operating and off-loading series of asbestosboard forming and fabricating machines.

May set up other asbestosboard fabricating processes, such as curing, repressing, corrugating, laminating and hand moulding.

8155-322 PLASTERBOARD-MACHINE OPERATOR(cement, stone & clay)

DPT:462

GED: 2 SVP: 6 EC: I 7 PA: M 4 5 6 7

Operates machine that envelops slurry of plaster between paper to laminate continuous plasterboard sheet:

Reads work order to obtain specifications for plasterboard being produced. Adjusts edging bars, rollers, paper guides, glue feeders and chamfering wheels according to specifications, using rulers, gauges and hand tools. Adjusts stenciling machine to ensure markings on boards will be legible and evenly spaced. Starts machine and adjusts controls to regulate flow of slurry from mixing machine through rollers onto undersheet of plasterboard paper. Spreads slurry evenly on undersheet of paper, using pallet knife. Operates machine to envelop slurry between under and upper sheets of paper, and glue-seal plasterboard edges to form continuous plasterboard strip. Inspects plasterboard to ensure conformity to specifications and adjusts machine accordingly. Marks defect information on plasterboard, using chalk. Assigns tasks and gives directions to helpers.

8155-326 ASBESTOS-CEMENT-PIPE SPIN

FORMER(asbestos & min. wool; cement, stone & clay)

DPT:662

asbestos-cement-pipe valve operator.

GED: 2 SVP: 6 EC: I 4 5 6 PA: H 4 5 6 7

Operates spin-forming station on machine that forms asbestos-cement pipes from slurry:

Assists set-up man to change slurry conveyors. Assists set-up man to adjust conveyor tension and centering rolls, conveyor speed, vacuum box controls, and pressure rollers of pipe-forming machine according to specifications. Presses switch to raise and lower split bushing to position and secure mandrel. Presses button to cause pressure roller to spin mandrel. Depresses lever to lower spinning mandrel onto slurry borne on conveyor. Monitors automatic spin forming (laminating) of slurry onto spinning mandrel. Gauges pipe diameter when rotation automatically ceases, using calipers, and adjusts pressure roller movement accordingly. Cuts pipe to specified length, using hand tool. Presses switch to release mandrel and spun pipe from bushing. Inspects pipe for diameter uniformity, using calipers. Slaps pipe with hand to gauge hardness. Assigns duties and gives directions to helpers. May operate electrolytic stripper and pulling saddle to remove mandrels from pipes. May assist in oiling, cleaning and repair of machine.

8155-330 ASBESTOSBOARD-MACHINE

OPERATOR(asbestos & min. wool; cement, stone & clay)

DPT:682

GED: 2 SVP: 6 EC: I 4 5 PA: L 4 7

Operates machine that forms asbestosboards from slurry (mixture of asbestos, cement, ground marble and water):

Reads work order and sets machine dials for batch weights of slurry and number of batches. Adjusts valves to control water supply to slurry mixing unit. Sets and adjusts vacuum box controls and roller cleaning water sprays. Turns valve to fill tank with slurry and starts machine that transfers slurry onto felt conveyor from rotating tank to forming rollers of machine. Sets and adjusts cutter knives that cut wet asbestosboards formed by rollers, according to specifications. Inspects asbestosboards as they pass on conveyor to detect broken edges and other defects. Removes defective boards from conveyor. Measures thickness of board, using micrometer and corrects variations from specifications by synchronizing speeds of machine units or reports variations.

May clean forming roller by hand, using scraping blade and water.

8155-334 ASBESTOS-CEMENT-PIPE-SPIN-FORMER

HELPER (asbestos & min. wool; cement, stone & clay)

DPT:684

asbestos-cement-pipe gauger.

GED: 2 SVP: 5 EC: I 4 5 6 PA: H 4 7

Helps machine operator to spin-form asbestos-cement pipe, performing any combination of the following duties:

Slings and positions mandrels in yokes (split bushings), using hoist. Gauges end of formed pipe, when rotation automatically ceases, to verify outside diameter, using calipers. Cuts revolving pipe to specified length, using hand tool. Hoists or levers mandrel and pipe to conveyor rails. Rolls mandrel and pipe into electrolytic stripper. Presses switch to pass electric current that breaks bond between mandrel and pipe. Rolls mandrel and pipe into stripping saddle. Hooks one end of mandrel to machine and presses button to remove mandrel from pipe and place it on conveyor. Operates return conveyor to position stripped mandrels at forming station. Examines interior of pipe visually for defects and verifies that thickness of pipe wall is according to specifications, using a scale. Rolls formed pipe to curing-loading station. Lubricates and cleans machine and assists in making repairs. See also definition for term title, 02-160 HELPER (any ind.)

8155-338 PRECAST-CONCRETE MOULDER(cement, stone & clay)

DPT:684

casting man.

GED: 2 SVP: 5 EC: I 5 PA: H 2 3 4

Casts structural concrete products, such as panels, beams and stairways, by performing any combination of the following duties:

Assembles sections of mould on floor or on vibratory table and fastens sections with clamps and bolts. Sprays or brushes retarders on mould to delay setting and prevent adhesion to mould. Pushes buggy of concrete from mixer to casting area. Shovels and spreads concrete or facing aggregate into mould. Positions concrete-filled pouring bucket or delivery conveyor and spout over mould, using a hoist. Strikes trip bar of pouring bucket, or presses button to start conveyor, to discharge concrete into mould. Switches on vibrating tables to settle concrete. Tamps concrete, using electric vibrator. Positions and fastens reinforcing rods, wire mesh, and metal hanger plates and hoisting hooks in mould according to specifications, using rule, gauges, wrenches and clamps. Cuts insulation material, using knife or handsaw, and places insulation between layers of concrete when casting panels. Finishes surface of casting, using screed and trowel. Dismantles mould and removes casting, using crane. Cleans mould sections.

May tend mobile automated machine to fabricate pre-stressed concrete slabs. May assemble moulds and cast specific concrete products and be designated accordingly; for example,

Electrolytic-Cell Maker

Manhole-Casing Maker

Manhole-Cover Maker

Precast-Concrete-Slab Maker

8155-342 PULPSTONE BUILDER(non-metal. min. prod.,
n.e.c.) DPT:684
GED: 2 SVP: 5 EC: I PA: H 4

Fabricates pulpstones by performing any combination of the following duties:

Reads work order to obtain specifications of pulpstone. Selects pulpstone components, such as center sleeve, abrasive wear plates and bushings according to specifications. Cuts segment joints from rubber-based material, using templates and scissors, and assembles bushings in segment joints, using adhesive. Positions bottom mould on floor of pulpstone car and assembles center sleeve, abrasive wear plate and pulpstone metal cage on bottom mould, using hoist. Assembles segment joints and bushings to form face of pulpstone. Signals driver of concrete mixing truck to pour cement into body of pulpstone. Hoists top abrasive plate into position and shapes top end of pulpstone, using mould and trowel. Pushes pulpstone car into oven to cure segment joints.

8155-346 ABRASIVE-WHEEL MOULDER(non-metal. min.
prod., n.e.c.) DPT:464
GED: 2 SVP: 4 EC: I 7 PA: H 4 5 6 7

Operates hydraulic press that moulds abrasive products such as wheels, stones and hones:

Selects mould sections according to product specifications on drawings or work order. Assembles sections to form mould, using hand tools. Installs mould in press, using hoist and hand tools. Opens and adjusts steam valves to heat mould to specified temperature. Brushes release agent on mould cavities. Weighs out specified amount of prepared abrasive material. Pours compound into mould cavities and positions wheel-hubs manually as specified. Manipulates switches, valves and levers to close press and start pressing cycle. Pushes button to open press and collapse mould after specified period. Weighs and inspects pressed product dimensionally, using micrometer, calipers and scale, and visually for defects. Places pressed products on refractory slab for transfer to drying room, curing oven or kiln. Assigns tasks and directs helpers as required.

May mix and blend ingredients to produce abrasive compound. May cure products in oven, press or autoclave according to specifications. May mount and bond steel backing-plates onto abrasive wheels according to specifications, using adhesive, hot press and curing oven. May mix and blend fillers, abrasive grain and rubber bonder into abrasive slab, and cutout abrasive wheel to specifications, using die-cutting machine, and be designated accordingly, Abrasive-Wheel Maker, Rubber

**8155-350 INSULATION-MAT-MACHINE
OPERATOR**(asbestos and min. wool) DPT:662
GED: 2 SVP: 4 EC: I 3 5 PA: L 4 5 6 7

Operates system of machines to produce continuous mats of fibreglass or mineral wool insulation material:

Turns knob on control panel to regulate heat in curing oven according to specifications. Presses switches to start range or system of conveyors, binder and water sprayers, pressure rollers, and automatic winding and cutting machines. Guides sheet of matted fibreglass or mineral wool under pressure rollers, over inspection table and slitting knives, under cutting blade, through binder and water sprayers and curing ovens, and laps end around winding shaft. Patrols work area and monitors range units, temperature gauges, and flow of material through system to detect irregular operation or malfunction of machines and to assess product standards. Examines matted sheets for defects, such as thickness deviations, uncured area, fold and wrinkles. Pulls defective mat from production line manually and deposits in scrap box. Adjusts conveyor speed controls to restore finished product to specified thickness. Assigns duties and gives direction to helpers. May install rolls of paper in winding machine to separate and wrap matting.

**8155-354 CORRUGATED-ASBESTOSBOARD
FORMER**(asbestos & min. wool; cement, stone &
clay) DPT:664
GED: 2 SVP: 4 EC: I 4 5 PA: M 3 4

Operates machine to form flat green (uncured) asbestosboard into corrugated shape:

Installs corrugated mould in head of vacuum hoist-and-forming

machine. Positions hoist-and-forming machine manually over conveyor delivering flat green asbestosboard. Manipulates controls to operate machine that vacuum-lifts flat asbestosboard off conveyor, vacuum-forms board into corrugated shape according to specifications and stacks corrugated board between spacers on pallet preparatory to curing. Inspects asbestosboard to verify that it has been corrugated according to specifications. Turns air pump control dials to adjust vacuum as required. Directs activities of helpers engaged in placing spacers between green corrugated asbestosboards being stacked for curing.

8155-358 CONCRETE, SPIN-CAST MAN(cement, stone &
clay) DPT:664
concrete-spinning-machine operator.
GED: 2 SVP: 4 EC: B 5 6 PA: M 3 4

Spin-casts concrete into precast products, such as pipes and posts, performing any combination of the following duties:

Positions reinforcement rods or wire cage in mould. Secures reinforcement in mould with wire, using hand tools. Places cotton gasket between flanges along length of split mould. Bolts or clamps mould halves together, using hand tools. Positions or signals other worker to position mould on spin-machine, using fork lift or hoist. Adjusts filling-machine controls to regulate feed of wet concrete into mould. Starts spin-machine. Adjusts controls to increase speed of rotation for specified time to compact and smooth concrete. Monitors rollerhead (inner mould cylinder) as it revolves at constant speed for specified time to compact and smooth concrete. Signals worker to move mould to curing area. Covers mould with curing hood and turns on steam, or attaches steam hose to mould and turns on steam, for specified time to cure concrete. Collapses mould when curing is completed, using hand tools. Cleans and oils moulds, using hand tools and brushes.

8155-362 CONCRETE-FITTINGS MAKER(cement, stone &
clay) DPT:684
GED: 2 SVP: 4 EC: I 5 PA: H 3 4

Cuts and cements together cured concrete pipe sections to form odd-shaped fittings:

Positions template on section of pipe to determine cutting line according to specifications. Cuts pipe section along template or cutting line to form Y, T, and elbow fittings, traps and lids, using power saw or chisel. Applies adhesive to sections being fitted together. Positions sections together manually or uses hoist. Seals inside and outside of pipe joints with grout (fluid cement) or mortar, using a hand trowel and brush. Places fitting on pallet or shelf to fix and harden joint. Applies epoxy resin to fitting, using brush.

May mix grout or mortar. May keep records of type, size and quantity of fittings produced.

8155-366 CONCRETE-VAULT MAKER(cement, stone & clay)
DPT:684
GED: 2 SVP: 4 EC: I 5 PA: H 3 4

Casts concrete in moulds to form burial vaults:

Positions box, lid and core moulds on pallet, using forklift or hoist. Brushes or sprays moulds with oil to prevent adhesion of concrete. Positions, or fabricates and positions, reinforcing cage in mould, using hand tools. Inserts core into mould, using hoist. Positions concrete-filled pouring bucket or delivery conveyor over mould, using hoist, or moves mould under concrete-mixer spout, using forklift. Strikes trip bar of pouring bucket or spout, or presses button to start conveyor and release and direct flow of concrete into mould. Starts electric or pneumatic vibrator and slides it into mould sockets to settle concrete. Smooths top of concrete, using trowel. Transports concrete-filled mould to curing room, using forklift or hoist. Removes core, using forklift or hoist. Operates hoist or activates pneumatic ejector to separate vault from mould. Transfers vault to spraying area, using forklift or hoist. Stipples outside of vault with wet concrete mixture, using trowel. Forces sealing compound into grooves of vault and lid, using caulking gun. Sprays exterior of vault with specified paint, using spray gun.

May set up mould and melt and pour special asphalt over core to form waterproof liner before casting concrete. May mix concrete to specified consistency.

- 8155-370 CYLINDER COATER**(cement, stone & clay) DPT:664
brush-coater operator.
GED: 2 SVP: 3 EC: B 5 PA: L 4

Operates machine that coats external surface of steel cylinder (pipe) with concrete in the fabrication of pressure pipe:
Presses button to open machine chucks. Signals worker to hoist cylinder (previously inner-lined with concrete) in position between chucks. Contracts chucks to secure cylinder in machine. Starts machine to spin cylinder and to move brush coater on track along spinning cylinder. Adjusts brush coater control knob to regulate flow of wet concrete between revolving brushes that impact (spray or throw) coating of concrete onto exterior of rotating cylinder. Stops machine and releases chucks when exterior surface is coated with concrete according to specifications.

- 8155-374 ASBESTOS-CEMENT-INSULATION MOULDER**(asbestos & min. wool; cement, stone & clay) DPT:682
GED: 2 SVP: 3 EC: I 3 4 5 6 PA: M 4

Operates machine to mould insulations from hot asbestos-cement slurry for objects such as pipes and boilers:
Installs specified moulds in machine press, using electric hoist and hand tools. Adjusts valves and pumps to control the feed of slurry to mould. Adjusts vacuum hoist, vacuum box, slurry metering controls, mould box and transfer table movement according to specifications for size and shape of insulation being formed. Presses buttons to start and operate automatic machine and monitors forming of insulations. Inspects each insulation to verify that it has been formed according to specifications. Operates vacuum hoist to lift formed insulation to racks on curing cart. Flushes and washes slurry tank, lines, filter cloths and equipment, using hose and hand tools.

- 8155-378 CONCRETE-HYDRAULIC-PRESS OPERATOR**(cement, stone & clay) DPT:682
GED: 2 SVP: 3 EC: I PA: L 4

Operates hydraulic-press-moulding machine to form concrete products such as patio slabs, curbs and silo stays:
Reads work order to determine product specifications and production requirements. Selects moulds and ram-press dies according to specifications. Positions and bolts moulds and dies into machine, using hoist and wrenches. Places paper lining in bottom of mould to facilitate removal of product. Aligns mould sections to match downward stroke of ram and die, using hand tools. Turns crank to adjust automatic concrete feeder that pours specified amount of concrete into mould. Reads pressure gauge and adjusts valve to ensure hydraulic ram exerts specified pressure. Monitors automatic feed of concrete into mould. Spreads concrete evenly in mould, using a wooden spatula. Monitors automatic cycling of ram press that squeezes out superfluous water to form product. Monitors automatic cycling of vacuum hoist that lifts product from mould. Measures thickness of product, using gauge and adjusts concrete feed accordingly.
May insert reinforcing cage in mould. May clean machine and moulds at end of shift, using hose and brush.

- 8155-382 ASBESTOS-CEMENT-PIPE BENDER**(asbestos & min. wool; cement, stone & clay) DPT:684
bend moulder.
GED: 2 SVP: 3 EC: I PA: M 4

Bends and cuts green asbestos-cement pipe to form elbows of specified radii and lengths:
Draws outline of specified radius on wooden block, using template. Cuts along outline to form bending block, using bandsaw. Positions block on bench. Bends pliable green asbestos-cement pipe manually around block to form elbow. Selects ball of specified diameter and manipulates it through bend while manually compressing exterior surface of pipe to restore diameter of pipe. Dampens piping when necessary to facilitate forming, using wet sponge. Cuts bent pipe at lay-out markings to produce elbow of specified length, using power saw. Inserts wooden discs in ends of elbow to protect pipe during curing. Lifts formed elbow onto curing tray. Marks identifying code on elbow, using stencil and brush.
May bend and cut clay pipe and be designated accordingly.
Clay-Pipe Bender (cement, stone & clay)

- 8155-386 ASBESTOS-CEMENT-PIPE-CORE PULLER**(asbestos & min. wool; cement, stone & clay) DPT:684
GED: 2 SVP: 3 EC: I 4 5 6 PA: H 4

Operates machine to remove cores (forming mandrels) from green asbestos-cement pipes:

Installs machine parts to suit specified mandrels during size changeover, using hand tools. Rolls pipe formed on mandrel into core-pulling machine. Hooks machine to mandrel end. Opens air valve gradually to withdraw mandrel without distorting pipe end. Notifies pipe-machine operator when distortion occurs. Rolls pulled mandrel from machine to table. Rolls green pipe to inspection table. Slings pulled mandrels and operates monorail crane to return mandrels to pipe-machine forming station.

May operate continuous conveyor oven to break the bond and facilitate pulling small-size mandrels from pipes.

- 8155-390 LAUNDRY-TUB MAKER**(cement, stone & clay) DPT:684
GED: 2 SVP: 3 EC: I 5 PA: H 3 4

Casts concrete into moulds to form laundry tubs:

Cleans and oils mould sections to prevent adhesion of concrete, using hand tools and oily rag. Places bottom section of mould, with core(s) attached, on raised assembly-line track, manually. Places prefabricated metal rim around base of core. Fastens outer sections of mould to bottom section of mould, using nuts, bolts and pneumatic wrench. Lowers vibrator over mould manually in co-operation with other worker. Delivers wet concrete to prepared mould, using wheelbarrow or overhead bucket. Shovels or pours concrete into mould. Tamps or vibrates concrete to spread and settle it evenly, using hand tamper or vibrator. Installs metal drain fitting by pushing through concrete against core at specified position, or by placing it in core at specified position before shovelling or pouring concrete into mould. Smooths surface of concrete, using trowel. Collapses mould from around partially cured tub, using pneumatic wrench. Wipes tub with thin slurry cement, sand and water to provide a smooth surface to finished tub.

May tend machine to mix concrete according to formula.

- 8155-394 PRECAST-TERRAZZO MAKER**(cement, stone & clay) DPT:684
GED: 2 SVP: 3 EC: I 5 PA: H 4 7

Casts terrazzo mixture in specified pattern to form precast objects, such as tiles, panels, counter tops and stair sections:

Mixes coloured marble chips, pigment, cement, sand and water according to specifications. Coats surface of mould with oil to prevent adherence of set terrazzo. Clamps mould to vibrating table. Inserts specified pattern template in mould. Pours layer of terrazzo mixture into pattern to form face of object. Removes pattern. Sprinkles dry cement and sand on top of mixture to absorb moisture. Fills remainder of mould with wet cement and sand to form backing for object. Draws straight edge across top of mould to remove excess cement. Turns on electric vibrator to compress casting, remove air bubbles and smooth terrazzo face. Removes mould from vibrating table. Separates set object from mould by collapsing mould.

- 8155-398 SCAGLIOLA CASTER**(cement, stone & clay) DPT:684
GED: 2 SVP: 3 EC: I PA: M 4 7

Casts and finishes scagliola (imitation marble) into objects such as desk sets, penholders and decorative slabs:

Combines material such as marble chips, finely ground gypsum, colouring matter, water and a hard cement powder in a vat according to specifications. Coats mould with oil to prevent casting from adhering to surface. Pours mixture manually into prepared mould and allows to set. Removes object from mould and places on work table. Rubs object manually to smooth surface, using abrasives. Polishes object manually, using felt-covered brick and acetic acid solution.

8155-402 BLOCK-MAKING-MACHINE TENDER(cement, stone & clay) DPT:685
GED: 2 SVP: 3 EC: 1 5 PA: M 4 7

Tends automatic machine that casts concrete blocks:

Reads production orders to determine size, aggregate composition and quantity of blocks required. Changes moulds in block-making-machine according to production orders, using hand tools. Manipulates controls to start and stop machine that automatically fills moulds, vibrates them to settle and compact wet concrete, scrapes off excess concrete and strips finished blocks from moulds. Examines concrete blocks emerging from machine for defects, and makes minor adjustments to equipment, using hand tools, or advises concrete mixer of changes required in aggregate composition.

May assist in setting up machine. May tend machine equipped with automatic offbearing mechanism. May verify dimensions of formed concrete blocks, using measuring device.

8155-406 CONCRETE-PIPE-MACHINE TENDER(cement, stone & clay) DPT:685
GED: 2 SVP: 3 EC: 1 4 5 PA: M 4

Tends machine that casts and tamps concrete in moulds to form precast products such as drain tile and pipe by one of the following methods:

1. Positions metal mould specified for small pipe sizes on machine platform beneath core and spout, manually. Manipulates lever to lower and position core in mould. Pulls overhead tamping bar into position in mould. Starts machine to rotate mould and activate tamping bar. Turns feed control to release supply concrete from hopper into mould for automatic tamping and casting. Trowels concrete at top of filled mould to level off end of pipe casting. Stops machine for removal of mould to curing area. 2. Secures palletized and prepared (reinforcement in place) large moulds to machine turntable, using pallet rings, bolts and hand tools. Positions and secures packer head on drive shaft, using hand tools. Sets trip lever to adjust feed table height according to height of mould. Starts machine that lowers packer head into mould and conveys concrete to feed table. Rakes concrete from feed table into mould, or observes automatic operation being performed. Monitors operation of machine as packer head ascends and descends automatically while rotating rapidly to tamp and trowel concrete in mould to form pipe. Presses pedal to rotate turntable for automatic removal of filled mould and positioning of empty mould under packer head and feed spout.

8155-410 ASBESTOS-CEMENT-TILE MAKER(asbestos & min. wool; cement, stone & clay) DPT:684
GED: 2 SVP: 2 EC: 1 5 PA: L 4

Operates hydraulic press to cut and press asbestosboard to specified size to form asbestos-cement tiles:

Places die cutting tool of specified size on wet asbestosboard sheet and feeds sheet and cutting tool onto bed of press. Starts press to cut sheet into sections. Stops press and removes sections. Selects template of specified size and brushes template with oil to prevent adhesion of asbestosboard. Places wet asbestosboard sections in template and feeds template onto bed of press. Starts press to squeeze superfluous water from sections and form hardened tiles. Stops press and removes template manually. Removes tiles from template and stacks tiles in storage area manually. Cleans template, using scraper and brush.

8155-414 CHALK-EXTRUDING-MACHINE TENDER(misc. prod. fab., n.e.c.) DPT:685
GED: 2 SVP: 2 EC: 1 PA: L 4

Tends automatic extruding machine and cutter that forms billets from clay, chalk and graphite mixtures:

Loads mixture into extrusion chamber and closes chamber door. Presses safety switches, using both hands, to start machine that automatically forces mixture through die onto machine table. Picks off lengths of extruded mixture and places on tray by hand. Places trays under cutter blades and depresses pedal to cut mixture to specified length to form billets for further processing into artist or office supplies. Lifts trays onto storage truck.

May adjust valves and observe gauges to set specified pressure on extrusion ram. May change extrusion dies using hand tools.

8155-418 CHALK MOULDER(misc. prod. fab., n.e.c.) DPT:685
crayon moulder.
GED: 2 SVP: 2 EC: 1 PA: M 4

Mixes ingredients and tends moulding machine to make crayons or coloured chalk:

Weighs chalk, clay, dyes and other materials, according to formula, using scale. Dumps materials into container and mixes ingredients, using portable electric mixer. Pours mixture onto moulding table and smooths it into holes in table top, using hand paddle. Turns wheel to invert moulding table, after mixture has hardened, and starts vibrator to shake chalk or crayon sticks from holes in moulding table onto drying tray.

8155-422 CYLINDER LINER(cement, stone & clay) DPT:685
spin-liner tender.
GED: 2 SVP: 2 EC: B 5 PA: M 4

Tends machine that lines inner surface of steel pipe with concrete in the fabrication of pressure pipe:

Presses button to convey specified amount of wet concrete from hopper or bucket into spoon (trough). Removes excess concrete from spoon, using trowel. Aligns hot air blower with opening of steel cylinder cradled in machine. Starts machine to spin cylinder. Presses button to position spoon inside spinning cylinder. Turns handwheel to tip spoon and spread concrete on inner surface of spinning cylinder. Starts hot air blower to remove moisture from concrete. Adjusts controls to spin cylinder at high speed to compact concrete and squeeze out excess water. Stops machine when inner surface of cylinder is lined with concrete according to specifications.

8156-INSPECTING, TESTING AND GRADING OCCUPATIONS: CLAY, GLASS AND STONE PROCESSING AND FORMING

This unit group includes occupations in inspecting, testing and sampling work, as described under the term titles, 02-170 INSPECTOR (any ind.), 02-430 TESTER (any ind.) and 02-150 GRADER (any ind.), concerned with quality control activities in the processing and forming of clay, glass, stone, abrasives, asbestos and related non-metallic minerals.

8156-110 ABRASIVE-WHEEL TESTER(non-metal. min. prod., n.e.c.) DPT:382
GED: 3 SVP: 6 EC: 1 PA: M 4 6 7

Inspects and tests abrasive wheels for adherence to specifications, and to determine defects, using any of the following methods:

1. Verifies weight and dimensions of wheels, using instruments such as scales, micrometers and calipers. Compares results with specified tolerances and rejects wheels not conforming to specifications. 2. Tests wheels for density and internal cracking, using sonic tester. Observes gauges to determine density. Compares readings with specified range and rejects wheels falling outside of range. Interprets oscilloscope wave for evidence of internal cracking and rejects cracked wheels. 3. Tests wheels for density, using impact-grading machine. Adjusts machine to thickness of wheel, using hand tools. Starts machine and observes dial to obtain readings of depth of indentations. Compares readings to specified density ratings and rejects wheels falling outside of tolerances. 4. Tests wheels for cracks and soft spots, using machine that spins wheels on enclosed spindle. Regulates number of revolutions per minute, using rheostat. Observes tachometer to ensure wheel meets specified speed requirement and discards wheels that disintegrate. 5. Tests shellac based or resinoid wheels, using hammer. Taps wheel and interprets sound produced to detect internal cracking. Rejects defective wheels. Records number of wheels accepted and rejected.

May perform quality control function on abrasive materials prior to fabrication into abrasive products. May operate hoist or push hand truck to move heavy abrasive wheels to and from test area.

8156-114 PIPE TESTER(asbestos & min. wool; cement, stone & clay) DPT:382
GED: 3 SVP: 5 EC: 1 7 PA: M 4 7

Tests and inspects asbestos-cement or concrete pipes for conformance to specifications, using any of the following methods:

1. Examines pipe visually to detect defects such as blisters and indentations. 2. Weighs and measures pipe to determine weight, length, thickness, diameter, circumference, and roundness, using scales, tape, gauges, micrometer and calipers. 3. Operates hydrostatic testing machine to test pipe under pressure. Measures thickness of walls of burst or broken pipe to determine cause of failure, using calipers. 4. Operates flex-testing machines to test strength and hardness of pipe. Stamps approved pipe using stamp and identifies rejected pipe for reworking. Records results of inspections on statistical control charts.

May be designated according to type of material used in pipe production; for example,

Asbestos-Cement-Pipe Tester(asbestos & min. wool)

Concrete-Pipe Tester(cement, stone & clay)

8156-118 BRICK-AND-TILE TESTER(cement, stone & clay) DPT:384
GED: 3 SVP: 5 EC: 1 7 PA: M 4 7

Makes brick and tile samples, obtains production samples and tests for conformance to strength specifications:

Tests composition of raw materials such as clay and shale, using laboratory test equipment. Starts machines that grind, sift and mix clay to prescribed consistency. Makes brick and tile samples, using clay mixture, mould, hand rammer and trowel. Places samples in kiln to cure and turns switches and valves to heat kiln to specified temperature. Removes samples from test or production kiln and carries them to test area. Places sample on testing machine supports and turns hand wheel to force bearing plate against samples. Reads gauge to obtain transverse breaking load in pounds per square inch and records readings. Inspects production samples for size, cracks and other imperfections visually and using hammer and notched rule.

8156-120 CONCRETE-PRODUCTS TESTER(cement, stone & clay) DPT:384
GED: 3 SVP: 5 EC: 1 5 PA: M 3 4 7

Tests concrete products, using laboratory equipment, for conformance to engineering and municipal standards:

Places concrete pipe in three-edge bearing device or sample cylinder of concrete in hydraulic press to test pressure necessary to fracture pipe or crush cylinder. Plugs pipe ends, using special end covers, gaskets and clamps, and attaches water hose to fill pipe and bring internal pressure to specified level. Measures and records leakage of pipe indicated by loss of pressure on gauge, after specified interval. Weighs pipe or sample cylinder, before and after being filled with or immersed in water for specified time, to determine amount of water absorption. Measures dimensions and angles of products, using gauges and verniers, for conformance to specifications. Filters sample of aggregate through series of screens, at specified intervals, to separate materials. Weighs materials on scale to determine specific gravity of concrete. Records test results.

May measure metal pallets used to form mouth of pipe, using verniers. May measure amount of slump of wet concrete during specified period. May be designated according to type of product tested; for example,

Concrete-Pipe Tester

8156-122 ASBESTOS-FIBRES TESTER(asbestos & min. wool) DPT:384
GED: 3 SVP: 5 EC: 1 5 7 PA: L 4 7

Tests samples of asbestos fibre to determine quality and grade by performing any combination of the following duties:

Collects and weighs samples of asbestos fibre, using scale. Dumps weighed samples on vibrating screens to grade fibres by length. Manipulates valves to control compressed air and force asbestos fibre through vibrating screen to separate fibre from dust and other granulated material. Weighs graded fibres and records proportions obtained of each grade. Tends fluffer, fiberizer, willow or other machine to process and identify fibres. Weighs fibre and calculates proportions of fibre, dust and other impurities. Measures samples of

asbestos fibre, using micrometer, to determine average length distribution. Examines fibres for cleanliness. Records test results and compiles reports.

May test raw asbestos fibre to determine moisture content.

8156-126 FIBREGLASS TESTER(syn. fibres) DPT:384
GED: 3 SVP: 5 EC: 1 PA: M 4 7

Tests fibreglass yarn and products to ensure conformance to specifications by performing any combination of the following duties:

Weighs samples of fibreglass before and after drying, using scale to determine quantities of moisture, solids and binder in sample. Operates tensile testing machine to determine breaking strength of fibreglass yarn. Operates twist counter to determine number of twists per unit length of decorative yarn. Measures length and diameter of fibreglass sample to verify conformance to specifications, using rule and micrometer. Inspects fibreglass yarn for defects, such as dirt and grease spots and frayed ends. Examines fibreglass products for defects in manufacture. Compares test results with specifications and rejects samples that fail to conform to standards. Records test results on quality control charts and compiles reports.

May examine test samples after customer trials and provide required technical assistance.

8156-130 CONCRETE-PRODUCTS INSPECTOR(cement, stone & clay) DPT:387
GED: 3 SVP: 5 EC: 1 PA: L 4 7

Inspects finished concrete products or parts for conformance to specifications:

Measures concrete products such as prestressed concrete building panels, conduit and beams, using micrometer, calipers, fixed gauges and rule. Examines products for defects such as cracks, warped sections, bent reinforcing rods and surface or colour variations. Rejects or re-grades products not meeting specifications and notifies supervisor of defects, for repairs or corrective action in future production. Records quantity and quality of products produced and stamps products with inspection date and grade, using rubber stamp. Ensures that samples of conduit from each batch are forwarded for water-pressure and compression tests by other workers.

May make minor repairs to conduit, using brush and cement.

8156-134 POTTERY-AND-PORCELAIN-WARE INSPECTOR(cement, stone & clay) DPT:387
GED: 3 SVP: 5 EC: 1 PA: M 4 7

Inspects pottery or porcelain ware at various stages of production for conformance to manufacturer's standards of size, finish and appearance:

Reads work order to determine product specifications. Examines completely formed, dried, fired, glazed and decorated ware for defective materials, workmanship and appearance. Measures dimensions of product, using templates, calipers, scale and steel tape. Examines glaze for uniformity of surface and compares colour with specified colour chips. Evaluates condition of ware and orders reworking or rejects pieces not conforming to specifications. Compiles data and prepares reports on type and frequency of defects found for quality control and production engineering purposes.

8156-138 LAMINATED-ASBESTOS-PRODUCTS INSPECTOR(asbestos & min. wool) DPT:584
GED: 3 SVP: 5 EC: 1 7 PA: M 4 7

Inspects asbestos insulation board and acoustic tile after each stage of processing:

Selects and identifies samples of insulation board and acoustic tile from each processing unit. Weighs samples of wet and dry boards to calculate moisture content. Tests shear and compression strength and strength of adhesive of boards and tiles, using tensile tester. Examines boards and tiles for defects, such as dirt spots, scratches, broken or chamfered edges, cracks, and cleanness of cut. Verifies size of boards and tiles, according to specifications, using tape and micrometer. Identifies and records type and number of defects of rejected products. Selects and marks samples of boards and tiles for laboratory testing.

8156-142 GLASS-CONTAINERS TESTER(glass) DPT:384
GED: 3 SVP: 4 EC: I PA: L 4 7

Tests glass containers for conformance to specifications:
Fills container with measured amount of water to determine fluid capacity. Verifies size and thickness of container, using instruments such as calipers, micrometers and gauges. Operates polariscope to ensure container meets annealing standards. Immerses container alternately in baths of hot and cold water to determine thermal shock resistance. Fills container with water and inserts electrically controlled plunger to determine bursting strength of container. Cuts cross section from container, using abrasive wheel. Examines cross section under microscope for defects such as cracks, bubbles and thinness of walls. Records and compares test data with specifications. Notifies foreman of variations from standards.
May be designated according to type of container tested; for example, Beaker Tester
Bottle Tester

8156-146 QUALITY-CONTROL INSPECTOR, GLASS(glass) DPT:384
GED: 3 SVP: 4 EC: I PA: M 4 7

Inspects glass products for conformance to specifications, performing any combination of the following duties:
Selects samples of glass products, such as automobile windshields, flat glass, glassware and other glass items from production line or shipping case. Examines product for defects, such as cracks, scratches, chips, reams (wavy distortions) and blemishes. Measures dimensions of product, using micrometer, calipers, gauges, rule and templates. Operates distortion-analyzing machine and interprets gauge and graphic readings to determine degree of ream in flat glass. Operates gauge to determine eccentricity of glass containers. Examines glass for annealing defects, using polariscope. Records and identifies rejected products for repair or scrap.
May inspect shipping cases for defective packaging.

8156-150 ABRASIVE-SHEETS INSPECTOR(non-metal. min. prod., n.e.c.) DPT:484
GED: 2 SVP: 3 EC: I 7 PA: L 4 7

Inspects samples of abrasive sheets to ensure amounts of adhesive, abrasive and sizing conform to specifications:
Passes sample of base material through glue-applying unit of machine. Weighs sample, using scale, and calculates proportion of glue being applied. Passes sample of glue-coated material through abrasive-applying unit of machine. Weighs sample and calculates proportion of abrasive being applied. Passes sample through sizing-applying unit of machine. Weighs sample and calculates proportion of sizing being applied. Stops and adjusts machine if proportions of additives vary from specifications.
May operate sanding machine to verify cutting ability of abrasive sheets. May be designated according to type of abrasive sheet inspected; for example, Emery-Cloth Inspector
Sandpaper Inspector

8156-154 ASBESTOS-SHINGLE INSPECTOR(asbestos & min. wool) DPT:584
GED: 2 SVP: 3 EC: I 5 7 PA: L 4 7

Inspects asbestos shingles for defects and adherence to specifications:
Observes shingles moving on conveyor to detect defects, such as cracks, broken edges and irregularly punched holes. Rejects shingles that fail to meet specifications. Removes sample shingles from conveyor and verifies size, using templates. Measures and weighs sample shingles, using gauges, calipers, micrometer and scales to determine grade. Sorts and marks sample shingles according to grade and sends to laboratory for testing. Records number of defective shingles and type of defect.

8156-158 PLASTERBOARD INSPECTOR(cement, stone & clay) DPT:664
GED: 2 SVP: 3 EC: I 5 7 PA: L 4 7

Inspects plasterboard for defects and conformance to specifications:
Examines sides and edges of plasterboard to detect defects, such as scratches, dents and defective materials. Verifies length, width and thickness, using rule and micrometer. Selects and weighs sample of

plasterboard, using scale. Verifies hardness of sample, using knife or probe. Measures unabsorbed moisture in sample, using moisture-sensitive meter. Records quantity of plasterboard produced, and notifies foreman of type of defects.

8156-162 INSULATOR TESTER(electric. equip.) DPT:684
GED: 2 SVP: 2 EC: I 6 PA: M 4 7

Conducts tensile or dielectric tests on porcelain insulators by either of the following methods:
1. Places insulator in tensile tester. Starts machine that clamps bottom of insulator and exerts force at each end to test tensile strength. Observes insulator to detect cracks and reads dial to record force at time of cracking. Removes insulator from testing machine and places insulator on conveyor for further testing. 2. Connects ends of insulator to testing set. Turns dial on set to specified voltage and current. Presses button to release current and create arc. Observes meters on test set to verify dielectric strength of insulator. Inspects insulator for evidence of burning in glaze or porcelain. Rejects defective insulators.
May regulate air gap and evaluate condition of insulators on conveyor-type testing equipment. May be designated according to type of test performed; for example, Insulator Tester, Electrical
Insulator Tester, Mechanical

8156-166 FIBREGLASS INSPECTOR(syn. fibres) DPT:685
GED: 2 SVP: 2 EC: I 5 7 PA: M 4 7

Inspects fibreglass products for defects such as grease and dirt spots, by performing any of the following duties:
Examines fibreglass mat for defects, and cuts out defective sections, using knife or automatic cutting machine. Removes tubes of fibreglass sliver from overhead conveyor. Examines tubes and unravels defective portions onto waste tube, using air-suction device. Breaks or cuts excess sliver from tube. Weighs tubes of sliver to ensure specified weight attained and stacks tubes on truck. Replaces underweight tubes on overhead conveyor.
May resplice cut mats, using pressure roller.

8156-170 ABRASIVE-AND-CLAY-PRODUCTS GRADER(cement, stone & clay) DPT:687
GED: 2 SVP: 2 EC: I PA: M 4 7

Grades abrasive and clay products according to size, shape, colour and quality by performing any combination of the following duties:
Examines products such as abrasive wheels, bricks, tiles and sewer pipes for cracks, chipped edges, warping or other defects. Sorts products according to quality and rejects products not conforming to specifications. Reads specifications of abrasive products and grades products according to size and shape. Compares tiles against colour shades on sample board and grades tile according to colour. Records quantities of products passed or rejected.
May stack bricks in specified pattern for banding. May pack products for shipping. May be designated according to product graded; for example, Brick Grader
Pipe Grader
Tile Grader

8156-199 OTHER INSPECTING, TESTING AND GRADING OCCUPATIONS, CLAY, GLASS AND STONE PROCESSING AND FORMING

This group includes clay, glass and stone processing and forming inspectors, testers and graders, not elsewhere classified; for example, those who test effectiveness of vacuum bottles. A typical example of an occupational title covered by this residual group definition is:
Vacuum-Bottle Tester(glass)

8158-OCCUPATIONS IN LABOURING AND OTHER ELEMENTAL WORK: CLAY, GLASS AND STONE PROCESSING AND FORMING

This unit group includes occupations in labouring or

other elemental work, as described under the term title, 02-190 LABOURER/ELEMENTAL WORKER (any ind.), which are concerned with preparing clay, glass, stone, abrasives, asbestos and related non-metallic minerals for use in semi-finished or finished state.

8158-110 ASBESTOSBOARD SHEARER(asbestos & min. wool) DPT:686
GED: 1 SVP: 2 EC: I 5 7 PA: H 4

Feeds asbestosboard into shearing machine to cut board into articles, such as shingles and acoustic tile:

Adjusts guides of power-shearing machine according to specifications, using hand tools. Feeds asbestosboards against guides into shearing machine to cut boards to specified size.

May verify dimensions of cut-product samples, using rule.

8158-114 CLAY PRESSMAN(cement, stone & clay) DPT:686
GED: 1 SVP: 2 EC: I 4 PA: VH 4

Feeds clay slip into vacuum press and removes clay cakes from press, in conjunction with co-worker:

Positions frames and filters in press, using clamps, and locks front-end frame, using wrench. Starts slip pump to charge press with clay slip. Starts vacuum pump to remove air from clay. Stops slip pump and vacuum pump and unlocks front-end frame. Unclamps each frame and manually removes clay cakes from frames. Delivers clay cakes to departments for further processing, using hand cart.

8158-118 GLASSWARE FINISHER(glass) DPT:686
GED: 1 SVP: 2 EC: I 5 7 PA: L 4

Heats glassware to remove defects, such as air bubbles, chips and rough surfaces:

Places glassware on rotating disk to bring glassware in contact with gas flame that melts or fuses glass to remove defects. Turns valve to regulate intensity and colour of flame and maintain specified temperature. Removes glassware from disk, using tongs.

8158-122 MIXER HELPER(cement, stone & clay) DPT:686
GED: 1 SVP: 2 EC: I 5 PA: H 4

Loads and unloads mixing machines used in the processing of materials, such as clay, slate and silica by performing any combination of the following duties:

Obtains materials from storage area, using hand truck. Receives instructions or signals from mixing-machine tender and dumps materials onto conveyor or into mixing-machine hopper. Unloads mixture from machine into storage bins, using shovel, or pulls levers to regulate flow of mixture onto conveyor. Cleans machine and work area.

May transport mixed materials to machines for further processing, using hand truck.

8158-126 ASBESTOS MOULDER(asbestos & min. wool) DPT:687
GED: 1 SVP: 2 EC: I PA: M 4

Moulds asbestos into insulation sleeves:

Covers base section of wooden form with wet asbestos sheets or fibres. Smooths asbestos by hand and clamps top section of form over asbestos. Places forms on rack for drying.

8158-130 BALCONY MAN(glass) DPT:687
GED: 1 SVP: 2 EC: I 3 PA: L 4 7

Performs any combination of the following duties in the manufacture of continuous sheets of glass:

Inspects sheet of glass visually for scratches and breaks. Wipes foreign material from rolls of drawing kiln. Adjusts roll weights and opens rolls, following directions of kiln operator. Adjusts air ducts as directed to cool glass, minimize warpage and stop breaks from running. Dumps broken glass into waste bin.

8158-134 BISQUE CLEANER(cement, stone & clay) DPT:687
GED: 1 SVP: 2 EC: I PA: L 4

Cleans and finishes bisque ware (unglazed pottery or porcelain) by hand:

Examines ware for defects. Grinds and smooths rough surfaces, using abrasive stones and sandpaper. Cleans ware, using brush and airhose.

8158-138 CONCRETE-BLOCK MAKER(cement, stone & clay) DPT:687
GED: 1 SVP: 2 EC: O 5 PA: H 4

Performs any combination of the following duties in the manufacture of prestressed concrete blocks:

Cleans forms, using hammer, scraper and wire brush. Brushes oil or wax on forms to prevent adhesion of concrete. Assembles forms to specified dimensions, using spacer bars and hand tools. Places reinforcing steel cage in form by hand or using winch. Installs stressing cables in form, using clamps. Clamps vibrators to sides of form, using hand tools, and starts vibrators as concrete is poured into forms. Levels concrete at top of form, using hand vibrator, and fills low spots with concrete, using shovel. Removes forms from concrete blocks after drying, using hand tools. Cuts protruding end of stressing cable, using saw.

8158-142 CYLINDER-FORM ASSEMBLER(cement, stone & clay) DPT:687
can assembler.
GED: 1 SVP: 2 EC: B 5 PA: VH 3 4

Bolts round-up ring sections around steel can (cylinder) to retain circular shape of cylinder during casting of reinforced concrete pressure pipe:

Rolls can on raised track into assembly-line position, assisted by other workers. Measures and marks length of can to position rings, using gauge and chalk. Positions and tightens seam bolts, mould-ring flange over can end, or ring halves against can, using sledge hammer and pneumatic or manual wrench. Rolls completed can on track to concrete lining area.

May take cans apart after casting, using crowbar, hammer and wrench and be designated accordingly, Mould Stripper

8158-146 GLASS-CUT-OFF MAN(glass) DPT:687
GED: 1 SVP: 2 EC: I PA: H 4

Cuts sheets of glass to specified length and trims sharp edges:

Moves cutter manually across sheet of glass to score line at specified length. Breaks glass along line and throws waste glass into bin. Trims sharp edges, using glass cutter. Stacks sheets of glass on rack.

May round corners of window panes, using carborundum wheel, to facilitate sliding of pane into frame.

8158-150 KILN-DOOR BUILDER(cement, stone & clay) DPT:687
kiln-wicket builder.
GED: 1 SVP: 2 EC: O 3 6 7 PA: M 2 3 4

Builds and pulls down wickets (kiln doors) and seals crown openings in kilns, using hand tools.

Stacks brick in doorway of kiln. Mixes clay dust and water to form plaster and spreads plaster over bricks to seal opening, using trowel. Climbs on top of kiln and places covers on crown openings over kiln and seals them with plaster. Pulls down wickets or doors with hook after firing of kiln and removes crown covers to control cooling of product.

May assist in placing fans and draught boxes for cooling kilns after firing.

8158-154 KILN LABOURER(cement, stone & clay) DPT:687
kiln drawer.
GED: 1 SVP: 2 EC: I 3 7 PA: H 4

Performs any combination of the following duties during manufacture of clay products:

Stacks products in specified pattern on kiln car or hand truck. Pushes kiln car or hand truck to or from kiln, drier, and shipping or storage

area. Removes kiln furniture, such as tie bricks, clamps and holders, and places in box for reuse. Replaces broken brick in kiln or kiln car. Cleans kilns and work area, using shovel and broom. Examines products for elementary defects.

May be designated according to task performed; for example,

Hacker

Kiln-Car Loader

8158-158 SPRUE BREAKER(glass) DPT:687
crack-off man.
 GED: 1 SVP: 2 EC: 1 PA: L 4

Scores and breaks excess glass from moulded and cast articles to impart finish:

Places glass articles on rollers and rotates rollers over cutting flame to score line on neck of article. Breaks waste glass at score mark, using jig. Examines cleanness of break.

May separate glass castings, using steel mallet.

8158-162 ASBESTOS-MOULD STRIPPER(asbestos & min. wool) DPT:687
 GED: 1 SVP: 1 EC: 1 4 PA: H 4

Removes asbestos insulation sleeves from moulds:

Inverts mould on work bench to remove insulation sleeve. Examines sleeves and rejects cracked or otherwise broken ones. Cleans wet fibre from mould, using scraper. Stacks sleeves and clean moulds on hand trucks.

8158-166 ASBESTOS-SHINGLE FLOOR HAND(asbestos & min. wool) DPT:687
 GED: 1 SVP: 1 EC: 1 5 7 PA: VH 4

Performs any combination of the following duties in production of asbestos shingles:

Cleans dirt and foreign material from asbestos shingles, using wire scratchboard. Stacks shingles in bundles and places bundles on pallet. Identifies each pallet load with tag to denote type and grade of shingles. Cleans work area, using shovel and broom.

8158-170 WARE CLEANER(cement, stone & clay) DPT:887
 GED: 1 SVP: 1 EC: 1 PA: L 4

Smooths surface of cast, pressed, glaze-dipped or fired-clay products by performing any of the following duties:

Trims soft flash or picks loose clay from cast or pressed clay products, using knife and sponge. Wipes fingers over glaze to distribute glaze evenly over product prior to firing. Smooths hardened surface after firing, using sandpaper or emery paper, and brushes dust from surface.

8158-199 MISCELLANEOUS OCCUPATIONS IN LABOURING AND OTHER ELEMENTAL WORK, CLAY, GLASS AND STONE

This group includes clay, glass and stone processing and forming labourers and elemental workers, not elsewhere classified; for example, those who load and unload drying tunnels with clay and abrasive products, remove moisture-laden air from automobile windshields, remove greenware from moulds prior to firing, feed conveyors with glass vials to facilitate manufacture of levels, control hoppers to discharge materials for concrete, transport moulds and other equipment to and from glass forming machines, and perform other labouring and elemental work in processing and forming clay, glass and stone. Typical examples of occupational titles covered by this residual group definition are:

Batch-Concrete Labourer(cement, stone & clay)

Drying-Tunnel Man(cement, stone & clay)

Floor Hand, Glass(glass)

Glass-Vial-Conveyor Feeder(glass)

Mould Remover, Greenware(cement, stone & clay)

Vacuum-Bag Man(glass)

8159-CLAY, GLASS AND STONE PROCESSING, FORMING AND RELATED OCCUPATIONS, N.E.C.

This unit group includes occupations, not elsewhere classified, concerned with processing, forming and finishing clay, glass, stone, abrasives, asbestos and related non-metallic minerals.

8159-110 ABRASIVE-COATING-MACHINE OPERATOR(non-metal. min. prod., n.e.c.) DPT:682
 GED: 3 SVP: 5 EC: 1 PA: M 4

Sets up and operates machine to apply abrasive granules on base materials, such as fabrics, fibre or paper, by performing any combination of the following duties:

Reads work order and positions guides and stops on machine bed according to size of base material, using rule or template. Turns screws to adjust valves and regulate thickness of abrasive coating applied to base material. Sets type in printing rolls to identify brand name and product identification on outside face of base material. Mounts roll of base material on machine spindle and positions material against guides. Starts machine and manually feeds edge of material into machine. Examines abrasive coated material for conformance to specifications.

8159-112 DECORATING-MACHINE TENDER(glass; plastic prod.) DPT:685
 GED: 2 SVP: 3 EC: 1 5 PA: S 4 7

Tends semi-automatic machine that prints single or multicolored pictures, designs or labels on cylindrical glass or plastic containers by means of silk screen plate:

Pours premixed paint or places pieces of ceramic paint into reservoir. Installs silk screen plate in frame of printing device, using hand tools. Turns valve to regulate temperature and flow of paint onto silk screen plate. Smooths paint onto silk screen, using flat bladed knife or piece of cardboard. Places glass containers between indexing rollers. Depresses pedal to close roller guides, and to raise roller fixture against silk screen plate. Starts machine to print picture or design on container. Stops machine and releases pedal to lower roller fixture from silk screen and open roller guides. Removes printed containers and places them on tray or moving conveyor. Inspects printed containers to detect paint chips, printing misalignment and smears, and verifies position of label or design, using rule or gauge.

May tend automatic machine that feeds containers from conveyor into machine, rotates them under stainless steel stencil, and ejects printed containers onto moving conveyor. May spray containers with silicone to protect coating.

8159-114 PLASTERBOARD CUTTER(cement, stone & clay) DPT:685
knifeman, plasterboard.
 GED: 2 SVP: 3 EC: 1 PA: L 4

Tends equipment that cuts, perforates and stencils continuous sheet of plasterboard:

Adjusts cutting knife and perforator according to specifications, using gauge and hand tools. Inserts letters in stenciling drum, using tweezers. Fills drum with ink. Adjusts speed of roller and conveyor according to specified dimensions of plasterboard. Selects sample of plasterboard and weighs and measures sample, using scale, rule and micrometer to ensure conformance to specifications.

8159-116 FETTLER(cement, stone & clay) DPT:664
ceramic-tile fletcher.
 GED: 2 SVP: 2 EC: 1 7 PA: L 4

Removes, trims and stacks ceramic products, such as wall and floor tile and insulators, discharged from press:

Grinds, trims and scrapes tile to remove defects, such as cracks, mould flash and chips, using grinder, scraping tool, wire brush or sandpaper. Examines tile or insulators for cracks or imperfections and calls out to press tender to stop machine for cleaning of die cavity when irregularities occur. Measures dimensions of tile for conformance to specifications, using gauge. Stacks tile in specified pattern on trays or pallets. Places trays or pallets on conveyor, manually, and presses switch to start conveyor that transfers products to glazing center.

8159-118 MAT PACKER(asbestos & min. wool) DPT:685
GED: 2 SVP: 2 EC: I 5 7 PA: M 4

Tends machine that rolls mats of fibreglass and packs rolled mats for shipment:

Guides end of mat around tube mounted on mandrel of rolling machine. Starts machine to roll mat and examines mat to detect flaws such as offsize sections, or grease and binder spots. Stops machine and pushes button to lower knife and cut flaws from mat. Lifts roll of mat from machine and packs roll in container. Identifies contents of container, using labels or stencils.

May resplece cut mat, using pressure rollers.

8159-120 ASBESTOSBOARD SANDER(asbestos & min. wool) DPT:685
GED: 2 SVP: 2 EC: I 5 7 PA: M 4

Tends machine that sands and smooths asbestosboards:

Turns handwheel to adjust sander according to specifications for thickness of board. Places board on feed bed of sander and guides board through pressure rollers to automatic sanding mechanism. Depresses pedal to release rollers and removes board. Verifies thickness of board, using gauge.

8159-122 FIBREGLASS GRINDER(asbestos & min. wool) DPT:685
GED: 2 SVP: 2 EC: I 5 7 PA: M 4

Grinds offsize fibreglass pipe coverings to uniform diameter and saws pipe to specified size:

Selects mandrel of appropriate diameter for pipe, and pushes covering on mandrel. Installs mandrel in grinder, and operates grinder to reduce covering to uniform diameter. Verifies diameter, using gauge. Transports coverings to saw line, and operates saw to cut covering to correct size and to cut lengthways in two sections.

8159-126 ASBESTOS-FIBRE PREPARER(asbestos & min. wool) DPT:686
preparation-room worker.
GED: 2 SVP: 2 EC: I 5 7 PA: H 4

Prepares asbestos and other fibres for use in the manufacture of asbestos products, by performing any combination of the following duties:

Collects batches of asbestos, cotton and synthetic fibres from storage area, using hand truck. Assembles fibres into lots prior to blending, following instructions. Feeds fibres into blending machine hopper or onto conveyor, manually or using pitch-fork and shovel. Pulls levers to open or close gates of blower pipes, and direct fibre from blending machine onto hand truck or into mixing machine for further processing. Transports blended fibres to storage bins, using hand truck. Fastens bags under storage bins, pulls lever to open discharge gates and fill bags with fibre. Weighs and rolls bags of fibre to ensure uniform weight and size, using scale and rolling machine.

8159-130 PLASTERBOARD PAPER MAN(cement, stone & clay) DPT:686
paper hanger, plasterboard.
GED: 2 SVP: 2 EC: I 5 7 PA: M 4

Loads plasterboard machine with rolls of paper:

Inserts shaft through roll of paper, places plates and collars over ends of shaft and secures collars, using wrench. Mounts and aligns rolls of paper in machine rack, using hoist. Threads paper through guides. Starts and monitors machine for alignment of paper, and paper defects, such as rough surface, mill splices and soiled areas. Stops machine to cut defective paper from roll, or to insert new roll, and splices ends of paper, using glue and brush. Records identifying number, weight and amount of paper wasted for each roll.

8159-134 CASTINGS FINISHER(cement, stone & clay) DPT:687
GED: 2 SVP: 2 EC: I PA: L 4

Finishes surface of plaster castings, such as statues, figurines and architectural ornaments:

Applies plaster to chips, cavities and other defects to finish castings, using spatula. Removes excess plaster, using scraping tool. Smooths surface of castings, using wet sponge, steel wool or sandpaper.

8159-138 PORCELAIN GLAZER(cement, stone & clay) DPT:687
dipper.
GED: 2 SVP: 2 EC: I PA: L 4

Dips porcelain ware in glaze solution preparatory to firing:

Grasps porcelain ware with fingers and dips ware in tub of liquid glaze. Removes ware from glaze and twists ware to spread glaze evenly over surface and throw off excess glaze. Sets ware on drying rack and brushes glaze over unglazed spots left by fingers.

May remove excess glaze from dry ware, using sponge or buffing wheel. May operate spray gun to glaze large pieces of porcelain ware.

8159-199 OTHER CLAY, GLASS AND STONE PROCESSING, FORMING AND RELATED OCCUPATIONS

This group includes clay, glass and stone processing, forming and related workers, not elsewhere classified; for example, those who laminate glass and vinyl sheets or temper sheets of glass to produce safety glass, assemble special abrasive wheels and other abrasive products, produce bulk experimental abrasive materials, tend drying room to dry large rolls of abrasive material, control combination drying oven and spray booth that preheats and glazes pottery ware, and those who otherwise process or form clay, glass and stone materials. Typical examples of occupational titles covered by this residual group definition are:

Abrasives Drier(non-metal. min. prod., n.e.c.)
Abrasive-Speciality Assembler(non-metal. min. prod., n.e.c.)
Bullet-Proof-Glass Assembler(glass)
Experimental-Abrasives Maker(non-metal. min. prod., n.e.c.)
Glass Laminator(glass)
Glass Temperer(glass)
Glaze Sprayer(cement, stone & clay)

816/817-CHEMICALS, PETROLEUM, RUBBER, PLASTIC AND RELATED MATERIALS PROCESSING OCCUPATIONS

This minor group includes occupations concerned with refining, processing or preparing chemicals, petroleum, coal, rubber, plastic and related materials for subsequent use by means, such as mixing, separating, distilling, subliming, carbonizing, heat treating, crushing, calendering and coating. These occupations are classified in the following unit groups:

8160 Foremen: Chemicals, Petroleum, Rubber, Plastic and Related Materials Processing Occupations

- 8161 Mixing and Blending Occupations,
Chemicals and Related Materials
- 8163 Filtering, Straining and Separating
Occupations, Chemicals and Related
Materials
- 8165 Distilling, Subliming and Carbonizing
Occupations, Chemicals and Related
Materials
- 8167 Roasting, Cooking and Drying
Occupations, Chemicals and Related
Materials
- 8171 Crushing and Grinding Occupations,
Chemicals and Related Materials
- 8173 Coating and Calendering Occupations,
Chemicals and Related Materials
- 8176 Inspecting, Testing and Sampling
Occupations: Chemicals, Petroleum,
Rubber, Plastic and Related Materials
Processing
- 8178 Occupations in Labouring and Other
Elemental Work: Chemicals, Petroleum,
Rubber, Plastic and Related Materials
Processing
- 8179 Chemicals, Petroleum, Rubber, Plastic and
Related Materials Processing
Occupations, n.e.c.

**8160-FOREMEN: CHEMICALS, PETROLEUM,
RUBBER, PLASTICS AND RELATED MATERIALS
PROCESSING OCCUPATIONS**

This unit group includes occupations, as described under the master title, 01-250 SUPERVISOR/FOREMAN (any ind.), concerned with supervising and coordinating activities of workers engaged in refining, processing and preparing petroleum, coal, chemicals, rubber, plastics, and related materials for subsequent use.

**8160-110 FOREMAN, COATING AND CALENDERING
OCCUPATIONS, CHEMICALS AND RELATED
MATERIALS(any ind.) DPT:138**

Supervises and co-ordinates activities of workers engaged in operating, tending or feeding, machines or equipment, that calender, coat, dip, saturate, impregnate or laminate materials; such as, chemicals, rubber, plastics, paper or related materials to impart a desired finish or uniform thickness, (Unit Group 8173):

Performs duties as described under master title, 01-250 SUPERVISOR/ FOREMAN (any ind.).

May supervise workers engaged in coating or calendering specific materials for a variety of purposes and be designated accordingly; for example,

Foreman, Artificial-Leather Coating(plastic prod.)

Foreman, Calendering(plastic prod.)

Foreman, Coating(paper prod.)

Foreman, Gasket Coating(asbestos & min. wool)

Foreman, Latex-Carpetbacking Department(textile)

Foreman, Linoleum(linoleum prod.)
Foreman, Plastic-Film Coating(chem., n.e.c.)
Foreman, Roofing Materials(asphalt roof.)

**8160-114 FOREMAN, CRUSHING AND GRINDING
OCCUPATIONS, CHEMICALS AND RELATED
MATERIALS(any ind.) DPT:138**

Supervises and co-ordinates activities of workers engaged in operating and tending machines that crush, grind, pulverize, dice, cut, shred, chip, mill, flake and pelletize to reduce or enlarge size of materials; such as, chemicals, petrochemicals, coal, rubber, plastics and related materials, (Unit Group 8171):

Performs duties as described under master title, 01-250 SUPERVISOR/ FOREMAN(any ind.).

May supervise workers engaged in crushing and grinding particular ingredients and be designated accordingly; for example,
Foreman, Coal and Coke Crushing and Grinding(petrol. & coal prod.)
Foreman, Grinding and Packaging(chem., n.e.c.)

**8160-118 FOREMAN, DISTILLING, SUBLIMING AND
CARBONIZING OCCUPATIONS, CHEMICALS
AND RELATED MATERIALS(any ind.) DPT:138**

Supervises and co-ordinates activities of workers engaged in operating and tending equipment that heats chemicals and related materials to vapourize and separate volatile substances; cools, condenses and precipitates refined substances; liquefies and distills natural and industrial gases; and removes or obtains gases, condensates or residues in stills, ovens or retorts, (Unit Group 8165):

Performs duties as described under master title, 01-250 SUPERVISOR/ FOREMAN (any ind.).

May supervise workers engaged in a particular activity and be designated accordingly; for example,

Foreman, Alum Plant(chem., n.e.c.)
Foreman, By-products(chem., n.e.c.; petrol. & coal prod.)
Foreman, Caustic Plant(chem., n.e.c.)
Foreman, Cell Room(chem., n.e.c.)
Foreman, Chlorine Plant(chem., n.e.c.)
Foreman, Distillation(chem., n.e.c.; petrol. & coal prod.)
Foreman, Evaporator(chem., n.e.c.)
Foreman, Fuel-Gas(petrol. & coal prod.)
Foreman, Glycerine Refinery(soap)
Foreman, Liquefaction(chem., n.e.c.)
Foreman, Natural Gas Plant(oil & nat. gas)
Foreman, Ovens(chem., n.e.c.)
Foreman, Refinery Unit(petrol. & coal prod.)
Foreman, Soda Ash(chem., n.e.c.)
Foreman, Vacuum Pans(chem., n.e.c.)

8160-122 FOREMAN, FILTERING, STRAINING AND SEPARATING OCCUPATIONS, CHEMICALS AND RELATED MATERIALS(any ind.) DPT:138

Supervises and co-ordinates activities of workers engaged in operating and tending equipment that treats chemicals, petroleum products, coal derivatives, rubber, plastics and related materials by means; such as, agitating, centrifuging, filtering, screening, settling, straining, sifting and squeezing, (Unit Group 8163):

Performs duties as described under master title, 01-250 SUPERVISOR/ FOREMAN (any ind.).

May supervise workers engaged in a particular activity and be designated accordingly; for example,

Foreman, Bitumen-Extraction Plant(petrol. & coal prod.)
Foreman, Brine(chem., n.e.c.)
Foreman, Clarification(chem., n.e.c.)
Foreman, Coke Screening(iron & steel; petrol. & coal prod.)
Foreman, Dehydration(explosives)
Foreman, Filtration(non-ferrous metal; paint & varn.)
Foreman, Purification Plant(petrol. & coal prod.)
Foreman, Viscose Filtration(chem., n.e.c.)

8160-126 FOREMAN, INSPECTING, TESTING, GRADING AND SAMPLING OCCUPATIONS: CHEMICALS, PETROLEUM, RUBBER, PLASTIC AND RELATED MATERIALS PROCESSING(any ind.)

DPT:138

chief inspector; foreman, inspection; foreman, quality control.

Supervises and co-ordinates activities of workers engaged in quality control functions; such as, inspecting, testing, grading and sampling in processing of chemicals, petroleum products, rubber, plastic, and related materials, (Unit Group 8176):

Performs duties as described under master title, 01-250 SUPERVISOR/ FOREMAN (any ind.).

May supervise workers concerned in a particular quality control activity and be designated accordingly; for example,

Foreman, Carbon and Graphite Inspectors(non-metal. min. prod., n.e.c.)
Foreman, Petroleum-Products Inspectors(petrol. & coal prod.)
Foreman, Plastics Inspectors(chem., n.e.c.)
Foreman, Rubber Inspectors(rubber)
Foreman, Samplers(chem., n.e.c.; petrol. & coal prod.)

8160-130 FOREMAN, LABOURING AND OTHER ELEMENTAL WORK: CHEMICALS, PETROLEUM, RUBBER, PLASTIC AND RELATED MATERIALS PROCESSING(any ind.)

DPT:138

Supervises and co-ordinates activities of workers engaged in labouring or other elemental work related to refining, preparing and processing petroleum, chemicals, plastics, and related materials for subsequent use, (Unit Group 8178):

Performs duties as described under master title, 01-250 SUPERVISOR/ FOREMAN (any ind.).

May supervise workers engaged in labouring or other elemental work

related to a particular activity or area of plant and be designated accordingly.

8160-134 FOREMAN, MIXING AND BLENDING OCCUPATIONS, CHEMICALS AND RELATED MATERIALS(any ind.) DPT:138

Supervises and co-ordinates activities of workers engaged in weighing, mixing, blending, compounding, matching, combining and mingling materials; such as, chemicals, petroleum, coal, rubber, plastics, and related materials, by hand or specialized machines, to produce a single wet or dry mass or compound or to achieve quality, texture, colour or similar characteristics, (Unit Group 8161):

Performs duties as described under master title, 01-250 SUPERVISOR/ FOREMAN (any ind.).

May supervise workers engaged in mixing and blending particular ingredients in a variety of industries and be designated accordingly; for example,

Foreman, Battery Paste(chem., n.e.c.)
Foreman, Cleaning Compounds(chem., n.e.c.)
Foreman, Compounding(plastic prod.; rubber)
Foreman, Explosives Mixing(explosives)
Foreman, Fertilizers(chem., n.e.c.)
Foreman, Grease Plant(petrol. & coal prod.)
Foreman, Ink Preparation(chem., n.e.c.)
Foreman, Pharmaceutical Compounding(pharm. & toil.)
Foreman, Reagents(chem., n.e.c.)
Foreman, Viscose(chem., n.e.c.)

8160-138 FOREMAN, ROASTING, COOKING AND DRYING OCCUPATIONS, CHEMICALS AND RELATED MATERIALS(any ind.) DPT:138

Supervises and co-ordinates activities of workers engaged in operating and tending equipment that subjects chemicals and related materials to heat, air, vacuum or desiccants to melt, dry, char, purify, concentrate, liquefy or change chemical composition, (Unit Group 8167):

Performs duties as described under master title, 01-250 SUPERVISOR/ FOREMAN (any ind.).

May supervise workers engaged in a particular activity and be designated accordingly; for example,

Foreman, Carbon Processing(petrol. & coal prod.)
Foreman, Charcoal Briquettes(petrol. & coal prod.)
Foreman, Coke Ovens(petrol. & coal prod.)
Foreman, Cooking Chemical-Recovery(chem., n.e.c.)
Foreman, Driers(chem., n.e.c.; petrol. & coal prod.)
Foreman, Phosphorus Processing(chem., n.e.c.)
Foreman, Reactor Unit(chem., n.e.c.)
Foreman, Varnish(paint & varn.)

8160-142 FOREMAN, PILOT PLANT(chem., n.e.c.) DPT:138

GED: 4 SVP: 8 EC: I 6 PA: L 4 5 7

Supervises and co-ordinates activities of workers engaged in operating small-scale chemical production equipment, under experimental conditions, to test methods and chemical processes for product development:

Performs duties as described under master title, 01-250 SUPERVISOR/ FOREMAN (any ind.). Sets up and modifies equipment, according to specifications, to produce experimental products. Directs operators in mixing of new formulas and safe handling of new ingredients. Maintains close liaison with development laboratory personnel and production departments. Identifies waste by-product materials involved in new product development and co-ordinates with waste control engineer for proper disposal procedures.

May assist development chemist in analyzing test results and recommend corrective action to be taken.

8160-146 FOREMAN, PUMPING AND BLENDING(petrol. & coal prod.) DPT:132

GED: 4 SVP: 8 EC: I PA: S 4 5 6 7

Supervises and co-ordinates activities of workers engaged in pumping petroleum products, operates computerized control panel to move crude, intermediate, and refined products throughout refinery, and to blend gasolines according to specifications:

Performs duties as described under master title, 01-250 SUPERVISOR/ FOREMAN (any ind.). Directs workers to operate equipment beyond range of control panel or to activate controls in event of control panel malfunction. Controls movement and storage of crude, intermediate and refined petroleum products throughout refinery, by operating computerized control panel. Blends gasolines according to specifications by selecting appropriate control switches. Records gauge levels of all tanks by operating computerized controls or by collating information submitted by other workers. Prepares shift log showing quantities of incoming crude, refinery streams to processing units, and products placed in storage.
May co-ordinate activities of workers engaged in shipment of refinery products by truck, rail or water.

8160-199 MISCELLANEOUS FOREMEN, CHEMICALS, PETROLEUM, RUBBER AND PLASTICS PROCESSING OCCUPATIONS

This group includes processing foremen, not elsewhere classified; for example, those who supervise and co-ordinate workers engaged in processing chemicals, petroleum products, coal derivatives, rubber, plastics, and related materials:

Typical examples of occupational titles covered by this residual group definition are:

Foreman, Acid Plant(chem., n.e.c.)
Foreman, Explosives Preparation(explosives)
Foreman, Millroom(rubber)
Foreman, Naphthalene Plant (petrol. & coal prod.)
Foreman, Pigments(chem., n.e.c.; paint & varn.)
Foreman, Plastic Sheets(plastic prod.)
Foreman, Soap Processing(soap)

8161-MIXING AND BLENDING OCCUPATIONS, CHEMICALS AND RELATED MATERIALS

This unit group includes occupations concerned with operating and tending equipment that combines, mingles or fuses chemicals and related materials to produce a single mass or compound or to achieve quality, texture, colour or similar characteristics.

**8161-110 COLOURMAN(pulp & paper) DPT:361
beater-room lead-hand.
GED: 3 SVP: 7 EC: I 7 PA: L 4 7**

Develops colour-formulas, and prepares instructions for mixing dye with pulp to produce paper and paperboards of various types, colours and shades, as specified by production orders:
Determines composition of colour sample, using colour reference book, or follows instructions from analysis made by laboratory. Mixes pulp with water, size, filler and other ingredients to make sample of furnish (raw materials) of type and quality of paper or paper-board specified. Weighs and mixes pigments to prepare dye, and mixes dye with furnish. Pours furnish on screen to make handsheet sample. Visually compares colour of handsheet with colour sample, and modifies formula to adjust colour mixture as required. Calculates weights and proportions of pigments and other materials required to make production batch of dye. Prepares formulas and gives mixing directions to other workers. Monitors colour of pulp mixture and finished paper, and adjusts formulas to maintain specified colour shades. Prepares production reports.
May consult with other workers on technical problems related to colour mixing, formula improvement and other production matters.

**8161-112 BLENDER(petrol. & coal prod.) DPT:482
compounder.
GED: 3 SVP: 7 EC: B 6 7 PA: L 2 4**

Controls equipment to blend petroleum products with chemicals, tetra-ethyl leads, distillates of crude oil, and other additives to produce commercial fuels, lubricating oils, and asphalt, according to formula: Reads blending schedules to determine type and quantity of materials to be blended. Manipulates controls to start pumps or notifies pumpman to transfer gasoline or specific oil product to blending tanks. Computes quantities of additives or sets weighing machine or gauges

that automatically weigh quantities of additives in ratio to quantity of gasoline or oil. Turns handwheels to open valves and spray-jets to admit and circulate specified quantities of gasolines, oils, additives and chemicals in mixing tanks. Moves controls of pumps, agitators and mixers to blend mixture mechanically or with air agitation. Observes temperature gauges and turns valves to regulate and maintain specified temperature in tanks. Draws sample of mixture for laboratory analysis. Repeats blending process as required, or starts pumps to draw off blended gasoline or oil to storage tanks or loading racks. Opens valves to draw off chemical and lead residue. Records quantity blended, materials used, and blending time. Lubricates, adjusts, and performs minor repairs on pumps, agitators and mixers.

May check blend of mixture, using spectroscope. May be designated according to type of additive or product blended; for example, Asphalt Blender
Ethyl Blender
Lube-Oil Compounder

**8161-114 GREASE MAKER(petrol. & coal prod.) DPT:582
GED: 3 SVP: 7 EC: I 3 4 6 7 PA: M 4 7**

Controls steam- or electrically-heated kettles in which ingredients are heated and mixed to produce various grades of lubricating grease, according to specifications:

Weights and pours specified quantities of ingredients, such as melted fats, mineral oils and soda or lime base into kettles. Starts agitator to mix batch to required consistency, and adjusts kettle temperature controls to form basic grease from mixture. Turns off heat and adds water, dye and various mineral oils to grease, in designated proportions for emulsification. Restarts agitator and reheats mixture to produce grease of required texture. Forwards sample of batch to laboratory for testing, and adjusts batch according to test results. Keeps records of product mixed, batch number, evaporation loss, time of start and finish of batch and sample test results. Performs colour tests with standard samples for various colours of grease. Sets valves, manifolds and pump controls, and makes hose connections, using hand tools, to transfer products to storage.

**8161-118 COLOUR MATCHER(chem., n.e.c.) DPT:481
shade matcher.
GED: 3 SVP: 6 EC: I 7 PA: M 4 7**

Mixes pigments to formulate colouring solutions used in dyeing leather materials:

Compares sample of desired colour with standard colour specifications to determine pigments required. Weighs or measures and mixes selected pigments or dye-stuffs with thinning and drying solutions and solvents until mixture matches sample. Verifies colour by dyeing material and comparing it with sample. Computes and records specifications necessary to produce desired colouring solution. Mixes batches of colouring solutions to replenish stock.

May inspect dyed material to determine uniformity of coverage.

**8161-122 TINTER(paint & varn.) DPT:581
shader.
GED: 3 SVP: 6 EC: I 5 7 PA: M 4 7**

Mixes ingredients such as pigments, resins, solvents, and oils with paints, enamels or lacquers to match colours, following formulas and standard colour samples:

Mixes ingredients according to formula to match a given colour sample, using sample mixing mill. Presses switch to start agitator in tank containing basic paint product. Pours specified amounts of pigments into tank to colour basic product. Smears sample of batch on glass or paper, using spatula or brush. Compares samples with standard colour, using colorimeter to attain desired shade. Records ingredients added on batch ticket. Ladles sample into container. Writes identifying data on container and submits sample to laboratory for final colour, gloss, weight and viscosity tests. Weighs sample and calculates weight per gallon.

May remove foreign matter from paint, using spoon or ladle. May determine specific gravity, using hydrometer. May test for viscosity, using viscometer. May be designated according to product tinted; for example,

Enamel Shader
Lacquer Shader
Paint Tinter

8161-126 SOAP MAKER(soap) DPT:682 GED: 3 SVP: 6 EC: I PA: M 3 7

Controls equipment that heats and mixes ingredients to produce soap: Charges mixing kettle with prescribed amounts of ingredients, such as tallow and lye, by opening valves or using shovel. Admits water and steam through bottom of tank to heat and agitate mixture. Determines degree of alkalinity of caustic soda in mixture, using pH meter, and adds soda, salt or water as required. Observes mixture to detect variations, and determines when boiling and agitating cycles are completed, by observing consistency and homogeneity of product. Allows batch to cool and settle for specified time. Raises or lowers pumpline to locate separation level of neat (pure soap) and nigre (residue), and starts pump to transfer neat to next process. Lowers pumpline to bottom of tank to transfer nigre to reclaiming tank. May calculate amount of ingredients needed to make various soaps and cleaning compounds, according to formula.

8161-130 CATALYST OPERATOR, GASOLINE(chem., n.e.c.) DPT:562 GED: 3 SVP: 5 EC: B 5 7 PA: M 2 4

Controls equipment that combines and dries chemicals, to make catalysts used in the manufacture of high octane gasolines: Dumps dry ingredients such as sodium silicate, caustic soda and other chemicals into electric mixing vats. Opens valves to admit prescribed amounts of water and sulphuric acid. Observes thermometers and flow meters and adjusts temperature and flow controls. Turns handwheels to open valves and allow mixture to flow from mixing vats to vacuum filters that remove excess water. Starts pumps that force mixture through spray dryers where particles of catalyst are formed, and regulates temperature and speed of spray by turning dials on control panel. Pumps catalyst particles from bottom of dryers to washer- filters for removal of impurities. Turns valves to regulate flow of catalyst through hot-air-steam dryers, and observes temperature and speed of flow to insure proper drying. Keeps record of batches processed.

8161-134 MAKE-UP MAN(chem., n.e.c.) DPT:562 GED: 3 SVP: 5 EC: I PA: L 5

Controls equipment to produce ingredients such as polymerization emulsions, solutions and stabilizers used in the production of synthetic rubber: Pumps liquid chemicals to metering or weigh tanks. Moves heater controls to attain specified temperature in system. Starts agitator and opens valves to regulate and admit chemical agents into mixing tanks in prescribed sequence. Directs other workers to dump preweighed amounts of solid materials into tanks. Regulates flow of rubber constituents to storage or to rubber synthesis work areas, according to production needs. Observes precautions to maintain safety standards. Maintains records of materials used and shift production, process times, temperatures and gauge readings. Receives and stores materials.

8161-136 ACID MAN, NITROCELLULOSE(explosives) DPT:582 GED: 3 SVP: 5 EC: I 6 PA: L 4

Controls mixing tanks and auxiliary equipment to combine acids to produce solutions for manufacturing nitrocellulose: Pumps specified liquids through metering or weighing tanks into mixing tank. Starts tank agitator to mix ingredients for specified time. Draws samples of product for laboratory analysis and transfers additional ingredients to tank until product meets specifications. Pumps mixed product to storage or other processing units, such as heat exchangers, driers and nitrators. Packs valves, replaces gaskets and cleans fume lines, using hand tools. Keeps records of mixing time, gauge readings and number of batches mixed. May read refrigeration unit used to maintain temperature within prescribed limits through various stages of processing.

8161-138 NITROGLYCERINE-NITRATOR OPERATOR(explosives) DPT:582 GED: 3 SVP: 5 EC: I 6 PA: L 4 7

Controls continuous-process equipment to combine ingredients for manufacturing nitroglycerine: Turns valves to designated settings to start flow of glycerine, glycol and mixed acid into mixing chambers, flow of brine through cooling

coils, and flow of sodium carbonate and acetone into final mixture to neutralize excess acid. Monitors thermometer and pressure gauges on control panel, and turns valves to maintain temperature and pressure system within prescribed limits. Observes reaction of mixing ingredients through glass panel to detect abnormal colour reactions. Pushes safety button, if temperature and pressure gauges indicate explosion is imminent, to stop flow of ingredients and dump nitroglycerine into water-filled vat. Fills in daily check-off list and operating reports for security and statistical purposes. May control batch-process equipment to combine ingredients to produce nitroglycerine.

8161-142 TANNING-SOLUTION MAN(leather tan. & fur dress.) DPT:682 solution mixer. GED: 3 SVP: 5 EC: I 5 7 PA: M 4

Controls series of mixing vats to mix and boil tanbark, quebracho, chemicals and water to prepare solution for leather tanning: Weighs specified amounts of materials on scale and dumps them into vat. Opens valves to admit water and steam into vat. Adjusts steam valve, and observes thermometer to maintain solution at specified temperature. Tests sample of solution for specific gravity, using hydrometer. Adds ingredients to solution to obtain specified density. Starts pump to transfer solution from vat to storage tank.

8161-146 BANBURY-MIXER OPERATOR(plastic prod.; rubber) DPT:682 banbury operator; plasticator. GED: 3 SVP: 5 EC: I 5 7 PA: M 4

Operates machine to mix ingredients into compounds for further processing into articles, such as rubber tires, tubes, plastic sheeting, and wire insulation: Dumps ingredients into mixing machine hopper from tote boxes carried on monorail system or from hand trucks, or directs other workers in performing these tasks. Starts machine and adjusts valves to admit steam or cooling fluids to steam jacket. Starts mixing device to aid in blending and densifying mixture. Stops machine when mixture reaches desired consistency. Turns lever to unload mixture into container, conveyor, or mill for sheeting. May operate auxiliary equipment to break up, grind, dry or otherwise prepare mixture for final processing. May weigh crude rubber, plastic scrap and other ingredients from bags or barrels, and dump ingredients into tote boxes for delivery to mixing machine.

8161-150 KETTLE OPERATOR(chem., n.e.c.) DPT:682 GED: 3 SVP: 5 EC: I 3 4 6 PA: H 2 4

Operates mixing kettles or tanks to mix and process ingredients according to formula, to make adhesives, glues, pastes and similar products: Counts number of bags or measures or weighs specified amounts of ingredients. Turns valves to admit water or steam to kettle or tank, steam coil, or jacket to heat compounds. Starts agitator or mixing paddles, and dumps or pours ingredients into kettle or tank in prescribed order. Mixes and cooks compound for specified time and adjusts steam valves to regulate temperature. Turns valve to drain kettle or tank and transfer product to shipping containers, drums, storage tanks, or packaging machines. Cleans kettle and equipment using water, solvents, brushes, and scraper. Draws test samples and delivers them to laboratory for analysis. Adds ingredients to bring mixture to specifications.

8161-154 WHITE-LEAD MIXER(chem., n.e.c.) DPT:682 GED: 3 SVP: 5 EC: I 6 7 PA: H 4

Controls mixing equipment to treat lead oxide with acid to produce white lead: Weighs lead oxide powder, and dumps it into mixing vat. Turns valve to add specified amount of water to vat, and pulls switch to start agitator in vat to form slurry. Depresses button to start pump and transfer slurry from mixing vat. Opens air pressure valve to atomize slurry entering mixing chamber. Turns valves to admit specified quantities of acetic acid solution and carbon dioxide into mixing chamber to transform atomized slurry (lead oxide powder) into white lead. Reads gauges and adjusts steam valves to maintain specified temperature in mixing chamber. Sends sample of white lead to laboratory for analysis. Pours concentrated acid into acid supply vat to

maintain solution at specified strength. Starts pump to transfer white lead from mixing chamber into storage tanks. Connects and disconnects hoses between mixing vat, mixing chamber, and storage tanks, as required, using wrench.

8161-158 INK MATCHER(chem., n.e.c.) **DPT:684**
inkman.

GED: 3 SVP: 5 EC: I PA: L 4 7

Blends ingredients according to formula to produce coloured printing inks that match samples or customers' specifications:
Reads specifications on work order and studies colour specimen to determine paper type, ink colour and printing process to be used. Mixes ingredients and solvents listed in standard formula to produce ink. Formulates small quantity of ink specified by work order and tests it for shade and opacity on similar material. Adds ingredients to mixture and repeats tests until specifications are met and precise ratios of ingredients determined. Determines ink viscosity by timing flow from test cup, and adding desired amount of solvent to meet viscosity requirements for kind of ink and material specified. Cleans tools and mixing equipment, using solvents, wipers and brushes.

8161-162 MIXER OPERATOR(explosives) **DPT:482**
GED: 3 SVP: 4 EC: I 6 7 PA: H 4

Operates mixing machines and auxiliary equipment to produce explosives, such as dynamite, smokeless powder or solid-propellant rocket fuel:

Computes quantities of chemical agents required for batch of given size, according to formula. Opens bags of solid materials and dumps specified quantities into conveyor hopper of mixer. Starts pump to add liquid chemical agents, such as nitroglycerin, wetting agents, catalysts or solvents into machine. Sets controls to regulate temperature of coils in mixer jacket according to gauge readings and product specifications. Starts mixer to blend ingredients for specified time, or until prescribed reaction occurs. Moves dump lever, or shovels materials into containers for storage, shipment, or further processing.
May tend auxiliary equipment units, such as dissolving tanks, ovens or vibrating screens to prepare or further process materials.

8161-166 WET-EXPLOSIVE MIXER(explosives) **DPT:582**
GED: 3 SVP: 4 EC: I 5 6 PA: L 3 4 7

Measures, blends and processes explosive ingredients to produce wet-priming mixture used in rimfire cartridges and detonators:
Measures and dumps specified amounts of ingredients, such as red lead, lead styphnate, and tetrazene into mixer bowl. Pushes button to start mixer and blend ingredients to form lead azide. Measures, screens, and blends specified amounts of sulphonates and nitrates by hand to make styphnic acid, used for blending with lead azide. Adds water in prescribed amount to tank containing styphnic acid, and allows solution to settle for specified time. Opens tap at bottom of tank to remove water until correct percentage of water in styphnic acid mixture is reached. Adds lead azide to styphnic acid in settling tank, and mixes ingredients with rubber spatula. Reads thermometer, and turns valves to adjust temperature and rate of temperature rise to facilitate removal of adsorbed solids. Opens valve at bottom of tank, and filters liquid through cloth and into containers. Records temperature and rate of precipitation on chart. Examines samples under microscope to ensure that crystals meet specifications. Scoops wet priming mixture into cloth-lined pails and carries pails to dry magazine. Records temperature, drying time and production in log book.

8161-170 CRUTCHER OPERATOR(soap) **DPT:662**
GED: 3 SVP: 4 EC: I 6 7 PA: H 4

Operates crutchers (steam-jacketed equipment) that mix specified quantities and types of liquid, powder and paste ingredients to form slurry for processing into soap:

Pulls slide from discharge chute of hopper to admit dry materials into scale bin. Weighs ingredients according to formula and opens valves to transfer materials into mixing equipment. Starts agitator to mix materials for prescribed period of time. Observes gauges and adjusts valves to maintain specified temperature. Weighs and dumps additional ingredients into mixer in designated sequence and rate, or adjusts scale tank and pumps in dyes and additional liquids. Tests acidity and alkalinity of mixtures, using standard test equipment, and adds chemical additive to obtain correct reading. Turns valve to pump

batch through filter unit to storage tank. Records number of batches mixed. Cleans pipe lines, tanks, pumps and filter by purging with steam and hot water hose.

8161-174 ORTHOPHOSPHATE-WET-MIX OPERATOR(chem., n.e.c.) **DPT:682**
GED: 3 SVP: 4 EC: B PA: L 4

Controls flow of ingredients to premixer and reaction vessels, to produce orthophosphate liquor by reaction of phosphoric acid with soda ash, preparatory to further processing:

Starts feed conveyors, premixer, pumps, exhaust fans and filter units in required sequence from control panel. Mixes water and soda ash in premixer to form slurry. Turns valves and observes flowmeters to regulate flow of phosphoric acid and soda ash slurry to reactor vessel. Starts agitator in reactor vessel to mix product. Turns valves to regulate flow of steam through vessel heating coils to attain reaction, observing thermometer to verify temperature. Lowers sampling rod into tank to obtain sample for laboratory testing. Turns valves to admit measured amounts of chemicals, as indicated by laboratory reports, to regulate chemical properties of mixture to specifications. Turns valves and starts pump to transfer mixture to spray drier-feed-tanks.

8161-178 SIZE MAN(chem., n.e.c.) **DPT:682**
pulp-size man; size-and-alum operator.
GED: 3 SVP: 4 EC: I 5 PA: H 2 3 4

Operates equipment to cook and mix materials according to formula, to make size for use in making paper:

Turns valves to fill cooking vats with metered volumes of liquid ingredients, and dumps measured amounts of solid ingredients into vats, according to formula. Turns steam valves to maintain specified temperature for cooking starch or resin with water, lime, and chemicals. Opens drain valve or starts pump to transfer cooked material to mixing machine. Dumps specified weights of alum, clay or titanium dioxide into machine, and starts machine to mix ingredients for specified length of time. Adds chemicals to mixture, according to formula, to prevent decomposition. Takes sample of mixture and forwards to laboratory for analysis. Turns valves and starts pumps to transfer size to and from storage tanks.

8161-182 WOOD-PULP CAUSTIC-LIQUOR MAKER(chem., n.e.c.) **DPT:682**
wood-pulp causticiser; caustic man.
GED: 3 SVP: 4 EC: I PA: L 4 7

Controls equipment to mix and process green liquor (soda ash solution) and lime into caustic liquor used in cooking wood-pulp:

Monitors control panel to detect malfunctions indicated by signal lights or horn, and makes necessary control adjustments. Presses switches to start pumps and adjusts valves to control flow of water and lime into tank to make lime slurry of specified density. Adjusts valves to control flow of lime slurry and green liquor into reaction tanks in specified proportions. Turns steam valve to heat reaction tank to make caustic cooking liquor. Observes recorder charts to ensure temperature is maintained according to specifications. Operates controls to pump cooking liquor to settling tank. Makes standard titration tests at various stages of process. Turns valves to pump clear liquor to storage tank and lime sludge to sludge tank. Checks charts to determine levels of green, clear and caustic liquor in storage tanks.

8161-186 DYE MIXER(chem., n.e.c.) **DPT:584**
dye maker.
GED: 3 SVP: 4 EC: I 4 7 PA: M 3 4 7

Mixes dyes and chemicals for use in dyeing products such as furs, felt and fabrics:

Weighs powdered or liquid dyes and chemicals according to specifications, using weigh scales and measuring utensils. Pours dyes and chemicals into pail or mixing tank. Turns valve to add desired amount of water to ingredients, and stirs mixture with hand paddle to dissolve dye. Dumps dye solution in pail into supply tank, or turns valves to transfer dye solution from mixing tank to supply tanks in dye room. Keeps inventories of dyes and chemicals and notifies supervisor as supplies are needed.

May dye sample swatch, compare dyed swatch with standard, and adjust dye solution to required colour.

8161-190 DRY-EXPLOSIVE MIXER(explosives) DPT:584
GED: 2 SVP: 4 EC: I 6 PA: L 4

Operates equipment that blends and screens ingredients in cloth, cone-shaped mixing and screening device to make primer charge for dynamite caps and detonators:

Selects and carries predetermined quantities of ingredients from storage magazines and dryhouse to mixing house, or weighs out specified amounts of ingredients. Positions containers in specified order on dumping shelf of mixing device. Moves dump arm by manipulating remote-control levers located behind cement wall to empty containers in mixing bag. Turns mixing crank specified number of times to move bag centre up and down to blend powders, observing operation in mirrors set at angles. Pours blended powder into rubber containers, by manipulating levers that activate remote-control arms. Fastens identification tags on containers and carries them to storage magazines. Washes equipment and premises to prevent accumulation of explosive dust, using alcohol-soaked cloths, brush, water hose and mop. Repairs screens and attaches bags to wall of mixing cylinder, using special lacing and tying technique. Records batch production data on work sheet.

8161-194 MIXER, WALLPAPER COLOUR(chem., n.e.c.) DPT:664
GED: 2 SVP: 4 EC: I PA: L 4 5 6 7

Mixes and matches colour base with colour tints for colour printing of wallpaper:

Examines colour scheme on wallpaper sample, and determines, from experience, quantities of pigment needed. Selects and ladles portions of pigments into mixing containers. Mixes pigments into colour base, using paddle or electric agitator. Brushes sample of pigment mixture on patch of wallpaper, and compares it with colour sample. Adds pigments to obtain exact colour shading.

May transfer drums of pigments to storage area, using hand truck. May be designated according to process used; for example, Ground-Colour Mixer
Print-Colour Mixer

8161-198 PAINT MIXER, HAND(paint & varn.) DPT:684
GED: 2 SVP: 4 EC: I 7 PA: M 4 7

Mixes paints and other coatings by hand, according to formulae: Pours materials, such as pigments, paint paste, vehicle and thinner into can. Stirs mixture with hand paddle. Compares mixed liquid with desired colour sample to ensure that it matches. Blends colours to obtain desired shades. Tests specific gravity of mixture using hydrometer.

May take stock and prepare stock record sheets.

8161-202 COMPOUNDER(pharm. & toil.; soap) DPT:585
GED: 2 SVP: 4 EC: I 7 PA: H 4 7

Tends tanks and compounding kettles that mix and blend flavours, perfumery solutions, colour solutions, essential oils and aromatic synthetics for use in manufacture of soaps, perfumes, cosmetics and other toilet preparations:

Weights or measures specified types and quantities of liquid ingredients according to formula, using scale tank or graduate. Measures powdered ingredients, using metric balance or avoirdupois scales. Drains solution from scale tank through filter unit to remove foreign particles. Dumps powdered chemicals and pumps solution into compounding kettle that automatically washes it to remove odours, or observes thermostat and adjusts valves to heat solution as specified. Pumps solution into agitator tank that blends it for specified time, and through filter unit for further purification. Observes solution for colour, or draws samples at various stages for laboratory analysis. Evaluates product by smelling. Cleans pumps, filters, tanks, piping and barrels, using steam hose and hot water. Records and submits stock and production reports.

May tend mill to grind or blend ingredients.

8161-206 COLOUR-WEIGHER-AND-MIXER(linoleum prod.) DPT:585
GED: 2 SVP: 4 EC: I 6 7 PA: VH 7

Weights pigments and tends mixers that blend ingredients used in production of hard surface floor covering:

Reviews pattern schedule to determine colours required. Moves

containers of designated pigments from storage area to scales, using hand truck. Weighs prescribed pigments, dumps pigments into containers, and marks containers, to indicate sequence in which colour should be charged into mixer. Pours ingredients into mixing machine, and pulls lever to lower lid. Starts and runs mixer for specified time. Verifies consistency of mix, using viscometer. Starts pump and opens valve to transfer batches of mix into storage tanks. Takes samples of mix for laboratory analysis, and keeps production records.

May tend mottling machines that blend coloured mixes to achieve specified patterns or shade combinations for floor covering, and be designated accordingly, Mottler Tender

8161-210 RUBBER-CEMENT MIXER(rubber) DPT:585
GED: 2 SVP: 4 EC: I 6 7 PA: M 3 4

Tends agitator drum that mixes latex or crude rubber with solvents to produce liquid rubber cement:

Weights and measures specified amounts of rubber, chemicals and solvents, using balance scales and graduated beakers, and loads ingredients into drum. Breaks down full batch formulas into partial batches and samples. Stirs mixture to form cement using electric-powered paddles. Opens petcock of drum and empties cement into containers. Records types and quantity of cement mixtures produced.

May submit sample of each batch to laboratory for testing. May turn valves to admit steam and heat agitator drum to specified temperature for mixing.

8161-214 VINYL-ASBESTOS-BLENDING-MACHINE TENDER(linoleum prod.) DPT:665
roller boss.
GED: 2 SVP: 4 EC: I 5 7 PA: H 4 5

Tends machine that blends granulated vinyl or asbestos of two or more colours preparatory to forming marbelized vinyl or asbestos tile: Starts machine by pressing buttons, and turns valves to heat rollers to specified temperature to melt and mix granulated vinyl and asbestos. Shovels or dumps premeasured amounts of vinyl or asbestos granules of prescribed colours between rollers, until mixing is complete. Signals other workers to cut off and catch marbelized material emerging from machine. Directs helpers who assist in mixing, rolling, and cutting product.

8161-218 MIXER(chem., n.e.c.; paint & varn.) DPT:685
GED: 2 SVP: 4 EC: I 5 7 PA: H 3 4 7

Tends machines that blend solid and liquid ingredients to make products, such as inks, paints, lacquers and binders, following formulas, performing any combination of the following duties:

Sets dials of pump meters to admit specified amounts of liquids, such as oils, solvents and water into mixing machine. Weighs dry ingredients, such as colour concentrates, gums, and resins, as indicated on batch ticket, into mixer by hand, or using chain hoist. Starts agitator that mixes ingredients for specified time. Operates jar mill or ball mill to mix and grind ingredients. Draws samples from batch for laboratory tests, and adds ingredients to mixture as indicated by laboratory analyses. Transfers raw material from storage to process area, using hand truck. Cleans equipment using rags, solvent and scraper.

May be designated according to product mixed; for example, Glass-Enamel Mixer(paint & varn.)

Ink Mixer(chem., n.e.c.)

Lacquer Blender(paint & varn.)

Paint Mixer(paint & varn.)

Plastic Mixer

Seasoning Mixer(chem., n.e.c.)

Shellac Mixer(paint & varn.)

8161-222 CAUSTICISER MAN(chem., n.e.c.) DPT:685
GED: 2 SVP: 4 EC: I 6 7 PA: M 3 4

Tends equipment to reconstitute caustic solutions for use in electrolytic cells:

Turns valves and starts pumps to fill recausticising tank to required level with specified amounts of sodium or potassium hydroxide and lime. Starts mixer in tank to mix ingredients. Opens water valve to dilute mixture and obtain specified concentrations, according to type of product. Draws samples periodically and performs titration and specific gravity tests, using standard equipment, to determine concentration of solution being formed. Turns valves to transfer solution

through filters and to pump clarified solution to other parts of plant or to storage tanks. Clears stopped pipelines and repairs equipment, using hand tools.

8161-226 CLEANING-COMPOUNDS MIXER(chem., n.e.c.) DPT:685

GED: 2 SVP: 4 EC: I 7 PA: M4

Tends mixing kettles to mix and heat chemical ingredients to make cleaning and polishing compounds:

Weighs or measures specified amounts of ingredients, such as detergents, aromatics and abrasive powders, on scale, or in measuring containers. Pours or scoops ingredients into mixing kettles. Turns valve to regulate steam pressure to maintain specified temperature in kettles. Starts agitator to mix ingredients for specified time. Draws samples from batch at regular intervals for laboratory tests, and adds ingredients, or varies temperature or mixing time, as indicated by laboratory analyses. Opens valve to drain mixed ingredients into container filling machine.

May mix ingredients, such as dye, oil, sand, sawdust and water to make sweeping compound and be designated accordingly. Mixer, Sweeping Compounds

8161-230 COLOUR MIXER(chem., n.e.c.) DPT:685

GED: 2 SVP: 4 EC: I 5 PA: M 2 4 7

Tends machines that grind and mix resin, stabilizer and pigments to make colouring for plastics materials:

Positions empty hopper on scale manually, or using hoist, and dumps sacks of resin and stabilizer into hopper. Scoops specified quantity of pigment from container into balance scale pan, and pours it into hopper. Empties ingredients into tumbler, and presses button to start machine to mix ingredients for specified time. Connects hose between tumbler outlet and attrition grinder, using wrench. Positions hopper under grinder, using lift truck, and opens tumbler outlet, using lever, to run mix through grinder and into hopper. Dumps mixture into sacks or drums, and labels them for storage. Draws sample for laboratory test, and weighs additional ingredients to be used in mixed batches for colour improvement.

8161-234 TRACER-POWDER BLENDER(explosives)

GED: 2 SVP: 4 EC: I 6 PA: L 4

Tends machines and equipment that prepare and blend dry and liquid chemicals to produce highly flammable mixtures of specified composition for initiatory powders used in detonators, fuses and tracer bullets: Weighs and measures amounts of ingredients according to formula, using bench scale and beakers. Tends remote-controlled tumbling barrels to blend chemicals, adding ingredients in designated sequence, at timed intervals. Tends steam-heated oven to dry ingredients, and tends remote-controlled ball mill to pulverize dried ingredients, adding required number of rubber balls to achieve prescribed degree of pulverization. Sifts powder, using hand sieve. Pours finished mixes into rubber pouches, attaches printed labels, and conveys pouches to storage magazine, using hand truck. Brushes and washes equipment and premises, using hose, to prevent dangerous accumulation of powder.

8161-238 MIXER OPERATOR, CARBON PASTE(chem., n.e.c.) DPT:565

GED: 2 SVP: 3 EC: I 5 PA: L 4 5

Tends machines that mix ground coal, coke, anode butts and pitch into carbon paste used to make electrodes:

Sets automatic scale and steam regulator to specified weight and pressure. Starts equipment and signals other workers to charge mixer with specified amounts of coal, coke, butts and pitch. Turns valve to pour liquid pitch into mixer. Presses switches to open door and pulls lever to discharge paste into buckets on truck. Records charging and discharging time of mixer.

8161-242 BATTERY-PASTE MIXER(chem., n.e.c.) DPT:585

GED: 2 SVP: 3 EC: I 6 7 PA: M 4 7

Tends mixing machine or mulling mill to mix ingredients into paste for storage-battery grids:

Measures or weighs specified amounts of oxide, water and acid, using barrels, scoops or automatic weigh scales. Dumps barrels of oxide into

mixer, or into storage pit equipped with bucket elevator, or screw conveyor leading to mixer. Presses switch to start and stop mixer. Turns valves to add specified amounts of water and acid to oxide. Tests sample of paste for temperature, plasticity and density, using probe thermometer, penetrometer, and gram scale, and records results. Dumps mixture into cart and hauls to pasting machine, or pulls lever to dump paste into hopper of pasting machine. Records batch weight and starting and withdrawal time. Cleans machine, using water and brush.

May tend equipment to heat and mix ingredients of liquid paste used to coat inside of dry cell battery containers, and be designated accordingly. Liquid-Battery-Paste Mixer

8161-246 COATING-COMPOUND MIXER(chem., n.e.c.) DPT:585

GED: 2 SVP: 3 EC: I 5 6 7 PA: H 4 7

Mixes ingredients to produce lining and coating compounds for tin cans:

Measures and pours specified amounts of ingredients, such as concentrates and solvents into barrel, using measuring can. Lowers agitator into barrel, and starts machine to mix solution. Tests viscosity with viscosimeter, and adds solvent or concentrates as required. Pumps compounds from mixing barrel to storage tank and coating machine reservoirs, or delivers compounds to coaters in containers filled from mixing barrel. Transports barrels and containers, using hand truck. Stacks barrels on racks, using chain hoist. Observes safety precautions in mixing and storage areas to minimize accumulation of explosive vapours arising from lacquers or other compound ingredients. Issues and requisitions materials and keeps stock records.

May mix sealing solutions or soldering fluxes. May mix solutions or compounds manually. May distribute product to production machines.

8161-250 FIBREGLASS-BINDER MIXER(chem., n.e.c.) DPT:585

GED: 2 SVP: 3 EC: I PA: L 4

Tends mixing machine that mixes binder fluid used to promote cohesion in the production of fibreglass sliver or mats:

Connects feed lines to mixer and opens valves to dump ingredients into mixing vats, according to formula. Turns valve to start flow of water and steam into vats, and starts portable or power mixer to agitate ingredients for specified time. Observes temperature charts and thermometers to determine if specified temperature is maintained. Turns valve to increase flow of steam or water to regulate temperature of mixture. Dips beaker into vat to obtain sample of binder fluid and delivers sample to testing room. Adds ingredients to mix as indicated by test results, or turns valve to start flow of binder fluid into specified circulatory tank. Records number of batches mixed, amount of ingredients used and net gallons of binder fluid mixed, for inventory and production records.

8161-254 LIME-SLUDGE MIXER(chem., n.e.c.) DPT:585

GED: 2 SVP: 3 EC: I 5 PA: L 4

Tends mixing tank in which chemicals and colours are mixed with lime sludge to obtain filler used to improve finish of paper:

Adjusts valves to control flow of sludge from storage tanks through filter screen into reaction (mixing) tank. Pumps acid and alum into mixing tank, and adds measured amounts of pigment, using shovel. Pulls lever or pushes buttons to start agitator that stirs mixture. Weighs specified samples of treated sludge and compares them with standard chart to determine density. Screens sample through wire mesh to detect presence of foreign matter. Records test results and quantities of filler processed.

8161-258 NEUTRALIZER(soap) DPT:585

GED: 2 SVP: 3 EC: I 6 7 PA: H 2 4 7

Tends measuring and mixing equipment to neutralize alkaline paste used in preparation of detergents:

Turns valves to charge neutralizers with specified liquid ingredients and starts agitator. Draws samples, makes standard titration tests, and records results. Tends pumps to keep supply of liquid ingredients in measuring tanks. Handles drums and bags of raw materials, using hoist. Weighs materials, using platform scale. Dumps limestone into neutralization tubes by hand. Starts pumps to transfer neutralized

products to storage tanks. Washes neutralizers, pipe lines and tanks, before changeover to different product, using water and hose. May add dye to colour detergents, to match standard sample.

8161-262 NITROGLYCERINE NEUTRALIZER(explosives) DPT:585

GED: 2 SVP: 3 EC: I 6 PA: L 4

Tends vats to wash and treat partially stabilized nitroglycerine, to neutralize acids remaining from nitrating process in explosives manufacture:

Introduces stream of air from bottom of vat containing soda water and nitroglycerine to agitate and mix product for specified interval. Turns off air to allow mixture to settle and opens tap to draw off wash water. Prepares soda-ash solution in mixing tank, according to formula, admits solution to vat to neutralize remaining acids, and starts agitating airflow. Tests mixture with litmus or other chemical indicator, and rewashes nitroglycerine when test is neutral. Observes transfer of nitroglycerine from vat to buggies. Keeps record of amount of nitroglycerine processed.

May transport nitroglycerine from storage tanks to mixing machines, and be designated accordingly. Nitroglycerine Distributor

8161-264 MIXER, EXPLOSIVES(explosives) DPT:685
composition mixer.

GED: 2 SVP: 3 EC: I PA: M 3 4 7

Tends machine that mixes chemicals, according to formula, for use as explosive ingredients in pyrotechnics:

Examines chemicals to ensure that colour and texture conform to specifications. Weighs prescribed quantities of chemicals, using scale. Mixes screened powders to obtain uniform blend and mixes blended material with additional chemicals, using mixing machine. Cures and dries mixture according to specified procedure.

May transport ingredients from storage to mixer or store mixture in dry room, using handtruck. May record number and date of batches mixed, and formulas used. May tend direct-and remote-controlled equipment to blend priming mixtures for small arms ammunition primers and be designated accordingly. Priming-Powder Mixer

8161-266 ACID-CORRECTION MAN(syn. fibres) DPT:685
GED: 2 SVP: 3 EC: I PA: M 4

Prepares and regulates flow of chemicals to acid-spinning bath that coagulates cellulose slurry filaments into rayon:

Meters out prescribed types and quantities of bath ingredients, according to instructions. Presses lever to dump ingredients, such as caustic soda or sulphuric acid and sodium sulphate into circulating tank for transfer to heating tank and spinning bath into which cellulose slurry is being extruded. Turns valves to control flow of mix through circulating tank, spinning baths and acid-recovery tank, adding ingredients to maintain solution at prescribed standard. Cleans equipment, using water hose.

May test acidity or alkalinity of bath at specified intervals, using pH meter.

8161-270 BATCH MIXER(soap) DPT:685
mixer operator.

GED: 2 SVP: 3 EC: I 5 7 PA: M 4 7

Tends mixer that compounds coloured cleaning, detergent and soap powders:

Measures and dumps prescribed amount of colouring agent and water into agitator tank to make colouring liquid, and opens valves to admit colouring mixture into mixer. Weighs cleaning powder ingredients, and blows them into mixer from bin, using compressed air system. Presses button to activate mixer that blends ingredients for designated period of time. Stops machine and opens valve to discharge coloured cleaning powder into storage containers.

8161-274 CARBON-BLACK PELLETIZER(chem., n.e.c.)

DPT:685

GED: 2 SVP: 3 EC: I 3 5 7 PA: L 4

Tends machines that mix and dry powdered carbon black with water or binding agents to form pellets:

Starts machine and turns valves to admit and regulate flow of water or binding agents into rotating mixing drum. Examines and feels samples of product to verify that pellet size and moisture content meet specified standards. Opens inspection ports and observes conveyor system to drier to detect jamming. Tends rotary drum that dries pellets formed by wet process. Scoops sample pellets from mixing drum and drier for laboratory analysis. Monitors operation of furnace that supplies hot air for drying.

8161-278 COATING MIXER MAN(pulp & paper) DPT:685
clayman.

GED: 2 SVP: 3 EC: I 5 PA: H 4

Tends machine that mixes and strains filling and coating material for use in making paper:

Weights and dumps specified quantities of materials, such as clay, titanium dioxide, and formaldehyde into hopper of mixing machine. Turns valve to admit metered volume of water, and starts mixing machine. Starts pumps that force mixture through straining screen into storage tanks. Lifts screen from machine and washes screen with water hose. Delivers sacks of materials to mixer, using hand truck or fork lift truck. Plans mixing according to paper production orders. May weigh and add specified quantities of colour pigments to mixture.

8161-282 COMPOUNDER, LATEX(chem., n.e.c.) DPT:685
GED: 2 SVP: 3 EC: I PA: M 4

Tends machines that mixes latex with chemicals for use in making foam rubber products:

Weights chemicals, such as sulphur and whitening agents, according to formula, and dumps them into electric mixer. Fills mixer with water and starts agitators. Opens valve and pumps chemicals into holding tanks. Pumps raw latex and chemicals from holding tanks into steam-jacketed mixing machine. Starts agitators that mix ingredients for specified time. Pumps latex mixture into tanks for storage.

May tend foamer machine that mixes air with latex for use in making foam rubber products.

8161-286 COPPER-SULPHATE MIXER(chem., n.e.c.) DPT:685

GED: 2 SVP: 3 EC: I PA: M 3 7

Tends mixing tank that blends sulphuric acid and copper sulphate for use in concentrating ores:

Weights out copper sulphate according to formula, and dumps it into mixing chamber. Opens valve to admit sulphuric acid to mixing chamber, and starts machine. Tests specific gravity and acidity to determine quality of mix, and adds ingredients to meet specified limits. Examines product to determine when mixing is completed. Turns valves to transfer fluid to settling tank and then to storage tank or trucks for shipment. Keeps record of amount of copper sulphate used. Shovels residue from mixing and storage tanks.

8161-290 FERMENTER, ANTIBIOTICS(pharm. & toil.)

DPT:685

GED: 2 SVP: 3 EC: I PA: M 4

Tends fermenting tanks and auxiliary equipment to produce active constituents of antibiotic drug products:

Starts agitator in fermenting and mixing tanks, and adds prescribed quantities of ingredients, such as salt, sugar and yeast. Turns valves to adjust pressure and temperature to conform to specifications. Starts pumps to transfer mixture to fermenting tank. Opens valves to admit water, liquid seed antibiotic, and foam- preventing oil, according to critical specifications. Unbolts lid of fermenter tank and measures level of solution, using dipstick. Turns valves to transfer mixture to crystallization tank for further processing after specified period of time.

8161-294 MILLMAN(plastic prod.; rubber) DPT:685
GED: 2 SVP: 3 EC: I 6 7 PA: M 3 4

Tends mill or mills to knead, mix and blend rubber or plastic materials for further processing by performing any combination of the following duties:

Starts machines and turns valves on steam and cold water lines to regulate temperature of rolls. Washes or cracks crude rubber or plastic slab by passing it through chemical and water sprays, or corrugated mill rolls. Lays slab between rolls of warm-up mill. Cuts stock with knife, rolls it into bundle and feeds stock back into mill until rubber or plastic reaches specified consistency. Sprinkles dry chemicals or oils on plastic or rubber to impart specified colour or improve plasticity. Sets adjustable knives against mill, roll to cut continuous strip of rubber or plastic from mill and feeds strip onto conveyor that carries it to strip-off mill for further mastication, or to calenders, extruders or tubers. Cuts and measures thickness of mill stock, using knife and gauge. Adjusts clearance between mill rolls, using hand tools.

May be designated according to specialized operation performed; for example,

Calender Warmer
Cracker Operator
Feeder-Mill Operator
Millman, Warm-Up
Mix-Mill Tender

8161-298 MIXER, ASPHALT-ROOFING MATERIAL(petrol. & coal prod.) DPT:685
GED: 2 SVP: 3 EC: I 5 6 7 PA: VH 3 4

Tends mixing machines to combine tar, asbestos fibre, asphalt, or similar ingredients, to make roof coating and cement:

Starts mixing machine and turns valve to admit asphalt into mixing machine. Observes indicator gauge and turns valve to stop asphalt flow when specified amount has entered mixing machine. Presses button to start conveyor, and dumps other ingredients onto conveyor leading to mixing machine. Reads meter to determine consistency of mixture, and manually adds materials as needed. Draws off sample of mixture for laboratory testing. Keeps record of batches made, including deviations from written formula. Observes mixing process to ensure ingredients are mixed according to formula. Cleans mixing equipment, using steam hose, brushes and rags.

8161-302 MIXER, FERTILIZER(chem., n.e.c.) DPT:685
GED: 2 SVP: 3 EC: I 5 7 PA: H 4

Tends mixing machine and auxiliary equipment that mixes ingredients to produce dry or liquid fertilizers, using one of the following methods:

1. Pulls lever to feed sulphate, phosphate and potash from feed bins into mixer. Starts mixer to mix ingredients for specified time. Stops mixer and pulls lever to dump batch of dry fertilizer onto conveyor. Collects and tags sample from each batch. Signals to have feed bins refilled, or assists in dumping bags of potash into feed bins by hand.
2. Observes gauges and turns valves to admit specified amounts of phosphoric acid and ammonia into mixer. Starts mixer to blend ingredients. Stops mixer after specified time, and turns valve to pump mixed materials into storage tank. Records weight, or volume of materials mixed.

May mix dichromate powder with water and steam to produce compound used to retard corrosion in steel fertilizer-storage tanks.

8161-306 MIXER, FOAM RUBBER(rubber) DPT:685
GED: 2 SVP: 3 EC: I PA: M 4

Tends machine that mixes foam rubber particles with liquid latex to produce mixture used in the manufacture of products, such as cushions and mattresses:

Fills hopper of mixing machine with foam rubber particles, and adds or removes particles to obtain specified weight. Pulls lever to release contents of hopper into mixer. Weighs and pours specified amount of liquid latex into mixing machine and starts machine. Places containers under discharge spout of mixer and fills them with mixture. May grind foam rubber, using powered grinding machine.

8161-310 MIXER TENDER(chem., n.e.c.) DPT:685
GED: 2 SVP: 3 EC: I PA: H 4

Tends mixing machines, agitator tanks, kettles, mills, and ancillary equipment to compound and process chemicals and other ingredients, according to formula, to make powdered, liquid, or creamed products, such as drugs, cosmetics, deodorants, tooth paste, adhesives, coating agents, polishes, or match-head compounds, performing any combination of the following duties:

Weighs and pours, pumps or shovels ingredients into mixing machines or ancillary equipment, such as sifters, mills, tanks, or kettles. Turns controls and observes gauges to achieve specified temperature. Starts agitator to mix ingredients for specified time, adding prescribed amounts of ingredients during mixing cycle. Takes sample of mixture for laboratory analysis, or tests mixture for specific gravity, viscosity, or acidity, using standard testing devices. Adds specified ingredients according to test results. Drains product into storage tanks, or pumps mixture through other machine units such as homogenizer or filter press for further processing.

May be designated according to product mixed; for example,

Coating-Solution Mixer
Match-Head Compounder
Tanning-Solution Preparer
Toothpaste-Blending-Machine Tender

8161-314 MIXER, VISCOSE(chem., n.e.c.) DPT:685
GED: 2 SVP: 3 EC: I 7 PA: L 4

Tends mixing equipment and tanks in which cellulose xanthate is formed and blended with caustic soda to produce viscose slurry for processing into rayon:

Couples feed lines and actuates controls to admit specified amount of carbon disulphide to churns (mixing chambers), previously loaded by other workers, with alkali-cellulose crumbs. Starts churns rotating, observes gauges and adjusts console controls to maintain temperature of churns and length of mixing cycles within specifications. Observes operation of mixing units that automatically form cellulose xanthate, transfer mixture to churns, and blend mixture with caustic soda to form viscose slurry. Opens valves and starts pump to transfer slurry from mixing units to holding tanks.

May test slurry for viscosity. May tend receiving tanks, filter press and aging tanks in which viscose slurry is prepared for spinning into rayon.

8161-318 PESTICIDE MIXER(chem., n.e.c.) DPT:685
GED: 2 SVP: 3 EC: I 5 7 PA: H 3 4

Tends equipment to mix chemical ingredients, according to formula, for use in such products as insecticides, deodorants and fungicides:

Weighs ingredients, using scale, and pours specified amounts of ingredients into mixer manually. Starts machine to mix ingredients for specified time, according to chart and formula. Pulls lever, or turns valves to discharge mixture into automatic container-filling machine, or observes discharge of mixture into filling-machine hopper or drums. May replace filled containers under discharge chute of mixer.

8161-322 PLASTICS-BLENDING-MACHINE TENDER(chem., n.e.c.) DPT:685
GED: 2 SVP: 3 EC: I 5 7 PA: H 3 4

Tends machine that blends powdered or liquid plastic materials into compounds for subsequent processing or fabricating:

Measures or weighs materials in powdered or liquid form, according to formula, using scale and measuring containers. Pours ingredients into mixing chamber of paddle-type blender, feed hoppers or conveyors from sacks or containers. Starts blender or pump, by pressing switch, to spray plasticizer into blender and mix ingredients. Turns handle to set automatic timer, or stops mixing machine after specified time. Opens valve at bottom of blender, to discharge blended materials into carts or containers. Weighs carts and adds or removes portions of materials to adjust weight or mixture to specified blend, using shovel or scoop.

May record amounts of mixed materials used. May tend mixer equipped with crushing or screening mechanism that reduces or sifts materials to particles of uniform size.

8161-326 POWDER BLENDER(explosives) DPT:685
GED: 2 SVP: 3 EC: I 6 PA: L 4

Tends equipment that blends various types of propellant powders, according to formula, for use in small-arms ammunition: Examines and verifies powder with identifying data on container and type of powder specified on work order. Pours powder from containers into partitioned hopper, and turns knobs to adjust rate of flow from hopper compartments to mix and blend powder according to formula. Verifies accuracy of hopper adjustment by drawing powder sample from each hopper compartment, using stop watch to time flow, and weighing samples to calculate rate of flow, or by starting agitator that shakes powders into blending tube, separating blended powders according to size, using sieve, and weighing each size. Readjusts hopper controls as indicated by rate-of-flow or sieve test until powder proportions match specifications. May tend tumbling machine to blend ingredients. May charge rim-fire cartridges with wet priming composition by hand.

8161-330 PROPELLANT BLENDER(explosives) DPT:685
GED: 2 SVP: 3 EC: I 6 PA: H 4

Tends equipment that blends batches of propellant powder to obtain final product having uniform ballistics properties: Pushes button in control room to activate machinery that transfers powder back and forth continuously between top and bottom bins to effect thorough mixing. Opens vent in bottom bin to dump powder into containers for storage or further processing. Moves containers with hand truck between magazine and storage areas. May tend water or air circulating driers. May direct workers engaged in charging top bin of blender with powder. May tend mixer that blends tetryl powder and graphite for further processing into pellets and be designated, Tetryl Blender

8161-334 TEXTILE-TREATMENT-SOLUTION MIXER(chem., n.e.c.; textile) DPT:685
GED: 2 SVP: 3 EC: I 7 PA: M 4 7

Tends equipment that mixes chemicals for use in bleaching, cleaning, mercerizing and finishing textile yarns and fabrics: Weighs or measures ingredients, such as peroxide, silica, caustic, solvents, emulsions, resins, starches and detergents according to formula, using scales or measuring containers. Pours ingredients from pail, or turns valve to admit specified liquids into mixing tank. Presses switch to start mixer, and allows solution to mix for specified time, or mixes solution with paddle. Turns valve to transfer solution from mixing tank to storage tanks or to machines in department. Tests solutions in storage tanks, using hydrometer, viscosimeter, or by titration to detect variations from standards. Adds necessary ingredients to restore solution to standard strength. Records test results, batches of solutions mixed, and chemicals used in each batch for production and inventory purposes. Turns valve to inject steam into solution to dissolve ingredients or cook solution to specified consistency.

8161-336 MIXER HELPER, WALLPAPER COLOUR(chem., n.e.c.) DPT:687
GED: 2 SVP: 3 EC: I PA: M 4 7

Helps colour mixer to mix raw colours into colour-base required for ground-coating and printing of wallpaper: Draws specified amounts of raw colour and colour base from storage tanks, using pails. Moves ingredients to mixing area, using hand truck. Mixes raw colour into colour base, following oral instructions, using measuring cups, jugs and paddle to obtain desired tints and shadings. See also definition for term title, 02-160 HELPER (any ind.).

8161-338 BATTERY-ACID ADJUSTER(chem., n.e.c.) DPT:684
GED: 2 SVP: 2 EC: I PA: L 4

Adjusts specific gravity of lead-acid battery electrolyte in mixing tank, by adding concentrated sulphuric acid or distilled water as required: Determines temperature and specific gravity of sulphuric acid solution, using thermometer and hydrometer. Turns valves and starts pumps to transfer water or acid to mixing tank as indicated by temperature and specific gravity readings. Controls flow of acid into tank to prevent undue rise in solution temperature, and opens valve to admit cooling

water to heat-exchanger as required. Turns valves and starts pumps to pump adjusted acid solution into storage tank.

8161-342 THINNER(paint & varn.) DPT:585
GED: 2 SVP: 2 EC: I 5 7 PA: H 3 4

Tends equipment to mix oils, resins, solvents and other liquid ingredients with paint products or materials, such as paint pigment, paste and varnish, to thin products: Weighs, lifts and dumps pails of specified ingredients into mixer. Turns valves on storage tank to admit specified liquids into mixer. Presses switch to start power agitator to blend ingredients. Turns valves or starts pump to transfer batch to storage tank or clarifying machine. Writes identifying code on tank, and records quantities and types of ingredients added to batch. May be designated according to mixture thinned; for example, Bulk-Pigment Reducer Paste Thinner Varnish Thinner

8161-346 GLUE BLENDER(chem., n.e.c.) DPT:685
GED: 2 SVP: 2 EC: I PA: H 4

Tends machine that blends specified types of powdered or granulated glue: Selects designated containers of glue and additives, such as tallow and zinc sulphate, and transfers containers to blending machine by hand or by use of hand truck. Dumps glue and additives into hopper, and starts machine that blends ingredients. Stops machine after specified period of time, and pulls levers to drain mixture from machine into bags or drums. Weighs filled containers. May weigh and mix ingredients according to formula, to prepare various types of glue or adhesives in small batches, by hand or using portable mixer.

8161-350 GROUND MIXER(chem., n.e.c.) DPT:685
claymill man.
GED: 2 SVP: 2 EC: I 7 PA: H 3 4

Tends machines that mix sizing compounds and powdered clay for use as background or colour base coating on wallpaper: Measures and mixes ingredients in electric mixer to make sizing compounds. Shovels powdered clay from bulk storage into wheelbarrow, dumps clay into clay mill, and turns valve to add water. Turns valve to release specified quantity of sizing compound from mixer into clay mill, and starts electric paddle to mix ingredients. Presses switch to pump solution from clay mill into holding tanks.

8161-354 PULP-BLEACH-LIQUOR MAKER(chem., n.e.c.) DPT:685
GED: 2 SVP: 2 EC: I 7 PA: L 4 7

Tends chemical reaction vats and mixing equipment to produce pulp bleaching solution: Presses switch to start pump, and opens valves to start flow of chlorine and sodium hydroxide into chlorinating tanks according to specifications. Starts agitator in tank to mix ingredients to form sodium hypochlorite bleaching solution. Makes titration test to determine completion of chemical reaction, using standard test equipment. Pumps bleach solution to storage tanks. May control reaction cells and absorption tower in which chlorine dioxide bleaching gas is formed from sodium chlorate. May connect pipe and hose lines to tank cars containing chlorine gas or other chemicals, using hand tools.

8161-358 SCREENER-AND-BLENDER TENDER.
COKE(petrol. & coal prod.) DPT:685
GED: 2 SVP: 2 EC: I 5 6 PA: L 4

Tends machine that sifts and blends coarse and fine ground coke: Dumps coarse coke from chute onto vibrating screens. Starts screener to sift foreign materials from coke. Starts conveyors to carry sifted coke from screening area and fine ground coke from storage bins to top of blending hoppers. Dumps coarse and fine coke into blending hoppers, and starts rotary blender blades to mix them. Turns valves to release mix from blenders into storage hoppers.

8161-362 SODA-ROOM MAN(chem., n.e.c.) DPT:685
 GED: 2 SVP: 2 EC: 1 PA: M 4

Tends equipment to make soda cleaning solution used in beer bottle-washing machines:

Dumps bags of specified chemicals into mixing tank, and opens valve to add desired amount of water. Starts pump that transfers chemical solution to tank containing concentrated soda. Observes gauges and turns steam valve to heat solution to required temperature. Pumps used soda from washing machines into separators and settling and storage tanks, to remove solid matter and clarify solution. Opens hoppers in settling tanks to dump solid refuse into trucks or onto floor. Connects hoses and starts pumps to transfer concentrated soda from tank car or truck to storage tanks. Washes separator, settling tanks and floor, using hose.

May verify correct water level in tanks and strength and temperature of chemical solutions by reading gauges and thermometers.

8161-366 SOLUTION MAN(chem., n.e.c.) DPT:685
 GED: 2 SVP: 2 EC: 1 5 7 PA: M 4 7

Tends equipment that mixes chemicals and other ingredients in batch lots, to produce solutions for coating, impregnating or processing plastic materials:

Measures and weighs specified quantities of ingredients, such as sulphur, acid, resins, plasticizers and dyes, according to formula, using scale and graduates. Dumps ingredients manually into mixing machine or drum. Lowers agitator into vat or drum, using manual or electric chain hoists. Presses button to start agitator to mix ingredients. Draws sample of mixture for laboratory analysis, after mixing for specified time. Adds ingredients as required, using hand scoop, until batch meets specifications. Turns valves to discharge solution through strainer to storage container, or removes agitator and transfers drum to storage area, using hand truck.

May prepare and attach batch ticket to drum, listing date, type of mixture, quantity and other data. May replace strainers, using wrench.

8161-370 PLASTICS-BLENDING-MACHINE-TENDER HELPER(chem., n.e.c.) DPT:566
 GED: 2 SVP: 2 EC: 1 5 7 PA: H 3 4

Helps tend machine that blends plastic materials for subsequent processing or fabricating:

Transports materials from storage areas, using hand or fork lift truck. Empties drums, using bung wrench, and turns valves to admit liquid ingredients into blending tanks. Weighs sacks of dry materials such as clay, carbon black or powdered vinyl, on platform scale and records weight. Opens sacks, using knife, and dumps dry materials into blending machine. Presses switch to start agitator to mix ingredients. See also definition for term title, 02-160 HELPER (any ind.).

8161-374 CATALYST-OPERATOR HELPER, GASOLINE(chem., n.e.c.) DPT:586
 GED: 2 SVP: 2 EC: 1 5 7 PA: H 2 4

Helps equipment operator load specified amounts of chemicals into mixers and dryers to make catalysts used in the manufacture of high octane gasoline:

Loads material into mixing tanks by hand. Places pans in dryers, and empties caustic soda into containers on scale. Writes weight and nature of contents on label, and moves containers by hand truck to processing or storage areas. See also definition for term title, 02-160 HELPER (any ind.).

8161-378 CRUTCHER-OPERATOR HELPER(chem., n.e.c.) DPT:666
 GED: 2 SVP: 2 EC: 1 PA: VH 4 6

Helps operate crutchers (steam-jacketted equipment) to mix liquid and solid ingredients by machine to form slurry for processing into soap: Opens valves of supply tanks and waterlines as directed, to add prescribed liquid and paste ingredients. Weighs out and mixes dye and chemical solutions according to specifications, and dumps mixture into feed hoppers of crutchers. Changes and cleans strainers. See also definition for term title, 02-160 HELPER (any ind.).

8163-FILTERING, STRAINING AND SEPARATING OCCUPATIONS, CHEMICALS AND RELATED MATERIALS

This unit group includes occupations concerned with operating and tending equipment that treats chemicals and related substances by means such as agitating, centrifuging, filtering, screening, settling, straining, sifting and squeezing.

8163-110 BITUMEN-EXTRACTION-PLANT OPERATOR(petrol. & coal prod.) DPT:682
 crude oil treater.
 GED: 3 SVP: 6 EC: 1 5 7 PA: L 2 3 4 7

Operates primary and final extraction plant units that separate bitumen from oil sands for further processing:

Operates switches to control conveyor belts that transport oil sands into primary extraction conditioning tanks. Turns valves and operates pumps to admit steam, water and caustic soda into conditioning tanks. Operates pumps to transfer slurry to cells that automatically separate sand from bitumen. Monitors automatic system that transfers liquid bitumen to final extraction tanks. Turns valves to admit specified diluents into final extraction tanks. Monitors temperature controllers that maintain required temperatures in extraction tanks. Operates pumps to transfer liquid bitumen into series of centrifuges. Starts centrifuges and adjusts rotation speeds to further remove waste materials from liquid bitumen. Turns valves and operates pumps to transfer extracted bitumen through heaters that burn off remaining waste materials. Collects bitumen samples from processing areas by bleeding feed lines or releasing valves in automatic sampling lines. Patrols processing area to inspect operating equipment and reports defects to maintenance department. Records production data in shift logbook.

May operate either primary or final extraction plant units and be designated according to type of work performed; for example, Final-Bitumen-Extraction Plant Operator
 Primary-Bitumen-Extraction Plant Operator

8163-114 FILTER OPERATOR(chem., n.e.c.) DPT:682
 GED: 3 SVP: 6 EC: B 7 PA: M 2 4

Operates tilting-pan filter unit and related equipment that separates phosphoric acid from slurry produced by reaction of sulphuric acid on phosphate rock:

Starts tilting-pan filter unit, pumps, vacuum pumps, and tank agitators. Turns valves and observes instruments to maintain slurry flow rates within specifications. Regulates speed of filter unit so that each pan moves successively under specified number of acid and wash systems to separate gypsum crystals from slurry. Pumps slurry to thickener unit where phosphoric acid settles out from concentrated slurry. Turns valves and operates pumps to transfer phosphoric acid to processing area and gypsum sludge to waste disposal area. Inspects equipment and notifies supervisor of abnormal conditions. Records operational data in logbook.

May replace filter cloths in tilting-pan filter unit. May replace process lines, using hand tools.

8163-118 CAUSTIC OPERATOR(chem., n.e.c.) DPT:662
 GED: 3 SVP: 5 EC: B 5 6 7 PA: L 4 7

Controls equipment that converts recovered green liquor into white liquor used for cooking wood chips in pulp manufacturing process:

Observes dials, charts, flowmeters and signal lights on panel to determine level and temperature of solution in lime slakers and level of lime sludge in clarifiers. Operates pumps and screw conveyors to control flow of dry lime and recovered chemicals into lime slakers, causticized solution through clarifiers to storage, and lime sludge through washers to storage tanks. Obtains samples of causticized chemicals, and performs titration tests to determine alkalinity of

solutions. Maintains liaison with other operators to ensure continuous process flow. Patrols processing area to inspect operating equipment and reports defects to maintenance for corrective action. Records shift production data, test results and equipment performance in logbook.

8163-122 BENZOL AGITATOR OPERATOR(petrol. & coal prod.) DPT:682
benzene-washer agitator.

GED: 3 SVP: 5 EC: I 5 7 PA: L 2 4 7

Controls agitator tank to wash benzol, benzene, toluene and xylene with sulphuric acid and caustic soda to remove impurities:

Turns valves and starts pumps to charge agitator vessel with specified amount of benzol or derivatives. Drains measured quantity of acid into vessel and starts agitator to mix contents for specified time. Stops agitator to allow acid and sludge to settle. Obtains sample of washed product for laboratory colorimetry test to determine need for further washing. Opens valve, using wrench to drain excess acid and sludge. Adds caustic soda solution to neutralize remaining acid, and measures alkalinity, using standard titration test. Adds water, agitates mixture to wash out traces of caustic, and drains off water after contents have settled. Pumps washed benzol or derivatives into storage tank. Turns valves to admit steam to sludge kettle, to solidify sludge. Lifts cover from kettle, using chain hoist, and removes sludge.

8163-126 DESULPHURIZER OPERATOR(petrol. & coal prod.) DPT:682
purification-plant operator.

GED: 3 SVP: 5 EC: B 5 7 PA: M 4 7

Controls equipment, such as vats, drum-filter, thionizer and absorber tower, arranged in series, to recover sulphur from coke-oven gas:

Turns valve to admit coke-oven gas into absorber tower. Starts pumps to force solution containing arsenic compound and soda ash through tower. Pumps resulting foul solution into thionizer tower. Opens compressed air, and precipitating sulphur valves to form froth. Turns valve to drain off froth. Pumps slurry into drum-filter and vats to separate slurry and wash salts from caked sulphur. Determines alkalinity of absorbing solution, by conducting titration tests. Adds soda ash or arsenic to adjust to specifications. Observes meters and gauges to control temperature of solution. Punches dirt from holes in absorber tower, using bar. Records production data in logbook. May operate furnace to burn foul or impure gas removed during purification process.

8163-128 ACIDULATION PLANT TENDER(animal & veg. oil) DPT:665

GED: 3 SVP: 5 EC: I 7 PA: M 4 7

Tends acidulation tanks that separate oil from fish liquor, fats, tallows, or refinery sludge:

Turns valves to fill ingredient tanks with alkali and specified amounts of sulphuric acid. Starts agitator that mixes ingredients. Tends mechanical separators. Starts pumps or opens drain valve to transfer separated material into storage tanks. Oversees activities of centrifuge and filter operators.

8163-130 NITROGLYCERINE SEPARATOR(explosives) DPT:662

GED: 3 SVP: 4 EC: I 6 7 PA: L 4 5 6 7

Operates equipment such as gravity separator and wash tanks to separate and recover nitroglycerine, preparatory to processing into explosives:

Turns valves and operates controls to charge wash tank with specified quantity of soda and water in preparation for nitroglycerine. Directs other worker to transfer mixture of spent acids and nitroglycerine from batch nitrator to separator. Removes spilled mixture from floor, using mop. Allows mixture to settle in separator for specified time so that nitroglycerine collects and floats on top of acids. Observes mixture through tank sight glass to confirm that separation has occurred. Turns petcock to drain acids into trough leading to spent acid storage area. Observes liquid flowing from spigot to detect colour change that indicates nitroglycerine is flowing, and directs flow of nitroglycerine into wash tank. Operates controls to agitate and wash nitroglycerine for specified time. Monitors tank thermometer to detect heat accumulation that could cause explosion, and is prepared to operate controls to dump tank contents into emergency tank if

explosion appears imminent. Confers with associate worker by telephone, to obtain clearance, and operates pump to transfer washed nitroglycerine into neutralizer. Cleans tanks and troughs at end of shift, using hose and soda solution. Records shift production data and equipment performance in logbook.

May tend equipment to transfer glycerine and acid to nitrator and neutralize spent acids from separator and be designated accordingly, Glycerine and Acid Man

8163-134 ION-EXCHANGE OPERATOR(non-ferrous metal) DPT:682

GED: 3 SVP: 4 EC: I 4 6 7 PA: L 4

Operates continuous flow process to recover uranium from solution, through ion exchange process:

Turns valves and operates pumps to fill ion exchangers with synthetic resins that act as uranium collectors. Activates system that automatically controls flow of uranium sulphate slimes and waste materials into tanks where uranium is deposited on surface of collectors through ion exchange process. Monitors automatic system that drains exchangers after specified period of time, flushes out slime residue, and refills exchangers with nitric acid solution to dissolve uranium from surface of collectors. Obtains samples of solutions at specified stages of processing and conducts pH and titration tests, using laboratory equipment. Patrols processing area to inspect operating equipment and reports defects to supervisor. Maintains shift log of production data.

8163-138 PLASTICS-STRAINER OPERATOR(plastic prod.) DPT:682

extruder-strainer operator.

GED: 3 SVP: 4 EC: I PA: M 4 7

Operates machines such as roller mill and filter extruder to remove foreign matter from plastics material:

Operates roller mill to knead, mix, and blend plastic materials to specified consistency. Adjusts machine knives against mill roll to cut continuous strip as plastic dough emerges from mill. Selects and installs specified screen pack assemblies and die heads in extruder, using hand tools. Adjusts controls of extruder screw feed, according to pressure gauge reading. Feeds strip of plastic dough from roller mill into hopper of extruder strainer. Operates switches to start extruder that forces plastic dough through screen pack assemblies and discharges strained material onto calender rollers. Replaces worn extruder screen packs and cleans die heads and cylinder, using hand tools, brushes, scraper and solvent. Maintains logbook of shift production and equipment performance.

8163-142 PURIFICATION OPERATOR(chem., n.e.c.) DPT:682

GED: 3 SVP: 4 EC: I 7 PA: L 4

Controls gas scrubbers and related equipment to remove impurities from hydrogen made from natural gas:

Observes temperature, flow, and pressure gauges, and moves controls to effect operating equilibrium in equipment, according to plant procedures and correlation of instrument readings. Reads instruments to determine efficiency of gas scrubbing fluid. Turns valves to maintain solvent at specified strength, temperature, and volume in scrubber. Operates solvent reclaimer equipment that recovers and refines solvent for re-use in system. Takes corrective action when abnormal conditions occur, such as loss of power, air, water, steam, gas or solvent, according to plant procedures. Patrols processing equipment to detect abnormal conditions. Records gauge readings, results of laboratory sample analysis, and equipment performance in shift logbook.

May operate gas-scrubbing and related equipment to remove impurities from air to be used in the production of oxygen, nitrogen and argon.

8163-146 RECOVERY MAN(soap) DPT:682

GED: 3 SVP: 4 EC: I 3 4 6 7 PA: M 4

Operates equipment such as scrubbing tower and wash tanks that recover soap or detergent dusts from spray-tower exhaust system:

Starts fan that draws air and accumulated dust from spray-tower exhaust system into scrubbing tower. Operates steam pump that wets dust to convert it into heavy droplets that flow down baffle plates to bottom of tower. Controls pumps to process light slurry through heating coils to produce slurry of specified consistency. Turns valves to transfer recovered slurry into wash tank that removes contaminants.

Operates pumps to pump washed slurry through screen unit and scale tank into crutcher. Cleans piping, tanks, valves, screens and scrubbing tower, using steam hose and hand tools. Records shift production data and equipment performance in logbook. May operate crutcher to mix specified quantities and types of liquid, powder and paste ingredients, to form slurry used for subsequent soap production.

8163-150 SETTLER-FILTERER(chem., n.e.c.) DPT:682
GED: 3 SVP: 4 EC: I 6 7 PA: M 4 7

Controls equipment such as tanks, filters and pumps to remove sludge from titanium liquor used in production of titanium dioxide pigments. Starts pumps to transfer specified quantity of titanium liquor from storage tank into settling tank. Turns valves to admit metered quantities of chemicals into mixing tank. Adds specified quantity of glue crystals, manually. Operates mixing tank agitator for prescribed period of time. Starts pumps to transfer specified quantity of mixed reagent from mixing tank into settling tank. Controls state of settling, using gauged dipstick, and transfers top layer into holding tank, using vacuum device. Opens valve to drain remaining sludge into sludge-holding tank. Pumps sludge through rotary filter. Obtains sludge samples and performs specific gravity tests, using hydrometer. Maintains rotary filters, mixing and settling tanks in accordance with operational standards. Records production data in shift logbook.

8163-154 VISCOSER FILTERMAN(chem., n.e.c.) DPT:682
GED: 3 SVP: 4 EC: I 7 PA: L 4 7

Controls equipment that filters, transfers, ages, and removes bubbles from viscose fluid used in production of cellulose film or synthetic staple fibre. Turns valves and operates pumps to transfer viscose from blending station through filter presses to remove impurities. Observes filtering cycle and transfers viscose to vacuum tanks to remove air bubbles from fluid. Monitors gauges and adjusts controls to maintain specified incubation temperature, fluid pressure, and feed rate in equipment and associated process lines. Controls tanks that age viscose for specified time to prepare for transfer to synthetic fibre or film casting units. Records production data such as aging time, viscose output and gauge readings in shift logbook. Reports processing equipment defects to maintenance for rectification.

8163-155 FILTER-PRESS TENDER(any ind.) DPT:685
filter-press man.
GED: 3 SVP: 3 EC: I 4 PA: M 4

Tends filter presses that remove sediment, impurities and insoluble materials from liquid concentrations and compounds, such as slurries, chemical solutions, liquors and sugar. Covers filter plates with filtering medium, such as cloth, canvas or paper. Closes press, causing plates to come together, forming seal. Dumps filtering aids, such as diatomaceous earth or sawdust, into mixing tank with liquid to be filtered, and starts agitator. Pumps liquid or slurry through presses. Stops pumps when specified pressure is indicated on gauges or when filtering cycle is completed. Examines filtrate, and draws samples for laboratory analysis. Cleans filtered impurities from frames, screens, and filters, using water, steam, or compressed air. Opens filter press, dislodges solid materials from between frames, and replaces filtering medium. May tend closed system press. May be designated according to type of press operated or by product filtered; for example, Gold-Precipitate Filterer(non-ferrous metal) Pigment Filterer(chem., n.e.c.) Plate-and-Frame Operator(any ind.) Resin Filterer(paint & varn.) Salt Filterman(mining & quarrying) Sludge Filterman(any ind.) Varnish Filterer(paint & varn.)

8163-156 WAX BLEACHER(misc. prod. fab., n.e.c.) DPT:685
GED: 3 SVP: 3 EC: I PA: M 3 4

Tends vats and filter presses that bleach wax. Dumps wax into heated vats, and sets thermostat to prescribed temperature, to liquefy wax. Adds water to liquid wax and boils mixture for specified period to dissolve sugar. Packs granulated charcoal on sides of filter press and starts pump to circulate molten wax through press. Stops pump after specified time, and takes sample

for laboratory analysis. Turns valves or starts pumps to transfer wax from press to tanks. Attaches hose to tank and fills trays with molten wax for storage. Records types and quantities of wax used.

8163-158 BRINEMAN(chem., n.e.c.) DPT:665
GED: 2 SVP: 4 EC: B 7 PA: L 4 7

Tends tanks, filters and related equipment to produce brine solution for use in electrolytic cells. Pumps water through salt beds to produce mixture of specified salinity. Turns valves to admit brine and specified quantities of liquid chemicals such as caustic soda, acid, or lime into mixing tank to produce electrolyte to specifications. Pumps solution to settling tank to settle out impurities, and through sand-bed filters for final clarification. Obtains sample of electrolyte for laboratory analysis or tests density, salinity, and acidity, using hydrometer, salinometer, and pH meter. Turns valves to transfer electrolyte to electrolytic cells. Maintains liaison with caustic or chlorine plants to adjust chemical composition of electrolyte or adjust quantity supplied to tanks and cells. May operate filters and related equipment to refine potash from brine and be designated accordingly, Brineman, Potash

8163-162 NAPHTHALENE TENDER(petrol. & coal prod.) DPT:665
GED: 2 SVP: 4 EC: I 6 7 PA: M 3 4 7

Tends equipment to separate naphthalene from chemical drain oil used to wash coke-oven gas or tar distillate. Starts pumps to transfer drain oil from scrubbing tower to collecting tank where naphthalene crystallizes as oil cools. Opens drain valves or starts pumps to transfer oil from pans to storage tanks. Dumps naphthalene into centrifuge to remove remaining oil. Removes naphthalene from centrifuge and dumps or shovels it into steam-heated tank to melt and further purify it. Starts pumps to transfer liquid naphthalene into storage tanks or railroad tank cars. Reports equipment malfunction or irregular colour of product to foreman. May obtain sample from melting tank for laboratory analysis. May lubricate equipment and clean work area. May perform a portion of above duties and be designated accordingly; for example, Centrifugal-Drier Tender Naphthalene Clarifier

8163-168 STRAINER TENDER(rubber) DPT:665
GED: 2 SVP: 3 EC: I PA: M 4 7

Tends machine that strains metal particles and other foreign material from scrap rubber. Starts conveyors, opens chute, or shovels scrap rubber into hopper of strainer. Starts machine that forces scrap rubber through strainer screen. Regulates speed of machine and conveyors to prevent jamming. Discharges strained scrap rubber into conveyors or hand trucks for transfer to refining mills. Opens water valves to prevent overheating of machine and scorching of rubber. Inspects colour and appearance of strained rubber to ensure that foreign material is removed. Replaces clogged and worn strainer screens, using hand tools. Signals drying and milling department workers to maintain specified flow of scrap rubber through strainers. May tend magnetic device to remove ferrous metal from rubber. May fill containers with screened rubber.

8163-170 CHILLER TENDER(chem., n.e.c.) DPT:685
GED: 2 SVP: 3 EC: I 4 7 PA: L 4

Tends chiller and centrifugal drier to crystallize caustic soda in solution and to remove liquid from crystallized product for subsequent salt recovery. Turns valves and operates pumps to transfer caustic soda solution and water into dilution tank. Obtains sample and conducts specific gravity test, using hydrometer. Turns valves and operates pumps to pump solution through refrigerating unit and into chiller. Adjusts controls to regulate temperature and crystallization of slurry. Turns valves to regulate slurry output feed into centrifugal drier. Tends centrifugal drier to reduce liquid component of slurry for final evaporation and salt recovery. Inspects processing equipment and reports defects to maintenance for rectification. Examines piping and equipment and flushes lines, using hose. Maintains log of production data.

8163-174 DEHYDRATING-PRESS TENDER(explosives) DPT:685

GED: 2 SVP: 3 EC: 1 6 PA: M 4

Tends press that removes water from nitrocellulose used in manufacturing propellant powder:
Pulls rope to dump specified amount of nitrocellulose into bottom of cylinder of dehydrating press. Opens valve to force plunger to bottom of cylinder. Turns valve and operates pump to pump alcohol into lower cylinder and through wet nitrocellulose to displace water. Removes cakes of dehydrated nitrocellulose and places them on hand truck.
May verify weight of dehydrated nitrocellulose slabs, using platform scale. May clean equipment and work area.

8163-182 LIQUOR MAKER(chem., n.e.c.) DPT:685
leacher.

GED: 2 SVP: 3 EC: 1 PA: L 2 4

Tends conveyor system and recovery tanks to produce and regenerate liquor for pulp processing:
Starts conveyor and opens chute to charge recovery tanks with specified amount of black ash. Opens valves to fill recovery tanks with weak lime ash solution. Starts agitators to stir ingredients. Obtains samples of resultant solutions, and tests for concentration of lime ash, using hydrometer and reference charts. Starts pumps to circulate liquor through recovery tanks until test samples contain specified concentration of lime ash. Turns valves and operates pumps to transfer concentrated liquor into storage tanks. Pulls lever to open drain to remove insoluble charcoal residue from recovery tanks.
May clean empty tanks, using hose and scraper.

8163-186 OIL RECLAIMER(chem., n.e.c.) DPT:685

GED: 2 SVP: 3 EC: 1 5 PA: L 4

Tends equipment that purifies coolant oils from rolling mill machines:
Obtains samples from oil systems on rolling mill machines, periodically, for laboratory analysis. Opens valves and starts pumps to transfer oil to settling tanks to allow it to settle for specified time. Reclaims used oil by pumping through filtration unit or centrifuge into oil storage tank. Adds specified chemicals when laboratory tests indicate need for such action. Turns valves to add new oils to system when required. Inspects filters on filtration unit and replaces filter elements as required, using hand tools.

8163-190 PAN TENDER(chem., n.e.c.) DPT:685

GED: 2 SVP: 3 EC: 1 3 4 PA: L 2 4 7

Tends equipment, such as settlers and thickeners to concentrate calcium chloride solutions to specifications:
Turns valves and operates pumps to start flow of calcium chloride solutions from storage tanks through series of pans. Opens valves to admit specified amounts of liquid chlorine into processing units. Patrols processing area to detect leaks and malfunctioning equipment. Obtains samples of products, and conducts titration and specific gravity tests, using standard techniques and equipment. Turns valves to drain and flush chemical residues from pans and lines, as directed by operator. Records temperature and pressure readings, and monitors gauges or recording charts to ensure safe operating conditions.

8163-194 SCREENER(explosives) DPT:685
dope-house man.

GED: 2 SVP: 3 EC: 1 5 7 PA: H 4

Tends machine that separates particles of dry materials to sizes required for dynamite manufacturing by passing them through oscillating screens, and weighs them into specified quantities:
Bolts or clamps screens of specified mesh to machine frames, using hand tools. Shovels or pours dry materials into hoppers manually or by operating hoist. Positions buggies under screens to receive sifted material and removes when full. Weighs sifted material on platform scale and dumps into drums or trucks for processing by other workers. Records shift production data in logbook.
May lubricate machine and associated equipment.

8163-198 SCREENMAN, COKE(iron & steel; petrol. & coal prod.) DPT:685

screen tender, coke.

GED: 2 SVP: 3 EC: 1 5 6 7 PA: L 2 4

Tends shaking screens that screen coke to specified size and conveyor that loads it into bins:
Starts conveyor and screens by pressing switches. Opens chutes to load or unload coke. Turns handwheel to adjust vibration rate of screens. Assists in changing vibration coils and in splicing belts, using hand tools. Cleans walks and floors, using broom and shovel. Lubricates screen mechanisms and conveyors using grease gun and oil can.
May patch screens. May operate car puller to spot railroad cars under bins and open chute to load railroad cars.

8163-206 WASHER AND DRIER(plastic prod.) DPT:685

GED: 2 SVP: 3 EC: 1 5 PA: L 4

Tends washing tank and rotary vacuum drier to wash and dry emulsion of polymerized plastic materials, such as acrylic resins, for processing into powder:
Pulls lever to transfer emulsion of polymerized plastic material from storage vessel into washing units. Opens valves to drain liquid from plastic materials. Moves controls to specified setting to rinse plastic materials. Operates switches to dump plastic materials onto conveyor that transfers them into rotary vacuum drier for specified time. Turns steam valves and adjusts controls to heat jacket of drier and to apply vacuum to drying chamber. Operates control switches to remove plastic materials from drier on completion of cycle and conveys materials to packaging department.

8163-210 SPINNERET PACK PREPARER(syn. fibres) DPT:684

GED: 2 SVP: 2 EC: 1 PA: M 4 7

Fills spinneret packs with measured amount of treated sand to filter impurities from molten nylon before extrusion into filaments:
Inspects orifices at base of pack for clogging or damage, using microscope. Weighs out, and pours, prescribed amounts of graded and treated sand into pack, according to type of nylon to be spun. Disassembles used packs, pours out sand, and cleans pack with soapy water or ultra-sonic cleaner and compressed air.
May assemble pack using torque wrench to tighten bolts. May inspect pack assembly units.

8163-214 NITROCELLULOSE FINISHER(explosives) DPT:585

GED: 2 SVP: 2 EC: 1 5 6 PA: M 4

Performs any combination of the following duties to remove acids and impurities from nitrocellulose used in manufacturing explosives:
Turns valves to admit batch of nitrocellulose slurry to boiling tub. Operates controls to boil slurry for specified time. Tests solution to obtain specified degree of acidity, using titration test. Turns valves to transfer boiled nitrocellulose into stabilizing tub. Transfers nitrocellulose into beater, using special fork. Starts beater and opens valve to force slurry against blades. Starts pumps to transfer beaten slurry over sieves into poaching tubs. Obtains sample of batch for laboratory analysis. Turns valves to admit water and steam to boil mixture for specified time. Opens valves to decant water and adds fresh, hot water to clean contents. Adds specified weight of chalk. Adjusts valves to start charge circulating through lines to centrifugal wringer. Removes wringer charge to drum-filling hopper, using mechanical scraper units. Opens hopper door to fill drums with nitrocellulose. Weighs drums on platform scale and records weight. Installs covers and rolls drums on edge to storage area. Records production data in logbook.
May tend a particular piece of equipment and be designated accordingly; for example,
Beater Tender
Boiling-Tub Tender
Centrifugal-Wringer Tender
Poacher Tender

8163-216 NITROCELLULOSE SCREENER AND WEIGHER
(explosives) DPT:685
GED: 2 SVP: 2 EC: I 6 PA: M 3 4 7

Tends mechanical screener that prepares nitrocellulose, for use in making explosives:
Rolls barrels of nitrocellulose from storage to screen area and removes lids, using wrench. Positions and adjusts non-sparking screen of specified mesh in mechanical screener, using hand tools. Starts screener and shovels nitrocellulose from drum onto screen, using wooden or aluminum scoop. Collects screened nitrocellulose in rubberized bags and weighs it into batches. Records weight of nitrocellulose in each bag on slip. Loads bags on handtruck and pushes to mix house. Verifies accuracy of scales daily, using standard weights. Cleans floor with broom, and washes floor and equipment daily, using mop and rags.

8163-218 CENTRIFUGE TENDER(soap) DPT:685
GED: 2 SVP: 2 EC: I PA: H 4

Tends centrifuge and related equipment to separate salt from glycerine-salt slurry for recovery action in soap manufacturing:
Turns valves and operates switches to blow glycerine-salt slurry batch into centrifuge tank, using air pressure. Sets timer and regulates control switch to start centrifuge slowly, and gradually increases speed. Turns valve to discharge glycerine liquid into recovery tank. Monitors controls that regulate temperature of water and lye rinses. Opens centrifuge at end of cycle and operates mechanical plow that forces salt from inner walls into recovery drums.
May tend filter press and related equipment to filter and bleach chemically pure glycerine.

8163-222 INK PURIFIER(chem., n.e.c.) DPT:685
GED: 2 SVP: 2 EC: I 7 PA: L 4

Tends automatic equipment that grinds carbon black, for use in printing inks, and separates impurities from ground materials:
Turns valves and operates pump to transfer ink slurry from holding tank to colloid mill. Starts mill that grinds ink slurry for predetermined time to obtain specified fineness. Turns valve on mill tank to allow slurry to flow into centrifuge. Operates centrifuge for specified time to remove impurities from ink slurry. Turns valves and operates pump to transfer purified ink to storage tank. Opens valve to draw ink sample into sampling jar for laboratory analysis. Cleans residue from centrifuge periodically, using scraper.

8163-226 MERCURY RECOVERER(chem., n.e.c.) DPT:685
mercury washer.
GED: 2 SVP: 2 EC: I 6 7 PA: H 3 4

Tends equipment that recovers and purifies mercury used in electrolytic cells:
Sweeps, shovels, and dumps mercury-bearing material onto vibrating screen that separates mercury. Flushes screen with water, using hose, and drains off water into settling tank, to form sludge. Ladles contaminated mercury and sludge into reclaiming kettle and turns valves to admit acid and steam to separate foreign matter from mercury. Drains mercury into flask.
May break used cell anodes to salvage porcelain insulators and copper posts, using hammer. May tend concentrating table to remove mercury residue from scrap material for recovery. May weigh flasks of recovered mercury, for inventory records.

8163-234 SEPARATION-PRESS TENDER(chem., n.e.c.) DPT:685
panning and pressing operator.
GED: 2 SVP: 2 EC: I 2 PA: M 4

Tends hydraulic press that squeezes liquid oleic acid from solid fatty acid material to isolate solid stearic acid:
Fills pans with liquid material, in refrigerated room, by turning valves and using hose. Allows material to cool and solidify. Dumps chilled material from pans. Wraps jute cloths around each cake. Stacks wrapped cakes in basket of press and places metal plate between each layer. Operates control switch to raise basket against fixed platen and squeeze liquid oleic acid from cakes. Removes cakes from press and dumps cakes into steam heated tank to melt and further purify product. Pushes mobile tanks filled with oleic acid to staging area for processing by other workers.

8163-238 SODA DIALYZER(chem., n.e.c.) DPT:685
GED: 2 SVP: 2 EC: I 7 PA: L 4

Tends tanks in which caustic soda is recovered from solutions used in viscose manufacturing process:
Turns valves to admit impure soda solution to outside section of tank, and water to inside section, effecting absorption of soda into water by diffusion through cloth membrane separating the sections. Regulates discharge of resulting pure soda and intake of impure soda, according to level of solution in tank sections. Monitors tanks to observe flows and detect malfunctioning of equipment.

8163-242 FILTRATION HELPER(any ind.) DPT:687
GED: 2 SVP: 2 EC: I 4 PA: H 4

Helps filter operators in the separation of insoluble materials from liquid concentrations performing one or more of the following duties:
Observes filtering process to detect malfunctions, and makes adjustments as directed. Removes filter cakes (insoluble material) from plate or drum press, using scraper, and dumps them into hopper for further processing or disposal. Cleans plates, frames, drums and filter element, using water hose and hand scraper. Cleans sewer trough and work area. Takes samples for laboratory analysis and delivers them to laboratory. See also definition for term title, 02-160 HELPER (any ind.).

8163-299 OTHER FILTERING, STRAINING AND SEPARATING OCCUPATIONS, CHEMICALS AND RELATED MATERIALS

This group includes workers, not elsewhere classified, concerned with filtering, straining and separating chemicals and related materials.

8165-DISTILLING, SUBLIMING AND CARBONIZING OCCUPATIONS, CHEMICALS AND RELATED MATERIALS

This unit group includes occupations primarily concerned with operating and tending equipment which heats mixtures to vaporize and separate volatile substances; and with cooling, condensing and precipitating to produce refined substances; liquefying and distilling natural and industrial gases; and removing or obtaining gases, condensations or residues in stills, ovens or retorts. Occupations concerned with processing alcohols for human consumption are classified in Unit Group 8227, BEVERAGE PROCESSING OCCUPATIONS.

8165-110 PETROLEUM-PROCESS OPERATOR(petrol. & coal prod.) DPT:262
stillman; unit operator.
GED: 4 SVP: 7 EC: B 5 6 7 PA: L 2 3 4 5 6 7

Analyzes specifications and controls continuous operation of petroleum refining and processing units to produce products, such as gasoline, kerosene, fuel and lubricating oils and petrochemicals, by methods; such as, distillation, absorption, adsorption, extraction, thermal and catalytic cracking and reforming, polymerization, isomerization, fluid coking and alkylation:
Reads processing schedules, operating log sheets, test results of oil samples, and laboratory recommendations to determine changes in equipment controls required to produce specified quantity and quality of product. Moves and sets controls on control panels to adjust, maintain, and co-ordinate process variables. Moves controls to regulate valves, pumps, compressors and auxiliary equipment to direct flow of product. Reads temperature, pressure and flowmeters and

records readings. Determines malfunctioning units by observing control instruments, such as meters, gauges, or by automatic warning signals, such as lights and horns. Patrols and inspects equipment to determine location and nature of malfunction, and to verify safe and efficient operating conditions. Directs helper in drawing liquid samples for forwarding to laboratory for analysis.

May observe colours of product to detect deviations from standard. May clean interior of processing units by circulating chemicals and solvents through them. May control activities of several processing units operated simultaneously. May be designated according to process involved or unit operated; for example,
Absorption-Plant Operator
Cracking-Unit Operator
Purification Operator
Unit Operator, Polymerization

8165-114 ALKYLATION OPERATOR(petrol. & coal prod.)

DPT:362

GED: 4 SVP: 7 EC: B 6 7 PA: L 2 4 5 6 7

Controls automatic or semiautomatic alkylation unit and associated equipment to produce alkylates used in production of high octane gasoline:

Reads plant specifications to ascertain product, ingredients, and prescribed modifications to plant procedures. Starts automatic feed or moves controls to regulate feed of liquids or gases to equipment in specified timing or sequence. Sets controls of unit consisting of acid reactors, debutanizers, deisobutanizers, depropanizers and fractionating towers to produce specified product. Operates associated equipment; such as, reboilers, coolers, condensers, caustic and wash systems, according to specifications. Adjusts indicating and controlling devices to facilitate simultaneous analysis and control of process conditions. Observes gauges, signals and recording instruments, and turns valves or moves controls to regulate process variables. Directs activities of other workers performing duties, such as assisting in process control, drawing samples for laboratory analysis and maintaining log of production data. Reports defective equipment to maintenance crew and ensures conditions are safe before repair action begins.

8165-118 DISTILLATION OPERATOR(chem., n.e.c.)

DPT:362

GED: 4 SVP: 7 EC: I 3 7 PA: L 2 4 7

Controls pressurized batch or continuous stills and related equipment required to fractionate liquids having close volatilization points according to process specifications:

Reads process sheet to determine types and quantities of materials to be distilled, specified sequence of operations, and control setting required to attain specified distillates. Starts pumps and turns valves to admit liquids into stills. Monitors temperature and pressure gauges and moves controls to specified settings to attain volatilization rate consistent with operational procedures. Moves controls to maintain operating equilibrium in condensers and related equipment. Sets reflux rate for recycling maximum portion of distillate through system. Obtains samples of product for laboratory analysis or performs titration tests, using standard procedures and test equipment. Transfers distillates to receiving tanks, according to product colour or correlation of data from laboratory tests. Maintains shift log of operational data and equipment performance.

May be designated according to type of process or material processed; for example,

Batch-Still Operator
Benzol-Still Operator
Continuous-Still Operator
Mercaptans-Unit Operator
Synthetic-Textiles-Still Operator

8165-122 TREATER(petrol. & coal prod.)

DPT:362

GED: 4 SVP: 7 EC: B 5 6 7 PA: M 2 3 4 7

Controls continuous or batch treating equipment to process petroleum products, such as gasoline, kerosene, and lubricating oils with chemicals, solvents, steam, clay, and hydrogen to remove impurities and to improve colour, odour and stability according to specifications: Moves and sets controls to admit products and treating agents to processing units in specified ratio, to direct flow of products through treating stages, such as mixing, precipitating and neutralizing, and to regulate temperatures, pressures and circulation rates of treating equipment. Observes temperature, pressure and flow meters, records

readings, and compiles operating records. Patrols and observes unit to detect malfunctions and leaks. Opens valves to obtain product samples and sends samples to laboratory for analysis. Recycles products or pumps them to storage tanks, according to test results and laboratory analysis. Opens valves to drain sludge from units.

May make minor repairs and lubricate equipment. May add fortifying chemicals to product.

8165-126 CONTROL MAN(petrol. & coal prod.)

DPT:362

GED: 3 SVP: 7 EC: I 6 PA: L 4 7

Operates control panel to regulate temperature, pressure, flow rates, and tank levels in petroleum and petrochemical processing, refining and treating units:

Observes gauges and instruments to verify specified process conditions. Operates switches, adjusts dials, turns valves, or moves levers on control panel to regulate and co-ordinate process variables, such as flow rates, temperatures, pressures and time cycles. Reports malfunctions to supervisor, using radio-telephone. Maintains shift log of production data and equipment performance. Removes charts from recording instruments for analysis by others and replaces charts. Lubricates apparatus behind control panel periodically, using specified methods and equipment.

May specialize in operation of a particular petroleum or petrochemical unit and be designated accordingly; for example,

Control Man, Cracking Unit
Control Man, Crude Unit
Control Man, Polymerization Unit
Control Man, Solvent-Treating Plant

8165-130 RECOVERY OPERATOR(chem., n.e.c.)

DPT:382

GED: 4 SVP: 6 EC: I 3 5 6 7 PA: L 2 4 7

Controls evaporators, furnaces, and dissolving tanks to recover sodium compounds from spent chemicals used in pulp manufacturing process:

Turns valves and starts pumps to admit black liquor (spent chemicals) into recovery unit. Adjusts temperature, pressure and associated controls on evaporator and furnace according to system specifications. Patrols recovery area to observe recording devices and indicators on panelboards, flow of chemicals through unit, colour of flame in furnace and level of solvent in tanks. Monitors evaporator operation for conformance to specifications of solid content of evaporated liquor. Pushes control buttons to add salt cake to evaporated liquor sprayed into furnace. Observes transfer of molten sodium from furnace into dissolving tanks where green liquor (dissolved sodium compounds) is recovered for subsequent pulp processing. Obtains samples of green liquor and performs specific gravity tests, using hydrometer. Maintains shift log of production data, gauge readings, test results and equipment performance.

May tend electrostatic precipitator on furnace exhaust system that recovers dust particles for recycling through furnace. May clean solidified smelt from furnace intake ports or transfer troughs or spouts, using steel bar.

8165-134 COKE-PLANT-BY-PRODUCTS OPERATOR(chem., n.e.c.)

DPT:382

GED: 3 SVP: 7 EC: B 3 6 7 PA: L 4 7

Controls equipment, such as washers, rectifiers, condensers, and mixing tanks arranged in series to recover by-products from coke plant tar oils:

Pumps prepared acidic solutions into system to dissolve by-products. Circulates materials by manipulating valves and switches, observing gauges and other instruments. Removes tarry compounds dissolved in by-product solution by steam rectification. Directs obtaining of product samples. Interprets results of laboratory tests and makes adjustments to control quality of product. Inspects equipment and changes charts. Cleans and lubricates equipment, and makes minor repairs. Records shift production data and prepares reports.

8165-138 COLUMN OPERATOR(chem., n.e.c.)

DPT:362

towerman.

GED: 3 SVP: 6 EC: I 5 7 PA: L 4 6 7

Controls group of carbonating towers to precipitate sodium bicarbonate crystals from ammoniated brine for subsequent processing into soda ash:

Maintains liaison with other operators who clean clogged towers to

supply ammoniated brine to remaining groups of carbonating towers. Turns valves and operates controls to admit ammoniated brine and carbon dioxide gas to groups of carbonating towers. Observes temperature, pressure and flowmeter gauges and adjusts controls to produce sodium bicarbonate crystals of specified size and concentration for subsequent processing into soda ash. Conducts titration tests to determine ammonia content of ammoniated brine, using laboratory equipment. Patrols processing area to detect malfunctioning equipment and reports abnormalities to maintenance personnel for corrective action. Maintains logbook to record production data, temperatures, pressures, flowmeter readings and test results.

8165-142 LIQUEFACTION-PLANT OPERATOR(chem., n.e.c.) DPT:362

GED: 3 SVP: 6 EC: I 5 6 7 PA: L 4 5 7

Controls compressors, blowers, condensers and evaporators to compress, refrigerate and liquefy ammonia, chlorine, or carbon dioxide gases:

Studies log sheet to ascertain demand and disposition of product and performance of plant equipment. Turns valves and adjusts controls to regulate temperatures, pressures, vacuum levels and flow rates in refrigerating systems and compressors to maintain prescribed flow of gas. Tests gas to ascertain deviations from specifications, using laboratory equipment. Observes gauges, meters, and level indicators, and adjusts controls to maintain related acid, oil or water systems. Directs workers engaged in filling cylinders or other containers, or transfers gas to storage. Records production and test data on log sheet.

May be designated according to type of gas liquefied; for example,
Ammonia-Gas Liquefier
Carbon-Dioxide-Gas Liquefier
Chlorine-Gas Liquefier

8165-146 GAS-PLANT OPERATOR(chem., n.e.c.) DPT:382

GED: 3 SVP: 6 EC: I 5 6 PA: L 4 7

Controls fractionating columns, compressors, purifying towers, heat exchangers and related equipment to extract nitrogen, oxygen, argon and other gases from air:

Turns valves or presses switches in specified sequence to control flow of air through series of units to filter, compress and liquefy air, and separate it into nitrogen, oxygen, argon, and other gases. Observes pressure, temperature and flow gauges to ensure equipment is operating according to specifications. Tests oxygen for purity and moisture content, using burette and hygrometer. Determines purity of nitrogen by processing gas sample through gas analysis apparatus. Adjusts equipment according to test results, to compensate for atmospheric conditions, or decreasing efficiency of column due to accumulation of frost. Opens valves to convey nitrogen through battery of driers to remove moisture. Turns valves to transfer liquid or gaseous oxygen or nitrogen through heat exchangers to dissipate accumulated heat generated by compression operations. Pumps gaseous or liquid products to storage tanks or cylinders. Records gauge readings and test results.

May clean and refill driers with desiccant, using hoist. May refill purification filters with water and solutions to maintain specified levels. May be designated according to type of gas extracted; for example,

Nitrogen-Plant Operator
Oxygen-Plant Operator

8165-150 DISTILLATION OPERATOR(petrol. & coal prod.) DPT:662

GED: 3 SVP: 6 EC: B 7 PA: L 4 7

Operates batch or continuous stills and related equipment to separate and extract intermediate products from coal tar compounds:

Operates valves to fill tank to specified level, or adjusts feed valves to regulate flow of coal tar compounds through still units. Turns control valves and observes recording instruments to attain temperatures and pressures specified for distillation of products. Obtains samples of vapours for testing to determine the tank to which they should be routed. Maintains record of operational data, such as instrument readings, yield of products and equipment performance.

May operate distillation equipment to extract and refine ammonia from ammonia liquor and be designated accordingly,
Stillman, Ammonia

8165-154 GASMAN(oil & nat. gas) DPT:682

GED: 3 SVP: 6 EC: I 5 6 PA: L 4 7

Operates automatically controlled natural-gas-treating unit in oilfield to render gas suitable for fuel and for pipeline transportation:

Turns valves to admit gas and specified chemicals into treating vessel, where moisture is absorbed and impurities removed. Sets controls of auxiliary equipment, such as pumps, heating coils and cooling tower. Reads temperature and pressure gauges, and adjusts controls to keep heat and pressure at level of maximum efficiency and within safe operating limits. Performs routine tests or delivers samples to laboratory to determine qualities of gas, such as BTU value, flame candlepower, and specific gravity, and proportions of elements, such as methane and propane. Drains samples of boiler water from treating unit for laboratory analysis. Adds specified chemicals to water to keep heating and cooling systems in working order.

May adjust or assist in repairing gas meters, governors, regulators and other control instruments, using hand tools.

8165-158 GLYCERINE-REFINERY OPERATOR(soap) DPT:682

GED: 3 SVP: 6 EC: I 3 6 7 PA: M 4 7

Operates batch still and related equipment to recover and refine glycerine from spent lye solution used in soap manufacturing:

Treats spent lye solutions by adding specified liquid and dry chemicals to precipitate residual soap stock. Pumps soap stock to holding tank. Tests lye solution, using laboratory equipment, and adds caustic soda to neutralize acidity. Pumps solution through filter press to holding tank. Turns valves to fill batch still to specified level. Operates still and related equipment, such as condensers, cooling tower and vacuum jet system to recover glycerine. Turns valves to transfer glycerine to bleaching tank. Adds lampblack and starts agitator. Pumps bleached glycerine through filter press to final storage tanks. Records operational data, such as product yield, gauge readings and equipment performance.

8165-162 LIGHT-OIL-EXTRACTOR OPERATOR(petrol. & coal prod.) DPT:682

wash-oil-pump operator.

GED: 3 SVP: 6 EC: I 6 7 PA: L 2 4 7

Operates equipment, such as pumps, absorption tower, still, heat exchanger and processing tanks to extract and recover light oil from coke-oven gas:

Turns valves and operates pumps to admit impure coke-oven gas and coal-tar wash-oil into absorption tower that extracts light oil from coke-oven gas by absorption into wash-oil. Monitors gauges and meters and adjusts controls to regulate input flow rates. Turns valves to transfer washed coke-oven gas to final purifying station and saturated wash-oil to light-oil stills. Adjusts controls to maintain specified temperatures and pressures in light-oil still. Turns valves and operates pumps to transfer isolated light-oil to benzol plant and residual wash-oil through heat exchangers for reuse in absorption tower. Patrols processing area to record instrument readings and detect defective equipment. Lubricates pumps, drains sludge from tanks, and performs minor repairs, using hand tools.

8165-164 PUMPMAN, COKE BY-PRODUCTS(petrol. & coal prod.) DPT:382

GED: 3 SVP: 5 EC: I 6 7 PA: L 4 7

Operates equipment to cool, condense and separate tar, ammonium sulphate and light oils from coke-oven gas, and pump separated substances to specified locations:

Turns valves to transfer materials from collecting mains through cooler, scrubbers and decanter. Starts pumps, reads gauges and thermometers, and adjusts valves to regulate temperatures, pressures and rate of flow of gas, tar, ammonia liquor, light oils and water. Observes flow of tars from decanter, and manually adjusts seal to alter level of interface between tar and liquor and regulate liquor settling time. Pumps gas to next process, tar to storage tanks and liquor to collecting mains or to light-oil storage tank. Records temperature, pressures, and amount of tar and liquor pumped. Turns valves to bypass equipment requiring repair or cleaning. Flushes interior of coils with hot ammonia liquor to remove tar.

May adjust and lubricate floats, valves, and other equipment using

hand tools and lubricating equipment. May collect samples periodically and perform standard tests, using beakers, graduates and hydrometer.

8165-166 BATCH-STILL OPERATOR(chem., n.e.c.) DPT:682
GED: 3 SVP: 5 EC: I 5 7 PA: L 4 7

Operates batch stills to separate liquids having divergent volatilization temperatures:

Turns valves and starts pumps to charge stills with liquids to desired level. Regulates controls on instrument panel to maintain specified temperatures and pressures throughout distillation cycle and to control condensation of products. Obtains samples of distillate for laboratory analysis or performs titration tests, using standard procedure and equipment. Observes colour of distillate to determine when process is completed. Records operating data, such as weight, yield of products, gauge readings and number of batches processed.

May operate distillation equipment to refine crude wood turpentine, or operate hydrogen-fluoride stills and related equipment to produce aluminum fluoride, and be designated accordingly; for example, Hydrogen-Fluoride-Still Operator
Turpentine Distiller

8165-170 BURNER OPERATOR(petrol. & coal prod.) DPT:682
fireman.

GED: 3 SVP: 5 EC: B 5 6 7 PA: M 2 4 7

Controls operation of burners to maintain temperature in furnaces of petroleum processing units according to specifications:

Starts furnace by pressing control button. Regulates temperature by turning steam valves and operating switches to increase or decrease flow of fuel to burner and to still, according to processing schedule. Reads temperature, pressure and flow gauges to verify operating conditions of unit, and records readings. Observes distribution, colour of flame and combustion conditions. Regulates air and oil flows by opening valves to correct combustion conditions and flame impingements. Reports any irregularities in operating conditions to superiors. May place burner on automatic control by turning switches. May examine walls and tubes of furnace to detect overheating. May prepare daily production control reports to show consumption of fuel oil.

8165-174 CELL OPERATOR(chem., n.e.c.) DPT:662
GED: 3 SVP: 5 EC: I 3 4 6 7 PA: L 4 7

Controls electrolytic cells and auxiliary equipment to produce caustic soda, chlorine or hydrogen from brine solution:

Regulates brine and water flow according to current input and strength of electrolyte. Observes flow through sight glasses, reads gauges, chart recorders and manometers, and moves controls to regulate mercury level, cell pressure, current capacity and to maintain temperature within operating limits. Turns valves and starts pumps to obtain specified back pressure on hydrogen, and vacuum on chlorine. Controls auxiliary equipment such as mercury condenser, hydrogen scrubber, water sprayers, compressors and driers to purify, recover or further process caustic soda, chlorine or hydrogen. Monitors cell-room operations to detect malfunctioning equipment that could result in fire or explosion due to presence of hydrogen gas. Analyzes samples of chlorine gas, using gas-analysis equipment. Obtains samples of brine solution to conduct pH or specific gravity tests. Records shift production and operational data such as amperage, voltage, temperatures and pressures used, to determine need for cell maintenance. May be designated according to type of product produced; for example,

Caustic-Cell Operator
Chlorine-Plant Operator

8165-178 DISSOLVER PRECIPITATOR(chem., n.e.c.) DPT:682
GED: 3 SVP: 5 EC: I 5 7 PA: L 4 7

Controls equipment that dissolves and precipitates chemicals from chemical solutions used in production of petrochemical or synthetic textile products:

Pumps chemical solutions through premeasuring, dissolving and precipitating tanks. Observes thermometers and turns valves to maintain temperatures in tanks within specified limits. Starts tank agitators to mix solutions for prescribed time. Tests acidity and specific

gravity of solutions, using titration test equipment and hydrometer. Observes flowmeters and turns valves to regulate flow of ingredients through tanks to alter concentration and produce product to specified standard. Pumps or drains remaining solutions from precipitate and turns valves to transfer product for further processing, shipment, or storage.

May tend blending tanks to blend chemical solutions, such as the ammoniation of acids required to produce a particular chemical product.

8165-182 PETROLEUM-PROCESS-OPERATOR HELPER(petrol. & coal prod.) DPT:682
stillman helper.

GED: 3 SVP: 5 EC: B 5 6 7 PA: M 2 3 4 7

Helps operator to distill, process, and refine crude oil to produce products, such as gasoline, kerosene, fuel and lubricating oils:

Patrols towers, tanks and other areas and inspects equipment, such as heating and distilling units, pipelines and pumps to detect malfunctions and leaks. Reads flowmeters, temperature and pressure gauges and records readings. Reports operating condition of units to operator. Turns valves and operates switches as directed to regulate temperature, pressure and flow of product, and maintain specified levels of oil in tanks and towers. Draws samples of product from tanks and towers for laboratory analysis. Lubricates and cleans equipment. See also definition for term title, 02-160 HELPER (any ind.).

8165-186 SATURATOR MAN(chem., n.e.c.) DPT:682
GED: 3 SVP: 5 EC: I 5 6 7 PA: M 4 7

Operates equipment to produce ammonium sulphate from coke-oven gas:

Turns valves to admit sulphuric acid and ammoniated gas into saturator. Adjusts controls to regulate saturation of solution until crystalline ammonium sulphate forms. Obtains samples and conducts tests to determine acidity of solution and percentage of crystallization. Observes temperature and pressure gauges to ensure that process conditions conform to specified standards. Turns valves and starts pumps to discharge slurry onto drain table to settle out crystals and return strained liquor back into saturator. Records gauge readings and equipment performance in shift log. May operate controls to reheat ammoniated gas before saturation. May tend centrifuge to dry ammonium sulphate crystals.

8165-190 ACID-PLANT OPERATOR(chem., n.e.c.) DPT:682
absorption operator.
GED: 3 SVP: 4 EC: I 7 PA: L 4 7

Controls equipment that absorbs gases and liquids into water or other solvents to produce acids:

Operates pumps, turns valves and observes flowmeters to control concentration, flow, temperature, and quantity of coolant, gas, liquid, and absorbing liquor through cooling and absorbing towers. Turns valves to regulate feed rate of solution produced and steam pressure to purge boilers and condensers to separate impurities and obtain product of designated strength and specific gravity. Obtains sample from tank and tests for specific gravity and acidity, using hydrometer and pH meter, or forwards sample to laboratory for analysis. Turns valves to admit solution to storage tanks or tank cars. Maintains log of instrument readings, test results and production.

May prepare equipment for repair by draining tanks and lines and locking out pumps and motors.

8165-194 FUEL-GAS TREATER(petrol. & coal prod.) DPT:682
GED: 3 SVP: 4 EC: I 6 7 PA: L 4 7

Controls treating plant, consisting of absorber towers, actifiers, heat exchangers, pumps and related equipment to remove unwanted components and render gas suitable for use as fuel:

Observes gauges and meters to ascertain operating conditions. Adjusts valves and controls to regulate flow of gas through processing equipment. Performs chemical tests on treating materials, using standard test apparatus. Monitors processing operations to detect hazardous conditions. Turns valves to regulate flow of gas to blast furnace.

May inspect and lubricate machines.

8165-198 HYDROGEN-PROCESS OPERATOR(chem., n.e.c.)
DPT:682

GED: 3 SVP: 4 EC: I 6 PA: M 4 7

Operates electrolytic cells, compressors and cooling apparatus to produce high-purity hydrogen by electrolysis of water: Fills electrolytic cells with distilled water, using hose, and initiates and controls production of gases by regulating electric current at control panels. Observes gauges on hydrogen storage tanks and opens valve to relieve excessive pressure. Compares volume of gas sample from system, with volume remaining after combustion of oxygen, by performing standard test to determine percentage of oxygen in the hydrogen side of the system. Observes gauges indicating temperature, pressure and level of electrolytic cell. Regulates power to cells by adjusting arc and mechanical rectifiers to maintain energy and decomposing efficiency of electrolytic cells. Observes operation of cells, compressors, cooling apparatus and drier equipment to ensure that required conditions are maintained. Measures moisture content of hydrogen coming from drier, using hygrometer. Reactivates chemical drying agent, using electric heater and vacuum pump. Records test results.

8165-202 TAR-ACID EXTRACTOR(petrol. & coal prod.)
DPT:682

phenol-plant-extraction operator.

GED: 3 SVP: 4 EC: B 6 PA: L 2 4 7

Controls equipment, such as washers, extractors, acid pots and treating tanks to recover tar acids from coal-tar oils for subsequent distillation operations:

Operates pumps to circulate coal-tar oil through processing equipment. Turns valves to treat oil at various stages with caustics, carbon dioxide and steam, according to process charts and instrument readings. Obtains samples and performs simple tests to determine effectiveness of treatment, and carries other samples to laboratory for complex analysis and interpretation of results. Adjusts processing operations to control quality of product according to laboratory analysis. Patrols area to inspect equipment and reports defects to maintenance department. Maintains log of gauge readings, shift production and equipment performance.

8165-206 VACUUM-PAN OPERATOR(mining & quarrying)
DPT:682

GED: 3 SVP: 4 EC: I PA: L 2 4 7

Controls triple effect evaporator system and vacuum filter equipment to concentrate brine slurry, grow salt crystals and separate crystals from slurry:

Turns valves and operates switches to start equipment that admits steam, cooling water, gypsum and brine into evaporators. Starts rotating vacuum filter, turbine, and heating equipment that operates within specified limits. Observes level of brine through sight glasses to ensure evaporation effect and vacuum pressures are maintained. Obtains slurry samples and performs titration tests, using standard equipment. Compares test results with standards and adjusts evaporators to obtain desired crystallization growth. Starts pumps to remove slurry from evaporators and to spray slurry over vacuum filter screen. Monitors vacuum filter equipment and adjusts scraper blade that removes salt crystals for final processing. Flushes out evaporators to remove scale and salt residue and examines steam tubes and inside walls of evaporators to detect equipment deterioration. Maintains shift logbook of production data and equipment performance.

8165-210 TREATER HELPER(petrol. & coal prod.) DPT:685
GED: 3 SVP: 4 EC: B 5 6 7 PA: M 2 3 4 7

Helps to process petroleum products, such as gasoline, kerosene, oils and wax, with chemicals, solvents, steam, clay, and hydrogen to remove impurities:

Patrols equipment to examine pipelines and valves for leaks. Turns valves to draw off water and spent chemicals after treatment and separation. Prepares solutions in supply tanks according to specifications. Adds treating chemicals to product by turning valves. Regulates pumps to control circulation and concentration of solution and product through unit according to specifications. See also definition for term title, 02-160 HELPER (any ind.).

May gauge tanks with calibrated tape to determine volume of contents. May make chemical, specific gravity and colour tests of

product and treating solution to determine process conditions or draw samples for laboratory analysis.

8165-214 ALKYLATION TOWERMAN(petrol. & coal prod.)
DPT:685

GED: 3 SVP: 3 EC: B 6 7 PA: L 2 4 6 7

Tends automatic or semiautomatic alkylation unit and associated equipment to produce alkylates used in production of high octane gasoline:

Turns valves to feed liquid and gaseous materials, such as acids or petrochemicals, through refinery processing equipment or sets controls in specified sequence on control panel to start automatic feed. Maintains systems at specified temperature, pressure and vacuum levels according to process specifications. Monitors gauges, signals and recorders and receives direction from operator to make specific adjustments. Patrols processing equipment area to record operating data and inspect for leaks or hazards. Maintains shift log of gauge readings and production and equipment performance.

May draw samples of products at specified processing stages for laboratory analysis by others.

8165-218 BLEACHING-SOLUTION MAKER(chem., n.e.c.)
DPT:685

GED: 3 SVP: 3 EC: B 7 PA: H 4 7

Tends absorption towers and reaction drums to produce zinc hyposulphate solution used in bleaching wood pulp:

Turns valves and starts pumps to regulate flow of water and sulphur dioxide gas through absorption towers to produce dilute sulphurous acid. Controls flow of dilute acid and steam through stripper to strengthen sulphur dioxide gas for re-absorption into stronger acid. Turns valves to control rate of steam evaporation and flow of water through chiller to lower temperature of water used in absorption towers. Operates cyclone scrubber to remove sulphur dioxide from absorption tower exhaust gases. Opens acid valves and dumps bags of zinc into reaction drums. Starts drums rotating to produce solution of zinc hyposulphate. Turns valves and starts pumps to transfer bleaching solution to storage on completion of reaction. Performs standard titration analyses to determine strength of acid and bleaching solutions. Records production data on log sheet.

8165-222 DISTILLATION-OPERATOR HELPER(chem., n.e.c.)
DPT:685

GED: 3 SVP: 3 EC: I 3 7 PA: L 2 4 7

Helps to control distillation units and related equipment to separate volatile chemical compounds into specified products by performing any combination of the following duties:

Turns valves and starts pumps to admit petrochemical products into stills. Measures liquids in storage tanks, using gauging rod or special tape. Moves controls to start semiautomatic still auxiliaries; such as, heat exchangers, stripping columns, vaporizers, flash drums and condensers. Adjusts controls to maintain specified operating conditions of equipment, as directed. Patrols processing equipment to record temperature, pressure and flow indicator readings. Inspects pipes, tanks and associated equipment for leaks and reports findings to operator. Obtains samples for laboratory analysis. See also definition for term title, 02-160 HELPER (any ind.).

8165-226 ACETYLENE-PLANT ATTENDANT(chem., n.e.c.)
DPT:685

generator man.

GED: 2 SVP: 4 EC: I 5 6 7 PA: M 4 7

Tends generating equipment that processes calcium carbide crystals and water into acetylene gas:

Turns valves and reads gauges to control level of water in generator. Dumps specified quantity of calcium carbide crystals into hopper, using drum dumper or air hoist. Bolts cover on generator, using wrench, and activates generator. Opens hopper gate and starts vibrator that sifts crystals into generator. Tends compressor that compresses acetylene gas to specifications. Ascertains level of acidity or alkalinity of gas, using litmus paper. Maintains record of operational data in logbook.

May assist in unloading and storing carbide crystals, using hoist or hand truck. May fill cylinders with compressed gas. May test cylinders

and associated piping for leaks by brushing soap solution on valves and fittings.

8165-230 CELL-OPERATOR HELPER(chem., n.e.c.) DPT:685
GED: 2 SVP: 4 EC: I 3 4 6 7 PA: L 4 7

Helps cellman to operate electrolytic cells that produce chlorine, caustic soda or hydrogen by performing any combination of the following duties:

Pulls and positions cell current jumpers, connects temporary jumper arms to circuits and turns switches to remove cells from service. Disconnects brine, gas, and caustic lines to prepare cells for changing, using wrenches. Assists maintenance personnel in positioning cathodes and cell assemblies in place. Removes temporary connections to return cells to service. Turns valves to flush lines, adjust and maintain brine flows and levels, and switch flows from brine tanks to bypass lines. Obtains and tests samples of cell liquor, using standard test equipment and charts. Patrols banks of cells to record voltage, current and hydrostatic brine pressures or to detect defective lines and equipment. Replaces charts in recording instruments periodically. See also definition for term title, 02-160 HELPER (any ind.).

8165-232 LARRY-CAR OPERATOR(petrol. & coal prod.) DPT:663
larryman.
GED: 2 SVP: 3 EC: B 3 6 7 PA: M 4 7

Operates larry (electric charging-car) to charge coal into coke-ovens: Weighs empty larry on scale to obtain tare weight. Opens chutes of storage bin to dump specified weight of coal into hoppers on larry. Drives larry to ovens, along rails mounted over ovens and moves controls to position hoppers over open charging-holes. Pushes levers to drop thimbles (sleeves) into charging-holes and to open slides in hoppers. Pokes bar through opening in hopper to release coal from storage bin into car hopper or from car hopper into oven. Records oven number, battery date, mix of coal and shift. Signals other worker to level coal in oven.

8165-234 OPERATOR, DOOR MACHINE(petrol. & coal prod.) DPT:663
discharge-door man.
GED: 2 SVP: 3 EC: B 3 5 6 7 PA: M 3 4

Operates machine equipped with door-jack and coke-guide to remove doors from discharge end of coke ovens and guide discharged coke from oven to quenching car:

Drives machine along rails to designated oven. Moves levers to hook machine arm onto door and remove door from oven and to position coke-guide which guides discharging coke from oven into quenching car. Signals other worker, using horn, to discharge coke from oven. Cleans carbon and tars from doors and jamb, using hand chisel-bar, scraper, shovel and broom. Gathers residue with shovel and wheelbarrow and dumps it into hopper. Replaces door, using machine. Cleans door-machine, using steam-cleaning equipment.

8165-238 PUSHERMAN(petrol. & coal prod.) DPT:663
pusher operator.
GED: 2 SVP: 3 EC: B 3 6 7 PA: M 4 7

Operates pusher machine which runs on rails at base of coke ovens, to level coal and push hot coke from ovens: Drives pusher to designated oven. Moves levers to hook door-arm to oven door and to remove door from oven and to position ram. Starts ram, at signal from worker on discharge side of oven, to push coke out of oven into quenching car. Withdraws ram and replaces door in oven. Moves levelling bar back and forth through opening near top of oven to level fresh charge of coal. Cleans tars and carbon from oven door and jamb, using chisel bar. Signals other worker to recharge oven. Cleans pusher machine, using steam hose, broom and shovel.

8165-240 CRYSTALLIZER TENDER(chem., n.e.c.; explosives) DPT:685
GED: 2 SVP: 3 EC: I 5 7 PA: L 2 4 7

Tends equipment to process chemical solutions into crystalline form by one of the following methods:
Turns valves and operates pumps to transfer specified amounts of

chemicals into crystallizer. Starts internal agitator and operates pumps to pump coolants into cooling coils of crystallizer. Reads thermometer, observes product, and turns coolant valve to regulate temperature and control rate of crystallization according to specifications. Opens valve to empty crystals into screw conveyor to transfer crystals to storage area. Turns valves and operates pumps to transfer specified amounts of chemicals into heated reservoir to boil liquor and evaporate liquid content. Moves lever that automatically dumps solidified residue into trays. Transfers trays of solids to grinding and crushing area, using hoist. Starts crystallizer that breaks solids into crystals of specified size. May tend equipment such as evaporator, prill tower, drier and coater to produce ammonium nitrate prills. May be designated according to material processed; for example, Alum Evaporator(chem., n.e.c.) Ammonium-Nitrate Crystallizer Ammonium-Nitrate Priller Cellulose-Acetate Pretreater(chem., n.e.c.)

8165-242 STILL TENDER(chem., n.e.c.) DPT:685
degreaser, steam distillation.
GED: 2 SVP: 3 EC: I 3 7 PA: M 3 4 7

Tends still to reclaim degreasing agents, such as alcohol and kerosene from leather tanning solution:

Pumps solution of agent and grease into container of still and opens valves to admit steam into still. Observes gauges and adjusts valves to keep temperature at specified level to vaporize solution. Sets automatic switches to pump reclaimed solvent from collector tank to outside storage tank. Cleans residue from still using scrapers, after removal of solvent.

May be designated according to solvent reclaimed.

8165-244 BATH-MIX-SOLVENT RECOVERER(chem., n.e.c.) DPT:685
GED: 2 SVP: 2 EC: I 3 5 6 7 PA: H 2 4

Tends still that purifies solvents used in coating cellulose film: Removes plug and screws drain valves into steel drums, using wrench. Lifts drum onto drain rack, using hoist, and opens drain valve to dump contaminated solvents into still. Adjusts panel controls of still and turns steam valve to vaporize impurities and reclaim solvents. Turns valve to fill drums with reclaimed solvents. Transports drums of solvents to storage area, using hand truck. May clean empty drums, prior to filling, using solvents and neutralizer.

8165-246 DISTILLATION-OPERATOR HELPER(petrol. & coal prod.) DPT:687
GED: 2 SVP: 2 EC: B 6 PA: M 4

Helps to control stills, compressors, and associated processing tanks to separate and extract intermediate products from coal tar compounds: Turns valves and operates pumps to charge processing tanks with crude coal tar derivatives. Verifies liquid levels in tanks and equipment, using measuring rod or tape. Transports neutralizing agents, such as acids or alkalis to work area, using hand truck. Turns valves to prepare equipment for distillation process as directed by operator. Patrols processing area to detect leaks or hazards, to record instrument readings and take samples to laboratory for analysis by others. See also definition for term title, 02-160 HELPER (any ind.)

8165-299 OTHER DISTILLING, SUBLIMING AND CARBONIZING OCCUPATIONS, CHEMICALS AND RELATED MATERIALS

This group includes distilling, subliming and carbonizing chemical workers, not elsewhere classified; for example, those who operate equipment to stabilize chemical reactions in preparations of synthetic fibres; and assist in extraction of light oil from coke-oven gas. Typical examples of occupational titles covered by this residual group definition are:

Light-Oil Utility Man(petrol. & coal prod.)
Stabilizer Operator(chem., n.e.c.)

**8167-ROASTING, COOKING AND DRYING
OCCUPATIONS, CHEMICALS AND RELATED
MATERIALS**

This unit group includes occupations primarily concerned with operating and tending equipment which subjects chemicals and related materials to heat, pressure, air, vacuum or desiccants to liquefy, dry, char, purify, concentrate, polymerize, atomize, or change chemical composition. Activities include: operating ovens, rotary kilns or furnaces to roast, calcine or otherwise affect a chemical change; cooking materials in pressure cookers, open vats, pans or kettles; operating oven, chamber-room type, or batch-type drying installations to remove water or volatile liquid components; drying solutions by spraying or atomizing to produce powders; cracking and combining gases; and operating converters and evaporators to produce acid.

Roasters

8167-110 through 8167-190

8167-110 ROASTER, CHEMICAL(chem., n.e.c.) DPT:382
GED: 3 SVP: 6 EC: 1 7 PA: L 4

Controls rotary kiln and auxiliary equipment, such as driers, coolers and conveyors to calcine, or otherwise affect a chemical change in materials:

Starts automatic equipment to feed required materials through equipment units, such as hoppers, elevators, screens and heating vessels. Observes gauges, signals and recording instruments, turns valves and moves controls to regulate temperature, pressure and flow of steam or coolant and chemical constituents through system to maintain process conditions. Observes consistency of product and periodically draws samples for laboratory tests to determine if reaction is proceeding according to standards. Stops heating process when cycle is completed and starts pump to transfer material from kiln to cooling equipment. Patrols area to inspect equipment. Keeps records of gauge readings, production and equipment malfunctions. Cleans and makes minor repairs to units.

May perform screening, milling and blending operations. May be designated according to type of chemical change affected; for example, Calciner

8167-114 THERMAL-ACID-EQUIPMENT OPERATOR(chem., n.e.c.) DPT:662
GED: 3 SVP: 6 EC: B 7 PA: L 2 4 5 6 7

Operates thermal acid plant equipment such as burner, heat exchanger, cooling towers, reboiler unit and scrubber system to convert elemental phosphorus into high grade phosphoric acid and to purify processed hydrochloric acid:

Directs activities of tender who unloads feedstocks such as hydrochloric acid, phosphorous and salt from rail cars and trucks and loads phosphoric acid into storage tanks or applicable vehicles. Turns valves and regulates controls of burner and associated equipment required to process phosphorous to produce phosphoric acid according to specifications. Operates salt reactor to purify phosphoric acid, reboiler unit to purify processed hydrochloric acid, and scrubber system to scrub contaminants from exhaust gases. Performs oxygen tests on exhaust stock gas samples and specific gravity and acidity or alkalinity tests on processing samples, using laboratory equipment. Monitors instrument control panel to observe plant operations. Patrols processing area to inspect equipment and performs minor repairs, using hand tools. Records operational data, production figures and equipment performance in shift logbook.

8167-118 RECOVERY-PLANT OPERATOR(chem., n.e.c.) DPT:662
boiler operator; fireman, recovery.
GED: 3 SVP: 6 EC: 1 PA: M 4 5 6

Controls furnace in which condensed black liquor is burned to black

ash for use in recovering sodium compounds:

Turns rheostat to adjust mechanism in mixing tank to feed specified quantities of salt cake into black liquor. Turns valves and air intake ports to regulate spray and density of liquor, and air distribution into furnace, according to combustion charts, to ensure complete combustion of organic matter. Opens furnace port allowing ash to flow directly into dissolving tank to form green liquor. Presses switch to start motor to pump liquor into settling or storage tank. Turns valves to channel steam generated by furnace boiler through liquor evaporators, or into main steam line for further use. Cleans and scrapes residue from liquor pipes and interior of furnace, using scraper and steam.

8167-122 CARBON-BLACK-FURNACE OPERATOR(petrol. & coal prod.) DPT:362
plant operator, furnace process.
GED: 3 SVP: 5 EC: 1 PA: L 4 5 6 7

Controls panel to operate semiautomatic furnaces and auxiliary equipment to produce carbon black through partial combustion of crude oil:

Signals crew, using loudspeaker system to start and maintain operation of furnaces and auxiliary equipment; such as, quenchers, precipitators, filters, pumps, compressors and conveyors. Observes instruments on central control panel such as, pyrometers, recording meters and other gauges to ensure that process conditions are maintained, and records instrument readings in operating log. Sets switches and knobs on control panel to regulate temperature, pressure and flow of air and fuel in reactors, and turns knobs to transfer accumulated carbon black from furnace through auxiliary units to produce specified type and grade of carbon black. Reports defective equipment to supervisor.

May tour plant area to ascertain that equipment is operating as indicated on central control panel.

8167-126 OVEN-CONTROL MAN, ELECTRODES(electric equip.) DPT:682
GED: 3 SVP: 5 EC: 1 5 PA: L 4

Controls continuous-feed gas ovens to harden coated electric welding rods and remove moisture content from carbon electrodes:

Turns controls to light burners, opens gas valves and starts blowers and conveyor lines. Observes gauges and graphic charts, and adjusts controls to maintain specified conveyor speed, heat and humidity in each baking zone. Measures orifice of coating nozzle on extrusion head, using micrometer or observes coated welding rod to detect die wear or coating flaws and reports to supervisor.

May inspect and test finished welding rods, using arc-welding equipment. May keep production and quality control records. May calibrate coating dies, using honing and polishing tools.

8167-130 LIME-KILN OPERATOR(chem., n.e.c.) DPT:682
GED: 3 SVP: 5 EC: 1 PA: L 4 7

Controls panelboard to operate oil fired kilns and auxiliary equipment such as lime-mud filters, gas scrubbers, and conveyors, to recover lime from lime sludge:

Observes gauges and temperature charts on panel to detect variations in kiln temperature, amount of sludge in kiln, percentage of oxygen in kiln atmosphere, and rate that combustible gases are exhausted from kiln. Turns rheostats to regulate amount of sludge fed into kiln according to kiln-capacity. Regulates dampers and fuel flow to maintain kiln at specified temperature. Adjusts controls to regulate intake fans according to percent of oxygen in kiln and exhaust fans according to rate that sludge decomposes into quicklime and carbon dioxide. Starts conveyors to move quicklime from kiln to hopper of slaking machine or storage area. Tends scrubbers and filters that remove cooking liquor from sludge before it is burned. Maintains operating records.

8167-134 HEATER, COKE OVENS(petrol. & coal prod.) DPT:362
GED: 3 SVP: 4 EC: B 3 6 7 PA: M 4 7

Controls, cleans and repairs ovens that produce coke:

Removes flue caps, using hook, and determines temperature in flue, and condition of nozzles by observing colour of flame and by using optical pyrometer. Reads gauges and turns valves to regulate flow of fuel gas and air, and maintain specified temperatures in flues.

Observes gauges and adjusts weights on governor to maintain specified gas pressure in collecting main. Cleans plugged gas nozzles, using poker. Inspects air flow and gas reversing mechanisms and adjusts or repairs equipment, using hand tools. Inspects finished coke as it is pushed from oven, visually, or with pyrometers, for temperature and quality, and adjusts temperature of oven accordingly. Prepares daily reports of gauge and pyrometer readings, recording changes in pressure or temperature. Repairs ovens, using hand tools, and refractory-clay spray guns. Directs activities of 8167-158 HEATER HELPER, COKE OVENS (petrol. & coal prod.).

8167-138 RING-FURNACE OPERATOR(electric. equip.) DPT:662
electrode-furnace operator.
GED: 3 SVP: 4 EC: I 3 7 PA: L 4 7

Operates oil-fired ring furnace to graphitize green carbon electrodes: Lights burner, adjusts oil and water valves, manifold damper, and head covers to regulate temperature in furnace. Observes gauges and records water and oil pressures at regular intervals. Measures flue and pit temperatures, using optical pyrometer, to ensure that process temperatures are being maintained. Inspects and maintains pumps, motors, blowers, gas scrubber system and pipelines. Signals helper to prepare alternate pits for furnace change over to maintain baking schedule.

May clean oil burner valves and water filters when required, using steam and solvent. May record operating data.

8167-142 ACID MAKER(chem., n.e.c.) DPT:682
GED: 3 SVP: 4 EC: I 7 PA: L 4

Operates rotary or spray sulphur furnace and alkali absorption towers to make cooking acid for use in digesting woodpulp:

Observes pressure gauges and moves controls to regulate pressure in combustion chamber, speed of furnace rotation, and volume of liquid sulphur in furnace, to maintain specified temperature and acidity required to produce sulphur dioxide gas. Makes titration tests of acid produced. Adjusts valves to regulate flow of water or caustic solution and sulphur dioxide gas through alkali absorption towers, according to titration test results, to produce cooking acid of specified concentration. Starts pumps to run acid to storage tanks, through settling tanks or filters.

8167-146 CARBON-BLACK-FURNACE TENDER(petrol. & coal prod.) DPT:585
GED: 3 SVP: 3 EC: I 3 5 7 PA: L 2 4

Tends semiautomatic furnaces and auxiliary equipment to produce carbon black by partial combustion of crude oil:

Starts and maintains operation of furnaces, and auxiliary equipment such as, quenchers, precipitators, filters, pumps, compressors and conveyors. Turns valves to regulate flow of water in quencher, feed rate of fuel and air, and movement of accumulated carbon black through equipment, as directed by operator. Observes gauges and meters to verify specified temperature, pressure and rates of flow of materials, and adjusts valves to maintain process conditions.

May record instrument readings in operating log. May open inspection ports and observe flow of product through conveyors to detect jamming.

8167-150 RING-FURNACE-OPERATOR HELPER(electric. equip.) DPT:664
furnace loader; packer, ring furnace.
GED: 2 SVP: 3 EC: I 3 5 6 7 PA: H 2 3 4

Helps operator to graphitize green carbon electrodes performing any combination of the following duties:

Attaches crane cable to flue lids, exhaust manifold and brick side blocks of furnace and signals crane operator to lift them from fired pit and lower them into alternate pit. Shovels aside loose insulating mix, undermines crust of mix with pick, and breaks layer of hardened resistor mix to stifle and cool fire bed. Shovels resistor and insulating mixes into separate piles for reprocessing and reuse. Attaches crane cable to graphitized electrodes and guides them manually as they are removed from furnace bed. Operates conveyor and tripper, and positions chute to direct flow of resistor and insulating mixes into furnace pit. Levels, and tamps mixes, using shovel and rake and forms a trench along mix bed, using trench gauge, to receive electrodes.

Attaches cable to green electrodes and directs crane operator to stack electrodes on furnace bed. Fills space between electrodes and top of charge with additional resistor mix. See also definition for term title, 02-160 HELPER (any ind.).

May remove smaller electrodes by hand and stack them beside furnace.

8167-154 CALCINER TENDER(petrol. & coal prod.) DPT:665
GED: 2 SVP: 3 EC: I 3 5 6 7 PA: L 4 6

Tends electro-thermic calciner that reduces ground coal or petroleum coke to powdered coke by driving off volatile matter preparatory to making graphitized electrodes:

Observes control panel indicators and turns switches, to lower electrodes into calciner, to open hydraulic feeder chute and fill calciner to top of electrodes, with coal or petroleum coke, and to turn on electrical current. Dumps additional quantities of coal or coke into calciner to keep it level with top of electrodes which are raised hydraulically until entire charge is heated to specified temperature. Directs operator of crane to move filled calciner for cooling and dumping.

8167-158 HEATER HELPER, COKE OVENS(petrol. & coal prod.) DPT:665
oven-heater helper.
GED: 2 SVP: 3 EC: B 3 6 7 PA: M 4 5 6

Helps operator by regulating temperature of coke ovens and flow of air to flues, and by maintaining equipment:

Turns handwheel to open and close decarbonizing caps which admit air to flues to burn carbon from gas and air nozzles. Observes temperature and pressure gauges and notifies 8167-158 HEATER, COKE OVENS (petrol. & coal prod.) if pressure or temperature varies from specified limits. Cleans carbon from plugged nozzles, using poker, and replaces broken nozzles, using hand tools. Turns handwheel in emergency to operate automatic reversing machinery. Cleans and lubricates equipment, using grease gun. See also definition for term title, 02-160 HELPER (any ind.).

8167-162 ROTARY-FURNACE TENDER(chem., n.e.c.) DPT:665
roaster tender.
GED: 2 SVP: 3 EC: I 3 6 7 PA: L 4 5 7

Tends rotary furnace that roasts sulphur or other materials to liberate gases for use in processing chemical products, performing any combination of the following duties:

Dumps specified quantity of material such as zinc pellets or sulphur onto conveyor to feed rotary furnace. Starts rotation of furnace, monitors gauges and adjusts fuel valve to maintain specified temperature in furnace and ensure efficient roasting of materials. Turns valve and starts pumps, depressing button to direct flow of air, and water, through furnace and to transfer liquid sulphur and acid between equipment units, when roasting sulphur for use in production of sulfuric acid. Directs workers and engages in cleaning and topping furnace.

May adjust and repair heating controls on furnace using hand tools.

8167-166 THERMAL-ACID-EQUIPMENT-OPERATOR HELPER(chem., n.e.c.) DPT:585
GED: 2 SVP: 3 EC: B 7 PA: M 2 4

Tends thermal acid plant equipment such as reboiler, scrubber, and cooler to assist operator in the conversion of elemental phosphorus into high grade phosphoric acid and to purify processed hydrochloric acid:

Operates pumps to load, unload, or transfer, feedstocks such as, hydrochloric acid, phosphorus and salt to or from storage tanks, cars or trucks as directed by operator. Patrols thermal acid plant processing equipment such as, reboiler, scrubber and cooler, to verify processing conditions and record instrument readings on record sheet. Draws samples of product at specified stages for analysis by laboratory personnel. Turns valves to transfer resultant phosphoric acid to specified storage tanks. Starts and stops water sprays in absorber, as directed, to control acid strength. Dismantles, cleans, and assembles process lines, as directed, using steam, regenerative chemicals and hand tools. See also definition for term title, 02-160 HELPER (any ind.).

8167-170 CHARCOAL BURNER, BEEHIVE KILN(petrol. & coal prod.) DPT:685
charcoal burner.

GED: 2 SVP: 3 EC: O PA: H 3 4 7

Tends series of beehive kilns to convert wood into charcoal by carbonization:

Places kindling in kiln manually, and starts fire, using burning log or oil soaked gunny sack. Seals top and door of kiln using cement and trowel or sand when specified heat is attained, to limit access of air and activate the carbonization process. Observes colour of smoke issuing through draft holes, opens and closes draft holes inserting bricks to maintain process conditions. Seals draft holes and cracks in kiln with cement to smother fire when carbonization is completed.

May extinguish fire using water hose.

8167-174 RECOVERY-PLANT-OPERATOR HELPER(chem., n.e.c.) DPT:685
fireman helper.

GED: 2 SVP: 3 EC: I 3 5 6 PA: L 2 3 4

Helps operator to control furnace in which condensed black liquor is burned to black ash for use in recovering sodium compounds:

Turns valves to regulate flows of black liquor and air into drier to dry black liquor to specified concentration. Adjusts rheostat manually, as directed, to regulate mixing tank mechanism and feed salt cake into black liquor preparatory to burning. Turns valves to direct steam into evaporators and turns crank to rotate steam jets through boiler to blow out soot and sludge. Scrapes sludge from interior of furnace, to keep unit in good working condition, using scraper and rake. See also definition for term title, 02-160 HELPER (any ind.).

May test moisture content of liquor using moisture meter.

8167-175 STANDPIPE MAN(petrol. & coal prod.) DPT:685
dampner man; topman.

GED: 2 SVP: 3 EC: O 3 5 6 7 PA: M 2 3 4

Tends equipment that regulates flow of byproduct gases in coke oven standpipes preparatory to discharging or charging oven:

Moves controls to regulate flow of gases to collecting main, to open standpipes and oven charging holes, clear oven and standpipe of gases, and control flow of ammonia liquor and steam during charging. Sweeps coal spillage into charging holes. Cleans tops of ovens, using broom and shovel. Cleans standpipe, nozzle and charging holes, using chisel, bar and drill. Pokes coal from hoppers on charging car, using bar.

May assist in changing standpipes and ascension elbows.

8167-178 LEAD-OXIDE MAKER(chem., n.e.c.) DPT:685
red lead burner.

GED: 2 SVP: 2 EC: I PA: M 4

Tends furnace that converts lead into lead oxide for use in products such as storage batteries and ceramics:

Observes gauges and adjusts controls to regulate fuel feed, and to maintain process temperatures in melting pot and furnace. Loads specified quantity of lead billets onto conveyor to feed melting pot, using hoist. Starts pump and furnace rotators to transfer molten lead from melting pot to furnace and to ensure uniform heating of materials. Turns switch to start furnace air-blast to activate oxidizing process and to pump lead-oxide to settling chambers. Takes samples of lead oxide and makes simple chemical tests.

8167-182 LIME-KILN-OPERATOR HELPER(chem., n.e.c.) DPT:685

GED: 2 SVP: 2 EC: B 3 5 PA: M 4

Helps operator to control operation of oil fired kilns and auxiliary equipment that recover lime from lime sludge, performing any combination of the following duties:

Starts and stops equipment, and turns valves as directed. Breaks lime into lumps, using steel bar. Prepares flocculating agent to be used in settling tanks. Dumps ingredients into mixing tank, and opens valves to admit flow of water and steam. Starts agitators to mix ingredients, observes thermometer and closes valves when specified temperature is attained. Starts pumps to transfer material from mixing to settling tanks. Draws samples of lime for laboratory analysis. Starts conveyor to transfer limerock from storage bins to production area or silos.

Measures amount of rock in silos using weighted measuring line. Keeps equipment and work area clean, using water or air hose. See also definition for term title, 02-160 HELPER (any ind.).

8167-186 CARBON-BLACK-FURNACE-OPERATOR HELPER(petrol. & coal prod.) DPT:687

GED: 2 SVP: 2 EC: I 3 5 7 PA: L 4

Helps operator to control semi-automatic furnaces and auxiliary equipment to produce carbon black by partial combustion of crude oil, performing any combination of the following duties:

Patrols carbon production and filter areas at regular intervals to inspect equipment and piping for malfunctions or leaks, and notifies control-room of unusual conditions. Observes product through sight glasses at various stages of drying process to detect malfunctions. Observes operation of discharge conveyors, clears clogging, using rod, and adjusts feed gates as required to maintain uniform flow of material. Fills and delivers sample bottles to laboratory for analysis. Weighs and labels containers. See also definition for term title, 01-160 HELPER (any ind.).

8167-190 OVEN LOADER(non-metal min. prod., n.e.c.) DPT:687

heat curer.

GED: 2 SVP: 2 EC: I 3 6 PA: M 3 4

Loads and unloads preheated oven that cures resinoid, rubber or shellac bonded abrasives:

Reads work order cards to arrange oven loads into groups of articles requiring similar temperature and heating time. Stacks or hangs articles on rack, manually or using hoist, and pushes rack into preheated oven. Removes rack from oven after specified time. Removes articles from rack, counts and records number of articles cured and packs them into boxes for further processing.

Cookers

8167-210 through 8167-250

8167-210 SOAP BOILER(soap) DPT:362

GED: 3 SVP: 6 EC: I 3 4 5 6 7 PA: M 2 4 5 7

Controls kettle to boil soap ingredients, such as; lye, salt, oils and tallow, to specified saponification level:

Opens, or directs workers to open valves that admit ingredients such as, oils or tallows in specified amounts to charge kettle. Weighs, using scales, and dumps saponifying ingredients such as caustics into kettle. Opens steam valve to heat kettle to specified temperature. Observes temperature gauges and adjusts valve to maintain temperature within critical limits from initial to final boil, until saponification is complete. Adds brine, as process knowledge indicates, to separate glycerol from soap. Directs worker to open valve that transfers lye solution to tank preparatory to recovery of glycerol. Draws and tests samples of lye and soapstock for texture and colour, glycerol, free alkali and caustic soda contents, utilizing titration method. Adds caustics as required to neutralize free fatty acid. Dips hot trowel into soapstock and observes run-off of soapstock to evaluate quality. Adds water, brine or caustic, and reboils mixture as required. Signals workers to start pump and open valves to transfer soapstock to storage tanks. Engages and directs workers in cleaning equipment and work area using steam jet.

May direct workers and control several kettles during production processes.

8167-214 POLYMERIZATION-KETTLE OPERATOR(chem., n.e.c.) DPT:382

GED: 3 SVP: 6 EC: I 6 PA: L 4

Controls reactor vessels to polymerize raw resin materials and solvents to produce compounds; such as, phenolic, acrylic or polyester resins, or polymer emulsions:

Pumps specified amount of raw material into calibrated tank or kettle according to formula and turns valve to transfer material into reactor kettle. Starts reactor agitators, and pumps reagents and catalysts into reactor. Starts circulation and vacuum pumps, observes gauges and adjusts valves to regulate flow of preheated or cooled fluid around jacket of reactor to maintain process temperature and pressure and regulate polymerization reaction. Tests viscosity, acidity and alkalinity of resins, using viscosimeter and gauge, to determine length of

polymerization time. Turns valves to discharge processed material from reactor into cooling tanks. Records processing time, pressure, temperature, and test results in log book and prepares daily reports on amounts of raw materials used and quantity of finished product stored. Transfers raw materials, such as, monomers, solvents or liquid propellants from tank trucks or railway tank cars to storage tanks, using flexible lines and vacuum pumps.
May dump specified compounds into polymerized resins to thicken product.

8167-218 VARNISH MAKER(paint & varn.) DPT:682
GED: 3 SVP: 6 EC: 1 PA: VH 3 4 7

Operates equipment to melt, cook and mix ingredients such as gum, oils, turpentine and naphtha to make varnish:
Weighs and dumps ingredients such as gum, glycerine or synthetic resins into heated agitator tank. Pours in oil such as linseed or soy bean using hoist to lift and empty drums. Observes temperature gauges and adjusts burner controls to regulate heat to cook mixture according to process formula. Starts pumps to transfer cooked varnish base and thinner into reducing tank. Starts agitators depressing button to mix ingredients for specified time. Draws and fills test tube with varnish and compares with standard sample to determine viscosity, colour and drying qualities. Pumps varnish through filter press that removes sediment, and to storage tanks when process is completed.
May be designated according to type of varnish made; for example, Alkyd-Varnish Maker
Cold-Varnish Maker
Spirit-Varnish Maker

8167-222 AUTOCLAVE OPERATOR(chem., n.e.c.) DPT:582
GED: 3 SVP: 5 EC: 1 6 7 PA: M 4

Operates autoclaves, and auxiliary equipment to process solid and gaseous ingredients into chemical products, such as melamine, according to specifications:
Reads production schedule to determine product, ingredients to be used, temperature, pressure, and duration of process. Turns valves to release flow of dicyandiamide powder to blender heater to preheat powder. Transfers powder into scale hopper, turning valve. Weighs and dumps preheated dicyandiamide powder into autoclave. Starts pump and turns valves to admit metered gaseous ammonia into autoclave. Closes and seals autoclave head, using air wrench. Adjusts dials to regulate pressure and vent excessive pressure to atmosphere. Observes specified reaction time and turns valves to admit oil into autoclave to cool ingredients. Opens autoclave, turns switches to lower and start drilling rig to separate material preparatory to unloading. Connects conveyor system, and starts blowers and fans to transfer material to storage bin. Keeps operation records. Performs minor maintenance duties, such as replacing gaskets, dismantling and cleaning equipment, using hand tools.

8167-226 DIGESTER OPERATOR(chem., n.e.c.) DPT:582
GED: 3 SVP: 4 EC: 1 6 7 PA: L 4

Operates battery of digesters and auxiliary equipment in which titanium slag is treated with sulphuric acid and water to produce a liquor used in the production of titanium oxide pigments:
Turns valves, starts pumps and conveyors to transfer to digester vessels specified quantities of sulphuric acid from holding tanks, and titanium slag from weigh hopper. Opens valves to admit steam and air into digester to raise temperature and pressure. Starts scrubber system to remove acidic gases. Adds caustic acid as required. Observes temperature and pressure gauges and adjusts valves to regulate flow of air and steam to maintain process conditions. Opens valves to admit water into digester to dissolve material. Takes specific gravity tests at regular intervals, and draws samples for laboratory analysis. Starts pump to transfer liquor from digester into storage tanks. Keeps records for production control.

8167-230 PRECIPITATOR OPERATOR(chem., n.e.c.) DPT:682
GED: 3 SVP: 4 EC: 1 PA: L 4

Controls precipitation tanks and auxiliary equipment to remove iron particles from liquor used in the production of titanium dioxide:
Observes control panel, and adjusts valves to transfer dioxide liquor from supply tank to precipitation tank, and to add specified quantity of nuclei to mixture. Observes temperature and pressure gauges, opens

and adjusts steam valves and air vent, and moves controls to regulate and maintain specified temperature and pressure. Boils liquor for specified period of time, and turns valves to shut off steam and add required quantity of quench-water, and starts agitators in tank. Opens valve to release liquor into coolers, and observes temperature gauge to ascertain end of cooling process. Transfers solution into feed tanks for storing. Draws samples at regular intervals for laboratory analysis.

8167-234 CADMIUM-LIQUOR MAKER(paint & varn.) DPT:685
GED: 2 SVP: 3 EC: 1 6 7 PA: H 4

Tends equipment that dilutes cadmium pellets in heated acid bath to produce cadmium sulphate:
Dumps barrels of cadmium pellets into water tank, and adds specified amounts of nitric and sulphuric acids. Turns valve to regulate flow of steam into coils and heat mixture to boiling point to produce cadmium liquor. Tests liquor solution to determine acid and impurity contents as per laboratory specifications. Starts pumps to transfer liquor solution from heating to purification tank to cleanse cadmium liquor and neutralize metallic impurities, and to transfer purified liquor to storage tanks. Maintains acid lines and equipment in good working condition using hand tools.
May tend furnace to melt cadmium preparatory to dumping into water tank.

8167-238 DEVULCANIZER TENDER(rubber) DPT:685
GED: 2 SVP: 3 EC: 1 6 7 PA: L 4

Tends machine that automatically processes ground scrap rubber with chemical compounds to produce reclaimed rubber:
Pulls levers to drop measured amount of scrap rubber into scale hopper. Pushes loaded hopper along monorail and pulls lever to dump contents into machine. Turns valves and observes gauges to pour specified quantities of materials; such as, oil, caustics, pigments and water onto scrap rubber in devulcanizer. Closes and bolts loading hatch to seal devulcanizer. Turns valves and observes gauges to maintain specified operating temperature and release steam pressure preparatory to unloading devulcanizer. Opens discharge valve allowing steam pressure to blow devulcanized rubber into holding tank.
May attach specified cycle charts to automatic timer. May record production data.

8167-242 KETTLE TENDER(chem., n.e.c.; soap) DPT:685
GED: 2 SVP: 3 EC: 1 6 7 PA: M 4

Tends heated kettles that boil and blend soap ingredients:
Opens valve to admit steam into kettle jacket preparatory to boiling soap ingredients. Weighs and dumps ingredients; such as, caustic potash, fat, sulphuric and hydrofluoric acids into kettles manually, or using hoist. Observes temperature gauges and rate of reaction of mixture and adjusts valves to regulate temperature and maintain process conditions. Starts helicoidal mixer to stir and blend ingredients as specified. Draws samples and delivers them to laboratory for analysis. Opens valve to drain solution from kettles into containers or storage tanks. Glues product identification labels on containers. Keeps work area and equipment clean, using steam and water hoses.
May keep production records. May patrol processing area to inspect equipment and report defects or potential hazards to foreman. May transfer materials to and from tank cars, using pumps and hoses. May be designated according to type of heating vessel used; for example, Twitchell Tender

8167-246 ASPHALT-HEATER TENDER(petrol. & coal prod.) DPT:685
still operator.
GED: 2 SVP: 2 EC: 1 3 6 7 PA: L 4

Controls equipment that heats asphalt to specified temperature and viscosity for use in manufacture of roofing materials:
Starts pumps to fill tanks with asphalt to desired level. Observes furnace gauges and dials, turns wheels and valves to regulate and maintain specified temperature, pressure and depth of asphalt in tanks. Starts discharge pumps and turns valves to direct flow of heated asphalt into plant, storage tanks or stills.
May operate fuel oil pumps to supply fuel oil to stills. May take samples of asphalt or tar to laboratory for tests. May keep records for production control.

8167-250 RECOVERY-VAT TENDER(plastic prod.) DPT:685
GED: 2 SVP: 2 EC: I 5 PA: M 3 4

Tends heated vats to re-treat defective transparent wrapping materials:

Lifts and carries bales of defective transparent material to recovery vat area. Dumps sheets of wrapping materials into vats manually. Adjusts controls such as, thermostat to regulate temperature of vats and heat solution according to process conditions. Turns valves to admit chemicals into vats or weighs specified quantity of chemicals, using scales and dumps chemicals manually into vats to treat materials.

Driers

8167-270 through 8167-294

8167-270 SOAPFLAKE-DRIER OPERATOR(soap) DPT:682
drier operator.
GED: 3 SVP: 4 EC: I 4 5 7 PA: L 2 4

Operates rollers and driers that convert viscous soap into flakes and removes excess moisture from flakes:

Turns valves and operates pumps to admit refrigerated water to chilling rollers and steam to heating rollers, to chill or heat particular rollers to process temperatures. Opens valves to allow viscous soap to flow from crutcher machine or storage tank into chamber equipped with opposed heating and chilling rollers. Operates pump to direct flow of soap between opposed rollers to spread soap into a thin film that solidifies and adheres to the chilling roll. Adjusts flaking knives that cut soap film from chilling roll to produce ribbons. Turns valves to admit steam to drying cylinders and oven jackets to heat driers to specified temperature. Starts conveyor to route soap ribbons into driers to remove excess moisture and break soap ribbons into flakes. Removes sample of dried flakes to test for moisture content using moisture testing apparatus, and records test results. Regulates valves to adjust temperature to complete drying cycle. Starts conveyor to discharge and route dried flakes from driers into storage bins. May clean equipment using steam and air hose. May measure contents of storage tanks using dipstick.

8167-274 DRYHOUSE TENDER(explosives) DPT:585
GED: 2 SVP: 3 EC: B 6 PA: L 4

Tends dryhouse to dry priming mixtures or pyrotechnics:

Transports trays filled with explosive primers or pyrotechnics from loading room to steam heated dryhouse, using shockproof cart. Places trays into numbered bins. Observes gauges and adjusts valves to control temperature and humidity in dryhouse. Delivers dried priming mixtures or pyrotechnics to production or storage area using shockproof cart. Keeps perpetual inventory of stock, and records data, lot number, quantity and grade of stock delivered.

May clean working area according to safety regulations. May tend vacuum tank and pump to force-dry priming mixture to accelerate drying. May tend dryhouse to dry a particular type of mixture and be designated accordingly; for example, Primer-Dryhouse Man

8167-278 NITROCELLULOSE-DRIER TENDER (explosives) DPT:585
GED: 2 SVP: 3 EC: I 4 6 7 PA: M 4

Tends cotton linter drier and nitration finishing equipment including stabilizers, heaters and poachers used in the production of nitrocellulose:

Moves bales of cotton linters from storage area to drier, using electric hoist. Opens bales, using wire cutters, and feeds linters into drier, using shovel. Adjusts controls to regulate flow of hot air into oven and speed of conveyor to maintain process temperature and efficient drying. Tends centrifugal wringer to remove excess acid from dipper linter. Tends stabilizers and heaters to cut strands of nitrocotton into smaller segments. Starts agitators to pump nitrocotton into poaching tubes for removal of impurities. Starts hydraulic ram to fill and pack drums with nitrocotton and rolls drums to storage area manually. Rakes dried cotton linters into weigh cans, removes dust clusters and inadequately processed cotton. Slides cans onto scales manually and adds or removes linters to obtain specified weight preparatory to further processing. Keeps nitration and stabilization reports, and records number of cans filled, weight and number of bales of cotton linter used. Controls equipment to combine and process specified

amounts of acid and cellulose to produce nitrocellulose. Keeps wringer screens, acid filters and work area clean.

8167-282 SOLVENT-RECOVERY TENDER(explosives) DPT:665

drier operator.

GED: 2 SVP: 3 EC: I 6 PA: L 3 4 5

Tends air drying equipment that heats propellant powder to recover process solvents, such as, acetone, ether, and alcohol for re-use:

Signals workers to move cars containing powder into solvent recovery house for air-drying treatment. Connects condenser and hot air system outlets to top and bottom ducts of cars. Sets heat regulator on hot air system, and starts blower to force hot air into cars to dry powder. Moves controls to start suction fan and condensers to recuperate process solvents from powder. Turns valve to drain solvents into collecting tanks. Observes temperature gauges and adjusts controls to maintain process temperature within solvent recovery house. Keeps temperature record chart.

8167-286 ASPHALT-PLANT-DRIER TENDER(petrol. & coal prod.) DPT:685
burnerman.

GED: 2 SVP: 2 EC: O 3 5 7 PA: L 4

Tends stationary or portable machine to dry and heat aggregate prior to mixing with asphalt:

Starts power unit to rotate drying and heating drum. Lights burner and turns valves to adjust drafts and regulate heat. Observes pyrometer to ascertain that process temperature is maintained. Starts conveyor such as bucket line or vibrating screens to load rotating drum with aggregate. Adjusts gate to regulate flow of aggregate from supply bin to conveyor. Lubricates and makes minor adjustments to equipment. May start fans in dust collector and activate water jets in scrubber.

8167-290 DRIER TENDER(chem., n.e.c.) DPT:665
GED: 2 SVP: 2 EC: I 3 5 7 PA: M 2 4 5 6

Tends driers that heat liquids, slurries or solid materials to remove water or volatile liquid components:

Starts conveyors to load driers, or shovels, dumps or pumps materials into pans, trays or other containers for placing into driers. Turns valves, and starts fans to admit steam and hot air to drying chamber. Observes thermometer and humidity gauges and moves controls to maintain temperature and air circulation in driers to withdraw vapors from filter system and drain materials. Examines and feels materials for moisture content, or draws samples for laboratory analysis. Starts discharge conveyor at end of cycle, to unload drier and transfer dried materials to storage or production area.

May record temperature and pressure readings, drying time and hourly production. May make minor adjustments to equipment. May tend particular type of drier and be designated accordingly; for example,

Batch-Drier Tender
Cabinet-Drier Tender
Centrifuge-Drier Tender
Rotary-Drier Tender
Tunnel-Drier Tender
Vacuum-Drier Tender

8167-294 DRIER-TENDER HELPER(chem., n.e.c.) DPT:687
GED: 1 SVP: 2 EC: I 7 PA: H 4

Helps to tend equipment that heats liquids, slurries or solid chemical materials to remove water or volatile liquid components, performing any combination of the following duties:

Fills sample bottles for laboratory testing. Inspects equipment and piping for leaks or malfunctions and notifies equipment tender or supervisor of unusual conditions. Cleans equipment, using hose and water. Fills boxes or drums with chemical ingredients, using filling device, and weighs contents, using scales. Marks identifying information on containers, using stencils. See also definition for term title, 02-160 HELPER (any ind.).

May inspect product through sight glasses at various stages of drying process to detect defects. May lower gauge tape into storage towers to determine quantity of material stored. May assist tender of particular type of drier and be designated accordingly; for example,

Batch-Drier-Tender Helper
Cabinet-Drier-Tender Helper

Centrifuge-Drier-Tender Helper
Rotary-Drier-Tender Helper
Tunnel-Drier-Tender Helper
Vacuum-Drier-Tender Helper

Other Heat Treaters
8167-314 through 8167-350

8167-314 AMMONIA-PLANT OPERATOR(chem., n.e.c.)
DPT:382
GED: 3 SVP: 5 EC: B 5 6 7 PA: L 2 4 7

Controls reform furnace that cracks methane gas, and synthesis loop, converter and auxiliary equipment that combine hydrogen and nitrogen in a sequential reaction process to produce anhydrous ammonia:

Lights gas burner and starts pumps, scrubbers, and absorption units. Moves controls on panel board to regulate temperatures of solutions and to open valves to admit heated purified air and hydrogen into combustion chamber of burner, where nitrogen driven from air combines with hydrogen to form ammonia. Observes potentiometers, pressure and temperature gauges, and adjusts controls according to operating instructions and charts. Starts pumps to direct flow of fresh solutions into scrubbing and absorption towers when readings indicate excessive alkalinity. Records operational data in log book. Collects liquid ammonia samples from synthesis loop for testing in laboratory by opening valves of automatic sampling system or bleeding feed lines.

May compute percentage of hydrogen and ammonia in burner gases, using standard test procedure.

8167-318 OXIDATION OPERATOR, NITRIC ACID(chem., n.e.c.)
acid operator.
DPT:382
GED: 3 SVP: 5 EC: I 5 6 7 PA: L 2 4

Controls ammonia oxidation equipment and acid concentration units to produce nitric acid of specified strength for use in explosives manufacturing:

Turns valves and starts pumps to admit and circulate anhydrous ammonia through evaporator and converter units at specified rate. Observes gauges and chart recorders, and adjusts controls to regulate temperatures, pressures and reaction time to maintain process conditions. Starts compressors to supply air to converter to oxidize ammonia in presence of catalyst. Operates auxiliary equipment; such as, heaters, scrubbers, compressors, filters, distillation units, condensers and humidifiers that prepare or process materials leaving or entering converters. Draws and tests samples for specified characteristics, using standard gas-analysis procedures and equipment, and forwards other samples for laboratory analysis. Sets automatic control system that maintains process in safe operating condition and sounds alarm if malfunction occurs. Opens valve to admit flow of water to cooler and absorption tower to convert nitrous oxide to nitric acid. Starts pumps to transfer nitric acid to storage, or conversion unit for strengthening. Monitors temperature and pressure gauges, and adjusts valves to regulate flows of sulphuric acid and weak nitric acid into mixing tank and to control flows of steam, water, air and acids through dehydrating, absorption and bleaching towers, still and condenser to produce concentrated nitric acid. Records instrument readings in shift log book.

May dilute sulphuric acid following specified procedures

8167-322 SULPHURIC-ACID-PLANT OPERATOR(chem., n.e.c.)
DPT:582
GED: 3 SVP: 5 EC: B 6 7 PA: L 2 4

Operates from control panel semiautomatic equipment that produces sulphuric acid by contact process:

Turns valves and moves levers to start and stop flow of liquids and gases through converter, heat exchangers, absorber, cooler, and related equipment. Monitors lights, gauges, and recording instruments on control panel to determine that temperature, steam pressure, and flow of sulphuric and nitric acids and oleum through system conform to plant standards. Patrols area and records gauge readings hourly. Collects sample of product, for laboratory analysis.

May replenish supply of sulphur in melting pit. May pump sulphuric acid into and from tank cars, tank trucks, and storage tanks.

8167-326 EVAPORATOR OPERATOR(any ind.)
DPT:682
GED: 3 SVP: 5 EC: I 6 7 PA: L 4

Operates one or more evaporators to concentrate chemical or sugar solutions or suspensions to specified density:

Pumps liquid into evaporator tank or vacuum pan. Switches on exhaust pump to obtain specified vacuum. Turns valves to admit steam into evaporator chest, coils or jackets, observes gauge and adjusts valve to maintain specified temperature. Checks gravity of concentrate, using hydrometer and adjusts feeds, temperatures and vacuum accordingly. Pumps concentrated liquid to storage or slurry to filter.

May operate equipment, such as preheaters, thickeners and filters. May operate multiple effect evaporators and be designated accordingly,

Multiple-Effect-Evaporator Operator

8167-330 TOWERMAN(soap)
DPT:362
GED: 3 SVP: 4 EC: I 6 7 PA: L 2 4 5 6

Operates heated-air tower from control panel to make a variety of soap powders by atomizing liquid soap, according to formula:

Starts pumps and fans, and adjusts valves to regulate flow of oil, air, liquid soap and perfume to tower or collectors, and steam to heat exchangers. Observes temperature, pressure and flow gauges and adjusts controls to maintain specified processing conditions. Weighs samples of material before and after drying, or subjects it to a moisture meter test to determine moisture loss and percentage of moisture remaining in powder. Inspects operating units such as towers, soap spray storage tanks, scrubbers, collectors and driers to ensure proper functioning of equipment. Keeps log of tower operations. Directs workers engaged in operating auxiliary machinery to regulate flow of materials and product. Oversees cleaning of towers, strainers and spray tips. Replaces defective equipment, such as strainers and pump valves, using hand tools.

May inspect product for such characteristics as density, colour, dye dispersal and particle size.

8167-334 SPRAY-DRIER TENDER(paint & varn.)
DPT:585
GED: 2 SVP: 3 EC: I 7 PA: L 4

Tends spray driers that evaporate water from slurries to produce paint pigments:

Observes instruments and monitors pigment washing process that removes impurities from pigment cake. Turns valves to add water to semi solid pigment to prepare pigment slurry, according to specifications. Starts pumps to force slurry through atomizer nozzle in drier, and adjusts nozzle to regulate spray as specified. Observes temperature recorders, and adjusts valves, controls, and dampers to heat and direct air blast through drier to evaporate water. Observes discharge conveyor for malfunctions to maintain flow of dried materials to packing area. Observes operation of automatic pigment-dust collection system and replaces collector bags as required, using hand tools. Flushes or rakes out accumulated powder remaining in drier, and clears clogged lines using steam hose and hand tools. Records temperature and pressure readings, type of nozzle used and density of powder obtained.

8167-338 EVAPORATOR TENDER(chem., n.e.c.)
DPT:685
GED: 2 SVP: 3 EC: I 5 PA: L 4

Tends evaporators that condense used black liquor from pulp digesters to prepare it for further refining at recovery furnace:

Adjusts controls and turns valves of evaporators to regulate flow of liquor and maintain prescribed temperature to concentrate liquor to specified density. Tests samples of black liquor concentrate, using hydrometer and thermometer to determine density at specified temperature. Cleans evaporator chambers and tubes, using hose and hot water.

8167-342 FLAKER TENDER(chem., n.e.c.; explosives)
DPT:685
GED: 2 SVP: 2 EC: I PA: M 4

Tends drum-flaking machine that solidifies and converts chemical compounds into flakes:

Turns valve or starts pump to transfer molten materials or concentrated solutions from drier into feed pan of flaking machine. Adjusts rheostat and turns valves to regulate speed of revolving flaking drum that cuts flakes to desired thickness, and flow of coolant to control

solidification of flakes according to specifications. Scoops samples of flakes into container for laboratory moisture analysis. Dumps flakes into paper bags or paper lined containers, weighs and places containers manually onto pallets or conveyor for removal to storage area. May tend auxiliary equipment; such as grinding mills, shaker screens, loading conveyor and bag flatteners. May also tend equipment such as pelleter and water tank to manufacture T.N.T. pellets (nitropel).

8167-346 MILLED-RUBBER COOLER(rubber) DPT:685
GED: 2 SVP: 2 EC: 1 5 PA: M 3 4

Tends conveyor, and spraying and drying unit that cools and dries milled rubber stock:

Monitors flow of, or lifts rubber stock as it drops from mixer through batch-off mill onto water-filled conveyor for cooling. Removes stock adhering to mill rollers or accumulating on conveyor, using long-handled scraper. Adjusts conveyor speed and turns valves to regulate water spray and airflow that cools and dries stock.

May spray powder over slabs to prevent stickiness. May write identification data on slabs such as type and quantity of rubber stock produced and prepare production record sheet.

8167-350 SULPHURIC-ACID-PLANT-OPERATOR HELPER(chem., n.e.c.) DPT:687
GED: 2 SVP: 2 EC: B 6 7 PA: L 2 4 5 7

Helps operator to produce sulphuric acid, by contact process, performing any combination of the following duties:

Opens and closes valves, or moves levers, to direct flow of acid from production unit to storage tanks as directed. Observes machinery and equipment to detect malfunctions, leaks, and spills and reports them to maintenance crew. Cleans work area around units, using broom, shovel, and water hose. Collects samples for laboratory testing, using vial, test tube, or acid jar. Measures level of acid in tank, using weighted steel tape and records in log book. See also definition for term title, 02-160 HELPER (any ind.).

May record temperature and pressure gauge readings.

8171-CRUSHING AND GRINDING OCCUPATIONS, CHEMICALS AND RELATED MATERIALS

This unit group includes occupations concerned with operating and tending machines to reduce chemicals and related materials to smaller particles by any combination of chipping, crushing, cutting, grinding or pulverizing action.

8171-110 PULVERIZER OPERATOR(petrol. & coal prod.) DPT:682
crusher and blender operator.
GED: 3 SVP: 4 EC: 1 5 6 7 PA: L 4 7

Operates machines that crush or pulverize coal or coke to produce metallurgical coke or industrial fuel:

Moves levers and turns valves to regulate and adjust crushers, driers, pulverizers, screens and conveyors, according to specified product. Adjusts bin gates and deflector blade to control rate of feed to conveyors, crushers and screens. Fills scale tank to specified weight with pulverized coal or coke, or adjusts controls to direct coal or coke to storage bins. Observes equipment for correct operation and reports malfunctions or necessary repairs. Clears stoppages, using bar and cleans spilled material around machines, using broom and shovel. Takes samples of product and tests moisture content, using test meter. Lubricates machinery, using grease gun. Records operating data in shift log.

8171-114 GRINDER OPERATOR(rubber) DPT:582
millman.
GED: 3 SVP: 3 EC: 1 5 7 PA: H 3 4 7

Operates grinding machine that grinds and pulverizes vulcanized reclaimed rubber for re-use:

Starts grinder, pulverizer and screw conveyor, by depressing button. Loads pre-selected scrap into grinder. Observes thermometers and dials for room and exhaust temperatures. Regulates speed of conveyor feed to pulverizer to avoid overloading and prevent overheating and burning of rubber. Observes indicators for water cooling system and air vent temperatures, adjusts water flow valve and opens airflow ports, to cool machine jacket or grinding stock. Observes magnetic grid at mouth of pulverizer that screens pellets to remove metallic matter. Removes shaker screen and wipes off accumulated metal, using cloth and broom. Places bag on scale, under discharge hopper of pulverizer, to load ground rubber in bag to specified weight. Folds and sews bag. Marks weight on tag and attaches tag to bag. Places bag on skid, manually, for removal to storage area. Keeps records of weight and type of material ground.

8171-118 COKE GRINDER(petrol. & coal prod.) DPT:685
GED: 2 SVP: 4 EC: 1 5 7 PA: L 4

Tends machine that grinds coke, to produce carbon and graphite:

Adjusts mill gauge to meet grind specifications, and starts conveyors, screening and grinding equipment. Moves gate levers to regulate flow of raw coke into machine, and processed coke to mixer or packing-machine hopper. Turns valve to regulate moisture content of material and opens valves to fill bucket under hopper spouts. Observes operation to ensure continuity of flow and to detect malfunctions.

May tend machine that grinds, and blends pitch, oil and coke used in making electrodes.

8171-122 PULVERIZER(chem., n.e.c.) DPT:685
blender.
GED: 2 SVP: 4 EC: 1 7 PA: H 4

Mixes, dries, micropulverizes and blends synthetic food dyes for commercial application:

Weights synthetic dyes, to prepare batch according to formula. Scoops batch into prefilled hot water tank to mix slurry, and pumps slurry into trays. Places trays in steam heated oven for drying. Dumps trays of dried synthetic dyes into pulverizer and starts machine. Blends pulverized dyes, by moving controls on blender and adding ingredients as specified. Takes sample for laboratory test, using scoop. Dumps pulverized dyes into kegs, weighs and seals kegs and transports them to storage area, using handtruck.

May stack filled kegs, using powered handtruck.

8171-126 PULVERIZING-AND-SIFTING EQUIPMENT TENDER(explosives) DPT:685
GED: 2 SVP: 4 EC: 1 6 PA: H 3 4

Tends jaw crusher, disintegrator, ball mill, and agitator-sifter to pulverize and sift ingredients of propellant and priming powders, performing any combination of the following duties:

Feeds raw material into machine hopper, manually or using scoop. Adjusts space between reciprocating crusher jaws, by turning screw with wrench. Changes number of balls in mill. Turns rheostat to regulate vibrator speed. Starts jaw crusher, ball mill and agitator-sifter, to obtain granules within specified grain size and in desired proportions. Adds or screens out grains, following laboratory size analysis, to bring grains to acceptable proportions. Pours sifted material into rubber pouches and transfers them to drier, pushing handtruck.

8171-130 STONE-MILL TENDER(paint. & varn.) DPT:685
millman; paint grinder, stone mill.
GED: 2 SVP: 4 EC: 1 5 PA: M 4 7

Tends mill equipped with grinding stones to reduce paint or paint ingredients to specified fineness:

Dumps ingredients from chute to hopper which feeds mill automatically, and starts mill. Examines mixture to determine fineness of grind, using graduated bar. Turns screw to set clearance between grinding stones, to obtain required fineness of ingredients. Opens valve to transfer mixture into wheeled tank. Cleans mill stones, hopper and scraper, using water hose, solvent and brush.

8171-134 WHEEL-MILL TENDER(explosives) DPT:685
GED: 2 SVP: 4 EC: I 6 7 PA: M 4 7

Tends wheel mill that crushes explosives ingredients; such as, charcoal, potash and sulphur, for further processing:
Dumps prescribed number of bags of ingredients into bowl of wheel mill and spreads ingredients with wooden shovel to charge mill. Starts wheel mill revolving for specified time, by pulling lever and turning motor switch. Stops mill and fills bag with powder, using shovel, for storage or further processing. Loosens or breaks- up caked powder with spud, ensuring that powder is well soaked with water. Sifts pulverized material, by dumping bags onto screens and manually pushing material through screens with wooden scraper. Weighs bags of pulverized material to obtain desired weight. Moves bags to storage or shipping, using handtruck. Cleans charge house, using broom and dust pan, and washes mill with water hose. Inspects, oils and greases wheel mill bearings and shafts, and tightens scraper bolts with wrench to minimize danger of explosion.
May tend vibrating screens to separate particles of varying size.

8171-138 CUTTERMAN(syn. fibres) DPT:585
glassroom attendant; staple cutter.
GED: 2 SVP: 3 EC: I 5 PA: M 4 7

Tends machine that cuts fibre glass threads or synthetic fibre filaments, performing any combination of the following duties:
Threads fibreglass or synthetic filaments through guide, or around drum and into cutters of machine. Depresses switch to start action of blades that automatically cut material into specified lengths preparatory to washing or spreading on conveyor. Observes cutting operation to detect malfunctions, and adjusts speed of cutters, as required. Feels tension of fibreglass threads from spools to cutters to prevent breakages. Replaces spools on feed stand with full ones, and ties together ends of material to ensure continuous feeding of machine. Replaces cutting blades, using hand tools. Records production data such as condition, quantity and type of material used, and malfunctions of machine.

8171-142 GRINDER TENDER(chem., n.e.c.) DPT:585
crusher operator; pulverizer operator.
GED: 2 SVP: 3 EC: I 7 PA: H 4

Tends machine that pulverizes solid materials used in manufacturing chemicals and related products:
Installs grinding discs or screens of specified type and mesh in machine, using hand tools. Starts feed conveyor and shovels or dumps material into machine hopper. Starts grinder and observes ground product as it is discharged into containers, for impurities, lumps, or improperly sized particles. Cleans machine and conveyors, using air hose, scrapers, brushes or vacuum cleaner, to prepare equipment for further grinding. Weighs container, records weight or lot number, and enters number of containers filled on inventory record.
May shovel ground product into containers, for storage, shipment or further processing. May tend machine that fills bags or drums with product. May repair equipment, using hand tools, such as wrenches, hammers and pliers.

8171-146 BLACK-POWDER GRAINER AND GLAZER(explosives) DPT:685
GED: 2 SVP: 3 EC: I 6 7 PA: L 4 7

Tends corning mill to grain black powder chips and glazing mill to smooth and harden grains:
Unloads black powder chips into corning mill hopper, hauling truck into position with power driven winch. Washes sides, wheels and platform of truck with hose after unloading and lowers empty truck into place under grain chute using winch. Evacuates personnel from building, closes all doors and pulls lever in control house to start corning mill. Stops machine after specified time and shovels spilled grains into truck. Clamps bag in position at dust hopper to collect maximum amount possible. Inspects grains, shaker screens, rolls and shaft bearings regularly to detect faulty graining, overheating and defective screens. Adjusts spacing between mill rolls, according to powder type, using feeler gauge. Starts glazing mill, and opens air and graphite valves to coat grain with graphite for hardening and smoothening. Verifies temperature of grains with thermometer. Opens trap door at end of cycle to release glazed powder into truck and delivers powder to pack house. Oils and greases equipment as

required. Sweeps floors, bags dust and washes floor and equipment, using broom, spud, shovel and water hose.

8171-150 DOPE-HOUSE MAN(explosives) DPT:685
block-breaker operator; dry-house operator.
GED: 2 SVP: 3 EC: I 5 6 PA: M 4

Tends equipment that grinds mixes and screens materials; such as, nitrocotton blocks, sodium nitrate, sulphur and clay, for use in making explosives:
Dumps barrels of nitrocotton cakes into manual screener and turns handle of screener to grind cakes into powder. Scoops powder into muslin bags, ties bags with drawstring, and delivers to processing area. Tends central control panel to start conveyors and elevators that convey materials such as sodium nitrate, sulphur and clay through mixer, grinder and screener and deposits them in bins.
May test moisture content of ingredients, using carbide-filled jar and gauge that registers gas produced.

8171-154 LEAD-OXIDE-MILL TENDER(chem., n.e.c.) DPT:685
GED: 2 SVP: 3 EC: I 6 7 PA: H 4

Tends crushing mill to make lead oxide from pig lead, for use in storage batteries:
Places bars of pig lead on conveyor and sets control timer to deposit bars into grinding drum at regular intervals. Turns tap to spray water inside mill to hasten oxidation process and to regulate temperature. Places empty containers on conveyor and sets scale to register weight of container. Presses switch to start mill and sets automatic signal device which sounds when container is filled to required level. Removes filled containers and loads them on pallet, using hoist. Tags container to indicate weight and batch number. Monitors process and makes adjustments as required. Wets floor to settle dust, using hose.
May break flakes and lumps, using crowbar, and mix powdered lead oxide with flakes or lumps to facilitate powdering. May tap conveyor pipes attached to mill, using wooden mallet, to dislodge buildup on pipes.

8171-158 SCRAP-RUBBER GRINDER(rubber) DPT:685
fine grinder.
GED: 2 SVP: 3 EC: I 5 7 PA: M 3 4

Tends mill that grinds scrap rubber into fine particles for reprocessing:
Installs shaker screen of specified mesh, using wrench. Adjusts mill rolls for grinding by turning wheel to specified setting. Starts mill, conveyor, shaker screen and fans to transfer ground stock to reclaimator machine or to storage. Feeds scrap rubber into mill rolls by shoveling, opening slide on conveyor or dumping barrels of material. Observes ground rubber moving over conveyor and through shaker screen to detect jamming. Turns water valve to regulate temperature of rolls to prevent scorching stock.
May position drum at discharge end of chute and open slide to permit outflow of ground rubber stock passing through shaker screen, when off-bearing of material is not automatic.

8171-162 BREAKER TENDER(petrol. & coal prod.) DPT:685
coal breaker.
GED: 2 SVP: 2 EC: I 7 PA: L 4

Tends machine that breaks coal into lumps of specified size, prior to pulverizing:
Starts steel drum which revolves, breaking coal as it tumbles and passes through perforations in drum. Starts conveyor to transfer coal to and from breaker. Observes flow of material on belt to detect and remove foreign material. Lubricates breaker, using grease gun and oil can. Cleans work area, using shovel and broom.

8171-166 COLOUR GRINDER(chem., n.e.c.) DPT:685
GED: 2 SVP: 2 EC: I PA: M 4

Tends roller mill that crushes and blends particles of pigment in batches of viscid organic materials, such as ointment and printing ink:
Starts roller mill and scoops pigment into hopper or pours ointment between revolving rolls. Observes distribution of pigment particles on roll of mill and adjusts roller clearance, by moving lever or by using hand tools and gauges, to obtain even grinding and blending of

pigments. Places container at discharge end of mill to collect batch. Covers container with lid and carries to storage area. May clean rolls and equipment, using brushes, cloths, solvents and hot water.

8171-170 CRUSHER TENDER(linoleum prod.) DPT:685
GED: 2 SVP: 2 EC: I 5 PA: L 4

Tends machine that crushes scrap vinyl and asbestos preparatory to reprocessing into floor tile: Pushes button to start continuous flow of scrap material from calendar and punch press to conveyors which carry material into crusher. Starts crusher and observes flow of material and turns handwheel to regulate speed of conveyor. Removes dirt and other foreign matter from conveyor by hand and dislodges jammed material. Presses button to feed mottle (pieces of vinyl and asbestos) to screens that separate material according to size. May replace full bins of mottle with empty ones, by operating electric handtruck.

8171-174 DICING-MACHINE TENDER(plastic prod.) DPT:685
GED: 2 SVP: 2 EC: I 5 PA: H 4

Tends dicing machine that automatically dices, weighs and bags extruded plastic materials: Observes automatic flow of material from cooling unit into dicing machine. Starts machine and moves lever to adjust cutter speed that regulates size of pellets cut. Sets dial on weigh-scale at discharge end of machine, to required weight. Positions empty bag or box under automatic discharge chute of dicing machine. Closes bag, using hand stitcher or heat sealer. Stacks bag or box on skid, for removal. Works as part of a crew. May tend auxiliary equipment, such as tumbler drier.

8171-178 HYDRATOR TENDER(cement, stone & clay) DPT:685
GED: 2 SVP: 2 EC: I 5 7 PA: L 4 7

Tends machines that crush, pulverize and hydrate limestone to produce hydrated lime for commercial use: Starts machine and moves panel controls to adjust automatic weighing hopper and conveyors that feed specified amounts of burnt limestone into machine. Turns valves to control spray of water onto lime in hydrator. Feels texture of product to ensure conformance to standards. Observes colour of hydrated lime through port holes in hydrator or pushes wooden testing rod into mixture and examines mixture colour on wood. May add colouring agent to mixture to impart ivory colour to finished product. May mix lime and water to make milk-of-lime slurry.

8171-182 PLASTICS GRINDER(plastic prod.) DPT:685
shredder, plastics.
GED: 2 SVP: 2 EC: I 5 PA: M 3 4

Tends machine that grinds particles of solid plastic materials to specified size: Starts machine and dumps or shovels plastic material into hopper, or starts automatic-feeding mechanism. Observes equipment to detect stoppages. Moves lever to fill drums with ground material and tags drums according to size and colour of ground plastic. Cleans equipment, using air hose, scrapers, solvents, cloths or brushes.

8171-186 SCRATCHER TENDER(linoleum prod.) DPT:685
GED: 2 SVP: 2 EC: I PA: H 3 4

Tends scratcher machine that granulates colour mix for use in hard-surface floor covering: Adjusts roll clearance and speed of scratcher motor to attain required particle size, by turning knobs and depressing levers. Starts scratcher

and positions pans under discharge trough to receive granulated mix from scratcher machine. Writes colour and pattern data on tickets to be retained on file.

8171-190 SHREDDING-MACHINE TENDER(chem., n.e.c.) DPT:685

cutter operator; steeping operator.
GED: 2 SVP: 2 EC: I PA: M 4

Tends machine that reduces wood pulp (cellulose) sheets into specified size, by action of cutting, grinding or caustic jet for use in making cellulose film or synthetic fibres: Places roll of wood pulp on conveyor, tears off protective wrapping from roll, using knife. Places mandrel through roll, mounts roll into unwinding brackets, and moves lever that lifts roll to unwinding position. Threads sheet into machine feed rolls, manually. Starts machine and observes discharge of shredded pulp into conveyor system. Adjusts braking device to prevent bulking or tearing of sheet. Records weight and number of rolls cut. Cleans equipment and working area, using brush, broom and trash can. May mount roll of wood pulp on unreeling stand, using overhead crane. May patrol several shredding machines to detect malfunctioning.

8171-194 RUBBER-CUTTING-MACHINE FEEDER(rubber) DPT:686

rubber cutter.
GED: 2 SVP: 2 EC: I PA: H 4

Feeds machine that cuts scrap rubber, rubber sheets and bales of crude rubber, into pieces, for further processing: Removes wood wrapping, metal straps or burlap covering, using cutters and transports bales to machine, using hand cart. Loads bale on machine bed, manually or using electric hoist. Moves lever to release hydraulic ram that pushes bale through stationary knives. May position layers of rubber on bed of cutting table, using hook, and move lever that releases blade of guillotine to cut rubber into strips. May weigh cut rubber material, using scale, to facilitate preparation of batches.

8171-198 SOAP CHIPPER(soap) DPT:686
GED: 2 SVP: 2 EC: I 5 7 PA: H 4

Feeds soap sheets into machine that reduces them to chips, and bags and weighs chips: Pushes button to start machine and conveyor belt. Drops soap sheets from storage bin to conveyor belt, which feeds them into machine hopper. Observes operation of chipping machine and discharge of chips to conveyor belt or into bagging hopper. Fills bags with chips, seals them using electric stitcher and lifts bags onto pallet. May route chips by conveyor belt to drying room, or spread them evenly in trays and convey trays to drying room. May hand stamp date code on bags.

8171-199 OTHER CRUSHING AND GRINDING OCCUPATIONS, CHEMICALS AND RELATED MATERIALS

This group includes crushing and grinding workers, not elsewhere classified; for example, those who feed fan-type grinding or beating machines in the treatment of fibres of filler materials used in making plastic materials; tend mills to dry and pulverize pasty chemical materials; tend rotating-micropulverizing and wet-milling machines to break up and pulverize titanium oxide into pigments; tend machines that crush and screen insulating mixture from electric furnaces in which carbon is graphitized. A typical example of an occupational title covered by this residual group definition is: Beater(chem., n.e.c.)

**8173-COATING AND CALENDERING OCCUPATIONS,
CHEMICAL AND RELATED MATERIALS**

This group includes occupations concerned with covering a variety of materials and objects with protective, decorative, preserving or other substance; imparting a desired finish or insuring uniform thickness in materials by pressure applied with machine rollers; and forming or pressing materials into sheets or layers. Activities include: coating, saturating, dipping, compressing, forming, laminating and vulcanizing.

Coating and Impregnating Occupations
8173-110 through 8173-158

8173-110 COATING-EQUIPMENT OPERATOR(metal stamp., press. & coat.) DPT:362
GED: 3 SVP: 5 EC: I 5 6 7 PA: M 4 7

Operates equipment that prepares metal assemblies for coating and coats metal assemblies with protective plastic coating: Tests cleaning and priming materials in tanks, by titration and colour comparison and adds chemicals and water as required to obtain specified concentration. Starts unit, observes cleaning and priming of metal assemblies and directs other workers to alter time and sequence of operations according to type of metal to be coated. Starts pre-heat oven and curing oven and adjusts thermostat to required temperature. Lifts metal assembly into pre-heat oven, using hoist, and allows assembly to heat for required time. Lowers heated assembly into tank of powdered or liquid plastic to fuse plastic to metal. Lifts coated assembly into curing oven, using hoist, to cure and glaze coating. Removes assembly from oven after curing and allows it to cool. Inspects assembly to ensure that coating is of prescribed thickness and that it has adhered to metal.

8173-114 LATEX-COATING-MACHINE OPERATOR(textile) DPT:682
GED: 3 SVP: 5 EC: I 4 PA: L 4 7

Operates machine that applies latex coating to carpets: Reads specifications to ascertain amount of latex coating to be applied, temperature of drying unit, and speed of machine to be maintained for various carpet styles. Starts pump to admit latex solution into trough, and opens steam or gas valves to heat trough. Operates switch to start rollers that move carpet through machine. Adjusts controls to regulate speed of machine, temperature of drying and cooling units and speed of applicator roll. Turns setscrew to adjust latex scraper according to quality of carpet being processed. Observes lights, speed, temperature and pressure gauges on control panel to ensure specified operating conditions. May clean machinery and associated equipment periodically, using air, water, or steam hoses and scraping tools.

8173-118 COATING-MACHINE TENDER(paper prod.; textile) DPT:685
GED: 3 SVP: 5 EC: I PA: M 4 7

Tends machine that coats cloth, paper, or other material to produce vinyl or adhesive coated products: Installs roll of material onto machine, using hoist. Threads material through rollers and onto take-up reel. Adjusts scraper blade or roller clearance to produce coating of specified thickness. Turns on dryer heating unit and starts machine when dryer temperature reaches specified setting. Turns valves to control flow of coating solution onto sheeting or into pan. Observes process to prevent slippage of sheeting from width guides, and turns valves and moves machine controls to correct such defects as streaks, wrinkles, and turned edges in material being processed.

8173-122 COATER, ASPHALT(asphalt roof.) DPT:662
GED: 3 SVP: 4 EC: I 5 7 PA: L 4 7

Operates machine to coat asphalt-saturated roofing felt with asphalt-

lime mix:

Threads saturated felt through machine rollers. Starts lime conveyor, turns thermostat control to regulate temperature of lime furnace, and turns wheels to attain specified proportion of lime to asphalt in coating mixture. Moves levers, and turns valves and setscrews to regulate machine speed, flow of coating mixture, coating roll tension, and depth of coating. Signals other worker to adjust machine speed at saturating and slate-coating units to prevent damage to felt.

8173-126 CARBON-COATER-MACHINE OPERATOR(misc. prod. fab., n.e.c.) DPT:682
coater, carbon paper.
GED: 3 SVP: 4 EC: I 7 PA: M 3 4 7

Operates machine that coats paper or plastic sheeting with coloured wax-oil solution to make carbon paper: Draws solution from storage vat, using pail, and pours solution into pans of machine. Transports roll of paper from storage area, using lift truck. Installs roll on machine and threads paper or plastic through series of rollers that apply coating, imprint back with identifying data and harden coating by chilling. Observes gauges and turns steam and cold water valves to regulate temperature of heating and chilling rollers. Starts machine and watches for defects in carbon paper, such as tears, slits, holes, light spots, blurred or incomplete printing, and lack of sheen in coating. Turns nuts that adjust tension of roll to eliminate wrinkles. Measures thickness of coated papers, using thickness gauge, to ascertain that specified quantity of coating is being applied. Cuts jammed or damaged paper from rolls, using knife. Cleans rollers and machine parts, using solvent and cloths. May cut samples for testing, using knife.

8173-130 PLASTIC-SPREADING-MACHINE OPERATOR(plastic prod.) DPT:682
GED: 3 SVP: 4 EC: I PA: M 4 7

Operates machines that spread synthetic resins and glass fibres over continuous sheet of plastics film to prepare materials for subsequent moulding: Moves controls to set and regulate width of sheet and to adjust line speeds with flow rate of materials. Moves plungers to start flow of synthetic resin solution through metering device. Observes gauges and starts pumps and degassing system on supply tanks to regulate pressure. Inserts thermometer into synthetic resin to verify temperature. Observes tachometers, flowmeters and gauges to verify specified process conditions.

8173-134 RUG-COATING-MACHINE OPERATOR(textile) DPT:682
GED: 3 SVP: 4 EC: I 5 PA: M 4

Operates machine that coats surface of woven or needle-punch rugs with vinyl or other coatings to prolong life of rug and retard soiling: Dumps specified amounts of coating ingredients into vat and starts mixer by pushing button. Turns valve to transfer coating mixture from vat to machine reservoir. Observes gauges and adjusts electrical controls to maintain specified temperatures in bath and drying compartments. Threads rug material through machine. Pushes switch to start machine that moves material under spray nozzles into drying compartments and to rewind roller. Cleans machine and equipment, using water, solvent, brush, scraper and chisel.

8173-138 BUCKLE-STRAP-MACHINE TENDER(rubber) DPT:485
GED: 2 SVP: 3 EC: I PA: L 4

Tends machine that coats uncured rubber or rubberized fabric strips with cement and winds them on drum to make straps of specified thickness for rubber footwear: Computes number and kind of bundles of strips required, and keeps production chart. Places uncoated strip behind drum, threads end through guides and cement reservoir, and inserts end in take-up groove of drum. Turns handwheel to set machine speed. Starts machine that winds strip on drum, ensuring each turn is aligned with edge and adheres to surface of previous turn. Observes operation to detect possible malfunctions. Pulls knife along drum groove, cutting across completely wound strip to form sheet. Pulls sheet from drum onto cutting table, using stick, and cuts sheets into straps of specified

length with knife, using triangular cutting bar as guide. Lifts rows of cut straps with stick and places them in bundle.

8173-142 SATURATING-MACHINE TENDER(asphalt roof.; linoleum prod.) **DPT:685**
saturator tender.
GED: 2 SVP: 3 EC: 1 3 5 7 PA: M 4 7

Tends machine that saturates continuous rolls of asbestos or felt paper with asphalt, tar or other substance to produce roofing felt or backing for hard-surface floor coverings:

Threads material through or around series of machine rollers. Starts machine and adjusts controls to regulate speed and tension of rolls, and flow of saturant on material and rollers to ensure uniform saturation and prevent damage to materials. Observes gauge and adjusts thermostat to regulate temperature of saturant in reservoir. Observes continuous sheet of material as it passes through machine to detect flaws.

May splice ends of rolls together, using splicing iron and hand snips. May be designated according to material processed; for example, Roofing-Felt Coater(asphalt roof.)

8173-146 SPREADER MAN(rubber; textile) **DPT:685**
GED: 2 SVP: 3 EC: 1 6 7 PA: M 4 7

Tends spreader machine that coats or impregnates fabric with material, such as plastic or rubber compounds:

Weights fabric roll, liner shell and core, to permit subsequent weight comparison with coated roll. Threads fabric under spreader blade around and between rollers, through coating reservoir if machine is equipped with automatic compound feed, and through curing oven and onto wind-up roll. Turns handwheels to adjust height of spreader blade and setscrews to adjust and set guides for width of spread, using wrench. Turns steam valves to regulate heat of drying rolls. Opens valves to allow coating compound to flow into reservoir, or spreads on fabric in front of spreader blade, placing containers on either side to catch excess solution. Starts machine and observes fabric for sufficiency and evenness of coating, and verifies gauge of material, using micrometer. Weighs coated roll to determine number of passes required to meet established standards.

May tend machine equipped with additional rolls to combine two layers of fabric. May repeat procedure to build up coating to required thickness. May thread fabric through dip tank to coat both sides of material. May tend machine that coats rubberized cloth with varnish to provide hard water-proof finish and be designated, Varnish-Machine Tender

8173-150 COATING-MACHINE TENDER(linoleum prod.) **DPT:665**
GED: 2 SVP: 3 EC: 1 PA: H 4 5 6

Tends machine that coats asbestos-fibred or asphalt-impregnated felt paper with paint or lacquer, to seal in asbestos or asphalt and to prevent discolouration of light coloured enamels:

Presses buttons to start machine that coats felt paper with paint or lacquer. Observes signal lights on panel to ensure proper rewinding of coated paper in festoon oven for drying. Adjusts oven controls to maintain specified temperature. Removes rolls of rewound paper from ovens when properly dried, using hoist. Advises foreman when supply of paint or lacquer runs low, and directs worker to bring supplies as required.

8173-154 COATING-MACHINE FEEDER(linoleum prod.) **DPT:686**
GED: 2 SVP: 2 EC: 1 PA: H 3 4

Feeds machine that coats felt paper with lacquer or paint, performing any combination of the following duties:

Mounts roll of felt paper on machine brackets, using hoist, and manually feeds end of paper through rollers. Observes and maintains lacquer or paint level in pans to ensure that rolls remain covered. Examines impregnated felt paper to detect tears. Notifies machine tender of faulty processing. Removes dried painted floor covering from machine, using hoist. Splices end of roll. Cleans rollers with brush, while machine is running, to prevent blockages.

8173-158 SATURATING-MACHINE FEEDER(asphalt roof.; linoleum prod.) **DPT:686**
felt hanger.
GED: 2 SVP: 2 EC: 1 3 5 6 7 PA: H 3

Installs rolls of untreated roofing, felt or floor-covering material, with aid of other worker, on feedrack and prepares roll for continuous asphalt-saturating process:

Inserts spindle in mandrel and pushes or lifts roll onto feedrack. Positions washer and secures locking device over spindle ends. Cuts away roll covering, using knife. Threads end of felt through rollers, and splices it to end of previous roll with tape and hot iron. Examines felt as roll unwinds and repairs defects, such as holes and tears, using tape and iron.

Calendering Occupations 8173-178 through 8173-214

8173-178 CALENDER OPERATOR(plastic prod.; rubber) **DPT:682**
GED: 3 SVP: 5 EC: 1 7 PA: M 4

Operates machine, singly or as member of crew, to imprint or form rubber or plastic sheeting or rubberized fabric:

Turns steam valves to regulate heat of rolls, judging heat by progress of material. Turns handwheels to adjust distance between rolls. Verifies thickness of calendered material, using gauges. Inserts pieces of rubber between rolls to feed machine, or positions conveyor feeder in front of rolls that carry strip of rubber from warmer mill for continuous feeding. Threads fabric or sheeting around and between rollers and through water coolant tanks and onto pickup reel core or takeoff conveyor. Adjusts knives that trim salvage, or cuts material to specified width, by moving knives along bar and turning setscrews. Adjusts weights on arms of holders so that knives will press against rolls and cut through thickness of material processed. Observes calendered material for defects, such as bubbles, lumps, streaks and pitting, indicating faulty stock.

May direct other workers who feed stock to machine, change takeup reels, remove and inspect stamped parts, and place them in books, boards and frames.

8173-182 CALENDER OPERATOR, MULTI-ROLL(plastic prod.; rubber) **DPT:682**
GED: 3 SVP: 5 EC: 1 3 7 PA: L 4 7

Operates multi-roll calender to produce plastic sheeting and roll sheets to specified thickness:

Adjusts automatic temperature control to heat calender rolls to specified temperature. Starts machine and adjusts conveyor speed to regulate feeding of stock. Turns adjustment wheels of rollers to specified settings to stretch fabric for calendering. Examines calendered material for defects, such as wrinkles, holes, lines or blisters, and adjusts machine setup when necessary. Verifies thickness and width of calendered stock with gauge and ruler. Positions knife to trim edge of calendered fabric.

May direct other workers in changing feed or take-up rolls.

8173-186 SPONGE-RANGE OPERATOR(textile) **DPT:682**
GED: 3 SVP: 5 EC: 1 3 PA: L 4 7

Operates sponge range consisting of series of units, such as calender machine, curing press and steam cabinet, to apply sponge rubber, silicon-foam or latex sheets to back of carpeting:

Turns valves to set temperature of curing press and humidity of steam cabinet, according to thickness of rubber and type of carpeting. Threads carpeting to be processed through units. Starts machine and observes flow of carpeting through units, gauges thickness of coated carpeting with micrometer, and feels and scans carpeting to detect variations from standards. Turns handwheel to regulate speed of curing press so stock will be vulcanized according to specifications. Increases or decreases thickness of stock sheet, by regulating controls. Adjusts temperature of curing press and humidity of steam cabinet to maintain specified quality. Changes blanket of curing press, using hand tools. Records style number and yardage of carpeting processed.

8173-190 CALENDER OPERATOR, FLOOR TILE(linoleum prod.) DPT:682
GED: 3 SVP: 4 EC: I 5 PA: L 4 7

Operates calender machine that rolls and compresses materials, such as asphalt, plastic, rubber or vinyl-asbestos, into sheeting to produce floor tiles:

Sets thermostat to obtain specified roller temperature and turns valves to admit coolant into other rollers. Starts calender machine, observes temperature-recording charts, and adjusts controls to maintain heat of rollers within specified limits. Turns knobs to regulate speed of conveyors moving material to calender.

May regulate flow of marbleizing chips and wax onto sheeting to obtain specified pattern.

8173-194 SPONGE-PRESS OPERATOR(rubber) DPT:682
GED:3 SVP: 4 EC: I 3 5 6 PA: M 2 3 4 7

Operates conveyor-type calendering and vulcanizing machine that rolls out and cures, in continuous process, sponge rubber sheeting for use as gaskets, underlay for carpeting, and footwear insulation:

Turns handwheels and capstan screws to set distance between calender rolls, and between vulcanizing plates and conveyor. Verifies setting with feeler gauges. Starts calender unit to produce uncured sponge rubber sheeting. Sets controls that regulate temperature of each vulcanizing plate. Observes temperature gauges and starts machine- conveyor, when plates reach specified temperature, to vulcanize calendered sheeting. Replaces worn canvas conveyor belts between calendering and vulcanizing units, using portable vulcanizing machine to bond ends. Adjusts tension bars that tighten belt, using wrenches. Mounts roll of underlay backing cloth in cradles, using electric chain hoist. Threads backing cloth through series of rollers that press it onto sponge rubber sheeting. Adjusts width between calender rolls to regulate thickness of sheeting and adjusts temperature of vulcanizing plates when there are deviations from specifications in thickness or curing.

May operate vulcanizing wire-mesh conveyor with warming mill, calender and vulcanizing plates to expand and vulcanize rubber to produce waffle-imprinted underlay. May be designated according to machine operated; for example, Rug-Underlay-Machine Operator

8173-198 CALENDER LET-OFF MAN(plastic prod.; rubber) DPT:682
GED: 3 SVP: 3 EC: I 4 PA: M 4 7

Operates let-off, dipping and drying units of four-roll calender that bonds rubber to fabric:

Positions fabric roll in let-off rack, using hoist, and starts festoons. Splices beginning of undipped roll to end of roll in process, with gum strip, and aligns and cures splice in vulcanizer. Adjusts guides and pre-tension rolls to maintain specified width of fabric during dip process. Moves controls on central panel to adjust drier temperature, solution level in dip tank, and festoon speed.

May tend wind-up rack when operating dip unit independently of calender. May notify other workers of material defects or machine malfunction.

8173-202 LAMINATING-MACHINE TENDER(rubber) DPT:685
GED: 2 SVP: 3 EC: I 4 5 6 PA: M 3 4 7

Tends machine that combines two continuous sheets of material; such as treated rubber, sponge rubber, fabric, felt, fleece or nylon cord:

Transfers rolls of specified material to machine, using handtruck. Hoists rolls of material from handtruck into machine cradles, using chain hoist. Turns steam valve to heat rollers. Threads ends of each roll of material to be combined over rollers, between combining rollers and onto single take up roll. Sets pressure of combining rollers to produce adhesion of both materials. Starts machine and moves lever to engage clutch to start material winding. Controls tension and keeps edges of rolls aligned during winding. Cuts and tapes ends of unused material, reads yardage indicator and marks amount left on roll.

May thread polyethylene separator material through machine onto laminated windup roll to prevent layers sticking together. May work as member of a two man team. May maintain production and scrap records.

8173-206 PLANISHING-PRESS TENDER(plastic prod.) DPT:685
GED: 2 SVP: 3 EC: I PA: L 4

Tends planishing press to impart finish to plastic sheets:

Selects metal planishing plates according to finish desired. Places plastic sheets between plates and slides plates into platens of hydraulic press. Starts press and sets time cycle control to heat press to specified temperature, and compress plastic sheets between plates. Removes plates from platens after specified time and strips plastic sheets from plates. Examines sheets for defects and adjusts heat and pressure controls as necessary. Cleans plates, using cloths and solvents.

8173-210 CALENDERING-MACHINE TENDER(plastic prod.; rubber) DPT:685
GED: 2 SVP: 2 EC: I PA: M 3 4

Tends calendering machine that forms rubberized fabric or plastic sheeting:

Replaces empty shell on let-off rack with roll of base fabric, using chain hoist. Splices end of fabric to trailing end of roll in process using gum strip. Aligns and cures splice in vulcanizer. Sets yardage counter, starts machine and observes operation to detect faulty calendering and adjusts sheeting speed and tension. Cuts calendered fabric with scissors, and lowers full roll to floor, using hoist. Positions liner roll on holding rack and full roll on winder rack, using hoist. Feeds liner into fabric on windup roll to provide separation of layers of calendered fabric. Trims ragged fabric edges with knife. Examines fabric for wrinkles or other defects, and tags finished rolls to show weight, yardage and stock type.

May convey fabric rolls between storage and production areas, using forklift truck. May clean work area and machine.

8173-214 CALENDER-WIND-UP TENDER(plastic prod.; rubber) DPT:685
GED: 2 SVP: 2 EC: I 6 PA: M 4 7

Tends wind-up rack on multi-roll calender to wind calendered fabric, such as vinyl and rubber, on liner rolls:

Starts festoons that accumulate fabric during roll change and stops wind-up rack. Cuts fabric with scissors between machine and full roll and guides fabric into roll on auxiliary rack with aid of other worker. Stops festoons and starts wind-up rack, and moves tension and speed levers to wind new roll. Places full roll on scale, using hoist. Reads yardage gauge and compares roll weight with standard on yardage chart for conformity to specifications.

May report weight discrepancies and fabric defects.

Miscellaneous Coating, Calendering And Related Occupations 8173-234 through 8173-299

8173-234 HOSE MAKER, MACHINE(rubber) DPT:684
GED: 3 SVP: 3 EC: I PA: M 4 7

Operates machine that winds plies of rubberized fabric and gum-rubber stock on rubber tubing to form industrial hose:

Places mandrel and precut rubber tubing on workbench. Swabs mandrel with soapstone solution and pushes it into rubber tubing. Adjusts machine guides to accommodate ply stock of specified width. Positions mandrel with tubing on machine rollers and swabs rubber tubing with cement to provide adhesive surface. Positions precut ply stock between guides and depresses pedal to wind ply stock around rubber tubing. Cements brand label on hose in specified location. Examines hose for wrinkles and loose plies. Trims and cements tubing to seal row ends of ply stock.

May smooth wrinkles and press plies together, using fingers and roller. May clamp and cement metal fittings on ends of hose, using rubber cement and hand tools.

8173-238 FLOOR-TILE BACKER(linoleum prod.) DPT:685
GED: 3 SVP: 3 EC: I PA: L 4 7

Tends machine that applies removable paper-backing to adhesive-coated floor tiles:

Positions roll of paper in feed rack of machine. Sets machine guides according to size of tile to be backed. Adjusts paper-cutting die to match size of tile. Starts machine and ensures that flow of tile and paper is synchronized.

**8173-299 OTHER COATING AND CALENDERING
OCCUPATIONS, CHEMICALS**

This group includes chemical coaters and calenderers, not elsewhere classified; for example, those who cure industrial belting, tend machines that apply granulated slate and mica to asphalt-coated roofing felt, or spread glutinous material or paint onto cloth, backing material, or floor tiles. Typical examples of occupational titles covered by this residual group definition are:

Coater, Slate(asphalt roof.)
Curing-Press Tender(rubber)
Spreading-Machine Tender(chem., n.e.c.)

**8176-INSPECTING, TESTING AND SAMPLING
OCCUPATIONS: CHEMICAL, PETROLEUM,
RUBBER, PLASTIC AND RELATED MATERIALS
PROCESSING**

This unit group includes occupations in inspecting, testing and sampling work as described under the term titles, 02-170 INSPECTOR (any ind.), 02-430 TESTER (any ind.), 02-330 SAMPLER (any ind.), concerned with quality control activities in chemical, petroleum, rubber, plastic and related materials processing. Occupations concerned with inspecting both food and drugs are classified in Unit Group 8296, INSPECTING, TESTING, GRADING AND SAMPLING OCCUPATIONS, PROCESSING, N.E.C.
